Person. "Person" means any natural person, corporation, society, organization, incorporated or unincorporated association, form, or partnership, and shall include any assignee, receiver, trustee, executor, administrator or similar representative appointed by a court, and shall mean the United States of America or any political subdivision thereof, or any foreign government or political subdivision thereof.

Person with a Disability. A person with a disability is an individual with a physical or mental impairment that, on a permanent or temporary basis, substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment.

Personal audio device. "Personal audio device" means a portable sound reproduction device as normally and customarily used for personal purposes, including but not limited to a personal radio, phonograph, television receiver, tape recorder, cassette player, compact disc player, or mp3 player.

Police officer. "Police officer" means any member of the Police Department of the City of New York and any person designated as a peace officer pursuant to section 2.10 of the New York State Criminal Procedure Law when acting pursuant to his/her special duty in or at the terminals or on the ferries.

Rule. "Rule" means, unless otherwise herein provided, any rule promulgated pursuant to §2903(c) of the New York City Charter and in compliance with the requirements of Chapter 45 of the New York City Charter.

Service animal. A "service animal" is any animal that is specifically trained to provide assistance to a person with a disability.

Sound reproduction device. "Sound reproduction device" means any device intended primarily for the production or reproduction of sound, including, but not limited to, any radio receiver, phonograph, television receiver, musical instrument, tape recorder, or electronic sound amplifying system.

Storage. "Storage" means the use of space on the ferries or in the ferry terminals to keep materials or possessions.

Terminals. "Terminals," used in the plural, includes both the ferry terminal located at Whitehall Street in the Borough of Manhattan and the ferry terminal located at St. George in the Borough of Staten Island. "Terminals" shall also include the other ferry terminals and landings owned and/or operated by the Department. Each terminal may also be referred to herein by its specific location, in which case "terminal" shall mean only the terminal referred to. Each terminal may have a different Manager. "Terminal" includes areas approaching the ferry slips and all other city-owned real property upon which the terminal building is situated, and the surrounding grounds thereof as designated on the city map.

Service animal definition added City Record Dec. 16, 2005 §1, eff. Jan. 15, 2006. [See Note 1]

Storage definition amended City Record Sept. 1, 1993 eff. Oct. 1, 1993.

NOTE

1. Statement of Basis and Purpose in City Record Dec. 16, 2005:

The Commissioner of the Department of Transportation is authorized to maintain and operate the ferries of the city and to be responsible for all ferry boats, ferry houses, ferry terminals and equipment thereof pursuant to §§1043 and 2903(c) of the New York City Charter.

Section 1-01 of Title 34 of the Official Compilation of the Rules of the City of New York provides definitions related to Chapter 1: Ferry Terminals and Vessels.

Definitions are being added to define terms related to compliance with the Americans with Disabilities Act. A previous rule on the Staten Island Ferry allowed no pets on the ferry with the exception of pets in cages and "seeing eye" dogs. According to ADA mandates service animals must be accommodated in all public places/transportation conveyances without exception. Service animals are not limited to Seeing Eye dogs.

Section 1-02 of Title 34 of the Official Compilation of the Rules of the City of New York delineates rules of conduct for users of the Ferry facilities and vessels.

Subdivision (d) of §1-02 is being amended to provide procedures for the stowing of bicycles during the transit of passengers on the Ferry and for removal, reclamation and storage of bicycles abandoned on the Ferry. Unattended bicycles left continuously on the bicycle racks for more than one hour may be removed from the ferry. To reclaim a bicycle, the owner may call 311 within 10 days. After 10 days, bicycles will be considered abandoned and may be transferred to the NYPD Property Clerk for disposal pursuant to law (General Municipal Law §250 and NYC Administrative Code §10-106).

Subdivision (n) of §1-02 is being amended so that the written rules reflect the Ferry Division's compliance with the Americans with Disabilities Act regarding service animals, which are no longer limited to guide dogs, and to provide a more healthful facility for the use of ferry riders by prohibiting activities that may encourage birds, scavengers or rodent populations in the Ferry Division facilities or vessels. Commuters are directed not to feed the pigeons in the terminals and on the boats.

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 1-02

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 1 FERRY TERMINALS AND VESSELS

§1-02 Prohibited Uses.

(a) **Gambling prohibited.** No person shall gamble or conduct or engage in any game of chance in the terminals or on the ferries unless such game of chance is permitted by local, state or federal law and has been approved by the Commissioner.

(b) **Defacing or damaging terminals or ferries or property therein prohibited.** No person shall deface, mark, break, or otherwise damage any part of the terminals or ferries or any property thereat. No person shall remove, alter or deface any barricade, fence or sign in the terminals or on the ferries.

(c) **Creation of obnoxious odors, noxious gases, smoke or fumes prohibited.** No person shall create, or permit any vehicle or machine of which he/she is in charge to create obnoxious odors, noxious gases, or excessive smoke or fumes in the terminals or on the ferries.

(d) **Bathing prohibited.** No person shall bathe, shower, shave, launder or change clothes or remain undressed in any public restroom, sink, washroom or any other area in the terminals or on the ferries.

(e) **Smoking or carrying lighted cigars, cigarettes, pipes, etc. in certain areas prohibited.** No person shall smoke or carry lighted cigars, cigarettes, pipes, matches or any naked flame in areas of the terminals or ferries where smoking is prohibited by the Department or by law, ordinance, rules or regulations of the United States government, the State of New York or the City of New York.

(f) **Noxious conduct.** No person shall urinate or defecate in any part of the terminals or ferries other than in a

urinal or toilet intended for that purpose. No person shall spit upon the public surfaces of the terminals or ferries including the floors and furniture.

(g) **Lying down prohibited; sitting restricted.** No person shall lie down in any place, including benches or seating facilities, within the terminals or on the ferries. No person shall be seated in the terminals or on the ferries except upon seating facilities provided for that purpose. No person shall occupy more than one seat. No person shall place personal belongings on seating facilities so as to interfere with their use by other persons.

(h) **No skateboarding, rollerskating, rollerblading or bicycle riding.** No person shall skateboard, roller skate, roller blade or ride a bicycle, scooter or any other vehicle or device except a wheelchair or other similar device used to assist a person with a disability and/or required for transit on or through any part of the terminals or ferries. Bicycles and non-motorized scooters must be walked through the terminals and ferries.

(i) **Noise.** No person shall make, continue, cause or permit to be made or continued any unreasonable noise in the terminals or on the ferries. Unreasonable noise shall mean any excessive or unusually loud sound that disturbs the peace, comfort or repose of a reasonable person of normal sensitivities, injures or endangers the health or safety of a reasonable person of normal sensitivities, or which causes injury to plant or animal life, or damage to property or business. Unreasonable noise shall include, but shall not be limited to sound that exceeds the following prohibited noise levels:

(1) Sound attributable to the source measured at a level of 7dB(A) or more above the ambient sound level at or after 10:00 p.m. and before 7:00 a.m., as measured at any point within a receiving property, as defined in §24-203 of the Administrative Code of the City of New York, or as measured at a distance of 15 feet or more from the source in a terminal or on a ferry.

(2) Sound attributable to the source measured at a level of 10dB(A) or more above the ambient sound level at or after 7:00 a.m. and before 10:00 p.m., as measured at any point within a receiving property, as defined in §24-203 of the Administrative Code of the City of New York, or as measured at a distance of 15 feet or more from the source in a terminal or on a ferry.

(3) Sound attributable to a personal audio device with personal earphones such that sound from such earphones is plainly audible to another individual at a distance of five feet or more from the source.

(j) **Disorderly behavior.** No person shall engage in disorderly behavior in the terminals or on the ferries, such as, but not limited to the following:

(1) fighting or assaulting any person; or

(2) interfering with, encumbering, obstructing or rendering dangerous any part of the ferry or terminal; or

(3) obstructing pedestrian or vehicular traffic; or

(4) climbing upon any wall, fence, shelter or any structure not specifically intended for climbing purposes; or

(5) engaging in any form of sexual conduct, as that term is defined in §130.00 of the New York State Penal Law; or

(6) engaging in a course of conduct or committing acts that endanger the safety of others; or

(7) engaging in any other course of conduct or committing acts disruptive to crew members, which obstructs or impairs their ability to carry out their duties; or

(8) engaging in any other course of conduct or committing acts against other passengers, which disturbs the peace,

comfort or repose of a reasonable person of normal sensitivities, injures or endangers the health or safety of a reasonable person of normal sensitivities; or which causes injury to plant or animal life, or damage to property or business.

(k) **Controlled substances.** No person shall possess, distribute, sell or solicit or consume any controlled substance or marihuana, as those terms are defined in §220.00 of the New York State Penal Law, on any ferry or in any terminal.

(l) **Loitering.** No person shall engage in loitering as defined in §§240.36 or 240.37 or subdivisions 2,4, 5 or 6 of §240.35 of the New York State Penal Law on any ferry or in any terminal.

(m) **Unlawful exposure.** No person shall appear in public on any ferry or in any terminal in such a manner that his/her genitalia are unclothed or exposed.

(n) **Fishing.** No person shall fish from any ferry or terminal.

NOTE

1. Statement of Basis and Purpose in City Record Dec. 24, 2009:

The Commissioner of Transportation is authorized to promulgate rules regarding ferries and their related facilities in the City pursuant to §2903(c) of the New York City Charter.

Chapter 1 of Title 34 of the Rules of the City of New York (RCNY) is being amended to update and revise the current rules regarding the ferry terminals and vessels under the jurisdiction of the Department. In the past few years, the ferry terminals and vessels have undergone some operational changes and enhancements, including the United States Coast Guard-approved Staten Island Ferry Combined Facility and Vessel Security Plan. As a result, certain rules are now obsolete while other rules are in need of being updated or established.

Specifically, the Ferry Rules of Conduct as currently codified in §1-02 of the RCNY are posted on the Staten Island Ferry vessels and throughout the St. George and Whitehall ferry terminals to ensure the safety, security, and comfort of passengers and employees. The Staten Island Ferry carries approximately 65,000 passengers a day. The Department wishes to continue to prohibit unsafe and disruptive behavior and to maintain good order, as required under general maritime law. In addition, the proposed rule would apply the Rules of Conduct to City-owned ferry landings and terminals. The definition in §1-01 of the current rules excludes the City-owned ferry landings and terminals, which

host the operations of several of the City's private ferries. Private ferry operators transport approximately 25,000 passengers a day and are an important component of the City's mass transportation system. As is the case with the Staten Island Ferry terminals, it is important to maintain a safe and secure environment in all of the City-owned ferry facilities.

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 1-03

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 1 FERRY TERMINALS AND VESSELS

§1-03 Regulated Uses.

(a) **Permission to use terminals and ferries is conditional.** Any permission granted by the Department directly or indirectly, expressly or by implication, to any person to enter upon or use the terminals or ferries, or any part thereof, is conditioned upon acceptance of and compliance with this chapter, as from time to time may be amended, and entry upon or into the terminals or ferries by any person shall be deemed to constitute an agreement by such person to comply with such rules; provided, further, that such rules shall apply to premises or spaces occupied or used under the provisions of a written agreement made with the Department unless provision is made therein that such rules do not apply.

(b) **Permits.**

(1) When any provision of this section requires a permit as a condition to the performance of an act or activity, no such act or activity shall be implemented or commenced prior to the receipt of written authorization from the Commissioner.

(2) A permit may be granted upon such terms and conditions as the Commissioner shall reasonably impose and shall authorize the permitted acts or activities only insofar as they are performed in strict accordance with the terms and conditions thereof.

(3) Permits shall be applied for on forms prepared and provided by the Department, which forms shall require such information as the Department may deem appropriate for the review and evaluation of the permit application. Applications must be received at least two business days prior to the requested date of the act or activity.

(4) No person shall conduct any activity for which a permit is required unless:

(i) such permit has been issued;

(ii) all terms and conditions of such permit have been complied with; and

(iii) the permit is kept on site, so it is available for inspection by Department employees or a police officer.

(5) Upon application, the Commissioner may deny a permit if:

(i) an applicant was previously granted a permit and on that prior occasion, knowingly violated a material term or condition of the permit, these rules or applicable law;

(ii) the date, time, and/or location requested have been previously allotted; or

(iii) the issuance of the permit would cause the existence of a dangerous condition or a condition that would interfere with operations or traffic in the terminals or on the ferries.

(6) If a permit application is denied, the applicant may, within three business days of such denial, appeal the determination by written request filed with the designated appeals officer who may reverse, affirm or modify the original determination and provide a written explanation of his or her finding. However, if a permit application is denied three business days or less prior to the requested date of the act or activity, the applicant shall have one day from the date such denial is mailed or otherwise delivered to the applicant to appeal such denial. The Department shall render a decision on such appeal as soon as is reasonably practicable.

(7) The Commissioner may, after giving the permittee reasonable notice and an opportunity to be heard, revoke or refuse to renew a permit (i) for failure to comply with the terms and conditions of such permit, these rules or other applicable law in carrying out the activity for which the permit was issued; (ii) whenever there has been any false statement or any misrepresentation as to material fact in the permit application or accompanying documents upon which the issuance of the permit is based; or (iii) whenever a permit has been issued in error contrary to paragraph 5 of subdivision b of this section.

(8) The Commissioner may delay or postpone the issuance of any permit or may temporarily suspend any permit already granted in the event of emergencies, such as snowstorms, traffic accidents, power failures, transportation strikes or other conditions which affect the traffic flow in any of the areas covered by the permit such that conduct of the activities would create a dangerous condition or would interfere with traffic in the terminals or on the ferries.

(c) **Use of terminals or ferries may be denied persons violating laws or rules.** The Manager shall have the authority to deny use of the terminals or ferries to any individual violating Department rules or laws, ordinances or regulations of the United States government, the State of New York, or the City of New York, which relate to conduct in public places or in the terminals or the ferries.

(d) **Restricted areas and times.** Permission to enter certain areas of the terminals or ferries is restricted as follows:

(1) No person, except a person assigned to duty therein or a police officer, shall enter, without permission, any area of the terminals or ferries posted as being restricted to the public. If permission to enter a restricted area is granted, such permittee shall be monitored and/or escorted at all times in accordance with the Maritime Transportation Security Act.

(2) In the event that portions of the terminals are closed to all members of the general public, any person shall, when entering or remaining in such portions of the terminals, exhibit such authorization as shall be prescribed by the Commissioner. Effective September 25, 2008 and in accordance with the Maritime Transportation Security Act, all individuals in restricted areas must display at all times a Transportation Worker Identification Credential or other authorized identification credential, including those issued to police officers.

(e) **Unattended property.**

(1) No person shall leave any property unattended in the terminals or on the ferries.

(2) Unattended property will be removed and transferred to the Staten Island Ferry's Lost and Found.

(3) Bicycles shall be stowed at the designated bicycle areas. Bicycles left on racks at the terminal for longer than 48 hours shall be deemed abandoned and will be removed and may be transferred to the Property Clerk of the New York City Police Department or other appropriate location.

(4) Owners of reclaimed property may be assessed a removal and/or storage fee.

(f) **Distribution of commercial printed materials.** No person shall, for commercial purposes, post, distribute or display signs, advertisements, circulars or printed or written material in the terminals or on the ferries without having been granted a permit by the Commissioner.

(g) **Distribution of noncommercial printed material and carrying of placards.** No person shall engage in the noncommercial distribution of leaflets, the setting up of card tables to aid in that distribution, the carrying of placards or the posting or displaying of noncommercial signs in the terminals or on the ferries without having been granted a permit by the Commissioner. No person shall distribute leaflets or other materials by leaving them unattended in the terminals or on the ferries.

(h) **Distribution of food, clothing, packages, or other non-printed items.** No person shall engage in the distribution of any food, clothing, packages, or any other non-printed items, or in the setting up of card tables to aid in that distribution in the terminals or on the ferries without having been granted a permit by the Commissioner. No person shall distribute such items by leaving them unattended in the terminals or on the ferries.

(i) **Sale of merchandise, solicitation of trade, entertainment or solicitation of contributions.**

(1) No person, unless duly authorized by the Commissioner shall, in or upon any area, platform, stairway, waiting room, appurtenance, or any other area of the terminals or ferries,

(i) sell or offer for sale any article of merchandise, or

(ii) solicit any business, service or trade, including the carrying of baggage for hire or the shining of shoes.

(2) No person shall engage in (i) the entertainment of persons by singing, dancing or playing any musical instrument or (ii) the solicitation of contributions in the terminals or on the ferries without having been granted a permit by the Commissioner.

(j) **Assemblies, meetings, exhibitions.**

(1) No person shall hold or sponsor any assembly, meeting, exhibition or other event without written approval from the Commissioner or his/her designee. A gathering of 10 or more people shall constitute an assembly or meeting.

(2) No person shall erect any structure, stand, booth, platform or exhibit in connection with any assembly, meeting, exhibition or other event without written approval from the Commissioner or his/her designee.

(k) **Refuse to be deposited in appropriate receptacles.** No person shall throw, discharge or deposit trash, garbage, waste, oil or other petroleum products or any other waste material into the harbor or into or upon any portion of the terminals or ferries except by depositing such material in receptacles provided therefor. The placement of all such receptacles shall be subject to the approval of the Manager. No person shall remove refuse or other material from such receptacles except as authorized by the Manager.

(l) **Animals barred.** No person, except a police officer or another person authorized by the Manager, shall enter the terminals or ferries with any animal except a service animal or an animal properly restrained for transport subject to the discretion of the Manager. No person shall feed any animal, including unconfined squirrels and birds, within the terminals or on any ferry.

(m) **Passage through boarding doors restricted.** No person shall pass through the boarding doors to the ferries except:

(1) persons employed by or doing business with a concessionaire whose duties require such passage;

(2) authorized representatives of the Department of Transportation;

(3) persons having permission;

(4) police officers;

(5) firefighters and emergency medical technicians employed by the New York City Fire Department; and

(6) passengers immediately prior to boarding a ferry or immediately after leaving a ferry.

(n) **Photography or filming.**

(1) For purposes of this subdivision, "photography or filming" shall include the taking of photographs; the making of motion pictures; the use and operation of television cameras, transmitting television equipment, or radio remotes; or load-ins or load-outs supporting indoor performances.

(2) A permit from the Mayor's Office of Film, Theatre and Broadcasting (MOFTB) and a separate permit from the Commissioner are both required in circumstances under which a permit from MOFTB is required by its rules.

(3) As is the case with photography or filming on City streets, sidewalks or other pedestrian passageways, a permit is not required in those instances where a handheld device (with or without a tripod) is used, except when the use of such handheld device (with or without a tripod) unreasonably interferes with the use of the ferry terminal or ferry. For purposes of this subdivision, "unreasonable interference" means the assertion of exclusive use by any means, including physical or verbal, of an area that consists of a radius greater than five feet from where the individual engaged in photography or filming is located. Where such exclusive use is asserted, the individual engaged in photography or filming shall obtain a permit from the Commissioner.

(4) For purposes of this subdivision, standing in a ferry terminal or on a ferry while using a handheld device (with or without a tripod) and not otherwise asserting exclusive use by any means, including physical or verbal, of an area that consists of a radius greater than five feet from where the individual engaged in photography or filming is located, is not activity that requires a permit from MOFTB or the Commissioner.

(o) **Fire.** No person shall cook, light a fire or otherwise create a fire in any part of the terminals or ferries, except as authorized by the Commissioner.

(p) **Alcoholic beverages.** No person shall drink or carry any open alcoholic beverage in any part of the terminals, except on the premises of a concession or retail establishment duly licensed for the sale of alcoholic beverages if permitted therein by the concessionaire or leasee. Alcoholic beverages may be purchased and consumed from the concessionaire aboard a ferry in accordance with all federal, state and local laws and rules. It shall be a violation of these rules for any person to enter and/or remain in the terminals and/or aboard a ferry under the influence of alcohol, to the degree that he or she may endanger himself or herself, other persons or property, or unreasonably annoy persons in his or her vicinity.

(q) **Carrying of firearms or other weapons.** No person, shall, without the permission of the Manager, bring into or carry in the terminals or on the ferries any firearms or other weapons; provided, however, that this subdivision shall not apply to police officers and other persons authorized by federal, state or local law to carry firearms or other weapons.

(r) **Permission required to bring into or carry explosives, acids, inflammables, compressed gases, etc.** No person shall bring into or carry in the terminals or on the ferries any explosives, acids, inflammables, compressed gases or articles or materials having or capable of producing strong offensive odor, or articles or materials likely to endanger persons or property, except with permission of the Chief Operating Officer or the Executive Director of Safety and Security. No person shall bring or cause to be brought into or kept in the terminals any signal flare or any container filled with or which has been emptied or partially emptied of oil, gas, petroleum products, paint or varnish, except with permission of the Chief Operating Officer or the Executive Director of Safety and Security. Bringing into the terminals or on the ferries without special permission gasoline or other motor fuel contained in tanks permanently attached to vehicles and not under pressure shall not be an infraction of this regulation.

(s) **Unauthorized interference with or use of terminal or ferry systems or equipment prohibited.** No person shall do or permit to be done anything which may interfere with the effectiveness or accessibility of any means of escape, the fire protection system, sprinkler system, drainage system, alarm system, telephone system, public announcement and intercommunication system, plumbing system, air-conditioning system, ventilation system, fire hydrants, hoses, fire extinguishers, or other mechanical system, facility or equipment installed or located in the terminals or on the ferries; including closed circuit television cameras and monitors, signs and notices; nor shall any person operate, adjust or otherwise handle or manipulate, without permission, any of the aforesaid systems or portions thereof, or any machinery, equipment or other devices installed or located at the terminals or on the ferries. Tags showing date of last inspection attached to units of fire extinguishing equipment shall not be removed therefrom nor shall any person plug a television, radio or other electrical device into any outlet or connect any device to any utility at or in the terminals or on the ferries.

(t) **Storage.** Storage of materials or possessions of any kind either on the ferries or in the ferry terminals is strictly prohibited at all times. Any materials or possessions stored on the ferries or ferry terminals will be disposed of promptly. This provision shall not apply to any authorized storage by a lessee, concessionaire or contractor pursuant to an agreement with the Department.

(u) **No sound reproduction devices.** Except with prior permission of the Commissioner, no person shall operate or use any sound reproduction device in the terminals or on the ferries, other than a personal audio device with personal earphones such that sound from such earphones is not plainly audible to another individual at a distance of five feet or more from the source.

(v) **Use of lighting or sound reproduction equipment.** No person shall without specific authorization from the Commissioner operate or use or cause to be operated or used any lighting or sound reproduction device for commercial or business advertising purposes or for the purpose of attracting attention to any performance, show, sale or display of merchandise, or any business enterprise, in front or outside of any building, place or premises in the terminals or on the ferries.

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-01 Definitions.

Administrative Code. The term "Administrative Code" means the Administrative Code of the City of New York.

Block Segment. The term "Block Segment" means the linear stretch of the street between the curblines of the cross streets that intersect such block.

Commissioner. The term "Commissioner" means the Commissioner of the Department of Transportation or his or her authorized designee.

Corrective action request or CAR. The term "corrective action request" or "CAR" means a formal notice by the Department that work performed and/or a condition created or maintained on a street is in violation of these rules or other applicable law with a request that action be taken by the person to whom such notice is addressed to correct the work and/or the condition so described.

Department. The term "Department" means the Department of Transportation.

Designated field headquarters. The term "designated field headquarters" means an office maintained at the work site, unless some other location is approved by the Department.

Embargo period. The term "embargo period" means a period of time designated by the OCMC during which there shall be a temporary suspension of work (except for emergency work) due to a holiday, special event or emergency.

Emergency. The term "emergency" means a situation endangering the public safety or causing or likely to cause

the imminent interruption of service required by law, contract or franchise to be continuously maintained.

Emergency work. The term "emergency work" means work necessary to correct a situation endangering the public safety or causing or likely to cause the imminent interruption of service required by law, contract or franchise to be continuously maintained, for example, by a government agency, a public utility, a franchisee, etc. Such term shall not include work on new construction, regrades of existing hardware, continuation of an existing permit that has expired or will expire imminently or any other work which is not necessary to correct a condition likely to cause such imminent interruption.

Intersection. The term "Intersection" means the area contained within the grid created by extending the curblines of two or more streets at the point at which they cross each other.

OCMC. The term "OCMC" means the Office of Construction Mitigation and Coordination, a unit within the Department which is responsible for providing traffic stipulations and coordinating construction activity on City streets.

Protected street. The term "protected street" means a street which has been resurfaced or reconstructed within five years prior to the date of application for a permit.

Roadway. The term "roadway" means that portion of a street designed, improved or ordinarily used for vehicular travel, exclusive of the shoulder and slope.

Sidewalk. The term "sidewalk" means that portion of a street between the curb lines, or the lateral lines of a roadway, and the adjacent property lines, intended for the use of pedestrians.

Specifications. The term "specifications" means the standard specifications available from the Department indicating required construction materials.

Standards. The term "standards" means the standard details of construction, available from the Department, which contains drawings showing required dimensions of items to be constructed.

Street. The term "street" means a public street, avenue, road, alley, lane, highway, boulevard, concourse, parkway, driveway, culvert, sidewalk, crosswalk, boardwalk, viaduct, square or place, except marginal streets.

Embargo period amended City Record Feb. 25, 2000 §1, eff. Mar. 26, 2000.

Intersection added City Record May 7, 2001 §1, eff. June 6, 2001.

OCMC redesignated and amended (formerly MTCCC) City Record Feb. 25, 2000 §1, eff. Mar. 26,

2000. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Feb. 25, 2000:

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and

highways in the City pursuant to §2903 of the New York City Charter and Title 19 of the New York City Administrative Code.

Recently the Department changed the name of the unit known as the Mayor's Traffic and Construction Coordinating Council (MTCCC) to the Office of Construction Mitigation and Coordination (OCMC). Various sections are being revised to reflect this change.

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers

to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 2-02

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-02 Permits.

(a) **Initial permit application.** The following information shall be provided to the Department upon initial application for a permit under these rules and shall be updated as necessary and refiled annually:

(1) **If the applicant is a corporation:**

(i) address and telephone number of applicant;

(ii) name and telephone number of a contact person in the event of an emergency;

(iii) affidavit acknowledging incorporation and a certified copy of the certificate of incorporation, and proof of registration with the New York State Department of State, Office of the Secretary of State. When completing the permit application, applicants must supply the Department with the identical identifying information, including but not limited to the company name, as they have provided to the New York State Department of State, Office of the Secretary of State;

(iv) names of corporate officers;

(v) names of two agents/employees designated to receive summonses or notices of violation or other notices required by these rules or other provisions of law;

(vi) New York City plumber's license certificate or other license numbers, if applicable;

(vii) name(s) of representative(s) authorized to obtain permit(s) on behalf of the applicant;

(viii) employer identification number;

(ix) e-mail address, if any.

(2) **All other applicants:**

(i) address and telephone number of applicant;

(ii) name(s) of representative(s) authorized to obtain permit(s) on behalf of the applicant;

(iii) New York City plumber's license certificate or other license numbers, if applicable;

(iv) employer identification number;

(v) e-mail address, if any.

(3) **Insurance and indemnification requirements (for all applicants):**

(i) Each applicant shall, before applying for a permit, obtain a Commercial General Liability (CGL) insurance policy or policies satisfying the requirements of this subparagraph. All CGL insurance policies, whether primary, excess or umbrella, shall:

(A) be issued by a company or companies that may lawfully issue the required policy and has an A.M. Best rating of at least A-VII or a Standard and Poor's rating of at least AA.

(B) provide coverage to protect the City of New York ("City") and the applicant from claims for property damage and/or bodily injury, including death, which may arise from any operations performed by or on behalf of the applicant for which the Department has issued it a permit;

(C) provide coverage at least as broad as that provided by the most recent edition of ISO Form CG 0001;

(D) provide coverage for completed operations;

(E) provide coverage of at least $1,000,000 combined single limit per occurrence, except that with respect to applications for permits to place a crane on a street, such minimum amount shall be no less than $3,000,000 combined single limit per occurrence;

(F) provide that the City and its officials and employees are Additional Insureds with coverage at least as broad as set forth in ISO Form CG 2026 (11/85 ed.);

(G) provide that the limit of coverage applicable to the Named Insured is equally applicable to the City as Additional Insured.

(H) This policy shall not be cancelled or terminated, or modified or changed in a way that affects the City by the issuing insurance company unless thirty (30) days prior written notice is sent to the Named Insured and the Commissioner of the New York City Department of Transportation, except that notice of termination for non-payment may be made on only ten (10) days written notice.

(I) If the permit applicant has applied for more than one thousand permits in the previous calendar year, the insurance policy shall contain each of the following endorsements;

(1) If and insofar as knowledge of an "occurrence", "claim", or "suit" is relevant to the City as Additional Insured

under this policy, such knowledge by an agent, servant, official or employee of the City of New York will not be considered knowledge on the part of the City of the "occurrence", "claim", or "suit" unless notice thereof is received by the: Insurance Claims Specialist, Affirmative Litigation Division, New York City Law Department; and

(2) Any notice, demand or other writing by or on behalf of the Named Insured to the insurance company shall also be deemed to be a notice, demand or other writing on behalf of the City as Additional Insured. Any response by the Insurance Company to such notice, demand or other writing shall be addressed to the Named Insured and to the City at the following address: Insurance Claims Specialist, Affirmative Litigation Division, New York City Law Department, 100 Church Street, New York, New York 10007.

(ii) Each applicant shall, before applying for a permit, obtain Workers Compensation insurance in accordance with the laws of the State of New York from a licensed insurance company.

(iii) Each applicant shall, before applying for a permit, file with the Department proof that the applicant has insurance in place that provides coverage set forth in this subdivision with respect to the permit period. If the applicant chooses to meet this proof with an insurance certificate, the insurance certificate shall set forth the coverage provided, state that completed operations coverage is included and that the City is an additional insured, and shall be accompanied by a sworn statement in a form prescribed by the Department from the insurer or from a licensed insurance broker certifying that the insurance certificate is accurate in all material respects, and that the described insurance is in effect.

(iv) An applicant may obtain insurance policies applicable to more than one permit application, in which case the proof pursuant to subparagraph (iii) shall state that the policies cover all such permits in specified boroughs, or throughout the City.

(v) The applicant shall provide a copy of any required policy within thirty days of a request for such policy by the Department or the New York City Law Department.

(vi) In its sole discretion, the Department may allow applicants that frequently seek permits to self-insure, provided that the applicant:

(A) presents proof of excess or umbrella CGL coverage applicable to its operations under such permits;

(B) certifies that it has a self-insurance program in place that satisfies the requirements contained in subparagraph (i) and will continue it for the life of the permit and the Guarantee Period, as defined in subparagraph (ii) of paragraph (16) of subdivision (e) of §2-11 of these rules;

(C) agrees to provide the same defense of any suit against the City that alleges facts that bring the suit within the scope of the coverage required in subparagraph (i) as an insurer would be obligated to provide under the laws of New York;

(D) submits a statement, signed by a person authorized to bind the applicant and acknowledged by a notary public, in which the applicant agrees to assume full liability for satisfying all obligations set forth in this subparagraph (vi), and

(E) provides the Department with the name and address of the office or official of its self-insurance program who is responsible for satisfying the self insurance obligations.

(vii) The permittee shall maintain insurance throughout the Guarantee Period, as defined in subparagraph (ii) of paragraph (16) of subdivision (e) of §2-11 of these rules, satisfying the requirements in subparagraph (i) of this paragraph and providing coverage to protect the City, the Department and the applicant from all claims for property damage and/or bodily injury, including death, which may arise from any defects discovered during such Guarantee Period.

(viii) The permittee shall notify in writing the CGL insurance carrier, and, where applicable, the worker's compensation and/or other insurance carrier, of any loss, damage, injury, or accident, and any claim or suit arising from any operations performed by or on behalf of the permittee for which the Department has issued it a permit, immediately, but not later than 20 days after such event. The permittee's notice to the CGL insurance carrier must expressly specify that "this notice is being given on behalf of the City of New York as Additional Insured as well as the Named Insured." The permittee's notice to the insurance carrier shall contain the following information: the name of the permittee, the number of the permittee, the date of the occurrence, the location (street address and borough) of the occurrence, and the identity of the persons or things injured, damaged or lost.

(ix) The permittee shall indemnify, defend and hold the City and its officials and employees harmless against any and all claims, liens, demands, judgments, penalties, fines, liabilities, settlements, damages, costs and expenses of whatever kind or nature (including, without limitation, attorneys' fees and disbursements), known or unknown, contingent or otherwise, allegedly arising out of or in any way related to the operations of the permittee and/or its failure to comply with any of the requirements set forth herein or law. Insofar as the facts and law relating to any claim would preclude the City and its officials and employees from being completely indemnified by the permittee, the City and its officials and employees shall be partially indemnified by the permittee to the fullest extent provided by law.

(x) A failure by the City of New York or the Department to enforce any of the foregoing requirements shall not constitute a waiver of such requirement or any other requirement.

(4) **Permit bonds.**

(i) A permit bond shall be submitted by all permittees to the permit office at the time of permit issuance to cover all costs and expenses that may be incurred by the City as a result of the activity for which the permit is issued or for the purpose of otherwise safeguarding the interests of the City. The permit bond shall be in the form prescribed by the Department. Such permit bonds described above shall cover all permitted activities described herein.

(ii) For a permit bond submitted for the purpose of performing street openings and excavations pursuant to §2-11 of these rules, such permit bond shall be submitted in the amount of $10,000.00 for a single location within the City of New York per calendar year, $25,000.00 for two to fifty locations within the City of New York per calendar year, and $50,000.00 for fifty-one to one hundred locations within the City of New York per calendar year. Permittees who are issued permits for more than one hundred locations per calendar year shall submit a permit bond in the amount of $100,000.00.

(iii) Bonds shall be valid through the permit's guarantee period as set forth in these rules.

(iv) The issuer of the bond shall give the Department at least 30 days written notice prior to expiration or cancellation of such bond.

(v) A receipt demonstrating full payment of the bond shall be filed with the Department.

(vi) A separate bond need not be filed for each location, provided such coverage is in force for all operations in the entire borough, City or state.

(vii) A notice of continuation of certificate shall be received every calendar year for the continuation of an existing bond.

(viii) Effective July 1, 2008, for a permit bond submitted pursuant to subparagraph (ii) above, such permit bond shall be submitted in the amount of $10,000.00 for a single location within the City of New York per calendar year, $50,000.00 for two to fifty locations within the City of New York per calendar year, and $100,000.00 for fifty-one to one hundred locations within the City of New York per calendar year. Effective July 1, 2008, permittees who are issued permits for more than one hundred locations per calendar year shall submit a permit bond in the amount of $250,000.00.

(ix) For permits with the exception of those set forth in subparagraph (ii) above and sidewalk construction permits issued pursuant to §2-09 of these rules, a permit bond shall be submitted in the amount of $5,000 for a single location within the City of New York per calendar year or in the amount of $25,000 for multiple locations within the City of New York per calendar year. In the event that a permittee will also secure street opening and excavation permits within the City of New York during the same calendar year, the permittee's compliance with subparagraph (ii), or effective July 1, 2008 with subparagraph (iii), above shall be sufficient to demonstrate compliance with this section.

(5) **Deposits.**

(i) A deposit of $5,000.00, in the form of money order or certified check, shall be required from permittees when outstanding balances for permit fees, backcharge fees, corrective action requests (CARs) or other charges exceed $3,000.00 for a period longer than forty-five (45) calendar days.

(ii) Such permittees shall maintain a deposit balance of $5,000.00 at all times until the deposit is refunded pursuant to subparagraph (iv), below. If the balance of such cash deposit falls below $5,000.00, all review of permit applications and permit issuance may cease, except in cases of emergency work.

(iii) Any amounts owed by permittees for permit fees, CAR fees, backcharge fees or other charges payable pursuant to law for a period longer than forty-five (45) calendar days shall be deducted from the deposit after notice to the permittee.

(iv) Deposits shall be refunded after one year (365 consecutive calendar days) of full compliance with all applicable laws, rules and specifications.

(b) **General conditions for all permits.** (1) Permit applications for the following work shall be reviewed by OCMC prior to the issuance of permits:

(i) work to be performed for sewer and water system construction;

(ii) work to be performed in Manhattan;

(iii) work required on primary and secondary arteries;

(iv) permits to close streets;

(v) permits for placement of commercial refuse containers in Manhattan;

(vi) any other activity deemed necessary by the Commissioner.

(2) **Permits for emergency work.** Permits for emergency work shall be issued in accordance with §2-11 of these rules.

(3) Before issuing a permit the Department may demand that permittee show proof of required approvals from other governmental entities.

(4) **Street closings lasting more than 180 days.** Permits that will result in a publicly mapped street being fully closed for more than 180 consecutive calendar days shall be issued in accordance with all the requirements of §2-16 of these rules.

(c) **Display of permits and signs at work site.** (1) Unless otherwise authorized, permits shall be kept at the work site or designated field headquarters at all times and shall be made available for inspection upon request of any police officer or any authorized employee of the Departments of Environmental Protection, Buildings, Police and Transportation or any other City employees specifically authorized by the Commissioner to enforce these rules.

(2) Permittees shall display signs at the work site or at 100 foot intervals along a series of excavations or continuous cut indicating the name of the permittee conducting the work, the name of the entity for whom the work is being conducted and, if applicable, the name(s) of the subcontractor(s). Such signs shall include:

(i) permittee's telephone number for complaints;

(ii) contractor's telephone number, if not the permittee;

(iii) the permit number;

(iv) the purpose of the street opening; and

(v) the start and scheduled completion dates of the work.

(3) Signs shall be conspicuously displayed and shall face the nearest curb line. Such signs shall be clear, readable and in letters at least $1^1/_2$ inches in height and shall conform to the Department's specifications.

(4) Permittees will be required to post Project Informational Signs for any project with a projected completion time of three months or more, or as otherwise directed by the Commissioner. Signs shall be kept in readable, good condition.

(5) Sign size, content and graphics will conform to "Project Information Sign" specifications which is available at the Department Permit Offices and also on the Department website. Sign content shall include the following:

(i) the name of the street on which the work is being performed;

(ii) the nature of the work (i.e., major reconstruction project, sewer work, new building, water shaft, or transit work major utility installation);

(iii) a brief description of the work. For building operations, permittees must include: type of work (i.e. new building, major renovation), building use (commercial or residential), size. For street/roadway work information permittees must include: the type of work being performed (i.e. upgrade of water supply, new transit station or transit line, upgrade of existing transit station or transit line, and upgrade of sewer system), roadway reconstruction with added amenities, and the quality of life benefits resulting from project;

(iv) the scheduled completion date of the project;

(v) project name, or if a governmental project, the project identification number;

(vi) contact information for the construction company performing the work, and a telephone number and/or a web site for more information.

(d) **Corrective action request (CAR).** (1) A CAR may be served either personally, by mail and/or by e-mail on the person responsible for the work and/or the condition which requires correction at his or her last known address, e-mail address or at the address or e-mail address for such person contained in the records of the Department. Where a CAR is served for a violation of §19-147 of the Administrative Code, in the case of a utility company, the CAR may be given orally or in writing to a person or at a place designated by the utility and the utility shall respond within twenty-four (24) hours.

(2) Any corrective action required by the CAR shall be performed within thirty (30) days of the issuance of the CAR unless such issuance is protested as provided herein.

(3) Within fourteen (14) days after the date of mailing of the CAR, unless a different time is specified on the CAR or in these rules, the respondent may protest the issuance of the CAR in the manner directed on the CAR.

(4) Protests shall be reviewed by the Department and a final determination regarding the protest shall be made within a reasonable period of time.

(5) If a protest is denied, any corrective action required by the CAR shall be performed within thirty (30) days after the date of such denial.

(6) In the event that the original permit has expired before the corrective action is undertaken and an additional excavation is necessary, a new permit shall be obtained in order to complete the required work. The new permit shall not affect the guarantee period, which will relate back to the original permit. If a permittee is performing restoration work that does not entail an additional excavation or re-grading of hardware, a new permit shall not be required by the Department.

(7) Where a CAR relates to a violation of §19-147 of the Administrative Code and no corrective action is taken within the applicable time or where an imminent danger to life or safety exists, the Department may perform the work required by a CAR or the work necessary to avert the danger and charge the cost to the person responsible for restoring, replacing or maintaining the pavement, sidewalk, curb, gutter or street hardware in accordance with such section.

(8) Notwithstanding the above, where a condition exists that creates an imminent danger to pedestrians or vehicles, the Department may issue a priority CAR, which shall require corrective action to be taken within three (3) hours of issuance of the CAR by telephone call. The Department may also issue a priority CAR via email requiring corrective action to be taken within three (3) hours of issuance; however, should a priority CAR be issued via email, a follow-up telephone call must also be placed to the permittee.

(9) In the event that a CAR is issued within the guarantee period, the corrective action shall still be taken even after the expiration of the guarantee period.

(e) **Orders.** (1) Except as otherwise provided by these rules or other applicable law, any orders issued by the Commissioner may be served personally or by mail addressed to the last known address of the person to whom the order is directed or to the address for such person set forth in the records of the Department or by delivery or mailing to a person or a location designated by the person to whom the order is directed.

