

STATE OF NEW YORK  
PUBLIC SERVICE COMMISSION

At a session of the Public Service  
Commission held in the City of  
Albany on February 5, 2015

COMMISSIONERS PRESENT:

Audrey Zibelman, Chair  
Patricia L. Acampora  
Gregg C. Sayre  
Diane X. Burman

CASE 12-M-0476 - Proceeding on Motion of the Commission to  
Assess Certain Aspects of the Residential and  
Small Non-residential Retail Energy Markets in  
New York State.

CASE 98-M-1343 - In the Matter of Retail Access Business Rules.

CASE 06-M-0647 - In the Matter of Energy Service Company Price  
Reporting Requirements.

CASE 98-M-0667 - In the Matter of Electronic Data Interchange.

ORDER GRANTING AND DENYING PETITIONS FOR REHEARING IN PART

(Issued and Effective February 6, 2015)

BY THE COMMISSION:

BACKGROUND

In the Order Taking Actions to Improve the Residential  
and Small Non-residential Retail Access Markets (February Order)  
issued on February 24, 2014 in these proceedings, the Commission  
took a variety of actions intended to assist residential and  
small non-residential customers who seek value in the retail  
energy markets in New York State. On March 27, 2014, four  
parties filed petitions for rehearing, reconsideration and/or

clarification of the February Order (Petitions).<sup>1</sup> In the Order Granting Requests for Rehearing and Issuing a Stay (April Order) issued on April 25, 2014 in these proceedings, the Commission granted the procedural requests for rehearing and stayed certain requirements of the February Order.

The issues raised in the Petitions that are addressed at this time include: (1) conditions for ESCO service to participants in utility administered low income discount programs and the Home Energy Assistance Program (HEAP) (collectively referred to as Assistance Program Participants); (2) the independent third party verification requirements; and (3) whether the revised UBP attached to the February Order was adopted in conformance with the requirements of the State Administrative Procedures Act (SAPA). Further, a revised UBP is adopted and attached to this order as Appendix A.<sup>2</sup> The revised UBP sets forth the effective requirements with which ESCOs must comply, including revisions to reflect the decisions made in this order.<sup>3</sup>

---

<sup>1</sup> Petitions were filed by Constellation Newenergy, Inc. (Constellation), the Retail Energy Supply Association (RESA), Great Eastern Energy (GEE), and the National Energy Marketers Association (NEMA). Constellation also supplemented its petition with an additional request for reconsideration on April 23, 2014.

<sup>2</sup> In addition, the Petitions raise issues, including the February Order's changes to the utilities' current purchase of receivables programs, which will be decided at a later time.

<sup>3</sup> The revised UBP in Appendix A also includes revisions related to accelerated switching of commodity providers, approved in December 2014. Case 12-M-0476 et al., supra, Order Authorizing Accelerated Switching of Commodity Suppliers (issued December 15, 2014). The revised UBP in Appendix A also removes the provisions which were stayed by the April Order.

PUBLIC NOTICE AND COMMENTS

In accordance with SAPA §202(1), notices regarding the issues raised in the Petitions and addressed in this order were published in the State Register on April 30, 2014 [SAPA Nos. 12-M-0476SP5 and 12-M-0476SP6]. The comment period pursuant to SAPA §202(1)(a) ended on June 16, 2014. Comments were received from several parties and the comments are considered below in the context of each issue decided here.<sup>4</sup>

DISCUSSION AND CONCLUSION

Conditions on ESCO Provision of Service  
to Assistance Program Participants

In the February Order, the Commission determined that, for an ESCO to sell energy commodity to Assistance Program Participants, the ESCO must guarantee such customers savings in comparison with what the customer would have paid the utility, or must include energy-related value-added services that may reduce a customer's overall energy bill. The February Order outlined several steps to implement this requirement.

In its Petition, RESA asserts that, in order to serve a prospective Assistance Program Participant, an ESCO must be able to determine the customer's status in order to present an

---

<sup>4</sup> Comments were received from the New York City Department of Consumer Affairs (NYC DCA); the New York State Attorney General (OAG); Empire Natural Gas Corporation (Empire); the Joint Utilities;<sup>4</sup> National Fuel Gas Distribution Corporation (NFG); UGI Energy Services, LLC (UGI); Mirabito Natural Gas, LLC (Mirabito); and GEE. The Joint Utilities includes Consolidated Edison Company of New York, Inc. (Con Edison); Orange and Rockland Utilities, Inc.; Central Hudson Gas & Electric Corporation; National Fuel Gas Distribution Corporation; The Brooklyn Union Gas Company d/b/a National Grid NY; KeySpan Gas East Corporation d/b/a National Grid; Niagara Mohawk Power Corporation d/b/a National Grid; New York State Electric & Gas Corporation and Rochester Gas and Electric Corporation.

appropriate offer. In addition, RESA and NEMA state that an ESCO that chooses not to market to Assistance Program Participants must have such customers identified in advance of their marketing activities in order to avoid needless marketing expense. Furthermore, RESA and NEMA opine, the February Order interferes with the existing contractual relationship between the ESCO and the customer. RESA also proffers that the February Order unreasonably precludes ESCOs from providing fixed-rate offers to Assistance Program Participants. Finally, NEMA states that the February Order lacks details on how to treat customers who become Assistance Program Participants after enrolling with an ESCO.

The April Order stayed the requirements of the February Order related to Assistance Program Participants. On May 13, 2014, the parties met to discuss an Assistance Program Participant proposal presented by ESCO representatives. That proposal would first require the ESCO to ask a prospective customer if he or she is an Assistance Program Participant. If the customer says no, the ESCO can market any offers to that customer. If, upon enrollment, the ESCO learns that the customer is an Assistance Program Participant, the ESCO could retain the customer on a guaranteed rate or retain the customer on a month-to-month variable rate agreement for one quarter, and then return the customer to utility bundled service. At the same meeting, the Joint Utilities put forth a document that identified concerns related to the implementation of the Assistance Program Participant requirements.<sup>5</sup>

---

<sup>5</sup> The utilities sought confirmation: that the ESCO has the responsibility to obtain customer authorization in order for the utility to release to the ESCO information on whether the customer is an Assistance Program Participant; and that the utility is permitted to rely upon the ESCO's representation

In their comments on the Petitions, consumer advocates NYC DCA and OAG, were generally supportive of the actions taken in the February Order. OAG maintains that HEAP and ratepayer funds intended to assist low income customers should not merely pass through to ESCOs. OAG also states that ESCOs should be allowed to offer fixed-rate products to Assistance Program Participants, so long as those products are covered by the same price guarantee as variable-rate products. NYC DCA asks that the Commission reconsider permitting ESCOs to enroll Assistance Program Participants if the ESCO product includes energy-related value-added services because, absent robust additional consumer protection measures, the option may undermine existing consumer protections.

As correctly stated in the February Order, the Commission has authorized more than \$100 million annually for ratepayer-funded low-income discount programs administered by the utilities. These ratepayer funds augment taxpayer funds that provide financial assistance to utility customers through HEAP. The purpose of these important assistance programs is subverted if these significant ratepayer and taxpayer funds are merely passed through to ESCOs for comparatively higher priced gas and electricity, without any corresponding value for Assistance Program Participants. Further, diminishing the value of these financial assistance programs in relation to Assistance Program Participants' bills will make it more difficult for those consumers to pay their utility bills in full. The increased arrears and utility shut-offs that result are detrimental to both customers and utilities, and interfere with the Commission's interest in minimizing the unnecessary

---

that it has received the necessary customer authorization to release the information to the ESCO.

termination of electricity and natural gas service to residential customers.

The conditions on ESCO provision of service to Assistance Program Participants are critical to ensuring that financial assistance provided to such customers is spent most efficiently. Given this important goal, the Commission upholds the conditions provided in the February Order, as modified below. ESCOs have no obligation to serve any customer, however, when an ESCO serves an Assistance Program Participant, the ESCO must satisfy at least one of two conditions. The ESCO must guarantee that the customer will pay no more, on an annual basis, than the customer would have paid as a full service customer of the utility,<sup>6</sup> or the ESCO must provide Assistance Program Participants with energy-related value-added products or services.

Regarding the provision of energy-related value-added services including fixed-rate products, it is important that all customers can take advantage of the opportunities to be created through the Reforming the Energy Vision (REV) initiative,<sup>7</sup> including advanced energy management products to enhance demand elasticity and more efficient use of energy, deeper penetration of renewable energy resources such as wind and solar, wider deployment of distributed energy resources, such as on-site power supplies, and storage. Similarly, all customers should have the opportunity to obtain energy at a reasonable fixed

---

<sup>6</sup> If an Assistance Program Participant is only a customer of an ESCO for less than a full year, e.g., six months, the ESCO must guarantee that the customer will pay no more than he or she would have paid as a full service utility customer for the period in which the ESCO provided the customer's electricity and/or gas.

<sup>7</sup> 14-M-0101, Proceeding on Motion of the Commission in Regard to Reforming the Energy Vision, Order Commencing Proceeding (issued May 8, 2014).

rate, which could assist customers in managing their energy bill. However, this alternative must be structured so as to ensure that Assistance Program Participants have access to these products in manner that does not dilute the effectiveness of the financial assistance programs. To that end, Staff will convene a collaborative of interested parties, within 60 days of the date of this order, to define the energy-related value-added products and services that must be provided to Assistance Program Participants to qualify for exemption from the price guarantee. The Staff-led collaborative shall submit a report of its proposals for Commission consideration within 180 days of the date of this order.

As stated in the February Order, ESCOs must know whether a customer is an Assistance Program Participant in order to comply with these requirements. ESCOs, upon marketing to a customer, must ask the customer if he or she is enrolled in a utility administered low income discount program or HEAP. If the customer indicates that he or she is enrolled in such a program, the ESCO must be able to confirm the customer's status at the time the ESCO is marketing to the customer.<sup>8</sup> A mechanism which allows an ESCO to quickly confirm that the customer is an Assistance Program Participant must be created. The Staff-led collaborative identified above will consider available technologies and mechanisms for implementing point-of-sale confirmation of a customer's Assistance Program Participant status. The collaborative's report shall include a proposal for an appropriate mechanism to allow ESCOs to confirm a customer's Assistance Program Participant status.

---

<sup>8</sup> The ESCO must secure the customer's authorization before a utility can disclose the customer's Assistance Program Participant status.

As with any new requirements, there are specific concerns with existing customers and with customers who may become Assistance Program Participants. The collaborative should also consider how best to protect these customers and include appropriate proposals in its report.

Finally, an ESCO serving customers subject to the price guarantee may have to issue credits. Billing changes may be necessary to accommodate these credits. Because credits will not be issued until sometime after the initiatives described above are implemented, any necessary billing changes should be completed within the next six months. Any EDI changes that may be necessary to accommodate bill credits shall be developed by the EDI Working Group and will be effective upon the filing of a compliance filing that includes the appropriate EDI documentation within 60 days from the date of this Order. Any required testing by utilities and ESCOs must be completed, and the EDI transactions must be operational, within 120 days from the date of the compliance filing.

#### Independent Third Party Verification

The February Order subjects sales resulting from door-to-door or telephonic marketing, or including any door-to-door or telephonic marketing component, to independent third party verification (TPV) after the sales agent leaves the customer's premises or the marketing call ends. The purpose of the independent TPV is to ensure that customers have accepted enrollment with the ESCO and understand the elements critical to the service they are purchasing. The February Order requires that independent verifiers must, at a minimum, ask and receive an affirmative response from the customer to the questions regarding key contract provisions contained in the revised UBP before the ESCO can enroll the consumer with a new supplier.

RESA, NEMA and Constellation seek the re-evaluation of various aspects of the independent TPV requirements.<sup>9</sup> First, RESA would draw a distinction between outbound telemarketing calls and other telephone contacts with consumers, including outbound calls made in response to a customer request for a call back. RESA argues that inbound calls from a customer, and calls made by the ESCO at the customer's request, are voluntary and should not require the same protections as enrollment of a customer who was contacted through cold call telemarketing.<sup>10</sup>

Even when it is the potential customer that calls an ESCO, it remains important to ensure that the customer has been appropriately informed, and understands the terms of the supply agreement with the ESCO. In addition, that a potential customer initiates a call does not guarantee that the marketing conducted by the ESCO on that call is free from deception. Requiring an independent TPV can ensure that a customer enrolls only after having been informed of all the key contract elements. Furthermore, independent TPV can also shield ESCOs from a customer accusation that a switch was unauthorized. Therefore, it is reasonable to apply the independent TPV requirement to all enrollments achieved through telemarketing calls, regardless of whether the call is initiated by the ESCO or the customer.

---

<sup>9</sup> NYC, DCA and OAG, representing consumers, support the Commission's efforts to curtail improper ESCO marketing and sales practices by setting standards for independent TPV of sales resulting from door-to-door or telephonic marketing.

<sup>10</sup> Mirabito claims that enrollments resulting from inbound calls are premised upon an entirely different relationship between ESCO and customer than that established in outbound marketing calls. Further, Mirabito complains, it would be forced to decline to accept enrollments requested through inbound calls, as it is unable to undertake the training and logistics required to support TPV for inbound calls.

Second, RESA believes that the marketing agent making a telephonic enrollment should be allowed to transfer the customer to the TPV vendor without disconnecting the customer (a "warm transfer"). RESA would also permit such a transfer by allowing a marketing agent to initiate a call on the customer's phone in the case of a door-to-door enrollment.

Warm transfers by a telemarketer to an independent TPV, in which the verifier conducts the TPV without the marketing agent on the line, adequately protect consumers. It is also more efficient, in that the TPV vendor need not make a separate call to the customer. Consequently this type of warm transfer is acceptable. However, in the case of door-to-door enrollments, allowing a marketing agent to call the independent TPV vendor for the customer fails to provide adequate protection. Under such circumstances, the marketing agent could easily remain on the premises and "coach" the customer through the TPV. The marketing agent is less likely to remain at the consumer's premises if the independent TPV vendor were to initiate the call with the consumer after the agent's separate notification. Thus, the RESA proposal to allow a door-to-door marketing agent to initiate the independent TPV call is rejected.

Third, RESA states that ESCOs should be permitted to utilize digital interactive voice response (IVR) systems in performing the TPV. IVR eliminates human error and prevents alteration of the prescribed questioning, as the selected verification script will be digitally presented in a form that cannot be modified by a live representative. According to RESA, failure by the customer to answer the prescribed questions satisfactorily would terminate the enrollment.

OAG prefers live independent TPV over the use of IVR. OAG reports that it has heard recordings of IVR verifications

where the customer is merely asked to broadly assent that he or she has been told "the essential terms and conditions" of the ESCO's offer, without specifically verifying any of the details. OAG adds that multiple consumers have informed it that recordings of IVR verification calls have been falsified.

The use of an IVR for verifications can adequately protect consumer interests. It would automate the process through a digitally presented script that solicits customer responses in a simple yes or no format, eliminating the potential for alteration by an ESCO representative. Addressing OAG's concern, the TPV recording must capture the customer's voice. As with a recording of a live TPV, the customer's voice can be used to verify the authenticity of the TPV. Therefore, RESA's request that ESCOs be allowed to use IVR to meet verification requirements for enrollment of customers through door-to-door and telephonic marketing is granted.

Because the IVR system eliminates the potential for influencing the consumer during the TPV, ESCOs may use such a system to conduct the required TPV verification in-house. However, ESCOs who employ IVR to conduct verifications must ensure the validity of the IVR script through capturing in it all of the required information, in an auditable format, along with the customer's voice.<sup>11</sup>

Fourth, NEMA suggests that ESCOs be permitted to perform the verifications either internally or through an independent entity, consistent with the ESCO's business model. NEMA asserts that internal TPV can satisfy the Commission's goal of protecting consumers and ensuring that contracts are executed in a consensual, informed manner.<sup>12</sup> Disagreeing with the ESCO

---

<sup>11</sup> Requiring that the customer's voice be captured provides a basis for verifying the customer's identity.

<sup>12</sup> OAG Comments, p. 15.

representatives, OAG cautions that it has obtained recordings of ESCO telemarketers "who coached consumers to just say 'yes' to all of the TPV questions..." In-house verification has proven to be ineffective in the past. Accordingly, with the exception of the use of an IVR system, the NEMA request is denied.

Fifth, NEMA does not believe that network marketing practices, whereby customers can become representatives that enroll additional customers, should be encompassed within the parameters of the door-to-door or telephonic marketing terminology used in the February Order. According to NEMA, a network marketing representative can make "warm" contacts with the customers it enrolls, in comparison with the "cold" contact made through unscheduled door-to-door sales or outbound telemarketing calls. Further, NEMA asserts that its "Network Marketing Code of Conduct" prohibits network marketing representatives from employing telemarketing or door-to-door sales techniques.

If, as NEMA asserts, network marketing representatives do not engage in telephone marketing or door-to-door sales, then its request to exempt them from TPV is moot, because those requirements adhere only to marketing conducted within the definition of door-to-door sales or telemarketing. However, contrary to NEMA's contentions, information obtained from customer complaints demonstrates that network marketers in practice market by telephone and, whether in person or by telephone, in a manner that goes beyond "friends and family" programs where network marketing representatives would enroll only their acquaintances, friends and families. To adequately protect the customer and the ESCO, the independent TPV requirements apply to all enrollments achieved through door-to-door or telephonic marketing, whether or not the particular marketer asserts that he or she is a "network" marketer.

Sixth, RESA expresses concerns with requiring an independent TPV as a prerequisite to accessing customer data. According to RESA, much of the prescribed TPV script is not applicable to the limited circumstances where an ESCO only seeks access to a customer's data. Accordingly, RESA asserts that where only authorization for access to data is sought, the requirement should be restricted to either written or verbally recorded authorization, without the imposition of the independent TPV requirements. Where access is the only question, customers are sufficiently protected if the ESCO obtains either written or verbally recorded authorization for such access. However, where access to such data is part of an enrollment, an independent TPV is required.

Seventh, RESA claims that the door-to-door standard should not apply where its application may be uncertain, such as enrollments occurring at trade shows, public educational events, public kiosks in malls, or at the place of business of a "business/channel partner" of the ESCO - such as "Radio Shack" or "Best Buy." According to RESA, in these instances, the ESCO is conducting business at a public location at which members of the public voluntarily attend. OAG states that it sees no reason to exempt from the independent TPV requirements sales solicited at the venues RESA describes, because ESCO agents can readily engage in deceptive marketing at those venues.

The independent TPV requirement is intended to protect customers from high-pressure sales channels. However, in the situations RESA describes, consumers can easily extricate themselves from unwanted marketing by walking away. Therefore, the independent TPV requirement will not be extended to these situations.

Eighth, RESA states that UBP Section 5.b.2, which requires an independent TPV for "any sale that originated

through or included either a door-to-door or telephonic marketing component,"<sup>13</sup> is overly broad and imposes unreasonable obligations on ESCOs that should be eliminated.

