

New York State Clean Energy Standard Results of Renewable Energy Standard and Renewable Portfolio Standard Solicitation for Long-Term Contracts through December 31, 2017

Final Report | March 2018

NYSERDA's Promise to New Yorkers:

NYSERDA provides resources, expertise, and objective information so New Yorkers can make confident, informed energy decisions.

Mission Statement:

Advance innovative energy solutions in ways that improve New York's economy and environment.

Vision Statement:

Serve as a catalyst – advancing energy innovation, technology, and investment; transforming New York's economy; and empowering people to choose clean and efficient energy as part of their everyday lives.

New York State Clean Energy Standard

Results of Renewable Energy Standard and Renewable Portfolio Standard Solicitations for Long-Term Contracts through December 31, 2017

Final Report

Prepared by:

Summary and Background

This report summarizes procurement activities by the New York State Energy Research and Development Authority (NYSERDA) in implementing the Renewable Energy Standard (RES), a component of the New York Clean Energy Standard (CES) adopted by the Public Service Commission (Commission) through an Order Adopting the Clean Energy Standard issued in August of 2016 (CES Order).¹ The RES is the primary means to achieve Governor Andrew M. Cuomo’s ambitious mandate for New York to achieve 50% of the State’s electricity from renewables by 2030 and is the successor program to the Renewable Portfolio Standard (RPS). Given the programs’ collective contributions to New York’s goals, this report also fulfills NYSEDA’s ongoing reporting requirements related to projects funded under long-term RPS contracts.

The Commission’s CES Order, along with additional orders issued under Case 15-E-0302², Proceeding on Motion of the Commission to Implement a Large-Scale Renewable Program and Clean Energy Standard (collectively, the “Orders”), both established and addressed certain implementation issues regarding the RES. A component of the RES consists of a Tier 1 obligation on load serving entities (LSEs) to procure Renewable Energy Credits (RECs) associated with new renewable energy resources in increasing quantities toward the State’s 2030 goal. The Orders set the annual Tier 1 RES obligations for all LSEs, represented as the percentage of the LSE’s load that must be met with RES Tier 1 RECs.³

The Orders authorize NYSEDA, as central procurement administrator, to award long-term contracts to Tier 1-eligible generators through annual competitive solicitations for the purchase of Tier 1-eligible RECs, in the form of Tier 1 New York Generation Attribute Tracking System (NYGATS) certificates.⁴ These RECs can then be sold to obligated LSEs toward their Tier 1 compliance obligations.

¹ Case 15-E-0302, Proceeding to Implement a Large-Scale Renewable Program and a Clean Energy Standard, Order Adopting a Clean Energy Standard (issued August 1, 2016) (CES Order).

² Case 15-E-0302, *supra*, Order Approving Phase 1 Implementation Plan (issued February 22, 2017), Case 15-E-0302, *supra*, Order Approving Phase 2 Implementation Plan (issued November 17, 2017).

³ Tier 1-eligible generators are new renewable energy facilities that entered commercial operation on or after January 1, 2015 and have been certified as eligible per the terms of the Orders.

⁴ Renewable Energy Certificates include any and all reductions in harmful pollutants and emissions, such as carbon dioxide and oxides of sulfur and nitrogen to catalog and recognize environmental attributes of generation.

1 NYSERDA's RES Tier 1 Solicitations

NYSERDA's first RES solicitation, RESRFP17-1, was issued in June of 2017 with awards announced in March of 2018. To view the awards, visit NYSERDA's Clean Energy Standard awards page.⁵ Per an Order issued on February 22, 2017,⁶ the solicitation was designed as a two-step process consisting of a Threshold Eligibility Determination step and a competitive Bid Proposal review step. To participate in the solicitation each bid facility must qualify as a Tier 1 RES eligible resource, as set forth at Appendix A of the CES Order. Projects may apply for certification through a certification portal within NYGATS.

