Judge Epstein, Commissioner Larocca and Mr. Denn

Thank you for the opportunity to state the case for reversing the decision to raise LIAW rates over the next 3 years.

At the request of Commissioner Larocca, I am attaching the results of water testing done privately by a testing company, H2M.

Further, attached are copies of the minutes of a public meeting held February 2011 at the Malverne Public Library along with a letter written by NY Assemblyman Brian Curran regarding this important issue of water quality.

Again, we find it highly disingenuous that a water rate increase would be even considered while the current water quality is an ongoing issue and also while an expensive acquisition is on the table.

Sincerely,

Tom Grech, Malverne resident and LIAW ratepayer