RESA is correct that this language is overly broad. Accordingly, this language is modified in the UBP. There are instances, however, when an electronic enrollment may require an independent TPV. In cases where, for example, a door-to-door marketing agent enrolls a customer using a mobile electronic device, the ESCO must comply with the independent TPV requirements.

Ninth, RESA asserts that the proposed standards for TPV scripts, set forth in the February Order as UBP Section 5, Attachment 1.A, should be modified. After the Petitions were submitted, consultations were conducted among parties interested in devising an appropriate script. The product of those consultations is set forth in the revised UBP Section 5, Attachment 1.A, attached hereto. The revisions will ensure that customers are only enrolled if they understand the pertinent terms of the ESCO's offer, including whether or not the ESCO guarantees the customer savings on his or her utility bill, through functional questions that can be readily implemented in a TPV format.

ESCOs, and the independent TPV vendors employed by them, are allowed some flexibility regarding the language in the TPV script; however, the information sought in each question must be collected if the independent TPV is to be valid. ESCOs must comply with the revised TPV requirements, including the use of the revised TPV script outline, within 90 days of the issuance of this Order.

---

<sup>13</sup> This standard is reiterated in UBP Sections 10.C.1.i and 10.C.2.h.

The Adoption of a Revised UBP

RESA and Constellation assert that the adoption of a Revised UBP in the February Order failed to conform to the requirements of SAPA. According to RESA, while a Notice of Proposed Rulemaking was published, that notice "did not identify any specific measures that would be subsequently implemented or any existing regulations and rules that was [sic] subject to potential modification."<sup>14</sup> In addition, RESA asserts that the Commission did not follow its past practice of issuing draft UBP language for comment prior to adoption.

The process afforded to the parties, including RESA, since the issuance of the February Order moots the gravamen of RESA's argument. Following the filing of Petitions for Rehearing by RESA and others, many of the UBP revisions adopted in the February Order, including those RESA complains of, were promptly stayed in the April Order. Those petitions were then noticed in conformance with SAPA, and, following several technical conferences where RESA and others were heard to voice their concerns, parties filed the comments in accordance with SAPA that have been considered here. Accordingly, all parties, including RESA, have had ample notice through SAPA and otherwise of the revisions to the UBP which take effect upon issuance of this Order, curing any hypothetical defects in notice that could have occurred previously.

Moreover, contrary to RESA's assertions, there were no defects in notice requiring a cure because the February Order was issued in compliance with SAPA. Prior to its issuance, the Commission, in initiating this proceeding in the October 2012

---

<sup>14</sup> RESA Petition, p. 5.

Order,<sup>15</sup> addressed the issues that would be considered here. That Order was followed by a Notice, issued on October 19, 2012, seeking comments on the improvements to the operation of retail energy markets discussed in the October 2012 Order generally and changes to the UBP specifically.<sup>16</sup>

In accordance with SAPA, the notice of the October 2012 Order RESA complains of was published in the State Register on November 7, 2012.<sup>17</sup> That SAPA notice specifically stated that "[t]he Commission is considering whether to take actions regarding these aspects of the residential and small non-residential retail energy markets." A SAPA notice is sufficient, so long as it apprises interested parties of an issue to be considered, and provides interested parties with the

---

<sup>15</sup> Case 12-M-0476, et al., supra, Order Instituting Proceeding and Seeking Comments Regarding the Operation of the Retail Energy Markets in New York State (issued October 19, 2012)(October 2012 Order).

<sup>16</sup> Question 15 of the Notice specifically asked parties to comment on "What other modifications to existing retail market programs or practices, including modifications to the UBPs, should be considered, and why?"

<sup>17</sup> In its Petition, RESA cites two cases (Patricia Schwartzfigure v. Thomas F. Hartnet, 83 N.Y.2d 296 (1994) and Home Care Assoc. of New York State, Inc. v. Michael J. Dowling, 638 N.Y.S.2d 193 (3rd Dept 1996)), which RESA implies support its position that the February Order was issued in contravention of SAPA. However, neither case is applicable, as in each the agency in question failed to publish a SAPA notice. Here, even RESA admits that a SAPA notice was published in the State Register.

ability to be heard on the issue.<sup>18</sup> Interested parties, including RESA, filed comments in conformance with the SAPA and the October 19, 2012 Notices. In short, all parties, including RESA had adequate notice, under SAPA and otherwise, of the actions the Commission was considering, including the modifications to the UBP made in the February Order. Further, that the Commission has exercised discretion to issue full drafts of the UBPs for comment prior to adoption does not bind the Commission to issue such drafts in every case. SAPA §202(1)(f)(v) and §202(7) state that, with regard to notice of "soft" rules, as defined in SAPA §102(2)(a)(ii), an agency may elect to provide a description of the subject, purpose and substance of a proposed rule, rather than the complete text. Commission orders and the UBPs, adopted by Commission order, are soft, not hard rulemakings, and even RESA does not suggest that review of the text of soft rulemakings is required by SAPA for the issuance of Commission orders. Consequently, all of RESA's arguments on adequacy of notice are rejected.

The Commission orders:

1. The modifications to the Order Taking Actions to Improve the Residential and Small Non-residential Retail Access Markets issued on February 24, 2014 requested in the petitions

---

<sup>18</sup> City of New York v PSC, 963 N.Y.S.2d 447, 451 (3rd Dept. 2013) ("Further, the notices issued by the Commission in connection with the planning proceeding satisfied procedural due process by clearly indicating that the planning case included consideration of the long-term impacts of cost allocation, and petitioner was provided sufficient opportunity to be heard on the issue [citations omitted]."); See also, Matter of Indus. Liaison Comm. Of Niagara Falls Area Chamber of Commerce v. Williams, 521 N.Y.S.2d 321, 325 (3rd Dept. 1987)(SAPA only requires "substantial compliance" and a party is only entitled to procedures insuring that they are given a meaningful opportunity to present their case).

for rehearing, reconsideration and clarification of Constellation Newenergy, Inc., the Retail Energy Supply Association, Great Eastern Energy, and the National Energy Marketers Association are granted in part and denied in part, consistent with the body of this order.

2. Revisions to the Uniform Business Practices, as set forth in Appendix A to this Order, are adopted in accordance with the discussion in the body of this Order. Energy Service Companies (ESCOs) eligible to operate in New York are directed to comply with the revised Uniform Business Practices.

3. The Uniform Business Practices, as amended, are adopted prospectively and apply to new ESCO service agreements and to renewals of current ESCO service agreements.

4. The Staff-led collaborative on certain aspects of ESCO provision of service to Assistance Program Participants shall submit a report, consistent with the discussion in the body of this order, to the Secretary within 180 days of the date of this order.

5. The documentation for the modifications to EDI identified in the body of this order shall be submitted to the Secretary as a compliance filing within 60 days of the date of this order. Without further Commission action, those EDI modifications shall be operable within 120 days of the date of the compliance filing.

6. Electric and gas distribution utilities that have tariffed provisions providing for retail access are directed to file tariff amendments or addenda to incorporate or reflect in their tariffs the Uniform Business Practices revisions approved in Ordering Clause No. 2. The tariff revisions shall be allowed to become effective on not less than one day's notice within 30 days of the date of this order.

7. The requirements of Public Service Law §66(12)(b) as to newspaper publication of the tariff revisions filed in accordance with Ordering Clause No. 4 are waived because this Order gives adequate notice of the changes.

8. The Secretary in her sole discretion may extend the deadlines set forth in this order. Any request for an extension must be in writing, must include a justification for the extension, and must be filed at least one day prior to any affected deadline.

9. These proceedings are continued.

By the Commission,

(SIGNED)

KATHLEEN H. BURGESS  
Secretary

## **SECTION 1: DEFINITIONS**

As used in the Uniform Business Practices (UBP), the following terms shall have the following meanings:

**Assignment** – Transfer by one ESCO to another ESCO of its rights and responsibilities relating to provision of electric and/or gas supply under a sales agreement.

**Bill ready** – A consolidated billing practice that requires each non-billing party, after receiving customers’ usage data, to calculate its charges and send via EDI charges, billing information, and bill messages to the billing party in a form that allows the transfer of the information to the bill in a format the billing party selects.

**Billing cycle** – The period for which a customer is billed for usage of electricity or natural gas.

**Billing services agreement (BSA)** – An agreement between the distribution utility and the ESCO stating the billing practices and procedures and the rights and responsibilities of billing and non-billing parties relating to issuance of consolidated bills to customers.

**Budget billing** – A billing plan that provides for level or uniform amounts due each billing period over a set number of periods, typically 12 months, and determined by dividing projected annual charges by the number of periods. Installment amounts may be adjusted during the period and may include reconciliations at the end of the budget period to account for differences between actual charges and installment amounts.

**Business day** – Monday through Friday, except for public holidays.

**Consolidated billing** – A billing option that provides customers with a single bill combining charges from more than one service provider and issued by a distribution utility providing delivery service (utility consolidated bill) or by a commodity supplier (ESCO consolidated bill).

**Customer inquiry** – A question or request for information from a customer relating to a rate, term, or condition of service provided by an ESCO, distribution utility or other service provider.

**Cramming** – The addition of unauthorized charges to a customer’s bill.

**Deferred payment agreement (DPA)** – A fair and equitable payment plan agreed upon by a customer and utility and/or a customer and an ESCO that allows a customer to pay an overdue amount in installments. A DPA is based upon the customer’s financial circumstances and ability to pay the overdue amount while making payment on current charges.

**Demand** – The amount of electricity or natural gas that is or could be immediately needed by a customer at any given point in time referred to as customer load. For consolidated billing, the term is used in the context of “billing period demand” for customer bills.

**Electric** – The amount of electricity, measured in kilowatts (kW), that a customer uses at a point in time, the customer’s usage averaged over a period, or capacity of facilities reserved for the customer for stand-by or other service.

**Natural Gas** – The amount of gas measured in cubic feet or therms that a customer uses or may use over a period, or capacity of facilities reserved for the customer for stand-by or other service.

Direct customer – An entity that purchases and schedules delivery of electricity or natural gas for its own consumption and not for resale. A customer with an aggregated minimum peak connected load of 1 MW to a designated zonal service point qualifies for direct purchase and scheduling of electricity provided the customer complies with NYISO requirements. A customer with annual usage of a minimum of 3,500 dekatherms of natural gas at a single service point qualifies for direct purchase and scheduling of natural gas.

Distribution utility – A gas or electric corporation owning, operating or managing electric or gas facilities for the purpose of distributing gas or electricity to end users.

Distribution utility customer account number – A number used by a distribution utility to identify the account of a utility customer.

Distribution utility tariff – A schedule of rates, terms and conditions of services provided by a distribution utility.

Door-to-door sales – The sale of energy services in which the ESCO or the ESCO's representative personally solicits the sale, and the buyer's agreement or offer to purchase is made at a place other than the place of business of the seller; provided that "door-to-door sales" shall not include any sale which is conducted and consummated entirely by mail, telephone or other electronic means, or during a scheduled appointment at the premises of a buyer of nonresidential utility service, or through solicitations of commercial accounts at trade or business shows, conventions or expositions.

Drop – A transaction that closes a customer's account with a provider. This term is used when: (1) a customer's enrollment is pending and the customer rescinds the enrollment; (2) a customer enrolled with an ESCO returns to distribution utility service or enrolls with another ESCO; or (3) the ESCO discontinues service to a customer.

Dual billing – A billing option that provides for separate calculation of charges and presentation of bills to the customer by the distribution utility and ESCO.

Electronic data interchange (EDI) – The computer-to-computer exchange of routine information in a standard format using established data processing protocols. EDI transactions are used in retail access programs to switch customers from one supplier to another or to exchange customers' history, usage or billing data between a distribution utility or MDSP and an ESCO. Transaction set standards, processing protocols and test plans are authorized in orders issued by the Public Service Commission in Case 98-M-0667, In the Matter of Electronic Data Interchange and available on the Department of Public Service website at: [www.dps.ny.gov/98m0667.htm](http://www.dps.ny.gov/98m0667.htm).

Energy broker – A non-utility entity that performs energy management or procurement functions on behalf of customers or ESCOs but does not make retail energy sales to customers.

Energy services company (ESCO) – An entity eligible to sell electricity and/or natural gas to end-use customers using the transmission or distribution system of a utility. ESCOs may perform other retail service functions.

ESCO marketing representative – An entity that is either the ESCO, ~~an employee of the ESCO, an agent of the ESCO,~~ or a contractor/vendor conducting, on behalf of the ESCO ~~or ESCOs,~~ any marketing activity that is designed to enroll customers with the ESCO. ~~It also includes subcontractors, employees, agents, vendors and representatives not directly~~

~~contracted by the ESCO who conduct marketing or sales activities on behalf of the ESCO.~~

Enroll/Enrollment – The process used to switch a customer from a distribution utility to an ESCO or from one ESCO to another.

Enrollment date – The effective date for commencement of electric or natural gas service from an ESCO or distribution utility.

Guarantor – An entity that agrees to pay another’s debt or perform another’s duty, liability or obligation.

Independent Third Party Verification – the confirmation of a customer’s agreement to take service from an ESCO or authorization for the ESCO to request information by a Verification Agent.

Interval data – Actual energy usage for a specific time interval for a specific period recorded by a meter or other measurement device.

Load profile – Actual or estimated customer energy usage by interval over a period representing usage for a customer or average usage for a customer class.

Lockbox – A billing payment receipt method agreed upon by a distribution utility and an ESCO, involving use of a third party financial institution to receive and disburse customer payments.

Marketing - The publication, dissemination or distribution of informational and advertising materials regarding the ESCO’s services and products to the public by print, broadcast, electronic media, direct mail or by telecommunication.

Meter – A device for determination of the units of electric or natural gas service supplied to consumers.

Meter Data Service Provider (MDSP) – An entity that provides meter data services, consisting of meter readings, meter data translations, and customer association, validation, editing and estimation.

Meter Service Provider (MSP) – An entity that installs, maintains, tests and removes meters, or other measurement devices and related equipment.

Multi-retailer model – A model for retail access that involves provision of electric or natural gas supply and of delivery service, provided separately to end use customers by two or more entities.

New York State Independent System Operator (NYISO) - An independent management organization, authorized by the Federal Energy Regulatory Commission, operating the bulk electric transmission system.

New delivery customer – A customer initiating delivery service by a distribution utility.

Nomination – A request for delivery of a physical quantity of natural gas or for its delivery at a specific point under a purchase, sale, or transportation agreement.

Office of Consumer Services – Office, within the Department of Public Service, which receives and makes determinations concerning customer complaints. Office of Consumer Services (OCS) identifies the exiting Office or its successor in the event the Office name is changed.

Pay-as-you-get-paid method – A payment processing method offered by a billing party presenting consolidated bills, whereby the billing party forwards payment to the non-billing party after receiving payment from the customer.

Pending enrollment – A stage in processing an enrollment that commences with validation of an enrollment transaction request and ends on the enrollment date that the new supplier is expected to deliver energy.

Pending ESCO – An ESCO is a pending ESCO from the date of receipt of an EDI notice containing the effective date for a customer’s enrollment until the ESCO commences commodity service for that customer.

Plain Language – Written in clear and coherent manner using words with common and everyday meaning and avoiding legal or energy industry terms, acronyms and abbreviations that a person of ordinary intelligence would not be expected to understand. If use of a technical term is necessary, the term is clearly defined in the portion of the text where it is used.

Purchased accounts receivable – A debt owed to an ESCO by a customer for receipt of supplies of gas or electricity and transferred to a distribution utility in exchange for consideration.

With recourse – Purchase of accounts receivable with recourse by a distribution utility means that the ESCO remains liable if its customers fail to make payments. A distribution utility that purchases accounts receivable with recourse sends payments to an ESCO at predetermined intervals for amounts billed that are not in dispute and may offset subsequent purchase payments against or obtain reimbursement from an ESCO of any unpaid amounts.

Without recourse – Purchase of accounts receivable without recourse by a distribution utility means that the ESCO is not liable if its customers fail to make payments. A distribution utility that purchases accounts receivable without recourse sends payments to an ESCO at predetermined intervals for amounts billed that are not in dispute and has no right to seek reimbursement from an ESCO of any unpaid amounts.

Rate ready – A consolidated billing practice that requires each non-billing party to furnish in advance of the billing cycle, rates, rate codes or prices (fixed and/or variable), tax rates, billing information, and bill messages to the billing party. The billing party, after receipt of usage data from the MDSP, uses the information on record to calculate the non-billing party’s charges.

Residential customer – An individual or occupant of a residential premise as defined in 16 NYCRR Part 11.2(a)(2).

Sales agreement – An agreement between a customer and an ESCO that contains the terms and conditions governing the supply of electricity and/or natural gas provided by an ESCO. The agreement may be a written contract signed by the customer or a statement supporting a customer’s verifiable verbal or electronic authorization to enter into an agreement with the ESCO for the services specified.

Single retailer model – A model for retail access that involves provision of electric and/or natural gas service to end users by an ESCO that purchases delivery service from the distribution utility and resells it along with electricity and/or natural gas to end users.

Slamming – Enrollment of a customer by an ESCO without authorization.

~~Small non-residential customer – a non-residential electricity customer in a utility service classification that does not have a demand rate element or a non-residential natural gas customer in a utility service classification that provides firm service.~~

Special meter reading – An actual meter reading performed, upon request, on a date that is different than the regularly scheduled meter reading date.

Special needs customer – A customer who has a certified medical emergency condition, who is elderly, blind or physically challenged, or who may suffer serious impairment to health or safety as a result of service termination during cold weather periods and, thus, is eligible for special procedures before termination of service under the Home Energy Fair Practices Act (HEFPA) (Public Service Law §32(3)).

Switch – Transfer of a customer from one ESCO to another, from a distribution utility to an ESCO, or from an ESCO to a distribution utility.

Switching cycle – For electric service, the period between the date of the last meter read and the next regularly scheduled meter read. For gas customers, the period between the date of the last meter read and the next regularly scheduled meter read or the first day of the month and the first day of the following month.

Termination Fee – An amount specified in an ESCO sales agreement where such agreement permits the ESCO to assess and collect a charge in such amount to a customer who terminates the agreement before the end of a term described in that agreement, regardless of whether the assessed amount is identified as a fee, a charge, liquidated damages or a methodology for the calculation of damages, and regardless of whether it is fixed, scaled or subject to calculation based on market factors.

Verification Agent - An entity that is an independent vendor/contractor conducting, on behalf of the ESCO, verification of an agreement, resulting; ~~at least in part,~~ from telephonic or door-to-door marketing, with a customer to initiate service and begin enrollment or to obtain customer authorization for release of information, as required by Section 5, Attachment 1 of the UBP. In the limited circumstance where the verification is only of customer authorization for release of information, the entity does not need to be independent of the ESCO.

