## 1 Introduction

Verona Solar LLC (Verona Solar) plans to apply to construct a major electric generating facility to be known as the “Verona Solar Project”, under Article 10 of the Public Service Law (PSL). Pursuant to the rules of the New York State Board on Electric Generation Siting and the Environment (Siting Board), applicants proposing to apply to construct a major electric generating facility under Article 10 must submit a Public Involvement Program (PIP) Plan. The PIP must be submitted to the Department of Public Service (DPS) for review at least 150 days prior to filing a Preliminary Scoping Statement (PSS). This document is the PIP plan for the Verona Solar Project (the Project or the Facility), a solar energy facility described in Section 3.

As required by 16 NYCRR § 1000.4, this PIP describes the steps Verona Solar plans to take to inform, engage, and solicit input from the local community, general public, and other stakeholders. Stakeholder concerns, interests, local knowledge, and recommendations will be evaluated, addressed and considered by the Applicant and Siting Board.

## 2 Applicant and Project Description

### 2.1 Company Profile

Verona Solar LLC is an affiliate of Invenergy LLC (Invenergy). Invenergy is a utility-scale power producer developing, constructing, and operating renewable energy projects in the New York State energy market. Invenergy-owned energy projects operate under the supervision and regulatory authority of the New York State Public Service Commission (PSC) and the Federal Energy Regulatory Commission (FERC). Invenergy's management offices are in Chicago, Illinois. Invenergy's New York Regional Office is in Ithaca, NY.

Invenergy and its affiliates have developed over a hundred renewable energy projects in the United States, Canada, and Europe including the following New York solar and wind farms:

- Shoreham Solar Commons, 24.9 MW, Town of Brookhaven, Suffolk County, NY.
- High Sheldon Wind Farm, 75 turbines in the Town of Sheldon, Wyoming County, NY.
- Orangeville Wind Farm, 58 turbines in the Town of Orangeville, Wyoming County, NY.
- Marsh Hill Wind Farm, 10 turbines in the Town of Jasper, Steuben County, NY.

Invenergy also has developed and constructed 30 utility-scale solar projects in North America, totaling 3,300 MW installed to date, including one co-located at one of its wind farms.

Invenergy provides wholesale electricity to the public using clean, renewable sources such as wind and solar. This furthers the State of New York's renewable energy policy, which requires 70% of the State's energy to come from renewable sources such as solar by the year 2030.

Verona Solar intends to construct, own, operate, and maintain the Project.

### 2.2 Project Summary

Verona Solar plans for the Project to be capable of generating up to 250 megawatts (MW) from solar panels installed on leased private property in the Town of Verona in Oneida County, NY. The area where Verona Solar is considering installing facility components is shown in Figure 1.

Facility components will include solar panels and racking, access roads, inverters, buried and overhead electric collection lines, a substation to convert the generated electricity to the interconnection voltage (the Collection Substation), an operation and maintenance (O&M) building, and electrical interconnection facilities. The anticipated life of the project is approximately 35 years.

Verona Solar anticipates the interconnection facilities will include a 345-kV switchyard built adjacent to National Grid's Edic-Clay 345-kV line (the POI Switchyard). The Collection Substation may be located adjacent to the solar panel area or may be co-located with the POI Switchyard. Further engineering is required to determine this. The location of the POI and tentative T-line route will be added to the publicly available project descriptions when determined. This summary is based on currently available information, which is still being gathered. During the pre-application period, Figures 1 and 2 will be updated based on feedback from stakeholders.

Invenergy is exploring various ways to co-locate agricultural uses of the land alongside the solar generation facility, such as harvesting forage for dairy feed, seeding with pollinator-friendly seed mixes and hosting beekeepers and hives on-site, and grazing sheep in the areas where solar panels are installed.

#### Energy Generation

Verona Solar estimates the Facility will operate at an annual net capacity factor of 18-22%. This means the Facility would generate approximately 400,000- 500,000 megawatt hours (MWh) of energy per year. This will be enough electricity to meet the average annual consumption of approximately 70,000 households, based on average annual household electric consumption of 7.2 MWh for New York State, (EIA, 2014).

