Q. Please state the names of the members of this Customer Service, Energy Efficiency, and Retail Access Panel (“Panel”).

A. We are Mark Beaudoin, Joni Fish-Gertz, Carl Taylor, Theresa VanBrooker, and Marc Webster.

Q. Are you the same Panel members that sponsored the Direct Testimony of the Customer Service, Energy Efficiency, and Retail Access Panel on behalf of New York State Electric & Gas Corporation (“NYSEG”) and Rochester Gas and Electric Corporation (“RG&E” and together with NYSEG, the “Companies”) in these proceedings?

A. Yes.

Q. Are there any updates to the positions of the Panel members?

A. Yes. Ms. Fish-Gertz is currently the Manager, Non-Wires Alternatives in the Business Transformation Group.

Q. What is the overall purpose of the Panel’s Rebuttal Testimony?

A. We address the testimony of the New York State Department of Public Service Staff (“Staff”) Consumer Services Panel (“Staff CSP”) and portions of the testimony of Gregg C. Collar, on behalf of the New York State Department of State, Division of Consumer Protection, Utility Intervention Unit (“UIU”), that relate to service quality measures, Low Income Programs, closure of walk-in offices, residential service terminations, customer deposits, credit and debit card payments, trip charges, and outreach and education (“O&E”). We will also

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 address the energy efficiency-related testimony of Karl R. Rabago, filed on behalf
2 of Pace University.

3 Q. Is the Panel sponsoring any exhibits in support of its Rebuttal Testimony?

4 A. Yes. The Panel is sponsoring the following exhibits:

- 5 1) Exhibit __ (CSEERA-R1) provides the Companies' audit recommendations
6 related to Customer Service Quality Measures;
- 7 2) Exhibit __ (CSEERA-R2) contains RG&E's year-to-date New York State
8 Public Service Commission ("PSC" or the "Commission") complaint rate;
- 9 3) Exhibit __ (CSEERA-R3) includes the August 24, 2015 Letter Comments
10 submitted on behalf of NYSEG and RG&E in Case 14-M-0565 – Energy
11 Affordability for Low Income Utility Customers;
- 12 4) Exhibit __ (CSEERA-R4) includes the Companies' October 2, 2015 Winter
13 Protections letter;
- 14 5) Exhibit __ (CSEERA-R5) contains a copy of the Siena College AT&T
15 Consumer Usage and Perception Study conducted by Siena College Research
16 Institute, November 16 – 23, 2014;
- 17 6) Exhibit __ (CSEERA-R6) includes a map of walk-in offices, the unique
18 customers who have used walk-in offices and alternate pay locations;
- 19 7) Exhibit __ (CSEERA-R7) shows the percent of low income customers using
20 walk-in offices;
- 21 8) Exhibit __ (CSEERA-R8) is the Companies' response to data request
22 NYRC-0926 (DPS-311);

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

- 1 9) Exhibit __ (CSEERA-R9) details the average increase in electric supply costs
2 over the period 2005 – 2014;
- 3 10) Exhibit __ (CSEERA-R10) includes information showing trends of
4 outbound calls;
- 5 11) Exhibit __ (CSEERA-R11) contains the Companies’ “Self-Direct Guidance
6 Document”; and
- 7 12) Exhibit __ (CSEERA-R12) provides the Companies’ responses to data
8 requests issued in Case 15-M-0252.

9 Q. Does the Panel have any preliminary comments concerning the Staff CSP and
10 UIU Witness Collar’s testimony in these proceedings?

11 A. Yes. In general, we are disappointed that Staff rejected proposals that the
12 Companies demonstrated are in the best interest of customers. The Companies’
13 recommendations in our Direct Testimony resulted from significant analysis.
14 Staff, however, dismisses many of these recommendations with limited or
15 inadequate justification. Additionally, in terms of residential service terminations,
16 both Staff and UIU offer proposals that will have significant negative impact on
17 the Companies’ ability to efficiently manage collection of past due debt.

**REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY
EFFICIENCY, AND RETAIL ACCESS PANEL**

1 **II. RESPONSE TO STAFF CONSUMER SERVICES PANEL**

2 **A. Customer Service Quality Measures**

3 Q. Did Staff recommend modifications to the Companies' proposals related to
4 Service Quality Measures?

5 A. Yes. At page 16, the Staff CSP dismisses the Companies' proposal for
6 symmetrical targets for performance measures and elimination of Percent of
7 Estimates as a performance indicator. Staff also proposes, at page 18, a
8 modification in the target for PSC complaint rate for RG&E.

9 Q. Please summarize Staff's position on symmetrical targets for
10 performance measures.

11 A. Staff indicates that positive incentives provide the Companies "a revenue increase
12 without significant improvements to customer service" (Staff CSP at 16) and that
13 incentives "would place a financial burden on the ratepayers without a
14 commensurate improvement in customer service" (Staff CSP at 16-17).