**SECTION 2: ELIGIBILITY REQUIREMENTS**

## A. Applicability

This Section sets forth the process that an applicant is required to follow for a Department of Public Service (the Department) finding of eligibility to sell natural gas or electricity as an ESCO, that an ESCO is required to follow to maintain eligibility, and that a distribution utility is required to follow for discontinuance of an ESCO's or Direct Customer's participation in a distribution utility's retail access program.

## B. Application Requirements

1. Applicants seeking eligibility to sell natural gas and/or electricity as ESCOs are required to submit to the Department an application package containing the following information and attachments:
  - a. A completed Retail Access Eligibility Form, available on the Department website: [www.dps.ny.gov](http://www.dps.ny.gov)
  - b. A sample standard Sales Agreement for each customer class that meets the requirements set forth in Section 5.B.3, *infra*.
  - c. Sample forms of the notices sent upon assignment of sales agreements, discontinuance of service, or transfer of customers to other providers.
  - d. A sample ESCO bill used when dual billing is in effect and, if applicable, a sample ESCO consolidated bill, with terms stated in clear, plain language;
  - e. Procedures used to obtain customer authorization for ESCO access to a customers' historic usage or credit information;
  - f. Sample copies of informational and promotional materials that the ESCO uses for mass marketing purposes;
  - g. Proof of registration with the New York State Department of State;
  - h. Internal procedures for prevention of slamming and cramming;
  - i. Name, postal and e-mail addresses, and telephone and fax numbers for the applicant's main office;
  - j. Names and addresses of any entities that hold ownership interests of 10% or more in the ESCO, including a contact name for corporate entities and partnerships;
  - k. Detailed explanation of any criminal or regulatory sanctions imposed during the previous 36 months against any senior officers of the ESCO or any entities holding ownership interests of 10% or more in the ESCO;
  - l. A copy of the ESCO's quality assurance program, which is designed to monitor (a) compliance with Section 10 of the UBP and (b) accuracy of the ESCO marketing materials provided to prospective customers;
  - m. A completed Service Provider Contact Form, which can be found on the Department's website <http://www.dps.ny.gov/ocs.html>, identifying the ESCO's employee(s) responsible for resolving consumer complaints received by the Department and referred to the ESCO; and

- n. A list of the entities, including contractors and sub-contractors, that will market to customers on behalf of the ESCO. The list must include the entities' names, addresses, phone numbers and owners, managers, and/or principals. This list must be updated regularly as entities are added or removed.
2. Applicants shall submit to the Department Test Moderator designated EDI transactions required for syntactical verification in the Phase I testing program. The Department shall maintain a list of ESCOs that successfully complete Phase I test requirements by transaction type.
3. An ESCO that knowingly makes false statements in its application package is subject to denial or revocation of eligibility.
4. If the application package contains information that is a trade secret or sensitive for security reasons, the applicant may request that the Department withhold disclosure of the information, pursuant to the Freedom of Information Law (Public Officers Law Article 6) and Public Service Commission regulations (16 NYCRR §6-1.3).

#### C. Department Review Process

The Department shall review the application package and conduct EDI Phase I testing as required for each applicant. An ESCO shall notify the Department of any major changes in the information submitted in the Retail Access Eligibility Form and/or application package that occurs during the Department review process. The Department shall advise the applicant, in writing, if the applicant submitted the required information and EDI testing is successfully completed.

1. ESCOs deemed eligible to provide commodity service by the Department must begin serving customers within two-years from the date of the letter notifying the ESCO of their eligibility status (eligibility letter). The ESCO that does not begin serving customers within such two-year period may be required to conduct additional EDI testing before enrollments will be processed.

#### D. Maintaining ESCO Eligibility Status

1. An ESCO shall submit by January 31 each year (January 31 Statement):
  - a. a statement that the information and attachments in its Retail Access Eligibility Form and application package are current; or
  - ~~a.b.~~ a description of revisions to the Retail Access Eligibility Form and application package and a copy of the revised portions or, at the ESCO's option, a copy of the revised portions identifying the revisions by highlighting or other means.
2. An ESCO shall update all the information it submitted in its original application package to the Department every three years, starting from the date of its eligibility letter, consistent with the requirements of UBP Section 2.B. An ESCO's status as an eligible supplier is continuous from the date of the Department eligibility letter, unless revoked or otherwise limited in accordance with UBP Section 2.D.5. If the three year anniversary date falls within one month of January 31, the ESCO shall resubmit its application package in lieu of the January 31 statement.

- ~~a. a description of revisions to the Retail Access Eligibility Form and application package and a copy of the revised portions or, at the ESCO's option, a copy of the revised portions identifying the revisions by highlighting or other means.~~
3. An ESCO shall file with the Secretary, a separate average unit price for products with no energy-related value added services for each of ~~four~~ two groups of customers and by load zone: i) residential price fixed for a minimum 12 month period; ii) residential variable price; ~~iii) small commercial price fixed for a minimum 12 month period and iv) small commercial variable price.~~ The averages should be weighted by the amount of commodity sold at each price within each customer category. ESCOs shall also file the number of customers purchasing products in those categories. ESCOs shall file the required information quarterly, reflecting data over that period, within 30 days of the end of each calendar quarter (i.e., data must be provided no later than April 30<sup>th</sup>, July 30<sup>th</sup>, October 30<sup>th</sup> and January 30<sup>th</sup> of each year).<sup>1</sup>
  4. An ESCO shall submit at other times during the year:
    - a. A description of any major change in the Retail Access Eligibility Form and/or application package and a copy of the revised portions or, at the ESCO's option, a copy of the revised portions identifying the revisions by highlighting or other means. For purposes of Subdivision D of this Section, the term, "major change," means a revision in the terms and conditions applicable to the business relationship between the ESCO and its customers, including provisions governing the process for termination of sales agreements.
    - b. Changes in marketing plans, including changes to the list required in subsection B.1.n of this Section of the UBP.
    - c. Changes in the ESCO's business and customer service information displayed on the Department's Website.
    - d. At least once every thirty days, each ESCO serving residential ~~and/or small non-residential~~ customers must post a price for each product it offers to those customer classes (e.g., fixed-price, variable-price, renewable energy, with each type of value-added service, etc) on the Power to Choose website. ~~The posted prices shall not include any introductory, promotional or "teaser" rate.~~ Each ESCO must guarantee to charge new customers no more than the price of the ESCOs posted offers at the time of the customer's agreement for each product.
    - e. Changes in personnel responsible for resolving consumer complaints received by the Department and referred to the ESCO.
  5. An ESCO may be subject to the consequences listed in UBP Section 2.D.56.b for reasons, including, but not limited to:
    - a. false or misleading information in the application package;

<sup>1</sup> If the Power-to-Choose website is modified to allow ESCOs to file this information there, the Department may notify ESCOs that compliance with this provision may be accomplished in that manner.

- b. failure to adhere to the policies and procedures described in its Sales Agreement;
  - c. failure to comply with required customer protections;
  - d. failure to comply with applicable NYISO requirements, reporting requirements, or Department oversight requirements;
  - e. failure to provide notice to the Department of any material changes in the information contained in the Retail Access Eligibility Form or application package;
  - f. failure to comply with the UBP terms and conditions, including discontinuance requirements;
  - g. failure to comply with EDI transaction set standards and processing protocols and/or use properly functioning EDI systems;
  - h. repeated failures to comply with price reporting requirements, reporting misleading price information, or continuing to fail to comply with price reporting requirements after withdrawal of eligibility to enroll new customers;
  - i. failure to comply with the Commission's Environmental Disclosure Requirements or failure to comply with other Commission Orders, Rules or Regulations;
  - j. failure to reply to a complaint filed with the Department and referred to the ESCO within the timeframe established by the Department's Office of Consumer Services which is not less than five days;
  - k. any of the reasons stated in Subdivision F of this Section; or
  - l. failure to comply with any of the Marketing Standards set forth in Section 10 of the UBP.
6. In determining the appropriate consequence for a failure or non-compliance in one or more of the categories set forth in UBP Section 2.D.45, the Commission or Department may take into account the nature, the circumstances, including the scope of harm to individual customers, and the gravity of the failure or non-compliance, as well as the ESCO's history of previous violations.
- a. The Commission or Department shall:
    1. Notify the ESCO in writing of its failure to comply and request that the ESCO take appropriate corrective action or provide remedies within the directed cure period, which will be based on a reasonable amount of time given the nature of the issue to be cured.
    2. Upon failure of the ESCO to take corrective actions or provide remedies within the cure period, the Commission may impose the consequences listed in subparagraph b of this paragraph.
    3. Consequences shall not be imposed until after the ESCO is provided notice and an opportunity to respond.
    4. The notice of consequences imposed by the Commission will be published on the Department's website.
  - b. Consequences for non-compliance in one or more of the categories set forth in UBP Section 2.D.5 may include one or more of the following restrictions on

an ESCO's opportunity to sell electricity and/or natural gas to retail customers:

1. Suspension from a specific Commission approved retail program in either a specific service territory or all territories in New York;
  2. Suspension of the ability to enroll new customers in either a specific service territory or all service territories in New York;
  3. Imposition of a requirement to record all telephonic marketing presentations, which shall be made available to the Department for review;
  4. Reimbursements to customers who did not receive savings promised in the ESCO's sales agreement/Customer Disclosure Statement or substantially demonstrated to have been included in the ESCO's marketing presentation or to customers who incurred costs as a result of the ESCO's failure to comply with the marketing standards set forth in Section 10 of the UBP;
  5. Release of customers from sales agreements without imposition of early termination fees;
  6. Revocation of an ESCO's eligibility to operate in New York; and,
  7. Any other measures that the Commission may deem appropriate.
- c. Consequences imposed pursuant to this paragraph shall continue to apply until the ESCO's failure to comply with the UBP has been cured or the Commission or Department has determined that no further cure is necessary.
7. An ESCO's eligibility to serve customers is valid unless: the ESCO abandons its eligibility status; or such status is revoked by the Commission through a final order pursuant to UBP Section 2.D.~~56~~.
  8. The Department shall notify distribution utilities upon notice to the ESCO, and the NYISO if applicable, of any determination to revoke an ESCO's eligibility to sell natural gas and/or electricity. The distribution utility shall notify the ESCO's customers, in accordance with paragraph 3 of Subdivision F of this Section, of any Department revocation of an ESCO's eligibility.
- E. Distribution Utility Requirements
1. After receipt of the Department's compliance letter, the ESCO shall notify the distribution utility, and NYISO if applicable, of its eligibility status and intent to complete the process to commence operation in the distribution utility's service area, including execution of any operating agreement that is required.
  2. Upon satisfaction of the distribution utility's and, if applicable the NYISO's requirements, and successful completion of EDI testing conducted by the distribution utility, the ESCO may enter into an operating agreement, if any is required, with the distribution utility to commence operations in its service territory.
- F. Discontinuance of an ESCO's and Direct Customer's Participation in a Retail Access Program
1. In accordance with the procedures established in this Subdivision, a distribution utility may discontinue an ESCO's or Direct Customer's participation in its retail access program for the following reasons:

- a. Failure to act that is likely to cause, or has caused, a significant risk or condition that compromises the safety, system security, or operational reliability of the distribution utility's system, and the ESCO or Direct Customer failed to eliminate immediately the risk or condition upon verified receipt of a non-EDI notice;
  - b. Failure to provide natural gas (provided zero quantity) to the distribution utility's city gate;
  - c. Failure to pay an invoice upon the due date;
  - d. Failure to provide for delivery of at least 95% of the amount of natural gas directed by a distribution utility for delivery or at least 80% of the daily metered usage of the ESCO's customers or a Direct Customer's specified load or lower percentages included in a balancing program established in a distribution utility's tariff and/or any operating agreement;
  - e. Failure to maintain a creditworthiness standard or provide required security;
  - f. Failure to comply with the terms and conditions of a distribution utility's tariff, operating agreement, or Gas Transportation Operating Procedures (GTOP) Manual to the extent that said documents are consistent with the provisions of the UBP;
  - g. Discontinuance of an ESCO's or Direct Customer's participation in a distribution utility's retail access program by the NYISO; or,
  - h. Commission determination that an ESCO is not eligible to sell natural gas or electricity to retail customers.
2. To initiate the discontinuance process, a distribution utility shall send a non-EDI discontinuance notice by overnight mail and verified receipt, to the ESCO or Direct Customer and the Department. The notice shall contain the following information:
    - a. The reason, cure period, if any, and effective date for the discontinuance;
    - b. A statement that the distribution utility shall notify the ESCO's customers of the discontinuance if the ESCO fails to correct the deficiency described in the notice within the cure period, unless the Department directs the distribution utility to stop the discontinuance process;
    - c. The distribution utility may suspend the ESCO's right to enroll customers until correction of the deficiency; and
    - d. Correction of the deficiency within the cure period, or a Department directive, will end the discontinuance process.
  3. The distribution utility shall send notices to the ESCO's customers informing them of the discontinuance and providing the following information:
    - a. The discontinuance shall or did occur on one of the following dates selected by the distribution utility: the scheduled meter read date, the first day of the month, or another date, if readings are estimated, or on the date of a special meter read;

- b. Customers have the option to select another ESCO or return to full utility service or, if a program authorizing random assignment is in effect, to enroll with a designated ESCO through that program;
  - c. Names and telephone numbers of ESCOs offering service to retail customers in the distribution utility's service territory;
  - d. Any ESCO selected by a customer may file an enrollment request on the customer's behalf with the distribution utility, and the distribution utility shall charge no fee for changing the customer's provider to the new ESCO; and,
  - e. During any interim between discontinuance of a customer's current ESCO and enrollment with a new ESCO, the distribution utility shall provide service under its applicable tariff, unless the distribution utility notified the customer that it is terminating its delivery services to the customer on or before the discontinuance date.
4. The distribution utility shall submit a sample copy of its discontinuance notice to the Department for review and approval prior to distribution to customers.
  5. The distribution utility may request permission from the Department to expedite the discontinuance process, upon a showing that it is necessary for safe and adequate service or in the public interest. Any expeditious discontinuance process shall include the ESCO or Direct Customer, and the distribution utility.
  6. Upon any discontinuance, an ESCO or Direct Customer shall remain responsible for payment or reimbursement of any and all sums owed under the distribution utility tariffs, any tariffs on file with the FERC and service agreements relating thereto, or any agreements between the ESCO and the distribution utility.
  7. The notice requirements and time limits for a distribution utility to discontinue an ESCO's or Direct Customer's participation in a distribution utility's retail access program (discontinue participation) are:
    - a. Upon a distribution utility determination that an ESCO's or Direct Customer's action, or failure to act, is likely to cause, or has caused, a significant risk or condition that compromises the safety, system security, or operational reliability of the distribution utility's system and that the ESCO or Direct Customer failed to eliminate immediately the risk or condition upon verified receipt of a non-EDI notice, the distribution utility may discontinue participation as soon as practicable.
    - b. Upon a distribution utility determination that an ESCO or Direct Customer responsible for the delivery of natural gas failed, except under force majeure conditions, to deliver natural gas (provided zero quantity) to the distribution utility's service territory for its load, the distribution utility may discontinue participation no sooner than two business days after receipt by the ESCO or Direct Customer of a discontinuance notice.
    - c. Upon a distribution utility determination that an ESCO or Direct Customer failed to pay an invoice on the due date, as specified in the distribution utility's tariff, and the ESCO's or Direct Customer's required security or credit limit is insufficient to cover the unpaid amount, with interest, the distribution utility may discontinue participation no sooner than ten business

days (cure period) after receipt by the ESCO or Direct Customer of a discontinuance notice. If the ESCO or Direct Customer pays the amount due on or before the expiration of the cure period, the distribution utility shall stop the process to discontinue participation.

- d. Upon a distribution utility determination that an ESCO or Direct Customer responsible for the nomination and delivery of natural gas failed, except in force majeure conditions, to nominate and/or deliver sufficient natural gas to the distribution utility's service territory to satisfy at least 95% of the amount of natural gas directed by a distribution utility for delivery or at least 80% of the daily metered usage of the ESCO's customers or the Direct Customer's specified load or lower percentages included in a balancing program established in a distribution utility's tariffs and/or any operating agreement on any three days during any month, the distribution utility may initiate a discontinuance process no sooner than five business days (cure period) after receipt by the ESCO or Direct Customer of a discontinuance notice. If the ESCO or Direct Customer provides adequate assurances and a description of any necessary process changes that ensure adequate nominations and deliveries on or before the expiration of the cure period, the distribution utility shall stop the discontinuance process. Upon a determination to continue the discontinuance process because the assurances and proposed process changes are inadequate, the distribution utility shall notify the ESCO or Direct Customer that it will discontinue participation no later than 15 business days from the expiration of the cure period. The distribution utility shall notify the ESCO's customers that the distribution utility will discontinue participation on or before the expiration of 15 business days from the end of the cure period. If a failure to provide sufficient natural gas for any 3 days during a calendar month occurred during the past 12 months and the distribution utility sent a related discontinuance notice for each occurrence, it may discontinue participation no sooner than two business days after receipt by an ESCO or Direct Customer of a discontinuance notice.
- e. Upon a distribution utility determination that an ESCO or Direct Customer failed to provide or maintain a creditworthiness standard or required security, the distribution utility may initiate a discontinuance process no sooner than five business days (cure period) after receipt by the ESCO or Direct Customer of a discontinuance notice. If the ESCO or Direct Customer satisfies the creditworthiness standard or provides the required security on or before the expiration of the cure period, the distribution utility shall stop the discontinuance process. Upon a determination to continue with the discontinuance process because the ESCO or Direct Customer failed to comply with the creditworthiness standard or provide adequate security, the distribution utility shall notify the ESCO or Direct Customer that it will discontinue participation no later than 15 business days from the expiration of the cure period. The distribution utility shall notify the ESCO's customers that it will discontinue participation on or before 15 days from the expiration of the cure period. If a failure to comply with the creditworthiness standard or provide adequate security occurred twice during the past 12 months and the

distribution utility sent a related discontinuance notice for each failure, it may discontinue participation no sooner than two business days after receipt by an ESCO or Direct Customer of a discontinuance notice.

- f. Upon a distribution utility determination that an ESCO or Direct Customer failed, except in force majeure conditions, to comply with any other applicable provision of the distribution utility's tariff, operating agreement, or GTOP manual, the distribution utility may initiate a discontinuance process no sooner than ten business days (cure period) after receipt by the ESCO or Direct Customer of a discontinuance notice. If the ESCO or Direct Customer provides adequate assurances and a description of any necessary process changes that ensure compliance on or before the expiration of the cure period, the distribution utility shall stop the discontinuance process. Upon a determination to continue the discontinuance process because the assurances and proposed process changes are inadequate, the distribution utility shall notify the ESCO or Direct Customer that it will discontinue participation no later than 15 business days from the expiration of the cure period. The distribution utility shall notify the ESCO's customers that it will discontinue participation on or before the expiration of 15 business days after the end of the cure period.

