
Re: Energy East Rate Increase Request: 09-E-0082, 09-G-0083, 09-E-0084, 09-G-0085

Dear Mr. Brown:

I am writing as a customer of Energy East, the parent company of Rochester Gas & Electric (RG&E) and New York State Gas and Electric Company (NYSEG), to register my opposition to its proposed delivery rate increase.

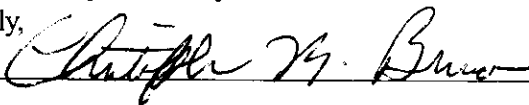

According to your September 9, 2008 order as condition to Energy East being purchased by Iberdrola, "RG&E and NYSEG are precluded from filing general rate applications for one year." That was only five months ago and this constitutes a violation of that agreement. If they could not deliver on the services they promised in purchasing Energy East, they should not have been allowed to do so.

The vast majority of utility customers in our area cannot afford any increase in their utility bills, let alone the estimated \$200 a year this rate increase will impose.

The Public Service Commission was established to protect ratepayers from the potential abuse of monopoly power and ensure access to safe, reliable and low-cost utility service.

I ask the PSC to fulfill its mandate and reject the delivery rate increase. We need rates to go down, not up! Thank you.

Sincerely,