15 Q. Does the Panel agree with Staff's position?

16 A. No. Contrary to Staff's position, positive incentives will provide the Companies
17 with the means to creatively provide an enhanced customer experience.

18 A positive incentive mechanism will create a "win/win" atmosphere, allowing the
19 Companies to explore innovative service options that will benefit customers. For
20 example, the Companies may conduct a cost/benefit analysis of a new technology.
21 With the potential for an incentive, this may enable the investment in a service
22 that may benefit customers. Often the "soft" benefit of enhanced customer

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 satisfaction is not enough to justify the investment, especially if targets are
2 already being met.

3 Q. Please address Staff's rejection of the Companies' proposal to eliminate Percent
4 of Estimates as a performance indicator tied to a revenue adjustment.

5 A. Staff recommends rejection of this proposal, stating that elimination of this
6 measure may cause the Companies to have an over-reliance on estimates in the
7 creation of bills (Staff CSP at 16).

8 Q. Do you agree with this position?

9 A. No. First, there are only three New York State utilities that have Percent of
10 Estimates as a measure tied to revenue adjustments (NYSEG, RG&E and
11 National Fuel Gas Distribution Corporation). This limited number demonstrates
12 that there is not a consistent Commission approach to ensuring companies
13 minimize estimates for billing purposes. Staff has not justified disparate
14 treatment for NYSEG or RG&E that would support a different approach
15 applicable to the Companies. Second, as part of Case 91-M-0500 (Customer
16 Service Standards), all New York State utilities are required to submit monthly
17 results for a set of performance measures. These monthly statistics include
18 Percent of Estimates, thus ensuring that, to the extent it is viewed as useful, there
19 will continue to be visibility on the Companies' results in this area. Third, the
20 Companies recognize that it is in their best interests to minimize estimated bills,
21 as timely actual bills are a critical component of customer satisfaction. Any
22 increase in estimated bills would have a negative impact on the Companies'

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 results for Calls Answered in 30 Seconds, Contact Satisfaction and PSC
2 Complaints, which we propose continue to be tied to revenue adjustments.

3 Q. Would the Panel please address Staff's testimony concerning the Operational
4 Audit that has recently taken place?

5 A. Yes. The Companies worked collaboratively with the auditor, Overland and
6 Jacobs, and with Staff and other parties throughout the audit process which
7 resulted in very minor findings related to the reported results for Service Quality
8 Measures for NYSEG and RG&E (Exhibit __ (CSEERA-R1)). The
9 recommendation and timing of potential changes to the measures that are part of
10 the Operational Audit should have no impact on the Commission's ability to
11 consider incentives in this case as a result of the Companies' strong performance
12 as demonstrated by the audit results.

13 Q. Please respond to Staff's recommendation to modify the target for RG&E's PSC
14 complaint rate.

15 A. The Companies disagree with this recommendation. With its recommendation of
16 a 44% reduction in RG&E's current target, Staff is, in essence, penalizing RG&E
17 for good performance. Additionally, the sample size for PSC complaints is
18 extremely small, meaning that a small change in the population can have a
19 considerable impact on results. Exhibit __ (CSEERA-R2) shows RG&E's
20 complaint rate year-to-date for 2015. As of August 2015, the PSC complaint rate
21 for RG&E is at 0.7 per 100,000 customers. RG&E currently has averaged 3.55
22 chargeable complaints per month from January 2015 through September 2015, for

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 a total of 32 chargeable complaints. By a simple extrapolation, if this trend
2 continued through December 2015, RG&E would have 43 complaints and a
3 complaint rate of 0.9 per 100,000 customers for the year.

4 If RG&E were to incur only 4 more chargeable complaints beyond the
5 projected level (i.e., 47), the complaint rate would be 1.0, equal to the penalty
6 threshold Staff proposes. This would translate to averaging 3.91 complaints per
7 month for the year. As is evident, an amazingly small difference in complaints
8 per month (3.91 vs. 3.55) can be the difference between achieving a threshold and
9 not meeting it, and underscores how sensitive the complaint rate can be to such
10 low thresholds.

11 To underscore this sensitivity for RG&E, every 5 additional chargeable
12 complaints per year would add 0.1 to the complaint rate for the year. Thus, for
13 example, 52 complaints for the year would yield a complaint rate of 1.1, 57
14 complaints would yield a complaint rate of 1.2, and so on.

15 Q. Do the Companies agree with Staff's recommendation to continue the doubling
16 provision of the negative revenue adjustments ("NRAs") contained in the
17 Companies' Joint Proposal approved in Case 09-E-0715 et al. ("2010 JP")?