**SECTION 3: CREDITWORTHINESS****A. Applicability**

This Section establishes creditworthiness standards that apply to ESCOs and Direct Customers. An ESCO's and Direct Customer's participation in a distribution utility's retail access program is contingent upon satisfaction of creditworthiness requirements and provision of any security.

**B. ESCOs**

1. An ESCO shall satisfy a distribution utility's creditworthiness requirements if:
  - a. The ESCO, or a guarantor, maintains a minimum rating from one of the rating agencies and no rating below the minimum from one of the other two rating agencies. For the purposes of this Section, minimum rating shall mean "BBB" from Standard & Poor's, "Baa2" from Moody's Investor Service, or "BBB" from Fitch Ratings (minimum rating); or,
  - b. The ESCO enters into a billing arrangement with the distribution utility, whereby the distribution utility bills customers on behalf of the ESCO and retains the funds it collects to offset any balancing and billing service charges provided that the distribution utility has a priority security interest with a first right of access to the funds. The ESCO shall submit an affidavit from a senior officer attesting to such utility interest and right. Except that an ESCO serving customers outside of such billing arrangement, must satisfy the security requirements of UBP Section 3.D with respect to those customers.
2. If an ESCO, or a guarantor, is not rated by Standard & Poor's, Moody's Investor Service or Fitch Ratings, it shall satisfy a distribution utility's creditworthiness requirements if the ESCO, or a guarantor:
  - a. Maintains a minimum "1A2" rating from Dun & Bradstreet (Dun and Bradstreet minimum rating) and the ESCO maintains 24 months good payment history with the distribution utility; and,
  - b. Provides any security required by the distribution utility, calculated in accordance with Subdivision D, after deduction of the following unsecured credit allowances:

<u>Rating</u>	<u>Unsecured Credit Allowance</u>
5A1 or 5A2	30% of an ESCO's tangible net worth, up to 5% of the distribution utility's average monthly revenues for the applicable service
4A1 or 4A2	30% of an ESCO's tangible net worth, up to 5% of the distribution utility's average monthly revenues for the applicable service
3A1 or 3A2	30% of an ESCO's tangible net worth, up to 5% of the distribution utility's average monthly revenues for the applicable service
2A1 or 2A2	50% of an ESCO's tangible net worth, up to \$500,000
1A1 or 1A2	50% of an ESCO's tangible net worth, up to \$375,000

An ESCO shall provide information, upon request of the distribution utility, to enable the distribution utility to verify the ESCO's equity. The distribution utility may request reasonable information to obtain the verification and shall safeguard it as confidential information and protect it from public disclosure. The distribution utility may deny the unsecured credit allowance to any ESCO that fails to provide the requested information.

3. A distribution utility may require an ESCO to provide and maintain security in the full amount of the distribution utility's credit risk, calculated in accordance with Subdivision D, if:
  - a. The ESCO, or a guarantor, is not rated;
  - b. The ESCO, or a guarantor, with a minimum rating is placed on credit watch with negative implications or is rated below the minimum rating;
  - c. The ESCO, or a guarantor, is rated below the Dun & Bradstreet minimum rating or the ESCO fails to maintain 24 months good payment history with the distribution utility; or,
  - d. An ESCO issuing consolidated bills fails to render timely bills to customers or to make timely payments to the distribution utility.
4. If a distribution utility's credit risk, associated with an ESCO's participation in its retail access program, exceeds 5% of the distribution utility's average monthly revenues for the applicable service, the distribution utility may require the ESCO, in addition to maintaining a minimum rating, to provide and maintain security in the amount of such excess credit risk.

#### C. Direct Customers

A Direct Customer shall satisfy a distribution utility's creditworthiness requirements if:

1. Its account is current and remained current for the past 12 months; and,
2. If its debt is rated, it maintains a minimum rating of its long-term unsecured debt securities from one of the rating agencies and no rating below the minimum rating from one of the other two rating agencies.

D. Calculation of Credit Risk and Security

The distribution utility shall calculate its credit risk and establish its security requirements as follows:

1. Delivery Service Risk

- a. For an ESCO that issues a consolidated bill under a multi-retailer model, a distribution utility may require security in an amount no greater than 45 days of peak usage of the ESCO's customers' projected energy requirements during the next 12 months, priced at the distribution utility's applicable delivery service rate and including relevant customer charges.
- b. For an ESCO that bills customers for delivery and commodity services under a single retailer model, a distribution utility may require security in an amount no greater than 60 days of peak usage of the ESCO's customers' projected energy requirements during the next 12 months, priced at the distribution utility's applicable delivery service rate and including relevant customer charges.
- c. Upon an ESCO request, the distribution utility shall establish separate security requirements for summer (April 1 - October 31) and winter (November 1 - March 31) and may retain winter security until the end of two months (April and May) after the end of the winter period.

2. Natural Gas Imbalance Risk

- a. The distribution utility may require an ESCO or Direct Customer to provide security in an amount no greater than the ESCO's customers' or a Direct Customer's projected maximum daily quantity times peak forecasted NYMEX price for the next 12 months and for upstream capacity to the city gate times 10 days.
- b. Upon the request of an ESCO or Direct Customer, the distribution utility shall establish separate security requirements for summer (April 1 - October 31) and winter (November 1 - March 31) and may retain winter security until the end of two months (April and May) after the end of the winter period.

3. Major Change in Risk

- a. A major change shall mean a change in credit risk of more than the greater of 10% or \$200,000.
- b. The ESCO or Direct Customer shall promptly notify the distribution utility and the Department of any major change in credit and or rating risk.
- c. The distribution utility may require an ESCO or a Direct Customer, within five days, to provide additional amounts of security if a major change occurs to increase its credit risk, as follows:
  1. If Standard & Poors, Moody's Investor Service, or Fitch Ratings downgrades an ESCO's, or its guarantor's, rating or a Direct Customer's

debt below the minimum rating or Dun & Bradstreet downgrades an ESCO's, or its guarantor's, rating or a Direct Customer's debt; or,

2. An increase occurs in customer usage or in energy prices and such increase is sustained for at least 30 days.
- d. In the event that a major change occurs to decrease a distribution utility's credit and/or rating risk, results in compliance by an ESCO or Direct Customer with creditworthiness requirements, and elimination of the basis for holding some or all of the security, the distribution utility shall return or release the excess amount of the ESCO's or Direct Customer's security with accumulated interest, if applicable. The distribution utility shall return such amount within five business days after receipt of an ESCO or Direct Customer notice informing the distribution utility of the occurrence of such major change.

#### E. Security Instruments

1. The following financial arrangements are acceptable methods of providing security:
  - a. Deposit or prepayment, which shall accumulate interest at the applicable rate per annum approved by the Public Service Commission for "Other Customer Capital";
  - b. Standby irrevocable letter of credit or surety bond issued by a bank, insurance company or other financial institution with at least an "A" bond rating;
  - c. Security interest in collateral; or,
  - d. Guarantee by another party or entity with a credit rating of at least "BBB" by S&P, "Baa2" by Moody's, or "BBB" by Fitch; or
  - e. Other means of providing or establishing adequate security.
2. A distribution utility may refuse to accept any of these methods for just cause provided that its policy is applied in a nondiscriminatory manner to any ESCO.
3. If the credit rating of a bank, insurance company, or other financial institution that issues a letter of credit or surety bond to an ESCO or Direct Customer falls below an "A" rating, the distribution utility shall allow a minimum of five business days for an ESCO or Direct Customer to obtain a substitute letter of credit or surety bond from an "A" rated bank, insurance company, or other financial institution.

#### F. Lockbox

If the distribution utility and ESCO arrange for a lockbox, security requirements are reduced by 50% provided that the arrangement includes the following:

1. Agreement on allocation of funds and the first right of the distribution utility, in the event of an ESCO's financial difficulty, to obtain funds in the lockbox deposited to the credit of the ESCO;
2. Establishment of rules for managing the lockbox;
3. Agreement on conditions for terminating the lockbox for non-compliance with the rules or for failure to receive customer payments on a timely basis; and,

4. Responsibility of an ESCO for any costs associated with implementing and administering the lockbox.

#### G. Calling on Security

1. If an ESCO or Direct Customer fails to pay the distribution utility, in accordance with UPB Section 7, Invoices, the distribution utility may draw from security provided that the distribution utility notifies the ESCO or Direct Customer five business days' in advance of the withdrawal and the ESCO or Direct Customer fails to make full payment before the expiration of the five business days.
2. If an ESCO receives a discontinuance notice or elects to discontinue service to customers and owes amounts to the distribution utility, the distribution utility may draw from the security provided by the ESCO without prior notice.
3. If an ESCO files a petition or an involuntary petition is filed against an ESCO under the laws pertaining to bankruptcy, the distribution utility may draw from security, to the extent permitted by applicable law.

#### H. Application by Distribution Utilities

1. Within ten business days after receipt of a complete ESCO application, a distribution utility shall complete its evaluation of initial creditworthiness, state the rationale for its determination, and provide the calculation supporting the credit limit and any resulting security requirement.
2. A distribution utility shall perform, at least annually, an evaluation, at no charge, of an ESCO's satisfaction of creditworthiness standards and security requirements.
3. A distribution utility shall perform evaluations of creditworthiness, security requirements, and security calculations in a non-discriminatory and reasonable manner.
4. Pending resolution of any dispute, the ESCO or Direct Customer shall provide requested security within the time required in this Section.
5. A distribution utility may reduce or eliminate any security requirement provided that it reduces or eliminates the requirement in a nondiscriminatory manner for any ESCO or Direct Customer. The distribution utility may request reasonable information to evaluate credit risk. If an ESCO or Direct Customer fails to provide the requested information, a distribution utility may deny the ESCO or Direct Customer an opportunity to provide lower or no security.

## **SECTION 4: CUSTOMER INFORMATION**

### A. Applicability

This Section establishes practices for release of customer information by distribution utilities or MDSPs to ESCOs and Direct Customers and identifies the content of information sets. The distribution utility or MDSP and an ESCO shall use EDI standards, to the extent developed, for transmittal of customer information and may transmit data, in addition to the minimum information required, via EDI or by means of an alternative system.

### B. Customer Authorization Process

The distribution utility or MDSP shall provide information about a specific customer requested by an ESCO authorized by the customer to receive the information.

1. An ESCO shall obtain customer authorization to request information, in accordance with the procedures in UBP Section 5, Changes in Service Providers, Attachments 1, 2, and 3. An ESCO shall inform its customers of the types of information to be obtained, to whom it will be given, how it will be used, and how long the authorizations will be valid. The authorization is valid for no longer than six months unless the sales agreement provides for a longer time.
2. A distribution utility and a MDSP shall assume that an ESCO obtained proper customer authorization if the ESCO is eligible to provide service and submits a valid information request.
3. An ESCO shall retain, for a minimum of two years or for the length of the sales agreement whichever is longer, verifiable proof of authorization for each customer. Verification records shall be provided by an ESCO, upon request of the Department, within five calendar days after a request is made. Locations for storage of the records shall be at the discretion of the ESCOs.
4. Upon request of a customer, a distribution utility and/or MDSP shall block access by ESCOs to information about the customer.
5. An ESCO and its agent shall comply with statutory and regulatory requirements pertaining to applicable state and federal do-not-call registries.

### C. Customer Information Provided to ESCOs<sup>1</sup>

1. Release of Information. A distribution utility and a MDSP shall use the following practices for transferring customer information to an ESCO:
  - a. A distribution utility shall provide the information in the Billing Determinant Information Set upon acceptance of an ESCO's enrollment request and the information in the Customer Contact Information Set and the Credit Information Set, upon ESCO request.

---

<sup>1</sup> Upon enrollment of a customer, an ESCO shall receive usage data and any subsequent changes, corrections and adjustments to previously supplied data or estimated consumption for a period, at the same time that the distribution utility validates them for use. An ESCO issuing consolidated bills is entitled to receive billing information, in accordance with UBP Section 9, Billing and Payment Processing.

- b. The distribution utility or MDSP shall respond within two business days to valid requests for information as established in EDI transaction standards and within five business days to requests for data and information for which an EDI transaction standard is not available. The distribution utility or MDSP shall provide the reason for rejection of any valid information request.
2. Customer Contact Information Set. The distribution utility or MDSP, to the extent it possesses the information, shall provide, upon an ESCO request, consumption history for an electric account and consumption history and/or<sup>1</sup> a gas profile for a gas account.
- a. Consumption history<sup>2</sup> for an electric or gas account shall include:
1. Customer's service address;
  2. Electric or gas account indicator;
  3. Sales tax district used by the distribution utility and whether the utility identifies the customer as tax exempt;
  4. Rate service class and subclass or rider by account and by meter, where applicable;
  5. Electric load profile reference category or code, if not based on service class, whether the customer's account is settled with the ISO utilizing an actual 'hourly' or a 'class shape' methodology, or Installed Capacity (ICAP) tag, which indicates the customer's peak electricity demand;
  6. Customer's number of meters and meter numbers;
  7. Whether the customer receives any special delivery or commodity "first through the meter" incentives, or incentives from the New York Power Authority;
  8. The customer's Standard Industrial Classification (SIC) code;
  9. Usage type (e.g., kWh or therm), reporting period, and type of consumption (actual, estimated, or billed);
  10. Whether the customer's commodity service is currently provided by the utility;
  - ~~11. Whether the customer receives Home Energy Assistance Program benefits or is enrolled in the low income assistance program administered by the utility;~~
  - ~~12.~~11.      12 months, or the life of the account, whichever is less, of customer data via EDI and, upon separate request, an additional 12 months, or the life of the account, whichever is less, of customer data via EDI or an alternative system at the discretion of the distribution utility or

<sup>1</sup> If a distribution utility or MDSP offer a gas profile and consumption history, an ESCO may choose either option. A distribution utility or MDSP shall make available, upon request, class average load profiles for electric customers.

<sup>2</sup> A distribution utility or MDSP, in addition to EDI transmittal, may provide Web based access to customer history information.

MDSP, and, where applicable, demand information;<sup>1</sup> if the customer has more than one meter associated with an account, the distribution utility or MDSP shall provide the applicable information, if available, for each meter; and

~~13.12.~~ Electronic interval data in summary form (billing determinants aggregated in the rating periods under a distribution utility's tariffs) via EDI, and if requested in detail, via an acceptable alternative electronic format.

- b. A gas profile for a gas account shall include:
1. Customer's service address;
  2. Gas account indicator;
  3. Customer's number of meters and meter numbers;
  4. Sales tax district used by the distribution utility for billing and whether the utility indentifies the customer as tax exempt;;
  5. The customer's Standard Industrial Classification (SIC) code;
  6. Whether the customer's commodity service is currently provided by the utility;

~~7. Whether the customer receives Home Energy Assistance Program benefits or is enrolled in the low income assistance program administered by the utility;~~

~~8.7.~~ Rate service class and subclass or rider, by account and by meter, where applicable;

~~9.8.~~ Date of gas profile; and,

~~10.9.~~ Weather normalization forecast of the customer's gas consumption for the most recent 12 months or life of the account, whichever is less, and the factors used to develop the forecast.

3. Billing Determinant Information Set. Upon acceptance of an ESCO enrollment request, a distribution utility shall provide the following billing information for an electric or gas account, as applicable<sup>2</sup>:
  - a. Customer's service address, and billing address, if different;
  - b. Electric and/or gas account indicator;
  - c. Meter reading date or cycle and reporting period;
  - d. Billing date or cycle and billing period;
  - e. Meter number, if available;
  - f. Distribution utility rate class and subclass, by meter;
  - g. Description of usage measurement type and reporting period;

<sup>1</sup> A distribution utility may provide data for a standard 24 months or life of the account, whichever is less, as part of its Customer Contract Information Set.

<sup>2</sup> As specified in the EDI standard for an enrollment request and response, the distribution utility may transmit additional data elements, based upon the request, the responding distribution utility, and the commodity type.

- h. Customer's load profile group, for electric accounts only;
  - i. Life support equipment indicator;
  - j. Gas pool indicator, for gas accounts only;
  - k. Gas capacity/assignment obligation code;
  - l. Customer's location based marginal pricing zone, for electric accounts only; and,
  - m. Budget billing indicator.<sup>1</sup>
4. Credit Information Set. The distribution utility or MDSP shall provide credit information for the most recent 24 months or life of the account, whichever is less, upon receipt of an ESCO's electronic or written affirmation that the customer provided authorization for release of the information to the ESCO. Credit information shall include number of times a late payment charge was assessed and incidents of service disconnection.

D. Direct Customer Information

A Direct Customer shall receive usage data and any subsequent changes, corrections and adjustments to previously supplied data, and estimated consumption for a period, at the same time that the distribution utility validates them for use. The distribution utility or MDSP shall make available, upon request, to an electric Direct Customer, a class load profile for its service class.

E. Charges for Customer Information

No distribution utility or MDSP shall impose charges upon ESCOs or Direct Customers for provision of the information described in this Section. The distribution utility may impose an incremental cost based fee, authorized in tariffs for an ESCO's request for customer data for a period in excess of 24 months or for detailed interval data per account for any length of time.

F. Unauthorized Information Release

An ESCO, its employees, agents, and designees, are prohibited from selling, disclosing or providing any customer information obtained from a distribution utility or MDSP, in accordance with this Section, to others, including their affiliates, unless such sale, disclosure or provision is required to facilitate or maintain service to the customer or is specifically authorized by the customer or required by legal authority. If such authorization is requested from the customer, the ESCO shall, prior to authorization, describe to the customer the information it intends to release and the recipient of the information.

---

<sup>1</sup> This indicator is limited to 12 month levelized payment plans and does not include other payment plans.

## **SECTION 5: CHANGES IN SERVICE PROVIDERS**

### A. Applicability

This Section establishes practices for receiving, processing, and fulfilling requests for changing a customer's electricity or natural gas provider and for obtaining a customer's authorization for the change. A change in a provider includes transfer from: (1) one ESCO to another; (2) an ESCO to a distribution utility; and (3) a distribution utility to an ESCO. This Section also establishes practices for: an ESCO's drop of a customer or a customer's drop of an ESCO, retention of an ESCO after a customer's relocation within a distribution utility's service area, assignment of a customer, and initiation or discontinuance of procurement of electricity or natural gas supplies by a Direct Customer. This Section does not establish practices for obtaining other energy-related services or changing billing options.

The process of changing a service provider is comprised of two steps. For enrollment with an ESCO, the first step is obtaining customer agreement, and any required third party verification, to accept electric and/or natural gas service according to the terms and conditions of an offer. A sales agreement establishes the terms and conditions of the customer's business arrangement with the ESCO. The second step is enrollment and the distribution utility's modification of its records to list the customer's transfer to a provider on a specific date. The second step is primarily between the ESCO and the distribution utility.

### B. Customer Agreement

An ESCO, or its agent, may solicit and enter into a sales agreement with a customer subject to the following requirements.

