

State of New York  
Public Service Commission

Application  
of  
New York State Electric & Gas Corporation  
to  
Construct a Fuel Gas Transmission Line  
Under Article VII, Section 121-a of  
The Public Service Law

Seneca West Pipeline Interconnect  
Towns of Big Flats and Horseheads, and Village of Horseheads  
Chemung County, New York

**EXHIBIT C**

**Environmental Management & Construction Standards & Practices  
(EM&CS&P)**

<b>III. General Planning Objectives and Procedures</b>	3	
<b>1. Planning Objectives</b>	3	X
1.1 Supervision and Inspection	4	X
1.1.1 Environmental Inspection	4	X
1.1.2 Responsibilities of Environmental Inspector	5	X
<b>2. Procedures for the Identification and Protection of Sensitive Resources</b>	6	
2.1 Rare and Endangered Species & Their Habitats	7	X
2.2 Cultural Resources	8	X
2.3 Streams, Wetlands & Other Water Resources	8	X
2.4 Active Agricultural Lands	9	x
2.5 Alternative/Conflicting Land Uses	9	
2.6 Steep Slopes, Highly Erodible Soils & Flood Plains	10	X
2.7 Timber Resources, Commercial Sugarbushes & Unique/Old Growth Forests	10	X
2.8 Officially Designated Visual Resources	10	
<b>3. Land Requirements</b>	11	
3.1 Objectives	11	X
3.2 Pipeline Routing	11	X
3.3 Right-Of-Way Width	12	X
3.3.1 Permanent ROW	12	X
3.3.2 Temporary ROW	12	X
3.3.3 Extra Work Space	13	X
3.3.4 Associated/Appurtenant Facilities: Meter Site	13	X
3.3.5 Compressor Stations	14	
3.3.6. Storage, Fabrication and other Construction Related Sites	14	X
3.3.7 Permanent Disposal Sites	15	X
<b>4. Site Preparation</b>	16	
4.1 Objectives	16	X
4.2 Staking and ROW Delineation	16	X
<b>5. Clearing in Upland Areas</b>	16	
5.1 Objectives	16	X
5.2 Definitions	17	X
5.3 Equipment	17	X
5.4 Clearing Methods & Procedures in Upland Areas	18	X
5.5 Log Disposal	19	X
5.5.1 Construction Use	19	X
5.5.2 Log Piles	19	X
5.5.3 Sale	20	
5.5.4 Chipping	20	X

5.6 Slash and Stump Disposal	20	X
5.6.1 Stacking and Scattering	20	X
5.6.2 Chipping	21	X
5.6.3 Burning	21	
5.6.4 Hauling	21	X
5.6.5 Burial	22	X
5.7 Vegetation Buffer Areas	22	X
5.8 Walls and Fences	23	X
5.8.1 Stone Walls	23	x
5.8.2 Fences	23	X
<b>6. Grading in Upland Locations</b>	24	
6.1 Objectives	24	X
6.2 Techniques and Equipment	24	X
6.3 Topsoil Stripping and Segregation	25	X
6.3.1 No Stripping	25	X
6.3.2 Ditchline	26	X
6.3.3 Ditch and Spoil	26	X
6.3.4 Full Width	26	X
6.4 Access Road & Construction Paths	26	X
6.4.1 Objectives	26	X
6.4.2 Construction Paths	27	X
6.4.3 Off ROW Access Roads	28	X
<b>7. Erosion and Sedimentation Control</b>	28	
7.1 Objectives	28	X
7.2 Measures and Devices	28	X
7.2.1 Hay Bales and Silt Fence	29	X
7.2.2 Water Diversion Devices	30	X
7.2.2.1 Waterbars	30	X
7.2.2.2 Swales and Berms	30	X
7.2.2.3 Side Ditches	30	X
7.2.2.4 French Drains	31	X
7.2.2.5 Culverts	31	X
7.2.2.6 Sediment Retention Ponds and Filtration Devices	32	X
7.2.2.7 Catchment Basins	32	X
7.2.2.8 Mulch and Other Soil Stabilizers	32	X
7.2.2.9 Driveable Berms	32	X
7.2.2.10 In Street Devices	33	X
7.3 Fugitive Dust Emissions	33	X
<b>8. Trenching</b>	33	
8.1 Objectives	33	X
8.2 Trenching Equipment	33	X
8.3 Ditch Width and Cover Requirements	34	X
8.4 Length of Open Trench	34	X
8.5 Ditch Plugs	35	X
8.6 Blasting	36	
8.6.1 Preconstruction Studies	36	
8.6.2 Monitoring and Inspection	36	
8.6.3 Time Constraints and Notification	37	

8.6.4 Remediation	37	
<b>9. Pipelaying</b>	37	
9.1 Objectives	37	X
9.2 Stringing	38	X
9.3 Fabrication	38	X
9.4 Trench Dewatering	39	X
9.5 Lowering In	39	X
9.6 Trench Breakers	40	X
9.7 Padding	40	X
9.8 Backfilling	40	X
<b>10. Waterbody Crossings</b>	41	
10.1 Objectives	41	x
10.2 Definition	41	x
10.2.1 Categories and Classifications	41	x
10.3 Spill Prevention	43	x
10.4 Buffer Areas	43	x
10.5 Installation	44	x
10.5.1 Equipment Crossings	44	x
10.5.2 Concrete Coating	45	X
10.6 Dry Crossing Methods	45	x
10.6.1 Trenching	45	x
10.6.2 Lowering-in /Pipe Placement	46	x
10.6.3 Trench Backfill	47	x
10.6.4 Cleanup and Restoration	47	x
10.7 Dry Stream Crossing Techniques	48	
10.7.1 Bores and Pipe Push	48	X
10.7.2 Directional Drilling	48	X
10.7.3 Other Dry Crossing Methods	49	
10.7.3.1 Flume Method	49	x
10.7.3.2 Dam and Pump Method	50	x
<b>11. Wetland Crossings</b>	51	
11.1 Objectives	51	X
11.2 Regulatory Agencies and Requirements	51	X
11.3 Wetland Identification and Delineation	52	X
11.4 Timing and Scheduling Constraints	52	
11.5 Clearing Methods	53	X
11.6 Construction Path and Access Road Construction	53	X
11.6.1 No Road or Pathway	54	
11.6.2 Bridges and Flotation Devices	54	
11.6.3 Timber Mats	54	x
11.6.4 Log Rip Rap (Corduroy) Roads	55	
11.6.5 Filter Fabric and Stone Roads	55	x
11.7 Grading	56	x
11.8 Trenching	56	x
11.8.1 Standard Trenching	56	x
11.8.2 Trenching from Timber Mats	57	x
11.8.3 One Pass In-line Trenching	57	
11.8.4 Modified One Pass In-Line	57	