(2) Except as otherwise provided by these rules, a person to whom an order is directed shall have an opportunity to be heard within five business days after a timely request for such opportunity is received by the Department. A request shall be made within the time and in the manner directed on the order. If, after considering the written objections of the respondent, the Commissioner affirms the order, the work required by the order shall be completed within 30 days after notice of such determination is mailed to the respondent.

(3) Notwithstanding the foregoing provisions, an order to cease and desist may be given orally or in writing to the persons executing the work and shall require immediate compliance therewith.

(4) In accordance with §19-151 of the Administrative Code where a respondent fails to comply with an order issued by the Commissioner, including an order to cease and desist, within the applicable time, the Commissioner may execute the work required to be executed in such order. All costs and expenses of the City for such work may be recovered from the persons who are found to be liable for the violation.

(5) In addition, failure to comply with an order issued by the Commissioner may result in criminal or civil penalties in accordance with §19-149 or 19-150 of the Administrative Code.

(f) **Fees.** (1) The fees for permits and CARs are specified in §2-03 of these rules.

(2) Permits shall be valid for fifteen calendar days, unless otherwise specified on the permit. Permits may be extended for 14 days upon presentation of proof that circumstances beyond the permittee's control caused a delay in the

work and payment of an additional fee. In the event a permittee fails to complete the work within the time period specified in the permit, another permit may be issued for a period of time to be specified by the Commissioner. There shall be a separate permit fee for each such additional permit.

(3) Payment of all fees shall be received upon application for the permit or, where applicable, no later than thirty calendar days after the billing date.

(g) **Notice of street operations.** (1) Permittees and owners of underground facilities shall comply with state Industrial Code Rule No. 53 relating to Construction, Excavation and Demolition Operations at or Near Underground Facilities.

(2) Permittees shall notify the Police Department and the communications center of the Fire Department of all construction activities requiring street closing at least twenty-four hours in advance of the commencement of non-emergency work.

(3) In the event that any non-emergency construction work results in the closing of

(i) more than two-thirds (2/3) of the moving lanes per direction on any street for more than 15 minutes per hour between the hours of 1 a.m. and 5 a.m., or

(ii) half (50%) or more of the moving lanes per direction on any street or limited access roadway, for a duration of more than four minutes or two traffic light cycles of the nearest traffic signal, whichever is less, during all other hours,

the permittee shall post at the site of the closing a public notification seven (7) calendar days prior to such closing in a manner directed by OCMC.

(h) **Work site safety.** All obstructions on the street shall be protected by barricades, fencing, railing with flags, lights, and/or signs, placed at proper intervals and at prescribed hours in accordance with the New York State or Federal Manual on Uniform Traffic Control Devices. During twilight hours the flags shall be replaced with amber lights. Permittees shall also comply with any additional work site safety requirements set forth in these rules or in the permit.

(i) **Waivers.** (1) Except where expressly prohibited by law, the Commissioner may, in his/her discretion, waive or modify these rules, in the interests of public safety and convenience.

(2) Requests for waivers shall be submitted in writing to the Commissioner.

(j) **Suspension of application review.** The Commissioner may suspend review of applications for permits pending:

(1) payment by an applicant of outstanding fines, civil penalties or judgments imposed or entered against such applicant by a court or the environmental control board,

(2) payment by an applicant of outstanding fees or other charges lawfully assessed by the Commissioner against such applicant pursuant to these rules or other applicable law and/or

(3) satisfactory compliance by an applicant with a CAR or order issued by the Commissioner.

(k) **Permit revocation and refusal to renew permit.** (1) The Commissioner may, after giving the permittee notice and an opportunity to be heard, revoke or refuse to renew a permit:

(i) for failure to comply with the terms or conditions of such permit, these rules or other applicable law in carrying out the activity for which the permit was issued;

(ii) whenever there has been any false statement or any misrepresentation as to a material fact in the application or accompanying papers upon which the issuance of the permit was based; or

(iii) whenever a permit has been issued in error and the conditions are such that the permit should not have been issued.

(2) Prior to taking any of the actions listed in paragraph (1) above, the Commissioner shall give the permittee an opportunity to be heard upon not less than two days notice.

(3) Notwithstanding any inconsistent provision of paragraph (2) above, if the Commissioner determines that an imminent peril to life or property exists, the Commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to such revocation. Upon request of the permittee, the Commissioner shall afford the permittee an opportunity to present his or her objections to such action within five days after such request is received by the Department.

(l) **Refusal to issue permit.** The Commissioner may refuse to issue a permit to an applicant:

(1) who has exhibited a pattern of disregard for the rules or orders of the Department or the terms or conditions of permits issued by the Department or for other applicable law,

(2) who has been found liable by a court or in a proceeding before the environmental control board of a violation of a rule or order of the Department or the terms or conditions of a permit issued by the Department or other applicable law, which violation caused an imminent peril to life or property.

(m) **Embargo periods.** (1) All routine work shall be suspended during an embargo period unless approval for the work is granted by OCMC. Such suspension shall not apply to emergency work, for which an emergency number shall be obtained by the permittee pursuant to the provisions of §2-11 of these rules. Information regarding embargo periods is on file at each borough permit office and is available upon request. It is the responsibility of each permittee to obtain such information prior to the commencement of any work. It shall be a violation of these rules to do any work on the street during an embargo period without the prior approval of OCMC or an emergency number.

(2) A request for approval to work during an embargo shall be submitted on a form provided by the Commissioner, along with a fee as specified in §2-03 of these rules. Payment of the application fee shall not guarantee that approval to work during the embargo period will be granted and application fee is in addition to any required permit fees.

(n) **Voiding and reissuing of permits.** Permits may be voided and reissued only within three business days of issuance. See §2-03 for the fee for reissuance. Permits reissued after three business days shall be subject to the full permit fee.

Subd. (m) amended City Record Feb. 25, 2000 §3, eff. Mar. 26, 2000.

DERIVATION

Section 2-02 was derived from former §§2-28 and 2-29 from original publication July 1, 1991.

NOTE

1. Statement of Basis and Purpose in City Record Mar. 3, 2003:

The Commissioner of the Department of Transportation is authorized to regulate work taking place on City streets and sidewalks pursuant to section 2903 of the New York City Charter and Title 19 of the New York City Administrative Code.

Subparagraph (i) of paragraph (3) of subdivision (a) of section 2-02 is being amended to add a requirement that a copy of the insurance certificate be submitted along with the original for record keeping purposes.

2. Statement of Basis and Purpose in City Record May 7, 2001: Section 2-02 of the Highway Rules is being amended to allow the Agency to better regulate the issuance of permits. The proposed rule allows the Department to demand that permittees show proof of required approvals from other governmental entities as a condition for issuing a Departmental permit. This revision should heighten public safety by allowing the Department to insure that permittees secure approval from other governmental entities as required.

3. Statement of Basis and Purpose in City Record Dec. 23, 2005: The Commissioner of the Department of Transportation is authorized to regulate work taking place on City streets and sidewalks pursuant to §2903 of the New York City Charter and Title 19 of the New York City Administrative Code. Paragraph (3) of subdivision (a) of §2-02 is being amended to clarify the insurance and indemnification requirements for our permit applicants and also to enhance the protection to the City. Permit applicants may now use a standard ISO form which contains the coverage required by the Department and permit applicants may now use out-of-state insurers. The requirements are also more in-line with insurance requirements from other City agencies. Additionally, the amendment provides a procedure for applicants with self-insured programs.

4. Statement of Basis and Purpose in City Record Feb. 8, 2007: The Commissioner of the Department of Transportation is authorized to regulate work taking place on City streets and sidewalks pursuant to §2903 of the New York City Charter and Title 19 of the New York City Administrative Code. Subparagraphs (i) and (ii) of paragraph (4) of subdivision (a) of §2-02 are being amended to ensure that the City's possible exposure as a result of a permittee's activities is sufficiently covered. The current permit bonds required in the rule are insufficient to cover the City's costs and expenses in the event that a permittee fails to meet its obligations under the permit. This amendment is being promulgated to coincide with some of the permit bond revisions recommended by the City of New York's consultants during a value engineering exercise. The changes in the permit bond will assist in greater quality assurance from the permittee. In addition, this amendment is required to ensure that the permittee utilizes the permit bond required by the Department. The Department has made several amendments to the rule as a result of both written and oral comments received pursuant to the publication on October 19, 2006 of the Notice of Opportunity to Comment on proposed rulemaking. In response to comments that the originally proposed increases to the required bond amounts may cause a hardship to smaller companies applying for permits, the Department has revised the required amounts of the permit bonds by adding two additional threshold categories. The Department will now require a $50,000 bond for contractors securing two to fifty permits per calendar year. Contractors who take out fifty-one to one hundred permits per calendar year must obtain a bond in the amount of $100,000. The Department has elected to maintain the current requirement that bond issuers must provide the Department with thirty days of written notice prior to the cancellation or expiration of the bond, as opposed to sixty days. Finally, the Department will maintain the current guarantee periods for protected and non-protected streets. Thus, the guarantee period for protected streets shall remain five years, while the period for non-protected streets shall remain three years.

5. Statement of Basis and Purpose in City Record June 7, 2007: The Commissioner of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and Title 19 of the New York City Administrative Code. These rules are being amended to achieve several purposes: to enhance and clarify existing rules; to enhance vehicular and pedestrian safety, and to provide methods of enforcement for the rules. Finally, these amendments will better protect the City's investment in the roadways throughout the five boroughs. Subdivision (a) of §2-02 is being amended to add that an applicant must supply an e-mail address, if available, in order to facilitate Department contact with permittees. Subdivision (a) is also being amended to require permittees to submit proof of registration with the New York State Secretary of State to the Department, to ensure that permittees file the identical information provided to the Secretary of State on all permit applications submitted to the Department, and to ensure that permittees provide the Department with consistent and correct identifying information. Subdivision (c) of §2-02 is being amended to require permittees to place informational signs at the site of construction projects lasting in excess of three months, in order to give the public vital information regarding ongoing construction. Subdivision (d) of §2-02 is being amended to add e-mail as a method of serving corrective action requests. Subdivision (d) is also being amended to clarify that corrective action must be performed within 30 days of the issuance of the CAR, unless protested, and to create a category of priority CAR for conditions that create an imminent danger. Subdivision (d) is also being amended to provide that corrective action must still be taken after the guarantee period on a particular roadway expires. Subdivision (m) of §2-02 is being amended to provide for a procedure and a fee for an application to work during an embargo period. The procedure and fees are designed to ensure that work during an embargo period is indeed necessary, and prevents the expenditure of Department time and resources to evaluate applications for work that is not critical. Such work could already be approved by the Department under the current rules. Section 2-03 is being

amended to add a fee for an application for work during an embargo and one for installing or changing markings, signs and supports during construction, in order to provide the public with an updated, current schedule of fees. Subdivision (h) of §2-04 is being amended in order to be consistent with recent changes to insurance requirements for all permits contained in §2-02(3). Subdivision (d) of §2-05 is being amended to delete an exemption for permittees storing material with a street opening permit, because such storage is covered under §2-11. Paragraph (2) of subdivision (d) of §2-05 is being amended to add requirements that specifically detail the necessary planking, skids, and/or plating required when placing a container upon the roadway, and to identify who is responsible for placement of necessary planking, skids and/or plating for protection of the roadway. Paragraph (2) of subdivision (d) is also being amended to state that the protective covering placed underneath a container cannot exceed the perimeter of the container. Paragraph (1) of subdivision (a) of §2-07 is being amended to add a requirement that entities who put out tool carts must have their name, address and telephone number on the cart to facilitate the Department's identification of permittees. Subdivision (b) of §2-09 is being amended to correct a typographical error. Subdivision (f) of §2-09 is being amended in order to be consistent with recent changes to insurance requirements for all permits contained in §2-02(3). Subdivision (f) of §2-09 is also being amended to allow for the use of approved volumetric mixers for concrete for sidewalks. The use of these mixers has become increasingly common in this kind of work. Paragraph (1) of subdivision (d) of §2-11 is being amended to add a requirement that the Division of Bridges be informed and approve of proposed work within 100 feet of a bridge in order to ensure that the applicant arranges the work so as to avoid damaging the bridge or is given appropriate specifications to restore the structure. Subdivision (d) of §2-11 is also being amended by adding a new paragraph (3) to require submission of a protected street determination form for approval prior to obtaining permits if curb to curb restoration will be performed on over 50% of a street segment. The form will be used to allow the Department to regulate future street openings on those streets more effectively. Subparagraph (i) of paragraph (8) of subdivision (e) of §2-11 is being amended to allow asphalt millings to be used as backfill material in order to conform to Local Law 45 of 2003, which allows for such use. Subparagraph (vi) of paragraph (8) of subdivision (e) of §2-11 is being amended to ensure that the rule will apply during the life of the guarantee period. Temporary restoration applied only during the life of the permit, and did not apply after the expiration of the permit and during the life of the guarantee period. This will ensure that restoration requirements are imposed upon permittees during the guarantee period. Subparagraph (ii) of paragraph (10) of subdivision (e) of §2-11 is being amended to remove vague language stating that a plate must overlap the edges, and to specify the amount of overlap required by the Department for permittees to place steel plates on the streets, so that the street opening is fully covered. Subparagraph (iii) of paragraph (10) of subdivision (e) of §2-11 is being amended to include "spiking" and "pinning" as methods of securing steel plates in order to prevent the plates from shifting, and to specify the required filling method for any holes resulting from spiking and pinning. Subparagraph (v) of paragraph (10) of subdivision (e) of §2-11 is being amended to delete an obsolete reference and to specify that adherence to federal manual on uniform traffic control devices is required, in order to create a standard for the size and placement of signs referencing plating and decking. Subparagraph (ii) of paragraph (12) of subdivision (e) of §2-11 is being amended to require that permittees must re-dig any backfill on a non-protected street if the restoration sinks more than two inches during the guarantee period, which will create conformity to similar requirements for a protected street. Subparagraph (iv) of paragraph (12) of subdivision (e) of §2-11 is being amended to delete the reference to machine excavations and to add the language, "after the required cutbacks" to ensure that permittees make proper restoration of street cuts regardless of whether the opening was excavated via machine or other means. Subparagraph (v) of paragraph (12) of subdivision (e) of §2-11 is being deleted in order to clarify that excavations within 3 feet of each other must be repaired integrally, to ensure that permittees properly restore street openings. Subparagraph (x) of paragraph (12) of subdivision (e) of §2-11 is being amended by adding a requirement that a permit be obtained prior to changing or installing any markings, signs or supports during construction and that such signs, markings or supports be removed prior to permit expiration. This is to create a formal process for removing temporary signs and markings and to create a method of enforcement. In addition, the usage of temporary asphalt during the winter months has been clarified. Paragraph (12) of subdivision (e) of §2-11 is also being amended by adding a new subparagraph (xii) that requires permittees to return the protected street determination form required in §2-11(d)(3) to the Department within 24 hours of completing work on a street that is to be protected so that the Department may better regulate future street openings on those streets. Paragraph (14) of subdivision (e) of §2-11 is being amended to clarify the colors and uses of codes and markers used to identify permittees once they leave the work site, to facilitate the

Department's identification and contact of those permittees in the event of problems. Subparagraph (vii) of paragraph (4) of subdivision (f) of §2-11 is being amended to include a requirement that the permanent restoration of a protected street shall be flushed with the surrounding pavement on all sides of the restoration, which will create smoother roadway surfaces. The subparagraph is also being amended in order to clarify that permittees are required to install properly compacted backfill on non-protected streets in the event that a permanent restoration sinks, as is also required on protected streets.

6. Statement of Basis and Purpose in City Record Sept. 14, 2007: The Commissioner of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903(b) of the New York City Charter and Title 19 of the New York City Administrative Code. The rule is being amended to systematically phase in higher bond amounts and to accommodate an orderly transition for the permittees and the surety industry to the bond requirements. DOT intends to reduce the penal amounts for the required permit bonds until July 1, 2008. The Department believes that this bond requirement is commensurate with the risk of potential damage to City streets occasioned by street openings and excavations. This rule is further being amended to allow permittees securing permits for building operations and construction activity (except sidewalk construction) that do not require a street opening to submit a bond to the Department in a lower amount. This distinction recognizes that street openings have the potential to cause greater damage to City streets than most other permitted activities; thus, permittees performing such work must submit a bond that adequately covers this risk. If a permittee performs building operation and construction activity (except sidewalk construction) and additionally must perform a street opening, the Department will require that permittee to submit a bond in the amount required for street openings.

7. Statement of Basis and Purpose in City Record Apr. 1, 2009: The Commissioner of the Department of Transportation is authorized to regulate work taking place on City streets and sidewalks pursuant to §2903 of the New York City Charter and Title 19 of the New York City Administrative Code. Paragraph (3) of subdivision (a) of §2-02 is being amended to set forth an industry standard ISO form which provides a reference for permit applicants and their brokers and insurers as to what would constitute sufficient insurance coverage to cover the liability assumed by the permit applicant when obtaining a permit. This amendment also eliminates the requirement for specific notice endorsements for most permit applicants to reduce burdens that small businesses may face in procuring insurance that includes the specific notice endorsements. In addition, this amendment provides minor corrections and clarifications of the rule relating to insurance requirements.

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular,

rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 2-03

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-03 Schedule of Fees.

All fees shall be paid in accordance with the following fee schedule:

Permit or Activity	Fee	Other Charges	Maximum Duration per Permit	Maximum Distance per Permit	Maximum Width per Permit
Street Opening Permits-General:					
Normal street	$135.00		15 days	300 linear ft.(lin. ft.)	12 feet
Protected street	$135.00	$245.00inspectionfee	15 days	300 lin. ft.	12 feet
Emergency work	$45.00		2 businessdays	300 lin. ft.	12 feet
Specific Types of Street Opening Permits:					
Open sidewalk to install foundation		$135.00	30 days	300 lin. ft.	sidewalk (SW) width
Major installations-electric conduit		$135.00,$380.00protectedstreet	30 days (90 days with OCMC approval.)	300 lin. ft.	12 feet
Major installations-gas		$135.00,$380.00protected	30 days (90 days with OCMC ap-	300 lin. ft.	12 feet

pipe	street	proval.)		
Major installations-steam pipe	$135.00,$380.00protected street	30 days (90 days with OCMC approval.)	300 lin. ft.	12 feet
Major installations-telephone line	$135.00,$380.00protected street	30 days (90 days with OCMC approval.)	300 lin. ft.	12 feet
Transformer vault-in roadway	$135.00,$380.00protected street	15 days to 30 days	300 lin. ft.	variable
Transformer vault-in sidewalk	$135.00	15 days to 30 days	300 lin. ft.	SW width
Installation and/or Removal of poles	$135.00	30 days	2 sw flags	SW width
Major installations-water	$135.00,$380.00protected street	30 days (90 days with OCMC approval.)	300 lin. ft.	12 feet
Major installations-cable	$135.00,$380.00protected street	30 days (90 days with OCMC approval.)	300 lin. ft.	12 feet
Major installations-sewer	$135.00,$380.00protected street	30 days (90 days with OCMC approval.)	300 lin. ft.	12 feet
Rapid transit construct/ alteration	$135.00,$380.00protected street	30 days (90 days with OCMC approval.)	300 lin. ft.	Variable or SW width
Installation of public telephone stanchion	$135.00	30 days	Not Applicable	SW width
Installation of newsstand	$135.00	30 days	As per approved plans	As per approved plans
Repair water connections/ mains	$135.00,$380.00protected street	$10.00 minimum for tunneling and/or jacking. Excess over 1st 10 ft., $1.00 per ft.	15 days to 30 days	300 lin. ft.	12 feet
Repair sewer connections/ main	$135.00,$380.00protected street	15 days to 30 days	300 lin. ft.	12 feet
Repair water and sewer connection/ mains	$135.00,$380.00protected street	15 days to 30 days	300 lin. ft.	12 feet
Install or replace fuel oil line	$135.00	15 days	300 lin. ft.	SW width
Vault construction, alteration, or repair	$135.00	30 days	300 lin. ft.	As per approved plan
Reset, replace, install or repair curb	$135.00	30 days	As required, up to 300 lin. ft.	Not applicable
Pave roadway	$135.00	15 days	300 lin. ft. & as per approved plan	As per approved plan
Tree pit	$135.00	30 days	300 lin. ft.	Variable based on SW width

Construct or alter utility access chamber	$135.00,$380.00protected street	15 days	300 lin. ft.	12 feet
Adjust hardware casting	$135.00	15 days	300 lin. ft.	12 feet
Access to utility chamber in restricted zone during restricted hours	$30.00	Uninterrupted emergency period	300 lin. ft.	12 feet
Repair gas connections/mains	$135.00,$380.00protected street	30 days	300 lin. ft.	12 feet or SW width
Repair steam connection/ mains	$135.00,$380.00protected street	30 days	300 lin. ft.	12 feet or SW width
Repair electric/communication lines	$135.00,$380.00protected street	30 days	300 lin. ft.	12 feet or SW width
Test pits, cores or boring	$135.00,$380.00protected street	15 days	300 lin. ft.	Not applicable
Conduit construction (cable, telecommunication) & franchise	$135.00,$380.00protected street	15 days	300 lin. ft.	12 feet
Major installation-franchise	$135.00,$380.00protected street	30 days (90 days with OCMC approval.)	As per approved plans	As per approved plans
Erect canopy	$135.00	30 days	Not applicable	SW width
Install street furniture	$135.00	30 days	Not applicable	Not applicable
Land fill	$135.00	Inspection fee of $25.00 for 1st 400 cubic yards. Excess over 400 cy at $0.05 per cy.	30 days	Not applicable	Not applicable
Private sewer	$135.00,$380.00protected street	30 days	300 lin. ft.	12 feet
Install fence	$135.00	30 days	300 lin. ft.	Not applicable
Install traffic signals	$135.00,$380.00protected street	30 days	300 lin. ft.	Not applicable
Install or repair petroleum pipelines/monitoring and recovery systems	$135.00,$380.00protected street	30 days	300 lin. ft.	12 feet or SW width
Installation of fire alarm box	$135.00	30 days	Not applicable	SW width
Fee for review of request to work during an embargo period	$135.00			
Installation of bus shelter	$135.00	30 days	As per Division of Franchises	As per Division of Franchises

Construction Activity Permits

Types of Construction Activity Permits:

Place material on street	$50.00	$30.00 per month inspection fee	3 months	300 linear ft. but not more than 80% frontage may be encumbered.	8 feet
Crossing sidewalk	$50.00	3 months	2 crossings at 12 ft. wide within 300 linear ft.		SW width
Place crane on street	$50.00 per week or part thereof.	$100.00 inspection fee	1 week	Variable	Not more than one third width of roadway
Place equipment other than crane on street	$50.00	3 months	300 lin. ft.	12 feet	
Place shanty or trailer on street	$50.00	3 months	Variable	12 feet	
Temporary pedestrian walk in roadway	$50.00	3 months	300 lin. ft.		
Install or change pavement markings, construction signs and supports	$50.00	90 days			
Hang temporary festoon/holiday lighting and/or other temporary lighting	$50.00	90 days			
Install decorative planters on street	$50.00	1 year			
Install bicycle rack	$50.00	1 year			
Temporary closing of roadway	$50.00	3 months			
Temporary sidewalk closing	$50.00	3 months			
Placement of containers for construction waste debris	$50.00	90 days	300 lin. ft.	12 feet	

Sidewalk Construction Permits:

Repair/construct sidewalk	$70.00	30 days	300 lin. ft. or per block and lot	SW width

Licenses:

Vault License	$35.00	$2.00 per sq. ft.	
Canopy Permits	$50.00	1 year	
Canopy in connection with a sidewalk cafe license	$25.00	1 year	

Miscellaneous Charges and Fees:

Subpoenas	$15.00	
Removal of banners, canopies, signs and other encroachments and ob-		cost of labor and materi-

structions			als	
Storage fee for removed banners, canopies, signs and other encroachments and obstructions			$15.00 per day	
CARs	$40.00			
Backcharges and JETS	$134.00 per sq. yd.			
Extension of Permit	$40.00	14 days		
Place commercial refuse container on street	$30.00 per year			12 feet
Application review fee for placement of commercial refuse container on street in restricted area as defined in §2-14(f)(4)			$30.00 per application	
Reissuance of permit within three business days	$15.00	duration of original permit		
Renew temporary security structure	$50.00	Six months	300 lin. ft.	Not applicable
Filing of Sidewalk, Curb and Roadway Application (SCARA)-Plan Type A			No fee	one year
Filing of SCARA-Plan Type B	$35.00 filing fee			one year
Filing of SCARA-Plan Type C	$2.00 per lin. ft.			one year
Filing of SCARA-Plan Type D	$4.00 per lin. ft.			one year
Filing of SCARA-Plan Type E	$4.00 per lin. ft.			one year
Filing of SCARA-Plan Type F	$8.00 per lin. ft.			one year
Install temporarysecurity structure	$50.00	One year	300 lin. ft.	Not applicable
City adjustment ofstreet hardware tomeet pavement	$125.00	Not applicable	Not applicable	Notapplicable

DERIVATION

Section 2-03 was derived from former §§2-26 and 2-27 from original publication July 1, 1991.

Section 2-26 was amended in City Records July 10, 1991 and Oct. 6, 1996. Section 2-27

was amended in City Record Oct. 6, 1996.

NOTE

1. Statement of Basis and Purpose in City Record Mar. 17, 2000:

Section 2-03 is being revised to reflect fees that are based on the complexity of the proposed sidewalk, curb or roadway project.

2. Statement of Basis and Purpose in City Record May 7, 2001: Section 2-03 is being amended to require a permit to be obtained for pole removal. This will enable the Department to better regulate such activity by giving the Department notice of pole removals.

3. Statement of Basis and Purpose in City Record May 5, 2004: The Commissioner of the Department of Transportation is authorized to regulate work taking place on City streets and sidewalks pursuant to §2903 of the New York City Charter and Title 19 of the New York City Administrative Code. Section 2-03 is being amended to add a fee to cover the City's cost of adjusting private companies' street hardware to meet the roadway pavement after resurfacing work is done. The charge will be billed to the companies on whose behalf the City performs this adjustment work.

4. Statement of Basis and Purpose in City Record Apr. 13, 2005: The Commissioner of the Department of Transportation is authorized to regulate work taking place on City streets and sidewalks pursuant to §2903 of the New York City Charter and Title 19 of the New York City Administrative Code. Section 2-03 is being amended to increase the duration and distance covered by a permit for hanging temporary festoon/holiday lighting and/or other temporary lighting. Subdivision (e) of §2-14 is being amended to enable the Department to more closely monitor the installation of temporary festoon/holiday lighting and/or other temporary lighting to ensure its safety and compliance with all applicable rules.

5. Statement of Basis and Purpose in City Record Oct. 14, 2005: The Commissioner of the Department of Transportation is authorized to regulate work taking place on City streets and sidewalks pursuant to §2903 of the New York City Charter and Title 19 of the New York City Administrative Code. Section 2-03 is being amended to adjust the permit fee for hanging temporary festoon/holiday lighting and/or temporary lighting. A flat $50 permit fee will now

cover all such lights installed by one entity. Installing such lighting benefits the City, individual communities, and the Business Improvement Districts in terms of increased retail sales, tourism and enhancement of neighborhood pride. Upon further consideration, the $50 per block face fee appears to be financially overburdensome. Accordingly, the rule is being amended to revert to the flat permit fee of $50.

6. Statement of Basis and Purpose in City Record Sept. 7, 2006: The Commissioner of the Department of Transportation is authorized to promulgate rules relating to fees collected by the Department of Transportation pursuant to §2903(b) of the New York City Charter and Title 19 of the New York City Administrative Code. Section 2-03 is being amended to increase the fees collected for backcharges and JETS. This fee allows the Department of Transportation to recover the cost of temporarily restoring street defects caused by private entities, such as a plumbers and/or utility companies. The administrative fee currently charged no longer accurately reflects administrative and labor costs incurred in performing the required emergency repair work.

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices

and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 2-04

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-04 Canopies.

(a) **Permit required.** No person shall erect or maintain a canopy over the sidewalk without obtaining a permit from the Commissioner. The canopy shall be adequate for public safety and convenience and shall respect the special circumstances of the particular site or street and shall not detract from public use of the sidewalk. Canopy permits may be issued for the entrance to a building, or place of business within a building.

(b) **Permit fees.** (1) The fee for the issuance of a canopy permit shall be $50 per year.

(2) The fee for the issuance of a canopy permit in connection with a sidewalk cafe license shall be $25.

(c) **Conditions.** (1) Canopy permits shall not be issued for:

(i) placement on streets listed in subdivision f of this section;

(ii) placement within the following: fifteen feet of fire hydrants or bus stop zones; beneath a fire escape or so located as to obstruct operation of fire escape drop ladders or counter-balanced stairs or so as to obstruct any exit from a building; within the area created by extending the building line to the curb (the "corner") or within the area from ten feet of either side of the corner (the "corner quadrant"); five feet of tree pit edges, four feet of street lights and utility hole or transformer vault covers or gratings; three feet of parking meters; or

(iii) placement without written approval from the property owner; or

(iv) placement without written approval from the Department of Consumer Affairs for locations licensed by the

Department of Consumer Affairs; or

(v) placement at locations deemed by the Commissioner as inadequate with respect to public safety and convenience.

(2) Canopies shall not be permitted above underground street access covers, vault covers, gratings, or cellar doors which require access.

(3) Canopy design and construction shall be in accordance with the Department's standard details of construction.

(4) Owners shall be responsible for the removal of a canopy within ten days when so directed by the Commissioner for necessary street construction.

(5) Advertising on a canopy is prohibited. The house or street number and/or firm name or filed trade name may appear on a canopy as prescribed by the Zoning Resolution of the City of New York. However, descriptive words contained in the firm name or filed trade name tending to advertise the business conducted on the premises are prohibited. Lettering may include logo art for the purpose of business identification only.

(6) All canopy permits shall be posted in a conspicuous place at the entrance for which the permit is issued.

(d) **Maintenance.** (1) Canopies shall be well maintained at all times.

(2) The covering shall be kept clean, free from accumulation of snow and ice and free from rips and tears, discoloration, fading, sagging, graffiti, etc.

(3) Canopies with metal frameworks shall be painted as needed, but at least every five years.

(4) All structural members shall be kept free of rust and surface imperfections (smooth to the touch).

(e) **Permit expiration, renewal and transferability.**

(1) Each permit shall expire one year from the date of issuance, unless revoked sooner by the Commissioner. Applications for renewal of canopy permits shall be made at least one month prior to permit expiration dates.

(2) Canopy permits shall not be transferable from person to person or from the location of original issue.

(3) Notwithstanding any inconsistent provision of this section relating to the location of a canopy, where a permit was issued for a canopy erected prior to May 19, 1995 under the rules in effect prior to that date, a renewal permit may be issued for the continued maintenance of such canopy at such location provided that:

(i) The canopy is at the same location and was not altered on or after May 19, 1995;

(ii) The canopy is not on a street listed as restricted in subdivision f of this section; and

(iii) The department performs an on-site inspection and determines that the canopy does not present a hazard to public safety and convenience. For the purposes of this provision, hazards for which the department will refuse the renewal of a permit shall include, but not be limited to, the location of a canopy within fifteen feet of a fire hydrant or bus stop, beneath or obstructing a fire escape or within a corner or corner quadrant.

(f) **Placement of canopies.** The following categories of restricted streets are established:

(1) **Fully Restricted Streets.** No canopy may be erected or maintained on the below listed streets:

(i) **Borough of Manhattan:**

(A) Fifth Avenue: West 34th Street to West 59th Street

(B) Sixth Avenue: West 34th Street to West 59th Street

(C) 34th Street: West side of Fifth Avenue to East side of Eighth Avenue

(D) 42nd Street: East side of Eighth Avenue to West side of Third Avenue

(E) Seventh Avenue: South side of 33rd Street to North side of 34th Street

(F) Broadway: Chambers Street to Battery Place

(G) Whitehall Street: Beaver Street to Water Street

(H) Wall Street: Broadway to South Street

(I) Broad Street: Wall Street to Water Street

(J) Sixth Avenue: West 4th Street to West 8th Street

(K) West 8th Street: Sixth Avenue to Fifth Avenue

(L) East 8th Street: Fifth Avenue to Fourth Avenue

(M) Astor Place: Broadway to 3rd Avenue

(N) St. Mark's Place: 3rd Avenue to 2nd Avenue

(O) 72nd Street: Broadway/Amsterdam Avenue to Columbus Avenue

(2) **Partially Restricted Streets.** The erection or maintenance of canopies on the streets listed below is limited to one building entrance only, except that hotels and apartment houses may erect and maintain canopies over all their entrances and restaurants may erect and maintain a canopy over one entrance separate and distinct from the building entrance, if any.

(i) **Borough of Manhattan**

(A) Fifth Avenue: West 12th Street to West 34th Street

(B) Madison Avenue: East 23rd Street to East 96th Street

(C) Park Avenue: East 46th Street to East 60th Street

(D) 43rd Street to 60th Street: Sixth Avenue to Lexington Avenue

(E) Riverside Drive: George Washington Bridge to West 135th Street

(F) Morningside Avenue: West 116th Street to West 125th Street

(G) Central Park West: West 60th Street to West 75th Street

(H) South Street Seaport

(I) Nassau Street Mall

(ii) **Borough of Brooklyn**

(A) Ocean Parkway: Belt Parkway to Prospect Park

(B) Ocean Avenue: Flatbush Avenue to Avenue Z

(C) Plaza Street: Eastern Parkway to Prospect Park West

(D) Eastern Parkway: Plaza Street to Ralph Avenue

(E) Fulton Street Mall

(F) Stuyvesant Avenue: Fulton Street to Madison Avenue

(G) Kings Highway: Bay Parkway to Rockaway Parkway

(iii) **Borough of the Bronx**

(A) Grand Concourse: 158 Street to 179 Street

(B) Pelham Parkway: Cruger Avenue to Hutchinson River Parkway

(iv) **Borough of Queens**

(A) Jamaica Avenue: 168 Street to Cross Island Parkway

(B) Hillside Avenue: 179 Street to the City Line

(v) **Borough of Richmond**

(A) Hylan Boulevard: Fingerboard Road to Tysens Lane

(B) Victory Boulevard: Bay Street to Willowbrook Road

(C) Richmond Avenue: Richmond Terrace to Forest Avenue

(D) New Dorp Lane: Richmond Road to Hylan Boulevard

(g) **Design criteria.** (1) **Size limitations of canopies.**

(i) **Width.** Canopy width is limited to the width of the building entrance or the place of business, as defined by the doors leading into the building or place of business, but in no case shall the width be less than 4 feet nor more than 10 feet, unless authorized in writing by the Commissioner or as required by the Commissioner.

(ii) **Height.** The bottom of any portion of the canopy covering shall not be less than eight feet above the sidewalk and the top of any portion of the canopy covering shall not exceed 12 feet above the sidewalk, unless authorized in writing by the Commissioner.

(iii) **Length.** The canopy shall extend from the building line to within a minimum of eighteen inches and a maximum of twenty-four inches from the face of the curb line.

(2) Canopy design and construction shall conform to Standard Details of Construction H 1029. Canopy shall be fully roofed.

(3) Certification by the manufacturer that the covering is flameproof shall be submitted with the permit application.

Where certification is unobtainable from the manufacturer, certification by the installer may be submitted instead.

(4) **Lettering on covering.**

(i) The height of lettering on any side of a canopy shall not exceed 12 inches, as specified in the Zoning Resolution.

(ii) The painting, imprinting, or stenciling authorized in the above paragraph (4)(i) shall be limited to a single horizontal line of lettering, and with a cumulative surface area not exceeding twelve (12) square feet per side. It shall be lawful to paint, imprint or stencil directly upon a canopy within the character and area limitations prescribed by the Zoning Resolution of the City of New York.

(5) **Lighting and Illumination.**

(i) The area under the canopy shall be lighted to a minimum of thirty foot candles when the canopy is within twenty feet of a lamppost. Illumination shall be limited to the underside of the canopy. Neon lights are not permitted. Fluorescent light fixtures shall have the bulbs covered so they are not visible. Illumination sources shall be installed so that they do not protrude below the bottom of any portion of the canopy covering.

(ii) All electrical work shall be done by a licensed electrician.

(6) Side curtains are not permitted.

(7) Supporting framework shall be constructed of metal members.

(i) Vertical uprights shall be of sufficient size and strength and shall be no less than a standard steel pipe, one and one-quarter inches in diameter and not exceeding three inches in diameter. Where a special construction is used instead of pipe, the design shall be equivalent to the above valid minimum pipe standard approved by the Commissioner. The vertical uprights shall be imbedded in an independent concrete footing of adequate size, designed to sustain all anticipated loads.

(ii) Intermediate vertical upright supports are not permitted except for additional upright supports at the face of the building. Such additional upright supports shall not extend more than 18 inches of the property line.

(iii) Diagonal bracing at vertical upright supports is not permitted, except where required for wind bracing. Permissible wind bracing supports shall be constructed parallel to the curb line and shall extend outward no more than eighteen inches from the vertical upright.

(h) **Application.** (1) Applications for canopy permits shall include:

(i) A statement of the basic construction details including the following:

(A) type, description and color of the canopy covering;

(B) type, diameter and gauge of all supporting members;

(C) description of the frame, wind bracing assembly and sidewalk and building fastenings;

(D) description of proposed lettering on canopy covering, including exact wording and dimensions thereof;

(E) five inch by seven inch photograph of the proposed site.

(ii) A sketch showing the canopy dimensions, location and all street facilities within fifteen feet of both sides of the canopy.

(iii) A certificate that the covering is flameproof.

(iv) Consent of the Landmarks Preservation Commission for the erection of a canopy in a designated landmark historic district or attached to a building that has Landmark's historic designation.

(v) Reserved.

(2) **Permit requirements.** All permits are subject to applicable provisions contained in §2-02 of these rules.

(i) **Removal of unauthorized canopies.** Pursuant to §19-124 of the Administrative Code, the Commissioner may serve an order upon the owner of any premises requiring the removal of any unauthorized canopy. Upon the owner's failure to comply with such order within the time specified, the Commissioner may remove such canopy or cause the same to be removed, at the owner's sole cost and expense.

(j) **Miscellaneous.** No attachments of any kind or in any manner are permitted on a canopy, including, but not limited to:

(1) Temporary or permanent signs

(2) Balloons

(3) Streamers

(4) Flags

(5) Banners

(6) Pennants

HISTORICAL NOTE

Section repealed and added City Record May 1, 1998 eff. May 31, 1998.

Section in original publication July 1, 1991.

Subd. (c) par (1) amended City Record May 7, 2001 §4, eff. June 6, 2001. [See Note 1]

Subd. (e) amended City Record May 7, 2001 §5, eff. June 6, 2001. [See Note 1]

Subd. (f) par (1) subpar (i) clause (O) added City Record May 22, 1998 eff. June 21, 1998.

Subd. (f) par (1) subpar (ii) repealed City Record Feb. 25, 2000 §5, eff. Mar. 26, 2000. [See T34 §2-01 Note 1]

Subd. (h) par (1) subpar (v) repealed City Record June 7, 2007 §7, eff. July 7, 2007. [See T34 §2-02 Note 5]

Subd. (h) par (2) added City Record June 7, 2007 §7, eff. July 7, 2007. [See T34 §2-02 Note 5]

DERIVATION

Section was derived from former §2-03 from original publication. Such §2-03 was amended in

City Records Apr. 9, 1995, Dec. 15, 1996 and May 22, 1998.

NOTE

1. Statement of Basis and Purpose in City Record May 7, 2001:

Section 2-04 is being amended in order that the Agency may better regulate the issuance of canopy permits. The proposed rules prohibit the placement of canopies under fire escapes or obstructing the use of fire escape drop ladders, counter-balanced stairs, and any building exits. The revision brings the current Highway Rules into compliance with the New York City Administrative Code, Title 19, §19-124(f). Additionally, this revision heightens public safety since canopies obstructing the use of fire escapes and building exits would render such fire escapes and building exits inoperable.

Additionally, the proposed rules enable the Department to renew permits for canopies constructed and approved before May 19, 1995 without imposing the newer construction restrictions, so long as a Department Inspector inspects the canopy and determines that such canopy does not present any hazards to public safety and convenience.

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 2-05

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-05 Construction Activity.

(a) **Permit required.** (1) A separate construction activity permit is required for each of the following activities, except where otherwise provided by these rules or by permit stipulations:

(i) Placing construction material on street during working hours

(ii) Placing construction equipment other than cranes or derricks on the street during working hours

(iii) Temporarily closing sidewalk

(iv) Constructing temporary pedestrian walk in roadway

(v) Temporarily closing roadway

(vi) Placing shanty or trailer on street

(vii) Crossing a sidewalk

(viii) Placing crane or derrick on street during working hours

(ix) Storing construction material on the street during non-working hours

(x) Storing construction equipment on the street during non-working hours

(2) Permits for construction activity involving building operations shall be obtained only by the general contractor or the construction manager.

(b) **Permit requirements.** All permits are subject to applicable provisions contained in §2-02 of these rules.

(c) **Conditions.** (1) Permits shall be kept on the job site or at the designated field headquarters at all times and shall be made available for inspection.