1. The ESCO shall obtain a customer agreement to initiate service and enroll a customer and customer authorization to release information to the ESCO by means of one of the following methods.
  - a. Telephone agreement and authorization, preceded, or followed within three business days, by provision of a sales agreement, in accordance with requirements in Attachment 1 – Telephonic Agreement and Authorization/Third Party Verification Requirements;
  - b. Electronic agreement and authorization, attached to an electronic version of the sales agreement, in accordance with requirements in Attachment 2 – Electronic Agreement and Authorization Requirements; or
  - c. Written agreement bearing a customer's signature on a sales agreement (original or fax copy of a signed document), in accordance with requirements in Attachment 3 – Written Agreement and Authorization Requirements.
2. For any sale ~~that originated through or included resulting from~~ either a door-to-door or telephonic marketing ~~component~~, each enrollment is only valid with an independent third party verification.
3. The ESCO shall provide residential customers the right to cancel a sales agreement within three business days after its receipt (cancellation period).

4. The standard Sales Agreements for each customer class shall include the following information written in plain language:
  - a. Terms and conditions applicable to the business relationship between the ESCO and the customer which includes:
    1. provisions governing the process for rescinding or terminating an agreement by the ESCO or the customer including provisions stating that a residential customer may rescind the agreement within three business days after its receipt;
    2. the placeholder for the price or how the price is determined, the terms and conditions of the agreement, including the term and end date, if any, of the agreement, the amount of the termination fee and the method of calculating the termination fee, if any, the amount of late payment fees, if applicable, and the provisions, if any, for the renewal of the agreement; and,
    3. a clear description of the conditions, if any, that must be present in order for savings to be provided to the customer, if savings are guaranteed.
  - b. Such contract shall also include on the first page thereof a Customer Disclosure Statement (the Statement). The text within this Statement shall state in plain language the terms and conditions described above and set forth in Attachment 4 – Sample Customer Disclosure Statement. When the form contract is used by the ESCO as its agreement with the customer, the Customer Disclosure Statement shall also contain the price term of the agreement. In the event that the text in the Statement differs from or is in conflict with a term stated elsewhere in the agreement, the term described by the text in the Statement shall constitute the agreement with the customer notwithstanding a conflicting term expressed elsewhere in the agreement.
  - c. Procedures for resolving disputes between the ESCO and a customer;
  - d. Consumer protections provided by the ESCO to the customer;
  - e. Method for applying payments and consequences of non-payment;
  - f. Any charges and fees, services, options or products offered by the ESCO;
  - g. Department contact information, including the Department ESCO hotline at 1-888-697-7728;
  - h. ESCO contact information, including a local or toll-free number from the customer's service location, and procedures used for after-hours contacts and emergency contacts, including transfer of emergency calls directly to a distribution utility and/or an answering machine message that includes an emergency number for direct contact with the distribution utility.
  - i. A statement that the ESCO shall provide at least 15 calendar days notice prior to any cancellation of service to a customer; and
  - j. If a condition of service, a statement that the ESCO reserves the right to assign the contract to another ESCO.
  - ~~k. A statement explaining that, for Low Income Assistance Program enrollees and/or HEAP recipients, there is a guarantee of savings compared to what the~~

~~customer would have been charged by the utility, or that the ESCO is providing energy-related services designed to reduce the customer's overall energy bill.~~

5. Additional terms and conditions applicable to residential customers and customers solicited via door-to-door sales include:
  - a. Prepayments – no agreement for the provision of energy by an ESCO shall require a prepayment. Where an ESCO is the billing party, it may offer a customer an option of prepayment. Any agreement providing for prepayment may be cancelled by the customer, without penalty within 90 calendar days from the date of such agreement. Any unused portion of the prepayment shall be returned to the customer within 30 business days following cancellation of the agreement.
  - b. Termination fees – no agreement for the provision of energy by an ESCO shall require a termination or early cancellation fee in excess of either a) \$100 for any contract with a remaining term of less than 12 months; or b) \$200 for any contract with a remaining term of more than 12 months or; c) twice the estimated bill for energy services for an average month, provided that an estimate of an average monthly bill was provided to the customer when the offer was made by the ESCO along with the amount of any early termination fee. To calculate such average monthly bill, the ESCO may use an average of the customer's actual usage for the previous twelve months or if such data is unavailable at the time the offer is made apply the usage for a typical customer in that service classification as reported by the distribution utility or the Commission, and multiply it by the ESCO's estimate of the average annual rate that will be charged under the agreement.
  - c. Variable charges – all variable charges must be clearly and conspicuously identified in all contracts, sales agreements and marketing materials.
  - d. Material changes and renewals– no material changes shall be made in the terms or duration of any contract for the provision of energy by an ESCO without the express consent of the customer obtained under the methods authorized in the UBP. This shall not restrict an ESCO from renewing a contract by clearly informing the customer in writing, not less than thirty days nor more than sixty days prior to the renewal date, of the renewal terms and the customer's option to reject the renewal terms. A customer shall not be charged a termination fee as set forth in Section 5.B.3.1.a herein, if the customer objects to such renewal within three business days of receipt of the first billing statement under the agreement as renewed. Regarding contract renewals, with the exception of a rate change, or an initial sales agreement that specifies that the agreement renews on a monthly basis with a variable rate methodology which was specified in the initial sales agreement, all changes will be considered material and will require that the ESCO obtain the customer's express consent for renewal.
  - e. A renewal notice in the standardized format provided by the Department, must be used.

- f. The renewal notice must be enclosed in an envelope which states in bold lettering: "IMPORTANT: YOUR [ESCO NAME] CONTRACT RENEWAL OFFER IS ENCLOSED. THIS MAY AFFECT THE PRICE YOU PAY FOR ENERGY SUPPLY."
  - g. When a fixed-price agreement is renewed as a fixed-price agreement, the ESCO shall provide the customer with an additional notice before the issuance of the first billing statement under the terms of the contract as renewed, but not more than 10 days prior to the date of the issuance of that bill. This notice shall inform the customer of the new rate and of his or her opportunity to object to the renewal, without the imposition of any early termination fees, within three days of receiving the first billing statement under the terms of the contract as renewed.
- C. Provision of List of ESCOs to Customers
- Distribution utilities shall offer to provide a customer who requests initiation of delivery service with an up-to-date list of ESCOs and provide the list at any time, upon request of any customer.
- D. Customer Enrollment Procedures
1. An ESCO shall transmit:
    - a. An electric enrollment request to a distribution utility no later than 5 business days prior to the effective date of the enrollment.
    - b. A gas enrollment request to a distribution utility no later than 15 calendar days prior to the effective date of the enrollment.
    - c. The enrollment request shall contain at a minimum, the information required for processing set forth in Attachment 5, Enrollment Request.
  2. The distribution utility shall process enrollment requests in the order received.
  3. The distribution utility shall accept only one valid enrollment request<sup>1</sup> for each commodity per customer during a switching cycle. If the distribution utility receives multiple enrollment requests for the same customer during a switching cycle, it shall accept the first valid enrollment request and reject subsequent requests.
  4. An ESCO shall submit an enrollment request after it obtains customer authorization, and third party verification where required, and it has provided the sales agreement to the customer. For telephonic enrollments, in which the ESCO sends the customer the sales agreement via US Mail, the ESCO shall provide for two business days for the customer to receive the sales agreement.
  5. After receipt of an enrollment request, the distribution utility shall, within one business day, acknowledge its receipt, and provide a response indicating rejection and the reason, or acceptance and the effective date for the change of provider.
  6. Upon acceptance of an enrollment request, the distribution utility shall contemporaneously send a notice to the incumbent ESCO that the customer's service with that ESCO will be terminated on the effective date of the new

---

<sup>1</sup> Criteria for determining the validity of an EDI transaction are described in the EDI processing protocols adopted in Case 98-M-0667, Electronic Data Interchange.

enrollment. In the event that the distribution utility receives notice from the pending ESCO, the incumbent ESCO (with specific customer authorization for each cancellation), or the customer, prior to the effective date that a pending enrollment is cancelled, the distribution utility shall transmit a request to reinstate service to the incumbent ESCO, unless the incumbent ESCO previously terminated service to the customer or the customer requests a return to full utility service.

7. With the exception of a new installation use of an interim estimate of consumption or a special meter reading,<sup>1</sup> a change of providers is effective: for an electric customer, on the next regularly scheduled meter reading date; and, for a gas customer, on the next regularly scheduled meter reading date or the first day of the month, in accordance with provisions set forth in the distribution utility's tariff.<sup>2</sup> The distribution utility shall set the effective date, which shall be no sooner than 5 business days after receipt of an enrollment request. Service to new delivery customers is effective after the installation is complete and, if necessary, inspected.
8. An off-cycle change of an electric service provider is allowed no later than 15 calendar days before the date requested for the change if a new ESCO or a customer arranges for a special meter reading or agrees to accept an interim date for estimating consumption. The ESCO or customer is required to pay the cost for any special meter reading, in accordance with provisions set forth in the distribution utility's tariff. A change based upon an interim estimate of consumption or a special meter reading is effective on the date of the interim estimate or special meter reading. Off-cycle changes of gas service providers are allowed if the incumbent and new ESCO agree on an effective date no later than 15 calendar days following the request.

#### E. Customer Notification

1. The distribution utility shall send no later than one calendar day after acceptance of an enrollment request a verification letter to the customer notifying the customer of the acceptance. The notice shall inform the customer that if the enrollment is unauthorized or the customer decides to cancel it, the customer is required immediately to so notify the distribution utility and the pending ESCO.
2. Upon receipt of such cancellation, the distribution utility shall cancel the pending enrollment and reinstate the customer with the incumbent ESCO, if any, or the distribution utility, provided that the distribution utility is notified prior to the planned effective date. If the distribution utility is notified on or after the planned effective date, the change to the new provider shall occur and remain effective for one billing cycle. The customer shall return to full utility service at the end of the

---

<sup>1</sup> If meters are read bimonthly and bills are issued monthly using estimated usage, the effective date for the interim months is the date usage is estimated for billing purposes.

<sup>2</sup> If meters are not read within two business days of the scheduled meter reading day, the distribution utility or MDSP shall estimate usage as of the scheduled meter reading day. The effective date for a change of provider is that date, except where changes of natural gas suppliers are scheduled for the first of the month.

next switching cycle, unless the customer is enrolled by another ESCO in accordance with this section prior to the next switching cycle.

3. If a customer notifies the pending ESCO of such cancellation, the pending ESCO shall send a customer's drop request to the distribution utility within one business day.

#### F. Rejection of Enrollment Requests

The distribution utility may reject an enrollment request for any of the following reasons:

1. Inability to validate the transaction;
2. Missing or inaccurate data in the enrollment request;
3. ESCO's ineligibility to provide service in the specified territory;
4. No active or pending delivery service;
5. A pending valid prior enrollment request; or
6. The account is coded as ineligible for switching.

#### G. Customer Relocations Within a Service Territory

1. A customer requesting relocation of service within a distribution utility's service territory and continuation of its ESCO service, arranges for continuation at the new location of delivery service by contacting the distribution utility and of commodity service by contacting the ESCO.<sup>1</sup> Each provider contacted by the customer shall remind the customer of the need to contact the other provider to initiate the change in service or arrange for a conference call with the other provider and customer, and within two days, notify the other provider that a customer requested relocation of service.
2. The distribution utility's representative shall inform the customer, or the customer's agent, and the ESCO of the effective dates, contingent upon the customer's approval, for discontinuance of service at one location and commencement of service at the new location. The ESCO shall confirm to the distribution utility that it shall continue service to the customer at the new location.
3. In the event that the ESCO is unable, or does not wish to continue service to the customer at the new location, the distribution utility shall provide full utility service to the customer.

#### H. Customers Returning to Full Utility Service

1. A customer arranges for a return to full utility service by contacting either the ESCO or the distribution utility in accordance with this paragraph. An ESCO contacted by the customer shall, within one business day, process the customer's request to return to full utility service. A utility contacted by a customer shall remind the customer to contact the ESCO about the customer's returning to full utility service provided, however, that if the customer has already contacted the

---

<sup>1</sup> In the Single Retailer Model, the customer contacts only its ESCO. The ESCO notifies the distribution utility of the customer's new service location and mailing address, if applicable. Direct customers contact only the distribution utility.

- ESCO or wants to proceed without contacting the ESCO, the utility shall, within one business day, process the customer's request to return to full utility service. If a change to full utility service results in restrictions on the customer's right to choose another supplier or application of a rate that is different than the one applicable to other full service customers, the distribution utility shall provide advance notice to the customer.
2. A Direct Customer that intends to change from procuring its own supplies to full utility service shall notify the distribution utility.
  3. No ESCO shall transfer 5,000 or more customers during a billing cycle to full utility service, unless it provides no less than 60 calendar days notice to the distribution utility and Department. The transfers shall occur on the customers' regularly scheduled meter reading dates, unless the distribution utility and ESCO agree to a different schedule.
  4. The following process sets forth the steps for an ESCO's return of a customer to full utility service.
    - a. An ESCO may discontinue service to a customer and return the customer to full utility service provided that the ESCO notifies the customer and the distribution utility no later than 15 calendar days before the effective date of the drop. The ESCO's right to discontinue service to any customer is subject to any limitations contained in its sales agreement.
    - b. An ESCO's notice to retail customers shall provide the following information:
      1. Effective date of the discontinuance, established by the distribution utility, unless the ESCO arranged for an off-cycle date;
      2. Statement that the customer has the option to select another ESCO, receive full utility service from the distribution utility, or, if available in the distribution utility's service area and the customer is eligible, accept random assignment by the distribution utility to an ESCO; and,
      3. Statement that customer shall receive full utility service until the customer selects a new ESCO and the change in providers is effective, unless the distribution utility notified the customer that it will terminate its delivery service on or before the discontinuance date.
    - c. The ESCO shall provide a sample form of the notice it plans to send to its customers when it transfers 5,000 or more customers to the Department for review no later than five calendar days before mailing the notice to customers.
- I. New Delivery Customers
1. A customer may initiate distribution utility delivery service and subsequently enter into a customer agreement with an ESCO for commodity supply, or arrange for both services at the same time.
  2. A customer may authorize an ESCO to act as the customer's agent (ESCO agent) in establishing distribution utility service. The ESCO agent shall retain, and produce upon request, documentation that the customer authorized the ESCO to act as the customer's agent.

3. An ESCO acting as a customer's agent shall establish a new delivery account on behalf of the customer and enroll the customer with the distribution utility so that ESCO commodity service commences when distribution utility delivery service begins. The ESCO shall retain, and produce upon request, documentation that the customer authorized the ESCO to act as the customer's agent. An ESCO that is a customer's agent is authorized to submit the customer's application for new delivery service, in compliance with requirements for such applications stated in the law, rules and distribution utility tariffs. An ESCO shall provide the customer's name, service address and, if different, mailing address, telephone number, customer's requested service date for initiation of delivery service, and information about any special need customers, including any need for life support equipment. An ESCO shall refer a customer directly to a distribution utility for arrangement of distribution related matters, such as contribution-in-aid of construction and construction of facilities necessary to provide delivery service and settling of arrears and posting security.
4. Upon a customer's application for service, the distribution utility shall provide an ESCO with the effective date for initiation of delivery service and any other customer information provided to an ESCO in an acceptance of an enrollment request. The distribution utility may notify the customer of the acceptance.

J. Multiple Assignments of Sales Agreements

1. An ESCO may assign all or a portion of its sales agreements to other ESCOs provided that the assigned sales agreements clearly authorize such assignments or the ESCO provides notice to its customers prior to the assignments and an opportunity for each customer to choose another ESCO or return to full utility service. An ESCO shall provide a written notice no later than 30 calendar days prior to the assignment or transfer date to each customer and distribution utility. The notice to the distribution utility shall include a copy of the assignment document, with financial information redacted, executed by the officers of the involved ESCOs, and a copy of the notice sent to the customer, or, if a form notice, a copy of the form and a list of recipients.
2. The assignment documents shall specify the party responsible for payment or reimbursement of any and all sums owed under any distribution utility tariff or Federal Energy Regulatory Commission tariff and any service agreements relating thereto, and under any agreements between ESCOs and distribution utilities and between ESCOs and their customers.
3. An ESCO's notices to customers shall provide the following information:
  - a. Effective date of the assignment;
  - b. The name, mailing and e-mail addresses, and telephone number of the assigned ESCO; and,
  - c. Any changes in the prices, terms and conditions of service, to the extent permitted by the sales agreement.
4. The ESCO shall provide sample forms and any major modifications of such notices to the Department for review no later than five calendar days before mailing them to customers.

5. The distribution utility shall, within two business days after receipt of an assignment request, acknowledge and initiate processing of the request and send written notice of the request to the ESCO's assigned customer.

K. Unauthorized Customer Transfers

1. A change of a customer to another energy provider without the customer's authorization, commonly known as slamming, is not permitted. The distribution utility shall report slamming allegations to the Department on at least a monthly basis.
2. An ESCO that engages in slamming shall refund to a customer the difference between charges imposed by the slamming ESCO that exceed the amount the customer would have paid its incumbent provider and pay any reasonable costs incurred by the distribution utility to change the customer's provider from the ESCO that engaged in slamming to another provider.
3. ESCOs shall retain for two years or for the length of the sales agreement whichever is longer, documentation of a customer's authorization to change providers. Such documentation shall comply with the requirements described in Attachments 1, 2 or 3.

L. Lists of ESCO Customers, Budget Billing, Charges and Fees

1. A distribution utility, upon an ESCO's request, shall provide at no charge, once each calendar quarter, a list of the ESCO's customers at the time of the request and, monthly, the number of accounts enrolled with an ESCO and the ESCO's sales (kWh and/or dekatherms). ESCOs may obtain such customer lists at other times for cost-based fees set forth in distribution utility tariffs.
2. A distribution utility shall adjust its bills rendered under a budget billing plan on the effective date for changing a provider and include the adjustments in the customer's next bill.
3. Upon enrollment of a distribution utility customer with an ESCO or return of an ESCO customer to full utility service, a distribution utility shall impose no restrictions on the number or frequency of changes of gas or electricity providers, except as provided in this paragraph. The distribution utility shall accept only one valid enrollment request for each commodity per customer during a switching cycle. If multiple requests are received for the same customer during a switching cycle, the distribution utility shall accept the first valid enrollment request and reject subsequent enrollment requests.
4. A distribution utility shall impose no charge for changing a customer's gas or electricity provider.
5. A distribution utility may establish a fee in its tariffs for a special meter reading.

