Data Dictionary

~~October 23~~March 31, ~~2014~~2017
Version ~~1.3~~1.4

		Summary of Changes
July 20, 2001		**Initial Release**
August 7, 2002		**Version 1.1 Issued**
		Inserted new REF*AJ segment (Utility Account Number for ESCO/Marketer
		Per the October 2, 2001 clarification, the use attribute for N4 (Service Address) in the N1*8R loop in a Request transaction was changed from Optional to Not Used
July 19, 2006		**Version 1.2 Issued**
		The usage attribute for the N3/N4 segments (Service Address) in an N1*8R (Customer) Loop is revised from Optional to Conditional in Accept Responses to comply with the Uniform Business Practices (Section 4, C.2.a.1.). Service address information may not be sent where the response pertains to an un-metered electric account with multiple service delivery points.
		The FNA code (Fee Not Authorized) is deleted from the list of possible reject reason codes in the REF*7G segment (Reject Response Reasons) and the REF*93 (Fee Approved/Fee Applied) segment is deleted from the standard.
		Fees are no longer being assessed for consumption history provided via EDI. The REF*93 (Fee Approved/Fee Applied) segment is deleted. Fees are no longer being assessed for consumption history provided via EDI.
		A REF03 element is added to the REF*12 segment (Utility Account Number) for use on Enrollment Requests sent to, or received from, Orange & Rockland Utilities when the transaction pertains to consumption history for the un-metered portion of a customer's electric service when both metered and un-metered service are present on the same account. Line references are revised where applicable.
October 23, 2014		**Version 1.3**
		Utility specific notes are generalized, as appropriate, and designated for relocation to/reference within Utility Maintained EDI Guides, as necessary. Replaced references to Marketer and E/M with ESCO.
		Added code "CAB" for Enrollment Block and Historical Block response in REF*7G.
		Added REF*1P Response Information and Warnings segment with code "HUL" for Historical Usage Limited when the data in the 867HU transaction is limited to the PTD*FG loop, i.e. no usage data to be reported.
March 31, 2017		**Version 1.4**
		• Modifications to accommodate 867 IU/HIU Transactions.
