Re: Case 18-M-0084 – Comprehensive Energy Efficiency Initiative.

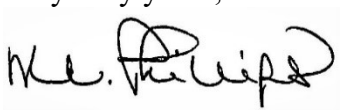
Dear Ms. Milonovich,

I received your December 20, 2022 letter, filed on behalf of the New York State Energy Research and Development Authority (NYSERDA), requesting an additional extension of time to publish the Statewide Energy Efficiency & Electrification Potential Study for the NYS Buildings Sector (Buildings Sector Study), as required by the *Order Authorizing Utility Energy Efficiency and Building Electrification Portfolios Through 2025* (Order), issued January 16, 2020, in this proceeding. The Buildings Sector Study is currently due by December 30, 2022.

You advise that NYSERDA has been working with its contractor and is in close collaboration with Department of Public Service staff, the Utilities, LIPA, and NYPA, and has made significant progress on the Buildings Sector Study. You, however, state that additional time is required to make corrections and revisions that will result in a thorough and accurate analysis.

Based on the information provided, the New York State Energy Research and Development Authority is granted an extension until February 28, 2023, to publish the Statewide Energy Efficiency & Electrification Potential Study for the NYS Buildings Sector. This extension is granted in order to promote the fair, orderly, and efficient conduct of this proceeding, and this ruling will be posted on the Department's website.

Very truly yours,



Michelle L. Phillips
Secretary
