**Re: Case 13-G-0031 – Proceeding on Motion of the
Commission as to the Rates, Rules and
Regulations of Consolidated Edison Company
of New York, Inc. for Gas Service**

Dear Secretary Burgess:

Consolidated Edison Company of New York, Inc. submits for filing in the accompanying report on gas capital expenditures for the first six months of 2015 pursuant to the Commission's February 21, 2014 order in the referenced proceeding.

Please contact me if you have any questions regarding this matter.

Very truly yours,

/s/ Enver Acevedo

c: All Active Parties in Case 13-G-0031 (via electronic mail)

CONSOLIDATED EDISON COMPANY OF NEW YORK, INC

Gas Rate Case 13-G-0031

Variance Explanation

2015 YTD Actual vs. 2015 YTD Budget

Projects with Variance over 10%	Variance \$ (000's) over / (under)	Variance %	Reason for Variance
Traditional New Business	12,073	50.2%	Variance is related to an increase in New Business services and associated main footage. Trend is expected to continue. A significant portion of this overrun is attributed to #2 Oil-to-Gas Conversions.
New Business - #4/#6 Oil-to-Gas Conversions	(4,083)	-10.4%	Variance due to timing. Program has been delayed in order to complete higher priority projects. We are forecasting to be on budget by year end.
New Business - #4/#6 Oil-to-Gas Regulators	(9,792)	-68.1%	Line consists of 7 new regulator stations. YTD underrun is attributable to two regulators: a) Partial deferment of regulator GR-8 (Hudson and 8th Ave). b) Cancellation of regulator at E226th St and White Plains Rd.
System Reinforcement	(6,028)	-25.3%	Variance is attributable to timing. Harsh winter conditions in early 2015 delayed several winter load relief projects. We expect to be on budget by year end.
Meter Installation	(1,679)	-19.6%	Variance is due to a change in product mix between traditional meter installations and OTG meter installations (below). Overall net meter installations was \$8,472 vs. a rate case amount of \$8,991 resulting in a net variance of \$519 or 5.7% which falls below the 10% reporting threshold.
Meter Installation - #4/#6 Oil-to-Gas Conversions	1,160	285.0%	Variance is due to a change in product mix between traditional meter installations and OTG meter installations (above). Overall net meter installations was \$8,472 vs. a rate case amount of \$8,991 resulting in a net variance of \$519 or 5.7% which falls below the 10% reporting threshold.
GD-3 Leaking Services	6,488	31.4%	Variance is attributable to higher unit cost and higher volume than budgeted. Increase in leaking services is in proportion to an increase in incoming leaks.
GD-4 Corroded Steel Mains	(9,229)	-24.3%	Variance due to timing. Program has been delayed in order to complete higher priority projects and incoming leaks. We are forecasting to be on budget by year end.
GD-5 Cathodic Protection	508	273.1%	Variance is due to volume, a greater number of anodes and test stations were installed than budgeted.

CONSOLIDATED EDISON COMPANY OF NEW YORK, INC

Gas Rate Case 13-G-0031

Variance Explanation

2015 YTD Actual vs. 2015 YTD Budget

Projects with Variance over 10%	Variance \$ (000's) over / (under)	Variance %	Reason for Variance
GD-11 Small Diameter LPCI Replacement Program	(5,554)	-16.2%	Variance due to timing. Program has been delayed in order to complete higher priority projects and incoming leaks. We are forecasting to be on budget by year end.
GD-29 Steel Main Replacement For 2" Coupling Elimination	(3)	100.0%	Variance Immaterial
GD-30 Cisbot Cast Iron Sealing	(7)	100.0%	Variance Immaterial
12" Medium Pressure Cast Iron Main Replacement Program	(37)	100.0%	Variance Immaterial
Replace Corroded Union Tpk Mains	1,368	100.0%	This is a multi year project in which certain segments were deferred in prior years in order to fund higher prioritized projects. Project is being worked on in 2015.
Cortlandt/ Peekskill Tie	837	100.0%	Carryover project originally budgeted for completion in 2014. Project has been completed in 2015.
Ferris Avenue Main Tie	4	100.0%	Variance Immaterial
81 Street Regulator	(97)	100.0%	Variance is due to an accounting error during the setup of the purchase order. Charges are transferred out periodically.