(2) All obstructions on the street shall be protected by barricades, fencing, railing with flags, lights, and/or signs, placed at proper intervals and at prescribed hours in accordance with the New York State or Federal Manual on Uniform Traffic Control Devices. During twilight hours the flags shall be replaced with amber lights.

(3) All permittees shall notify the Police Department and the communications center of the Fire Department of all construction activities requiring street closing at least twenty-four hours in advance of the commencement of non-emergency work.

(4) Permittees may be required to obtain approval(s) from OCMC or from a designee of the Commissioner.

(5) All permittees shall comply with the provisions of subdivision (g) of §2-02 of these rules, if applicable.

(d) **Conditions for the placement or storage of construction material and equipment (other than cranes) on the street.** (1) Sidewalks shall be kept clear for pedestrian passage and the curbline shall be kept clear and unobstructed for drainage purposes.

(2) The street shall be protected with proper covering to prevent damage; e.g.: planking, skids, plating, pneumatic tires, before construction material or equipment, including containers are placed on the street. All planking and skids for containers must be a minimum of $1\frac{1}{2}$" to a maximum of 3" thick. Overall size must be a minimum of 12"×12" and the placement of the protective covering must not exceed the outer dimensions of the container. Protection shall be placed directly under each steel wheel or roller of the container to adequately distribute the weight. Placement of all protection shall be done upon delivery by the managing agent, distributor, or owner of the container.

(3) The name, address and telephone number of the owner shall be printed on two sides of each container used for construction debris.

(4) Each container shall be stored in an area designated by the Commissioner for the storage of construction material.

(5) All containers shall be clearly marked on all four sides with high intensity fluorescent paint, reflectors, or other markings capable of producing a warning glow when struck by the head lamps of a vehicle or other source of illumination at a distance of three hundred feet.

(6) No temporary hoist or scaffold shall be erected on or over a roadway without review of site plans by OCMC, approval of such plans by the Commissioner and a permit from the Department of Buildings.

(7) No temporary fence which extends more than three feet onto the street shall be erected on the sidewalk without the Commissioner's approval of the location and a permit from the Department of Buildings.

(8) Construction material or equipment shall not be stored or placed within:

(i) five feet of railroad tracks;

(ii) three feet of any city-owned electrical systems equipment including, but not limited to, signal and lamp posts, ITS systems, cameras, panel and/or junction boxes, provided that access to the equipment is maintained at all times;

(iii) fifteen feet of hydrants;

(iv) the area created by extending the building line to the curb (the "corner") or within the area from ten feet of either side of the corner (the "corner quadrant");

(v) any "No Standing" zone.

(9) Permittees shall comply with all rules or permit conditions relating to interference with access to subway facilities, fire alarms, street signs, parking meters, emergency telephones, water main valves, utility facilities and any city-owned electrical equipment including, but not limited to, cameras, ITS, street light and signal poles, panel and/or junction boxes.

(10) Space shall be provided within the storage area for loading and unloading construction materials and for all other permissible operations.

(11) The storage area shall be clearly delineated on all sides with barricades, fencing, railing or other safety devices reflectorized and/or illuminated in accordance with the New York State or Federal Manual on Uniform Traffic Control Devices.

(12) For the purpose of mixing mortar, concrete or other materials, or to bend steel reinforcement bars, surface protection shall be provided.

(13) Mortar boxes for hand mixing shall not extend beyond the area permitted for the storage of materials on the street.

(14) Storage space shall not exceed eighty percent of each linear frontage of the plot on which the buildings are to be constructed, altered or demolished; nor shall more than one-third of the roadway width, with a maximum of one lane measured from the curb, be encumbered with construction material unless a street closing permit is obtained.

(15) The Commissioner may direct that construction material stored or placed within the street line, particularly in a critical area, be confined to the sidewalk frontage area where the building is to be constructed, altered or demolished. The permittee shall enclose the sidewalk storage area with a four foot high barricade or fence in accordance with the New York State or Federal Manual on Uniform Traffic Control Devices and shall provide adequate lighting and a minimum of five feet of clear pedestrian passage. A temporary partial sidewalk closing permit shall be required.

(16) All equipment hoses, cables, or wires carried overhead across the sidewalk shall have fourteen (14) feet minimum clearance.

(17) All equipment hoses, cables, or wires placed on the sidewalk while in use shall be bridged and protected by warning signs and/or lights.

(18) A construction activity permit shall be required for a truck crane (boom truck) with telescopic, hydraulic or folding booms, over fifty feet and not more than one hundred thirty-five feet with a maximum rated capacity of three tons. A valid copy of a current "Crane Approval and Operations Certificate (CD)" shall be obtained from the Department of Buildings when a "Certificate of On-site Inspection" is not required.

(e) **Temporarily closing sidewalk.** A temporary partial sidewalk closing permit shall be required when more than three feet from the property line is obstructed by a fence. A temporary full sidewalk closing permit shall be required when a minimum clear sidewalk passage of five feet cannot be maintained for pedestrians.

(f) **Temporary pedestrian walkway in roadway.** (1) The Commissioner may require permittees to construct temporary pedestrian walkways on the roadway when adequate pedestrian passage cannot be maintained on the sidewalk.

(2) If a pedestrian walkway in the roadway is not required, warning signs advising pedestrians to use the opposite sidewalks shall be placed and maintained at each corner or as otherwise directed.

(g) **Temporarily closing roadway.** (1) A roadway closing permit is required for closing one or more lanes of the roadway.

(2) A roadway closing permit is required during blasting operations and the firing of shots.

(h) **Placement of shanties or trailers on the street.** (1) A permit shall be required to place a construction shanty, trailer, or similar structure on the street.

(2) Placement of shanties or trailers is subject to the same restrictions as the placement of equipment.

(3) Construction shanties or trailers shall be placed within the storage area provided for construction materials.

(4) Shanties and trailers shall be removed from the street when the building structure first floor level is covered by a roof, second floor or a second floor slab, unless otherwise directed by the Commissioner.

(5) Use of a shanty or trailer anywhere on a street as a renting or sales office shall be prohibited.

(6) No lettering or symbols shall be placed on a shanty or trailer except for the name and telephone number of the contractor.

(7) The shanty or trailer shall be lighted or have reflectorized striping on the exterior.

(i) **Crossing a sidewalk.** (1) A permit for crossing a sidewalk shall be obtained for the delivery or removal of any construction material or equipment on the street by vehicle or motorized equipment across a sidewalk where there is no approved drop curb (driveway).

(2) A maximum of two sidewalk crossings shall be allowed per each three hundred linear feet.

(j) **Placement of cranes and derricks on street.** For the purposes of these rules the terms "crane" and "derrick" shall be as defined in the New York City building code.

(1) **Permit requirements.**

(i) **Building operations.**

(A) A crane permit shall be required for all cranes and derricks operating in the street on building construction or related activity under the jurisdiction of the Department of Buildings, with the exception of: truck cranes with telescopic, hydraulic or folding booms, over fifty feet and not more than one hundred thirty-five feet with a maximum rated capacity of three tons, for which a construction activity permit has been issued.

(B) A crane permit shall be required for assist cranes with a maximum rated capacity greater than twenty tons to assemble, operate, or disassemble any crane on a street. Assist cranes with a maximum rated capacity of twenty tons or less shall require a Construction Activity Permit.

(C) All permittees shall comply with the rules for power operated cranes, derricks and cableways of the Department of Buildings.

(ii) **Street operations.**

(A) A crane permit shall be required for all cranes and derricks operating in the street with a maximum rated capacity greater than twenty (20) tons and which are not related to building operations.

(B) A construction activity permit shall be required for all cranes and derricks with a rated capacity of twenty tons or less when used for street related activity and where the activity is not under the jurisdiction of the Department of Buildings. A written statement shall be submitted by the owner of the structure, building or premises, general contractor, construction manager, or authorized agent stating that he/she visited the site and that there are no excavations or retaining walls and that no vaults or subsurface construction exists at the site. If there are excavations, retaining walls, vaults or subsurface construction existing at the site, then an affidavit shall be submitted from a Professional Engineer indicating (1) that the sidewalk or roadway and the supporting sub-grade can safely bear the crane and crane load, (2) that any existing vaults or other subsurface structures are capable of supporting the crane and load, and (3) that the sheeting or retaining walls supporting any excavations adjoining the street area are capable of supporting the crane and load.

(2) **Application.** All applicants for a permit shall file the following:

(i) A standard application including the following information:

(A) location of the work site;

(B) nature of the work to be performed;

(C) date of commencement of crane operation and estimated completion date; (D) length of the crane's boom. (Approval of the Department of Buildings is required for cranes with booms over two hundred fifty feet in length, contingent upon passing a satisfactory assembled inspection for each phase. For such cranes, a special review and approval meeting must be held with the Department of Buildings and the applicant.);

(E) model and serial numbers of cranes to be used;

(F) crane/derrick application form #M12;

(G) approval or permit from the Department of Buildings in the case of new structures, renovations or modifications made to a building, or placement of a sign structure; and

(H) daily or annual overdimensional permit.

(ii) A sketch showing:

(A) proposed location of the crane in the work area;

(B) area to be designated for pedestrian passageway;

(C) measures to be taken from safeguarding and protecting pedestrians and for maintaining vehicular traffic, including OCMC stipulations.

(iii) The following documentation from the Department of Buildings:

(A) "Crane Approval and Operations Certificate (CD)" (for all cranes and derricks).

(B) "Application for a Certificate of On-Site Inspection (Crane Notice)".

(C) All plans/amendments related to the operation and movement of the crane.

(3) **Placement.** All cranes may be placed partially or entirely on the street, in the discretion of the Commissioner, subject to the following conditions and requirements:

(i) A crane shall not occupy more than one third of the roadway width except in accordance with the stipulations

set forth in the street closing permit.

(ii) The extreme outer limit of the crane, in any operating or storage position, shall be at least twelve feet from the opposite curb. The Commissioner may issue a street closing permit when a minimum of twelve feet cannot be maintained.

(iii) Cranes equipped with steel tracks shall be supported by:

(A) steel plates; or

(B) timber platforms not less than six inches thick and covering the entire base of the crane.

(iv) The crane and loads shall not exceed 3,500 lbs. per square foot.

(v) For cranes equipped with rubber tires:

(A) the pressure applied to the street surface through outriggers or other elements of the crane shall not exceed 3,500 lbs. per square foot;

(B) the pressure shall be distributed by timber mats, wood planking or steel plates, extending not less than twelve inches beyond the base of the outriggers on all sides and sufficiently thick to uniformly distribute the load pressure including the weight of the crane.

(vi) Each permittee shall ensure that the surface upon which the crane will rest is capable of supporting the above pressures. The permittee shall further expand the size and thickness of the timber platforms, mats and steel plates beyond the minimum requirements stipulated above for all types of cranes, so as not to exceed the bearing capacity of the street. This shall apply to structural streets and streets over underground facilities/structures as well.

(vii) An alternate means of distributing the load may be approved by the Department of Buildings when a "Certificate of On-Site Inspection" is required.

(viii) When any part of the crane requiring a "Certificate of On-Site Inspection" is placed on the street, a statement by a New York State licensed professional engineer shall be filed with the Borough Permit Office certifying:

(A) that the street area and the supporting subgrade can bear the crane load safely. Should the street condition require that the crane and load be distributed over a larger area than afforded by the elements of the crane, the New York State licensed professional engineer shall furnish full dimensional details of load distribution;

(B) that the engineer has taken all necessary measures to ascertain that there is no vault underneath the sidewalk area or that if a vault does exist its roof is sufficiently strong to support the load to be imposed thereon.

(C) that the sheeting or retaining walls supporting any excavations adjoining the street bearing the load capacity are capable of supporting the area carrying the crane and load. When the crane is used to excavate adjacent to itself, the New York State licensed professional engineer shall specify the sheeting or retaining wall reinforcement required to support the crane and load.

(4) **Master or special rigger/sign hanger.** A "Certificate of Crane On-Site Inspection" is not required for a master or special rigger or a master or special sign hanger working within the purview of his/her license issued by the New York City Department of Buildings. Permissible work under the supervision of a master or special rigger or a master or special sign hanger includes:

(i) the hoisting or lowering of any article on the outside of any existing/completed building;

(ii) the removal or installation of boilers and tanks; and

(iii) the erection, maintenance or removal of signs or sign structures.

(5) **Safety requirements.**

(i) For purposes of safety, a flagperson(s) shall be assigned at all times during the operation of the crane to coordinate all crane operations with pedestrian and vehicular traffic and to give proper warnings to the crane operator. Exceptions may be granted under the following conditions:

(A) Where OCMC traffic stipulations provide for the crane to be operated in an area that has been closed to vehicular and pedestrian traffic, and

(B) Where the full outward swing of the crane actually does not exceed beyond the barricade and the sidewalk area within the swing of the crane carriage or boom is securely barricaded in accordance with the New York State or Federal Manual on Uniform Traffic Control Devices to prevent pedestrian traffic or an adequate covered pedestrian walkway is provided.

(ii) When a crane is stored on a street it shall be clearly marked with adequate lighting or with high intensity fluorescent paint, reflectors, or other markings capable of producing a warning glow when struck by the head lamps of a vehicle or other source of illumination up to a distance of three hundred feet.

(iii) It shall be unlawful for any person other than a crane operator licensed by the Department of Buildings to operate a crane on a street.

(6) Permits for the placements of a crane on the street may be issued for the area from the northern street line of 66th Street to the extreme southernmost tip of Manhattan as specified on the map in subdivision l and in the following limited cases:

(i) When erecting from the street:

(A) a tower or climbing crane which will be operated within building site property lines; or

(B) a temporary platform or permanent plaza within a building site for the placement of a street crane.

(ii) When erecting a structure/building on a building site from the street within one hundred and ten working days when use of a tower or climbing crane is not practicable.

(iii) Temporary crane permits are issued for the erection of a structure for a maximum of one hundred ten working days. Crane usage shall be apportioned between the various stages of erection by the building owner, the general contractor or the construction manager. A working day is defined as each day covered by an active permit, not by the days a crane operates. Several cranes operating simultaneously at the same site shall be credited with one working day for each day covered by the active permit. The one hundred and ten day limit shall not be exceeded. However, extensions may be granted by the Commissioner in extraordinary circumstances.

(iv) Permittees shall be required to delineate the street area authorized for use in blue thermoplastic tape or paint. Upon expiration or revocation of the permit, the permittee shall remove the paint or markings and restore the area to its original condition.

(7) **Letter of Credit.** To ensure full compliance with all crane permit terms and stipulations the following requirements and procedures apply:

(i) Permittees are required to file a $40,000 Irrevocable Stand-by Letter of Credit.

(ii) The form of the Letter of Credit and the bank upon which it is drawn shall be approved by the Commissioner.

(iii) The term of such Letter of Credit shall be at least one year. Such Letter of Credit may cover multiple crane permit locations.

(iv) If the permittee fails to remove a crane when required or otherwise violates a permit condition, the terms of the Letter of Credit shall provide that the Commissioner may demand a payment of $1,000 a day for the first five days and $2,500 for each day thereafter.

(v) A Letter of Credit shall not be required in the following circumstances:

(A) contractors with licensed operators performing rigging operations, i.e. hoisting or lowering materials or equipment on or off existing buildings;

(B) in special cases, contractors with licensed operators performing rigging operations in conjunction with new building construction;

(C) contractors with licensed operators performing work on elevated railroad or bridge structure engaged in street construction such as pavement removal, trenching or bulkheading, or in the installation and/or repair of underground shafts, sewers and water facilities.

(k) **Format to be used for Irrevocable Stand-By Letter of Credit.**

Beneficiary

The City of New York

Department of Transportation

Manhattan Street Maintenance Office

Battery Maritime Building, 4th floor

New York, New York 10004

Sir/Madam:

By order of our client (name and address of Permittee), we issue this Stand-By Irrevocable Letter of Credit No. . . . . in your favor for $40,000.00 (Forty Thousand U.S. Dollars) effective immediately for our client's performance under the required Crane Permit(s) for the placement of cranes at the following location(s):

Funds under this Irrevocable Letter of Credit are available by Sight Draft drawn on us accompanied by:

1. A statement signed by the Commissioner of the New York City Department of Transportation or an authorized representative stating that:

"(Permittee Name) has failed to comply with the terms and conditions agreed to under the permit(s) issued or has failed to remove a crane when required. For this violation the City of New York, acting through its Department of Transportation, is demanding a payment of $1,000.00 (One Thousand U.S. Dollars) a day for the first five days of violation. After five days, payment for the continuing violation is $2,500.00 (Two Thousand Five Hundred U.S. Dollars) a day." "This(these) violation(s) has(have) existed for . . . days and demand is now made for payment of (enter total amount). We have notified (Permittee name and address) in writing that this certification is being presented."

2. A copy of notice given to (Permittee name) referred to in No. 1 above.

3. The original of this Irrevocable Letter of Credit and Amendments, if any.

The Sight Draft shall bear the following clause:

"DRAWN UNDER (Bank Name), LETTER OF CREDIT NUMBER . . . . . DATED . . . . . ."

This Irrevocable Letter of Credit expires at (Bank office address) at the close of business on . . . . .

This Irrevocable Letter of Cedit sets forth in full the terms of our undertaking and such undertaking shall not in any way be modified, amended, or amplified by reference to any document, instrument or agreement referred to herein or to which this Irrevocable Letter of Credit relates and any such reference shall not be deemed to incorporate herein by reference any document, instrument or agreement.

We agree with you that drafts drawn in compliance with the terms of this Credit shall be honored on presentation.

This Irrevocable Letter of Credit is subject to the Uniform Customs and Practice for Documentary Credits (1993 Revision), International Chamber of Commerce Publication No. 500.

NOTE

1. Statement of Basis and Purpose in City Record Nov. 3, 2004:

The Commissioner of the Department of Transportation is authorized to regulate work taking place on City streets and sidewalks pursuant to §2093 of the New York City Charter and Title 19 of the New York City Administrative Code.

Section 2-05 of Title 34 of the Official Compilation of the Rules of the City of New York regulates the placement of construction material, by private contractors, on areas under the jurisdiction of the Department.

Subparagraph (ii) of paragraph (8) and paragraph (9) of subdivision (d) of §2-05 are being amended to include additional city-owned electrical equipment in this rule and expand the access areas to it during construction.

Paragraph (16) of subdivision (d) of §2-05 is being amended to provide a safer passage for pedestrian traffic on the sidewalk.

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2

included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 2-06

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-06 Land Contour Work.

(a) **Permit required.** (1) A permit shall be obtained from the Commissioner to perform land contour work which includes the clearing, grubbing, grading, filling or excavation of vacant lots and other specified land parcels.

(2) The provisions of these rules are also applicable to the disposal site for excavated materials.

(3) All permits are subject to applicable provisions contained in §2-02 of these rules.

(b) **Conditions.** (1) No condition shall be created or maintained that interferes with or obstructs existing drainage, unless an alternate drainage plan is provided for in the above plans, subject to approval by the Department of Environmental Protection. The applicant shall provide for conduction of surface waters as required by the Commissioner to the nearest approved Department of Environmental Protection collection point.

(2) Watercourses, drainage ditches, conduits and other like or unlike means of carrying off water or disposing of surface water shall not be obstructed by refuse, waste, construction materials, earth, stones, tree stumps, branches, or by any other means that may interfere with surface drainage or cause the impoundment of surface waters either within or beyond the area where land contour work is performed.

(3) All excavations shall be drained. The drainage shall be maintained until the completion of the excavation and pumping shall be used where necessary.

(4) Fill material shall consist of inert, inorganic matter, suitably compacted. No materials shall be used other than

clean earth, ashes, dirt, concrete, rock, gravel, stone, slag, or sand. Rocks and masonry shall not be larger than one-quarter of a cubic yard. No material larger than three inches in dimension may be placed within two feet of the surface. For public safety and health, the Commissioner may require a smooth graded surface treated according to the Department specifications with asphalt paving mixture, compacted cinders, stone screening, soil cement mixtures, or seeded or sodded lawn treatment, or other material as required by the Commissioner.

(5) Sodding or planting, where required, shall be completed within thirty days of work completion or as may be permitted by the Commissioner. Safeguards shall be provided to prevent soil erosion in the interval preceding sodding or planting.

(6) Work beyond lot lines shall be subject to the requirements of these rules.

(7) A minimum safety factor of two shall be used against earth slides within the property and the adjacent property. Where two parallel streets are at unequal elevations, the land grading between these two streets generally should be at a constant slope. Where possible the ground should be graded back from the front property line at a grade level with the street for a distance equal to the normal zoning set-back requirement but not less than twenty-five feet before commencing a slope.

(c) **Exceptions.** A permit is not required for grading work to be performed pursuant to a Department of Buildings permit for the erection of one or more structures, provided that the permit authorizes the grading, and that the work is performed entirely within the building site area.

(d) **Application.** (1) The application shall state the following:

(i) name of the land surveyor or New York State licensed professional engineer;

(ii) description of the land contour work;

(iii) work limits and number of linear feet in the work area;

(iv) cubic yards of fill to be placed;

(v) that work areas exceeding ten thousand square feet shall be supervised by a New York State licensed professional engineer. The application shall note the name, address, and telephone number of the New York State licensed professional engineer;

(vi) whether streets adjacent to the land are finally mapped and with whom title of the streets is vested. Prescriptive streets as determined by the corporation counsel shall be deemed as finally mapped.

(2) Applicants for a Land Contour permit shall be the property owner or the owner's authorized representative. The permit application shall be accompanied by:

(i) a statement of property ownership or of authorization by the property owner if work is to be performed by a contractor;

(ii) a statement from the surveyor or New York State licensed professional engineer which states that the work will not cause adverse drainage conditions to the property and adjacent land;

(iii) a plan prepared by a land surveyor or New York State licensed professional engineer.

(3) Applicants shall submit a plan at a minimum scale of 1"=50' or the scale required by the Commissioner. The original mylar plus one paper print filed at the time of permit application shall be drawn according to the Commissioner's standards. The plans shall show the following:

(i) name of the land surveyor or New York State licensed professional engineer;

(ii) existing watercourses, drainage ditches, conduits and other drainage facilities, or like or unlike means of carrying off water, or disposing of property surface water, and the area three hundred feet beyond the property and any additional information as required by the Commissioner;

(iii) existing and proposed grades of the area to be filled or excavated, plotted in contours spaced at five feet intervals or at other intervals as required by the Commissioner; (iv) direction of all surface water flow before and after completion of land contour work;

(v) statement of the slopes to be maintained and a cross section of the slopes; (vi) soil investigation, including, but not limited to, locating the elevation of the ground water table, whenever required by the Commissioner;

(vii) lines and grades of abutting streets which are legally mapped;

(viii) profile of the existing grade, legal grade and final grade of the abutting street;

(ix) substitute for existing drainage as noted below, subject to approval of the Department of Environmental Protection:

(A) interference with or obstruction of surface course causing drainage to flow in a direction other than a general direction and drainage pattern existing prior to the land contour work tending to cause impoundment or flooding either within or beyond the area on which contour work is performed;

(B) increase of surface course drainage in the direction and drainage pattern existing prior to the land contour work tending to cause impoundment or flooding either within or beyond the area in which contour work is performed; and

(C) interference or obstruction of existing watercourses, drainage ditches, conduits and other like or unlike means of carrying off water or disposing of surface water;

(x) proposed provisions for maintenance of existing drainage or for any substitute that shall drain the property adequately and shall provide safeguards against health hazards according to criteria established in consultation with the Department of Health as noted below:

(A) flooding: proposed provisions to eliminate existing conditions of surface water impoundment. The entire area under examination shall be provided within the property. The plans shall indicate the provisions taken to avoid direct flooding of adjacent properties or intrusion of surface water to existing or planned individual sewage disposal systems; and

(B) small water impoundment: proposed provisions to avoid small water impoundment which may become the breeding area or harborage of insects and other pests. Pests are defined as members of the class insecta and members of the Phylum Arthropoda including spiders, mites, ticks, mosquitoes, centipedes and wood lice.

(xi) provisions for disposal of excavation material.

(4) Certification shall be required from a New York State licensed professional engineer that drainage for a three hundred foot radius around the site will not be adversely affected by grading, and that existing watercourses, if any, will not be disturbed.

(e) **Approval required.** (1) Sites designated as Wetlands shall have prior approval from the New York State Department of Environmental Conservation.

(2) Sites in designated Natural Areas or in South Richmond shall require prior approval from the City Planning

Commission.

(3) The Commissioner may require that land contour plans be reviewed and approved by the Department of Environmental Protection.

HISTORICAL NOTE

Section repealed and added City Record May 1, 1998 eff. May 31, 1998.

Section in original publication July 1, 1991.

DERIVATION

Section 2-06 was derived from former §2-12 from original publication July 1, 1991.

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may

contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

Rules of the City of New York

34 RCNY 2-07

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-07 Underground Street Access Covers, Transformer Vault Covers and Gratings.

(a) **General conditions.** (1) Except for work on the critical roadways during restricted times listed in subdivision c of this section, and subject to these rules, underground street access covers, transformer vault covers and gratings may be opened to perform subsurface work without the prior authorization of the Department. During a Department declared embargo, sidewalks shall be included in the restrictions listed in paragraph (5) of subdivision (c) of this section.

(2) Except when emergency work is being performed, if excessive traffic congestion occurs on a roadway where underground street access covers, transformer vault covers or gratings have been opened, any police officer or other person authorized to enforce these rules may direct that the cover or grating openings be closed and the encumbered traffic lane opened until the congestion abates. It shall be a violation of these rules to disobey such a direction.

(3) The opening of covers and gratings shall not restrict more than a maximum of 11 feet of roadway. If such opening results in a full roadway closure, the Police Department, the Communication Centers of the Fire Department and the Department of Transportation shall be notified simultaneously with the closing. If such opening falls under the provisions of subdivision (g) of §2-02 of these rules, the entity opening the covers or gratings shall comply with all the requirements of such subdivision.

(4) Except for emergency work or where required due to the nature of the work, no more than two consecutive covers or gratings shall be opened at any time on a block segment, including the adjacent intersection.

(5) A permit is required to store material or equipment on the street during non-working hours whether or not the cover or grating opening is in a critical roadway. No such permit shall be required to store tool carts on the sidewalk. No

tool cart shall be stored on a sidewalk unless a minimum passage of five feet is maintained on the sidewalk for pedestrians. No tool cart stored on a sidewalk shall obstruct any hydrant, bus stop or driveway. A permit is required to store tool carts on the roadway. All tool carts shall display the name, address and telephone number of the entity that placed them on the sidewalk or roadway.

(6) Where subsurface work requiring the opening of covers and gratings on a sidewalk is performed and a five foot minimum passageway on the sidewalk cannot be maintained for pedestrians, a temporary sidewalk closing permit shall be obtained.

(7) Flagpeople. Permittees whose work results in the closing of a moving traffic lane, which requires traffic to be diverted to another lane, shall, at all times while actively working at the site, post a flagperson or utilize an authorized plan for the maintenance and protection of traffic at the point where traffic is diverted to assist motorists and pedestrians to proceed around the obstructed lane.

(b) **Maintenance requirements.** (1) The owners of covers or gratings on a street are responsible for monitoring the condition of the covers and gratings and the area extending twelve inches outward from the perimeter of the hardware.

(2) The owners of covers or gratings shall replace or repair any cover or grating found to be defective and shall repair any defective street condition found within an area extending twelve inches outward from the perimeter of the cover or grating.

(3) Street hardware shall be flush with the surrounding street surface. Street hardware which is greater than $^{1}/_{2}$" above or below the street surface as measured by a six foot straight edge centered on the hardware shall be replaced or adjusted at the owner's expense.

(4) Owners of underground facilities shall only use covers with their name or registered markings clearly displayed for identification purposes. Owners shall have one year from the date of the adoption of this paragraph to be in full compliance with this paragraph.

(5) Covers shall be clearly identified with markings that are registered with the Department. The owners of covers which are in good condition but lack identifying markings shall place the assigned color code or tag next to the cover or grating in lieu of replacement.

(6) Underground street access covers, transformer vault covers, and gratings shall not be placed in any street over an opening unless they are of a type approved by the Commissioner.

(c) **Work in critical roadways.** (1) Except as otherwise provided in paragraphs 2 and 3 of this subdivision, no person shall perform subsurface work requiring cover and grating openings in the critical roadways listed in paragraph 5 of this subdivision at the locations and during the hours specified in such paragraph.

(2) No person shall perform emergency work requiring cover or grating openings in the critical roadways listed in paragraph 5 of this subdivision at the locations and during the hours specified in such paragraph without an emergency authorization number from the Department.

(3) Notwithstanding the foregoing provisions, subsurface work requiring cover or grating openings may be performed at any time in traffic lanes which are obstructed by street construction authorized by the Commissioner, i.e., by the installation of water mains, sewers, street lighting, traffic control devices, cranes, construction debris containers, or other construction equipment.

(4) Authorization for emergency work requiring cover and grating openings in critical roadways during restricted hours.

(i) An authorization number shall be obtained by the owner of the cover or grating or the authorized agent of the owner by faxing the required DOT request for authorization number form to the Department's Emergency Authorization Unit, unless otherwise directed by the Commissioner. Required information shall include, but not be limited to the following:

(A) Name of permittee

(B) Permittee ID #

(C) Location of emergency (including borough)

(D) Type of emergency (including interruption of service)

(ii) Authorization numbers shall be kept on site and shall be presented upon the request of any police officer or other City employee authorized by the Commissioner to enforce these rules. Any additional information regarding the emergency work that is requested at the site by a Department inspector shall be provided by the permittee and/or the persons performing such work.

(iii) The fee for obtaining an authorization number shall be thirty dollars ($30.00). Such fee shall be paid within fifteen days of billing. The owner shall be responsible for payment of all fees imposed pursuant to this paragraph.

(iv) Emergency work shall be performed on an around-the-clock basis until the emergency is eliminated, at which time the emergency authorization number expires, as specified in subparagraph (ii) of paragraph (2) of subdivision (g) of §2-11 of these rules.

(v) The person performing such emergency work shall inform the Department's Emergency Authorization Unit within twelve hours of the completion of such emergency work.

(5) Critical roadways: Work restrictions apply Monday through Friday (except for the holidays of New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day) at the locations (including intersections) and during the hours listed below:

(i) Manhattan

(A) **East/West Roadways-Restricted Access 7:00 AM to 8:00 PM**

1. 8th Street-Avenue of the Americas to Third Avenue

2. 9th Street-Avenue of the Americas to First Avenue

6. St. Paul's Avenue-Hyatt Street to Van Duzer Street

7. Tysens Lane-Mill Road to Hylan Boulevard

8. Van Duzer Street-St. Paul's Avenue to Richmond Terrace

HISTORICAL NOTE

Section amended City Record Dec. 21, 2001 §3, eff. Jan. 20, 2002. [See Note 1]

Subd. (a) par (5) amended City Record June 7, 2007 §10, eff. July 7, 2007. [See T34 §2-02 Note 5]

NOTE

1. Statement of Basis and Purpose in City Record Dec. 21, 2001:

Section 2-07 of the Highway Rules is being amended in order that the Agency may better monitor the opening of underground street access covers, gratings and transformer vaults during emergencies in restricted areas (now called critical roadways) during restricted times. The access covers were changed from "utility" to "underground street" to reflect the fact that many of these covers now belong to entities other than utilities, such as cable and telecommunications companies. The proposed rules require permittees to fax their emergency number requests to the Department. Permittees are also required to notify the Department as well as the Police and Fire Departments when the work results in a full roadway closing. Permittees must post a flagperson or utilize an approved traffic maintenance and protection plan for enhanced traffic mitigation and vehicular/pedestrian safety while actively working where the work results in the closing of a traffic lane.

The proposed rules amend §2-07(c)(5)(i), which lists the times and days on which work in subsurface installations is restricted on critical streets in the City. This revision is part of the Department's ongoing efforts to improve air quality and should significantly contribute to attainment of National Ambient Air Quality Standards since traffic congestion resulting from lane closures due to access cover openings will decrease. These proposed changes will afford permittees increased access as fewer streets will remain restricted and time of day restrictions have been decreased for some streets.

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 2-08

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-08 Newsracks.

(a) **Definitions.** For purposes of this section, the following terms shall have the following meanings:

(1) Newsrack. "Newsrack" shall mean any self-service or coin-operated box, container or other dispenser installed, used or maintained for the display, sale or distribution of newspapers or other written matter to the general public.

(2) Person. "Person" shall mean a natural person, partnership, corporation, limited liability company or other association.

(3) Sidewalk. "Sidewalk" shall mean that portion of a street between the curb lines or the lateral lines of a roadway and the adjacent property lines, but not including the curb, intended for the use of pedestrians.

(4) Crosswalk. "Crosswalk" shall mean that part of a roadway, whether marked or unmarked, which is included within the extension of the sidewalk lines between opposite sides of the roadway at an intersection.

(5) Crosswalk area. "Crosswalk area" shall mean that area of the sidewalk bounded by the extension of the lines of a crosswalk onto the sidewalk up to the building or property line.

(6) Corner area. "Corner area" shall mean that area of a sidewalk encompassed by the extension of the building lines to the curb on each corner.

(7) Board. "Board" shall mean the environmental control board of the city of New York.

(8) Multiple-vending newsrack. A newsrack designed to hold two or more different publications.

(9) Owner. When applied to newsracks, "owner" shall mean a person who owns or is in control of one or more newsracks placed, installed or maintained on a sidewalk. Each newsrack shall have a single owner for purposes of complying with this section and the provisions of §19-128.1 of the New York City Administrative Code.

(b) **Placement.** (1) **Manner.**

(i) Newsracks shall be weighted down on all sidewalks in such a way as to insure that the newsrack cannot be tipped over.

(ii) Newsracks shall not be bolted to the sidewalk, except that multiple-vending newsracks may be bolted pursuant to a permit from the Department, except as provided in paragraph 2 of this subdivision b.

(iii) A newsrack may not be chained to property owned or maintained by the city, except that newsracks may be chained to lampposts (except for decorative lampposts). A newsrack so chained must not be in an unlawful location as specified in subdivision (c) of this section. To the extent an owner seeks to chain such newsrack to property not owned or maintained by the city, the consent of the owner of or person responsible for such property is required. In all cases where the use of chains to secure newsracks is permitted, such chains shall be made of galvanized steel with a plastic or rubber protective coating, at least 0.14 inches thick, and shall allow a distance of no more than eight (8) inches between the newsrack and the street furniture to which it is chained.

(2) **Distinctive sidewalks.** Multiple-vending newsracks may be bolted to sidewalks comprised of distinctive material, including, but not limited to, granite, terrazzo or bluestone, pursuant to a permit from the Department and provided that the written permission of the property owner or other entity that installed the distinctive sidewalk is obtained in advance of such bolting.

(3) **Sidewalk repair and restoration.** An owner shall be responsible for any damage caused or repairs necessitated by the installation, presence or maintenance of such newsrack. Such owner also shall be responsible for any damage caused or repairs necessitated by the removal of a newsrack by either such owner or by an authorized officer or employee of the Department or of any city agency who is designated by the Commissioner, or by a police officer. Such repairs shall be made promptly and in accordance with the Department's specifications.

(4) **Notification to the Department of location of newsracks.**

(i) Where a newsrack has been placed or installed on a sidewalk before September 13, 2004, the owner shall, by November 1, 2004, have notified the Department by facsimile, electronically or by other means as directed by the Commissioner and on a form approved or provided by the Commissioner, of

(A) the location of such newsrack;

(B) the name of the newspaper(s) or written matter to be offered for distribution in such newsrack; and

(C) the name, address, telephone number, and e-mail address of the owner. The name and address shall be identical to the name and address for mailing of process in the owner's Certificate of Incorporation or Application for Authority to do business in New York State. The owner shall represent that such newsracks comply with the provisions of this section and §19-128.1 of the New York City Administrative Code.

(ii) Any other owner shall, at least seven (7) days prior to the installation of its first newsrack, provide to the Department the indemnification notification and insurance certification required pursuant to subdivision f of this section and the information required in clauses (B) and (C) of subparagraph (i) of this paragraph.

(iii) Subsequent to the initial notification required by subparagraphs (i) and (ii) of this paragraph, notification shall

be made on an annual basis by November 1 of each year and shall include the information in clauses (A), (B), and (C) of subparagraph (i) of this paragraph.

(iv) If the number of newsracks owned or controlled by an owner increases or decreases by ten (10) percent or more of the number of newsracks that have been included in the most recent notification required to be submitted by such owner, such owner shall also be required to submit the information in clauses (A), (B), and (C) of subparagraph (i) of this paragraph within seven (7) days of such change.

(v) An owner shall advise the Department of any change in his, her or its name, address, telephone number, or email address within seven (7) days of such change including any changes to the Certificate of Incorporation or Application for Authority to do business in New York State.

(c) **Unlawful locations.** No owner shall install, use or maintain any newsrack in any of the following locations:

(1) within fifteen (15) feet of any fire hydrant;

(2) in any driveway or within five (5) feet of any driveway;

(3) in any curb cut designed to facilitate street access by disabled persons or within two feet of any such curb cut;

(4) within fifteen (15) feet of the entrance or exit of any railway station or subway station, except that a newsrack that otherwise complies with this subdivision may be placed against the rear of the station entrance or exit, but not against the sides;

(5) within any bus stop;

(6) within a crosswalk area;

(7) within a corner area or within five (5) feet of any corner area;

(8) on any surface where such installation or maintenance will cause damage to or interference with the use of any pipes, vault areas, telephone or electrical cables or other similar locations;

(9) on any cellar door, grating, utility maintenance cover or other similar locations;

(10) on, in or over any part of the roadway of any public street;

(11) unless eight (8) feet of sidewalk width is preserved for unobstructed pedestrian passage;

(12) in any park or on any sidewalk immediately contiguous to a park where such sidewalk is an integral part of the park design;

(13) on any area of lawn, flowers, shrubs, trees or other landscaping or in such a manner that use of the newsrack would cause damage to such landscaping;

(14) where such placement, installation or maintenance endangers the safety of persons or property;

(15) at any distance less than eighteen (18) inches or more than twenty-four (24) inches from the face of the curb, measured to the side of the newsrack closest to the curb (This paragraph shall not apply to a newsrack placed against the rear of the entrance or exit of a subway or railway as provided in paragraph 4, above.);

(16) within five (5) feet of a canopy; and

(17) within fifteen (15) feet of a sidewalk newsstand.

(d) **Size, shape and appearance.**

(1) **Dimensions.** No newsrack may be higher than fifty (50) inches, wider than twenty-four (24) inches or deeper than twenty-four (24) inches. Notwithstanding the above, no multiple-vending newsrack shall be higher than sixty (60) inches, wider than ninety (90) inches or deeper than thirty-six (36) inches.

(2) **Identifying information required.** The owner shall affix his, her or its name, address, telephone number and e-mail address, if any, on the newsrack in a readily visible location and shall conform such information to any changes required to be reported to the department in accordance with the provisions of paragraph (4) of subdivision (b) of this section. In no event shall a post office box be considered an acceptable address for purposes of this paragraph.

(3) **Advertisements prohibited.** The surfaces of the newsrack shall not include any advertisement, whether painted, posted, or otherwise affixed thereto, or be used for promotional purposes, except for announcing the name and/or website of the newspaper or other written matter offered for distribution in such newsrack.

(4) **Electricity.** No electricity shall be run into a newsrack nor shall any connection for electrical purposes be installed in or on a newsrack.

(e) **Maintenance.** The owner shall be responsible for the following:

(1) **Certification.** The owner shall certify to the commissioner on forms prescribed by the commissioner that each newsrack has been repainted, or that best efforts have been made to remove graffiti and other unauthorized writing, painting, drawing or other markings or inscriptions, at least once during the immediately preceding four (4) month period. Such certification shall be submitted on January 15, May 15 and September 15 of each year for the four (4) month period ending on the last day of the preceding month. A separate certification form shall be submitted for the newsracks dispensing a particular publication.

(2) **Logs and records.** Each owner shall maintain for each publication a separate log in which the measures taken to remove graffiti and other unauthorized writing, painting, drawing or other markings or inscriptions and the dates and times when they are taken are recorded in accordance with a format approved or set forth by the commissioner. Records shall be maintained for a period of three (3) years documenting the use of materials, employees, contractors, other resources and expenditures used for the purpose of demonstrating the repainting or best efforts to remove graffiti and other unauthorized writing, painting, drawing or other markings or inscriptions. Such logs and records shall be made available to the department for inspection and copying during normal and regular business hours and shall be delivered to the department upon request.

(3) **Refuse.** No refuse shall accumulate in a newsrack nor shall any newsrack deteriorate into an unsanitary condition. The owner shall remove refuse within forty-eight (48) hours of receipt of a notice of correction from the Commissioner, which shall be deemed to have been received five (5) days from the date on which it was mailed by the Commissioner.

(4) **Damage.** A damaged newsrack or one in need of repair shall be repaired, replaced or removed within seven (7) business days of receipt of a notice of correction regarding such damage or need for repair, except that if such damaged newsrack poses a danger to persons or property, it shall be made safe within twenty-four (24) hours following receipt of such notice of correction, which shall be deemed to have been received five (5) days from the date on which it was mailed by the Commissioner.