1.1 RESRFP17-1 Solicitation Results

NYSERDA's 2017 solicitation, RESRFP17-1, sought to procure 1.5 million MWh of electricity from new renewable energy sources and received a total of 88 applications from 30 clean energy developers. Awards resulted in 26 agreements, listed in Table 1, to develop over 3.2 million MWh of new, clean energy capacity throughout New York State. The State's \$1.4 billion investment is expected to spur more than \$3 billion of direct investment over the life of the projects. The weighted average award price for this solicitation is \$21.71 per megawatt hour of production over the 20-year term of the awarded contracts, which is 11% less than the price awarded through the two prior year's awards.

The awards represent a funding commitment and renewable capacity that exceed the amounts awarded through NYSERDA's previous seven large-scale renewables solicitations combined, and New York made the largest purchasing commitment to renewable energy by any state in U.S. history. The successful proposals include a hydroelectric project, three wind projects (including one with energy storage), and several solar projects. All projects are expected to be operational by 2022 and will create more than 3,000 short- and long-term jobs in construction, operations, and maintenance. The projects, shown in Table 1, are expected to generate enough clean, renewable energy to power more than 430,000 homes and reduce carbon emissions by more than 1.6 million metric tons, the equivalent of taking nearly 340,000 cars off the road.

⁵ nyserdera.ny.gov/All-Programs/Programs/Clean-Energy-Standard/Renewable-Generators-and-Developers/RES-Tier-One-Eligibility/Solicitations-for-Long-term-Contracts/2017-Solicitation

⁶ Directives pertaining to NYSERDA's role are contained in the February 22, 2017 Order Approving Phase I Implementation Plan and the Final Phase I Implementation Plan filed by NYSERDA on March 24, 2017. The March 9, 2017 Order on the Value of Distributed Energy Resources further clarifies the treatment of certain distributed energy resources under the CES and their eligibility to participate in NYSERDA's long-term procurements for Tier 1-eligible RECs.

Total	87.44	1,833.93	1,921.37	6	38	44

2 NYSERDA's RPS Solicitations

In addition, NYSERDA has existing and previous long-term RPS-funded contracts that are not Tier 1 eligible. The projects are listed in Table 4 and their development status is summarized in Table 5.

Table 4. Previous RPS Solicitations: Non-Tier 1 Projects⁷

- a Higley and Browns Falls had one-year agreements, thus enabling participation in RFP 1037.
- b Bear Creek windfarm had a four-year contract that expired on January 31, 2010.
- c Maple Ridge and Spier Falls had ten10-year contracts that expired on December 31, 2015.
- d These facilities were awarded contracts for a percentage of output under multiple RFPs. The total new facility capacity is listed once.
- e AES Greenidge had a three-year contract that expired on July 31, 2012.
- f An agreement was awarded as a result of the fifth solicitation for the Marble River Wind Farm was combined with an agreement awarded under the sixth solicitation to reflect an increase in the size of the facility.
- g Modern LFGE had a 10-year contract that was terminated effective January 1, 2016.

Table 5. Summary of Non-Tier 1 Projects (RPS Solicitations)

Table reflects only solicitations with Development Status of *Operating*.

	MW Capacity by State	Number of Projects by Stage
	MW Operating	Number Operating
Biogas - LFG	53.7	9
Biomass	69.26	2
Fuel Cell	1.26	3
Hydroelectric	50.97	25
Wind	1,351.9	19
Total	1,527.09	58

3 Project Development Status

In total, NYSERDA currently has 102 projects under active contracts through RPS or RES solicitations, totaling over 3,400 MW of New Renewable Capacity. Status and capacity are detailed in Table 6.