CONSOLIDATED EDISON COMPANY OF NEW YORK, INC

Gas Rate Case 13-G-0031

Variance Explanation

2015 YTD Actual vs. 2015 YTD Budget

Projects with Variance over 10%	Variance \$ (000's) over / (under)	Variance %	Reason for Variance
Regulator - West 57 St & 5 Ave	(2,180)	-27.3%	This is a new regulator to support new business growth. The project was accelerated and work began in 2014, lowering the amount of work allocated to 2015 hence we expect 2015 expenditures to be lower than the original budgeted 2015 amount.
Reg - West Village 15th St & 10th Ave	(3,061)	-38.3%	Variance due to timing. Harsh weather conditions in early 2015 delayed the start of the project. Additionally we are forecasting \$2.5M in cost savings.
W.17Th St & 60Th Ave	86	100.0%	Carryover charges from prior year.
E Stanford Blvd Mt Vernon	82	100.0%	Carryover charges from prior year.
12" HP Main 1500' Westside & Lower Manhattan	10	100.0%	Variance Immaterial.
Eldbridge St and E Hudson	5	100.0%	Variance Immaterial.
Columbus Ave PE Replacement	221	100.0%	Carryover charges from prior year.
GR-514 Columbus & Garden Ave - Mt Vernon	(167)	100.0%	Carryover credits from prior year.

CONSOLIDATED EDISON COMPANY OF NEW YORK, INC

Gas Rate Case 13-G-0031

Variance Explanation

2015 YTD Actual vs. 2015 YTD Budget

Projects with Variance over 10%	Variance \$ (000's) over / (under)	Variance %	Reason for Variance
Regulator Northern Blvd and 228th St	(506)	-50.6%	Variance due to timing. Harsh weather conditions in early 2015 delayed the start of the project. We expect to be on budget by year end.
179th St. & Webster Ave	(27)	100.0%	Variance Immaterial.
Emerging Reliability Work	262	100.0%	New project category which identifies and groups unplanned supply mains that have a leak history and require remediation for system reliability.
188th St HP Replacement	1,222	100.0%	New unplanned project completed as of 6/30/15. High priority large diameter pipe replacement project with active leaks in front of a school.
Roosevelt Island Shaft	(4,817)	-96.4%	Variance is due to timing, the start of project was delayed. Project started in July / August and is expected to be completed by year end.
Tier 1 Security Improvements	(250)	-100.0%	Variance due to timing. Project has been delayed in order to complete higher priority projects and incoming leaks. We are forecasting to be on budget by year end.
Reg - W Thames & Battery PI	49	100.0%	Variance Immaterial.
Measurement - Meter Purchase	2,112	57.0%	Meter purchases and OTG meter purchases (below) should be viewed as a whole as allocation adjustments between both programs are made periodically. We expect both programs to be on budget by year end.
Measurement - #4/#6 Oil-to-Gas Conversions	(1,027)	-62.8%	Meter purchases and OTG meter purchases (above) should be viewed as a whole as allocation adjustments between both programs are made periodically. We expect both programs to be on budget by year end.

Variance Explanation

2015 YTD Actual vs. 2015 YTD Budget

Projects with Variance over 10%	Variance \$ (000's) over / (under)	Variance %	Reason for Variance
Tunnels	(811)	-55.9%	Variance is due to timing. Projects started later than expected due to emergency work but are currently in flight and expected to be completed by year end.
LNG	(1,152)	-60.6%	Variance is due to timing, the start of LNG projects were delayed, specifically vaporizer #3. We expect to complete the project by year end.
SH - Install HP Regulator Vent Flow Check valves	1,101	100.0%	Variance is due to contractor remediation work that needed to be completed and ran into 2015.
SH - Pipe Replacement in Flood Prone Areas	3,652	69.1%	Variance is due to timing. Amount of footage completed YTD exceeds the budgeted YTD amount.
SH - Storm hardening Tunnel Head Houses	(9,483)	-97.4%	Construction phase of the project has been deferred to future periods. Engineering phase will be completed by year end.
SH - Hardening 1st Ave Tunnel	(122)	100.0%	Carryover credit from project completed in 2014. Credit relates to engineering overhead charged incorrectly to the project.
SH - ROV	(850)	-100.0%	Variance is due to timing. Project has been delayed in order to complete higher priority projects. We are forecasting to be on budget by year end.
SH - Auxiliary Fire Pumps	47	100.0%	Variance Immaterial
SH - SWPH Electrical Switchgear and Batteries	(2,749)	-98.0%	Project construction was deferred due to a change in engineering scope increased to comply with fire department regulations. Engineering phase to be completed this year.

