1.0 EXECUTIVE SUMMARY

Consolidated Edison Company of New York, Inc. ("Con Edison" or the "Company") submits this quarterly report on the progress of the Building Efficiency Marketplace REV demonstration project (the "Project") it is implementing as part of the Reforming the Energy Vision ("REV") proceeding, as required by the Order Adopting Regulatory Policy Framework and Implementation Plan, issued by the New York State Public Service Commission ("Commission") on February 26, 2015.

1.1 PROGRAM ACHIEVEMENTS

On July 1, 2015, Con Edison submitted the Project for approval by Department of Public Service Staff ("DPS Staff"); on November 10, 2015, DPS Staff approved the Project. Con Edison filed an implementation plan for the Project with the Commission on November 20, 2015. In Q1 2018, the Company continued the execution of the Project, focusing on customer engagement and documenting customer feedback.

1.2 CYBERSECURITY AND PERSONALLY-IDENTIFIABLE INFORMATION PROTECTION

Consistent with corporate instructions and Commission policy related to cybersecurity and the protection of personally-identifiable information ("PII"), each partner agreement executed for the implementation of the Project includes specific protections related to cybersecurity and PII. Assurance of this protection is critical in encouraging customers to sign up with new and innovative services offered by utilities.

1.3 ACCOUNTING PROCEDURE ESTABLISHED

On February 16, 2016, in Case 15-E-0229, Con Edison filed an accounting procedure for the accounting and recovery of all REV demonstration project costs. This accounting procedure establishes a standardized framework that will govern how the Company categorizes and allocates the costs of the REV demonstration projects, and will facilitate analyzing each project to determine the overall financial benefits of the program to customers.

1.4 COSTS, BENEFITS, AND OPERATIONAL SAVINGS

Budget information for all of the Company's REV demonstration projects is being filed confidentially with the Commission, concurrently with the filing of this document. All
costs filed are incremental costs needed to implement the projects. To date, no tax credits or grants have been available to reduce the net costs of the projects, but Con Edison will take advantage of such offsetting benefits when they are available. There are no operational savings to report at this time.

1.5 BUILDING EFFICIENCY MARKETPLACE

The Project is designed to examine how interval meter data analytics can be leveraged to enable targeting and multi-channel engagement of commercial customers with high energy efficiency savings and demand reduction potential. The Project has developed a web-based portal to engage customers with details about how their buildings consume energy today, their potential energy savings and demand reduction opportunities, as well as the Energy Insights Marketplace to streamline connections between customers and energy efficiency market partners. Virtual, automated savings measurement and verification will be provided to customers, giving them visibility into achieved savings and maximizing the likelihood that implemented projects continue to perform over time. Con Edison is implementing the Project with its partner CLEAResult, formerly Retroficiency, a leading provider of data analytics and software solutions to utilities and commercial customers. As of January 1, 2017, Retroficiency merged with and into its sole owner, Ecova, Inc. In January, 2018, CLEAResult acquired Engie Insight, Ecova’s utility division and is now the project partner for the Building Efficiency Marketplace demonstration project.

In Q1 2018, the Project team continued implementation, promoting the Energy Insights Portal (“Portal”) and Energy Insights Marketplace to a targeted group of large commercial customers. The Portal allows customers to identify specific measure level recommendations and develop potential projects via the Action Plans page. After developing a project in the Portal, customers will be able to submit their project scopes to Market Partners to elicit project proposals. The Project assumes this level of connection between customers and Market Partners will drive new energy efficiency projects. The Project team will be gathering data throughout the life of the Project to inform this assumption.
2.1 DEMONSTRATION HIGHLIGHTS

2.1.1 Since Previous Quarter - Major Task Completion

- Customer Engagement
  o Worked with customers to develop scopes and action plans
  o Performed site walks with market partners to provide bids via the marketplace
- The Energy Insights Marketplace
  o Developed strategy to align qualified market partners with Con Edison’s Manage Energy process
  o Provided platform for over 20 projects
- Phase 2 Marketing
  o Performed bulk email campaign
  o Reviewed performance of bulk campaign vis a vis customized direct outreach

2.1.2 Activities Overview

During Q1 2018, the Project team was able to focus on specific customer projects. The Project team continues to use energy data analytics to identify opportunities, develop project scopes, and put the tools in the customers’ hands to receive project proposals from Market Partners. After managing the bid process, the Project team is able to leverage the Energy Insights Marketplace to present relevant project documentation to the customers, allowing for side by side comparisons.