(5) **Continuous use.** In no event shall the owner fail to keep such newsrack supplied with written matter for a period of more than seven (7) consecutive days without securing the door so as to prevent the deposit of refuse therein. Notwithstanding the securing of the door, in no event shall such newsrack remain empty for a total period of more than thirty (30) consecutive days. Any newsrack empty for longer than such period shall be deemed abandoned.

(f) **Indemnification and insurance.**

(1) **Indemnification.** The owner of a newsrack placed or installed on any sidewalk shall indemnify and hold the City harmless from any and all losses, costs, damages, expenses, claims, judgments or liabilities that the City may incur by reason of the placement, installation or maintenance of such newsrack, except to the extent such damage results from the negligence or intentional act of the city. In addition to the insurance certificate submitted pursuant to paragraph 3 of this subdivision f, the owner shall submit by regular mail an indemnification notification on a form provided by the Commissioner.

(2) **Insurance.** The owner shall procure and maintain, for as long as the newsrack remains on City property, a commercial general liability insurance policy from an insurer licensed to do business in the State of New York in his or her or its name, which names the City of New York, its departments, boards, officers, employees and agents as additional insureds for the specific purpose of indemnifying and holding harmless those additional insureds from and against any losses, costs, damages, expenses, claims, judgments or liabilities that result from or arise out of the placement, installation and/or maintenance of such newsrack. The minimum limits of such insurance coverage shall be no less than $300,000 combined single limit for bodily injury, including death, and property damage, dedicated exclusively to the liabilities relating to such newsracks, except that any person who maintains an average of 100 or more newsracks at any one time shall maintain a minimum insurance coverage of $1 million dedicated exclusively to such liabilities. All insurance policies shall be endorsed to provide that (a) the City shall have no obligation whatever to provide notice to the insurance company of any occurrence or claim, and that the City's notice to the insurance company of the commencement of a lawsuit against the City, if required, shall be deemed timely if received within 180 days thereof; and (b) notice by any other insured of the commencement of any lawsuit against such insured shall constitute notice on behalf of the City as well.

(3) **Insurance certificate.** An insurance certificate shall be submitted to the Commissioner by the owner within sixty (60) days after the effective date of §19-128.1 of the New York City Administrative Code, and thereafter, by December 31 of each year or by the expiration date of the policy, whichever is earlier, certifying that the insurance required by paragraph 2 of this subdivision f is in place for all newsracks owned by such person. When a newsrack that is not covered by such insurance is placed or installed on a sidewalk after the effective date of such §19-128.1, the owner shall, within sixty (60) days after the effective date of §19-128.1 of the New York City Administrative Code or within ten (10) days of the installation of such newsrack, whichever is later, provide to the Department the insurance certification required pursuant to this subdivision f. Acceptance by the Commissioner of any insurance certificate, whether or not conforming to the requirements of paragraph 2 of this subdivision f, shall not relieve the owner of his, her or its obligation to actually provide such insurance. The certificate shall provide that no cancellation, termination or alteration shall be made without thirty (30) days' advance written notice to the Department.

(g) **Violations and removal.** Violations of the provisions of §19-128.1 of the Administrative Code or these rules shall be enforced and the newsracks shall be removed by the Commissioner pursuant to provisions of subdivision f of such §19-128.1 and any other applicable provisions of law. The City shall charge the owner for the cost of removal and storage. The charge for removal shall be $50 per newsrack. The storage charge shall be $1.40 per newsrack per day.

(h) **Notices.** All notices of violation required to be served on the owner pursuant to these rules or §19-128.1 of the Administrative Code shall be served as required by law. Notices of correction shall be served upon the address provided pursuant to the registration provisions in these rules. In the absence of the required registration information, service shall be made on the entity identified on the newsrack or in the publication found in the newsrack.

DERIVATION

Section 2-08 derived generally from former §§2-08 and 2-09 from original publication July 1, 1991.

NOTE

1. Statement of Basis and Purpose in City Record Mar. 7, 2003:

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter.

On August 27, 2002, Mayor Bloomberg signed Local Law 23, adding a new §19-128.1 which provides for the regulation of newsracks. The law goes into effect 180 days after its enactment. The Department of Transportation is authorized to take any administrative actions necessary prior to that date to put the provisions of the law into effect. These rules serve to clarify and add detail to the provisions of Local Law 23, specifically with respect to chaining, notification and insurance.

2. Statement of Basis and Purpose in City Record Oct. 20, 2004: The Commissioner of the Department of Transportation is authorized to regulate work taking place on City streets and sidewalks pursuant to §2903 of the New York City Charter and Title 19 of the New York City Administrative Code. On July 12, 2004, Mayor Bloomberg signed Local Law No. 36, which amended §19-128.1 of the Administrative Code. These rules serve to conform the Department's rules to the new law. Subdivision (a) of §2-08 is being amended to include a definition of the term "owner" in order to ensure that only one entity/individual is responsible for all Department requirements regarding newsracks. Subparagraph (iii) of paragraph (1) and paragraph (3) of subdivision (b), subdivision (c), subdivision (f), subdivision (f), subdivision (g) and subdivision (h) of §2-08 are being amended to conform with the new definition of "owner." Paragraph (4) of subdivision (b) of §2-08 is being amended to reduce the number of times that the Department must be notified of the location of newsracks in accordance with Local Law No. 36. Paragraph (2) of subdivision (d) of §2-08 is being amended to require conformance with all notification requirements regarding the location of newsracks. Subdivision (e) of §2-08 is being amended to eliminate previous cleaning requirements and to require a newsrack owner to certify that best efforts have been taken to maintain the newsrack(s) and to keep logs and records detailing the measures taken to maintain such newsrack(s) in accordance with Local Law No. 36.

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 2-09

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-09 Sidewalk, Curb and Roadway Work.

(a) **Compliance with requirements.** Owners or builders installing or repairing roadway pavement, sidewalk and curb in connection with uses other than those requiring a Certificate of Occupancy (C of O) or letter of completion from the New York City Department of Buildings shall comply with the following requirements:

(1) The Sidewalk, Curb & Roadway Application (SCARA) and all appropriate forms, plans and certifications shall be submitted to the Department.

(2) All public infrastructure work shall be designed and installed in compliance with current highway engineering practice, the latest version of this publication, and the latest versions of these other Department publications: Standard Details of Construction, Standard Specifications, and Instructions for Filing Plans & Guidelines for the Design of Sidewalks, Curbs, Roadways and Other Infrastructure Components.

(b) **Professional self-certification.** (1) A property owner may install the required street infrastructure without prior review of the plan(s) by the Department under a process of professional self-certification. Plan review by the Department will not be required when a Professional Engineer, Registered Architect or Registered Landscape Architect self-certifies that the proposed infrastructure work complies strictly with the requirements of the publications listed above in paragraph (2) of subdivision (a) of this section and meets or exceeds the Department's standards and specifications.

(2) If a submittal is not professionally self-certified, full Department review and approval must be obtained before work can begin.

(c) **Coordination with capital projects-all city, state and federal agencies and public authorities.** In some cases, the required infrastructure work may be proposed for installation by an agency or authority under a capital improvement project. It shall be the sole responsibility of every applicant to examine all capital plans to see whether any such work is planned. If so, the applicant shall coordinate the improvements with the appropriate agency or authority.

(d) **Required submissions.** (1) Every applicant shall submit three (3) original SCARAs (no photocopies) for each project. See Instructions for Filing Plans & Guidelines for the Design of Sidewalk, Curbs, Roadways and Other Infrastructure Components.

(2) Every applicant shall submit the following:

(i) The correct Plan Type as required by SCARA.

(ii) The correct Certification Block as required by SCARA.

(iii) Written approval from the Landmarks Preservation Commission or the Art Commission of the City of New York, if applicable (applicant must check to see if the project is in a landmarked area or historic district).

(iv) Material testing, if required by SCARA.

(v) Maintenance agreement, if required by SCARA.

(vi) Statement of Professional Certification to accompany SCARA (optional).

(e) **Waiver.** (1) A property owner may request a waiver of any requirement of the Department.

(2) The request shall be prepared in writing by a professional architect, engineer or landscape architect and shall have an original seal and signature affixed.

(3) It shall be submitted to the Department's Bureau of Permit Management & Construction Control.

(4) Supplementary materials must be submitted to support the waiver request, such as maps, drawings, traffic reports, calculations, affidavits, etc. No consideration will be given without complete and adequate documentation.

(5) A waiver may be granted at the discretion of the Commissioner, except where prohibited by law.

(f) **Sidewalk.** (1) **Property owners' responsibility.** Property owners shall, at their own cost, install, repave, reconstruct and maintain in good repair, at all times, the sidewalk abutting their properties, including, but not limited to the intersection quadrant for corner property, in accordance with the specifications of the Department. Upon failure of a property owner to install, repave, reconstruct or repair the sidewalk pursuant to a Notice of Violation issued by the Department after an inspection, the Department may perform the work or cause it to be performed and shall bill the property owner pursuant to §19-152 of the New York City Administrative Code. If the property owner wishes to protest the violation, he/she may make a request at the appropriate borough office within the time specified in the notice of violation and the Department shall provide a reinspection by a different departmental inspector than the one who conducted the first inspection. The findings of the second inspection supersede the findings of the first inspection.

(2) **Permit required.**

(i) A permit is required to install, repave, reconstruct or repair any sidewalk where the work involves an area of more than twenty-five square feet. Where the work involves an area of twenty-five square feet or less, a permit is only required where the purpose of the work is to remove a violation.

(ii) A sidewalk closing permit shall be required if a minimum width of five feet cannot be maintained on the

sidewalk for unobstructed pedestrian passage.

(iii) An applicant shall file:

(A) An application for a sidewalk construction permit stating the location of the sidewalk work, including driveway, if applicable, and the start and estimated completion dates. All subway gratings, utility covers and castings situated in the sidewalk area which are not at proper grade or are in a dangerous condition shall be noted in the application;

(B) A plan for the restoration of the sidewalk, approved by the Department of Buildings, where the existing sidewalk is the structural roof of a vault or other opening.

(iv) An owner of the abutting property who files an affidavit stating therein that he/she will not employ any person or persons to repair the sidewalk for him/her, shall not be required to submit a commercial general liability insurance policy or workers' compensation insurance.

(3) **Permit requirements.** All permits are subject to applicable provisions contained in §2-02 of these rules.

(4) **General sidewalk requirements.**

(i) Except as otherwise authorized, all sidewalks shall be concrete. Sidewalks shall consist of a single course of concrete, 4" in thickness, laid upon a foundation 6" in thickness; in driveways and corner quadrants the concrete slab shall be 7" in thickness.

(ii) The foundation material shall consist of clean $^{3}/_{4}$" broken stone, recycled concrete, gravel or clean granular materials meeting the standard specifications. The foundation material shall be tamped and compacted according to the specifications.

(iii) The sidewalk shall be constructed of New York City Mix Design Number B3200 concrete mix as per the specifications. The concrete shall be bought from a concrete plant approved by the New York State Department of Transportation or from an approved volumetric mixer. Any permittee placing 150 square feet or less of sidewalk may request approval to use a portable mixer from the Department.

(iv) **Sidewalk cores.**

(A) Cores shall be required for all sidewalks in excess of 100 lineal feet. A core shall be required for each 500 square feet of sidewalk or fraction thereof. A minimum of 2 cores is required. Core evaluation reports by an approved laboratory shall be submitted to the Department.

(B) In the case of a one- or two-family dwelling on a corner lot and/or where the length of the sidewalk on each side is less than 100 lineal feet, the cores may be waived, provided that an affidavit of a Professional Engineer or Registered Architect who supervised the construction certifies that the work conforms with the specifications, and material delivery slips are submitted. (Delivery slips are to be signed by an authorized representative of the contractor.)

(C) If the results of the cores meet the Department's requirements, the applicant shall file an affidavit from a Licensed Surveyor, Registered Architect or Professional Engineer certifying that the sidewalk, curb and roadway have been installed in conformance with the submitted SCARA plan. A final survey showing the actual grades as built shall be filed with the Department and the topographical Bureau of the office of the applicable Borough President.

(v) Expansion joints are typically placed at 20' intervals and at the property or lot line. Expansion joints shall be placed between curb and sidewalk. Expansion joints shall be placed between concrete of different thicknesses or to match existing expansion joints. Every effort shall be made to isolate sidewalk hardware or other fixed objects in the sidewalk such as fire hydrants and electrical boxes with expansion material. Expansion joint filler material shall be

placed to full depth of sidewalk.

All expansion joints shall be recessed $^1/_2$" below finished sidewalk surface and sealed with Department specified sealer as soon as practical. The sealer should be applied carefully to avoid over-spilling onto sidewalk surface area. The joints are to be flush with the finished surface. Joints shall not be sealed during freezing temperatures.

(vi) The concrete shall be poured and finished in accordance with the specifications.

(vii) Flags shall be 5' × 5' where feasible. The following methods of scoring shall be employed unless otherwise approved by the Commissioner: The frontage of each building shall be divided by five. If it is exactly divisible, all flags shall be 5' wide; if not, the flags shall be plus or minus in an amount which will make them as near to 5' as possible. Cross flag scoring shall be at 90 degrees to the building line and curb. The flag markings along the sidewalk between the curb and property line shall be parallel with the property line and curb and be uniformly 5' apart commencing at the property line, with the odd flag width, if any, nearest the curb.

(viii) All flags containing substantial defects shall be fully replaced. Patching of individual flags is not permitted.

(ix) When an existing concrete sidewalk is to be replaced and the foundation material meets specifications, the foundation material can be retained and graded to the required subgrade. Any foundation material not meeting specification shall be removed.

(x) Sidewalk grades: Unless the Department grants a waiver of grade, permanent sidewalks shall be laid to the legal curb grades.

(xi) Transverse slope: Sidewalks shall be laid to pitch from the building line toward the curb except in special cases as noted. The minimum slope, calculated on a line perpendicular to the curb, shall be 1" in 5', and the maximum shall be 3" in 5'. Minimum slopes shall be used wherever possible.

Note: The maximum transverse slope permitted for vault lights, covers, gratings and other sidewalk structures is $1^3/_4$" in 5'.

(xii) **Longitudinal slope:** The longitudinal slope of the sidewalk shall be uniform and parallel to the curb at the curb's proper grade.

(xiii) **Corner treatment:** The two slope lines meeting at the intersection of the two building lines shall drop from a common point at the building corner toward their respective curbs at a rate within the limits prescribed by these regulations. If this is not possible, the applicant shall submit sketches or drawings, in duplicate, showing the method of treatment proposed, to the Commissioner for approval.

(xiv) **Pedestrian ramps:** Any person constructing, reconstructing or repairing a corner shall install pedestrian ramps in accordance with the specifications and in accordance with the latest revision of Standard Drawing H-1011.

(xv) **Adjoining existing and new sidewalks:** Junctions and transitions between new sidewalk and existing walk shall conform to the specifications.

(xvi) **Distinctive sidewalk:**

(A) A sidewalk of a distinctive design or material may be permitted and shall harmonize with the architecture of the abutting building and/or area. The property owner or designated representative shall submit to the Department for approval: detailed plans, applicable fee, the Distinctive Sidewalk Improvement Maintenance Agreement (DSIMA) and material samples of the proposed sidewalk.

(B) The distinctive sidewalk shall be repaired in kind or be replaced in its entirety with concrete. Changes to

existing materials require a new DSIMA.

(C) The distinctive sidewalk shall be approved by the Art Commission prior to installation.

(xvii) **Sidewalk hardware and structures:**

(A) Cellar doors, gratings, underground street access covers or other similar items shall not be placed in the sidewalk unless they are of a type approved by the Department of Buildings.

(B) Any abandoned structures shall be removed and replaced with concrete side- walk.

(C) Where the existing sidewalk is the structural roof of a vault or other opening, a plan approved by the Department of Buildings, along with vault plans as required by §2-13 of these rules, shall be filed for the restoration of the sidewalk.

(D) If a sidewalk improvement is in the vicinity of subway gratings or over a subway structure, the permittee shall obtain the approval of the New York City Transit Authority prior to the commencement of any work.

(xviii) **Historic Districts:**

(A) In Historic Districts, property owners shall obtain written approval from the Landmarks Preservation Commission prior to the repair or replacement of sidewalks. All work shall be done in compliance with the rules of the Landmarks Preservation Commission, and in accordance with the specifications.

(B) In Historic Districts gratings, bullseyes, vault lights, iron doors and other similar structures situated in the sidewalk shall not be removed without the authority of the Landmarks Preservation Commission.

(xix) No person shall deface any sidewalk by painting, printing or writing names or advertisements, placing other inserts, attaching, in any manner, any advertisement or other printed matter, or by drawing, painting or discoloring such sidewalk, except as required by State of New York Industrial Code Rule 53 relating to Construction, Excavation and Demolition Operations at or near Underground Facilities.

(xx) **Tree pits and trees:**

(A) No trees shall be planted in the sidewalk area unless a Street Opening Permit is issued by the Department. No such permit shall be issued by the Department unless the prior written consent of the Department of Parks and Recreation authorizing the tree planting is furnished. Tree pits shall be constructed in accordance with the specifications.

(B) The soil level in the completed tree pits, including any paved surface, shall be flush with the sidewalk area and the maximum dimensions of the tree pit shall be 5' × 5'.

(C) No trees within the sidewalk area shall be disturbed or removed without the permission of the Department of Parks and Recreation.

(D) No trees or tree pits shall be installed in Historic Districts without a report from the Landmarks Preservation Commission.

(5) **Substantial defects.** Any of the following conditions shall be considered a substantial defect.

(i) One or more flags missing or sidewalk never built.

(ii) One or more flag(s) cracked to such an extent that one or more pieces of the flag(s) may be loosened or readily

removed.

(iii) An undermined flag below which there is a visible void or a loose flag that rocks or seesaws.

(iv) A trip hazard where the vertical differential between adjacent flags is greater than or equal to $^1/_2$" or where a flag contains one or more surface defects of one inch or greater in all horizontal directions and is $^1/_2$" or more in depth.

(v) Improper slope, which shall mean (i) a flag that does not drain toward the curb and retains water, (ii) flag(s) that shall be replaced to provide for adequate drainage or (iii) a cross slope exceeding established standards.

(vi) Hardware defects, which shall mean (i) hardware or other appurtenances not flush within $^1/_2$" of the sidewalk surface or (ii) cellar doors that deflect greater than 1" when walked on, are not skid resistant or are otherwise in a dangerous or unsafe condition.

(vii) A defect involving structural integrity, which shall mean a flag that has a common joint, which is not an expansion joint, with a defective flag and has a crack that meets the common joint and one other joint.

(viii) Non-compliance with Department specifications for sidewalk construction.

(ix) Patchwork, which shall mean (i) less than full-depth repairs to all or part of the surface area of broken, cracked or chipped flag(s) or (ii) flag(s) partially or wholly constructed with asphalt or other unapproved non-concrete material; except that patchwork resulting from the installation of canopy poles, meters, light poles, signs and bus stop shelters shall not be subject to this provision unless the patchwork constitutes a substantial defect as set forth in subparagraphs (i) through (viii) of this paragraph.

(g) **Curb (concrete, steel faced, stone).** (1) **General permit conditions.**

(i) The permittee shall complete all curb construction or installation before commencing any roadway paving operation or sidewalk construction, unless otherwise permitted by the Department.

(ii) All curbs more than 20 feet in length shall be built according to specifications. A Street Opening Permit is required.

(iii) Curbs less than 20 feet in length shall be built in accordance with Standard Detail H-1054. No Street Opening Permit is required if done in conjunction with a sidewalk repair permit.

(iv) Permits for the construction or installation of drop curbs and concrete driveways shall not be issued unless authorized by a permit from the Department of Buildings.

(v) All curbs shall be built according to specifications.

(2) **Recess in vault for curbs.** Where a vault extends to the curb line, the permittee shall provide a recess for its entire length in which the curb may be set or reset. See the Standard Drawing on file with the Department.

(3) **Permit requirements.** All permits are subject to applicable provisions contained in §2-02 of these rules.

(4) No person shall deface any curb by painting, printing or writing names or advertisements, placing other inserts, attaching, in any manner, any advertisement or other printed matter, or by drawing, painting or discoloring such curb.

(5) **General provisions for construction.** Concrete curbs shall be 6 inches wide at the top, 8 inches wide at the bottom and 18 inches deep, or equal to the standards, measured on the back. All construction is to be at legal line and grade, or at any other line and grade approved by a Department engineer, and according to the specifications. Penetration of broken stone base will not be allowed unless the outside temperature is 50 degrees Fahrenheit or above.

(h) **Roadway.** (1) Roadway pavement shall be 2 inches of asphaltic concrete wearing surface on a 4-inch penetrated broken stone base or a 4-inch compacted plant mixed binder base. Where the existing roadway is asphaltic concrete wearing course on a concrete base, restoration shall consist of matching the existing thickness but in no case shall there be less than 3 inches of asphaltic concrete wearing course on a 6-inch concrete base on compacted earth. Where soil conditions require, the base shall be constructed of such materials and depth as is acceptable to the Department.

(2) The roadway shall be paved at a minimum from the curb line to 5 feet beyond the center of the legal roadway width in front and on the sides of the property of the applicant. In no case shall the width of required roadway paving be less than 20 feet. Beyond the front of the property, there shall be access over a hard surface road to the nearest completed paved street system. If this does not exist, the applicant shall provide a pavement of at least 2 inches of asphaltic concrete graded to meet the existing paved street system. The width of such paving shall be at least 20 feet.

(3) **Roadway cores.**

(i) Cores shall be required for all roadway pavement in excess of 100 lineal feet. A core shall be taken by the applicant for every 700 square yards of paved roadway or fraction thereof, in such manner as directed by the supervising engineer. A minimum of 2 cores is required. Core evaluation reports by an approved laboratory shall be submitted to the Department or self certified by a Professional Engineer or Registered Architect.

(ii) Where the length of roadway pavement is less than 100 lineal feet, the requirement of cores may be waived provided that an affidavit of a Professional Engineer or Registered Architect who supervised the construction certifies that the work conforms with the specifications, and material delivery slips are submitted. (Delivery slips are to be signed by an authorized representative of the contractor.)

(iii) If the results of the cores meet the Department's requirements, the applicant shall file an affidavit from a Licensed Surveyor, Registered Architect or Professional Engineer certifying that the sidewalk, curb and roadway have been installed in conformance with the legally established grades as built under the terms of the permit. A final survey showing the actual grades as built shall be filed with the Department's borough office and the Topographical Bureau of the office of the applicable Borough President.

(4) The Department will issue a letter of acceptance for maintenance subject to the guarantee period of the roadway pavement, to the builder or developer if the roadway pavement meets the requirement of the permit and the specifications.

HISTORICAL NOTE

Section repealed and added City Record May 1, 1998 eff. May 31, 1998.

Section amended City Record Mar. 17, 2000 §2, eff. Apr. 16, 2000. [See Note 1]

Subd. (f) par (4) subpar (iii) amended City Record June 7, 2007 §13, eff. July 7, 2007. [See T34

§2-02 Note 5]

DERIVATION

Section 2-09 was derived in part from former §§2-02, 2-16 and 2-31 from original publication July

1, 1991. Former §2-02 was amended in City Records Apr. 10, 1991 and July 10, 1991.

NOTE

1. Statement of Basis and Purpose in City Record Mar. 17, 2000:

Section 2-09 is being amended and §2-16 is being deleted to reflect the streamlining of the unit and process formerly known as builders pavement. Many of the provisions of §2-16 have been incorporated into §2-09, including all the SCARA requirements. Obsolete provisions in §2-16 were deleted.

2. Statement of Basis and Purpose in City Record May 7, 2001: Section 2-09 is being amended to require property owners to obtain a permit for sidewalk work, even if the area of work is less than 25 square feet, where the purpose of the work is to remove a violation, thus enabling the Department to inspect and remove sidewalk violations.

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an

opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 2-10

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-10 Street Furniture.

(a) **Permit Required.** (1) See Revocable Consent Rules, Chapter 7 of this Title 34, for street furniture other than bicycle racks, small planters and non-electrical sidewalk sockets.

(2) The Commissioner may issue permits for the placement or installation of bicycle racks, planters smaller than four square feet or two feet in diameter, as measured on a horizontal plane, non-electrical sidewalk sockets and temporary structures placed on sidewalks for security purposes.

(3) It shall be a violation of these rules to erect, place or install street furniture without a revocable consent pursuant to Chapter 7 of this Title or a permit pursuant to this section.

(b) **Permit Requirements.** All permits are subject to applicable provisions contained in §2-02 of these rules.

(c) **General Conditions.** (1) Eight feet or one-half the sidewalk width, whichever is greater, shall be maintained by the permittee for unobstructed pedestrian passage.

(2) Street furniture shall not be placed at the curb directly opposite a building entrance or cellar door. Street furniture at the building line shall not be installed within three feet of a building entrance or cellar door.

(3) Unless otherwise authorized by the Commissioner in writing, street furniture shall not be installed within:

15 feet of Subway Entrance and Exit Stairs

15 feet of Bus Stop Zone

15 feet of Newsstand

15 feet of Fire Hydrant

10 feet of either side of the area created by extending the building line to the curb (the "corner")

8 feet of Bicycle Rack

7 feet of Driveway

5 feet of Cafe

5 feet of Bench

5 feet of Tree (without tree pit)

5 feet of Standpipe

4 feet of Telephone Booth/Pedestal

4 feet of Mailbox

4 feet of Street Light

4 feet of Parking Meter

4 feet of News Racks

4 feet of Utility Poles

4 feet of other street furniture authorized by applicable law or rule

3 feet of Canopy

3 feet of Utility Hole or Transformer Vault Cover

3 feet of Grating

3 feet of Sign Pole

3 feet of Edge of Tree Pit

(4) Street furniture shall be placed at least eighteen inches but no more than twenty-four inches from the face of the curb.

(5) Permittees shall be responsible for all repairs to streets damaged due to the placement, installation or removal of street furniture.

(6) Permittees shall be responsible for all street furniture maintenance.

(7) Placement of street furniture on distinctive sidewalks requires the written approval of the property owner.

(8) Permits shall expire one year after date of issuance, unless revoked sooner by the Commissioner.

(9) Permits are subject to review and approval each year prior to renewal.

(10) All street furniture permits are subject to the requirements of the Americans With Disabilities Act.

(d) **Application.** (1) Applications shall be reviewed individually for each location, shall be subject to approval by the Commissioner, and shall include a sketch with the following information:

(i) lot and block number(s) and address(es) of the property;

(ii) property lines and sidewalk dimensions;

(iii) existing topographical conditions, including but not limited to items listed in (c)(3); and

(iv) existing vaults and areaways.

(2) Written approval from the Arts Commission and/or Landmarks Preservation Commission shall be obtained where required.

(3) Permittees shall obtain the written approval of the property owner.

(e) **Design Criteria.** (1) Advertisements shall not be placed on street furniture.

(2) Street furniture finishes shall be graffiti retardant.

(3) Street furniture design shall be such that both the body and base are not conducive to trapping debris.

(f) **Planters.** (1) Planters shall be no more than three feet in height and shall be spaced at intervals of four feet or more unless otherwise directed.

(2) Planters shall not occupy an area of more than four square feet or two feet in diameter. For larger planters see Revocable Consent Rules, Chapter 7 of this title.

(3) Planters shall be placed with the face or outer edge eighteen inches from the face of the curb or no more than three feet from the building line.

(4) Applicants shall adhere to the New York City Department of Parks and Recreation's applicable standards for acceptable trees in planters.

(5) Planters shall be maintained with live plants at all times and be kept free of debris.

(g) **Non-electrical Sidewalk Sockets.** Veteran organizations of the Armed Services may, with the consent of the Commissioner and owners of the abutting property, place flagpole sockets at least five feet apart and at least eighteen inches, but no more than twenty-four inches, from the face of the curb. When the sidewalk socket does not have a flagpole in it, it shall be capped or covered and flush with the sidewalk.

(h) **Bicycle Racks.** No person shall install a bicycle rack without a permit. All racks shall be installed in compliance with the bicycle rack clearances, which may be obtained from the Department's permit office. Based on sound engineering judgment and where pedestrian volume will allow, the minimum clearances may be waived. A site request that adheres to minimum clearances shall be denied where the bicycle rack would interfere with the safe passage of pedestrians.

(i) **Maintenance Required by the Permittee or Property Owner.** (1) Street furniture shall be maintained in a safe condition at all times.

(2) Street furniture shall be graffiti and litter free at all times.

(3) The Department may order the repair, replacement or removal of unsafe or defective street furniture.

(4) Non-compliance shall result in permit revocation pursuant to §2-02 of these rules.

(j) **Temporary security structures.**

(1) Notwithstanding any inconsistent provision of these or any other rules, the Commissioner may issue a permit for a period of one year for temporary structures placed on sidewalks for security purposes. Such structures shall include, but not be limited to, concrete barricades, large planters and fencing.

(2) Notwithstanding any inconsistent provision of these rules, for the purposes of this subdivision, the standards and clearances in Chapter 7 of this title shall apply. For concrete barricades the standards for planters in Chapter 7 shall apply.

(3) A permit issued pursuant to this subdivision may be revoked or modified at will by the Department.

(4) Such permit may be renewed for a maximum of two consecutive six-month periods. The approval of the New York City Art Commission shall be obtained prior to the grant of a renewal.

(5) At the expiration of the permit and any renewal, if applicable, the person or entity wishing to continue to maintain such structures shall do so only pursuant to a revocable consent obtained from the Department pursuant to the provisions of Chapter 7 of this title.

HISTORICAL NOTE

Section repealed and added City Record May 1, 1998 eff. May 31, 1998.

Section in original publication July 1, 1991.

Subd. (a) par (2) amended City Record Oct. 27, 2003 eff. Nov. 26, 2003. [See Note 1]

Subd. (j) amended City Record June 27, 2005 §2, eff. July 27, 2005. [See Note 2]

Subd. (j) added City Record Oct. 27, 2003 eff. Nov. 26, 2003. [See Note 1]

DERIVATION

Section 2-10 derived generally from former §§2-07 and 2-08 from original publication July

1, 1991.

NOTE

1. Statement of Basis and Purpose in City Record Oct. 27, 2003:

The Commissioner of Transportation is authorized to promulgate regulations regarding City streets and sidewalks pursuant to section 2903 of the New York City Charter and Title 19 of the New York City Administrative Code.

The Commissioner is authorized to grant revocable consents with respect to City property under its jurisdiction pursuant to section 364 of the New York City Charter.

Section 2-03 is being amended to add a fee for installation of temporary security structures. Section 2-10 is being

amended to add temporary security structures to the list of items for which the Commissioner may issue permits. Section 7-04 is being amended to add a reference to permits for temporary security structures.

There has recently been increased interest from property owners in placing concrete structures on the sidewalk for security purposes. The Department wishes to oversee and respond relatively promptly to what is being placed on the sidewalks without creating a process that is overly time-consuming and onerous. A non-renewable, one-year permit will allow these items, which are generally of a temporary, stopgap nature intended to meet legitimate security concerns, to be placed on sidewalks expeditiously, while more planned and permanent structures are pursued. At the expiration of the one-year period, a revocable consent must be obtained for the more planned and designed security structure as for other street furniture.

2. Statement of Basis and Purpose in City Record June 27, 2005: The Commissioner of Transportation is authorized to promulgate regulations regarding City streets and sidewalks pursuant to §2903 of the New York City Charter and Title 19 of the New York City Administrative Code. Section 2-03 is being amended to add a fee for the renewal of permits for the installation of temporary security structures. Subdivision j of §2-10 is being amended to allow for a maximum of two six-month permit renewals, provided Art Commission approval is obtained first. The Department has determined that the process for obtaining revocable consents can be lengthy since both the Department of City Planning and the Art Commission are involved in providing approvals. Consequently, the Department wishes to allow entities to have additional time to complete the consent process by allowing for limited renewals of the temporary security structure permits.

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 2-11

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-11 Street Openings and Excavations.

(a) **Permit Required.** (1) No excavations shall be made in any street unless a Street Opening Permit is obtained.

(i) For plumbing work requiring a street opening or excavation, a Street Opening Permit will only be issued to a licensed master plumber as defined in §26-141 of the Administrative Code.

(A) The licensed master plumber shall be required to provide a valid New York City licensed master plumber's certificate issued by the New York City Department of Buildings. The licensed master plumber shall also present a copy of any documentation issued by the New York City Department of Environmental Protection regarding the plumbing work that is to be conducted. These items must be submitted to the Department before the Department approves the Street Opening Permit.

(B) The Commissioner may suspend review of applications for permits under this subparagraph, revoke or refuse to renew a permit, or refuse to issue a permit to any applicant, pursuant to the provisions of §2-02(j), 2-02(k), or 2-02(l) of these rules.

(ii) Notwithstanding the provisions of subparagraph (i) of this paragraph, for any work performed pursuant to a valid contract with a local or state governmental entity requiring a street opening or excavation, a Street Opening Permit will be*2 only be issued to the contractor retained by the local or state governmental entity to perform the work requiring the street opening or excavation.

(2) Prior to any excavation or street opening pursuant to a franchise or revocable consent, all permits required by

these rules shall be obtained.

(3) Street Construction in Historic Districts. No planned street construction, reconstruction or maintenance operation shall be undertaken in a designated historic district unless preapproved in writing by the Landmarks Preservation Commission. The provisions of subdivision (g) of this section also apply.

(b) **Permit requirements.**

(1) All permits are subject to applicable provisions contained in §2-02 of these rules.

(2) A Permittee shall obtain a separate permit for each 300 linear feet of a block segment and for each intersection where work is to be performed.

(c) **Conditions.** (1) **Proper notification.** Permittees and owners of underground facilities shall comply with State of New York Industrial Code Rule 53 relating to Construction, Excavation and Demolition Operations at or near Underground Facilities. Permittees shall take the precautions necessary to protect such pipes, mains, conduits, and other appurtenances at their own expense.

(2) All work shall be done in accordance with the specifications and the provisions of this §2-11.

(3) All debris on the street shall be removed at the expiration of the permit, unless otherwise stipulated.

(d) **Application.** (1) Applications shall include:

(i) a description of the work to be performed;

(ii) the reason for the work;

(iii) the street address including the nearest cross streets where the excavation or street opening is to be made;

(iv) a sketch indicating the size and location of the proposed opening(s) which shall include:

(A) the distance in feet from the nearest intersection and from the nearest curbline;

(B) the dimensions of the opening including length and width; and

(C) the existing parking restrictions.

(v) the start and estimated completion dates;

(vi) the type of pavement or surface to be opened;

(vii) whether the proposed work will be on a protected street (if so, the provisions of the subdivision (f) of this section apply);

(viii) the name and address of the compaction testing company or laboratory, as required;

(ix) the name of the contracting City agency, contract number, and OCMC reference number, if applicable; and

(x) whether the proposed work will be within 100 feet on, above or below or in either direction of any portion of a bridge, tunnel, underpass or overpass (if so, approval from the Division of Bridges shall be obtained). For purposes of this section "portion" shall include, but not be limited to, approach slabs, retaining walls, and column supports. The method of excavation and final restoration shall be determined by the Division of Bridges.

(2) No trees within the sidewalk area shall be disturbed or removed without the permission of the Department of Parks and Recreation.

(3) A permittee performing curb to curb restoration on more than fifty (50) percent of a block segment on a non-protected street shall submit a protected street determination form to the Department for approval prior to obtaining any necessary permits. Such form shall be attached to the permit application. This requirement shall not apply to permittees performing work for the Department or for the Department of Design and Construction.

(e) **Excavation and Restoration Requirements.** (1) **Proper Notice.**

(i) Permittees shall notify the Police Department and the Communications Centers of the Fire Department and the Department of Transportation of construction and street operations which require street closing permits at least twenty-four hours in advance of the commencement of non-emergency work.

(ii) All permittees shall comply with the provisions of subdivision (g) of §2-02 of these rules, if applicable.

(2) **Breaking Existing Pavement.** Precutting of pavement wearing course and base shall be required for pavement removal. The use of a "Ram Hoe" or truck mounted pavement breaker is not permitted, unless otherwise authorized. Only hand held tools may be used for this purpose. This applies to all streets at all times. The permittee shall be responsible for keeping the construction area as clean and neat as possible during the permit life. No material shall restrict water flow in gutters. All possible arrangements for the safety of the general public shall be maintained. Every effort shall be made to keep the pavement opening dimensions to an absolute minimum.

(3) **Excavation.**

(i) Sheeting and Bracing. The sides of every open excavation five feet or more in depth shall be securely held by adequate timber, sheeting and bracing where the earth is not sloped to the angle of repose of the material, and where unsafe conditions are created due to composition of the soil, climatic conditions, depth of excavation or construction operations.

(ii) Tunneling or Jacking. No person shall make any installation or repair between two or more street openings by means of tunneling or jacking, without a permit.

Tunneling or jacking may be permitted for the installation or replacement of a lateral connection provided the opening does not exceed eight inches in diameter. Full trenching shall be required for all waste line repair/connections.

(4) **Traffic Maintenance.**

(i) No more than one lane of traffic may be obstructed, except as provided by OCMC stipulations, or as otherwise authorized by the Commissioner.

(ii) All unattended street openings or excavations in a driving lane, including intersections, shall be plated, except as otherwise directed by the Commissioner. The Commissioner may require all street openings and excavations at any location to be plated when no work is in progress. In the case of gas or steam leaks, barricades in accordance with the New York State or Federal Manual on Uniform Traffic Control Devices shall be used until the leak is corrected.

(iii) Barricades, signs, lights and other approved safety devices shall be displayed in accordance with the New York State or Federal Manual on Uniform Traffic Control Devices.

(iv) The permit may restrict street operations and construction within critical areas to nights, weekends, or off-traffic hours. (Hours other than weekdays 7 a.m.-6 p.m. will require a noise variance granted by OCMC.)

(v) **Flagpeople.** Permittees whose work results in the closing of a moving traffic lane, which requires traffic to be

diverted to another lane, shall, at all times while actively working at the site, post a flagperson or utilize an authorized plan for the maintenance and protection of traffic at the point where traffic is diverted to assist motorists and pedestrians to proceed around the obstructed lane.

(5) **Temporary Closing of Sidewalks.** A minimum of five feet sidewalk width of unobstructed pedestrian passageway shall be maintained at all times. Where openings and excavations do not allow for five feet of unobstructed pedestrian passageway, a temporary sidewalk closing permit is required.

(6) **Work Site Maintenance.**

(i) All excavated material shall be either removed from the site or stockpiled at a designated curb, properly barricaded in accordance with the New York State or Federal Manual on Uniform Traffic Control Devices and stored to keep gutters clear and unobstructed in accordance with §2-05 of these rules.

(ii) All obstructions on the street shall be protected by barricades, fencing, or railing, with flags, lights, or signs in accordance with the New York State or Federal Manual on Uniform Traffic Control Devices placed at proper intervals and during the hours prescribed. During twilight hours the flags shall be replaced with amber lights.

(7) **Storage of Materials.**

(i) A street opening permit includes permission to store construction materials in a designated area adjacent to the permitted worksite.

(ii) No separate permit shall be required for the storage of equipment, excluding cranes, in a designated area in compliance with any applicable stipulations on the permit.

(iii) The designated storage area(s) are subject to review and approval by OCMC.

(8) **Backfill and Compaction.**

(i) Upon completion of repairs in a street, permittees shall backfill street openings and excavations in a manner in accordance with the specifications. All materials used for backfill shall be free from bricks, blocks, excavated pavement materials and/or organic material or other debris. Notwithstanding the above, asphalt millings may be used as a backfill material.

(ii) Backfill material shall be deposited in horizontal layers not exceeding twelve inches in thickness prior to compaction. A minimum of ninety-five percent of Standard Proctor Maximum Density will be required after compaction.

(iii) When placing fill or backfill around pipes, layers shall be deposited to progressively bury the pipe to equal depths on both sides. Backfill immediately adjacent to pipes and conduits shall not contain particles larger than three inches in diameter.

(iv) Compaction shall be attained by the use of impact rammers, plate or small drum vibrators, or pneumatic button head compaction equipment. Hand tamping shall not be permitted except in the immediate area of the underground facility, where it shall be lightly hand tamped with as many strokes as required to achieve maximum density. The definition of the "immediate area" shall be a maximum of eighteen inches from the facility.

(v) Where sheeting has been used for the excavation it shall be pulled when the excavation has been filled or backfilled to the maximum unsupported depth allowed by the New York State Department of Labor, Industrial Code Rule 23 and Title 29, Code of Federal Regulations, Part 1926, Safety and Health Regulations for Construction. Where a difference exists between regulations, the more stringent requirements shall apply.

(vi) As a measure of maximum density achieved for restoration, the pavement surface shall not sink more than two inches from the surrounding existing surface during the life of the restoration. More than two inches of settlement shall be deemed a failure of the compaction of the backfill and cause the removal of said backfill to the subsurface facility and new fill installed and properly compacted.

(vii) The permittee shall be required to furnish the Department with copies of in-process compaction reports certified by a Professional Engineer as to the compliance with the requirement of the aforementioned backfill requirements. This certified compaction report shall be submitted along with the cutform for every tenth street opening permit issued to the permittee or as directed by the Commissioner.