#### Economic Benefits

The Project would have positive socioeconomic impacts of permanent O&M jobs, temporary construction employment, lease payments to landowners, and a new source of revenue for schools, fire departments, county government, and town governments. The Project estimates construction will create approximately 400 jobs with a payroll of \$30 million. To operate and maintain the Facility, Verona Solar estimates it will hire approximately 2-5 full time employees to be located at the site. The construction jobs would last approximately a year and a half, and the operations and maintenance jobs would last for the life of the Project.

Verona Solar plans to enter into a PILOT agreement with the Oneida County Industrial Development Agency under which it would be required to make payments to the town, county, and school districts in lieu of taxes. Amounts the Project would pay to different jurisdictions will depend on the final Facility layout and terms of the PILOT. Based on similar arrangements at other solar projects in New York, Verona Solar estimates a 250 MW project will generate approximately \$700,000-\$875,000 per year in taxes and tax-related payments.

Verona Solar also estimates the Project will pay approximately \$1.5 million per year to landowners leasing land to the Project.

### **2.3 Interest Area and Outreach Area**

Figure 2 shows the Interest and Outreach Areas, which Verona Solar defines as follows:

#### Interest Area

The Interest Area is the area where Verona Solar is evaluating the feasibility of installing solar panels, inverters, fencing, access roads, and other facility components. The Interest Area may include areas that are ultimately not used for facility components due to wetlands, decisions on setback buffers, lack of landowner interest, or other factors. Verona Solar has selected an Interest Area that bounds the areas where it expects facilities will ultimately be proposed in the Application.

The Interest Area is entirely in Oneida County and includes parcels in the Town of Verona and City of Rome, NY.

#### Outreach Area

Verona Solar has set the Outreach Area to include all properties inside the Interest Area and within 1 mile of the Interest Area. In some locations the Outreach Area may include areas further than this distance from the Interest Area.

As shown in Figure 1, the Outreach Area includes the Interest Area and parcels in the Oneida County towns of Rome, Westmoreland, Vienna, Vernon, and Lenox and the Town of Oneida in Madison County.

As described below, property owners and residents of the Outreach Area will be sent direct mailings about Project milestones.

#### Changes to the Interest and Outreach Areas

Verona Solar has set the Interest and Outreach Areas based on its current development plans, and it expects that these areas will bound the final proposed and built locations of Project Facilities. The Outreach Area is selected to cover all residents that might be interested in the Project, even if the final location of facility components is slightly outside of the area currently shown as the Interest Area.

### **3 Public Involvement Program**

#### **3.1 PIP Goals**

Verona Solar will implement this PIP throughout the Project planning, pre-application, certification, compliance, and implementation phases to accomplish the following goals:

1. Inform people, agencies, and organizations of the Project, development plans, development milestones, the Article 10 review process, and the avenues by which they can remain informed.
2. Identify people and organizations interested in the Project.
3. Engage with people and organizations to understand their Project interests and concerns, if any.
4. Objectively consider and incorporate feedback from people and organizations.

#### **3.2 Target Outreach Audience**

##### Organizations

Appendix E lists organizations Verona Solar has identified as potentially interested in the Project. Verona Solar will update this list as necessary through Project development, construction, and operation.

During development Project representatives will contact organizations listed in Appendix E, via in-person meetings or phone, to explain the Project, answer questions, learn of any concerns they may have with the Project, and to understand if they wish to continue to receive Project information on the Project. As appropriate, Verona Solar will conduct subsequent meetings to answer questions and discuss studies, mitigation, or other strategies that could address identified concerns.

#### Individuals and Households of the Outreach Area

Verona Solar assumes people living in the Outreach Area or owning property in the Outreach Area are potentially interested in the Project. Verona Solar will send these people direct mail notices of open houses and the other events described in Section 3.4.

#### Individuals Residing Outside of the Outreach Area

People that do not live in the Outreach Area or own property in the Outreach Area can receive notices of project events and milestones by notifying Verona Solar of their interest. Such requests can be made by request at events hosted by Verona Solar; by calling, emailing, or meeting a Project representative; or by submitting a request via US Mail to Invenergy at 123 S. Cayuga St., Suite 201, Ithaca NY 14850.

### **3.3 PIP Schedule**

Verona Solar began conducting PIP activities in May 2019, and it will continue for the life of the Project through decommissioning. Appendix B lists planned and started PIP activities.

