RE: Case 25937 – Proceeding on Motion of the Commission as to the Plans and Procedures of Electric Corporations for Load Shedding in Times of Emergency

Dear Secretary Burgess:

On April 11, 1980, New York State Electric & Gas Corporation (“NYSEG”) and Rochester Gas and Electric (“RG&E”) were in receipt of an order adopted by the Commission on April 2, 1980 in the above-noted case requiring each company to review its load reduction procedures as necessary to keep them on a current basis, and requiring each company to file with the Commission by April 1 in each year the identity of the specific location where a complete copy of its load reduction procedures will be kept open for public inspection by any persons.

The Companies wish to inform you that a copy of the NYSEG procedure, Emergency Electric Load Relief, continues to be on file in the System Operations Department, at the System Operator Workstation in the Wells P. Allen Energy Control Center (“ECC”) Building, located at 101 Murray Hill Road, Vestal, New York. A copy of the RG&E procedure, Load Shedding Manual, continues to be on file in the System Operations Department, at the System Operator Workstation in the Energy Control Center (“ECC”) Building, located at 400 West Avenue, Rochester, New York.

Please contact Michael R. Craven, Manager - Dispatch & ECC at 607-762-4502 to schedule a visit to the NYSEG or RG&E Energy Control Centers to view the NYSEG Emergency Electric Load Relief Procedures or the RG&E Load Shedding Manual.

Very truly yours,

A handwritten signature in black ink that reads "Lori A. Cole".