(9) **Temporary Asphaltic Pavement.**

(i) Immediately upon completion of the compaction of the backfill of any street opening, the permittee shall install a temporary pavement of an acceptable asphalt paving mixture not less than four inches in thickness after compaction, flush with the adjacent surfaces.

(ii) The permittee has the option of installing full depth pavement using an acceptable asphalt paving mixture immediately upon completion of the compaction of the backfill, excluding reconstructed protected streets and full-depth concrete roadways.

(iii) Upon the expiration of the permit, all equipment, construction materials and debris shall be removed from the site, unless otherwise stipulated.

(iv) When final restoration is to be done, the materials are to be removed with hand tools to a depth necessary to accomplish the final restoration.

(10) **Plating and Decking.**

(i) All plating and decking installed by the permittee shall be made safe for vehicles and/or pedestrians and shall be adequate to carry the load.

(ii) The size of the plate or decking must extend a minimum of 12 inches beyond the edge of the trench, be firmly placed to prevent rocking, and be sufficiently ramped, covering all edges of the steel plates to provide smooth riding and safe condition.

(iii) All plating and decking shall be fastened by splicing, spiking, pinning, countersinking or otherwise protected to prevent movement. When the plates are removed all pins and spikes must be removed and the holes must be filled with a fine asphalt concrete mix.

(iv) Where deflection is more than $^{3}/_{4}$", heavier sections of plates or decking or intermediate supports shall be installed.

(v) All permittees who install plating and decking during the winter months shall either post signs at the site indicating "Steel Plates Ahead Raise Plow" or shall countersink said plates flush to the level of the roadway. All signs shall be of the size and type specified in the most current edition of the Federal Manual on Uniform Traffic Control Devices. These signs shall be placed on the sidewalk, adjacent to the curb, facing vehicle traffic five feet prior to the plates. On two-way streets, signs shall be placed on both sides of the street five feet prior to the plates.

(vi) All plating and decking shall have a skid-resistant surface equal to or greater than the adjacent existing street or roadway surface, but in no event less than a New York State skid resistance number of 0.36.

(11) **Base.**

(i) Concrete and asphalt base material shall conform with Department specifications.

(ii) Concrete base shall be properly plated except where other stipulations have been granted in writing by OCMC.

(iii) Concrete for base shall be plated in a driving lane and intersections or barricaded in accordance with the New York State or Federal Manual on Uniform Traffic Control Devices in a parking lane for a minimum of three days to permit proper cure of concrete, unless otherwise specified by the Department.

(iv) Hot asphalt binder materials may be used in place of concrete for non-protected and/or resurfaced streets at a thickness ratio of one and one-half inch of asphalt for every inch of concrete.

(v) The concrete base shall be restored at the same grade as the existing base; at no time may it be brought up to the asphalt course unless authorization has been granted by the Commissioner.

(vi) At no time will asphalt other than binder be permitted as a base course, unless otherwise authorized by the Commissioner.

(vii) Conduit or pipes shall be installed at a minimum depth of 18 inches from the surface of the roadway, or below the base, whichever is greater. Where conduits and pipes cannot be installed at the required minimum depth, protective plating shall be installed over the facilities upon written request from the permittee and receipt of written approval of the Department.

(12) **Wearing Course.**

(i) Wearing course material shall conform to the Department's specifications.

(ii) The finished grade of the wearing course shall be flush with surrounding pavement on all sides of the cut; the restored wearing course shall extend for a distance of six inches (6") beyond the edge of the base course. In the event a permanent restoration pavement installed settles more than two inches (2") below the surrounding existing surface during the life of the guarantee period, this shall be deemed a failure of the backfill compaction, in which case, the permittee shall remove all of the failed backfill, down to the subsurface facility, and install new, properly compacted backfill.

(iii) The minimum thickness of the wearing course on full depth asphalt restoration shall be two inches (2").

(iv) When more than one roadway opening is made against a single permit and the openings are less than three feet apart after the required cutbacks, the existing wearing course between such openings shall be restored integrally with the opening wearing course restoration, in accordance with the current Standard Detail H-1042.

(v) When a street opening is twelve inches or less from the curb, the entire pavement between the opening and the curb shall be excavated and replaced in kind, in accordance with the current Standard Detail H-1042. The pavement base shall be inspected and repaired where necessary and a new wearing course shall be installed from the curb to the street opening. The areas described above shall be included in the permittee's guarantee.

(vi) Whenever any street is excavated, the permittee shall restore such street in kind as to material type, color, finish or distinctive design.

(vii) Pavements shall be restored in kind in designated historic districts and on streets constructed with cobblestones or other distinctive pavements, or as directed by the Commissioner.

(viii) The wearing course shall be properly sealed completely at the edges of the cut with liquid asphaltic cement ironed in with a heated smoothing iron or by means of infrared treatment to prevent water seepage into the pavement.

(ix) Permittees shall be required to obtain a permit for any changes to, or installation of temporary roadway pavement markings and temporary construction, parking or regulatory signs and supports, including, but not limited to, crosswalks and lane lines. Unless otherwise directed by the Commissioner, all roadway pavement markings, including but not limited to, crosswalks and lane lines, and any parking or regulatory signs or supports shall be replaced in kind to Department specifications. All construction signs and supports and pavement markings shall be removed prior to the expiration of the permit.

(x) Final (permanent) restorations shall be completed within ten (10) working days of the expiration of the permit. During winter months, temporary asphalt and pavement markings shall be placed at the expiration of the permit and maintained until such time as the final restoration may be completed.

(xi) For trenches on protected streets, six inches (6") of base and six inches (6") of the wearing course shall be cut back on both sides of the trench. For trenches on non-protected streets, six inches (6") of the wearing course shall be cut back on both sides of the trench, provided, however, that the total cut is a minimum of eighteen inches (18") wide.

(xii) Any permittee performing work on a street pursuant to paragraph (3) of subdivision (d) of this section shall notify the Department within twenty-four (24) hours of the completion of the work on the same protected street determination form as submitted with the permit application pursuant to such paragraph (3) of subdivision (d) of this section.

(13) **Concrete Pavements.**

(i) When street openings are made in concrete pavements, the pavements shall be saw cut full depth for the entire perimeter of the street opening.

(ii) The concrete restoration shall have the same depth, strength and finish as the original pavement.

(iii) The restoration area shall be plated and maintained until enough strength has developed to sustain traffic without deleterious effect to the roadway.

(iv) Reinforcing shall be replaced in kind and spliced as per specifications for reinforced concrete pavement.

(v) Asphalt restorations will not be permitted in concrete streets or concrete bus stop areas.

(14) **Color Coding.**

(i) At each excavation, the permittee shall either paint temporary circles or install permanent colored markers as required in this paragraph, for the purpose of easily identifying the permittee's openings and restorations.

(ii) If the work is not complete, upon leaving the site the permittee shall paint three inch (3") circles adjacent to the cut, in the area closest to the curb line, in accordance with the placement and color requirements as specified below.

(iii) Upon completion of the restoration, the permittee shall install colored markers as specified below, unless another method is approved by the Department. Permittees shall be required to maintain these markers throughout the guarantee period.

(iv) **Placement of Coding and Markers.**

(A) Permanent markers shall be imbedded at zero grade tolerance, or slightly below, in the new asphalt or concrete without the use of nails and shall be of one piece construction.

(B) For cuts or trenches ten feet (10') or less, one temporary painted circle or permanent colored marker shall be placed in the linear center of the cut.

(C) For cuts or trenches up to fifty feet (50'), one temporary painted circle or permanent colored marker shall be placed at each end of the excavation.

(D) For cuts or trenches over fifty feet (50'), temporary painted circles or permanent colored markers shall be placed every twenty-five (25) linear feet maximum and one shall be placed at each end of the excavation.

(v) Such markers shall be in the shape of a circle measuring between one and one-half inches ($1\frac{1}{2}$") and three-inches (3") in diameter, color-coded as specified below, and shall include only the permittee's five-digit identification number and the two-digit year, unless other information is approved by the Department. The two-digit year shall be placed in the center of the marker, and the five-digit identification number shall be placed above the two-digit year.

(vi) **Specifications.** Such markers shall also be UV-stable and designed not to fade significantly.

(vii) Color codes shall be assigned through Quality Control Procedure Q.P. 3 for permittees other than those listed below. Final pavement markers may be used as an alternative to color codes provided such use is approved by the Department.

(A) Verizon-Cherry red marker

(B) Empire City Subway-Chrome yellow marker

(C) Consolidated Edison Co.-Light blue marker

(D) Keyspan-White marker

(E) Plumbers (water or sewer)-Green marker

(F) Signals and Street Lights-Orange marker

(G) Long Island Power Authority-Yellow marker

(H) Metropolitan Transit Authority-Purple marker

(I) Buckeye Pipe Line-Chrome yellow marker

(J) Fire Department-Purple marker

(K) Cable T.V.-Regal blue marker

(15) **Quality Control Program Requirement for Roadways.**

(i) All permittees engaged in street openings, shall complete the work so as to provide smooth riding surfaces throughout the guarantee period on their respective restorations.

(ii) A documented quality history of restoration shall be maintained by the responsible permittee. This information should show that inspections are made at some optimum intervals to assure conformance to the guarantee.

(iii) Quality Control Program information shall be made available to the Bureau upon request.

(iv) The use of experimental methods or materials may be authorized under selective conditions, upon application to the Bureau for approval prior to use on the City streets.

(v) Any permittee may file a proposed Quality Control Program with the Commissioner for approval. The

Commissioner may waive any of the foregoing specification requirements as part of an approved program of Quality Control. Any waiver so granted shall remain in effect as long as the approved program is implemented in a manner satisfactory to the Commissioner or until the Commissioner's approval is rescinded.

(16) **Other Requirements.**

(i) Street Opening Location Form ("Cutforms")

(A) Permittees shall maintain a street opening location form ("cutform") at their office and shall provide this form to the department upon request. Such cutform shall include the following information:

1. a sketch showing the exact dimensions and location of the restored area, and a description of the opening or trench defined by distance in feet from the nearest intersection and from the nearest curbline;

2. the street opening permit number;

3. the date of completion of the final restoration;

4. the name of the final pavement restoration contractor; and

5. a compaction report certified by a New York State licensed professional engineer.

(B) Failure to submit a cutform upon request may jeopardize future permit requests and may subject permittees to summonses.

(ii) **Guarantee period.** Permittees shall be responsible for permanent restoration and maintenance of street openings and excavations for a period of three years on unprotected streets, and up to five years on protected streets commencing on the restoration completion date. This period shall be the guarantee period.

(iii) Permittees shall comply with all applicable sections of these rules, the specifications, and all other applicable laws or rules.

(f) **Excavations and Street Openings in Protected Streets.** No street opening activity shall be allowed, except for emergency work or as authorized by the Commissioner, in a protected street for a period of five years from the completion of the street improvement. In addition to this subdivision (f), all provisions of §2-11 shall apply to protected streets.

(1) **Permit Issuance.** No permit to use or open any street, except for emergency work, shall be issued to any person within a five year period after the completion of the construction of a capital project relating to such street requiring resurfacing or reconstruction unless such person demonstrates that the need for the work could not have reasonably been anticipated prior to or during such construction. Notwithstanding the foregoing provision, the Commissioner may issue a permit to open a street within such five year period upon a finding of necessity therefor.

(2) **Conditions.** Permittees shall be responsible for contacting the Department of Design and Construction to determine whether a street is scheduled to be rebuilt under a street reconstruction project. Notwithstanding the foregoing provision, a permittee performing emergency work need not contact such Department.

(3) **Application.**

(i) Permittees shall include on the application the justification for any street opening activities on protected streets.

(ii) The permittee shall attach the "Protected Street Opening Permit Application Attachment" to the Street Opening permit application prior to obtaining the permit.

(4) **Restorations.**

(i) No backfill of any opening or excavation on a protected street shall be performed unless the permittee notifies the Department at least two hours prior to the scheduled start time for the backfill except as otherwise authorized by the Commissioner. In no case shall the permittee commence the backfill prior to the scheduled start time. For the base and wearing course, the permittee shall fax its daily paving schedule to the Department prior to commencing work. In addition, during the backfill and compaction phase of the work, permittees must provide, on site, a certified compaction tester from an approved laboratory or a licensed certified tester to test that the compaction of the backfill is in accordance with the Department's rules and specifications.

(ii) The Department may inspect any phase of the work, including but not limited to, initial excavation, backfill and compaction, performance of required cut backs, and final restoration.

(iii) A certification issued by a New York State licensed professional engineer shall be provided to the Department within thirty days of completion of work on protected streets. The certification shall state that the type of work performed was as described in the permit application, and that all phases of the restoration were performed in accordance with Department rules and specifications.

(iv) Permittees shall be responsible for the proper repair of the street opening or excavation for a period of three years from the date of completion or for the duration of the protected street guarantee period, whichever is longer.

(v) All restorations shall conform with the latest version of Department standard details 1042A and 1042B.

(vi) Where street openings cannot be confined to within 8 feet of the curb line, including the required cut back, and/or within the sidewalk area, full curb to curb roadway restoration shall be required where protected street status has been in effect for 18 months or less, unless otherwise directed by the Commissioner.

(vii) The permanent restoration shall be flushed with the surrounding pavement on all sides of the restoration. In the event a permanent restoration pavement installed in violation of the provisions of subparagraph (i) of this paragraph (4) settles more than two inches (2") below the surrounding existing surface during the life of the guarantee period, this shall be deemed a failure of the backfill compaction, in which case, the permittee shall remove all of the failed backfill, down to the subsurface facility, and install new, properly compacted backfill.

(g) **Emergency Street Openings and Excavations.** (1) **Permit Requirements.**

(i) No person shall perform emergency work without obtaining an emergency number from the Department. Permittees shall fax the Emergency Street Opening Permit request form to the Department's Emergency Authorization Unit to obtain an emergency permit number, unless otherwise directed by the Commissioner.

(ii) An emergency permit number may be requested only for emergency work performed on existing services. An emergency permit number shall not be obtained for work to be performed pursuant to a CAR.

(2) **Conditions.**

(i) A permittee shall begin emergency work within two hours after obtaining an emergency permit number.

(ii) A permittee shall perform emergency work on an around-the-clock basis until the emergency is eliminated, unless otherwise directed by the Commissioner. Once the emergency is eliminated on a critical roadway listed in subdivision (c) of §2-07 of these rules, the permittee shall suspend work, restore the full width of the roadway and resume work, if necessary, during the nonrestricted hours indicated in that subdivision. Such resumption of work shall only be undertaken within the 48-hour duration of the emergency permit number. A permittee working with an emergency number on a roadway other than a critical roadway may suspend or resume work at any time within the

48-hour period covered by the emergency number.

(iii) No more than one lane of traffic may be obstructed, however, if an emergency street opening is larger than 8 feet by 10 feet, permittee may occupy up to a maximum of 12 feet on one side of the opening and a maximum of 6 feet on the other side.

(iv) All unattended street openings or excavations in a driving lane, including intersections, shall be plated, except as otherwise directed by the Commissioner. The Commissioner may require all street openings and excavations at any location to be plated when no work is in progress. In the case of gas or steam leaks, barricades in accordance with the New York State or Federal Manual on Uniform Traffic Control Devices shall be used until the leak is corrected.

(v) Barricades, signs, lights and other approved safety devices shall be displayed in accordance with the New York State or Federal Manual on Uniform Traffic Control Devices.

(vi) A minimum of five feet sidewalk width of unobstructed pedestrian passageway shall be maintained at all times. Where openings and excavations do not allow for five feet of unobstructed pedestrian passageway, pedestrians shall be directed by signs to the opposite sidewalk.

(vii) No private vehicles shall be kept within the work area.

(viii) A permittee shall submit an application for a regular permit, and for Landmarks Preservation Commission permits if applicable, within two business days of receiving an emergency permit number.

(ix) Restorations shall be made with in-kind materials.

(x) Emergency work in the African Burial Ground and Commons Historic District areas, requires the permittee excavate with utmost caution and the permittee shall not remove any excavation or debris from the site prior to Landmarks Preservation Commission's review of the excavation.

(xi) If any emergency street opening results in a width of less than 11 feet in each direction for vehicular traffic, this shall be deemed a full roadway closure. In such case, the Police Department, the Communication Centers of the Fire Department and the Department of Transportation shall be notified simultaneously with the closing.

(xii) Emergency permit numbers shall be kept on site and shall be presented upon the request of any police officer or other City employee authorized by the Commissioner to enforce these rules. Any additional information regarding the emergency work that is requested at the site by a Department inspector shall be provided by the permittee and/or the persons performing such work.

(xiii) Flagpeople. Permittees whose work results in the closing of a moving traffic lane, which requires traffic to be diverted to another lane, shall, at all times while actively working at the site, post a flagperson or utilize an authorized plan for the maintenance and protection of traffic at the point where traffic is diverted to assist motorists and pedestrians to proceed around the obstructed lane.

(xiv) All permittees shall comply with the provisions of subdivision (g) of §2-02 of these rules, if applicable.

(3) **Application.** When applying for an emergency permit number by fax, a permittee shall submit all information required by the Department. This information includes, but is not limited to, the following:

(i) Name of permittee

(ii) Permittee ID #

(iii) Location of emergency (including borough)

(iv) Type of emergency (including interruption of service)

DERIVATION

Section 2-11 derived from former §2-13 from original publication July 1, 1991. Former §2-13 was amended in City Records Sept. 19, 1996 and Jan. 22, 1997.

NOTE

1. Statement of Basis and Purpose in City Record Dec. 21, 2001:

Section 2-11(e) has been revised to reflect that a flagperson or an authorized plan for traffic maintenance and protection is required at all times while actively working, in the interests of public safety.

Section 2-11(g) has been revised to change the name of the DOT unit which receives requests for emergency numbers from the Communications Center to the Emergency Authorization Unit. Requests will be received on a 24 hour basis. In addition, many of the requirements added to §2-07 regarding emergency work have been added to §2-11 and permittees working with emergency permit numbers have been given more flexibility regarding emergency work.

2. Statement of Basis and Purpose in City Record May 7, 2001: Subdivision b of §2-11 is being amended to alert Permittees to the necessity of obtaining separate permits for each block segment and intersection. Paragraph 10 of subdivision e of §2-11 is being amended to provide for the safe movement of pedestrians, cyclists and others around work sites that contain steel plates and decks. Paragraph 11 of subdivision e of §2-11 is being amended to establish a minimum depth for the installation of conduits and pipes beneath the surface of roadways. This amendment will ensure that conduits and pipes are protected from damage caused by excavation, street openings, resurfacing, reconstruction and vehicular traffic. The Department has become aware of an increase in the number of non-emergency street openings in protected streets. Paragraph 4 of subdivision f of §2-11 is being amended to allow the Department to better monitor restoration activity in protected streets. A new subparagraph vi is proposed in order to maximize the integrity of protected streets by setting forth opening and restoration guidelines for streets which have been reconstructed within 18 months of the present street opening. Where work cannot be performed within 8 feet of curbs or be confined to sidewalks, permittees will be required to restore the street from curb to curb. Finally, a new subparagraph vii is proposed to require permittees to maintain permanent restorations of protected streets in the same manner that they are required to maintain permanent restorations of non-protected streets.

3. Statement of Basis and Purpose in City Record Mar. 12, 2004: The Commissioner of the Department of Transportation is authorized to regulate work taking place on City streets and sidewalks pursuant to section 2903 of the New York City Charter and Title 19 of the New York City Administrative Code. Subparagraph (i) of paragraph (16) of subdivision (e) of section 2-11 is being amended to require permittees to retain cutforms at their offices instead of submitting them to the Department. This will reduce the amount of paperwork and record keeping for the Department and reduce the filing burden on permittees.

4. Statement of Basis and Purpose in City Record Sept. 7, 2006: The Commissioner of the Department of Transportation is authorized to regulate work taking place on City streets and sidewalks pursuant to §2903 of the New York City Charter and Title 19 of the New York City Administrative Code. Paragraph (1) of subdivision (a) of §2-11 is being amended to add subparagraphs (i) and (ii). Subparagraph (i) provides that Street Opening Permits will only be issued to a company affiliated with a master plumber's license and outlines the circumstances under which the Department may suspend review of an application for a permit, revoke or refuse to renew a permit, or refuse to issue a permit to a licensed master plumber or affiliated companies of the licensed master plumber company pursuant to specific provisions contained within existing rules. Subparagraph (i) also requires a licensed master plumber or a company affiliated with the master plumber's license to provide the certificate issued to such company by the New York City Department of Buildings and additional documentation from the New York City Department of Environmental Protection before the Department issues a Street Opening Permit. Subparagraph (ii) provides that where a Street Opening Permit is necessary for any work performed pursuant to a valid contact with a local or state governmental entity, the Street Opening Permit will be issued to the general contractor performing work. Currently, when a street requires excavation for the purposes of conducting plumbing work, a permit is issued directly to the excavators. These subcontractors performing excavation work are not required to hold professional licenses and sometimes do not restore the streets that they have excavated to the satisfaction of the Department. This amendment is being proposed to change the Department's permit process in order to ensure stricter compliance with agency requirements for restoring the

streets, and to impose this responsibility directly upon licensed master plumbers in the manner similar to requirements already imposed upon other corporate entities.

5. Statement of Basis and Purpose in City Record Sept. 1, 2009: The Commissioner of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903(b) of the New York City Charter and Title 19 of the New York City Administrative Code. There are many structures that constitute bridges within the City, but this designation is not always obvious to a contractor who may wish to perform excavations in the vicinity thereof. This rule is being amended to provide additional safeguards to the structural integrity of bridges, tunnels, underpasses and overpasses under the jurisdiction of the Department, and to better regulate excavations and restorations performed near bridges and on their outlying support structures.

CASE NOTES

¶ 1. The rule does not limit a contractor's common-law liability for affirmative acts of negligence which result in the creation of a dangerous condition upon a public street or sidewalk. Ingles v. City of New York, 309 A.D.2d 835, 766 N.Y.S.2d 80 (2d Dept. 2003).

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-12 Vacant Lots.

(a) **Property owners' responsibility.** Whenever the Commissioner shall so order or direct, property owners shall, at their own expense:

(1) fence any vacant lot(s);

(2) fill any sunken lot(s) in compliance with §2-06 or other requirements of these rules;

(3) cut down any raised lot(s) in accordance with the specifications of the Department and §2-02 of these rules.

(b) **Failure to comply.** Upon the property owner's failure to comply with the requirements of paragraph (a), above, the Department may perform the work or cause it to be performed, the cost of which, together with the administrative expenses, shall constitute a debt recoverable from the owner by lien on the property affected, pursuant to §19-152 of the Administrative Code.

(c) **Reinspection.** Upon request of the property owner to the appropriate borough office, the Department shall provide a reinspection by a different departmental inspector than the one who conducted the first inspection.

(d) **Permit requirements.** The property owner shall obtain a permit from the Department before performing any work pursuant to this section. All permits are subject to applicable provisions contained in §2-02 of these rules.

HISTORICAL NOTE

Section repealed and added City Record May 1, 1998 eff. May 31, 1998.

Section in original publication July 1, 1991.

DERIVATION

Section 2-12 was derived from former §2-11 from original publication July 1, 1991.

FOOTNOTES

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on

the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

34 RCNY 2-13

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-13 Vaults.

(a) **Vault defined.** A vault is any opening below the surface of the street and outside the property line that is covered over.

(b) **Exceptions.** This §2-13 shall not apply to:

(1) Openings that are used exclusively as places for egress or ingress by means of steps to the cellar or basement of any building.

(2) Openings that are used primarily for light and ventilation.

(3) Openings constructed or maintained by utility companies, which are regulated under a separate agreement with the City.

(4) Subways, railroads and related structures that are controlled by a public authority.

(c) **License required.** A license shall be obtained prior to construction of a new vault or enlargement of an existing vault. A revocable consent shall be required for any vault that extends further than the line of the sidewalk or curbstone of any street.

(d) **Permit required.** No vault shall be constructed, altered or repaired unless a street opening permit is obtained from the Department upon payment of the established fee.

(e) **Applications.** (1) All applicants for a license and/or permit to construct, maintain, alter or repair a vault shall file a written application signed by the applicant, stating the dimensions of the vault, the number of square feet required and four $8^{1}/_{2}$" × 14" cloth copies of a plan. For existing vault repairs, blueprints may be submitted in lieu of cloth copies of the plan at the discretion of the Commissioner. Plans shall include:

(i) The address and the tax lot and block number of the vault property location.

(ii) The distance from the lot property line to the nearest corner property line.

(iii) All frontages, lot lines, and line of building abutting the street.

(iv) All distances from the lot line to the existing curb line (existing width of sidewalk).

(v) The dimensions of the vault at the outer perimeter of the walls, the depth of the vault, and the composition and thickness of the vault walls (top and cross sections).

(vi) Location of all existing or proposed steps, gratings, open areas, coal holes/chutes/slides, entrances, cellar doors, building encroachments, and all other installations in the sidewalk area.

(vii) Details and location of all manhole access covers to a boiler or underground tank, to be installed in accordance with the specifications.

(viii) Approved Department of Buildings plan.

(ix) For existing vaults, verification of annual vault charge return.

(x) For a new vault or an enlargement of an existing vault, a copy of the license agreement filed with the Division of Franchises, Concessions and Consents of the Depart- ment.

(2) All applicants shall comply with the requirements of §2-02 of these rules.

(f) **Adjustments to license fee.** When subsequent measurements indicate that more or less space has been taken for the construction of a vault than that originally paid for, an adjustment of fees shall be made pursuant to §19-117(e) and (f) of the Administrative Code.

(g) **Limitations.** No vault shall extend closer than seven feet to the established curb line unless otherwise authorized by the Commissioner. Such authorization may be granted based upon:

(1) Special conditions cited by the applicant and,

(2) Additional construction requirements, including, but not limited to:

(i) A waterproofed recess in the vault roof adequate to receive a standard curb for the entire length at which the curb may be set or reset in accordance with the Department's standard sidewalk width even in cases where the existing or proposed sidewalk width does not conform to that standard width.

(ii) A strengthening of the vault roof to sustain live loads of six hundred pounds or more per square foot.

(iii) Adequate waterproofed recesses to accommodate existing or proposed street lights, hydrants, traffic signals and other street appurtenances to the Department's standard sidewalk width even in cases where the existing or proposed curb line does not conform to that standard width.

(h) **Curb.** No vault shall extend beyond the established line of the curb.

(i) **Arched or covered vault.** No new vault is to be arched or covered unless the owner or applicant shall have had the vault first measured by a duly licensed surveyor who shall deliver to the Department a certificate signed by him or her specifying the area of the vault, together with a diagram showing the dimensions thereof, including its sustaining walls, the location of the vault in relation to the building, curb line, and the nearest street corner intersection, the house number, the tax lot and the block numbers of the plot and all details as to sidewalk covering; in the case of an existing vault, the person claiming the right to the use thereof shall furnish a similar certificate and diagram, except that in such case the measurement shall exclude the sustaining walls if it is impracticable for the surveyor to measure the thickness. See §19-117(d) of the Administrative Code.

(j) **Hoistway openings.** No opening in the sidewalk area shall be constructed for the accommodation of any elevator or lift, whether manually or power operated. Existing hoistway openings in the sidewalk may be continued but shall not be enlarged in buildings erected before July first nineteen hundred fifty-seven, provided such openings are equipped with approved type doors located flush with the sidewalk and equipped with elevators. These hoistway openings with elevators may be relocated provided the total number of sidewalk elevators serving the building is not increased. Relocated elevators may not project more than five feet from the building line into the sidewalk area.

(k) **Boiler room exit.** An exit in the sidewalk area may be constructed and maintained above a steam boiler room. The door over such exit shall be three feet parallel to the building line and two feet at right angles thereto. The cover shall be adjacent to the building line and shall be hinged on the side nearest the curb allowing for it to be open slightly less than ninety degrees with the horizontal. An iron ladder permanently fixed in position shall be installed.

(l) **Sidewalks over vaults.** (1) A standard specification concrete sidewalk of four inch minimum thickness shall be installed over the structural roof slab of the vault and in conjunction with the structural roof slab shall be able to sustain a minimum live load of six hundred pounds per square foot. In no case shall the new sidewalk serve as the structural roof of the vault.

(2) The licensee shall be responsible for repairing and maintaining the sidewalk covering the roof of a vault in a safe condition. The Commissioner may order a licensee to repair defects in vault coverings, including defective sidewalk flags, in accordance with subdivision (b) of §19-151 of the Administrative Code.

(m) **Doors and gratings.** (1) All gratings or doors covering openings or roofs of vaults on the sidewalk shall be so constructed as to sustain a minimum live load of six hundred pounds per square foot.

(2) Doors and gratings in sidewalk are not permitted in front of any entrances, including building, store and delivery.

(3) All doors and grating and related hardware shall be flush with the sidewalk.

(4) Door and grating material and design shall be approved by the Department of Buildings.

(n) **Defective covers.** The Commissioner may order defective vault covers, doors, gratings and adjacent areas which are broken or present a slippery surface to be made safe immediately by the owner and replaced in accordance with Department standards in accordance with subdivision (b) of §19-151 of the Administrative Code.

(o) **Abandoned vaults.** The Commissioner may order the vault licensee and/or the owner of the premises to fill in an abandoned vault in accordance with subdivision (b) of §19-151 of the Administrative Code as hereinafter provided. The vault shall be filled in with clean, incombustible material, attaining proper compaction standards. Where such structures adjoin the curb, the enclosing walls shall be cut down to a depth of two feet below the curb and the roof shall be removed. Proper steps shall be taken to allow for the drainage of water through the vault floor.

(p) **Historic districts.** All work on vaults in historic districts shall be approved by the Landmarks Preservation Commission prior to the commencement of the work.

HISTORICAL NOTE

Section repealed and added City Record May 1, 1998 eff. May 31, 1998.

Section in original publication July 1, 1991.

DERIVATION

Section 2-13 was derived from former §2-24 from original publication July 1, 1991.

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 2-14

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-14 Miscellaneous.

(a) **Public pay telephones.** (1) An application for a permit for public pay telephones and related equipment shall be made to the Department of Information Technology and Telecommunications (DOITT) pursuant to Chapter 4 of Title 23 of the Administrative Code and pursuant to Chapter 6 of Title 67 of the Rules of the City of New York.

(2) A street opening permit for installation of a public pay telephone line or stanchion shall be obtained from the Department, pursuant to §2-02, after obtaining a permit from DOITT. Fees shall be paid pursuant to §2-03 of these rules.

(3) A street opening permit shall be obtained for the removal of a public pay telephone stanchion and the restoration of the sidewalk. Such sidewalk restoration shall be performed in accordance with the Department's specifications.

(b) **Banners.** (1) **Permit required.**

(i) The Commissioner may issue permits for the display of banners promoting cultural exhibits and events or public or historical events which foster tourism and/or enhance the image of the City. The Commissioner may issue permits to business improvement districts (BIDs), local development corporations (LDCs) or other organizations that have received Commercial Revitalization Program funds (CRP fund recipients) from the Department of Business Services within the past year for the display of banners within the BID, LDC or CRP fund recipient's area that are designed to provide information about such BID, LDC or CRP fund recipient's area to the general public.

(ii) No person shall install, place, affix or attach a banner on any property within the jurisdiction of the Department without first obtaining a permit from the Commissioner.

(iii) No person shall install, place, affix or attach a banner on any property within the jurisdiction of the Department which contains a sponsor trade name or logo without the specific prior authorization of the Commissioner.

(2) **General conditions.**

(i) The number of banners to be installed and the location of each banner shall be approved by the Commissioner prior to installation. All requested locations may not be approved.

(ii) Banners shall be placed within a one block radius of the event unless otherwise authorized by the Commissioner.

(iii) Horizontal banners, including banners hung across a street, are not permitted.

(iv) Vertical banners shall be not more than 3 feet wide and not more than 8 feet in height. All such banners shall have 6 slits to allow air passage. Two banners per pole are allowed only if they collectively do not exceed 24 square feet. For existing banners only, two banners per pole not exceeding 30 square feet collectively may be allowed by the Commissioner in his/her discretion. Each such banner shall have 3 slits to allow air passage. The bottom portion of a banner shall be not less than 18 feet above the roadway.

(v) Banners shall contain no advertisements. The trade name(s) or logo(s) of the sponsor(s) of the event may be placed on the banner but shall occupy no more than 10% of the banner in total. Corporate sponsor's trade name(s) or logo(s) shall be located on the lower portion of the banner.

(vi) All applicants shall submit a final graphic of the banner prior to the issuance of a permit. It shall be a condition of each permit that the banner is in compliance with the final graphic.

(vii) Applications for banner permits shall be submitted no fewer than 45 days prior to the planned installation date.

(viii) Applicants shall be responsible for inspecting banners and poles and replacing and/or removing banners that are torn, defaced or in general disrepair, including rigging.

(3) **Installation, maintenance and removal.**

(i) Drilling of lamppost or welding of bracket supports is not permitted. All mounting hardware must be of a corrosion resistant material.

(ii) Banners shall not be attached to any traffic signal posts containing an electrical traffic control device. Banners shall not be installed so as to obstruct the visibility of signs or signals which may be attached to other lampposts.

(iii) Banners shall not be placed on lampposts designated as landmarks by the Landmarks Preservation Commission. Banners shall not be placed on ornamental signposts without meeting specific permit stipulations.

(iv) Banners and any installation apparatus shall be removed immediately upon the expiration of the term of the permit, except where a permit extension has been granted by the Commissioner.

(4) **Duration and renewal of permits.** Banner permits shall remain in effect for a period of 30 days including installation and removal, and may be renewed up to two times at the discretion of the Commissioner.

(5) **Duration and renewal of permits granted to BIDs, LDCs or CRP fund recipients.** Permits granted to BIDs,

LDCs or CRP fund recipients may remain effective for up to 90 days and may be renewed at the discretion of the Commissioner.

(6) **Revocation.** Banner permits are revocable at will by the Commissioner.

(c) **Bandstands and temporary platforms.** (1) No person shall erect or maintain a temporary platform or bandstand on the street unless the structure has been approved by the Department of Buildings and a permit has been issued by the Commissioner.

(2) Applicants for a permit to erect or maintain a temporary platform or bandstand shall file a commercial general liability insurance policy, as provided in §2-02, with the Commissioner.

(d) **Helicopter lifts.** A street closing permit for the closing of streets along the route of a helicopter lift shall be required for contractors with licensed operators performing helicopter rigging operations on construction sites. The permit is subject to the following requirements:

(1) a permit for Aviation Operation, External Lift Operation, from the Public Transportation Safety Unit of the Fire Department and

(2) a signed and notarized Indemnification and Hold Harmless Agreement.

(e) **Temporary Festoon/Holiday Lighting and/or other Temporary Lighting.**

(1) No individuals shall be permitted to hang temporary festoon/holiday lighting and/or other temporary lighting from lampposts or poles containing electrical traffic control devices.

(2) Groups, including but not limited to, Business Improvement Districts, Block Associations and Chambers of Commerce shall be permitted to hang temporary festoon/holiday lighting and/or other temporary lighting from lampposts, provided the following conditions are met:

(i) All temporary festoon/holiday lighting and/or other temporary lighting, their attachments, accessories, installations, and methods of attachment shall be in compliance with the applicable requirements of these rules, the New York City Electrical Code (Chapter 3 of Title 27 of the Administrative Code) and the rules of the New York City Department of Buildings.

(ii) A letter requesting permission to hang temporary festoon/holiday lighting and/or other temporary lighting shall be sent to the Department's Street Lighting Unit each year, 60 days before the holiday or event by the sponsoring group. Such letter shall state the anticipated installation and removal dates of the lighting, the proposed location(s) where the lights shall be installed including the number of block faces of streets to be used, and the number of lampposts to be affected, including those from which power is to be drawn and those that are to be used only as an attachment for the temporary lighting.

(iii) The Street Lighting Unit shall provide a disposition in writing. If approved, the sponsoring group or its electrical contractor shall submit such disposition from the Street Lighting Unit to the Department of Buildings when applying for a Certificate of Electrical Inspection.

(iv) The sponsoring group shall hire an electrical contractor licensed by the City to furnish and install a Ground Fault Circuit Interrupter (GFCI) weatherproof receptacle and install the lighting fixtures and supporting equipment. The GFCI shall be installed near the top of the shaft of the lamppost from which the power is to be drawn.

(v) The sponsoring group or its electrical contractor shall be responsible for the maintenance and replacement, as necessary, of the weatherproof receptacles.

(vi) The sponsoring group or its electrical contractor shall obtain a Certificate of Electrical Inspection from the Department of Buildings prior to applying for a permit from the Department.

(vii) The sponsoring group shall make arrangements with the appropriate electric utility company to pay for the electricity that will be used to illuminate the temporary festoon/holiday lighting and/or other temporary lighting.

(viii) The sponsoring group shall obtain and maintain in force an insurance policy as provided in §2-02 of these rules and shall indemnify and hold the City harmless from any and all claims for personal injury or property damage arising from the installation, maintenance, operation and eventual removal of the temporary festoon/holiday lighting and/or other temporary lighting.

(ix) A permit to hang temporary festoon/holiday lighting and/or other temporary lighting shall be obtained from the Department of Transportation, prior to commencing work, upon the showing of the letter of consent from the Street Lighting Unit and the Certificate of Electrical Inspection from the Department of Buildings pursuant to subparagraphs (iii) and (vi) of this paragraph.

(x) Temporary festoon/holiday lighting and/or other temporary lighting with necessary feed wires and supports may be permitted over sidewalks for a period not to exceed 90 days, provided they do not interfere with the free use of fire escapes and drop ladders. All such electrical construction shall be removed within the time stated on the permit, excluding the authorized GFCI weatherproof receptacle. The receptacle shall be permitted to remain provided that it is properly maintained. Any receptacle(s) not properly maintained shall be removed, within one (1) to ten (10) days of notice from the Department, as directed by the Department, by the sponsoring group at its sole cost and expense. In the event that the sponsoring group fails to remove the receptacle(s) or in the case of an emergency, the Department may remove such receptacle(s) and charge the cost of removal to the sponsoring group.

(xi) Prior to commencing any work, the electrical contractor shall test each pole for stray voltage. if a pole tests positive, the electrical contractor shall contact the Department and Con Edison immediately and shall report such test result and the location of the pole. The electrical contractor shall wait for clearance from the Department and Con Edison prior to the commencement of work.

(xii) After completing the installation of the temporary festoon/holiday lighting and/or other temporary lighting, the electrical contractor shall retest each pole for stray voltage. If a pole tests positive, the electrical contractor shall contact the Department and Con Edison immediately and shall report such test result and the location of the pole.

(xiii) The electrical service shall not exceed 120 volts and shall not be fused larger than fifteen (15) amperes.

(xiv) The installation of temporary festoon/holiday lighting and/or other temporary lighting shall comply with the minimum height clearances below:

Nature ofCrossing Conductors Guys, Spans, Messengers

Under300 Volts 300 Volts to750 Volts 750 Volts to15,000 Volts 15,000 Volts to33,000 Volts

Above track rails of freightrailroads. 27 feet 27 feet 28 feet 30 feet

Above track rails of elevated railways. 25 feet 25 feet 25 feet 25 feet

Above track rails of surface railways. 22 feet 22 feet 25 feet 25 feet

Above roadways of streets, etc. 18 feet 18 feet 20 feet 22 feet

Above spaces or ways accessible to pedestrians only, i.e., sidewalks and alleyways. 14 feet**For guys, 8 feet shall be sufficient for anchor guys not crossing pathways. 18 feet 20 feet 22 feet

(xv) Temporary festoon/holiday lighting and/or other temporary lighting, strings or messengers shall not be supported by or secured to any fire escape or drainpipe. They shall be insulated from their supports by strain insulators.

(xvi) Streamers, messengers or supports shall not be attached to or supported from electric, light, telephone, communications or trolley poles or lines without permission from the owners.

(xvii) Any sponsoring group and/or electrical contractor who fails to comply with the requirements of this subdivision shall be excluded from the permit process for temporary festoon/holiday lighting and/or other temporary lighting for the following year or seasonal cycle, or other period of time as determined by the Department.

(xviii) Requests to make adjustments to the work performed shall be approved by the Department.

(xix) The Department may mandate that changes be made to the work performed.

(xx) The electrical contractor shall test each pole for stray voltage after removing the temporary festoon/holiday lighting and/or other temporary lighting equipment in compliance with the permit limits. If a pole tests positive, the electrical contractor shall contact the Department and Con Edison immediately and shall report such test result and the location of the pole.

(xxi) At the completion of the work, a letter shall be sent to the Department certifying that the work was conducted in accordance with all rules and regulations.

(f) **Commercial refuse containers.** Commercial refuse containers are containers to be placed on the public roadways temporarily, the use of which is not related or connected to any use or activity for which a construction activity permit shall be obtained from the Department. Commercial refuse containers shall not be used for the storage of putrescible waste.

(1) No commercial refuse container shall be placed on the street unless the owner has registered the container and obtained a permit from the Department.

(2) Upon registration, the Department shall issue a permit to the owner of the container company which lists identification numbers for each registered container. The identification numbers shall be printed on stickers which shall be obtained by container company owners, validated at the nearest Department borough permit office and shall be placed conspicuously on two sides of the containers. Specifications for the stickers shall be available at the permit offices.