18 A. Provided that targets are set at an appropriate level, the Companies accept
19 this recommendation.

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 **B. Low Income Programs**

2 Q. Please generally address Staff’s recommendation for Low Income Programs.

3 A. The Companies agree that recommendations must align with those contained in
4 the Staff Report issued in the Low Income Affordability proceeding
5 (Case 14-M-0565) (“Staff Report”). The Companies concur with Staff’s
6 recommendation in its testimony in this case that no existing program participants
7 should lose the benefit they currently receive under the Companies’ current Low
8 Income Programs.

9 Q. Would the Panel please specifically address Staff’s recommendation in the Staff
10 Report concerning the Bill Reduction component of the program?

11 A. The Staff CSP notes that the Staff Report recommends the automatic enrollment
12 of all Home Energy Assistance Program (“HEAP”) recipients into the program
13 and the Companies agree with that recommendation (Staff CSP at 24). The
14 proposal for tiered benefits, also proposed in the Staff Report, is reasonable and
15 acceptable to the Companies. The amounts proposed by Staff also appear to be
16 reasonable. As stated in our comments in Case 14-M-0565 – Energy
17 Affordability for Low Income Utility Customers (Exhibit __ (CSEERA-R3)), the
18 Companies recommend that the tier for each customer be specifically identified
19 by the New York State Office of Temporary and Disability Assistance (“OTDA”)
20 rather than the utility having to determine the tier based on benefit amount. This
21 would ensure the accuracy of the Bill Discount benefit amount as the qualifying
22 party (OTDA) will be specifying the categorization for the customer. Otherwise,

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 the utility will have to “back into” the appropriate categorization based on the
2 grant amount.

3 Q. Do the Companies agree with the recommendations related to other
4 program components?

5 A. Not entirely. The Companies agree with the recommended funding of the Arrears
6 Forgiveness program at 10% of the overall program budget. This level is
7 consistent with funding that the Companies currently have with their existing
8 program and is consistent with Staff’s proposal in Case 14-M-0565 – Energy
9 Affordability for Low Income Utility Customers.

10 Q. Is Staff’s elimination of administrative expenses associated with the Low Income
11 Programs appropriate?

12 A. No. We do not agree with the elimination of administrative expenses and
13 disagree with Staff’s characterization at page 29 that we are an outlier on this
14 issue. All utilities conduct some level of administrative activities associated with
15 their Low Income Programs. The difference is simply where and how the
16 activities and their associated costs are accounted for, not that the Companies are
17 the only utilities recovering such costs. Staff also compares the 30% funding
18 (agreed upon with all parties through stipulation in the Companies’ 2010 JP) with
19 that of Central Hudson Gas & Electric Corporation (“Central Hudson”), but the
20 comparison is inapt and potentially inaccurate. The percentage used for Central
21 Hudson in Staff’s testimony is calculated as a percent of their entire low income
22 budget. The Companies’ administrative budget is only calculated as a percentage

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 of the program components that require monitoring and follow up action by
2 a representative. If we were to make a similar comparison to Central Hudson,
3 NYSEG and RG&E’s administrative budgets are only 6% and 8.4%, respectively.
4 This level of administrative expense is not excessive and the Companies are not
5 “outliers” with respect to the level of expenses or their recovery.

6 Q. Do the Companies agree that administrative expenses are offset by a reduction in
7 collection expenses, as Staff testifies?

8 A. No, Test Year collection costs already reflect any “reduction” that resulted from
9 the benefits of a low income program, and, therefore, it is unrealistic to expect an
10 additional offset in the future.

11 Q. Please address Staff’s recommendation that the Commission reject the
12 Companies’ proposal for Budget Balance Forgiveness.

13 A. The biggest challenge facing low income customers is the general affordability of
14 the monthly bill. The Companies’ recommendation to offer Budget Balance
15 Forgiveness at the end of a budget cycle would allow stability of the bill for the
16 customer. A “clean up” bill at the end of a 12-month budget cycle can be the one
17 thing that makes the bill unaffordable for a customer. We propose that the
18 Companies be allowed to implement a pilot for this program to determine if it has
19 a positive impact on the customers’ ability to successfully complete the Arrears
20 Forgiveness program. To undertake this pilot, it must be funded at the proposed
21 level along with administrative expenses to support it. The Companies would

**REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY
EFFICIENCY, AND RETAIL ACCESS PANEL**

1 monitor the success of the program as a “pilot” and provide statistics and reports
2 to evaluate its overall impact on the Low Income Programs.

3 Q. Would the Companies be able to fund a Budget Balance Forgiveness program
4 considering the budget caps proposed in Case 14-M-0565?

5 A. Yes. Funding of a Budget Balance Forgiveness program would still leave the
6 Companies below the maximum funding amounts proposed in Staff’s Report in
7 Case 14-M-0465.

8 Q. Do the Companies agree with Staff’s recommendation to eliminate the Reconnect
9 Waiver component of the Low Income Programs?

