This level of consistency across the lines of business enhances T-Mobile's overall planning and resumption efforts.

T-Mobile also maintains backup and alternate power sources at mission critical locations, and has information processing and telecommunications back-up sites that provide redundancy that is important to protecting key business information and services. Business Continuity Plans are housed in a centralized online repository, accessible to employees in office and remotely through a web browser. Additionally, hard copies of plans are available at multiple sites throughout the enterprise.

The T-Mobile USA Business Continuity Program is designed and maintained to proactively mitigate the risk of threats to T-Mobile's customers, employees, and stakeholders. As such the program is revised and updated as needed to address potential and emerging hazards.
