

**Case No. 12-M-0476 et al.
EDI Business/Technical Working Groups
867MIU/HIU Initiative – CECONY Testing Information
6/30/2017**

Con Edison's Retail Choice Group has identified some of the initial AMI meter installations, and those specifically whose customers are supplied by an ESCO. We then identified which EDI vendor/ESCO handles the EDI transactions on their behalf and will be looking to test with those EDI vendors/ESCOs first, as they will be affected initially.

The list below ranks ESCOs in order of likelihood that the ESCO clients that have customers among the initial AMI meter installations:

EC Info Systems
Avande
Big Apple
Aurea
Just Energy
Latitude
Fluent
UGI
Direct
CES-LTD
Hansen

We are committed to testing with everyone, and will provide specific dates in the near future. We thank you for your continued efforts with this implementation.