### **3.4 Public Notices**

Verona Solar will notify people and organizations on its outreach list of the following important project events and milestones:

- Open Houses
- PSS Submittal
- Application Submittal
- Public Hearings
- Commencement of Construction
- Commercial Operations Date

Notices of Project events and milestones will contain, at minimum, the following:

- Project name,
- Project website,
- Contact information one of the Project representatives including, at minimum, phone or email

### **3.5 Collection of Public Input**

In the course of meeting with organizations and hosting of public events, Verona Solar will collect informal and formal feedback from individuals and organizations. Verona Solar will also review feedback provided in emails to the Project representatives. Verona Solar will summarize the received input in Exhibit 2 of its Article 10 application, and it will use this input to guide potential adjustments of the Project design.

### **3.6 Document Availability in the Outreach Area**

As discussed in other sections, Verona Solar will notify interested individuals and organizations of important project milestones and events, including when a Preliminary Scoping Statement (PSS) and application is issued. These documents will be available in electronic form at the Project website and the PSC's DMM site and in hard copy at the document repositories specified in this PIP.

Verona Solar does not intend to provide individual hard copies of these documents to individuals and organizations except as required by 16 NYCRR §1000.5 and 16 NYCRR §1000.6.

Hard copies of the PIP, PSS, and application will be maintained at the document repositories listed in Appendix C.

### **3.7 Outreach Tools**

#### **3.7.1 Direct Mailings**

Direct mailings will be made as discussed in the section on Public Notices.

#### **3.7.2 Newspaper Ads**

Verona Solar will place ads in the newspapers listed in Appendix D to notify the public of the Project milestones listed in the section on Public Notices.

#### **3.7.3 Project Website**

Verona Solar will establish a user-friendly website dedicated to the Project that is written in plain English. Verona Solar will update the website as the Project develops and more information becomes available. When available, the following items will be posted on the website:

- Project description and location;
- Project benefits and need;
- Project layout maps;
- Project milestones and timeline
- Contact information, including an email address and a telephone number, for representative that can answer questions about the Project;
- Summary of the Article 10 process;
- Summary of the intervenor funding process;
- Addresses of local document repositories;
- Links to the Article 10 siting board webpage and to case-specific documents file for the Project;
- Notices for public outreach events, filings, and public hearings;
- Publications and other information related to the Project;
- Instructions on how to be added to the stakeholder list.

#### **3.7.4 New York Office**

Invenergy maintains a permanent office in Ithaca, New York, at address 123 South Cayuga Street, Suite 201, Ithaca NY 14850 for developers working on New York projects, including Verona Solar. Project representatives for Verona Solar are based in the New York Regional Office and mail to them should be

addressed to the address above. The office maintains regular business hours, 9am-5pm, Monday through Friday.

### **3.8 Project Representatives**

The following people are available to answer questions about the Project.

Kate Millar  
123 S. Cayuga St Suite 201  
Ithaca, NY 14850  
Project Developer  
E: kmillar@invenergyllc.com  
P: (607) 882-1225

Marguerite Wells  
123 S. Cayuga St Suite 201  
Ithaca, NY 14850  
Senior Manager, Renewable Development  
E: mwells@invenergyllc.com  
P: (607) 330-0399

### **3.9 Attendance at Town Board and County Board Meetings**

Project representatives will frequently attend regularly scheduled board meetings of the Project's host communities, and it may attend town board meetings of other municipalities in the Outreach Area. Verona Solar will attend one of the regularly scheduled meetings of the legislature or board of the host county. Project representatives may request to present at the above meetings or may present at the request of those hosting them.

Attendance of town and county board meetings will be documented in the PIP tracking report.

### **3.10 Open Houses**

Verona Solar will hold two open houses around the time the PSS is submitted. These events will be held in the Outreach Area, provided a suitable venue is available in this area. At every open house, a Project representative will greet attendees and explain the resources present at the event. Ample time will be allowed for attendees to review the displayed materials and to hold one-on-one discussions with Project representatives.