(3) Permits to place commercial refuse containers on the street temporarily shall be valid for one year. Information regarding the number of containers owned by each company shall be updated as necessary and the permit shall be updated containing the new registration numbers for any additional containers.

(4) Commercial refuse containers shall not be stored or placed within:

(i) any "No Stopping," "No Standing" or "No Parking Anytime" areas;

(ii) fifteen feet of hydrants;

(iii) the area created by extending the building line to the curb (the "corner") or the area from ten feet from either side of the corner (the "corner quadrant");

(iv) four feet of lampposts;

(v) five feet of railroad tracks.

In exceptional circumstances, the Commissioner may grant permission to store or place containers in the areas specified in items (i) through (v), above. An application for such permission shall be made to OCMC indicating the need for such placement.

(5) Storage of commercial refuse containers shall not interfere in any way with subway facilities, hydrants, fire alarms, traffic signals, street signs, bus stops or shelters, trees, parking meters, emergency telephones, water main valves or gas shut-off valves, unless permission is obtained from the appropriate City Department.

(6) The name, address and telephone number of the owner shall be printed on two sides of each container.

(7) Each container shall be stored flush with the curb and extend no more than eight feet.

(8) The street under all containers shall be shielded by roadway protection to prevent damage to streets.

(9) All containers shall be clearly marked on all four sides with high intensity reflective paint, reflectors, or other markings capable of producing a warning glow when struck by the head lamps of a vehicle or other source of illumination at a distance of three hundred feet.

(10) No container shall be left in one location for more than seventy-two continuous hours.

(11) Sidewalks, gutters, crosswalks and driveways shall at all times be kept clear and unobstructed and all dirt, debris and rubbish shall be promptly removed therefrom.

(g) **Storage boxes.** No person shall place on any street a box for the purpose of storing written matter or any other type of material or attach such box to any item of street furniture or to the pavement in any way.

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02,

Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

34 RCNY 2-15

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-15 Removal of Unauthorized Encroachments.

(a) The Commissioner may serve an order upon a property owner to remove or alter any unauthorized projection, encroachment or encumbrance on or in front of his premises within a period to be specified in such order; such order shall be served personally, or by leaving it at the house or place of business of the owner, occupant or person having charge of the house or lot in front of which the projection, encroachment or encumbrance may be, or by posting such order thereon.

(b) Where a property owner fails to alter or remove the encroachment, encumbrance or projection within the time specified in the order, the Commissioner may remove or alter or cause such encroachment, encumbrance or projection to be removed or altered at the expense of the owner or constructor thereof, who shall be liable to the City for all expenses that it may incur by such removal or alteration, together with the penalties prescribed by §19-150 of the Administrative Code, to be recovered with costs of suit.

(1) In addition to any other remedies or penalties, whenever such removal, alteration, repair and restoration is undertaken by the Commissioner he or she may certify separately the cost and expense of such removal, alteration, repair and restoration to the Commissioner of Finance, who shall charge the amount of such costs and expenses against the property upon and with respect to which the work was performed. Each such charge shall be a lien upon the property or premises in respect to which the same shall have been made, which lien shall have priority over all other liens and encumbrances except taxes and assessments for other public or local improvements, sewer rents, water rents and interest or penalty thereon levied or charged pursuant to law.

(2) As an alternative to the remedies prescribed above, the Commissioner may in his or her discretion institute

through the Corporation Counsel any appropriate action or proceeding at law against such owner for the recovery of the costs and expenses of such removal, alteration, repair and restoration undertaken by the Commissioner, as provided in §19-133 of the Administrative Code.

(c) In addition, failure to comply with an order issued by the Commissioner may result in criminal or civil penalties in accordance with §19-149 or 19-150 of the Administrative Code.

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

34 RCNY 2-16

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-16 Street Closings Lasting More Than 180 Days.

(a) Prior to the issuance of a permit that will result in a publicly mapped street being fully closed for more than 180 consecutive calendar days an applicant shall submit a Community Reassessment, Impact and Amelioration (CRIA) statement to the Department for its approval. Without such approval by the Department, the Department may refuse to issue a permit. This provision shall apply to single permits or to a combination of permits that would result in such full street closure for a total of more than 180 consecutive calendar days.

(b) Any individual or entity that effectuates the closure of a street for more than 180 consecutive calendar days for which a permit from the Department is not required, with the exception of such street closures initiated by a local law enforcement agency, shall comply with all provisions of this section.

(c) The CRIA statement shall contain the following:

(1) the objectives of the closure and the reasons why the continued street closure is necessary to attain those objectives;

(2) identification of the least expensive alternative means of attaining those objectives and the costs of such alternatives, or a statement and explanation as to the unavailability of such alternatives;

(3) how the continued street closure will impact access and traffic flow to and within the surrounding community, including but not limited to, access to emergency vehicles, residences, businesses, facilities, paratransit transportation and school bus services; and

(4) any recommendations to mitigate adverse impact and increase access to and within the area.

(d) The requirement for the issuance of a CRIA statement as described in this subdivision may be satisfied by delivery of an environmental assessment statement or environmental impact statement conducted pursuant to CEQR rules, that has been approved by the Department.

(e) The individual or entity requesting a street closure as provided for in this section shall attend and assist the Department at the public forum held pursuant to the requirements of §19-107(b) of the Administrative Code of the City of New York and any other public forum resulting from the street closure upon request from the Department, and shall assist the Department in producing responses to any and all issues raised pursuant to such public forum(s).

(f) The Department may require the individual or entity requesting such street closure to issue the Department approved CRIA, environmental assessment statement or environmental impact statement to the community board and the council member in whose district the street is located.

HISTORICAL NOTE

Section added City Record Aug. 30, 2005 §2, eff. Sept. 29, 2005. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Aug. 30, 2005:

The Commissioner of the Department of Transportation is authorized to regulate work taking place on City streets and sidewalks pursuant to §2903 of the New York City Charter and Title 19 of the New York City Administrative Code.

Section 19-107(b) of the Administrative Code of the City of New York was recently amended to require the production of a CRIA statement, or, in the alternative, an environmental assessment statement or environmental impact statement whenever there is a planned full street closing that lasts a total of more than 180 consecutive calendar days. Accordingly, §2-02(b) is being amended and a new §2-16 is being added to require entities wishing to close a street for more than 180 consecutive calendar days to produce the CRIA statement, or, in the alternative, an environmental assessment statement or environmental impact statement.

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-18 Newsstands.

Incorporation by Reference of Rules Promulgated by the New York City Department of Consumer Affairs. The rules related to newsstands promulgated by the Department of Consumer Affairs in Subchapter G of Chapter 2 of Title 6 of the Rules of the City of New York are hereby incorporated by reference into this Chapter as rules of the Department of Transportation.

HISTORICAL NOTE

Section added City Record Feb. 29, 2008 §1, eff. Mar. 30, 2008. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Feb. 29, 2008:

Local Law No. 64 for the year 2003, which became effective October 29, 2003, revised requirements governing the siting, construction and process for approving applications for licenses to operate newsstands or for renewals thereof. It also authorized the granting of a franchise to construct, install and maintain newsstands in the City of New York, and the procedure for such franchise to replace the stands used by newsstand licensees. To implement the revisions enacted by Local Law No. 64, the Department of Consumer Affairs repeals the current Subchapter G of Chapter 2, Title 6 of the Rules of the City of New York governing newsstands, and promulgates a new Subchapter G.

The Department of Transportation incorporates by reference the Rules concerning newsstands promulgated by the

Department of Consumer Affairs since these Rules implicate the Department of Transportation's responsibilities concerning newsstands. Specifically, the Department of Transportation must inspect proposed and existing newsstand locations to conduct pedestrian levels of service analyses and ensure the maintenance of a clear path for unobstructed pedestrian traffic on the sidewalk. The Department of Transportation must also inspect newsstands in connection with applications submitted to the Department of Consumer Affairs for the renewal of licenses permitting the operation of such newsstands. Thus, the Department of Transportation adopts the following Rule.

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2 included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on

the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 2*1 HIGHWAY RULES

§2-19 Bicycle Access in Office Buildings.

(a) **Definitions.** For purposes of this section, the following terms shall have the following meanings:

(1) Accessible Level. "Accessible level" shall mean one that facilitates the approach, entry or use for bicyclists on whose behalf the tenant or subtenant has requested bicycle access.

(2) Available. "Available" shall mean accessible for use by bicyclists on whose behalf the tenant or subtenant has requested bicycle access.

(3) Control. "Control" shall mean to exercise legal authority over through deed, permit, lease, contract or otherwise.

(4) Covered. "Covered" shall mean enveloped by a roof or functional equivalent. For purposes of this definition, "roof" shall mean the outer cover and its supporting structures on the top of a building.

(5) Indoor. "Indoor" shall mean situated in the interior of or within a building that is within three blocks or seven hundred fifty feet, whichever is less, of the building for which a bicycle access plan is requested.

(6) Off-street. "Off-street" shall mean located in an area other than the roadway or the public sidewalk within three blocks or seven hundred fifty feet, whichever is less, of the building for which a bicycle access plan is requested.

(7) Secure. "Secure" shall mean that (i) the entry to or exit from the alternate bicycle parking is locked or supervised by building personnel and permitted only to (A) the owner, lessee, manager or such other person who

controls such building and their agents, and (B) bicycle owners on whose behalf the tenant or subtenant has requested bicycle access, and (ii) a bicycle owner can lock a bicycle to a fixed object (including, but not limited to, a bicycle rack) such that the bicycle is protected from damage or theft.

(b) **Bicycle Access Plan.**

(1) **Request for Bicycle Access.**

(i) The tenant or subtenant of an office building, as defined in Administrative Code §28-504.1, may submit a request for bicycle access, in writing on a form provided by the Department, to the owner, lessee, manager or other person who controls such office building. Such request shall be submitted by certified mail, return receipt requested.

(ii) The tenant or subtenant shall file a copy of any request for bicycle access with the Department. Such request may be filed electronically by submitting it through the Department's website (www.nyc. govbikesinbuildings) or by submitting such request by regular mail to the Department of Transportation, 55 Water Street, 6th Floor, New York, NY 10041, Attention: Bikes in Buildings Program.

(iii) The owner, lessee, manager, or other person who controls such office building shall complete and implement a bicycle access plan for such building within thirty (30) days after receipt of a written request from such tenant or subtenant of such building.

(iv) The owner, lessee, manager or other person in control of the building may request an exception to the requirements of Administrative Code §28-504.3 in accordance with subdivision (d) of this section.

(2) **Contents of Bicycle Access Plan.**

(i) **Requirements.** The bicycle access plan prepared by the owner, lessee, manager or other person who controls a building shall, for bicyclists on whose behalf the tenant or subtenant has requested bicycle access, include but not be limited to:

A. the location of entrances within or to the building;

B. the route to elevator(s) that accommodate bicycle access;

C. the regular hours of operation of the elevator(s);

D. such other information as is deemed to be appropriate by and for the particular building; and

(ii) For purposes of these rules it shall be presumed that if a freight elevator in the building is available for carrying freight, it is available for carrying a bicycle for purposes of providing bicycle access.

(iii) Bicycle access shall be available, at minimum, during the regular operating hours of the freight elevator in the event that such elevator is used for bicycle access.

(iv) Upon receiving and reviewing its copy of a request for a bicycle access plan that has been filed in accordance with subparagraph (ii) of paragraph one of subdivision (b) of this section, the Department may require that additional information be included in the plan because it has determined that such information is appropriate for the particular building in question.

(c) **Amendments to plan.** The owner, lessee, manager, or other person who controls a building shall either create a new plan or amend a plan as needed (1) to address changed circumstances which warrant a revision in a particular tenant's or subtenant's plan, or in a plan that is applicable to all tenants; or (2) to accommodate new requests from other tenants or subtenants requesting bicycle access. Should such owner, lessee, manager, or other such person who controls

a building elect to amend a bicycle access plan pursuant to this section, such plan shall be amended within thirty (30) days of receiving a request for bicycle access. Any amendments that may materially affect the bicycle access plan shall be completed and implemented within thirty (30) days of the changed circumstances or to accommodate new requests from other tenants or subtenants requesting bicycle access, and do not preclude the requirement to comply with the provisions of this section. All amendments shall be filed with the Department pursuant to the provisions of subdivision (h) of this section.

(d) **Exceptions.**

(1) Bicycle access need not be provided if an owner, lessee, manager or other person who controls a building applies to the Commissioner for, and is granted, a letter of exception as set forth below. Such request shall be sent by certified mail, return receipt requested within fifteen (15) days of receipt of a request for a bicycle access plan to the Department of Transportation, 55 Water Street, 6th Floor, New York, NY 10041, Attention: Bikes in Buildings Program, and certifies the following:

(i) the building's freight elevator is not available because unique circumstances exist involving substantial safety risks directly related to the use of such elevator pursuant to Administrative Code §28.504.4(1) ("Exception 1"); or

(ii) there is sufficient secure alternate covered off-street no-cost bicycle parking within three blocks or seven hundred fifty (750) feet, whichever is less; or there is sufficient secure alternate indoor no-cost bicycle parking available on the premises or within three blocks or seven hundred fifty (750) feet, whichever is less, of such building to accommodate all tenants or subtenants of such building requesting bicycle access pursuant to Administrative Code § 28.504.4(2) ("Exception 2"). The number of bicycle parking spaces available shall be at least equal to the number of bicycles contained in the bicycle access tenant requests.

(2) A request for Exception 1 shall include the basis for requesting such an exception and shall also include but not be limited to the following supporting documentation:

(i) A certification from a professional engineer who is licensed and registered in New York State. Such certification shall include but not be limited to the following facts:

(A) The date the building was constructed;

(B) The date the elevator was installed;

(C) The method of elevator door closing;

(D) Whether the elevator is self-service or there is an operator;

(E) Whether there is a car top;

(F) Whether there is a car gate or door; and

(G) The professional engineer's license number.

(ii) Upon receiving and reviewing a request based on Exception 1, the Department may require that additional information be submitted in support of the request because it has determined that such information is appropriate for the particular building in question.

(3) A request for Exception 2 shall include the basis for requesting such an exception and shall also include but not be limited to the following supporting documentation:

(i) Proof that secure alternate covered off-street no-cost bicycle parking or secure alternate indoor no-cost bicycle

parking is available to or under the control of the owner, lessee, manager or other person who controls the building. Such proof may include but not be limited to a copy of a deed, lease, title, permit or contract evidencing such control.

(ii) The route to the secure alternate covered off-street no-cost bicycle parking that is within three blocks or seven hundred fifty (750) feet, whichever is less; or the route to the secure alternate indoor no-cost bicycle parking available on the premises or is within three blocks or seven hundred fifty (750) feet, whichever is less, of such building.

(iii) Upon receiving and reviewing a request based on Exception 2, the Department may require that additional information be submitted in support of the request because it has determined that such information is appropriate for the particular building in question.

(4) Pending the Department's inspection, review and determination of a request for a letter of exception, an owner, lessee, manager or other person who controls a building shall be exempt from complying with the requirements of this section.

(e) **Inspection and Determination.**

(1) If Exception 1 is sought: After conducting an inspection of the building and freight elevator, the Commissioner of the Department of Buildings shall thereafter issue a final determination to the Department as to whether to grant Exception 1. Such final determination shall be included in the Department's letter of exception or denial sent to the owner, lessee, manager, or other person who controls the building.

(2) If Exception 2 is sought: After conducting an inspection in consultation with the Department of Buildings of the secure alternate covered off-street no-cost bicycle parking or the secure alternate indoor no-cost bicycle parking, the Commissioner shall thereafter issue a final determination as to whether to grant Exception 2.

(3) A letter of exception or denial shall be sent by the Department by certified mail, return receipt requested, to the owner, lessee, manager, or other person who controls the building.

(4) If a letter of denial is sent, a bicycle access plan shall be posted within twenty (20) days of receipt of such letter.

(f) **Posting.**

(1) Every owner, lessee, manager or other person who controls a building for which a bicycle access plan has been adopted shall post in such building either a current bicycle access plan or a notice in the building lobby indicating that the plan is available in the building manager's office upon request. The posting of such plan or notice shall be made within five (5) days of implementation of such plan.

(2) Every owner, lessee, manager or other person who controls a building for which an exception to the bicycle access plan requirement has been granted shall post in such a building the letter of exception provided by the Commissioner pursuant to subdivision (d) of this section, or a notice in the building lobby indicating that such letter of exception is available in the building manager's office upon request. The posting of such letter or notice shall be made within five (5) days of receipt of such letter of exception.

(3) Bicycle access plans, letters of exception and notices of availability of either such documents shall be made available to the Department, the Department of Buildings or authorized representatives of any other City agency upon request.

(g) **Filing of bicycle access plan and subsequent amendments with the Department.** A bicycle access plan shall be filed with the Department by electronic submission through the Department's website (www.nyc.gov/bikesinbuildings) or by regular mail to the Department of Transportation 55 Water Street, 6th Floor,

New York, NY 10041, Attention: Bikes in Buildings Program, within ten (10) days of implementation of such plan. Should the owner, lessee, manager or other person who controls a building amend their bicycle access plan pursuant to subdivision (c) of this section, such amendment shall be filed with the Department as outlined above within ten (10) business days of completion and implementation of such amendment.

HISTORICAL NOTE

Section added City Record Dec. 11, 2009 §1, eff. Dec. 11, 2009 per City Record notice. [See

Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Dec. 11, 2009:

The Commissioner of the New York City Department of Transportation (DOT) is authorized to promulgate rules pursuant to Section 2903 of the New York City Charter.

Chapter 2 of Title 34 of the Rules of the City of New York (RCNY) is being amended to comply with Local Law 52 of 2009, which statute relates to bicycle access to office buildings. DOT is promulgating these rules to set forth the procedures for implementing bicycle access as contemplated in Local Law 52. Furthermore, in response to comments received at the public hearing, DOT revised the rule to provide building owners with the option of either amending an existing bicycle access plan or creating a new plan to address changed circumstances or new tenant requests. Finally, this rule will be codified in newly created §2-19 of Title 2, Chapter 34 of the Rules of the City of New York.

Finding of Substantial Need for Earlier Implementation

Chapter 5 of Title 28 of the New York City Administrative Code was amended by Local Law No. 52 of 2009, signed into law on August 13, 2009 and effective December 11, 2009. Local Law 52 added a new Article 504 that relates to the provision of bicycle access in office buildings. These rules set forth the process that commercial buildings must follow in providing bicycle access to tenants, or obtaining an exception from these requirements, as set forth in the new law. A public hearing on these proposed rules was held on November 23, 2009.

The City wishes to further encourage both the use of bicycles as a mode of transportation and the reduction of vehicular traffic within New York City, consistent with the goals described in PlaNYC. Thus, immediate implementation of this rule amendment is necessary to effectuate the purpose of the local law, and also facilitate the prompt enforcement of these rules by the New York City Departments of Transportation and the New York City Department of Buildings at the time Local Law 52 takes effect.

Therefore, pursuant to section 1043(e)(1)(c) of the New York City Charter, the Department of Transportation finds that there is a substantial need for the earlier implementation of the Rules Relating to Providing Bicycle Access in Office Buildings. Consequently, the attached "Rules Relating to Providing Bicycle Access in Office Buildings", containing amendments incorporated after the public hearing and explained in the Statement of Basis and Purpose, shall be effective upon its final publication in the **City Record,** and the requirement that thirty days first elapse after such publication shall not apply.

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record May 1, 1998 eff. May 31, 1998. Former Chapter 2

included §§2-01-2-35.

Note: Statement of Basis and Purpose of Proposed Rule.

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903 of the New York City Charter and §19-105 of the New York City Administrative Code. Chapter 2 of Title 34 of the Official Compilation of Rules of the City of New York, the Highway Rules, has been revised and is being repealed and reenacted. A major purpose of the revision is to reorganize the rules so as to present them in a more orderly and coherent manner. For example, new §2-02, Permits, contains information and requirements which pertain to all permits issued by the Department, thereby eliminating the need to search through the rules for requirements for specific kinds of permits.

In addition to organizational changes, some substantive changes have been made as well. In particular, rules have been added which emanate from provisions contained in Title 19 of the Administrative Code, which became effective on 12/28/93. These are as follows:

Section 2-02(a)(5) provides that the commissioner may require cash deposits in addition to or instead of a bond from permit applicants pursuant to 19-103(c) of the Code.

Section 2-02(j) provides that the commissioner may suspend review of permit applications pending payment of outstanding fines, pursuant to §19-103(d) of the Code.

Section 2-02(k) provides that the commissioner may revoke or refuse to renew a permit after notice and opportunity to be heard pursuant to §19-103(e)(1) of the Code.

Section 2-02(k)(3) provides that the commissioner may revoke a permit without affording the permittee an opportunity to be heard prior to the revocation if he/she determines that an imminent peril to life or property exists pursuant to §19-103(e)(2) of the Code.

Section 2-02(d) provides that the commissioner may notify permittees of conditions which violate terms of permits, the Administrative Code, orders, rules, etc., and ask that conditions be corrected. Permittees may contest the commissioner's finding. A fee may be assessed for administrative expenses associated with notices and inspections pursuant to §19-103(h) of the Code.

Section 2-13(n) provides that the commissioner may order the removal and replacement of vault covers which are broken or unsafe pursuant to §19-120.

Section 2-14(f) provides for permits to be obtained for the placement of commercial refuse containers on the streets by owners of the containers, and requires the name and address of the owner and registration numbers to be posted on the containers. All containers must be painted with phosphorescent substance so as to be clearly discemible at night. All permittees are required to place protective coverings on streets where containers are to be placed pursuant to §19-123 of the Code. The annual permit fee for commercial refuse containers shall be $30. The application review fee for placement of containers in restricted areas shall be $30. Placement of containers in restricted areas is subject to review and approval from MTCCC, and adherence to MTCCC stipulations. Both fees have been added to the fee section (2-03).

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 4-01

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 4 TRAFFIC RULES AND REGULATIONS

§4-01 Words and Phrases Defined.

(a) **Vehicle and Traffic Law definitions apply.** Whenever any words and phrases used in these rules are not defined herein but are defined in Article 1 of the New York State Vehicle and Traffic Law, any such definition shall be deemed to apply to such words and phrases used herein.

(b) **Definitions.** The following words and phrases, when used in these rules, shall, for the purpose of these rules, have the meanings respectively ascribed to them as follows:

Bicycle. A "bicycle" shall mean every two- or three-wheeled device upon which a person or persons may ride, propelled by human power through a belt, a chain or gears, with such wheels in a tandem or tricycle, except that it shall not include such a device having solid tires and intended for use only on a sidewalk by pre-teenage children.

Bus. A "bus" shall mean every motor vehicle having a seating capacity of more than fifteen adults, in addition to the operator, and used for the transportation of persons, and every charter bus, interstate bus, intrastate bus, school bus and sight-seeing bus, regardless of seating capacity, as defined below.

(i) **Charter bus.** A "charter bus" shall mean a bus engaging in a specific or special trip in the nature of an excursion or outing, for which it has been hired or otherwise engaged by oral or written contract for the exclusive use of the charterer.

(ii) **Interstate bus.** An "interstate bus" shall mean a bus which operates between a point within the City of New York and a point outside the State of New York.

(iii) **Intrastate bus.** An "intrastate bus" shall mean a bus which operates only in the State of New York between a point within the City of New York and a point outside the City of New York.

(iv) **School bus.** A "school bus" shall mean every motor vehicle regardless of seating capacity owned by a public or governmental agency or private school and operated for the transportation of pupils, teachers and other persons acting in a supervisory capacity, to or from school or school activities or privately owned and operated on a regular basis for compensation for the transportation of pupils, teachers and other persons acting in a supervisory capacity to or from school or school activities.

(v) **Sight-seeing bus.** A "sight-seeing bus" shall mean a bus for hire carrying passengers from a fixed point in the City of New York, at which point the passengers embark and are generally discharged to a place or places of interest or amusement in the City of New York, and including a charter bus, as defined in these rules, when engaged in a sight-seeing operation.

Commercial vehicle. (i) For purposes of parking, standing and stopping rules, a vehicle shall not be deemed a commercial vehicle or a truck unless:

(A) it bears commercial plates; and

(B) it is permanently altered by having all seats and seat fittings, except the front seats, removed to facilitate the transportation of property, except that for vehicles designed with a passenger cab and a cargo area separated by a partition, the seating capacity within the cab shall not be considered in determining whether the vehicle is properly altered; and

(C) it displays the registrant's name and address permanently affixed in characters at least three inches high on both sides of the vehicle, with such display being in a color contrasting with that of the vehicle and placed approximately midway vertically on doors or side panels.

(ii) For the purposes of rules other than parking, stopping and standing rules, a vehicle designed, maintained, or used primarily for the transportation of property, or for the provision of commercial services and bearing commercial plates shall be deemed a commercial vehicle.

(iii) Vehicles bearing commercial or equivalent registration plates from other states or countries shall not be deemed trucks or commercial vehicles unless they are permanently altered and marked as required in (i)(B) and (C) of this definition, above.

Commissioner. The "Commissioner" shall mean the Commissioner of the New York City Department of Transportation or his/her authorized designee.

Commuter Van. A van, which: (i) is used as part of a commuter van service as defined in section 19-502(q) of the New York City Administrative Code; (ii) has a seating capacity of at least nine passengers but not more than twenty passengers or such greater capacity as the Taxi and Limousine Commission may establish by rule; (iii) carries passengers for hire in the City; (iv) is duly licensed as a commuter van by the Taxi and Limousine Commission; and (v) is not permitted to accept hails from prospective passengers in the street.

Crosswalk.

(i) **Marked crosswalk.** That part of a roadway defined by two parallel lines or highlighted by a pattern of lines (perpendicular, parallel or diagonal used either separately or in combination) that is intended to guide pedestrians into proper crossing paths.

(ii) **Unmarked crosswalk.** That part of a roadway, other than a marked crosswalk, which is included within the

extensions of the sidewalk lines between opposite sides of the roadway at an intersection, provided that (A) the roadway crosses through the intersection rather than ending at the intersection, and/or (B) all traffic on the opposing roadway is controlled by a traffic control device.

Cruising. The term "cruising" shall mean the movement of any vehicle on any street in search of prospective passengers who may wish to hire the vehicle.

Driveway. Every entrance or exit authorized pursuant to applicable law and used by vehicular traffic to or from lands or buildings abutting a roadway.

D/S Decals. "D/S Decals" shall mean valid non-transferable service vehicle decals or delivery vehicle decals issued by the City of New York that are affixed to the inside of the operator's side of the windshields of vehicles bearing "A", "C" or "D" series license plates issued by the U.S. Department of State.

Emergency vehicle (authorized). An "emergency vehicle (authorized)" shall mean every police vehicle, fire vehicle, emergency ambulance service vehicle, and every other emergency vehicle as defined in §101 of the Vehicle and Traffic Law.

For-hire vehicle. A "for-hire vehicle" shall mean a motor vehicle, licensed by the Taxi and Limousine Commission, for hire in the City, used for the carriage of passengers by prearrangement only and designed to carry fewer than nine passengers, including but not limited to livery vehicles, and excepting taxis or wheelchair accessible vans.

High Occupancy Vehicle (HOV). HOV shall mean a vehicle, except a truck as defined in §4-13(a)(1) of these rules, with two or more occupants, the number of which is specified by signs placed on express lanes on highways or bridges, pursuant to §4-07(k) of these rules.

Holidays. A "holiday," when used on traffic control devices, shall mean the days on which the following holidays are officially celebrated: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

Horse drawn vehicle. A "horse drawn vehicle" shall mean a vehicle drawn by a horse and used for the carriage of passengers for compensation. Where signs limit parking to horse drawn vehicles, only those vehicles licensed by the New York City Department of Consumer Affairs will be permitted.

Impounded vehicle. A vehicle is considered "impounded" when the City of New York takes it into custody by taking any action inconsistent with the free use of the vehicle by the motorist, including, but not limited to, beginning to attach an immobilization device such as a "boot" or a hook on a Department of Transportation tow truck to the vehicle.

Law enforcement officer. A "law enforcement officer" shall mean a police officer or any authorized agent of the Department of Transportation.

Limited use vehicle. A "limited use vehicle" shall mean a motor vehicle, other than a motorcycle, which has a maximum performance speed of not more than forty miles per hour.

Marginal street. A "marginal street" shall mean any street, road, place, area or way adjoining or adjacent to waterfront property and designated as a marginal street, wharf or place on a plan or map adopted pursuant to law.

Motor vehicle. A "motor vehicle" shall mean every vehicle operated or driven upon a public highway which is propelled by any power other than muscular power, except as otherwise provided in §125 of the Vehicle and Traffic Law.

Official time standard. The term "official time standard" shall mean whenever certain hours are named in these

rules or on traffic control devices they shall mean standard time or daylight-saving time, whichever may be in current use in this city.

Parking. "Parking" shall mean the standing of a vehicle, whether occupied or not, otherwise than temporarily for the purpose of and while actually engaged in loading or unloading property or passengers.

Passenger car. The term "passenger car" when used on traffic control devices, shall mean a motor vehicle designed and used for conveying not more than eight people and shall include motorcycles designed and used only for conveying people.

Service vehicle. A "Service vehicle" shall mean a commercial vehicle used for providing commercial services other than making pickups and deliveries, but shall not include a vehicle bearing "A", "C" or "D" series license plates issued by the U.S. Department of State and displaying a valid non-transferable service vehicle decal issued by the City of New York that is affixed to the inside of the operator's side of the windshield.

Sidewalk. A "sidewalk" shall mean that portion of a street, whether paved or unpaved, between the curb lines or the lateral lines of a roadway and the adjacent property lines intended for the use of pedestrians. Where it is not clear which section is intended for the use of pedestrians, the sidewalk will be deemed to be that portion of the street between the building line and the curb.

Standing. The term "standing" shall mean the stopping of a vehicle, whether occupied or not, otherwise than temporarily for the purpose of and while actually engaged in receiving or discharging passengers.

Stopping. The term "stopping" shall mean any halting, even momentarily of a vehicle, whether occupied or not.

Taxi. A "taxi" shall mean a motor vehicle used for the carriage of passengers for compensation, equipped with a taxi meter, painted yellow and displaying a current medallion issued by the New York City Taxi and Limousine Commission.

Transitway. A "transitway" shall mean any roadway or series of roadways designated for the exclusive use of buses or taxis or such other designated high occupancy vehicles as may be permitted, during certain hours of the day, with access to such roadway(s) limited to one block thereof to other vehicles for the purpose of delivery of goods or services or the picking up or dropping off of passengers.

Truck. For the purposes of parking, standing and stopping rules, a "truck" is a commercial vehicle, as defined in paragraph (i) of the definition of commercial vehicle, above, except that, for the purposes of parking, standing and stopping rules in the area bounded by 35th Street on the south, 41st Street on the north, Avenue of the Americas on the east, and 8th Avenue on the west, all inclusive, in the Borough of Manhattan, between the hours of 7 a.m. to 7 p.m., a vehicle shall not be deemed a truck unless it complies with the provisions of §4-13(a)(1) of these rules.

Vehicle. A "vehicle" shall mean every device in, upon, or by which any person or property is or may be transported or drawn upon a highway, except devices moved by human power or used exclusively upon stationary rails or tracks.

Waterfront property. The term "waterfront property" shall mean all waterfront property, city or privately owned, between salt water and the next adverse owner. An adverse owner is the first private owner of property not designated as waterfront property.

Wharf property. The term "wharf property" shall mean all wharves, piers, decks and bulkheads and structures thereon and slips and basins, the land beneath any of the foregoing, and all rights, privileges and easements appurtenant thereto and land under water in the port of the City of New York, and such upland or made land adjacent thereto owned by the City of New York as is vested in or may be assigned to the Department of Business Services of the City of New

York.

NOTE

1. Statement of Basis and Purpose in City Record Oct. 7, 1996:

The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to section 2903(a) of the New York City Charter.

Sections 4-01(b), 4-08(c) and 4-11(c) are being amended to establish regulations for commuter vans similar to those for bus stops. In certain congested areas of the City, many types of vehicles such as buses, vans, taxis, liveries and delivery trucks, compete for curb space to load and unload passengers and goods. The large number of these vehicles has created safety hazards for people who utilize these services in these areas. The proposed rules are intended to eliminate the competition among the different types of vehicles by setting aside space specifically for vans and for-hire vehicles. The stops will allow van and for-hire vehicle operators to load and unload passengers safely without having to compete with all the other vehicles.

Section 4-10(c) is being amended to specify that for safety reasons, whenever possible, buses should only pick up and discharge passengers within twelve inches of the curb.

2. Statement of Basis and Purpose in City Record Mar. 28, 2005: The Commissioner of the Department of Transportation is authorized to promulgate rules regarding parking and traffic in the City pursuant to §2903 of the New York City Charter. Subdivision b of §4-01, subdivisions a, g, k, l and m of §4-08 and subdivision f of §4-15 are being amended to delete or amend incorrect references. Subdivision b of §4-02 is being amended to delete the public health restriction on the commissioner's discretion to suspend these rules, as it does not really apply to this department, and to add public convenience as a reason the commissioner may suspend rules. Subdivision f of §4-08 is being amended to delete the references to §4-08(e) as it is not possible to be in compliance with (f)(1) and (e)(1) and (9) at the same time. Subdivisions h and i of §4-08 are being amended to clarify the requirements in areas controlled by Muni-Meters. Paragraph 3 of subdivision h is also being amended to reflect that electronic meters, which are more common now, are more likely to fail than to have broken parts.

3. Statement of Basis and Purpose in City Record Apr. 12, 2005: The Commissioner of the Department of Transportation is authorized to promulgate rules regarding parking in the City pursuant to §2903 of the New York City Charter. Subdivision (b) of §4-01 is being amended to add a definition of "driveway." Paragraph (2) of subdivision (f) of §4-08 is being amended to facilitate parking in front of driveways that have been rendered unusable by building renovation.

4. Statement of Basis and Purpose in City Record June 8, 2005: The Commissioner of the Department of Transportation is authorized to promulgate rules regarding parking and traffic in the City pursuant to §2903 of the New York City Charter. The definition of "crosswalk" in subdivision (b) of §4-01 is being amended to separate marked from unmarked crosswalks. Paragraph (4) of subdivision (e) of §4-08 of Title 34 of the Rules of the City of New York prohibits stopping, standing or parking at intersections, except for "T"-intersections. However, paragraph (5) of that same subdivision (e) prohibits stopping, standing or parking in crosswalks. Separating the definition of crosswalk into marked and unmarked crosswalks makes clear that unmarked crosswalks do not exist at two of the three crossings in a "T"-intersection. This is because the roadway that ends at a "T"-intersection has no "opposite side" across the intersection. Therefore, in the absence of a marked crosswalk, parking is permitted all along the top of a "T"-intersection, which is not interrupted by another roadway.

5. Statement of Basis and Purpose in City Record Dec. 12, 2005: The Commissioner of the Department of Transportation is authorized to promulgate rules regarding parking and traffic in the City pursuant to §2903 of the New York City Charter. Subdivision (b) of §4-01 and subdivision (k) of §4-08 are being amended to clarify that a vehicle that has a cab with a rear bench or seat(s) behind the front seats is still properly altered and may be considered a commercial vehicle for the purposes of these rules. These types of vehicles are increasingly common. Therefore, these amendments are being proposed to eliminate any confusion in enforcement of the commercial vehicle parking rules.

6. Statement of Basis and Purpose in City Record Nov. 26, 2008: The Commissioner of the Department of Transportation is authorized to promulgate rules regarding parking and traffic in the City pursuant to §2903 of the New York City Charter. The definition of "Crosswalk" set forth in subdivision (b) of §4-01 of the Traffic Rules and Regulations is being amended to more clearly define unmarked crosswalks, differentiating pedestrian ramps that lead to such crosswalks from other pedestrian ramps for enforcement purposes. Paragraph (7) of subdivision (f) of §4-08 of Title 34 of the Rules of the City of New York prohibits stopping, standing or parking in front of pedestrian ramps intended for the crossing of individuals. The amendment to this paragraph clarifies that the prohibition only applies to pedestrian ramps that lead people to crosswalks, and that motorists may park their vehicles in front of other pedestrian ramps. The amendment will improve enforcement of the Traffic Rules and Regulations with respect to such pedestrian ramps by making such enforcement more clear and consistent.

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 4-02

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 4 TRAFFIC RULES AND REGULATIONS

§4-02 Compliance With and Effect of Traffic Rules.

(a) **Applicability of rules.** The provisions of these rules apply to all vehicles, operators of vehicles, bicycles, operators of bicycles and pedestrians upon highways, parkways, shopping center parking lots and municipal areas including public housing, public hospital parking lots, and municipal lots and garages. These rules also apply on wharf property and marginal streets, in off-street parking facilities operated by the Department of Transportation, on vacant lots, and upon private roads open to public motor vehicle traffic, which for the purpose of application of these rules shall be considered streets, highways or parkways, except where a different place is specifically referred to.

(b) **Suspension of rules.** The Commissioner may, at his/her discretion, suspend any regulation contained herein in situations involving public safety and convenience.

(c) **Dangerous driving.** No person shall operate a vehicle in a manner that will endanger any person or property.

(d) **All persons are required to comply with traffic rules.**

(1) **Exceptions.** It is a traffic infraction for any person, including government employees, to do any act forbidden by or fail to perform any act required by these rules, except as otherwise provided herein.

(i) **Authorized emergency vehicles.** The operator of an authorized emergency vehicle when involved in an emergency operation as defined in §114-b of the Vehicle and Traffic Law may exercise the privileges set forth in §1104 of the Vehicle and Traffic Law, subject to the conditions set forth therein.

(ii) **Traffic/parking control vehicles.** Unless specifically made applicable, the provisions of these rules shall not apply to operators of designated traffic or parking control vehicles, including, but not limited to, tow trucks, while actually engaged in activities necessary to perform their duties.

(iii) **Snow plows, sand spreaders, sweepers and refuse trucks.**

(A) The operator of a New York City Department of Sanitation snow plow, sand spreader, or sweeper, and the operator of a Department of Transportation vehicle when performing the same function, while in the performance of his/her duty and acting under the orders of his/her superior may make such turns as are necessary and proceed in the direction required to complete his/her cleaning, snow removal, or sand spreading operations subject to §1102 of the Vehicle and Traffic Law. The provisions of this subparagraph shall not apply while traveling to or from such work locations.

(B) The operator of a New York City Department of Sanitation refuse truck may temporarily stand on the roadway side of a vehicle parked at the curb, provided that no curb space is available within fifteen feet, while expeditiously loading refuse, subject to §1102 of the Vehicle and Traffic Law.

(iv) **Highway workers.** Unless specifically made applicable, the provisions of these rules shall not apply to persons, teams, motor vehicles, and other equipment actually engaged in work authorized by the City of New York, the State of New York or the federal government while on a highway. Section 1103 of the Vehicle and Traffic Law is applicable to any person or team or any operator of a motor vehicle or other equipment while actually engaged in work on a highway. As §1103 of the Vehicle and Traffic Law provides, such persons are not relieved from the duty to proceed at all times during all phases of such work with due regard for the safety of all persons nor shall the foregoing provisions of this subparagraph protect such persons or teams or such operators of motor vehicles or other equipment from the consequences of their reckless disregard for the safety of others.

(v) **Highway inspection and quality assurance vehicles, compliance inspection unit and street assessment unit vehicles.** Unless specifically made applicable, the provisions of these rules which relate to parking and standing shall not apply to operators of New York City Department of Transportation highway inspection vehicles, compliance inspection vehicles, and street assessment vehicles while actually engaged in activities necessary to perform their duties.

(2) **Public employees.** The provisions of these rules shall apply to the operator of any vehicle owned by or used in the service of the United States Government, New York State, New York City, or other states, cities, or any borough, and it shall be unlawful for any such operator to violate any of the provisions of these rules except as otherwise permitted by law.

(e) **State law provisions superseded.** Pursuant to authority provided by §1642 of the Vehicle and Traffic Law, the following provisions of such law shall not be effective in the City of New York: §§1112, 1142(b), 1150, 1151, 1152, 1153, 1156(b), 1157, 1171, 1201, 1202, and 1234.

Subd. (e) amended City Record Nov. 23, 1998 eff. Dec. 23, 1998. [See Note 2]

NOTE

1. Statement of Basis and Purpose in City Record Feb. 28, 2000:

The Commissioner of the Department of Transportation is authorized to promulgate rules relating to the movement of vehicles pursuant to §2308 of the New York City Charter and §1642 of the State Vehicle and Traffic Law.

This rule is being proposed in order to facilitate the enforcement by the Department of applicable laws and rules relating to street construction. The functions performed by the operators of Highway Inspection and Quality Assurance (HIQA) vehicles are similar to those performed by the Traffic Intelligence Division (TID) of the Police Department. This rule will afford HIQA vehicles the same privileges accorded to TID vehicles while in the performance of their duties. In addition to the enforcement of rules and laws regarding construction, which contributes to vehicular as well as pedestrian safety, the HIQA unit responds to emergencies such as street collapses, water main breaks, building operations, falling debris, and any other emergency condition which would hinder the flow of traffic and/or cause closure of major roadways. As such, exempting these vehicles from compliance to the Traffic rules will greatly enhance the performance of the duties of the operators of these vehicles. The Compliance Inspection Unit and the Street Assessment Unit vehicles perform tasks such as collection of field information about streets and sidewalks, such as travel times, vehicle classifications, turning movements at intersections and pothole identification surveys.