## Attachment 1

**Telephonic Agreement and Authorization/Third Party Verification Requirements**

- A. A voice-recorded verification is required to enter into a telephonic agreement or a door to door agreement with a customer to initiate service and begin enrollment. Use of either an Independent Third Party or an Integrated Voice Response system to obtain customer authorization is required for any telephone solicitation or sales resulting from door-to-door marketing. Verification by an Independent Third Party or an Integrated Voice Response system shall be recorded and conducted without the ESCO marketing representative's presence, either on the telephone or in person. A voice-recorded verification shall verify the following information to substantiate the customer's agreement or authorization:~~To enter into a telephonic agreement with a customer to initiate service and begin enrollment or to obtain customer authorization for release of information, after the marketing call has ended, the transaction shall include an independent third party verification, in which an independent entity calls the potential customer and audio records the telephone conversation with the potential customer. The independent third party verification shall be conducted without the ESCO marketing representative's presence, either on the telephone or in person. The conversation shall contain the following information, as applicable, to substantiate the customer's agreement or authorization in the order described below. The following information shall be used in satisfying the independent third party verification requirement for sales which originated or included a door to door marketing component as well.~~
1. Do you understand that this conversation is recorded and that oral acceptance of the [ESCO name]'s offer is an agreement to initiate service and begin enrollment?
  2. Is it [specific date] at [specific time]?
  3. Do you understand that the marketing representative represents [specific ESCO] and that [specific ESCO] is not the distribution utility?
  4. If the sale was conducted through door-to-door marketing, has the marketer left the premises?
  5. Are you [specify customer's name]/Please state your name (or is your company name [specify company name]/Please state your company's name)?
  6. Do you live at [specific address]/Please state your address (or is your company located at [specify company address]/Please state your company's address)?
  7. Is your email address [specific e-mail address] /Please provide your email address (if the customer chose to provide it)?
  8. Is your distribution utility account number [specify account number]/ Please state your distribution utility account number?
  9. Are you the primary account holder or do you have authority to make changes to this account?

10. Are you a recipient of a Home Energy Assistance Program (HEAP) benefit or an income-based discount on your utility bill?
11. If the sale was conducted through door-to-door marketing: did the ESCO marketing representative provide you with the sales agreement, his/her business card or contact information and leave a copy of the ESCO Consumer Bill of Rights?
12. If the sale was conducted through telemarketing: did the ESCO marketing representative offer to mail you a copy of the ESCO Consumer Bill of Rights or did the ESCO marketing representative tell you how to find the ESCO Consumer Bill of Rights online?
13. Did you agree to the terms of service as reviewed with you by the [ESCO name] representative on [INSERT ENROLLMENT DATE]?
- a. The price of \_\_\_ (electricity and/or natural gas) under the contract is for \_\_\_ months (years).
  - b. Or the price of \_\_\_ (electricity and/or natural gas) under the contract is a variable rate and will vary month-to-month.
  - c. The early termination fee (if any) is \_\_\_ (this may be a methodology instead of a dollar amount).
14. If savings is guaranteed (compared to the utility rate), a plain description of the type of savings and the conditions that must be present in order for the customer to be eligible for savings. If savings is not guaranteed (as compared to the utility supply service) a statement indicating such:
15. Please be advised that energy supply will be provided by the ESCO, and that energy delivery shall continue to be provided by your utility and the utility will also be available to respond to leaks or other emergencies should they occur;
16. Do you authorize the release of the following information from your distribution utility: [specify information] and do you understand that you may rescind this authorization at any time by calling [specify toll free number] or e-mailing [specify e-mail address]?
17. For residential enrollments only: Do you understand that you may rescind the agreement within three business days after its receipt by [describe how such rescission can be accomplished] and if you do not rescind the agreement, an enforceable agreement will be created?
- ~~1. — A statement that the conversation is recorded and that oral acceptance of the ESCO's offer is an agreement to initiate service and begin enrollment;~~
  - ~~2. — A question to the customer asking if he or she understands that the specific ESCO is not the distribution utility.~~
  - ~~3. — A statement from the customer verifying the customer's name, postal and any e-mail address (if the customer chooses to provide it), distribution utility customer account number, and any additional information needed to verify the customer's identity.~~

4. — A statement from the customer that he or she has authority to make changes to this account.
5. — A question to the customer inquiring if the ESCO marketing representative began his or her interaction by stating his or her name and that he or she represents the ESCO, not the customer's utility, and an affirmative response from the customer.
6. — A question to the customer inquiring if the ESCO marketing representative provided the customer with the ESCO's contact information in written form, and an affirmative response from the customer.
7. — A question to the customer inquiring if the ESCO marketing representative provided copies of, or access to, the ESCO Consumer Bill or Rights, and an affirmative response from the customer.
8. — A question to the customer asking if the ESCO marketing representative explained that the price of \_\_\_ (electricity and/or natural gas) is \_\_\_ under the contract, and an affirmative response from the customer.
9. — A question to the customer asking if the ESCO marketing representative explained that the contract term is for \_\_\_ months and that the early termination fee (if any) is \_\_\_, and an affirmative response from the customer.
10. — A question to the customer asking if the ESCO marketing representative stated whether savings were guaranteed, and a response from the customer. If the customer states that the ESCO marketing representative guaranteed savings, a question to the customer of what savings were guaranteed, and a response from the customer.
11. — A description in plain language of the prices, terms and conditions of the ESCO's offer, including a statement of the circumstances, if any, under which the ESCO may assess an early termination fee and the amount of any such assessment or how the assessment is calculated;
12. — If savings are guaranteed, or guaranteed under only certain circumstances, the ESCO must provide a plain language description of the conditions that must be present in order for the savings to occur;
13. — A statement from the ESCO that energy supply will be provided by the ESCO, and that energy delivery shall continue to be provided by the customer's utility; and that said utility will also be available to respond to leaks or other emergencies should they occur;
14. — A statement from the customer, in response to a question from the verification agent, accepting such terms and conditions;
15. — A description of the types of information that the ESCO needs to obtain from a distribution utility or MDSP and the purposes of its use, a request that the customer provide authorization for release of this information, and the effective duration of the authorization;
16. — A statement from the customer providing such authorization;

~~17.—A statement from the customer, in response to a question from the verification agent, that the customer has or has not already received a written copy of the sales agreement.~~

~~18.—If the customer affirms that he or she has already received a written copy of the sales agreement, a statement that a residential customer may rescind the agreement within three business days after the date of the verification call.~~

~~19.—If the third party verification is one required for a written or electronic agreement, a statement of the customer, in response to a question from the verification agent, that the customer has signed and/or submitted the sales agreement.~~

~~20.—If the customer does not affirm that he or she has already received a written copy of the sales agreement, then, a statement in plain language that a customer will receive a written copy of the sales agreement by mail, e-mail or fax; that a residential customer may rescind the agreement within three business days after the latter of the date of its receipt, or the date of the verification call; how such rescission can be accomplished, and that in the absence of such rescission, an enforceable agreement will be created; a statement that a customer may rescind the authorization for release of information at any time; provision of a local or toll free telephone number or e-mail address to the customer for these purposes; upon cancellation of the agreement, the ESCO shall provide a cancellation number to the customer during the telephone call or in response to an e-mail message; and~~

~~21.—A statement from the customer verifying the date and time of the verification telephone call.~~

- B. The ESCO, or its agent, shall provide a copy of any Customer Disclosure Statement and sales agreement to the customer by mail, e-mail or fax within three business days after the telephone agreement and independent third party verification occurs. The sales agreement shall set forth the customer's rights and responsibilities and describe the offer in detail, including the specific prices, terms, and conditions of ESCO service. Such agreement shall be substantially the same, in form and content, as the sample contract submitted to the Department pursuant to Section 2.B.1.b.
- C. The independent third party verification shall be conducted in the same language used in marketing or sales materials presented to the customer, and communicated clearly and in plain language.
- D. An ESCO shall retain independent third party verification records for two years from the effective date of the agreement and/or authorization or for the length of the sales agreement whichever is longer. In the event of any dispute involving agreement, authorization and/or the independent third party verification, the ESCO shall make available the audio recording of the customer's agreement and/or authorization, including the independent third party verification within five business days after a request from the Department.

**Attachment 2****Electronic Agreement and Authorization Requirements**

- A. To enter into an electronic agreement with a customer to initiate service and begin enrollment or to obtain customer authorization for release of information, an ESCO, or its agent, shall electronically record communications with the potential customer. As required in Section 5, the Electronic Agreement and authorization may also require an independent third party verification call, which must include the information in Attachment 1. An ESCO shall provide the following electronic information, as applicable, to substantiate the customer's agreement and/or authorization:
1. A statement that electronic acceptance of a sales agreement is an agreement to initiate service and begin enrollment;
  2. The Customer Disclosure Statement and the sales agreement containing the prices, terms and conditions applicable to the customer, which, if printed as a physical document, would be substantially the same, in form, and content, as the sample contract submitted to the Department pursuant to Section 2.B.1.b.
  3. If savings are guaranteed, or guaranteed under only certain circumstances, the ESCO must provide a written statement which includes a plain language description of the conditions that must be present in order for the savings to be provided;
  4. An identification number and date to allow the customer to verify the specific sales agreement to which the customer assents;
  5. A statement from the ESCO that energy supply will be provided by the ESCO, and that energy delivery shall continue to be provided by the customer's utility; and that said utility will also be available to respond to leaks or other emergencies should they occur;
  6. A requirement that the customer accept or not accept the sales agreement by clicking the appropriate box, displayed as part of the terms and conditions; after the customer clicks the appropriate box to accept the sales agreement, the system shall display a conspicuous notice that the ESCO accepts the customer;
  7. Use of an electronic process that prompts a customer to print or save the sales agreement and provides an option for the customer to request a hard copy of the sales agreement; an ESCO shall send the hard copy by mail within three business days after a customer's request;
  8. A description of the types of information that the ESCO needs to obtain from a distribution utility or MDSP and the purposes of its use, a request that the customer provide authorization for release of this information, and the effective duration of the authorization;
  9. A requirement that the customer agree or not agree to provide such authorization by clicking the appropriate box, displayed as part of the terms and conditions;
  10. A statement that a residential customer may rescind the agreement and authorization within three business days after electronic acceptance of the sales

- agreement; a statement that a customer may rescind the authorization for release of information at any time; provision of a local or toll-free telephone number, and/or an e-mail address for these purposes; upon cancellation of the agreement, the ESCO shall provide a cancellation number;
11. Verification of the date and time of the electronic agreement and authorization; and
  12. Provision by the customer of the customer's name, address, distribution utility customer account number, and any additional information to verify the customer's identify.
- B. The ESCO shall, within three business days of any final agreement to initiate service to a customer, send an electronic confirmation notice to the customer at the customer's e-mail address.
  - C. The ESCO shall use an encryption standard that ensures the privacy of electronically transferred customer information, including information relating to enrollment, renewal, re-negotiation, and cancellation.
  - D. Upon request of a customer, the ESCO shall make available additional copies of the sales agreement throughout its duration. An ESCO shall provide a toll-free telephone number and e-mail address for a customer to request a copy of the sales agreement.
  - E. An ESCO shall retain documentation of a customer's agreement in a retrievable format for two years from the effective date of the customer's acceptance and/or authorization or for the length of the sales agreement whichever is longer. In the event of any dispute involving an electronic agreement or authorization, the ESCO shall provide a copy of the customer's acceptance of the sales agreement and/or authorization for release of information or provide on-line access to the acceptance and/or authorization within five calendar days after a request from the Department.

**Attachment 3****Written Agreement and Authorization Requirements**

- A. An ESCO may enter into a written agreement (original or fax copy of a signed document) with a customer to initiate service and begin enrollment or to obtain customer authorization for release of information. As required in Section 5, the Electronic Agreement and authorization may also require an independent third party verification call, which must include the information in Attachment 1. A sales agreement shall contain, in addition to the Customer Disclosure Statement discussed in UBP Section 2.B.1.b.2, the following information, as applicable:
1. A statement that a signature on a sales agreement is an agreement to initiate service and begin enrollment;
  2. A description of the specific prices, terms, and conditions of ESCO service applicable to the customer, which is substantially the same, in form and content, as the sample contract submitted to the Department pursuant to Section 2.B.1.b and, if savings are guaranteed, or guaranteed under only certain circumstances, the ESCO must provide a plain language description of the conditions that must be present in order for the savings to be provided;
  3. A description of the types of information that the ESCO needs to obtain from a distribution utility or MDSP, the purposes of its use, and effective duration of the authorization;
  4. A statement that acceptance of the agreement is an authorization for release of such information;
  5. A customer signature and date; the sales agreement shall be physically separate from any check, prize or other document that confers any benefit on the customer as a result of the customer's selection of the ESCO;
  6. A statement that a residential customer may rescind the agreement within three business days after signing the sales agreement; a statement that a customer may rescind the authorization for release of information at any time; provision of a local, toll-free telephone number, and/or e-mail address for these purposes; the customer may fax a copy of a signed sales agreement to the ESCO; upon cancellation of the agreement, the ESCO shall provide a cancellation number; and
  7. The customer's name, mail and any e-mail address (if the customer chooses to provide it), distribution utility account number, and any additional information to verify the customer's identify.
  8. A statement from the ESCO that energy supply will be provided by the ESCO, and that energy delivery shall continue to be provided by the customer's utility; and that said utility will also be available to respond to leaks or other emergencies should they occur;
- B. ESCOs shall retain written agreements and/or authorizations for two years from the effective date of the agreement and/or authorization or for the length of the agreement whichever is longer. In the event of any dispute involving a sales agreement or

authorization, the ESCO shall provide a copy of the sales agreement and/or authorization within five business days after a request from the Department.

**Attachment 5****Enrollment and Drop Requests Information Requirements**

- A. An ESCO shall provide the following information for enrollment requests, and an ESCO or distribution utility shall provide the following information for drop requests:
1. Utility ID (DUNS# or tax ID);
  2. ESCO ID (DUNS# or tax ID);
  3. Commodity requested (electric or gas); and,
  4. Customer's utility account number (including check digit, if applicable).
- B. The following information is required for enrollment requests:
1. Customer's bill option;
  2. For distribution utility rate ready consolidated billing:
    - a. an ESCO's fixed charge, commodity price, sales and use tax rate or rate code;
    - b. ESCO customer account number;
    - c. budget billing status indicator; and,
    - d. tax exemption percent and portion taxed as residential.
  3. For Single Retailer Model: special needs indicator;
  4. For gas service: gas capacity assignment/obligation indicator, and, if applicable, gas pool ID, gas supply service options, and human needs indicator;
  5. For electric service: indicator for a partial requirements customer, if applicable.
- C. The following information is required for drop requests:
1. Reason for the drop;
  2. For distribution utility request, service end date;
  3. For ESCO initiated request, effective date of customer move, if applicable; and
  4. For ESCO initiated request in Single Retailer Model, customer's service and mailing address.

**SECTION 6: CUSTOMER INQUIRIES****A. Applicability**

This Section establishes requirements for responses by an ESCO or distribution utility to retail access customer inquiries. An ESCO or distribution utility shall respond to customer inquiries sent by means of electronic mail, telecommunication services, mail, or in meetings. The subjects raised in inquiries may result in the filing of complaints.

**B. General**

1. Distribution utilities and ESCOs shall provide consistent and fair treatment to customers.
2. Distribution utilities and ESCOs shall maintain processes and procedures to resolve customer inquiries without undue discrimination and in an efficient manner and provide an acknowledgement or response to a customer inquiry within 2 days and, if only an acknowledgement is provided, a response within 14 days.
3. Distribution utilities and ESCOs shall provide local or toll-free telephone access from the customer's service area to customer service representatives (CSRs) responsible for responding to customer inquiries and complaints.
4. CSRs shall obtain information from the customer to access and verify the account or premises information. Once verification is made, the CSR shall determine the nature of the inquiry, and, based on this determination, decide whether the distribution utility or the ESCO is responsible for assisting the customer.
5. The CSR shall follow normal procedures for responding to inquiries. If the inquiry is specific to another provider's service, the CSR shall take one of the following actions:
  - a. Forward/transfer the inquiry to the responsible party;
  - b. Direct the customer to contact the responsible party; or,
  - c. Contact the responsible party to resolve the matter and provide a response to the customer.
6. Each distribution utility and ESCO shall maintain a customer service group to coordinate and communicate information regarding customer inquiries and designate a representative to provide information relating to customer inquiries to the Department.
7. ESCOs may provide a teletypewriter (TTY) system or access to TTY number, consistent with distribution utility tariffs.

**C. Specific Requests for Information**

1. A distribution utility or ESCO shall respond directly to customer inquiries for any information that is related to commodity supply and/or delivery service, to the extent it has the necessary information to respond.
2. The entity responsible for the accuracy of meter readings shall respond to customer inquiries related to usage.

3. The distribution utility and ESCO shall respond to customer inquiries about billing and payment processing, in accordance with UBP Section 9, Billing and Payment Processing.

D. Emergency Contacts

1. An emergency call means any communication from a customer concerning an emergency situation relating to the distribution system, including, but not limited to, reports of gas odor, natural disaster, downed wires, electrical contact, or fire.
2. The ESCO CSR shall transfer emergency telephone calls directly to the distribution utility or provide the distribution utility's emergency number for direct contact to the distribution utility. If no ESCO CSR is available, the ESCO shall provide for after-hours emergency contacts, including transfer of emergency calls directly to a distribution utility or an answering machine message that includes an emergency number for direct contact to the distribution utility.
3. Each ESCO shall provide periodic notices or bill messages to its customers directing them to contact the distribution utility in emergency situations and providing the emergency number.

**SECTION 7: DISTRIBUTION UTILITY INVOICES****A. Applicability**

This Section establishes procedures for invoices of charges for services provided by the distribution utility directly to an ESCO or Direct Customer. A distribution utility and ESCO or Direct Customer may agree to establish other arrangements and procedures for presentation and collection of invoices for services rendered.

**B. Invoices**

1. An ESCO or Direct Customer shall pay the full amount due, without deduction, set-off or counterclaim, within 20 calendar days after the date of electronic transmittal or postmarked date (due date). Subsequent to the due date, charges are overdue and subject to late payment charges at the rate of 1.5% per month. The overdue charges include the amount overdue, any other arrears, and unpaid late payment charges. The distribution utility may provide, upon request, supporting or back-up data in electronic form, if available on its computer system.
2. A distribution utility shall provide interest at the rate of 1.5% on an overpayment caused by the distribution utility's erroneous billing, provided that it may, without applying interest, credit all or a portion of the overpayment to the next bill issued within 30 days and/or refund all or a portion of the overpayment, upon request, within 30 days after its receipt. The distribution utility shall refund any credit balances, upon request.
3. An ESCO or Direct Customer shall make payments by means of an electronic funds transfer. A distribution utility shall use any partial payments first to pay any arrears and second to pay current charges.

