Service Standards Applicable to Telephone Corporations

DECEMBER 2013

Company Name: Time Warner Cable Information Services (New York), LLC d/b/a Time Warner Cable

Company Code (NY OCN): 532D

Report Month/Year: December 2013

Date of Report: February 3, 2014

Submitter's Name: Julie Laine
Group Vice President, Chief Counsel, Regulatory

Submitter's Tel. Number: (212) 364-8482

Time Warner Cable Information Services (New York), LLC (the "Company") herein provides data for New York State Customers pertaining to its compliance with the Public Service Commission's Service Standards (Title 16, NYCRR Part 603).

The attached reports and data summarized below provide information about the Company's performance for December 2013. Certain Service Standards described in that Part 603 indicate that measurements should be made at the central office. However, the network architecture used by the Company to provide its services does not include central office switches. Therefore, the data responding to these Service Standards has been measured at the network node level. Those measurements appear in the Time Warner Cable Metrics Detail by Node Reports, attached.

1. Customer Trouble Report Rate (CTTR)

(a) Initial Customer Trouble Reports per Hundred Access Lines per Month

Exhibit I.a illustrates the initial customer trouble report rates (“CTRR”) by month for each of Time Warner Cable’s New York State operating regions (“TWC ORs”). For the months identified below, no TWC OR has exceeded its target of 5.5 trouble reports per 100 access lines.

2. Timeliness of Repair: Percent Out-of-Service Over 24 Hours

Exhibit II illustrates the percentage of out-of-service troubles that are not resolved within twenty-four hours for each TWC OR. For supporting data, please refer to the Time Warner Cable Metrics Detail by Node Report for December 2013, attached. Note that these metrics include customer requests for repair appointments where a truck roll is a requirement, as is typically the case, and where the mutually agreed upon appointment time is more than 24 or 48 hours after the customer reported the trouble.

3. Percent Service Affecting Over 48 Hours

Exhibit III illustrates the percentage of service affecting troubles that are not resolved within 48 hours for each TWC OR. For supporting data, please refer to the Time Warner Cable Metrics Detail by Node Report for December 2013, attached. Note that these metrics include customer requests for repair appointments where a truck roll is requirement, as is typically the case, and where the mutually agreed upon appointment time is more than 24 or 48 hours after the customer reported the trouble.

4. Timeliness of Installation: Percent Initial Basic Local Exchange Service Line Installations within 5 days

Exhibit IV illustrates the percentage of basic local exchange service line installations completed within five days for each TWC OR. TWC installations require access to customer premises in order to place customer premise equipment. Therefore, installation appointments that are mutually agreed to between the customer and TWC and that exceed the five day interval are excluded from this measurement.

5. Timeliness of Installation: Percent Installation Commitments Missed

Exhibit V.a identifies the percentage of initial installation commitments missed per month by area in the New York City market. The measurements show the percent of line installations not completed on or before the date mutually agreed to with the customer. *Exhibit V.b* identifies the percentage of line installations not completed on or before the initial scheduled installation date in all other New York State markets. The measurements on this table represent the combined number of installations that were rescheduled at the customer’s request and installations that were rescheduled because TWC did not meet the committed installation date.

The attached reports and data summarized below provide information about the Company's performance for December 2013. Certain Service Standards described in that Part 603 indicate that measurements should be made at the central office. However, the network architecture used by the Company to provide its services does not include central office switches. Therefore, the data responding to these Service Standards has been measured at the network node level. Those measurements appear in the Time Warner Cable Metrics Detail by Node Reports, attached.

1. Customer Trouble Report Rate (CTTR)

(a) Initial Customer Trouble Reports per Hundred Access Lines per Month

Exhibit I.a illustrates the initial customer trouble report rates (“CTRR”) by month for each of Time Warner Cable’s New York State operating regions (“TWC ORs”). For the months identified below, no TWC OR has exceeded its target of 5.5 trouble reports per 100 access lines.

(b) 85% or More of Total Central Offices Less Than or Equal to 3.3 RPHL

Exhibit I.b illustrates the customer trouble report rates (“CTRR”) by month for each of the Company’s operating regions (“TWC ORs”). For the months identified below, more than 85% of the nodes in each TWC OR had fewer than 3.3 trouble reports per 100 access lines.

Exhibit I.b – Customer Trouble Report Rates less than 3.3%, per Node

2. Timeliness of Repair: Percent Out-of-Service Over 24 Hours (%OOS>24 Hours)

Exhibit II illustrates the percentage of out-of-service troubles that are not resolved within twenty-four hours for each TWC OR. For supporting data, please refer to the Time Warner Cable Metrics Detail by Node Report for December 2013, attached. Note that these metrics include customer requests for repair appointments where a truck roll is a requirement, as is typically the case, and where the mutually agreed upon appointment time is more than 24 hours after the customer reported the trouble.

Exhibit II – Percent Out of Service Over 24 Hours In assembling the December report from supporting documentation from various TWC billing, provisioning and repair systems, we found suspect repair data for the Albany operating region as well as what appears as a shortfall in the statewide node count. We

have asked TWC staff responsible for developing the system queries to extract the data to revisit those elements of the report. They were unable to do that in time for submission of the report today.

3. Percent Service Affecting Over 48 Hours (%OOS>48 Hours)

Exhibit III illustrates the percentage of service affecting troubles that are not resolved within 48 hours for each TWC OR. For supporting data, please refer to the Time Warner Cable Metrics Detail by Node Report for December 2013, attached. Note that these metrics include customer requests for repair appointments where a truck roll is a requirement, as is typically the case, and where the mutually agreed upon appointment time is more than 48 hours after the customer reported the trouble.

4. Timeliness of Installation: Percent Initial Basic Local Exchange Service Line Installations within 5 days

Exhibit IV illustrates the percentage of basic local exchange service line installations completed within five days for each TWC OR. TWC installations require access to customer premises in order to place customer premise equipment. Therefore, installation appointments that are mutually agreed to between the customer and TWC and that exceed the five day interval are excluded from this measurement.

5. Timeliness of Installation: Percent Installation Commitments Missed

Exhibit V.a identifies the percentage of initial installation commitments missed per month by area in the New York City market. The measurements show the percent of line installations not completed on or before the date mutually agreed to with the customer. *Exhibit V.b* identifies the percentage of line installations not completed on or before the initial scheduled installation date in all other New York State markets. The measurements on this table represent the combined number of installations that were rescheduled at the customer’s request and installations that were rescheduled because TWC did not meet the committed installation date.

6. Percent of Final Trunk Group Blockages

Exhibit VI identifies any final trunk group for which 3% or more of the calls presented during the busy hour have been blocked for three or more consecutive months. This metric is only reported on an exception basis. For the month identified below, the company had no final trunk group blockages to report.

7. Answer Time Performance: Business Office Answer Time (within 30 seconds)

8. Answer Time Performance: Repair Office Answer Time (within 30 seconds)

Exhibit VII illustrates the combined percentage of consumer calls to the business office and consumer calls to the repair office answered within thirty seconds. The Company has two customer service organizations serving New York State; one for the New York City market and another for the balance of the State. These offices handle both customer support and repair calls.
