Re: Cape Vincent Wind Farm

Dear Chairman Brown,

As you may know, BP has been actively engaged in public outreach with respect to our proposed 200-285 megawatt Cape Vincent Wind Farm located in the Towns of Cape Vincent and Lyme (the "Project"). As part of our continuing outreach I wanted to make you aware of the fact that on March 29, 2013, we filed a Preliminary Scoping Statement ("PSS") with the Department of Public Service. I have attached a copy of the Public Notice for this filing that contains some useful information on the nature of the PSS, the application process and where you may obtain additional information. A copy of the PSS may be viewed at our Project website (www.capevincentwindfarm.com) and the New York State Board on Electric Generation Siting and the Environment's web page at (www.dps.ny.gov/SitingBoard).

Sincerely,

A handwritten signature in blue ink that reads "Richard J. Chandler".

Richard Chandler

The Cape Vincent Wind Farm – Preliminary Scoping Statement Public Notice

On March 29th, 2013 Cape Vincent Wind Power, LLC ("CVWP") will file a Preliminary Scoping Statement ("PSS") for the proposed Cape Vincent Wind Farm pursuant to Article 10 of the New York Public Service Law (16 NYCRR § 1000.5). A PSS is a written document intended to inform the New York State Board on Electric Generation and Siting (the "Siting Board"), other public agencies, and the public that CVWP is contemplating making an Article 10 application (the "Application") to the Siting Board.

CVWP is proposing to build a 200-285 megawatt wind energy facility with up to 124 wind turbines to be sited in the Town of Cape Vincent and the associated overhead generation interconnection line and related equipment to be sited in the Towns of Cape Vincent and Lyme and potentially the Village of Chaumont ("Project").

The PSS will contain:

- i. A brief description of the proposed Cape Vincent Wind Farm and its environmental setting;
- ii. Potentially significant adverse environmental and health impacts related to the construction and operation of the Project including impacts related to:
 - Statewide electrical system
 - Ecology, air, ground and surface water, wildlife, and habitat
 - Public health and safety
 - Cultural, historical and recreational resources
 - Transportation, communication, utilities
 - Noise and vibration
 - Socioeconomic effects
 - Visual impacts
 - Electric magnetic fields
 - Wetlands
 - Cumulative impact of emissions on the local community
 - Environmental justice communities

The PSS will contain measures proposed to minimize environmental impacts and the identification of all other state and federal permits, certifications, or other authorizations needed for construction, operation or maintenance of the Project. The PSS will contain a list of local laws, rules, or regulations that the Project will be seeking the Siting Board to supplant or override.

The PSS will also contain a description of the proposed studies or program of studies designed to evaluate potential environmental and health impacts that CVWP intends to include in its Application for an Article 10 certificate. The description of the studies will include the extent and quality of information needed for the Application to adequately address and evaluate each potentially significant adverse environmental and health impact, including existing and new information where required, and the methodologies and procedures for obtaining the new information. The PSS will also include an identification of any other material issues raised by the public and affected agencies to date and the response of CVWP to those issues.

Within 21 days after the filing of the PSS, any person, agency or municipality may submit comments on the PSS by serving such comments on CVWP and filing a copy with the Secretary to the Department of Public Service. Within 21 days after the closing of the comment period, CVWP shall prepare a summary of the material comments and its responses to those comments.

CVWP will provide \$99,750 of intervenor funds available for municipal and local parties that may be used to defray certain expenses associated with participating in the Article 10 proceeding during the pre-application phase. Fifty percent (50%) of these intervenor funds are reserved for municipalities. An application for intervenor funds and more information on eligibility and how to apply for intervenor funds is available at the DPS website at <http://www.dps.ny.gov>.

An Application for a certificate of environmental compatibility and public need for the Project may be filed by CVWP 90 days after the filing of the PSS. The Application will be accompanied by additional funding for intervenors. The Application will build upon the scope agreed upon in the PSS and contain a description of the site and the facilities to be built thereon. The Application will include geological, visual or other aesthetic, ecological, seismic, biological, water supply, population and load center data as well as an evaluation of the expected environmental and health impacts and safety implications of the Project, both during its construction and operation, including any studies, identifying the author and date thereof.

Once an Application is filed and determined to be complete, the Siting Board will set a date for a public hearing. The presiding examiner will conduct a prehearing conference to identify intervenors, award intervenor funds, identify issues for hearing and establish a case schedule for discovery to be followed by hearings. After hearings, stakeholders may brief their positions and the presiding examiner will issue a recommended decision upon which the Siting Board will base its decision. Stakeholders will also have an opportunity to submit briefs on the recommended decision. Article 10 requires that all proceedings on the Application, including a final decision by the Siting Board, must be completed within 12 months from the date that the Application is determined to comply with all filing requirements.

Information about the Project is available from the applicant, the DPS Public Information Coordinator, the Project website (www.capevincentwindfarm.com) and the Siting Board's web page at (www.dps.ny.gov/SitingBoard).

Any member of the public wishing to receive all formal notices, including but not limited to notices regarding any pre-application stipulations, concerning the proposed facility can file a request with the Secretary. A written request may be emailed to the Secretary at secretary@dps.ny.gov or sent by mail to the following address: Hon. Jeffrey Cohen, Acting Secretary, NYS Department of Public Service, Three Empire State Plaza, Albany, New York 12223-1350.

Electronic documents concerning the proposed Cape Vincent Wind Farm can be accessed on the DPS website at: <http://www.dps.ny.gov>. To access documents: go to the DPS's website <http://www.dps.ny.gov>, see the link on the left side of the webpage under "Most Popular Page" to access the "Commission Documents" Page, search for the Cape Vincent Wind Farm Documents using the Case Number 12-F-0410. Alternatively, go directly to the Siting Board's web page at <http://www.dps.ny.gov/SitingBoard> to access documents and notices.
