Rebuild & Reconductor Project**

Appendix O

Comprehensive ROW Encroachment Plan

APPENDIX O

Comprehensive Right-of-Way Encroachment Plan for the Clay-DeWitt Line 3 / Clay-Teall Line 10 Rebuild and Reconductor Project (PSC Case 15-T-0305)

This sets forth National Grid's Comprehensive Plan to identify potential encroachments within the Project ROW and to contact individual property owners or occupants to address and seek to rectify such potential encroachments on a case-by-case basis.

This plan establishes a process comprised of three principal components: (1) the identification of potential encroachments; (2) the determination of the compatibility of the encroachment in light of the Project; and (3) steps required for the rectification of impermissible encroachments or the granting of a license or lease for compatible encroachments. Each component is further divided into the following specific actions:

1. Identify potential encroachments on the Project ROW by location and responsible party. This process commences with reports of suspected encroachments on the Project ROW obtained by on-site inspections and by close examination of aerial photographs that show the current condition of the Project ROW.
2. Assess each potential encroachment's compatibility or incompatibility with the Project, specifically determining the following on a case-by-case basis:
 - a. The nature of the use or occupancy of the potential encroachment;
 - b. Whether such potential encroachment is covered by an existing authorization from National Grid or a predecessor company;
 - c. Whether such potential encroachment presents a current and immediate safety concern (determined with reference to state and federal safety requirements);
 - d. The degree and extent of the potential encroachment determined by taking relevant field measurements on site; and
 - e. Whether additional follow-up is required.
3. Seek to rectify each impermissible encroachment by communication with the responsible party, including a letter followed-up with a visit and/or telephone contact, in order to reach resolution by granting a license or lease for a compatible encroachment or by the removal of the encroachment. If the above efforts seeking to rectify an encroachment are unsuccessful, the matter will be referred to National Grid's legal counsel for resolution.

Table 1 - Buildings or Structures to be Removed For Construction

Segment #	Parcel # (Survey id)	Tax ID (PRINTKEY)	County	Town	Property Address	NG Existing Property Interest	Nature of Use (Encroachment)	Location (Str.)	Remove for Construction
1	17	117.-01-02.2	ONONDAGA	CICERO	5250 ORANGEPORT RD	EASEMENT	Trailers, shed, storage	289	Yes