**C. Billing Inquiries and Disputes**

1. An ESCO or Direct Customer shall make any claims relating to inaccuracies of invoices in writing no later than 90 calendar days after the date of electronic transmittal or postmarked date. ESCOs and/or Direct Customers are responsible for payment of disputed charges during any pending dispute.
2. A distribution utility shall designate an employee and provide a telephone number and e-mail address for receipt of inquiries from an ESCO or Direct Customer relating to invoices. The employee shall direct an ESCO or Direct Customer that presents an inquiry or complaint to the responsible and knowledgeable person able to explain charges on an invoice.
3. A distribution utility shall acknowledge in writing receipt of an inquiry within five calendar days after its receipt. A distribution utility shall investigate and respond in writing to the inquiry within 20 calendar days after its receipt.
4. A distribution utility shall refund any overpayments, including interest, within five calendar days after it makes a determination that an ESCO or Direct Customer made an overpayment. It may provide the refund by applying a credit to any overdue amounts or making direct payment of any remainder. The distribution utility shall provide refunds by means of an electronic funds transfer.

Interest is calculated at the rate of 1.5 % per month from the date of the overpayment to the refund.

5. No interest is required on overpayments voluntarily made by an ESCO or Direct Customer to an account, unless an overpayment is applied to security.

**SECTION 8: DISPUTES INVOLVING DISTRIBUTION UTILITIES,  
ESCOs OR DIRECT CUSTOMERS**

A. Applicability

This Section describes the dispute resolution processes available at the Department to resolve disputes relating to competitive energy markets involving utilities, ESCOs and/or Direct Customers, including disputes alleging anti-competitive practices. The processes are not available to resolve disputes between retail customers and ESCOs or distribution utilities. They are also not applicable to matters that, in the opinion of the Department Staff, should be submitted by formal petition to the Public Service Commission for its determination or are pending before a court, state or federal agency. The availability of the processes does not limit the rights of a distribution utility, ESCO or Direct Customer to submit any dispute to another body for resolution.

B. Dispute Resolution Processes

The parties shall in good faith use reasonable efforts to resolve any dispute before invoking any of these processes. Distribution utility tariffs and operating and service agreements between the parties shall identify the processes used to resolve disputes, and shall refer to the dispute resolution processes described in this Section as acceptable processes to resolve disputes.

1. Standard Process

The parties shall use a method to send documents described in this paragraph that will verify the date of receipt.

Any distribution utility, ESCO or Direct Customer may initiate a formal dispute resolution process by providing written notice to the opposing party and Department Staff. Such notice shall include a statement that the UBP dispute resolution process is initiated, a description of the dispute, and a proposed resolution with supporting rationale. Department Staff may participate in the process at this or any later point to facilitate the parties' discussions and to assist the parties in reaching a mutually acceptable resolution.

- a. No later than ten calendar days following receipt of the dispute description, if no mutually acceptable resolution is reached, the opposing party shall provide a written response containing an alternative proposal for resolution with supporting rationale and send a copy to Department Staff.
- b. No later than ten days after receipt of the response, if no mutually acceptable resolution is reached, any party or Department Staff may request that the parties schedule a meeting for further discussions. The parties shall meet no later than 15 calendar days following such request, upon advance notice to Department Staff, unless the parties and Department Staff agree upon another date. The Department may assign one or more Staff members to assist the parties in resolving the dispute.
- c. If no mutually acceptable resolution is reached within 40 calendar days after receipt of the written description of the dispute, any party may request an

initial decision from the Department. A party to the dispute may appeal the initial decision to the Public Service Commission.

- d. If the parties reach a mutually acceptable resolution of the dispute, they shall provide to Department Staff a description of the general terms of the resolution.

## 2. Expedited Process

In the event that an emergency situation arises to justify immediate resolution of a dispute, any party may file a formal dispute resolution request with the Secretary to the Public Service Commission asking for expedited resolution. An emergency situation includes, but is not limited to, a threat to public safety or system reliability or a significant financial risk to the parties or the public. The filing party shall provide a copy of the request to other involved parties and the Department Staff designated to receive information related to dispute resolution under this Section. The request shall describe in detail the emergency situation requiring expedited resolution, state in detail the facts of the dispute, and, to the extent known, set forth the positions of the parties.

## **SECTION 9: BILLING AND PAYMENT PROCESSING**

### A. Applicability

This Section establishes requirements<sup>1</sup> for billing and payment processing options offered by a distribution utility and ESCO in a multi-retailer model. This Section does not establish requirements for billing and payment processing in the single retailer model. A distribution utility and ESCO shall comply with the requirements established in this Section, unless they agree upon modifications or other procedures for billing and payment processing in a Billing Services Agreement.

### B. Billing and Payment Processing Options: General Requirements

1. A distribution utility shall offer to ESCOs without undue discrimination the billing and payment processing options available in its service territory.
2. A customer participating in a retail access program shall select from the billing and payment processing options offered by ESCOs.
3. A distribution utility shall allow its customers to select, through their ESCOs, one of the billing and payment options available in the distribution utility's service territory. An ESCO may offer to its customers billing and payment processing options available in the customer's service territory and shall maintain or provide for the capability of issuing a separate bill for its services under the dual billing option. An ESCO customer may direct the billing party to send its consolidated bills or dual bills to a third party for processing and payment.
4. A distribution utility or ESCO may perform the responsibilities of a billing party for a customer and the other provider (non-billing party) based upon the billing and payment processing options available to the customer and the customer's choice.
5. A distribution utility or MDSP shall make validated usage information available to the billing and non-billing parties at the time that the distribution utility or MDSP determines that the information is acceptable.<sup>2</sup>
6. Information on customer usage, billing, and credit is confidential. A distribution utility or MDSP may release such information, upon a customer's authorization, in accordance with the UBP Section 5, Changes in Service Providers.
7. A distribution utility and ESCO shall demonstrate the technical capability to exchange information electronically for their billing and payment processing options.
8. An ESCO shall provide 60 calendar days notice by mail, e-mail or fax to a distribution utility of any plan to offer a billing option that is not currently offered to its customers. The distribution utility may agree to a shorter notice period preceding initiation of the option. The 60 calendar-day notice shall not impose any obligation on any party to proceed without a successful test of data exchange capability and the fulfillment of other obligations described in this Section. If an ESCO later changes its system, it shall provide adequate advance notice and conduct any additional testing required.

---

<sup>1</sup> The requirements are applicable when EDI is available upon issuance by the Commission of data standards applicable to a bill model and operational upon successful completion of the testing required for a bill model.

<sup>2</sup> A distribution utility or MDSP shall provide electronic interval data in summary form (billing determinants aggregated in the rating periods under a distribution utility's tariffs) via EDI and, if requested, in detail via an acceptable alternative electronic format if retrieved from meters.

9. A distribution utility and an ESCO are responsible for separately remitting their tax payments to the appropriate taxing authorities.
10. Where the ESCO is the billing party, it may offer a customer an option of prepayment. Where a distribution utility is the consolidated billing party, the distribution utility is not required to support processing of prepayments or application of customer prepayments to ESCO charges.

C. Consolidated Billing: General Requirements

1. A distribution utility and ESCO shall establish in a billing services agreement (BSA) detailed expectations for their responsibilities, including consequences for any failure to carry out such responsibilities.
2. A distribution utility may use the bill ready or rate ready method<sup>1</sup> for issuing consolidated bills. An ESCO that offers consolidated billing shall use a bill ready method.
3. A customer receiving delivery service from a distribution utility that is a combination natural gas and electric corporation (combination retail access customer) may receive a consolidated bill for both energy services if:
  - a. The distribution utility issues the consolidated bill;
  - b. One ESCO supplies the customer with both natural gas and electricity;
  - c. An ESCO supplying only one of the commodities agrees to bill for charges for the service provided by the other ESCO; or,
  - d. Separate distribution utility accounts are established for each service.
4. A combination retail access customer may receive separate consolidated bills for each commodity or a dual bill for one commodity and a consolidated bill for the other provided that the distribution utility's system is capable of providing separate accounts for each commodity. A distribution utility shall establish bill cycles and payment due dates. A distribution utility may charge a fee, as set forth in its tariff, to an ESCO to establish, upon the ESCO's request, a separate account for one of the commodities the distribution utility provides.

D. Consolidated Billing: Functions and Responsibilities

1. A billing party shall perform the following functions and responsibilities:
  - a. If the bill ready method is used, receive bill charges and other billing information from the non-billing party;
  - b. If the rate ready method is used, receive rates, rate codes and/or prices (fixed and/or variable) and other billing information from the non-billing party;
  - c. Receive bill messages and bill inserts from the non-billing party;
  - d. If the bill ready method is used, acknowledge receipt of the non-billing party's information and accept or reject it;
  - e. If the rate ready method is used,<sup>1</sup> calculate billed charges, including sales and use taxes; the non-billing party is required to provide the customer's sales and use tax rate to the billing party;

---

<sup>1</sup> A distribution utility electing the rate ready method for utility consolidated billing is not obligated to calculate or bill separately for other goods and services that an ESCO may provide.

- f. Print or make available electronically consolidated bills that state the non-billing party's charges, including taxes, arrearages, late fees, and bill messages;
  - g. Insert in bill envelopes consolidated bills and inserts required by statute, regulation or Public Service Commission order;
  - h. Stamp, sort and mail consolidated bills or, if authorized, transmit bills electronically;
  - i. Cancel and rebill charges;
  - j. Notify the non-billing party of amounts billed, by account, within two business days after rendering bills to customers;
  - k. Receive and record customer payments;
  - l. Allocate and transmit the non-billing party's share of receipts, by account, to the non-billing party;
  - m. Respond to general inquiries and complaints about the bill and its format; refer customers to the non-billing party for inquiries and complaints related to the non-billing party's rates, charges, services, or calculations; and,
  - n. Maintain records of billing information, including amounts collected, remaining and transferred, and dates.
2. If the bill ready method is used, each party shall calculate and separately state sales and use taxes applicable to its charges; if the rate ready method is used, the billing party shall calculate and separately state the state sales and use taxes applicable to its charges and the non-billing party's charges.
  3. A party that requires a customer's deposit shall administer it. If a non-billing party applies a customer deposit to an outstanding balance, it shall notify the billing party.
  4. Upon receipt of payments, a non-billing party shall notify the billing party.
  5. To initiate consolidated billing using the rate ready method, the non-billing party shall provide the billing party with the rates, rate codes, and/or prices (fixed and/or variable) and tax rates necessary to calculate the non-billing party's charges. The billing party shall specify in the BSA the number of prices for each service class per commodity accepted, deadline for transmission, effective date, and acceptable frequency of changes.<sup>2</sup>
  6. The billing party may process special handling requests from customers provided that it obtains agreement from the non-billing party for requests that affect it;
  7. The billing party is not required to calculate or provide separate statements to customers regarding gross receipts taxes applicable to a non-billing party's charges. The non-billing party may calculate and provide information on the gross receipts taxes applicable to its charges in a bill message or, if the bill ready method is used, as a line item on the bill.
  8. The non-billing party may offer special billing features, such as budget billing or average payment plans.

---

<sup>1</sup> A distribution utility is not required to calculate or bill for ESCO services that are not directly related to the commodity it delivers.

<sup>2</sup> If a billing party's billing system is capable of providing the service, a billing party shall, upon request, apply a different rate, rate code, and/or price and tax rate to usage during different portions of the billing cycle to service provided after the effective date of the change. The non-billing party shall request a change in the rate, rate code, and/or price no later than four business days prior to the effective date requested.

**E. Consolidated Billing: Initiation, Changes or Discontinuance****1. Initiation**

- a. An ESCO that proposes to issue consolidated bills shall establish and provide to a distribution utility written procedures for billing and payment processing that ensure billing accuracy and timeliness, proper distribution of a distribution utility's bill messages and inserts, and proper allocation and transfer of distribution utility funds.
- b. No distribution utility may impose a fee on an ESCO to process its application to offer consolidated billing.

**2. Changes**

A request to change a customer's billing option shall be made on or before 15 calendar days prior to the scheduled meter reading date.

**3. Suspension and Discontinuance**

- a. A distribution utility may suspend or discontinue an ESCO's right to offer consolidated billing as a billing party or a non-billing party for failure to comply with a BSA. Suspension of the right to offer consolidated billing means that the ESCO is prohibited from offering consolidated billing to new customers.
- b. Upon a determination by a distribution utility to suspend or discontinue an ESCO's right to offer consolidated billing to customers, it shall provide notice on or before 15 calendar days prior to the proposed date for the suspension or discontinuance (cure period) to the ESCO and state the reason for its determination. Upon failure of the ESCO to correct the deficiency on or before the expiration of the cure period, the distribution utility may require a change to dual billing for the ESCO's customers.
- c. Upon discontinuance of consolidated billing rights, an ESCO may reapply to the distribution utility to offer consolidated billing. A distribution utility shall expedite consideration of such requests. Customers may begin receiving consolidated bills again after requirements are satisfied, including submission of transaction requests to establish consolidated billing for customers.

**F. Consolidated Billing: Customer Requests**

1. A customer may request an ESCO to change its billing option. The ESCO shall request the bill option change on or before 15 calendar days prior to the scheduled meter reading date. An EDI change request is used to request a change in a customer's bill option. After receipt of the change request, a distribution utility shall, within one business day, acknowledge receipt of the request and, within two days, provide a response indicating rejection and the reason or acceptance and the effective date.
2. No distribution utility may impose a charge on a customer or an ESCO for changing a billing option.
3. When more than one request to change a customer's billing option is transmitted for a billing cycle, a billing party shall accept the last timely request received.
4. A distribution utility may deny a request to initiate consolidated billing or discontinue consolidated billing for a customer with an amount past due for at least 38 calendar days, unless the past due amount is subject to a DPA and the customer is fulfilling DPA obligations.

**G. Consolidated Billing: Content**

1. A billing party may decide upon the format for its consolidated bill provided that it states a summary of total charges and separately states distribution utility and ESCO charges in sufficient detail to allow a customer to judge their accuracy. Such separate statements shall appear in clearly separated portions of the bill and identify their source, distribution utility or ESCO. An ESCO that provides consolidated billing shall state on its consolidated bill the unadjusted distribution utility charges for delivery services provided by a distribution utility, without change.
2. A consolidated bill shall contain the information listed in Attachment 1, General Information, preferably in a summary section. The billing party may place the information on the bill in any order or location.
3. A consolidated bill shall contain the information listed in Attachment 2, Distribution Utility Content, separately stated for each distribution utility.
4. A consolidated bill shall contain the information listed in Attachment 3, ESCO Content, separately stated for each ESCO.
5. If the rate ready method is used, the ESCO shall provide to the distribution utility information listed in Attachment 3, ESCO Section Content, to the extent necessary for the distribution utility to calculate and issue bills. To initiate utility consolidated billing using the rate ready method, an ESCO shall provide the information to the distribution utility on or before 15 calendar days prior to the scheduled meter reading date. An ESCO may request a price or rate change no later than four business days prior to its effective date.
6. If a billing party and non-billing party agree to show the non-billing party's logo on the bill, the non-billing party shall provide it in an acceptable electronic format at least thirty days before its initial use.
7. If the rate ready method is used, a non-billing party is not required to provide information after it is initially submitted, except when a change is made.
8. When an ESCO issues a consolidated bill and the distribution utility transmits bill ready data, the distribution utility shall transmit to the ESCO at the appropriate time the applicable information listed in Attachment 2, Distribution Utility Content, items d – q, and the customer's name and service address.
9. When an ESCO issues consolidated bills on behalf of other ESCOs and distribution utilities and the other ESCOs provide information, the non-billing ESCOs shall provide bill ready information listed in Attachment 3, ESCO Content to the billing ESCO.
10. No party shall engage in cramming.
11. A non-billing party may display its bill messages up to 480 characters in length on the bill provided that the billing party raises no reasonable objection to the message. There is no limit in message length for the billing party. If the bill ready method is used, the non-billing party shall transmit the text of the messages or agreed upon message codes in the same EDI transaction as the billed charges. If the rate ready method is used, a non-billing party shall submit a common bill message on or before 15 calendar days before the date used. Unless a final print date is provided, the billing party shall continue to print the message on bills until the non-billing party transmits a different message or requests its discontinuance. In emergencies requiring printing of messages on bills, the billing party shall accommodate the needs of the non-billing party, if practicable.

12. The billing party shall, in a timely manner, print on bills or insert into bill envelopes information that a statute, regulation, or Public Service Commission order requires a distribution utility or ESCO to send to its customers. The billing party may not assess charges for inclusion of required inserts that do not exceed one-half ounce. A distribution utility may charge for any excess weight in accordance with its tariff. The party responsible for providing the information shall submit it to the billing party. If the information is provided in a bill insert, the responsible party shall deliver the inserts in preprinted bulk form in a proper size on or before 15 calendar days before the date requested for initiation of distribution to customers to a location designated by the billing party.
13. Due dates and other general payment terms and conditions shall be identical for distribution utility and ESCO charges, unless different terms and conditions would have no impact on them. In the event of a conflict, the distribution utility's payment terms and conditions shall govern.

#### H. Consolidated Billing: Bill Issuance

1. No late charge may be applied to customers' bills for distribution utility charges, if payment is received by the billing party within the grace period.
2. If the bill ready method is used, the non-billing party shall transmit its charges and other information to the billing party on or before two business days after receipt of valid usage data for a customer account. If the rate ready method is used, the non-billing party shall transmit any revisions in rate and/or price data to the billing party on or before four business days prior to the prescribed date.
3. If the bill ready method is used, a billing party that receives a non-billing party's transaction within the prescribed time and rejects the transaction for cause shall, within one business day after receipt of the transaction, send the non-billing party an EDI reject transaction and state the reason for the rejection. The non-billing party may, if time permits, submit a corrected file containing billing charges for inclusion in the current billing statement.
4. If a non-billing party's transaction is sent to the billing party outside the prescribed time frame, the billing party may reject the transaction and shall notify the non-billing party on or before two business days after its receipt that the charges were not billed. The non-billing party may resubmit its charges the following billing period in accordance with prescribed time limits and without late charges. If the bill ready method is used, the non-billing party may submit a separate bill to the customer and notify the billing party of the action. The parties may also agree that the billing party shall hold the non-billing party's charges for inclusion in the next bill.
5. If a non-billing party's transaction is accepted using the bill ready method, the billing party shall render a bill within two business days after receipt of the transaction. If a rate ready method is used, a billing party shall render a bill in accordance with the distribution utility's regular bill issuance schedule. A bill is rendered upon transfer to the custody of the U.S. Postal Service or other delivery service or, if authorized by a customer, sent electronically to a valid e-mail address or telefax number, displayed on a secure website, or presented directly to the customer or customer's representative.
6. If the billing party has not purchased a non-billing party's accounts receivable, is able to process the non-billing party's transaction, and is unable to render a bill within the prescribed

time, the billing party shall notify the non-billing party immediately. A billing party shall afford customers the same grace period to pay the bill.

7. If the rate ready method is used, the billing party shall provide to the non-billing party within two business days after bill issuance, a statement of the accounts billed, date of issuance and amount of the non-billing party's charges shown on the bill (past due, current, and late payment charges and taxes).