10 A. Yes, the Companies agree to eliminate this component.

11 Q. Please address whether the Companies agree with Staff’s recommendation to
12 continue the current program reconciliation.

13 A. For the existing program components, we are in agreement. Additionally,
14 because the Budget Balance Forgiveness program is new, we recommend that this
15 funding be reconciled along with the bill reduction funding.

16 Q. Please address the remaining Low Income Programs-related testimony of the
17 Staff CSP.

18 A. The Staff CSP recommends same day reconnection of service for residential
19 customers whose service was disconnected for non-payment at the meter and who
20 become eligible for reconnection by 5 p.m., Monday through Friday. Staff
21 testifies that this would “help protect the health and safety of customers.”
22 (Staff CSP at 32). The Companies strongly disagree with this proposal.

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 The Companies fully comply with NYCRR Title 16, which requires reconnection
2 of service within 24 hours of resolution of arrears. Requiring the Companies to
3 reconnect more quickly is unwarranted and goes well beyond what is required by
4 law. The Companies already undertake multiple “voluntary” measures
5 (Exhibit __ (CSEERA-R4)) to ensure the health and safety of customers. These
6 measures include limiting terminations during periods of high and low
7 temperatures and extra protections for vulnerable customers. Requiring same day
8 reconnects would result in a significant change to the Companies’ current staffing
9 and would add significant, unnecessary costs.

10 **C. Closure of Walk-In Offices**

11 Q. What is Staff’s proposal concerning the Companies’ request to close certain walk-
12 in offices?

13 A. Staff recommends rejection of this proposal, stating that “the importance of
14 accessible walk-in offices should not be underestimated.” (Staff CSP at 35).
15 Staff further states that although all transactions can be completed over the phone
16 or via the internet, not all customers have access to a phone or computer. (Staff
17 CSP at 36). Additionally, Staff indicates that “unbanked” customers need the
18 offices to make cash payments.

19 Q. What is the Companies’ response to Staff’s position on this topic?

20 A. The Companies note that they are the only Upstate New York utility that has not
21 been allowed to close their walk-in offices. Staff’s position that “the importance
22 of accessible walk-in offices cannot be underestimated” (Staff CSP at 36) is

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 contradicted by their prior action in allowing other utilities to close their walk-in
2 offices. It is important to note that we are not recommending closure of all such
3 offices; rather, we recommended a staged closure, starting with those offices with
4 limited traffic, to ensure that there are no negative impacts to customers. The
5 Companies disagree with Staff’s contention that all customers cannot complete
6 necessary transactions by either a phone or computer. A recent Siena College
7 Research Institute study in New York indicates that a high percentage of residents
8 have a cell phone (including smartphones) and many have both a cell phone and a
9 landline. Exhibit __ (CSEERA-R5). We demonstrated in our Direct Testimony
10 that the vast majority of customers utilize phone or internet channels to
11 complete transactions. Thus, it is reasonable to conclude that 100% of the walk-
12 in office transactions can be managed through these other channels.

13 Q. Do the Companies agree with Staff’s statement that offices are necessary for the
14 “unbanked” (Staff CSP at 37)?

15 A. No. Exhibit __ (CSEERA-R6) and Exhibit __ (CSEERA-R7) show graphical
16 representations of the offices proposed for closure, the unique customers who
17 have used the offices and other payment locations available within the area.
18 Customers can make cash payments at any Walmart or Western Union location.
19 These payments are posted daily and the Companies have excellent performance
20 related to timely posting of payments.

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 Q. What is your response to Staff’s position that closing the offices “would likely
2 have a disproportionately severe impact on elderly and payment-challenged
3 customers, particularly lower-income customers who have limited transportation
4 options” (Staff CSP at 37)?

5 A. We disagree with this statement. As shown on Exhibit __ (CSEERA-R7), the
6 majority of customers utilizing the walk-in offices proposed for closure are not
7 identified as “low income.”

8 Q. Turning to the proposed closure of Waring Road, please address Staff’s reasons
9 for keeping this office open.

10 A. Although we agree that this is a busy office, we continue to be concerned with
11 safety in the plaza where it is located. We demonstrated through a data request
12 response (Exhibit __ (CSEERA-R8)) that there have been at least three bank
13 robberies in this plaza supporting our safety concerns about this location.
14 Locating walk-in offices in our own buildings gives us a much greater ability to
15 ensure the safety of both our customers and our employees. Our commitment to
16 customer and employee safety is the reason why we have recommended closing
17 this office and moving traffic from Waring Road to our two other
18 Rochester offices. We do not agree with Staff’s position that this would
19 “significantly increase travel time” (Staff CSP at 34) as the other Rochester
20 offices are a short distance from Waring Road, as shown in this Panel’s
21 Exhibit __ (CSEERA-13), provided with our Direct Testimony. Placing the walk-

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 in traffic in our own office is greatly preferred to another location, even one with
2 additional security measures greater than are available at Waring Road.

