RE: opt out meters

Dear Mr. Romine:

Thank you for your interest in Texas Meter & Device Company's reconditioned meters. TMD has been in continuous business since 1937, and is an industry leading supplier of reconditioned meters to utilities, cooperatives, and municipal electric departments. Our reputation for providing the highest quality product, is well supported by our satisfied customers who save hundreds of thousands of dollars by purchasing reconditioned meters. Our reconditioned meters have been approved for sale into the State of California, Registration No. 3145.

TMD reconditioned meters go through a comprehensive cleaning, repair, and calibration process as well as quality control inspections prior to being shipped to a customer. TMD goes to great lengths to provide meters that look as much like new as possible. They are tested and calibrated according to ANSI C12 Standards by our experienced technicians utilizing state-of-the-art, computer controlled test equipment traceable to N.I.S.T. Standards. The meters will function properly and will offer years of reliable service.

TMD offers a 1 year limited warranty on each reconditioned meter. If for any reason a meter requires calibration or fails to function properly and the meter has not been abused, mishandled, misused, installed improperly, or damaged by an "act of God", and the seal has not been broken, TMD will recalibrate, fix or replace the meter at no cost to the buyer.

TMD intends to submit an application for approval of our remanufactured meters to the New York Public Service Commission. We appreciate the opportunity to provide this information on TMD and our reconditioned meters. If you have any questions, please do not hesitate to give me a call.

Respectfully submitted,

Mark Fulwider