2. Statement of Basis and Purpose in City Record Nov. 23, 1998: The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to secton 2903(a) of the New York City Charter. Currently there are no enforceable provisions requiring pedestrian use of sidewalks or regulating driving on controlled-access highways in the City. The provisions of sections 1130 and 1156(a) of the Vehicle and Traffic Law (VTL) that regulate such activities throughout the rest of the State do not apply in New York City. These sections of the VTL are currently superseded by City rules adopted pursuant to VTL section 1642. The purpose of this proposed rule is to conform City traffic regulations with State law by deleting these VTL provisions from the list of VTL provisions which are superseded by City rules. This rule also deletes subdivisions (l) and (m) of section 4-07 from the City traffic rules. Subdivision (l) relates to the designation of special use lanes on the Gowanus. This provision is no longer necessary because the Gowanus now has a contraflow lane. Subdivision (m) relates to a pilot program that expired in 1997.

3. Statement of Basis and Purpose in City Record May 9, 2003: The Commissioner of Transportation is authorized to regulate vehicular traffic pursuant to section 2903(a) of the New York City Charter. A review of the provisions of section 1642 of the Vehicle and Traffic law (VTL) has shown that section 1642 does not allow cities with a population in excess of one million to supersede provisions regarding speed, unless it is to establish minimum speed limits. Consequently, the City cannot supersede the provisions of section 1180 regarding maximum speeds and that section would apply in the City. Paragraph 3 of section 4-06 is being deleted because this paragraph duplicates the provisions of VTL section 1180(a) and is, therefore, unnecessary.

4. Statement of Basis and Purpose in City Record Sept. 18, 2007: The Commissioner of the Department of Transportation is authorized to promulgate rules regarding traffic operations in the City pursuant to §2903(a) of the New York City Charter. Subparagraph (iv) paragraph (1) of subdivision (d) of §4-02 is being amended to clarify the applicability of §1103 of the Vehicle and Traffic Law in the City of New York. More specifically, the rule is being amended to make clear that the recklessness standard set forth in §1103 applies to highway workers.

CASE AND ADMINISTRATIVE NOTES

34 RCNY 4-03

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 4 TRAFFIC RULES AND REGULATIONS

§4-03 Traffic Signals.

(a) **Traffic control signals.** Whenever traffic is controlled by traffic control signals exhibiting different colored lights successively, the following colors shall indicate and apply to operators of vehicles and to pedestrians, except as superseded by pedestrian control signals, as follows:

(1) **Green alone:** (i) Vehicular traffic facing such signals may proceed straight through or turn right or left unless a sign at such place prohibits any such movement. But vehicular traffic, including vehicles turning right or left, shall yield the right of way to other vehicles and to pedestrians lawfully within the intersection or an adjacent crosswalk at the time such signal is exhibited.

(ii) Pedestrians facing such signal may proceed across the roadway within any crosswalk.

(2) **Steady yellow alone, dark period, or red-green combined when shown following the green signal:**

(i) Vehicular traffic facing such signal is thereby warned that the red signal will be exhibited immediately thereafter and such vehicular traffic shall not enter the intersection when the red signal is exhibited.

(ii) Pedestrians facing such signal are thereby warned that there is insufficient time to cross the roadway, and shall not enter or cross the roadway. Pedestrians already in the roadway shall proceed to the nearest safety island or sidewalk.

(3) **Steady red alone:** (i) Vehicular traffic facing such signal shall stop before entering the crosswalk on the near side of the intersection or, if none, then before entering the intersection and shall remain standing until an indication to

proceed is shown.

(ii) Notwithstanding the foregoing provisions of this subdivision (a), or any provisions of state law, an operator approaching an intersection where a sign authorizes right or left turns on red signal may make such turn after coming to a complete stop, but shall yield the right of way to all vehicles and pedestrians lawfully within the intersection.

(iii) Pedestrians facing such signal shall not enter or cross the road way.

(4) **Arrows.** When colored lights shaped as arrows are used as traffic control signals, arrows pointing to the right shall apply to operators intending to enter the intersection to turn to the right, arrows pointing vertically shall apply to operators intending to enter the intersection to proceed straight through, and arrows pointing to the left shall apply to operators intending to enter the intersection to turn to the left. The colors of arrows shall have the same meanings as colors of traffic signal lights, but shall apply only to operators intending to enter the intersection to proceed in the direction controlled by the arrow.

(5) **Signs.** Operators shall comply with signs that refer to traffic control signals at places other than the intersections at which such signals are located, for example, "Stop here on red."

(6) **Signals not at intersections.** In the event an official traffic control signal is erected and maintained at a place other than an intersection, all the provisions of this subdivision (a) shall be applicable, except those provisions which by their nature can have no application. Any stop required shall be made at a sign or marking on the pavement indicating where the stop shall be made, but in the absence of any such sign or marking the stop shall be made at the signal.

(7) **Nonfunctioning signals.** Vehicular traffic facing a signal that is not working shall stop before entering the crosswalk on the near side of the intersection or, if none, then before entering the intersection and shall proceed with caution through the intersection.

(b) **Blinking traffic control signals.** (1) **Red.** Vehicular traffic facing such signals shall come to a complete stop and shall proceed only after yielding to any vehicles approaching from the cross street.

(2) **Yellow.** Vehicular traffic facing such signals shall proceed with caution through the intersection.

(c) **Pedestrian control signals.** Whenever pedestrian control signals are in operation, exhibiting the words "WALK" and "DON'T WALK" successively, the international green or red hand symbols, figures or any other internationally recognized representation concerning the movement of pedestrians, such signals shall indicate as follows:

(1) **WALK, green hand symbol or green walking figure.** Pedestrians facing such signal may proceed across the roadway in the direction of the signal in any crosswalk. Vehicular traffic shall yield the right of way to such pedestrians.

(2) **Flashing DON'T WALK, red hand symbol or red standing figure.** Pedestrians facing such signal are warned that there is insufficient time to cross the roadway and no pedestrian shall enter or cross the roadway. Pedestrians already in the roadway shall proceed to the nearest safety island or sidewalk. Vehicular traffic shall yield the right of way to such pedestrians.

(3) Steady DON'T WALK red hand symbol or red standing figure. Pedestrians facing such signal shall not enter or cross the roadway.

HISTORICAL NOTE

Section repealed and added City Record Apr. 22, 1992 eff. May 22, 1992.

Section in original publication July 1, 1991.

Subd. (a) par (7) added City Record Mar. 3, 2004 §1, eff. Apr. 2, 2004. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Mar. 3, 2004

Subdivision (a) of section 4-03 is being amended to add a provision addressing what action traffic should take when facing a nonfunctional traffic signal.

CASE NOTES

¶ 1. Pedestrian must be "lawfully within the intersection" pursuant to New York City Traffic Regulations §30(a) (34 RCNY 4-03(a)(1)(i)) to have the right of way over vehicular traffic turning with a green light. Although witnesses testified plaintiff was in the crosswalk after having been struck by a bus, the critical question was where he was when the bus began to turn. Brito v. Manhattan & Bronx Surface Tr. Oper. Auth., 188 AD2d 253 [1993].

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 4-04

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 4 TRAFFIC RULES AND REGULATIONS

§4-04 Pedestrians.

(a) **Pedestrians subject to traffic rules, except as otherwise provided herein.** Pedestrians shall be subject to traffic control signals and pedestrian control signals as provided in §§4-03(a) and 4-03(b) of these rules and to the lawful orders and directions of any law enforcement officer, but at all other places pedestrians shall be accorded the privileges and shall be subject to the restrictions stated in this section.

(b) **Right of way in crosswalks.** (1) **Operators to yield to pedestrians in crosswalk.** When traffic control signals or pedestrian control signals are not in place or not in operation, the operator of a vehicle shall yield the right of way to a pedestrian crossing a roadway within a crosswalk when the pedestrian is in the path of the vehicle or is approaching so closely thereto as to be in danger.

(2) **Pedestrians shall not cross in front of oncoming vehicles.** Notwithstanding the provisions of (1) of this subdivision (b), no pedestrian shall suddenly leave a curb or other place of safety and walk or run into the path of a vehicle which is so close that it is impossible for the operator to yield.

(3) **Vehicles stopped for pedestrians.** Whenever any vehicle is stopped at a crosswalk to permit a pedestrian to cross the roadway, the operator of any other vehicle approaching from the rear in the same or adjacent lanes shall not overtake and pass such stopped vehicle.

(c) **Restrictions on crossings.** (1) No pedestrian shall enter or cross a roadway at any point where signs, fences, barriers, or other devices are erected to prohibit or restrict such crossing or entry.

(2) No pedestrian shall cross any roadway at an intersection except within a cross- walk.

(3) No pedestrian shall cross a roadway except at a crosswalk on any block in which traffic control signals are in operation at both intersections bordering the block.

(d) **Operators to exercise due care.** Notwithstanding other provisions of these rules, the operator of a vehicle shall exercise due care to avoid colliding with any pedestrian.

(e) **Hitch-hiking and soliciting prohibited.** (1) **Talking or selling.** No person shall stand in the roadway to talk with or sell or offer to sell anything to an occupant of any vehicle.

(2) **Soliciting rides.** No person shall solicit a ride from the occupant of a vehicle by word or gesture.

(3) **Washing, polishing, cleaning and assisting parking.** No person shall approach an operator or other occupant of a passenger vehicle on any street, while the vehicle has stopped temporarily, is about so to stop, is parked or is about to be parked, for the purpose of washing, polishing, or cleaning such vehicle or any part of it, or offering to do so. Nor shall any person approach an operator or other occupant of a passenger vehicle for the purpose of directing it to a place for parking on any street or assisting in such parking, or offering any other service in relation to such vehicle, or soliciting a gratuity, except services rendered in connection with emergency repairs at the request of the operator of the vehicle.

(4) **Opening or closing doors.** No person, other than an occupant or prospective occupant of a passenger vehicle on a street, shall open, hold open, or close, or offer to open, hold open, or close any door of the vehicle. This provision shall not apply to such acts when intended purely as a social amenity without expectation or acceptance of a gratuity, nor to doormen or other persons employed by owners, occupants, or managers of abutting premises to render such service, nor when such service is incidental to other legitimate service being rendered to such an occupant or prospective occupant of a passenger vehicle.

(5) **Hailing taxis.** Unless asked to do so without advance solicitation (direct or implied), no person shall hail or procure for another, not in his or her social company, a taxi or other passenger vehicle.

Section in original publication July 1, 1991.

Subd. (c) par (3) added City Record Mar. 27, 1998 eff. Apr. 26, 1998. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Mar. 27, 1998:

The Commissioner of the Department of Transportation is authorized to regulate the movement of vehicular and pedestrian traffic pursuant to section 2903 of the New York City Charter. The purpose of this rule is to enhance pedestrian and vehicular safety by providing that pedestrians shall cross the street only at crosswalks on blocks with traffic control signals in operation at the intersections bordering the blocks.

Currently, traffic rules clearly prohibit pedestrians from crossing against a traffic control signal or pedestrian control signal, crossing a roadway where signs or barriers prohibit such crossing and crossing at an intersection outside a crosswalk. However, a significant number of fatalities occur as a result of pedestrians crossing heavy traffic blocks at other than crosswalks. The Department believes that compliance with the proposed rule will significantly enhance safety for both pedestrians and motorists.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Violation of Admin. Code § 4-04(c)(2) constitutes only some evidence of negligence and does not constitute negligence per se. **Schneider v. Diallo,** 14 A.D.3d 445, 788 N.Y.S.2d 366 (1st Dept. 2005).

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 4 TRAFFIC RULES AND REGULATIONS

§4-05 Turns.

(a) **Compliance with turning restrictions.** Whenever a traffic control device regulates any turn or other movement at an intersection or other location, no operator of any vehicle shall disregard the direction of such device, unless directed to do so by a law enforcement officer.

(b) **Limitations on turning around.** (1) The operator of any vehicle shall not make a U-turn upon any street in a business district, as defined in §105 of the Vehicle and Traffic Law.

(2) The operator of a vehicle shall not make a U-turn upon any street outside a business district unless such turn is made without interfering with the right of way of any vehicle or pedestrian.

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 4-07

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 4 TRAFFIC RULES AND REGULATIONS

§4-07 Other Restrictions on Movement.

(a) **Yield signs.** The operator of a vehicle approaching a YIELD or YIELD-RIGHT-OF-WAY sign shall slow to a reasonable speed for existing conditions of traffic and visibility, stopping if necessary, and shall yield the right-of-way to all traffic on the intersecting street which is so close as to constitute an immediate hazard. Proceeding past such sign with resultant collision or other impediment or interference with traffic on the intersecting street shall be deemed prima facie evidence of a violation of this rule.

(b) **Obstruction of traffic.** (1) **Traffic lane.** No person shall operate a vehicle in a manner which obstructs traffic in lanes specifically designated for the movement of traffic. Such lanes include, but are not limited to, no standing zones and no stopping zones.

(2) **Spillback.** No operator shall enter an intersection and its crosswalks unless there is sufficient unobstructed space beyond the intersection and its crosswalks in the lane in which he/she is traveling to accommodate the vehicle, notwithstanding any traffic control signal indication to proceed.

(c) **Restrictions on crossing sidewalks.** (1) **Driveways.** No person shall drive within any sidewalk area except at a permanent or temporary driveway.

(2) **Avoiding intersections.** No person shall drive across a sidewalk or upon a driveway in order to avoid an intersection.

(3) **Bicycles and limited use vehicles.**

(i) No person shall ride or operate a bicycle upon any sidewalk area unless permitted by sign. This prohibition shall not apply to the operation of bicycles with wheels of less than 26 inches in diameter upon the sidewalk by children of 12 years or less in age.

(ii) No person shall ride, park or operate a limited use vehicle within any sidewalk area except where permitted by sign. This prohibition shall not apply to the pushing of a limited use vehicle within a sidewalk area or to the pushing of such a vehicle to an authorized parking area.

(d) **Restrictions on backing.** No person shall back a vehicle into an intersection or over a crosswalk and shall not in any event or at any place back a vehicle unless such movement can be made in safety.

(e) **Play streets.** Whenever authorized signs are erected indicating any street or part thereof as a play street or play area, no person shall drive a vehicle upon any such street or area between 8 a.m. and one-half hour after sunset, unless other hours are prescribed by signs, except operators of vehicles having business or whose residences are within such restricted area. Any such operator shall exercise the greatest care in driving upon any such street.

(f) **Restrictions on learners.** (1) An operator with a learner's permit shall not operate a motor vehicle in any park, on any play street, or along any block in which there is an entrance to a public playground or park.

(2) The licensed operator accompanying an operator with a learner's permit shall not permit such learner to violate paragraph (f)(1), above.

(g) **Following emergency vehicles prohibited.** The operator of any vehicle other than one on official public business shall not follow any emergency vehicle traveling in response to an emergency call closer than 200 feet, nor drive into nor park such vehicle within the block where such emergency work is in progress.

(h) **Driving on divided highways.** (1) Whenever any highway is divided into two or more roadways by an intervening space, physical barrier, or clearly indicated dividing section so constructed as to impede vehicular traffic, every vehicle shall be driven only upon the right-hand roadway unless directed or permitted to use another roadway by official traffic control devices or law enforcement officers. No vehicle shall be driven over, across or within any such dividing space, barrier or section, except through an opening in such physical barrier or dividing section or space or at a crossover or intersection, as established, unless specifically authorized by public authority.

(2) No vehicle shall make a U-turn on a divided highway, except where permitted by sign or at the direction of a law enforcement officer.

(i) **Towing of vehicles on parkways, expressways, drives, highways, interstate routes, thruways, and bridges.** (1) **Restrictions.** No person shall cause or permit a disabled vehicle to be towed except by a tow truck under permit issued by the commissioner of the Police Department, or by a Police Department tow truck and then only by such tow truck on the main roadway, including the berm or shoulder adjacent to said roadways or entrances and exits of the following parkways, expressways, thruways, and bridges:

Belt Parkway System

Bronx River Parkway

Cross Island Parkway

Grand Central Parkway

Henry Hudson Parkway

Hutchinson River Parkway

Jackie Robinson Parkway

Willis Avenue Bridge

(2) **Police commissioner may waive requirements.** The commissioner of the Police Department in his/her discretion may waive and reimpose the requirement for a permit in the case of any specific bridge, highway, parkway, expressway, drive, interstate route and thruway.

(3) **Road service and towing rates.** For the pupose of this paragraph, road service shall mean service performed that will enable a vehicle to continue under it's own power.

(i) **Road service, all vehicles**

[See tabular material in printed version]

(ii) **Passenger cars, hoist and tow, per mile and storage fees.** Hoist and tow fees, per mile fees, and storage fees for all passenger cars towed pursuant to arterial tow service permits in the City of New York, shall be those provided for such services in subdivisions a and b of §2-368 of subchapter EE of title 6 of the rules of the city of New York.

(iii) **Vehicles other than passenger cars**

(A) Any vehicle with a maximum gross vehicle weight over 4,500 lbs. and under 10,000 lbs.

[See tabular material in printed version]

(B) Any two axle truck or bus with a maximum gross vehicle weight from 10,000 to 18,000 lbs.

[See tabular material in printed version]

(C) Any two axle truck or bus with a maximum gross vehicle weight from 18,000 to 26,000 lbs.

[See tabular material in printed version]

(D) Any truck, bus or tractor trailer with a maximum gross vehicle weight above 26,000 lbs.

[See tabular material in printed version]

(E) Labor per 1/4 hour per truck or per person or tow operator

$50.00

Applies only to vehicles over 4,500 lbs. in the following situations: overturned, wedged on guardrails, off-road recovery (embankment) and may apply to jackknifed, wedged under overpass/bridge, or broken/defective axle in which recovery (off-loading or positioning) must be performed prior to actual tow.

(F) Special equipment such as fork lifts, cranes, loading equipment, trailer, tractor, front end loaders and dump trucks will be considered rented equipment. The cost for such equipment will be billed on a daily basis with the approval of the Department.

(G) Tire service. If subcontracting to a tire company is required for on-road service, the tow vehicle must remain on the scene. Billing will be calculated for actual work time at $100.00 per hour. Subcontracting for off-roadway service, no tow truck required to remain on scene: a one-time charge of $55.00.

(j) **Yearly and single issue permits for use of roadways.**

(1) **General information.** Vehicles normally prohibited from roadways may be issued yearly or single-use permits by the Department of Transportation upon application in writing. Such permits must be displayed so that they are visible through the windshield. The Commissioner or his/her designee may charge a fee for such permits equal to the cost of administering the permit program.

(2) **Eligible groups and vehicles.** Yearly permits are available to the following, as well as to any other groups or vehicles specified by the Commissioner or his/her designee:

(i) companies that transport passengers to and from airports;

(ii) commuter and shuttle services;

(iii) ambulettes;

(iv) school bus companies;

(v) buses;

(vi) medical, blood and human service programs;

(vii) not-for-profit groups going to and from special events;

(viii) vehicles that service businesses accessible only by use of parkways; and (ix) service vehicles that repair and maintain highways and highway facilities.

(3) **Authorized roadways.** Yearly and single issue permits will be granted only for the following parkways or any other area designated by the Department of Transportation: (i) Belt Parkway: Except that the roadway between Knapp Street and Rockaway Parkway is limited to vehicles weighing under 5 tons when fully loaded.

(ii) Bronx River Parkway

(iii) Cross Island Parkway

(iv) Eastern Parkway

(v) Grand Central Parkway: Between the TriBoro Bridge and the Van Wyck Expressway

(vi) Harlem River Drive

(vii) Henry Hudson Parkway

(viii) Hutchinson River Parkway

(ix) Mosholu Parkway

(x) Pelham Parkway

(xi) Richmond Parkway

(xii) Willowbrook Parkway

For reasons of safety, the use of these roadways may be limited.

(4) **Duration.** Permits are issued for the minimum hours and days essential for the activity. Bus permits are valid only while transporting passengers. Yearly permits are issued on an annual basis on dates determined by the Department of Transportation. These permits are renewable by reapplication in writing to the Department of Transportation. The Commissioner or his/her designee may, at his/her discretion, issue, extend or revoke any permit.

(k) **Express lanes on limited access highways.** (1) **Restrictions.** Wherever signs are erected on highways or bridges giving notice of express lanes, no person shall operate a vehicle other than a vehicle as specified in paragraph (2) of this subdivision, a medallion taxi or a for-hire vehicle with at least one passenger as specified in paragraph (3) of this subdivision, an emergency vehicle as specified in paragraph (4) of this subdivision, or a vehicle classified as an HOV, with or without EZPASS as specified on such sign, within a designated express lane on a highway or bridge during the hours specified on such signs.

(2) **Buses, out-of-state bus equivalents, Access-A-Ride vehicles, ambulettes and wheelchair accessible vans.** Vehicles registered as buses in New York State, vehicles registered out-of-state that are equivalent to New York State registered buses, all vehicles authorized by the Metropolitan Transportation Authority New York City Transit ("MTA/NYCT") to provide Access-A-Ride service, ambulettes, wheelchair accessible vans, and motorcycles shall be eligible to use express lanes on highways or bridges pursuant to this subdivision as follows:

(i) The owner or operator of any vehicle registered as a bus in New York State shall be able to provide proof of:

(A) operating authority issued by one or more of the following as required: the appropriate New York City agency, department or authority; the New York State Department of Transportation; or the Interstate Commerce Commission; and

(B) current valid vehicle registration indicating New York State bus or official license plates; and

(C) minimum vehicle seating capacity of 16 passengers not including the operator; and

(D) seating capacity consistent with the seating capacity set forth in the appropriate grant of operating authority; and

(E) valid insurance consistent with state requirements.

(ii) The owner or operator of any vehicle registered out-of-state that is equivalent to a New York State registered bus shall be able to provide proof of:

(A) operating authority issued by one or more of the following as required: the appropriate New York City agency, department or authority; the appropriate out-of-state authorizing agency, department or authority; or the Interstate Commerce Commission; and

(B) current valid vehicle registration indicating license plates equivalent to New York State bus or official license plates; and

(C) minimum vehicle seating capacity of 16 passengers not including the operator; and

(D) seating capacity consistent with the seating capacity set forth in the appropriate grant of operating authority; and

(E) valid insurance consistent with State requirements.

(iii) The owner or operator of any vehicle authorized by the Metropolitan Transportation Authority New York City Transit ("MTA/NYCT") to provide Access-A-Ride service, ambulette or wheelchair accessible van shall be able to provide proof of:

(A) operating authority issued by one or more of the following as required: the New York City Taxi and Limousine Commission; the New York State Department of Transportation; or the Interstate Commerce Commission; and

(B) current valid vehicle registration; and

(C) seating capacity consistent with the seating capacity set forth in the applicable grant of operating authority, where such grant specifies a seating capacity; and

(D) valid insurance consistent with state requirements.

(iv) The owner or operator of any vehicle registered as a motorcycle in New York State shall be able to provide proof of:

(A) current valid vehicle registration; and

(B) valid insurance consistent with State requirements.

(3) **Taxis and for-hire vehicles.** Medallion taxis and for-hire vehicles duly licensed by the New York City Taxi and Limousine Commission carrying at least one passenger shall be allowed to use express lanes on highways or bridges. Medallion taxis and for-hire vehicles without passengers shall not be allowed to use express lanes on highways or bridges. Medallion taxis and for-hire vehicles without passengers shall not be allowed to use express lanes on highways or bridges.

(4) **Emergency vehicles.** Emergency vehicles responding to emergencies shall be allowed to use express lanes on highways or bridges. Emergency vehicles not responding to emergencies shall not be allowed to use express lanes on highways or bridges.

(l) **Use of the Grand Central Parkway by certain vehicles.** Notwithstanding any other provision of these rules to the contrary, single-unit vehicles with no more than three axles and ten tires may operate in both directions on the roadway of the Grand Central Parkway, between the Triborough Bridge and the western leg of the Brooklyn-Queens Expressway. Buses will continue to be prohibited from operating on the Grand Central Parkway without consent.

(m) Reserved.

NOTE

1. Statement of Basis and Purpose in City Record Jan. 25, 2002:

The Commissioner of the Department of Transportation is authorized to regulate traffic pursuant to §2903(a) of the New York City Charter.

Section 4-01(b) is being amended to add a definition of high occupancy vehicles.

Section 4-07(k)(1) is being amended to allow the placement of signs permitting use of designated express lanes on highways by high occupancy vehicles and to delete the references to written authorization and to limited access highways, which are no longer required.

Section 4-07(k)(2) is being amended to reflect the fact that the Access-A-Ride program is now being run by the Metropolitan Transportation Authority New York City Transit and not the New York City Department of Transportation. This paragraph is also being amended to delete the reference to applications for written authorization, which is no longer required.

Section 4-07(k)(3) and (k)(4) are being amended to add bridges as potential roads where express lanes may be designated.

2. Statement of Basis and Purpose in City Record May 17, 2000: The Commissioner of the Department of Transportation is authorized to regulate traffic pursuant to §2903(a) of the New York City Charter. Section 4-07(k) is being amended to allow for-hire vehicles with passengers to use the express lanes on limited access highways in order to give priority to vehicles being used for a transit purpose.

3. Statement of Basis and Purpose in City Record Dec. 11, 1998: The Commissioner of the Department of Transportation is authorized by section 2903 of the New York City Charter and Section 1642 of the New York State Vehicle and Traffic Law to provide for the towing of vehicles on the arterial highways in the City. In 1996, the management of the arterial tow program was transferred to the Police Department along with other traffic enforcement functions. Paragraphs (1) and (2) of subdivision (i) of section 4-07 are being amended to reflect that the tow truck permits are now awarded by the Police Commissioner and that the Police Department rather than the Department of Transportation shall maintain its own tow trucks for such purposes. In addition, the rule is being amended to reflect that the name of the Interboro Parkway was changed to the Jackie Robinson Parkway by State law in 1997.

4. Statement of Basis and Purpose in City Record July 25, 1996: The Commissioner of the Department of Transportation is authorized by section 2903 of the New York City Charter and Section 1642 of the New York State Vehicle and Traffic Law to provide for the fees allowed to be charged by the tow firms operating under Department of Transportation permits on the arterial highways in the City. Section 4-07(i)(3)(i) is being amended to clarify that only a jump start is intended to be permitted. A battery charge could imply removal of the battery, which is inappropriate on the side of the road. Section 4-07(i)(3)(iii) is being amended to alleviate any areas of confusion as to what amount could be charged and in what circumstances, which occasionally led to different rates for similar work. These new rates will allow for uniformity in the charges by tow companies.

5. Statement of Basis and Purpose in City Record June 19, 1995: The Commissioner of the Department of Transportation is authorized to regulate the movement of vehicular traffic pursuant to Section 2903 of the New York City Charter and section 1642 of the Vehicle and Traffic Law. This rule is proposed in order to reduce traffic congestion and improve air quality and vehicular and pedestrian safety by removing small commercial vehicles from local streets in residential neighborhoods. A six month pilot program from July 22, 1996 through January 21, 1997, will be undertaken allowing small commercial vehicles to utilize a segment of the Grand Central Parkway. Step vans continue to be prohibited from this parkway. After the first $4\frac{1}{2}$ months of the pilot program, DOT will conduct a comprehensive data collection and evaluation effort to determine the impacts of the pilot program on traffic circulation, safety, and community life on the Grand Central Parkway and the adjacent local street network. This analysis will include a preliminary data collection effort conducted after the first 2 months to determine initial usage. The pilot program will end at the conclusion of the six month period, after which a final report will be forwarded to the Borough President and other elected officials for their evaluation.

6. Statement of Basis and Purpose in City Record Oct. 25, 1995: The Commissioner of the Department of Transportation is authorized to regulate the movement of vehicular traffic pursuant to Section 2903 of the New York City Charter and section 1642 of the Vehicle and Traffic Law. This rule which established a pilot program for allowing certain commercial vehicles on a segment of the Grand Central Parkway is being repealed as the Agency has decided not to proceed with the pilot program at this time.

7. Statement of Basis and Purpose in City Record Aug. 2, 1995: The Commissioner of the Department of

Transportation is authorized to regulate the movement of vehicular traffic pursuant to Section 2903 of the New York City Charter and section 1642 of the Vehicle and Traffic Law. This rule is proposed in order to reduce traffic congestion and improve air quality and vehicular and pedestrian safety by removing small commercial vehicles from local streets in residential neighborhoods. A twelve month pilot program from September 6, 1995 through September 5, 1996, will be undertaken allowing small commercial vehicles to utilize a segment of the Grand Central Parkway. The purpose of the program is to measure the impacts on traffic circulation, safety, and community life by removing some of the commercial traffic from the local streets. The program will also expedite the movement of goods by permitting small commercial vehicles on parkways. Based upon a written comment received, the description of the height and weight dimensions of the vehicles which will be allowed to use the Grand Central Parkway during the pilot program has been modified by adding the words "including cargo" for clarity. In addition the descriptive words "maximum cargo volume of 400 cubic feet" have been deleted as they are superfluous for the purpose of defining the dimensions of the vehicles.

8. Statement of Basis and Purpose in City Record Oct. 3 2003: The Commissioner of Transportation is authorized to regulate the movement of vehicular traffic on parkways within New York City pursuant to Section 2903(a) of the New York City Charter. This rule is proposed in order to reduce traffic volume exiting from the Triborough Bridge to the local street system in Astoria, Queens. Preliminary estimates of this agency are that approximately 3,150 (or 70%) of the 4,500 commercial vehicles that currently exit each day at the Hoyt Avenue South/29th Street exit of the Triborough Bridge would be able to stay on the Grand Central Parkway to the entrance ramp of the Brooklyn-Queens Expressway. The portion of the Grand Central Parkway which would be opened to trucks in this pilot program is very short, approximately three-quarters of a mile. This agency anticipates that the pilot program proposed herein will reduce congestion and conflicts and improve traffic safety not only at the Hoyt Avenue South/29th Street exit, but also along Astoria Boulevard South. Buses will continue to be prohibited from using this roadway. The Department will monitor the impact and effectiveness of the pilot program. The pilot program will end at the conclusion of the 12-month period.

9. Statement of Basis and Purpose in City Record Oct. 1, 2004: The Commissioner of Transportation is authorized to regulate the movement of vehicular traffic on parkways within New York City pursuant to §2903(a) of the New York City Charter. On October 3, 2003, the Department of Transportation adopted a rule creating a 12-month pilot program to reduce traffic volume exiting from the Triborough Bridge to the local street system in Astoria, Queens by opening approximately three-quarters of a mile of the Grand Central parkway to trucks. The rule became effective on November 3, 2003. On July 27, 2004, Governor Pataki signed chapter 223 of the laws of 2004, which specifically authorizes the New York City Department of Transportation to adopt a permanent rule allowing single-unit commercial vehicles with no more than three axles and ten tires on the part of the Grand Central Parkway, between the Triborough Bridge and the western leg of the Brooklyn-Queens Expressway. Consequently, the pilot program is hereby made permanent.

10. Statement of Basis and Purpose in City Record May 2, 2008: The Commissioner of the Department of Transportation is authorized to promulgate rules regarding parking and traffic in the City pursuant to §2903 of the New York City Charter. Subdivision (k) of §4-07 is being amended to bring New York City's Traffic Rules in compliance with federal law that permits motorcycles to operate on highways receiving federal funding. Title 23, §102(a) of the United States Code states in relevant part that "no State or political subdivision of a State may enact or enforce a law that applies only to motorcycles and the principal purpose of which is to restrict the access of motorcycles to any highway or portion of a highway for which Federal-aid highway funds have been utilized for planning, design, construction, or maintenance." As express lanes within New York City receive federal funding, the Department is amending rules to permit motorcycles to travel upon them. Furthermore, Title 23, §166 of the United States Code states that "the State agency shall allow motorcycles . . . to use the HOV facility. A State agency may restrict the use of the HOV facility by motorcycles . . . if the agency certifies to the Secretary that such use would create a safety hazard and the Secretary accepts the certification." The Secretary of the U.S. Department of Transportation has not accepted DOT's certification, as required by the statute.

CASE NOTES

¶ 1. While a pedestrian's crossing of the West Side Highway in violation of this regulation is evidence of

negligence, that violation is not in itself sufficient to warrant summary judgment in favor of the defendant in the pedestrian's personal injury case. The manner in which the accident happened was held to be a question of fact. Romeo v. DeGennaro, 255 A.D.2d 208, 680 N.Y.S.2d 235 (App. Div. 1st Dept. 1998).

¶ 2. A bicycle rider is subject to the same rights and duties as the driver of a vehicle, and does not have the special privileges afforded pedestrians. Tapia v. Royal Bus Tours, 2008 N.Y. Slip Op. 51292U, 2008 N.Y. Misc. Lexis 3694 (Sup.Ct. Queens Co.), discussed in note 1 of 34 RCNY 4-07.

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 4-08

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 4 TRAFFIC RULES AND REGULATIONS

§4-08 Parking, Stopping, Standing.

(a) **General provisions.** (1) **Compliance with rules.** No person shall stop, stand or park a vehicle, whether attended or unattended, other than in accordance with authorized signs, pavement markings, or other traffic control devices, unless necessary to avoid conflict with other traffic or in compliance with law or direction of any law enforcement officer or other person authorized to enforce these rules.

(i) **Sign placement.** For purposes of this §4-08, one authorized regulatory sign anywhere on a block, which is the area of sidewalk between one intersection and the next, shall be sufficient notice of the restriction(s) in effect on that block.

(2) **Stopping prohibited.** When stopping is prohibited by signs or rules, no person shall stop, stand or park a vehicle, whether attended or unattended.

(3) **Standing prohibited.** When standing is prohibited by signs or rules, no person shall stop a vehicle, attended or unattended, except temporarily for the purpose of and while actually engaged in expeditiously receiving or discharging passengers.

(4) **Parking prohibited.** When parking is prohibited by signs or rules, no person shall stop a vehicle, attended or unattended, except temporarily for the purpose of and while expeditiously receiving or discharging passengers or loading of unloading property to or from the curb.

(5) **Vehicles prohibited on berms and shoulders.** Stopping, parking or operating a motor vehicle is prohibited on

the berm or shoulder adjacent to a parkway or a highway as specified in §4-07(i) of these rules, except for emergency purposes.

(6) **Paper or other temporary signs.** Any paper or other temporary signs posted by authorized law enforcement agencies shall supersede all existing posted rules for the days and times specified. Regulations placed inside parking meters by the Department of Transportation so as to cover rate plates and the inside of the dome of the meter shall supersede all existing posted rules for the time the insert remains in the parking meter.

(7) **Holiday suspensions of parking rules.** (i) Major legal holidays. Except as provided in subparagraph (ii), of this paragraph, stopping, standing, or parking rules that are indicated on official signs shall be suspended on the days on which the following major legal holidays are officially observed by the City of New York: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day. In addition, if New Year's Day, Independence Day or Christmas Day is officially observed on a day other than January 1, July 4 or December 25, respectively, then major legal holiday rules shall be in effect both on the official day of observance and on the traditional day of observance.

(ii) **Exception.** Parking, standing and stopping rules that are indicated on official signs shall remain in effect on the dates of both official and traditional observance of the above-listed major legal holidays only in areas where signs indicate that parking, standing and stopping rules are in effect seven days a week, provided, however, that the activation of meters that are required by posted sign to be activated seven days a week shall be suspended on major legal holidays pursuant to subparagraph (i).

(iii) **Street cleaning rules suspended.** (A) Street cleaning parking rules are suspended on the days listed in subparagraph (i) of this paragraph, and on the following holidays: Yom Kippur, Rosh Hashanah, Ash Wednesday, Holy Thursday, Good Friday, Ascension Thursday, Feast of the Assumption, Feast of All Saints, Feast of the Immaculate Conception, first two days of Succoth, Shemini Atzereth, Simchas Torah, Shavuot, Purim, Orthodox Holy Thursday, Orthodox Good Friday, first two and last two days of Passover, Idul-Fitr, Idul-Adha, Asian Lunar New Year, on all state and national holidays, on the following additional legal holidays: Martin Luther King, Jr.'s Birthday, Lincoln's Birthday, President's Day, Columbus Day-observed, Election Day, and Veteran's Day, and on such other days as announced by the Commissioner or his/her designee.

(B) For the purposes of this subparagraph (iii), street cleaning parking rules shall mean those rules (a) on posted signs consisting of the letter "P" with a broom through it or (b) except as otherwise provided in item (D) of this subparagraph, on posted signs containing "No Parking" rules restricting parking on one day per week or on alternate days.

(C) "No Parking" street cleaning rules, located in parking meter zones, are suspended on the days on which street cleaning rules are suspended and on such other days as announced by the Commissioner or his/her designee. Suspension of street cleaning rules does not affect the requirement of activating the meter during the hours that such meter is in effect.

(D) Posted signs restricting parking for a period of six or more consecutive hours on one day per week or on alternate days are not street cleaning parking rules. However, such restrictions are suspended on the days that street cleaning rules are suspended.

(8) **Disabled vehicles.** A vehicle that becomes disabled must be pushed to the side of the road so that it obstructs traffic as little as possible, and must be removed expeditiously.

(9) **Immobilization and towing of illegally parked vehicles.** (i) **Time and manner of immobilization.** Any illegally parked vehicle found parked at any time upon any public highway in the City may, by or under the direction of any person authorized by the Commissioner, be immobilized in such manner as to prevent its operation, and thereafter may be removed to a tow pound as provided in these rules; provided, however, that no such vehicle shall be

immobilized by any means other than by the use of a device or other mechanism which will cause no damage to such vehicle unless such vehicle is moved while such device or mechanism is in place.

(ii) **Notice.** Notice of immobilization pursuant to this paragraph shall be placed in a conspicuous place on the vehicle. Such notice shall contain:

(A) a warning that any attempt to move the vehicle may result in damage to the vehicle; and

(B) the time, place and manner in which the vehicle may be redeemed.

(iii) **Immobilization fee.** The registrant of an immobilized vehicle which has not yet been removed to a tow pound pursuant to these rules, or any other person authorized by the registrant of such vehicle, may secure the release of the vehicle upon satisfaction of all parking summonses in judgment, if any, for which the registrant of the immobilized vehicle is liable and payment of an immobilization fee of $185.00.

(iv) **Applicable rules.** Where a vehicle has been both immobilized and towed, the owner shall be subject to both the immobilization requirements of this paragraph, and all applicable provisions of these rules.

(v) **Right to immediate hearing.** The registrant, title holder or operator of any vehicle that has been immobilized shall have the right to an immediate hearing during regular business hours at the Parking Violations Bureau in relation to the immobilization.

(vi) **Removal fee.** The fee for removal of illegally parked vehicles to a tow pound shall be determined in accordance with the following fee schedule. Said fee shall be payable before such vehicles are released.

(A) The removal fee for Regular Towing shall be $185.00 and shall apply to any vehicle that has a gross vehicle weight less than 6,500 pounds, that may be towed through the use of a single tow truck not weighing more than eight tons.

(B) The removal fee for Heavy Duty Towing shall be $370.00 and shall apply to any vehicle that has a gross vehicle weight of 6,500 pounds or greater, and/or requires either more than one tow truck or a single tow truck which weighs in excess of eight tons, in order to be towed.

(vii) **Storage fee.** In addition to the removal fee set forth in subparagraph (vi) of this paragraph (9), there shall be a storage fee of $20.00 for each day such vehicle remains in the possession of the city, up to and including the day such vehicle is released. Said fee shall be payable before such vehicle is released.

(viii) **Vehicles not removed considered abandoned.** Any vehicle which is not removed from city property within 10 days following the mailing of a request to remove it shall be deemed to be an abandoned vehicle pursuant to paragraph (d) of subdivision 1 of §1224 of the Vehicle and Traffic Law and shall be disposed of by the Commissioner pursuant to such law. Such request shall be sent by certified or registered mail, return receipt requested, to the registered owner of the vehicle, at the address contained on the registration of such vehicle.

(ix) **Release of vehicle in process of being removed.** When a vehicle has been hooked to a tow truck in preparation for removal toa pound but the owner or other person lawfully entitled to posession of such vehicle appears and requests the release of such vehicle before the tow truck is in motion, such vehicle shall be unhooked and released, provided, however, that the person to whom such vehicle is released must execute a binding agreement consenting to pay the vehicle release penalty as set forth in subparagraph (x) of this paragrph (9) within thirty days from the date of such agreement and, in the event of non-payment, to the imposition of additional penalties in accordance with subparagraph (xi) of this paragraph (9); and provided further that such person present a current valid driver's license and either registration for the vehicle, title to the vehicle, insurance identification and keys for the vehicle, a rental agreement and keys for the vehicle in case of a rental vehicle, or company identification and keys for the vehicle in the

case of a commercial vehicle.

(x) **Vehicle release penalty.** The penalty for the release of an illegally parked vehicle under the circumstances permitted by subparagraph (ix) of this paragraph (9) shall be $100.00 for illegally parked vehicles which meet the criteria contained in subparagraph (vi)(A) of this paragraph (9), and $200.00 for illegally parked vehicles which meet the criteria listed in subparagraph (vi)(B) of this paragraph (9). This fee is in addition to any other monetary fine(s) and penalty(ies) permitted by law for the underlying parking violation(s); provided, however, that in no event shall a vehicle release penalty be imposed if the underlying parking violation or, in the case of multiple parking violations, all underlying parking violations, is (are) dismissed by the Parking Violations Bureau.