3 Q. Would you please further address Staff’s position concerning closure of walk-
4 in offices?

5 A. As we noted previously, NYSEG and RG&E are the only upstate New York
6 utilities that are still required to have walk-in offices. The Commission has
7 allowed other New York utilities to close offices and as a result it is reasonable to
8 conclude that closure of walk-in offices does not lead to “increased difficulty for
9 vulnerable customers in establishing, maintaining and paying for utility service,”
10 as Staff asserts (Staff CSP at 38). Thus, the Commission should permit the
11 Companies to close the offices requested at this time, with careful consideration
12 of phased office closures in the future.

13 **D. Residential Service Terminations**

14 Q. What did Staff recommend related to residential service terminations?

15 A. Staff recommends an incentive/penalty mechanism that Staff claims would
16 encourage the Companies to reduce service terminations while at the same time
17 maintaining or reducing uncollectibles. In explaining its position, Staff makes
18 various incorrect claims concerning compliance with the Home Energy Fair
19 Practices Act (“HEFPA”).

20 Q. Do the Companies agree with Staff’s mechanism?

21 A. No. The Companies do not agree with Staff’s position that terminating a service
22 for non-payment is in any way in conflict with the intent of HEFPA. While we

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 agree that HEFPA was established to protect the residential population, it also
2 establishes specific steps that must be taken on the part of both the utility and the
3 customer as they relate to non-payment of bills. The Companies comply with all
4 aspects of HEFPA and go above and beyond requirements to work with customers
5 to avoid service terminations. Customers are sent reminders and termination
6 notices, referred to Department of Social Services and offered payment
7 agreements as required by HEFPA. Additionally, the Companies perform many
8 outbound “reminder” calls. These actions are taken to provide the customer with
9 notice and options to assist them prior to a service termination. Only after
10 exhausting all other options is an account fielded for disconnect of service.
11 Although unfortunate, disconnection of service is sometimes the only option left
12 available to the utility. Terminating the service of those customers that have
13 chosen not to pay as compared to those that cannot pay limits the exposure to all
14 customers by not allowing non-paying customer balances to continually increase,
15 adversely affecting accounts receivable. Taking this step is both prudent and
16 required to ensure we are acting in the best interests of all customers.

17 Q. What is Staff’s position in regard to the number of terminations performed by
18 the Companies?

19 A. Staff testifies that the Companies are “relying too heavily on residential service
20 terminations as a method of collecting customer arrearages” (Staff CSP at 40). To
21 support this, in the same testimony, Staff points to the increase in bad debt at the
22 Companies from 2013 to 2014. Staff’s characterization is simply incorrect.

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 The increase in bad debt during this time frame is due primarily to increased
2 supply costs and colder temperatures. From 2013 to 2014, the average electric
3 supply costs went up 26% and 15% at NYSEG and RG&E, respectively
4 (Exhibit __ (CSEERA-R9)). It should also be noted that, although bad debt
5 increased at both Companies, NYSEG performed fewer service terminations in
6 2014 than 2013 (28,880 as compared to 25,377) and RG&E only performed 1,207
7 more terminations in 2014 (11,334 as compared to 10,127). This data supports
8 the fact that other factors (such as commodity costs and weather) caused the
9 increase to bad debt and refutes Staff’s contention that the Companies are making
10 excessive use of service terminations as a credit and collection tool.

11 Q. Do the Companies have additional data to support the Companies’ position?

12 A. Yes, in its testimony Staff indicates that the Companies should consider alternate
13 collection methods, such as outbound calls. The Companies already make
14 extensive use of outbound calling in an attempt to resolve collection situations.
15 Exhibit __ (CSEERA-10) shows the number of outbound collection calls made
16 in 2014 and 2015. These calls are completed in an effort to provide customers
17 with adequate notice and to offer assistance in avoiding service terminations.
18 Additionally, the Companies continually look at “creative” means to limit service
19 terminations, such as our proposal for residential service deposits. We will
20 discuss this more in the next section of our testimony, but it should be noted that
21 Staff has recommended both a limitation of the Companies’ ability to terminate

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 service and a limitation on the Companies' ability to implement creative practices
2 to prevent the need for service terminations.

3 Q. What is the Companies' response to Staff's position regarding positive and
4 negative incentives as they relate to service terminations and bad debt?

5 A. The Companies do not agree with Staff's proposal. As illustrated with the data
6 for 2013 and 2014, there were many factors outside of the control of the
7 Companies that can lead to a significant increase in bad debt expense. These
8 factors, that have a direct impact on the value of bad debt, include the volatility of
9 commodity prices, weather, economy and ESCO pricing tactics. The Companies
10 should always be expected to pursue a service termination when it is necessary.
11 Placing arbitrary limits on terminations and bad debt expense will result in
12 increasing delinquent accounts receivable and increased uncollectible costs for
13 all customers.