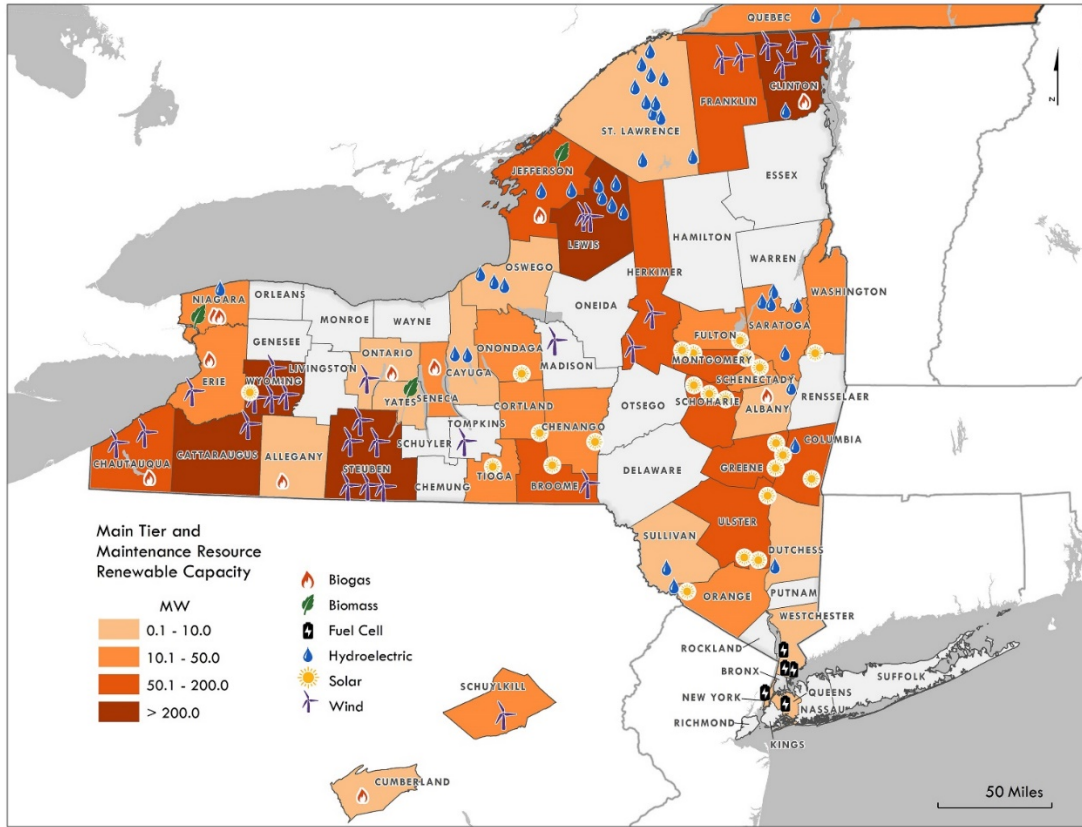

Table 6. Resource Development Status for Active NYSERDA RES and RPS Projects⁸

	MW Capacity by State			Number of Projects by Stage		
	MW Operating	MW in Development/Construction	Total MW	Number Operating	Number in Development/Construction	Total Number
Biogas - ADG	1.24	0.85	2.09	1	1	2
Biogas - LFG	53.7	0.00	53.7	9	0	9
Biomass	69.26	0.00	69.26	2	0	2
Fuel Cell	2.05	1.05	3.10	4	1	5
Hydroelectric	58.68	7.48	66.16	28	5	33
Solar	0.00	696.27	696.27	0	23	23
Wind	1,429.60	1,128.28	2,557.88	19	9	28
Total	1,614.53	1,833.93	3,448.46	63	39	102

⁸ This table includes only active contracts. RPS contracts with seven facilities totaling 354.2 MW concluded as of December 31, 2017 and are not included in this table.

Figure 1 identifies the location of each facility either under contract or with a pending NYSERDA contract.

Figure 1. RES and RPS Resources by County

4 Maintenance Resources

Per the CES Order, maintenance resources are (1) in-State facilities in commercial operation prior to January 1, 2003 included in the renewable resource baseline prior to the adoption of the RPS in 2004; (2) facilities that demonstrate financial hardship through a formal request to the Commission; and (3) approved by the Commission for funding. The status of active maintenance resources is detailed in Table 7.

Table 7. Maintenance Resources

Solicitation Name	Project Name	State	Project Status	Technology	Year of Delivery Start Date	Project Duration (Years)	Bid Capacity (MW)	Bid Quantity (MWh)	Max Annual Contract Quantity
Maintenance	Azure Mountain	NY	Operational	Maintenance Hydroelectric	2013	10	0.8	2,500	2,500
Maintenance	Lyonsdale Biomass	NY	Operational	Maintenance Biomass	2015	3	22	131,238	131,238
Total							22.8	133,738	133,738