I. Consolidated Billing: Cancellations and Rebills

1. If non-billing party errors occur and are not corrected before the bill is issued, a billing party is not required to cancel bills or issue new bills. The non-billing party shall provide any necessary explanations to the customer and billing party and make any necessary adjustments on the next bill.
2. If billing party errors cause the non-billing party charges to miss the billing window, the billing party shall cancel and reissue the bills within two business days after notification, unless the billing party and non-billing party arrange an alternative bill correction process.<sup>1</sup> A billing party shall afford customers the same grace period to pay bills.
3. If no party errs, the parties may agree to cancel and rebill.
4. To cancel a bill, a billing party shall:
  - a. Cancel usage by billing period;
  - b. Send consumption in the cancel transaction that matches consumption sent in the original transaction;
  - c. Send cancelled usage at the same level of detail as the original usage;
  - d. Using the rate ready method, if a bill is to be cancelled and reissued, recalculate charges and issue revised bills to customers within two business days after receipt of the revised usage data;
  - e. Using the bill ready method, if a bill is to be cancelled and reissued, issue the revised bill to customers within two business days after receipt of the revised usage data.
5. To restate usage for a period, the distribution utility or MDSP shall first cancel usage for that period and then send the full set of restatement transactions.

J. Consolidated Billing: Payment Processing and Remittance

1. The parties shall set forth their responsibilities, performance parameters, financial arrangements and other details associated with payment processing and remittance in a BSA, subject to the requirements in this Section.
  - a. In the Pay-as-You-Get-Paid Method, the billing party sends payments to the non-billing party, within two business days of receipt and posting of the funds and processes the payments in accordance with the required priority for application of payments established in this Section.
  - b. A BSA shall establish procedures for processing payments made on any purchased accounts receivable.
2. Payment Processing

---

<sup>1</sup> Such errors do not include usage-related adjustments necessary when an actual meter reading becomes available to replace an estimated reading required, for example, because a customer denies access to a meter.

- a. The billing party shall notify the non-billing party that payment is received and send payments to the non-billing party, within two business days after receipt and posting, by use of Electronic Funds Transfer (EFT), Automated Clearing House (ACH), or similar means to banks or other entities as agreed upon by the parties. The notice shall include, in account detail, the payments received from customers, the date payments are posted, the date payments are transferred, and the amounts allocated to the non-billing party's charges.
- b. The billing party may impose late payment charges on unpaid amounts not in dispute for the non-billing party provided the terms of the late payment charges are stated in a tariff or a sales agreement and previously disclosed to the customers. If the bill ready method is used, each party shall calculate its late payment charges. If the rate ready method is used, the billing party shall calculate the non-billing party's late payment charges under terms agreed upon by the parties. If a customer's check is returned for any reason, the billing party may charge the customer's account for the return fee and any reasonable administrative fee.
- c. Upon failure of the billing party to pay the non-billing party its proper share of customer payments within two business days after their receipt and posting or at the time agreed upon when accounts receivable are purchased, the billing party shall pay interest on the unremitted amount. The billing party shall calculate the interest at the rate of 1.5 percent per month from the date the payment was due to be received by the non-billing party or its bank.<sup>1</sup> The payment of interest is in addition to, and not in lieu of, the rights and remedies otherwise available to the parties.

### 3. Collections

The billing party is not responsible for collection of non-billing party funds, unless agreed to in a BSA.

### 4. Application of payments

- a. The billing party<sup>2</sup> shall allocate customer payments to the following categories of charges on the bill or contained in a notice that are not in dispute in this order of priority of payment: (1) amounts owed to avoid termination, suspension or disconnection of commodity or delivery service; (2) amounts owed under a DPA, including installment payments and current charges; (3) arrears; and (4) current charges not associated with a DPA. The billing party shall pro-rate payments to the charges within each category in proportion to each party's charges in that category. After satisfaction of the charges in a category, assuming available funds, the remainder of the payment shall apply to the next highest category according to the priority of payments and in the same manner as described above until the payment is exhausted.
- b. The billing party may retain any payment amounts in excess of the amounts due as prepayments for future charges or return the excess amounts to customers. The billing

<sup>1</sup> Upon request, the billing party shall provide the non-billing party with a verified copy of the posting log of payments received and transferred to the non-billing party during any calendar month specified by the non-billing party.

<sup>2</sup> Distribution utilities supplying delivery service for both natural gas and electricity to customers receiving consolidated bills shall apply the receipts to the separate services in accordance with their regular procedures. Where a consolidated bill displays delivery charges for separate gas and electric distribution utilities, the customer's payments shall be first prorated between the utility accounts in accordance with the amount each is due compared with the total amount due both distribution utilities.

party shall, in a timely manner, combine any excess payment amounts with the customer's payment on the next bill, and allocate and pro-rate the sum as set forth in Section 9.J.4.a.<sup>1</sup>

- c. When the billing or non-billing party enters into a multi-month payment agreement with a customer or waives any charges, that party shall notify the other party of such action.
- d. The billing party shall hold payments received without account numbers or enough information for the billing party to identify the accounts and attempt to obtain information to identify the payer. If sufficient information is not obtained to identify the account information prior to the next bill, the billing party shall present the unpaid amount and late charge, if applicable, on the bill. If the customer contacts the billing party to inquire about the late charge and the lack of payment credit, the billing party shall resolve the matter and reverse the late charges. The billing party shall notify the non-billing party of the matter and its resolution and then allocate payments as necessary to balance the account.

#### 5. Multiple Account Payment Processing

Processing of a single customer payment for multiple accounts requires proactive action on the part of the billing party and the non-billing party to apply payments correctly. The parties shall set forth arrangements for multiple account payment processing in a BSA.

#### 6. Non-billing Party's Balance

- a. Except as provided in Section 9.J.6 d., when a final bill is issued, the billing party shall maintain a current and past due balance for each account of the non-billing party until payment of the last bill issued for service provided by the non-billing party or 23 days after issuance of such bill, whichever is sooner. After such time, the account shall be considered "inactive."
- b. Except as provided in Section 9.J.6 d., when a customer changes to a new ESCO, the billing party shall continue to receive and apply a customer's payments for the active account of the prior ESCO. If the customer does not pay the outstanding balance owed to the prior ESCO on or before 23 days after the final bill containing the prior ESCO's charges is issued, the billing party shall notify the ESCO and report the balance due.
- c. With regard to a new distribution utility/ESCO relationship following a change of ESCOs or a change in a distribution utility, the new billing party shall, upon request of the new non-billing party, bill for the balances that may exist at the time of the change. The new billing party may include the arrears on current bills or in a separate bill if its billing system is not capable of accepting prior charges. If a change of providers occurs, a distribution utility is not required to post any arrears of the prior ESCO on consolidated bills issued after the final billing of its charges, unless the arrears become the property of the new ESCO and it provides documentation of its property right to the distribution utility.
- d. Upon ESCO termination of the commodity supply of a residential customer due to failure to pay charges, the billing party shall maintain a current and past due balance for the account of the terminating ESCO for one year from the date of termination by the ESCO.

---

<sup>1</sup> Where the customer elects to make a charitable donation, such as funding a low income program, satisfaction of the donation shall be made prior to allocation and pro-ration of the customer's excess payment.

In the event that the terminating ESCO seeks suspension of delivery service within one year of the termination, or the residential customer has a DPA, the billing party shall maintain a current and past due balance for each account of the terminating ESCO until the arrears are paid in full.

7. Customer Disputes: Initiating a Bill Complaint

- a. A customer or authorized representative may initiate a customer complaint regarding some or all of the charges on the customer's bill at any time.
- b. When a complaint relates to the entire bill, to only the billing party's charges or services, or, using the rate ready method, to calculation of the billing or non-billing party's charges, the customer should contact the billing party. The billing party shall resolve the complaint and, if appropriate, place the customer's account in dispute. In the event the inquiry concerns only a non-billing party's bill, charges, services, or calculations, the billing party shall refer the customer to the non-billing party.

8. Customer Complaints: Notification

- a. Upon a determination that a complaint affects the entire bill, the billing party shall notify the non-billing party of the subject and amount in dispute, if known.
- b. The non-billing party shall inform the billing party of disputes related to non-billing party charges that would affect the billing process.
- c. Once such complaints are resolved and the billed amounts are no longer in dispute, the other party shall be notified.

K. Consolidated Billing: Call Centers

A billing party shall provide call centers with toll-free or local telephone access available 24 hours a day and an answering machine or voice mail service during the hours when call center staff is not available. A billing party shall maintain adequate staff to respond to customers' inquiries or refer inquiries to the non-billing party, where appropriate, within two business days.

L. Dual Billing

1. The distribution utility and ESCO, acting as separate billing parties, shall render separate bills directly to the customer or the customer's representative. The customer or its representative shall pay the distribution utility and the ESCO separately.
2. The distribution utility's bill shall conform to the standards set by the Public Service Commission.
3. The distribution utility or MDSP shall transmit usage data to the ESCO at the time the information is available for rendering bills to customers, which may or may not coincide with meter reading cycle dates.
4. The ESCO may decide upon its bill format provided that it states its charges in sufficient detail to allow customers to judge the accuracy of their bills. At a minimum, an ESCO shall provide the following information:
  - a. Customer's name and billing address and, if different, service address;
  - b. Customer's account number or ID;
  - c. Period or date associated with each product or service billed;
  - d. Name of the entity rendering the bill;
  - e. Address to which payments should be sent or the location where payments may be made;

- f. Local or toll free number for billing inquiries; if an ESCO enrolls and communicates with customers electronically, an e-mail address and telephone number with area code;
  - g. Due date for payment and a statement that late payment charges shall apply to payments received after the due date; and
  - h. Amount and date of payments received since the last bill.
5. Whenever a distribution utility or MDSP cancels consumption for an account, it shall provide a notice of cancellation and restated billing parameters for the account to an ESCO and a distribution utility, if applicable, and shall:
- a. Cancel usage by billing period;
  - b. Send consumption in the cancel transaction that matches consumption sent in the original transaction;
  - c. Send cancelled usage at the same level of detail as the original usage; and,
  - d. To restate usage for a period, cancel usage for that period and send the full set of billing parameter restatements.

**Attachment 1****General Information**

- A. Customer name
- B. Service address
- C. Billing address, if different than service address
- D. Billing party account number, if any
- E. Start of billing cycle period (prior meter reading date for metered customers)
- F. Starting period meter reading (for metered customers)
- G. End of billing cycle period (current meter reading date for metered customers)
- H. Ending period meter reading (for metered customers)
- I. Billing period metered usage, any multiplier necessary to convert usage to billing units and resulting billing units (for metered customers)
- J. Billing period demand, if applicable
- K. Indicators, if usage is estimated, actual or customer provided
- L. Total current charges (total of billing and non-billing party charges, including late charges and taxes)
- M. Total prior billed charges (total of billing and non-billing party prior bill charges, including prior late charges and taxes)
- N. Total credits since last bill (total of billing and non-billing party credits);
- O. Date through which the credits are applied
- P. Total current bill (total of billing and non-billing party charges plus prior bill charges less credits)
- Q. Billing party name (and billing party logo, if billing party wishes it shown)
- R. Billing party address
- S. Billing party toll-free or local telephone number, and for a billing party that enrolls and communicates electronically with customers, an e-mail address and telephone number with area code, in lieu of a toll-free or local telephone number
- T. Distribution utility toll free-or local telephone number and emergency telephone number
- U. Method and location for payments
- V. Date of bill
- W. Payment due date

- P. The ESCO's bill message, if any, up to 480 characters, if the ESCO is the non-billing party.

**SECTION 10: MARKETING STANDARDS****A. Applicability**

This Section describes the standards that ESCOs and ESCO marketing representatives must follow when marketing to customers in New York.

**B. Training of Marketing Representatives**

1. ESCOs shall ensure that the training of their marketing representatives includes:
  - a. Knowledge of this Section and awareness of the other Sections of the New York Uniform Business Practices;
  - b. Knowledge of the ESCO's products and services;
  - c. Knowledge of ESCO rates, payment options and the customers' right to cancel, including the applicability of an early termination fee;
  - d. Knowledge of the applicable provisions of the Home Energy Fair Practices Act that pertains to residential customers; and,
  - e. The ability to provide the customer with a toll-free number from which the customer may obtain information about the ESCO's mechanisms for handling billing questions, disputes, and complaints.

**C. Contact with Customers****1. In-Person Contact with Customers<sup>1</sup>**

ESCO marketing representatives who contact customers in person at a location other than the ESCO's place of business for the purpose of selling any product or service offered by the ESCO shall, before making any other statements or representations to the customer:

- a. Introduce him or herself with an opening statement that identifies the ESCO which he or she represents as an Energy Services Company, identifies him or herself as a representative of that specific ESCO; explains that he or she does not represent the distribution utility; and, explains the purpose of the solicitation.
- b. Produce identification, to be visible at all times thereafter, which:
  1. Prominently displays in reasonable size type face the full name of the marketing representative;
  2. Displays a photograph of the marketing representative and depicts the legitimate trade name and logo of the ESCO they are representing;
  3. Provides the ESCO telephone number for inquires, verification and complaints.
- c. During the sales presentation, the marketing representative must also state that if customer purchases natural gas and/or electricity from the ESCO, that the customer's utility will continue to deliver their energy and will respond to any leaks or emergencies. This requirement may be fulfilled either (a) by an oral statement by the ESCO marketing representative, or (b) written material left by the ESCO marketing representative. Further, ESCOs that are affiliates of distribution utilities should not describe or disclose their relationship to the distribution utility unless such information is specifically requested by the customer.

---

<sup>1</sup> Including but not limited to marketing encompassed in the definition of door to door sales.

- d. An ESCO marketing representative must provide each prospective residential customer a business card or similar tangible object with the ESCO marketing representative's name; ESCO's name, address, and phone number; date and time of visit and website information for inquires, verification and complaints.
  - e. An ESCO marketing representative must provide each prospective residential customer or customer that is marketed to via door to door marketing, with a copy of the ESCO Consumers Bill of Rights, before the ESCO marketing representative makes his or her sales presentation.
  - f. An ESCO marketing representative must provide the customer with written information regarding ESCO products and services immediately upon request which must include the ESCOs name and telephone number for inquires, verification and complaints. Any written materials, including contracts, sales agreements, marketing materials and the ESCO Consumers Bill of Rights, must be provided to the customer in the same language utilized to solicit the customer.
  - g. Where it is apparent that the customer's English language skills are insufficient to allow the customer to understand and respond to the information conveyed by the ESCO marketing representative or where the customer or another third party informs the ESCO marketing representative of this circumstance, the ESCO marketing representative shall either find a representative in the area who is fluent in the customer's language to continue the marketing activity in his/her stead or terminate the in-person contact with the customer. The use of translation services and language identification cards is permitted.
  - h. An ESCO marketing representative must leave the premises of a customer when requested to do so by the customer or the owner/occupant of the premises.
  - i. As stated in Section 5.B.2, for any sale resulting from door-to-door marketing, each enrollment is only valid with an independent third party verification in conformance with Section 5, Attachment 1. The verification must occur after the marketing agent has left the customer's premises, and must be completed before the ESCO may enroll a customer ~~with whom the ESCO's contact originated through or included a door-to-door marketing component, the customer's agreement must be confirmed through independent third party verification in conformance with Section 5, Attachment 1, after the marketing representative has left the customer's premises.~~
  - j. All ESCOs who have ESCO marketing representatives conducting door-to-door marketing must maintain a daily record, by zip code, of the territories in which the ESCO's marketing representatives have conducted door-to-door marketing. The information should be in a form that can be reported to Staff upon request, and should be retained by the ESCO for a minimum of six months.
2. Telephone Contact with Customers
- ESCO marketing representatives who contact customers by telephone for the purpose of selling any product or service offered by the ESCO shall:
- a. Provide the ESCO marketing representative's first name and, on request, the identification number;
  - b. State the name of the ESCO on whose behalf the call is being made;

- c. Never represent that the ESCO marketing representative is an employee or representative or acting on behalf of a distribution utility. In addition, the ESCO marketing representative must clearly indicate that taking service from an ESCO will not affect the customer's distribution service and such service will continue to be provided by the customer's distribution utility;
  - d. State the purpose of the telephone call;
  - e. Where it is apparent that the customer's English language skills are insufficient to allow the customer to understand and respond to the information conveyed by the ESCO representative or where the customer or another third party informs the ESCO marketing representative of this circumstance, the ESCO marketing representative will immediately transfer the customer to a representative who speaks the customer's language, if such a representative is available, or terminate the call; and,
  - f. Remove Customers' names from the marketing database upon Customers' request.
  - g. When marketing to residential customers the ESCO marketing representative must also:
    - 1. Explain that he or she does not represent the distribution utility;
    - 2. Explain the purpose of the solicitation;
    - 3. Notify each prospective customer of the ESCO Consumer Bill of Rights, where they can find it, and also provide a copy of the ESCO Consumer Bill of Rights with any written material sent to the customer including the sales agreement ; and,
    - 4. Provide any written materials, including contracts, sales agreements, marketing materials and the ESCO Consumers Bill of Rights, must be provided to the customer in the same language utilized to solicit the customer.
  - h. As stated in Section 5.B.2, for any sale resulting from telephonic marketing, each enrollment is only valid with an independent third party verification in conformance with Section 5, Attachment 1. The verification must be completed before the ESCO may enroll a customer ~~with whom the ESCO's contact originated through or included a telephonic component, the customer's agreement must be confirmed through independent third party verification in accordance with Section 5, Attachment 1.~~
3. Electronic Enrollments
- a. When marketing to residential customers the ESCO Consumer Bill of Rights should be provided to prospective customers as a non-avoidable screen which a customer must affirmatively acknowledge to verify they have seen the document, prior to effecting an enrollment.
4. Conduct
- ESCOs shall:
- a. Not engage in misleading or deceptive conduct as defined by State or federal law, or by Commission rule, regulation or Order;
  - b. Not make false or misleading representations including misrepresenting rates or savings offered by the ESCO;
  - c. Provide the customer with written information, upon request, or with a website address at which information can be obtained, if the customer requests such information via the internet;

- d. Use reasonable efforts to provide accurate and timely information about services and products. Such information will include information about rates, contract terms, early termination fees and right of cancellation consistent with Section 2 of the UBP and any other relevant Section;
  - e. Ensure that any product or service offerings that are made by an ESCO contain information written in plain language that is designed to be understood by the customer. This shall include providing any written information to the customer in a language in which the ESCO representative has substantive discussions with the customer or in which a contract is negotiated;
  - f. Investigate customer inquiries and complaints concerning marketing practices within five days of receipt of the complaint; and,
  - g. Cooperate with the Department and PSC regarding marketing practices proscribed by the UBP and with local law enforcement in investigations concerning deceptive marketing practices.
5. Dispute Resolution
- ESCOs will maintain an internal process for handling customer complaints and resolving disputes arising from marketing activities and shall respond promptly to complaints forwarded by the Department.