At the open houses, Verona Solar will provide handouts or posters covering the following topics:

- Invenergy,
- The Project, including, location on maps, timeline, studies, viewshed, economic impacts, environmental impacts, community impacts, decommissioning,
- Article 10 process,
- Intervenor funding,
- Solar panel information,
- How to receive direct mailings on future events and milestones,
- How to contact Project Representatives to learn more about the Project.

### **3.11 PIP Tracking Report**

Verona Solar will maintain a log documenting outreach activities. The log will document the date, location, attendees, summary of topics discussed, and any follow-up steps for each event.

Approximately every three months, Verona Solar will file the PIP tracking report with the Secretary to the Siting Board and post it on the Project website.

#### 4 Environmental Justice Areas

To identify PEJAs, Verona Solar used the NYSDEC digital tool called GIS Tools for Environmental Justice. This tool identifies areas where significant portions of the population are at or below the federal poverty level. Using census block groups from the 2000 census, the PEJA tool identifies areas that meet one or more of the following thresholds:

- 51.1% or more of the population in an urban area reported themselves to be members of minority groups; or
- 33.8% or more of the population in a rural area reported themselves to be members of minority groups; or
- 23.59% or more of the population in an urban or rural area had household incomes below the federal poverty level.

A small portion of the following PEJA lies in the Interest Area.

- Census Block Group ID 360650228001 is located in Oneida County between Rome and Verona. The area is partially rural and partially in the more populated area of Rome.

As no Project components are planned in the PEJA, no impacts are anticipated to the above PEJA. Verona Solar will nevertheless assess whether disproportionate impacts to the PEJA are expected in the Article 10 Application.

#### 5 Language Access

Article 10 regulations require the PIP to identify any language other than English spoken by 5,000 or more persons, according to United States Census data, residing in any 5-digit zip code postal zone in which any portion of such zone is located within the Outreach Area.

The table below shows the primary language spoken at home by zip code, according to the U.S. Census Bureau, 2013-2017 American Community Survey 5-Year Estimates.

	Zip code	English	Non-English	Spanish	Other Languages
A. Durhamville	13054	100.0%	0%	0%	0%
B. Rome	13440	93.9%	6.1%	3.2%	0%
C. Verona	13478	98.4%	1.6%	1.1%	0.5%
D. Oneida	13421	95.6%	4.4%	1.3%	1.4%
E. Canastota	13032	98.4%	1.6%	1.1%	0.5%
F. Verona Beach	13162	100.0%	0%	0%	0%
G. Blossvale	13308	98.4%	1.6%	1.1%	0.5%

## **Appendix A - Abbreviations**

DPS	New York State Department of Public Service
DEC	New York State Department of Environmental Conservation
DOH	New York State Department of Health
DOS	New York State Department of State
FERC	Federal Energy Regulatory Commission
MW	Megawatt
MWh	Megawatt hour
NCF	Net Capacity Factor
NYCRR	New York Codes, Rules, and Regulations
NYPA	New York Power Authority
O&M	Operation and maintenance
PIP	Public Involvement Plan
PILOT	Payment in Lieu of Taxes
PSC	New York State Public Service Commission
PSS	Preliminary Scoping Statement

## Appendix B - PIP Activities and Schedules

Activity	Goals	Schedule
Project Website	Share basic information, notify viewers of upcoming events, act as a repository for Article 10 documents	December 2019
Stakeholder Meetings	Share basic information, collect feedback	Ongoing
Town Supervisor Meeting(s)	Share basic information, collect feedback	June 2019
Town Board Meetings	Share basic information, provide updates on the Project and its Article 10 application progress, collect feedback	Through COD
County Legislature or Board Meetings	Share basic information, collect feedback.	Prior to COD
Milestone Mailings	Notify stakeholders of the upcoming Project milestone	Prior to Each Milestone
Newspaper Publication	Notify nearby residents of the upcoming Project milestone	With Each Milestone
Open House Mailings	Notify stakeholders of the upcoming Open House(s)	Prior to Each Open House
Open House(s)	Introduce the Project, collect feedback, update the stakeholder list, share outreach materials	Pre-PSS Filing
Open House(s)	Introduce the Project, collect feedback, update the stakeholder list, share outreach materials	Post-PSS Filing

Note: Basic information includes an overview of the Project, Invenergy, and the Article 10 review process, including instructions on how to obtain intervenor funding, to join the stakeholder list, and to submit comments.