11.9 Directional Drill and Conventional Bore	58	x
11.10 Spoil Placement and Control	58	x
11.10.1 Topsoil Stripping	58	x
11.11 Ditch Plugs in Wetlands	59	x
11.12 Pipe Fabrication and Use	59	x
11.12.1. Concrete Coated Pipe	59	x
11.12.2 Fabrication	59	x
11.13 Trench Dewatering	59	x
11.14 Backfill	60	x
11.15 Cleanup and Restoration	60	x
11.15.1 Restoration	61	x
11.15.2 Cleanup	61	x
<b>12. Agricultural Lands</b>	61	
12.1 Objectives	61	x
12.2 Types of Agricultural Lands/mowed meadow	61	x
12.3 Clearing	62	x
12.4 Grading and Topsoil Segregation	63	x
12.4.1 Grading	63	x
12.4.2 Topsoiling	63	x
12.4.2.1. Cropland	63	x
12.4.2.2 Pasture/Grazing/mowed meadow	64	x
12.5 Drain Tiles	64	x
12.6 Trenching	64	x
12.7 Backfilling	65	x
12.8 Cleanup and Restoration	65	x
12.9 Revegetation	66	x
12.9.1 Seed Mixtures	66	x
12.9.2 Timing	66	x
12.9.3 Mulching	66	x
12.9.4 Temporary Diversion Berms	67	x
12.10 Remediation and Monitoring	67	x
<b>13. Testing</b>	67	X
<b>14. General Cleanup and Restoration</b>	69	
14.1 Objectives	69	X
14.2 Cleanup	69	X
14.3 Restoration	70	X
14.3.1 Wooded and non-agricultural Uplands	70	X
14.3.1.1 Grading	71	X
14.3.1.2 Lime Application	71	X
14.3.1.3 Fertilizing	72	X
14.3.1.4 Discing and Raking	72	X
14.3.1.5 Seeding and Planting	72	X
14.3.2 Restoration - Urban Residential	74	X
<b>15. Noise Impact Mitigation</b>	75	
15.1 Objectives	75	X
15.2 Noise Sensitive Receptors	75	X
15.3 Remediation and Control	75	X

15.3.1 Noise Control-measures for Equipment And Linear Construction	76	X
15.3.2 Noise Control Measures for Point Source Noise Producers	76	X
15.4 Compressor Stations	77	
<b>16. Transportation and Utility Crossings</b>	77	
16.1 Objectives	77	X
16.2 Road and Highway Crossings	78	X
16.2.1 Permitting	78	X
16.2.2 Preconstruction Planning	78	X
16.2.3 Road Crossing Methods	79	X
16.2.3.1 Trenched Open-Cut	79	x
16.2.3.2 Trenchless, Bore/Direct Drill	80	x
16.2.4 Longitudinal In-Road Construction	80	x
16.2.5 Signs	81	X
16.2.6 Repairs and Restoration	81	X
16.3 Canal Crossings	82	
16.3.1 Scheduling	82	
16.3.2 Construction	82	
16.3.3 Restoration	83	
16.4 Railroad Crossings	83	
16.5 Utility Crossings	84	X
16.5.1 Overhead Electric Facilities	84	x
16.5.1.1 Perpendicular Crossings	84	x
16.5.1.2 Linear ROW Co-occupation	84	x
16.5.2 Underground Utility Crossings	86	X
<b>17. Hazardous Materials</b>	87	
17.1 Objectives	87	X
17.2 Regulatory Concerns	87	X
17.3 Spill Control Equipment	90	X
17.3.1 Upland	90	X
17.3.2 Waterborne Equipment	90	
17.4 Storage and Handling	91	X
17.4.1 Storage	91	X
17.4.2 Equipment Refueling	91	X
17.5 Spill Response Procedures	92	X
17.6 Excavation and Disposal	93	X
17.7 Hazardous Waste Contact	93	X
<b>18. Pipeline Operation, ROW Management &amp; Maintenance</b>	93	
18.1 Objectives	93	X
18.2 ROW Maintenance	94	X
18.3 Inspection	94	X
18.4 Vegetation Maintenance	95	X
18.4.1 Mechanical Treatment	95	X
18.4.2 Chemical Treatment	95	x
18.4.2.1 Stem Specific Treatments	96	x
18.4.2.1.1 Basal Treatments	96	x
18.4.2.1.2 Stem Injection	96	x
18.4.2.1.3 Cut and Treat	96	x
18.4.2.2 Non Stem-specific Applications	97	x

<b>19. Communications and Compliance</b>	97	
19.1 Communication with Staff and the Commission	97	X
19.1.1 Pre-filing Contact	97	X
19.1.2 Post-filing Contact	97	X
19.2 Compliance with Commission Orders	98	X
