To whom it may concern:

At the December 13, 2011 public statement hearings in Case 11-W-0200, one of the issues raised was the iron content of water provided to households by Long Island American Water (LIAW).

Afterwards, pursuant to an offer during the hearings, I received the attached spreadsheet from Village of Malverne resident Thomas Grech. It presents data described as, or appearing to be, water test results performed on behalf of residents by H2M Labs, Inc. at seven locations in Malverne on February 24 or March 4, 2011. Additionally, I have received the attached e-mail from LIAW President William M. Varley, in response to Mr. Grech's statements on December 13, 2011 regarding water tests.

Parties to this proceeding, and other members of the public, are invited to comment on these documents. Comments should be e-mailed to me by close of business February 27, 2012.

Any comments should directly address the two documents. Comments at the December 23, 2011 hearings, or at the February 10, 2011 community meeting cited during those hearings, need not be restated at this time.

Thank you.