14 **E. Customer Deposits**

15 Q. Please explain the Companies' proposal as it relates to Customer Deposits.

16 A. The Companies have proposed a residential service deposit as a condition of
17 service for certain customers who predominantly contribute to uncollectible
18 expense. As stated in the Panel's Direct Testimony and as shown in
19 Exhibit __ (CSEERA-19), 67.3% of accounts written off at NYSEG and 61.0% of
20 accounts written off at RG&E would have met one of the proposed criteria for
21 collecting a security deposit. Considering the high propensity for customers
22 which meet the criteria to have their accounts written off, the Companies'

**REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY
EFFICIENCY, AND RETAIL ACCESS PANEL**

1 proposal effectively addresses the issue while protecting low income and other
2 vulnerable customers. In the Panel’s Direct Testimony, the Companies
3 acknowledge that a customer who is a known recipient of public assistance or
4 other state payments or who is 62 years old or older would be exempt from the
5 proposed deposit requirement.

6 Q. Please summarize Staff’s position concerning deposits.

7 A. Staff recommends that the Commission should reject this proposal. Staff testifies
8 that on advice of counsel, “the proposal seems contrary to the intent of PSL § 30
9 because it would create barriers to obtaining utility services beyond those
10 contemplated by the law.” (Staff CSP at 46). Staff further states there are likely
11 to be more effective means of reducing uncollectibles, such as outbound calls.

12 Q. Do you agree with Staff’s position on this?

13 A. No. On advice of counsel, the Companies understand that applicable regulations
14 specifically provide the utility the opportunity to seek approval to request deposits
15 under certain conditions. We have been very thoughtful in our proposal and
16 believe it to be an innovative recommendation to help limit collection situations.
17 The Companies’ proposal is very focused and targeted on risk and we do not
18 agree with Staff’s position that a deposit is an “unreasonable qualification”
19 (Staff CSP at 46) when used as proposed. Also, as we noted earlier, the
20 Companies have made extensive use of outbound calling in an attempt to limit
21 collections. Adding a deposit requirement for high risk customers would further
22 enhance our ability to minimize residential terminations as it would provide an

**REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY
EFFICIENCY, AND RETAIL ACCESS PANEL**

1 incentive for customers to make timely payments in an effort to get the security
2 deposit refunded. Additionally the Companies believe that this rate case is the
3 proper forum to provide ample opportunity for public input on this issue,
4 considering the breadth of parties participating in the case.

5 **F. Credit and Debit Cards**

6 Q. What is Staff's recommendation as it relates to the Companies' proposal for credit
7 and debit cards?

8 A. Staff recommends that the Commission approve the Companies' proposal to
9 accept credit and debit cards as a form of payment. The Companies appreciate
10 Staff's support of this proposal and believe its implementation will enhance our
11 already high level of customer satisfaction.

12 **G. Trip Charge**

13 Q. What is the Companies' response to Staff's rejection of their proposal for a Trip
14 Charge for collecting a payment in the field?

15 A. Although the Companies believe that this is another creative initiative that
16 would incent customers to pay in advance of a service termination, we are
17 withdrawing this proposal at this time. Therefore, as stated in the Rebuttal
18 Testimony of the Deliveries and Revenues Panel, the Companies have removed
19 from their Rate Year revenue forecasts the proposed fees of \$187,470, \$100,095,
20 \$61,360, and \$40,910 for NYSEG Electric, NYSEG Gas, RG&E Electric, and
21 RG&E Gas, respectively.

**REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY
EFFICIENCY, AND RETAIL ACCESS PANEL**

1 **H. Outreach and Education**

2 Q. Do the Companies agree with Staff's testimony on O&E?

3 A. Staff proposes that the Commission allow for the establishment of summits, but
4 proposes that funding should be allocated through existing budgets. The
5 Companies accept Staff's funding recommendation and plan to conduct the
6 summits to the extent funding is available in the O&E budget.

7 Q. Do the Companies agree with Staff's proposal for a full financial reconciliation
8 for O&E?

9 A. Yes, we agree that a full reconciliation of O&E spending should be conducted
10 each year.

11 **I. Codes of Conduct**

12 Q. Did Staff have testimony related to the Companies' Codes of Conduct?

13 A. Yes. This topic will be addressed by the Companies' Policy Panel.

14 **III. RESPONSE TO UTILITY INTERVENTION UNIT**

15 Q. Would the Panel please address UIU Witness Gregg Collar's testimony
16 concerning customer service-related matters?

