Re: Case 09-E-0115 - Proceeding on Motion of the Commission to Consider Demand Response Initiatives – Request for Extension of Time to File Program Modifications for Residential Suite of Programs

Dear Secretary Brilling:

Consolidated Edison Company of New York, Inc. (“Con Edison” or “the Company”) hereby requests that the date for filing the Targeted Demand Side Management (“Targeted DSM”) annual report be changed to December 1 from the September 1 date set forth in the Public Service Commission’s June 1, 2011 *Order Adopting with Modifications a New Targeted Demand Side Management Program for Consolidated Edison Company of New York, Inc.*¹ The Company requests this change to: 1) align the timing of the annual report with the December 1 annual report date for Con Edison’s Demand Response programs; 2) alleviate a resource constraint caused by the overlap between the current annual report due date and annual DSM forecasting efforts which are also the responsibility of Con Edison’s Targeted DSM staff; and 3) provide the opportunity to include current program planning efforts that will likely not materialize until after September 1 this year and future program strategies that typically are not known until the Company’s annual load relief plans are published in mid-to-late October each year.

Con Edison appreciates your consideration of this extension request. Please contact me if you have any questions or require any additional information.

Very truly yours,