Variance Explanation

2015 YTD Actual vs. 2015 YTD Budget

Projects with Variance over 10%	Variance \$ (000's) over / (under)	Variance %	Reason for Variance
SH - Elevate Blackstart Generator SWPH	(420)	-68.9%	Elevate Blackstart Generator SWPH has been delayed due to the filing with the Department of Building (DOB) taking longer than anticipated.
Remotely Operating Valves (ROV's)	131	26.2%	Variance attributed to timing. Project has encountered delays due to reallocation of resources to handle the increase in incoming leaks. We anticipate completing the project by year end.
Westchester/Bronx Border to White Plains (RC08)	(7,011)	-66.2%	Project incurred some delays related to test pits. We anticipate completing the project by year end.
Critical Components - Hunts Point to Bronx Border	(2,930)	-98%	Variance attributed to timing. Project has encountered delays due to reallocation of resources to handle the increase in incoming leaks. Project is scheduled to start in August and is expected to be completed by year end.
Hunts Point To Hellgate (Outlet To St Ann's Tee)	(977)	100%	Variance due to monthly payment from Astoria Energy LLC which is repaying CECONY for the asset over a ten year period. Accounting to correct payments received to proper account.
Transmission Main Leak	154	10%	Variance attributable to carryover work on the Nereid & Baychester transmission leak. Project started in 2014 and consists of replacing 200 feet of 24" transmission main.
Astoria Complex And Tunnel	15	100%	Variance Immaterial
Lower Manhattan Interconnection - Spectra	(977)	100%	Variance is attributable to a credit issued related to billing dispute with contractor. Amount was accrued in prior year and subsequently disputed. We are currently negotiating with the contractor regarding this issue.
134th Street Gate Station	(1)	100%	Variance Immaterial

Main Replacement Index

Form 6

This chart summarizes the actual cost of removal of leak prone pipe by material and region under the Main Replacement Program and Other Programs

Form 7

Summarizes the leak prone pipe (LPP) replaced or abandoned within Consolidated Edison's distribution system through June 30, 2015 by material. The first table displays risk related LPP replacement as part of the "MRP" program. The second table displays the LPP replacement due to "Other" non-risk related reasons. The third table displays the LPP replaced within FEMA flood zones.

Form 8

The table below displays the entries that make up the replacement locations for the MRP and Other categories. Through June 30, 2015 Consolidated Edison replaced 30.96 miles of leak prone pipe.

Form 9

The table below displays the raw output from the company's prioritization program. The list is broken down by material and boro for the next three years of replacement in each area by material.

Form 10

The table below displays the final projects which were planned from the raw output of the prioritization program.

Form 11

This table displays the entries that make up the replacement locations for the LPP replaced in the flood zones category. through June 30, 2015. Consolidated Edison replaced 1.98 miles of leak prone pipe in flood zones.

*The stated year should be the budget year in which the project/program is set to begin.

Project/Program Title	188 th St HP Main Replacement
Project Manager	Robert Mayou
Project Number	
Status of Project	Construction
Estimated Start Date	01/2015
Estimated Completion Date	05/2015
Work Plan Category	Strategic

Work Description:

In Queens there is a 12 inch high pressure steel gas main on 188th Street between 58th Avenue and 56th Avenue. The 12 inch high pressure steel gas main will be replaced by direct burying a 12 inch high pressure polyethylene gas main. The total footage of installation will be 665 feet.

Justification Summary

The 12 inch high pressure steel gas main has three active leaks and is located in front of a school. In addition 188th street is on the pre-paving list scheduled for spring of 2015.

Supplemental Information:

- **Alternatives:** the next most feasible alternative to the solution described is to insert a smaller diameter gas main which will cause an unacceptable loss of system capacity.
- **Risk of No Action:** By not replacing this identified section of main, it will be susceptible to leaks and increase the risk of interruption.
- **Non-financial Benefits:** This project will support reducing the risk of a distribution event on the high pressure leak prone large diameter system. It will also support the continued reliability and availability of the gas system.
- **Summary of Financial Benefits (if applicable) and Costs:** This program is an O&M cost avoidance and does not yield direct financial benefits.
- **Technical Evaluation/Analysis:** The segment on 188th Street was identified, evaluated, and prioritized for replacement based on risk factors such as repair history, outstanding leaks.
- **Project Relationships (if applicable):** None
- **Basis for Estimate:** Historical Unit Cost

Total Funding Level (\$000):

Historical Spend

<u>Actual 2009</u>	<u>Actual 2010</u>	<u>Actual 2011</u>	<u>Actual 2012</u>	<u>Historic Year</u> (O&M only)	<u>Actual 2013</u>

Historical Elements of Expense

(Historical EOE breakout will only be completed for Steam projects/programs of \$500 thousand or more and, for all other organizations, projects/programs of \$1 million or more.)