17 A. Yes. The Companies will address Mr. Collar's testimony on Customer Service
18 Performance Mechanism ("CSPM"), Low Income Programs, Trip Charge Fee and
19 Same Day Service Reconnection.

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 Q. Starting with the CSPM, please address UIU’s proposal.

2 A. UIU supports the Companies’ proposal to eliminate Percent of Estimates as part
3 of the CSPM. UIU also recommends that the maximum amount at risk should
4 remain the same and be spread over the remaining three measures. The
5 Companies support that recommendation. Consistent with our rebuttal to Staff’s
6 testimony regarding symmetrical performance targets, the Companies do not
7 agree with UIU’s position rejecting implementation of positive incentives. As we
8 testified earlier and in our Direct Testimony, positive incentives will provide the
9 Companies with the means to creatively provide an enhanced customer
10 experience. Moreover, a positive incentive mechanism will create a “win/win”
11 atmosphere allowing the Companies to explore innovative service options that
12 will benefit customers. For example, the Companies may conduct a cost/benefit
13 analysis of a new technology. With the potential for an incentive, this may enable
14 the investment in a service that may benefit customers. Often the “soft” benefit of
15 enhanced customer satisfaction is not enough to justify the investment, especially
16 if targets are already being met.

17 Q. Do the Companies agree with UIU’s position that matters associated with Low
18 Income Programs should be deferred due to the pending Case 14-M-0565 –
19 Energy Affordability for Low Income Utility Customers?

20 A. The Companies agree that recommendations and their implementation in this case
21 must align with those being made in Case 14-M-0565 to the extent feasible, given
22 that case’s ongoing status. However, because Case 14-M-0565 remains ongoing

**REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY
EFFICIENCY, AND RETAIL ACCESS PANEL**

1 and may not conclude before the Commission acts in this rate case, the framework
2 for the Companies' programs must be determined in this proceeding to ensure no
3 vulnerable customers are negatively impacted. The Companies would be
4 amenable to working with Staff and interested parties to implement any
5 subsequent Commission directives made in the separate proceeding.

6 Q. UIU Witness Collar recommends that bill discount amounts be increased by the
7 same amount as any increases to delivery rates. Does the Panel agree with
8 this recommendation?

9 A. As we indicated earlier and as noted in the in the Companies' comments in
10 Case 14-M-0565, the proposal for tiered bill reduction benefits is reasonable and
11 acceptable to the Companies. The amounts proposed by Staff in its testimony in
12 this proceeding also appear to be reasonable. Set amounts that increase based on
13 customer need are more appropriate than an increase equivalent to that of delivery
14 rates as proposed by Mr. Collar.

15 Q. Would the Panel please respond to UIU's recommendation concerning adoption
16 of additional reporting and data collection.?

17 A. As stated in the Companies' comments filed in Case 14-M-0565, it is premature
18 to establish new or modified reporting requirements. Although we generally
19 agree that more rigorous data analysis and evaluation may provide a better
20 understanding of how the Low Income Programs are meeting the needs of low
21 income customers, setting these requirements without a final determination on

**REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY
EFFICIENCY, AND RETAIL ACCESS PANEL**

1 program components is premature. Once the program design is determined, then
2 additional discussions concerning reporting requirements would be appropriate.

3 Q. Please respond to UIU's recommendation that the Commission should reject the
4 Companies' proposal for a Trip Charge Fee.

5 A. The Companies identified this option as a creative initiative that would incent
6 customers to pay in advance of a service termination. Although the Companies
7 continue to support such innovative options, we withdraw this proposal at
8 this time.

9 Q. What is the Companies' position concerning UIU's recommendation that the
10 Companies should implement same day electric service reconnection?

11 A. For the reasons we explained above, the Companies strongly disagree with
12 this proposal.

13 Q. Have the Companies estimated the incremental costs that would be incurred if this
14 proposal is implemented?

15 A. No. The Companies would need to do significant analysis to determine the
16 impacts of conducting same day reconnects. The time allowed during this
17 rebuttal period was not sufficient to conduct that type of analysis.

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

IV. RESPONSE TO PACE ENERGY AND CLIMATE CENTER

1
2 Q. Please briefly discuss the testimony of Karl R. Rabago on behalf of the Pace
3 Energy and Climate Center (“Pace”).

4 A. Most of the issues surrounding the Companies’ Energy Efficiency Transition
5 Implementation Plan (“ETIP”) and Budgets and Metrics Plan (“BAM”) will be
6 resolved in the ongoing generic proceeding, Case 15-M-0252, addressing utility
7 energy efficiency programs and should not also be considered in this rate
8 proceeding.

9 Q. Does Mr. Rabago also discuss additional issues which may not be considered in
10 Case 15-M-0252 that the Companies want to address?