2.1.3 Key Metrics

Project Impact

The Project team set a goal of 6.45 Million kWh by EOY 2018. Although the milestone for this goal is mid-2018, the Project is on track to meet this goal with over 1.5 million kWh through Q1. Official tracking of this metric will begin in the next quarterly report.

Revenue Realization

This metric tracks revenue earned by the company for facilitating projects through the Energy Insights Marketplace. The Project has yet to earn any revenues as there had not previously been a critical mass of projects to warrant fee collection. During Q2 of
2018 the Project team will reevaluate the feasibility of this target and determine if any changes are needed moving forward.

### 2.1.4 Next Quarter Forecast

In Q2 2018, the Project team will continue to work with customers to develop projects in the Energy Insights Marketplace. The Project team will track insights gathered through the Energy Insights Marketplace in order to inform new ways of interacting with our customers in the Demonstration Project.

### 2.1.5 Checkpoints/Milestone Progress

*Detailed descriptions of the Phases can be found in the Appendices.

**Legend**

- **On Schedule**
- **Delayed w/out Major Impact**
- **Delayed or Stopped – Project Goals Impacted**
2.1.6 Planned Activities

2.1.6.1 Participating Market Partners Engaged in Energy Conservation Measures

**Status:** Green

**Expected Target by Phase 2 Start:** 30 market partners engaged

**Actual by Phase 2 Start:** 65 market partners engaged

**Solutions/strategies in case of results below expectations:** In line with root-cause analysis, actions may include reassessing target, increasing marketing and outreach efforts, or adjusting monetization strategies to encourage market partner participation.

2.1.6.2 Customer and Market Partner Engagement

**Status:** Green

**Expected Target by Phase 1 Midpoint:** 6 Customers

**Actual by Phase 1 Midpoint:** 9 Customers

**Solutions/strategies in case of results below expectations:** In-line with root-cause analysis, actions may include reassessing target, increasing marketing and outreach efforts, or portal redesign to increase outreach and drive portal awareness along with surveying customers to inform them of other marketing and customer engagement options.

2.1.6.3 Projects Contracted by Utility Consulting Services

**Status:** Yellow

**Expected Target by Phase 1 Midpoint:** 5 percent under contract

**Actual by Phase 1 Midpoint:** None so far. This will be revisited Phase 2, Year 1 Midpoint

**Solutions/strategies in case of results below expectations:** In-line with root-cause analysis, actions may include reassessing target, increased consumer and market partners’ outreach to drive portal awareness along with surveying customers to inform them of other marketing and customer engagement options.

2.1.6.4 Revenue Realization

**Status:** Yellow

**Expected Target by Phase 1 End:** $177,000
Actual by Phase 1 End: None so far.

Solutions/strategies in case of results below expectations: In-line with root-cause analysis, actions may include assessing and analyzing the number of participants, average ECM project and projected savings, reassessing target, and engagement success. Depending on which area is identified as a limitation, coordinate with partners on best solution.

2.1.6.5 Project Impact

Status: Green

Expected Target by 2018 End: 6.45 Million KWh

Actual by 2018 Midpoint: N/A

Solutions/strategies in case of results below expectations: In-line with root-cause analysis, actions may include assessing and analyzing number of participants, average ECM project and projected savings, engagement success, reassessing target, and model validation. In addition, review ECM projects for projected versus actual outcomes and re-validate savings potential. Depending on which area is identified as a limitation, coordinate with partners on best solution.

2.2 WORK PLAN & BUDGET REVIEW

2.2.1 Phase Review

2.2.1.1 Phase Progress

2.2.2 Work Plan
2.2.3 Updated Budget

Budget information is being filed confidentially with the Commission.

2.3 CONCLUSION

2.3.1 Lessons Learned

During Q1, the project team conducted bulk email marketing campaigns to customers in the project population. The results were less than the team had hoped for with an average open rate of 13.5 percent and an average response rate of just 0.2 percent. In comparison, direct targeted emails to potential customers yielded a response rate of 1.7 percent. This demonstrates that the bulk email campaigns are a less effective way of communicating with these customers and will require a change to the marketing strategy.

2.3.2 Recommendations
The project team believes bulk emails are not an efficient means of reaching these customers and is pivoting its marketing approach to leverage other Con Edison programs including working directly with the Con Edison sales team to reach customers with the tools offered through the marketplace.

2.4 INCLUDED APPENDICES

The following appendices are included at the end of this Quarterly Progress Report:

Appendix B: Energy Insights – Action Plan Page

Appendix C: Building Efficiency Marketplace Description of Phases
Appendix A: Energy Insights Portal – Overview Page