11 A. Yes. Pace appropriately agreed with the Companies to eliminate the qualification
12 standard relating to the number of units for the multifamily program.
13 (Rabago at 13). The Companies also agree with Pace’s proposal that building
14 function type should also be part of the program eligibility criteria (i.e., duplexes
15 with residential equipment and residential accounts should be served under the
16 residential program rather than the multifamily program).

17 Q. Does the Panel have further comments regarding Pace’s position concerning the
18 Companies’ “Large Customer Self-Direct Program” (“Self-Direct Program”)
19 planned for 2017?

20 A. Yes. Before addressing Pace’s program design comments, the Companies would
21 like to point out that Pace’s use of “industrial” when referring to the proposed
22 Self-Direct Program should be replaced by “Large Customer.” This change

**REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY
EFFICIENCY, AND RETAIL ACCESS PANEL**

1 recognizes that the Companies have no intention to restrict access to the program
2 to industrial customers only.

3 Q. Please further address Pace’s recommendations concerning the Self-
4 Direct Program.

5 A. The Companies do not agree with Mr. Rabago that the Self-Direct Program
6 necessarily offers efficiencies of administration or that the Self-Direct Program
7 reduces program benefits and cost effectiveness. All three of these characteristics
8 are functions of the design and implementation of the specific Self-Direct
9 Program which will be administered.

10 Q. Does the Panel agree with Pace on the issue of transparency and collaboration in
11 design for a self-direct program?

12 A. Yes. We agree with Pace that transparency and collaboration in the design of a
13 self-direct program generally is desirable. In fact, such transparency and
14 collaboration were used to develop the “Self-Direct Guidance Document”
15 included in Exhibit __ (CSEERA-R11). That collaborative included all large
16 electric investor-owned utilities, Staff and other interested participants.

17 Q. Please discuss Pace’s recommendation that the Commission should reject the
18 Companies’ energy savings target reductions for 2016.

19 A. The Companies reiterate that the energy savings targets and budgets are expected
20 to be resolved separately in Case 15-M-0252. Staff has submitted several data
21 requests in that case, to which the Companies have responded (both the requests
22 and the responses are filed in Matter 15-01945). Second, Pace’s assertions that

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 the Companies' analyses in support of its proposal are insufficient is incorrect.

2 The information submitted by the Companies in the proceeding addressing targets
3 and budgets provides ample support for the Companies' positions. The
4 Commission's Document and Matter Management ("DMM") system shows that
5 Pace is a party to Case 15-M-0252.

6 Q. Is there a particular set of data request responses to which the Companies refer in
7 support of the proposed energy savings' reductions?

8 A. In particular, the Companies direct Pace to the responses to Questions 3, 4, 5 and
9 12 and the attachments to question 12 (Exhibit __ (CSEERA-R12)). This
10 information details the magnitude of the reductions to Technical Resource Manual
11 savings allowances, and describes how the Companies plan to offset the very
12 significant impacts of these savings reductions within the portfolio of programs.
13 However, the Companies continue to note that the magnitude of these savings
14 reductions was so great as to make the previous years' savings targets unreachable
15 within the previous years' budget, as further described in the ETIP.

16 Q. Please further discuss Pace's positions concerning energy efficiency programs
17 in 2016.

18 A. The Companies disagree with Mr. Rabago's statement that the Companies "raise
19 the possibility of reducing incentives only to dismiss the idea because incentives
20 can be reduced to a level of ineffectiveness." (Rabago at 16). The Companies
21 have historically lowered incentives to reduce the cost of achieving energy

REBUTTAL TESTIMONY OF CUSTOMER SERVICE, ENERGY EFFICIENCY, AND RETAIL ACCESS PANEL

1 savings (in particular in the residential gas HVAC Program, the Small Business
2 Direct Install Program and the Commercial/Industrial Rebate programs).

3 Q. Does the Panel agree that lowering incentives is one way to address both
4 increasing costs of providing energy efficiency services and the lowering of the
5 achievable savings available per measure?

6 A. Yes. This is part of the overall effort to align the energy efficiency savings
7 reported to that which is actually provided. However, lowering incentives beyond
8 the point at which they actually incent customer behavior to make the energy
9 efficiency improvements is neither desirable nor effective.

10 Q. Please comment on Pace's statements regarding evidence of
11 alleged "backsliding."

12 A. We disagree strongly with Pace's comment that the proposed reduction in electric
13 and gas targets for 2016 constitute a reduction of performance, accountability and
14 evidence of "backsliding." Rather, the Companies continue to support aggressive
15 energy savings, to achieve that savings with reasonable costs to rate payers, and to
16 ensure that the energy savings which is reported and claimed is accurately found
17 in the field and can be counted on both to reduce customer's costs and reduce the
18 load on the Companies' distribution system.

19 Q. Does that conclude your Rebuttal Testimony at this time?

20 A. Yes.