(xi) **Non-payment of vehicle release penalty.** The Parking Violations Bureau may, in accordance with law, prescribe additional penalties for non-payment of the vehicle release penalty set forth in sub-paragraph (x) of this paragraph (9) and enter and enforce default judgements for such vehicle release penalty and additional penalties.

(10) **Notification stickers.** (i) **Issued by Traffic Enforcement Agents.** When stopping, standing or parking is prohibited by sign or rule and an unattended vehicle is stopped, standing or parked so as to interfere with the free flow of traffic, Traffic Enforcement Agents are hereby authorized to affix a sticker on the operator's side back seat window of the vehicle informing the operator of said violation and interference. The dimensions of the sticker shall be 8 1/2" by 11" with the words:"This vehicle violates New York City Traffic Rules. The resulting obstruction of traffic caused unnecessary delays." The words "New York City Department of Transportation" shall also appear on the sticker.

(ii) **Issued by the Department of Sanitation.** When parking is prohibited by sign or rule and an unattended parked vehicle interferes with the cleaning of the streets by the Department of Sanitation, the Commissioner of Sanitation is hereby authorized to affix a sticker on the operator's side back seat window of the vehicle informing the operator of said violation and interference. The dimensions of the sticker shall be 8 1/2" by 11" with the words: "This vehicle violates New York City Traffic Rules. As a result, this street could not be properly cleaned. A cleaner New York is up to you." The words "New York City Department of Sanitation" shall also appear on the sticker.

(iii) **Issued by the Fire Department.** When an unattended vehicle is parked, standing or stopped in violation of subdivision (e), paragraph (2) below, and obstructs access to any fire hydrant, the Commissioner of the Fire Department is hereby authorized to affix a sticker on the operator's side back seat window of the vehicle, informing the operator of said violation and obstruction. The dimensions of the sticker shall be 81/2" by 11" with the words: "This vehicle violates New York City Traffic Rules and is obstructing a fire hydrant. As a result, the violator is jeopardizing the life and property of the general public." The words "Fire Department of New York" shall also appear on the sticker.

(iv) **Issued by MTA New York City Transit Managers.** When standing is prohibited by a bus stop sign and an unattended vehicle other than an authorized bus is standing in such bus stop so as to interfere with the free movement of buses into such bus stop in violation of §4-08(c)(3) of these rules, MTA New York City Transit Managers are hereby authorized, only after having issued a summons to such vehicle, to affix a sticker on the driver side backseat window of the vehicle informing the operator of said violation and interference. The dimensions of the sticker shall be $8^1/_2$ inches by 11 inches and shall include the words: "This vehicle violates New York City Traffic Rules. The resulting obstruction of traffic causes delay, safety hazards, and interferes with accessibility of the bus to passengers." The words "MTA New York City Transit" also shall appear on the sticker.

(11) **Restricted area.** The Parking Violations Bureau shall be authorized to establish a separate fine schedule for violations committed in the restricted area, as defined herein. Such fine schedule may be higher than the fine schedule for violations committed outside the restricted area. As used herein, restricted area shall mean all of Manhattan, south from the north building line on 96th Street but excluding all of Central Park.

(12) **In-vehicle parking system.**

(i) **Definition.** Whenever these rules refer to an in-vehicle parking system ("IVPS"), such term shall refer

collectively to the electronic component, the electronic debit card that is inserted into the electronic component to activate it, and the windshield sticker that must be displayed on the vehicle, all as further described in this section. All components of the IVPS are non-transferable and must be activated, installed, displayed, or otherwise operated in the manner set forth in these rules in order for use of the IVPS to be valid.

(A) **Electronic component.** The electronic component of an IVPS is a small portable electronic module slightly larger than a pocket calculator that is designed to be placed on top of a vehicle's dashboard behind the windshield, capable of reading and writing to and from an electronic debit card, and incorporating an electronic display on which information can be seen readily. Unless otherwise required by law or rule, only one electronic component will be issued to the registered owner of the vehicle(s) in which the IVPS is to be used. Each electronic component shall be numerically keyed to the electronic debit card and all windshield stickers of the IVPS to which it is issued.

(B) **Electronic debit card. (a)** A card, whether or not prepaid, capable of being programmed to allow a user to activate an IVPS for a particular purpose when read by the electronic component.

(b) Each electronic debit card shall be numerically keyed to the electronic component of the IVPS to which it is issued.

(C) **Windshield sticker(s). (a)** Windshield stickers must be displayed on the right side of the windshield in each vehicle in order for an IVPS to be valid.

(b) Each windshield sticker shall be numerically keyed to the electronic component of the IVPS to which it is issued.

(c) Unless otherwise required by law or rule, at the request of the registered owner of the vehicle(s) in which the IVPS will be used, a maximum of ten (10) windshield stickers will be issued to such person.

(ii) **Use of in-vehicle parking systems.** In-vehicle parking systems may only be used:

(A) to park in a space regulated by a parking meter instead of using another authorized method of payment as defined in subdivision (h) paragraph (7) of this section of these rules; or

(B) in conjunction with the issuance of a permit pursuant to subdivision (o) of this section of these rules instead of a permit card.

(iii) **Issuance of in-vehicle parking systems.**

(A) **Issuance. (a)** IVPS applications shall be issued by the Bureau of Parking, Permit Section, and must be submitted by mail, including the following information about the applicant, in addition to any other information required on the application.

(1) Name.

(2) Home (or mailing) address.

(3) Evening telephone number.

(4) Daytime telephone number.

(5) Copy of valid driver's license.

(6) Copy of valid vehicle registration for each vehicle (to a maximum of ten) in which the IVPS will be used.

(b) [Reserved]

(c) In addition to prepaid electronic debit cards, as described below, applicants shall receive:

(1) One electronic component.

(2) One windshield sticker for each vehicle for which a valid registration is shown.

(d) Electronic debit cards shall be sold by the Bureau of Parking, Permit Section, by mail, in various denominations and must be prepaid by certified check or money order of the value of the electronic debit card(s) sought to be purchased.

(e) IVPSs and electronic debit cards shall be mailed to applicants via certified mail; provided, however, that an applicant may request that they be picked up by the applicant at the Bureau of Parking, Permit Section, upon presentation by the applicant of his/her valid driver's license.

(B) **Fees.** There shall be a deposit fee of one hundred dollars ($100) payable by certified check or money order, for each IVPS, which fee shall be refunded when the IVPS is returned to the Department. Destruction of, damage to, loss or theft of the electronic component of the IVPS shall result in the automatic forfeiture of the deposit fee.

(b) **Violation of posted no stopping rules prohibited.** When official signs, markings or traffic-control devices have been posted prohibiting, restricting or limiting the stopping of vehicles, no person shall stop, stand or park any vehicle in violation of the restrictions posted on such signs, markings or traffic-control devices.

(c) **Violation of posted no standing rules prohibited.** When official signs, markings or traffic-control devices have been posted prohibiting, restricting or limiting the standing of vehicles, no person shall stand or park any vehicle in violation of the restrictions posted on such signs, markings or traffic-control devices, except as otherwise provided herein:

(1) **No standing (snow emergency).** When the Commissioner declares a state of snow emergency, no person shall stand or park a vehicle upon a street designated by signs as a snow street, or upon any other area referred to in §4-12(k)(1) of these rules and except as otherwise provided therein.

(2) **No standing-taxi stand.** No person shall stand or park a vehicle other than a taxi in a taxi stand when any such stand has been officially designated and appropriately posted except that the operator of a vehicle may temporarily stand therein for the purpose of expeditiously receiving and discharging passengers provided such standing does not interfere with any taxi about to enter or leave such zone.

(3) **No standing-bus stop.** No person shall stand or park a vehicle other than an authorized bus in its assigned bus stop when any such stop has been officially designated and appropriately posted except that the operator of a vehicle may temporarily stand therein for the purpose of expeditiously receiving and discharging passengers provided such standing does not interfere with any bus about to enter or leave such zone.

(4) **No standing except authorized vehicles.** Except as provided in paragraph (8) of this subdivision, where a posted sign reads "No Standing Except Authorized Vehicles," no vehicles, except those designated by a rider attached to such sign, may stand or park in that area.

(5) **No standing-hotel loading zone.** No person shall stand or park a vehicle in such zone except temporarily for the purpose of and while actually engaged in receiving or discharging passengers and their personal baggage at hotels.

(6) **No standing-commuter van stop.** No person shall stand or park a vehicle other than a commuter van in a commuter van stop when such a stop has been officially designated and appropriately posted, except that an operator of such other vehicle may temporarily stand therein for the purpose of expeditiously receiving or discharging passengers

provided such standing does not interfere with any commuter van about to enter or leave such zone.

(7) **No standing-for-hire vehicle stop.** No person shall stand or park a vehicle other than a for-hire vehicle in a for-hire vehicle stop when such a stop has been officially designated and appropriately posted, except that an operator of such other vehicle may temporarily stand therein for the purpose of expeditiously receiving or discharging passengers provided such standing does not interfere with any for-hire vehicle about to enter or leave such zone.

(8) No standing except certain diplomatic and consular vehicles.

(i) Where a posted sign reads "No Standing Except Vehicles with Consul-C or Diplomat-A&D License Plates D/S Decals Only", no person may stand or park a vehicle in such area except as follows:

(A) a person may stand or park a vehicle in such area if such vehicle bears "A", "C" or "D" series license plates issued by the U.S. Department of State, such vehicle displays a valid non-transferable service vehicle decal issued by the City of New York that is affixed to the inside of the operator's side of the windshield, and such person is authorized to park or stand in a space in such area by the foreign mission or consulate that has been allocated such space by the Department; or

(B) a person may stand a vehicle temporarily (no more than thirty (30) minutes) in such area for the purpose of and while actually engaged in delivering, loading or unloading for official business if such vehicle bears "A", "C" or "D" series license plates issued by the U.S. Department of State, such vehicle displays a valid non-transferable delivery vehicle decal issued by the City of New York that is affixed to the inside of the operator's side of the windshield, such person is authorized to stand in a space in such area by the foreign mission or consulate that has been allocated such space by the Department, and a delivery is being made to such foreign mission or consulate.

(ii) Where a posted sign reads "No Standing Except Vehicles with Consul-C or Diplomat-A&D License Plates Delivery Decal Required 30 Minute Limit", no person may stand or park a vehicle in such area except a person may stand a vehicle temporarily (no more than thirty (30) minutes) in such area for the purpose of and while actually engaged in delivering, loading or unloading for official business if such vehicle bears "A", "C" or "D" series license plates issued by the U.S. Department of State and displays a valid non-transferable delivery vehicle decal issued by the City of New York that is affixed to the inside of the operator's side of the windshield.

(d) **Violation of posted no parking rules prohibited.** When official signs, markings or traffic control devices have been posted prohibiting, restricting or limiting the parking of vehicles, no person shall park any vehicle in violation of the restrictions posted on such signs, markings or traffic control devices, except as otherwise provided herein:

(1) **No parking-street cleaning.** No person shall park a vehicle in violation of officially posted street cleaning rules, as defined in subsection (a)(7)(ii) of these rules, unless such rules have been suspended by the Commissioner or his/her designee pursuant to subsection (a)(7) of these rules.

(2) **No parking-taxi stand.** No person shall park a vehicle other than a taxi in a taxi stand when any such stand has been officially designated and appropriately posted except that the operator of a passenger or commercial vehicle may temporarily stop or stand therein provided such stopping or standing does not interfere with any taxi about to enter or leave such zone.

(3) **No parking except handicapped permits (off-street).** (i) No person shall park a vehicle in any off-street parking space designated for use by the handicapped pursuant to §1203-c of the Vehicle and Traffic Law, or designated by blue painted lines or markings displaying the international symbol of access unless:

(A) Such person is, or is transporting, a handicapped permittee and displays a state special vehicle identification permit issued by the Commissioner of Motor Vehicles or

(B) Such vehicle is registered in accordance with §404-a of the Vehicle and Traffic Law and is being used for the transportation of handicapped persons, or

(C) Such vehicle displays a special license plate or parking permit issued by any governmental entity subject to the laws of the United States, or a foreign country for the purpose of granting special parking privileges to people with disabilities.

(ii) Handicapped plates or permits issued by New York State or by any other state, district, territory or other governmental entity or foreign country shall be valid only in designated off-street parking areas. They are not valid in on-street parking areas.

(4) **Official markings.** When markings upon the curb or the pavement of a street designate a parking space, no person shall stand or park a vehicle in such designated parking space so that any part of the vehicle occupies more than one space or protrudes beyond the markings designating such a space, except that a vehicle which is of a size too large to be parked within a single designated parking space shall be parked with the front bumper at the front of the space with the rear of the vehicle extending as little as possible into the adjoining space to the rear, or vice-versa. Notwithstanding the above, no vehicle that is too long and/or too wide to be parked within a single designated parking space shall be parked in such a space which is designated for angle parking.

(5) **No parking except authorized vehicles.** Where a posted sign reads "No Parking Except Authorized Vehicles," no vehicles, except those designated by a rider attached to such sign, may park in that area.

(6) **No parking-hotel loading zone.** No person shall park a vehicle in such zone except temporarily for the purpose of and while actually engaged in receiving or discharging passengers and their personal baggage at hotels.

(e) **General no stopping zones (stopping, standing and parking prohibited in specified places).** No person shall stop, stand, or park a vehicle in any of the following places, unless otherwise indicated by posted signs, markings or other traffic control devices, or at the direction of a law enforcement officer, or as otherwise provided in this subdivision:

(1) **Traffic lanes.** In any lane intended for the free movement of vehicles, except a lane immediately adjacent to the curb, unless such lane is designated by signs as a traffic lane, and except as otherwise provided in subdivision (f), paragraph (1) below. In no instance shall a vehicle extend more than 8 feet from the nearest curb.

(2) **Hydrants.** Within fifteen feet of a fire hydrant, unless otherwise indicated by signs, or parking meters, except that during the period from sunrise to sunset if standing is not otherwise prohibited, the operator of a passenger car may stand the vehicle alongside a fire hydrant provided that the operator remains in the operator's seat ready for immediate operation of the vehicle at all times and starts the motor of the car on hearing the approach of fire apparatus, and provided further, that the operator shall immediately remove the car from alongside the fire hydrant when instructed to do so by any member of the police, fire, or other municipal department acting in his/her official capacity.

(3) **Sidewalks.** On a sidewalk.

(4) **Intersections.** Within an intersection, except on the side of a roadway opposite a street which intersects but does not cross such roadway and except as provided in paragraph (5), below.

(5) **Crosswalks.** In a crosswalk.

(6) **Street excavations.** Alongside or opposite any street excavation or obstruction when stopping, standing, or parking would obstruct any traffic lane.

(7) **Tunnels and elevated roadways.** Within a highway tunnel or upon an elevated or controlled access roadway

when all lanes are normally available for moving traffic.

(8) **Divided highways.** Parking, standing and stopping are prohibited alongside the median dividing a highway into two or more separate roadways. However, alongside the medians of certain segments of such divided highways, the department may post signs restricting parking, standing and stopping alongside the medians of such segments only on specified days and/or hours. Wherever such signs are so posted on a segment of a divided highway, parking, standing and stopping are permitted alongside the median of such segment on the days and/or hours when parking, standing and stopping are not specifically prohibited by such signs. On segments of such highway where such signs are not posted, parking, standing and stopping alongside the median are prohibited at all times. For the purposes of this paragraph, a segment of a divided highway is the area of such highway between adjacent intersections.

(9) **Bicycle lanes.** Within a designated bicycle lane.

(10) **Restricted use and limited use streets.** On any street designated as a restricted use street or a limited use street as defined in §4-12(r)(4) of these rules, except as otherwise provided in §4-12(r)(1).

(11) **Major roadways.** On the improved or paved roadway of any of the arteries set forth in §4-07(i) of these rules, or on improved or paved roadways in a park or in parks, for the purpose of removing or replacing a flat tire, unless permitted by posted signs. For the purposes of this rule, a vehicle is considered to be on the improved or paved roadway unless the vehicle is completely off such roadway.

(12) **Obstructing traffic at intersection.** When vehicular traffic is stopped on the opposite side of an intersection, no person shall drive a vehicle into such intersection, except when making a turn, unless there is adequate space on the opposite side of the intersection to accommodate the vehicle the person is driving, notwithstanding the indication of a traffic control signal which would permit the person to proceed.

(f) **General no standing zones (standing and parking prohibited in specified places).** No person shall stand or park a vehicle in any of the following places, unless otherwise indicated by posted signs, markings or other traffic control devices, or at the direction of a law enforcement officer:

(1) **Double parking.** On the roadway side of a vehicle stopped, standing, or parked at the curb, except a person may stand a commercial vehicle alongside a vehicle parked at the curb at such locations and during such hours that stopping, standing, or parking is not prohibited, while expeditiously making pickups, deliveries or service calls, provided that there is no unoccupied parking space or designated loading zone on either side of the street within 100 feet that can be used for such standing, and provided further that such standing is in compliance with the provisions of §1102 of the State Vehicle and Traffic Law. A person may stand a commercial vehicle along the roadway side of a bicycle lane provided all other conditions of this paragraph are met. For the purposes of this paragraph (f)(1), "expeditiously making pick-ups, deliveries or service calls" shall mean that any period of inactivity at the pick-up, delivery or service-call location does not exceed 30 minutes. However, such definition shall in no way limit the discretion of the Department of Finance Adjudication Tribunal to determine whether a violation of this paragraph has occurred.

(2) **Driveways.** In front of a public or private driveway, except that it shall be permissible for the owner, lessor or lessee of the lot accessed by a private driveway to park a passenger vehicle registered to him/her at that address in front of such driveway, provided that such lot does not contain more than two dwelling units and further provided that such parking does not violate any other provision of the Vehicle and Traffic Law or local law or rule concerning the parking, stopping or standing of motor vehicles. The prohibition herein shall not apply to driveways that have been rendered unusable due to the presence of a building or other fixed obstruction and, therefore, are not being used as defined in §4-01(b) of these rules.

(3) **Parks.** In any park between one-half hour after sunset and one-half hour before sunrise, except at places designated or maintained for the parking of vehicles.

(4) **Bus lane.** In any lane designated for the exclusive use of buses.

(5) **Railroad crossings.** Within fifty feet of the nearest rail of a railroad crossing.

(6) **Safety zones.** In a safety zone, between a safety zone and the adjacent curb or within thirty feet of points on the curb immediately opposite the ends of a safety zone.

(7) **Pedestrian ramps.** Alongside or in a manner which obstructs a curb area which has been cut down, lowered or otherwise constructed or altered to provide access for persons with disabilities at a marked or unmarked crosswalk as defined in subdivision (b) of §4-01 of this chapter. A person may stop, stand or park a vehicle alongside or in a manner which obstructs a pedestrian ramp not located within such crosswalk, unless otherwise prohibited.

(g) **General no parking zones (parking prohibited in certain places)**. No person shall park a vehicle in any of the following places, unless otherwise indicated by posted signs, markings or other traffic control devices:

(1) **Emergency sites.** Within a block where emergency work is in progress, except that the operator of any vehicle on official public business related to the emergency may park such vehicle at such sites.

(2) **Vacant lots.** In a vacant lot, unless the operator of the vehicle has the written permission of the lot's owner so to park and has otherwise complied with §§10-112 and 10-113 of the Administrative Code.

(3) **Marginal street and waterfronts.** On a marginal street or waterfront, as defined in §4-01(b) of these rules.

(h) **On-street and off-street metered zones.** (1) **Activation of meter or in-vehicle parking system.** No person shall park a vehicle, whether attended or not, in any parking space regulated by a parking meter that indicates by signal that the lawful parking time in such space has expired without (i) properly activating the meter by depositing the appropriate currency therein or otherwise making appropriate payment by an authorized method as described in this section and performing any other act necessary to activate the meter or (ii) properly activating an IVPS. The registration numbers of the electronic component, the electronic debit card, and all related windshield stickers comprising an IVPS must match in order for such system to be considered properly activated. This provision shall not apply to the act of parking or the time necessary to activate the meter or an IVPS immediately. A person may park at a meter without depositing a coin, using another authorized method of payment, or activating an IVPS, if there is an unexpired interval of time shown on the meter but only if the vehicle is moved before the expiration of such interval. However, such person may reactivate the meter or activate an IVPS upon expiration of the time remaining on the meter but in no event may that person remain at the space in excess of the specified time limits applicable to the parking meter zone in which such meter is located.

(2) **Expired meters or in-vehicle parking systems.** No person shall allow a vehicle within his/her control to be parked in any such parking meter space during the restricted and regulated time applicable to the parking meter zone in which such meter is located while the parking meter for such space indicates by signal or a properly activated IVPS shows that the lawful parking time in such space has expired. This provision shall not apply to the act of parking or the time necessary to deposit immediately thereafter a coin or coins or to use another authorized method of payment, in such meter and to perform any other act prescribed on the meter which may be required to place the meter in operation or to activate an IVPS. If an IVPS is used, such system shall be the only valid indicator of whether lawful parking time in a space is available or has expired, because the meter in all such cases will indicate that the time has expired.

(3) **Parking at broken or missing meters.**

(i) A person shall be allowed to park at a missing or broken meter up to the maximum amount of time otherwise lawfully permitted at such meter.

(ii) Where parking spaces in a parking field or on a block are controlled by "Muni-Meters," and a "Muni-Meter" is

broken or missing, the person seeking to purchase a parking receipt shall use a functional "Muni-Meter" in the same parking field or on the same block, to purchase a parking receipt and shall display it pursuant to paragraph 10 of this subdivision.

If all muni-meters in a parking field or on a block are missing or broken, a person shall be allowed to park in such parking field or on such block up to the maximum amount of time otherwise lawfully permitted by such muni-meters in such controlled parking field or block. For purposes of this section, "muni-meter" shall mean an electronic parking meter that dispenses timed receipts that must be displayed in a conspicuous place on a vehicle's dashboard.

(4) **Oversize vehicles.** When a vehicle is too large to be parked within a single parking meter space, it shall be parked with the front section alongside the forward meter. If the operator of the vehicle is using coins or another authorized method of payment other than an IVPS, such forward meter shall be operated and shall determine when the lawful parking time has expired. If the operator of the vehicle is using an IVPS, it shall be activated and shall determine when the lawful parking time has expired.

(5) **Time allowed at parking meters; feeding meters or reactivation of in-vehicle parking systems prohibited.** (i) No person shall park a vehicle in a parking meter space for more than one time period lawfully permitted in that parking meter zone, nor shall any person deposit any additional coin or coins or use another authorized method of payment for the purpose of extending such time.

(ii) No person shall activate an IVPS for a time period longer than one time period lawfully permitted in that parking meter zone, nor shall any person activate or reactivate an IVPS for the purpose of extending such time. Where a person uses less time than the time activated on an IVPS, the cost of the time not actually used shall be credited back to the electronic debit card when such card is next used to activate the electronic component of the IVPS.

(6) **Restrictions and limitations.** The provisions of this subdivision (h) shall not relieve any person of the duty to observe other and more restrictive provisions prohibiting, restricting, or limiting the stopping, standing, or parking of vehicles in specified places or at specified times.

(7) **Authorized payment methods; counterfeits prohibited.** (i) Authorized payment methods. Parking meters shall be activated by the insertion of a coin or coins of United States currency, by the insertion of a token issued by the Metropolitan Transportation Authority New York City Transit ("MTA/NYCT") where authorized by sign or other official indicator, or by the insertion of an electronic debit card. Parking at an on-street meter also may be paid for by the activation of a valid IVPS.

(ii) No person shall deposit or attempt to deposit in any parking meter any slug, button, or any other unauthorized device or substance as a substitute for coins of United States currency or a token issued by MTA/NYCT, nor shall any person use an IVPS or electronic debit card not issued pursuant to this section.

(8) **Displaying, selling or offering merchandise for sale prohibited.** No peddler, vendor, hawker or huckster shall park a vehicle at a metered parking space for purposes of displaying, selling, storing or offering merchandise for sale from the vehicle.

(9) **Parking by disabled persons permitted.** Rules pertaining to the use of parking meter zones shall not apply to vehicles operated by disabled persons duly displaying New York City special parking identification permits issued by the Department of Transportation pursuant to §4-08(o) of these rules, other than at those periods of time when no standing and no stopping restrictions are in effect in the metered zones.

(10) **"Muni-Meters."**

(i) No person shall, in any parking space controlled by a "Muni-Meter," park a vehicle without first purchasing the amount of parking time desired from such machine.

(ii) No person shall, in any parking space controlled by a "Muni-Meter," park a vehicle without displaying a payment receipt in the windshield, where such requirement is indicated by posted signs.

(iii) No person shall, in any parking space controlled by a "Muni-Meter," which allows a person to purchase the amount of parking time desired from a machine that dispenses a receipt or tag to be displayed in the windshield, park a vehicle in excess of the amount of time indicated on such receipt or tag, or on posted signs.

(i) **Municipal off-street parking facilities.** (1) **Parking fees.** No person shall park a vehicle without paying the appropriate fee in accordance with authorized fee schedules posted on the facility.

(2) **Hours of operation.** No person shall park a vehicle before the opening hour or after the closing hour, as specified on authorized signs.

(3) **"Muni-Meters."**

(i) No person shall, in any parking space controlled by a "Muni-Meter," park a vehicle without first purchasing the amount of parking time desired from such machine.

(ii) No person shall, in any parking space controlled by a "Muni-Meter," park a vehicle without displaying a payment receipt in the windshield, where such requirement is indicated by posted signs.

(iii) No person shall, in any facility using the "Muni-Card" system, which allows a person to purchase the amount of parking time desired from a machine that dispenses a receipt or tag, park a vehicle in excess of the amount of time indicated on such receipt or tag, or on posted signs.

(4) **Parking in a dangerous manner.** No person shall park a vehicle in a manner that will endanger any person or property.

(5) **Operator responsible for loss.** The operator enters the facility at his/her own risk and the City of New York shall not be responsible for any injury or loss due to fire, theft, accident, or other causes.

(6) **Angle parking.** No vehicle that is too long and/or too wide to be parked within a single designated parking space shall be parked in such a space which is designated for angle parking.

(j) **Standing or parking vehicles that violate registration and inspection rules are covered or have the VIN obscured.** (1) **Vehicles must be properly registered.** No person shall stand or park a vehicle bearing a New York license plate or plates unless it is properly registered in accordance with the laws and rules of New York.

(2) **Valid plates must be properly displayed.** No person shall stand or park a vehicle unless it properly displays the current plate or plates issued to it. For the purposes of this paragraph (j)(2), New York plates shall not be deemed properly displayed unless they are conspicuously displayed, one on the front and one on the rear of the vehicle, each securely fastened so as to prevent the same from swinging and placed, whenever reasonably possible, not higher than 48 inches and not lower than 12 inches from the ground, and they are kept clean and in a condition so as to be readable and shall not be covered by glass or any plastic material, and the view thereof shall not be obstructed by any part of the vehicle or by anything carried thereon. New York dealer or transporter plates issued pursuant to §415 of the Vehicle and Traffic Law shall be deemed properly displayed if the one plate issued is placed on the rear of the vehicle as described above. New York motorcycle plates and plates from other states shall be deemed properly displayed if at least one plate is fastened on the rear of the vehicle.

(3) **Vehicles must display valid registration sticker.** No person shall stand or park a vehicle bearing a New York plate or plates unless it properly displays a current registration sticker.

(4) **Improper stickers prohibited.** No person shall stand or park a vehicle bearing a New York plate or plates

displaying an expired, mutilated, void, imitation, counterfeit or inappropriate New York registration sticker.

(5) **Registration plates, stickers, and tags must match.** No person shall stand or park a vehicle bearing registration plates, stickers, and tags that do not match as to information contained thereon.

(6) **Vehicles must display valid inspection sticker.** No person shall stand or park a vehicle bearing New York plates unless it is properly inspected and properly displays a current inspection sticker or certificate, in accordance with §306(b) of the Vehicle and Traffic Law unless it bears New York dealer or transporter plates pursuant to §415 of the Vehicle and Traffic Law.

(7) **Improper inspection stickers prohibited.** No person shall stand or park a vehicle bearing New York plates displaying any mutilated, imitation or counterfeit of an official certificate of inspection.

(8) **Vehicle covers prohibited.** No person shall stand or park a vehicle having a cover on it that obscures the make, color, vehicle identification number (VIN), license plates and/or registration and inspection stickers, and/or restricts entry to the vehicle, if such vehicle is standing or parked in violation of posted rules.

(9) **Obscuring VIN prohibited.** No person shall stand or park a vehicle that has the vehicle identification number obscured in any manner.

(k) **Special rules for commercial vehicles.** (1) **Parking of unaltered commercial vehicles prohibited.** No person shall stand or park a vehicle with commercial plates in any location unless it has been permanently altered with all seats and rear seat fittings, except the front seats, removed, except that for vehicles designed with a passenger cab and a cargo area separated by a partition, the seating capacity within the cab shall not be considered in determining whether the vehicle is properly altered, and has the name and address of the owner as shown on the registration certificate plainly marked on both sides of the vehicle in letters and numerals not less than three inches in height, in compliance with §10-127 of the Administrative Code and is also in compliance with paragraph (i) of the definition of commercial vehicle as set forth in §4-01 of these rules.

(2) **No standing except trucks loading and unloading.** Where a posted sign reads "No Standing Except Trucks Loading and Unloading," no vehicle except a commercial vehicle or a service vehicle as defined in §4-01(b) of these rules, may stand or park in that area, for the purpose of expeditiously making pickups, deliveries or service calls, and except that in the area from 35th St. to 41st St., Avenue of the Americas to 8th Avenue, inclusive, in the Borough of Manhattan, between the hours of 7 a.m. and 7 p.m., no vehicle except a truck as defined in §4-13(a)(1) of these rules may stand or park for the purpose of expeditiously making pickups, deliveries, or service calls.

(3) **Angle standing or parking of commercial vehicles.** Commercial vehicles standing or parking in authorized areas shall not be placed at an angle to the curb unless such positioning is essential for loading or unloading and then only for such period of time actually required for such purposes provided that a sufficient space shall be left clear for the passage of a vehicle between the angle-parked vehicle and the center of the street, the opposite curb or a vehicle parked or standing thereat, whichever is closest. In no event shall an angle-parked vehicle occupy more than a parking lane, plus one traffic lane.

(4) **Parking of trailers.** (i) No person shall park any trailer or semi-trailer on any street or arterial highway, except while loading or unloading at off-street platforms, unless such trailer or semi-trailer is attached to a motor vehicle capable of towing it.

(ii) Notwithstanding the provisions of paragraph (i) above, where posted signs permit, a trailer or semi-trailer may park while unattached to a motor vehicle capable of towing it on streets in industrial zoned property as defined in the Zoning Resolution. Such trailers or semi-trailers may park for the length of time indicated on the posted signs. An owner of a trailer or semi-trailer parked pursuant to this provision shall protect the streets from damage that may be caused by parking the unattached trailer. All doors located on such trailers or semi-trailers must be locked while the

trailers are parked.

(5) **Street storage of commercial vehicles prohibited.** When parking is not otherwise restricted, no person shall park a commercial vehicle in any area, including a residential area, in excess of three hours.

(6) **Nighttime parking of commercial vehicles prohibited.** No person shall park a commercial vehicle on a residential street, between the hours of 9 p.m. and 5 a.m. Where a commercial vehicle is parked in violation of this paragraph, it shall be an affirmative defense to said violation, with the burden of proof on the person who received the summons, that he or she was actively engaged in business at the time the summons was issued at a premises located within three city blocks of where the summons was issued. This paragraph shall not apply to vehicles owned or operated by gas or oil heat suppliers or gas or oil heat systems maintenance companies, the agents or employees thereof, or any public utility.

(7) **Vehicles equipped with platform lifts.** Commercial vehicles may not be parked on any city street with a platform lift set in a lowered position while the vehicle is unattended.

(l) **Blue zone, midtown, and other special zones.** (1) **Blue zone.** No person shall park a vehicle upon any of the streets within the area designated as the "Blue Zone," Monday through Friday from 7 a.m. to 7 p.m., except as otherwise posted along the perimeter of and inside the designated area, or when necessary to avoid conflict with other traffic or in compliance with law or upon the direction of any law enforcement officer authorized to enforce these rules. Said area is indicated by a blue line painted parallel to the curb and is bounded by the northern property line of Frankfort Street, the northern property line of Dover Street, the eastern property line of South Street, the western property line of State Street, the centerline of Broadway, and the centerline of Park Row.

(2) **Special midtown rule: method of parking.** Except where otherwise restricted, between the hours of 7 a.m. and 7 p.m. daily, except Sundays, from 14th to 60th Streets, 1st to 8th Avenues, all inclusive, in the Borough of Manhattan, no operator of a vehicle or combination of vehicles used for transportation of merchandise shall stop, stand, or park in any of the streets herein designated, other than parallel and close to the curb, and occupy no more than ten feet of roadway space from the nearest curb, and in no case shall any such vehicle be backed in at an angle to the curb.

(3) **Special midtown rule: standing time limit.**

(i) Between the hours of 7 a.m. and 7 p.m., daily except Sundays, from 14th to 60th Streets, 1st to 8th Avenues, all inclusive, in the Borough of Manhattan no operator shall stand a vehicle or combination of vehicles for the purpose of making pickups, deliveries or service calls in any one block of streets herein designated for a period of more than three hours unless otherwise posted. A vehicle or combination of vehicles not being used for expeditious pickups, deliveries or service calls is deemed to constitute a parked vehicle subject to parking rules applicable to that particular location.

(ii) Commercial parking meter area. Notwithstanding the provisions of subparagraph (i) of this paragraph, where signs are posted regulating the use of the curb by commercial vehicles it shall be unlawful to stand a vehicle in any space on a block unless such vehicle is a "commercial vehicle" as defined in §4-01(b)(i) of this chapter or a vehicle with a valid "combination" registration from another state, and unless such space is controlled by a parking meter. The maximum time for such metered parking on a single block shall be a total of three hours, unless otherwise indicated by a posted sign. The provisions of subdivision (h) of this section shall apply to commercial vehicles parked at a parking meter, including a "Muni-Meter," pursuant to this paragraph.

(4) **Parking in garment district restricted to trucks.** Notwithstanding any provisions of these rules to the contrary, no vehicles except trucks and vans bearing commercial plates shall stand at the curb for the purpose of expeditiously loading and unloading between the hours of 7 a.m. and 7 p.m. daily, including Sundays, from 35th Street to 41st Street, between Avenue of the Americas and 8th Avenue, all inclusive, in the Borough of Manhattan. For the purpose of this paragraph (4), passenger vehicles, or station wagons bearing commercial plates shall not be deemed trucks or vans.

(5) **Parking restricted in limited truck zones.** No operator of truck shall stop, stand or park his/her vehicle upon any streets designated as "Limited Truck Zones," except for the purpose of making a delivery, loading or servicing within said zone, and except as otherwise provided in §4-13(d)(3) of these rules.

(m) **Additional parking rules.** (1) **Wrong way parking prohibited.** Except where angle parking is authorized, every vehicle stopped, standing, or parked partly upon a roadway shall be so stopped, standing or parked parallel to the curb or edge of the roadway. On a one-way roadway such vehicle shall be facing in the direction of authorized traffic movement; on a two-way roadway such vehicle shall be facing in the direction of authorized traffic movement on that portion of the roadway on which the vehicle rests.

(2) **Angle standing or parking.** No person shall place a vehicle at an angle to the curb, except when such angle placement is authorized by these rules or by signs or markings. Notwithstanding the above, no vehicle that is too long and/or too wide to be parked within a single designated parking space shall be parked in such a space which is designated for angle parking.

(3) **Angle parking of motorcycles, motor scooters and mopeds.** A person shall be permitted to park a motorcycle, motor scooter or moped at an angle to the curb at times and at places when and where parking is permitted but only in such manner that at least one wheel shall touch the curb. In no event shall any portion of the motorcycle, motor scooter or moped be more than 6 feet from the curb.

(4) **Parking of doctors' and dentists' vehicles.** Where parking is prohibited by signs, but not where stopping or standing is prohibited, a duly licensed physician or dentist may park his/her motor vehicle, identified by "MD," "OP" or "DDS" New York registration plates, on a roadway adjacent to hospitals or clinics for a period not to exceed three hours. For the purposes of this paragraph, only those portions of a roadway corresponding to the shaded areas on the diagrams below shall be considered adjacent to a hospital or clinic. At other locations where parking is prohibited by signs, but not where stopping or standing is prohibited, a duly licensed physician may park his/her motor vehicle, identified by "MD" or "OP" New York registration plates, for a period not to exceed one hour while actually attending to a patient in the immediate vicinity.

(5) **Bus parking on streets prohibited.** No person shall park a bus at any time on any street within the City of New York, unless authorized by signs, except that a charter bus may park where parking is otherwise permitted at its point of origin or destination. No operator of a bus shall make a bus layover, except as otherwise provided in §4-10(c) of these rules. Notwithstanding any local law or rule to the contrary, but subject to the provisions of the Vehicle and Traffic Law, it shall be permissible for a school bus owned, used or hired by a public or nonpublic school to park at any time, including overnight, upon any street or roadway, provided said bus occupies a parking spot in front of and within the building lines of the premises of the public or nonpublic school.

(6) **Time limits.** Where signs are erected specifying time limits on standing or parking, no person shall stand or park any vehicle in excess of the time so prescribed.

(7) **Emergency ambulance service vehicles.** The operator of an ambulance, as defined in section 100-b of the Vehicle and Traffic Law, while awaiting an emergency call, may park at meters, truck loading and unloading zones, and "NO PARKING" areas not specifically designated for other vehicles. (i.e. authorized zones).

(8) **Street storage of boat trailers, mobile homes and mobile medical diagnostic vehicles prohibited.** No person shall park any boat trailer (with or without a boat attached), mobile home or mobile medical diagnostic vehicle in any area, on any street, in excess of 24 hours.

(9) **Street storage of vehicles prohibited.** When parking is not otherwise restricted, no person shall park any vehicle in any area, including a residential area, in excess of seven consecutive days.

(n) **Special restrictions on parking.** (1) **Parking for sales purposes prohibited.** No person regularly engaged in

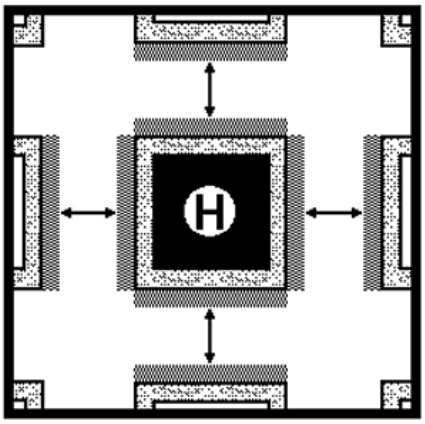
the sale of vehicles shall park a vehicle upon any roadway or off-street parking facility for the principal purpose of displaying such vehicle for sale.

(2) **Parking for certain purposes prohibited.** No person regularly engaged in the repair of vehicles shall park a vehicle upon any roadway or off-street parking facility for the principal purpose of washing, greasing, or repairing such vehicle, except repairs necessitated by an emergency.

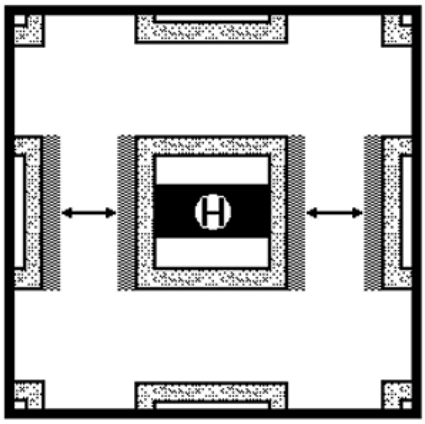
(3) **Parking for the purposes of commercial advertising prohibited.** No person shall stand or park a vehicle on any street or roadway for the purpose of commercial advertising, as defined in §4-12(j)(1) of these rules, except as otherwise provided in that section.

(4) **Peddlers, vendors and hawkers restricted.** No peddler, vendor, hawker, or huckster shall permit his car, wagon, or vehicle to stand on any street when stopping, standing, or parking is prohibited or on any street within 25 feet of any corner of the curb or to stand at any time on any sidewalk or within 500 feet of any public market or within 200 feet of any public or private school.

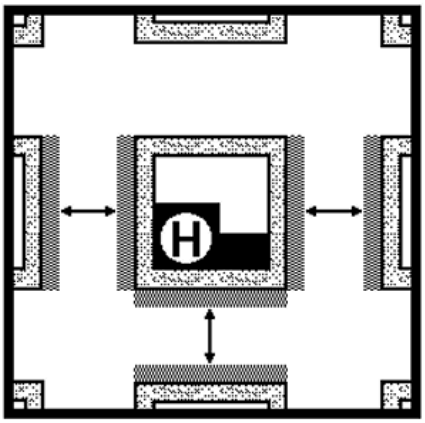
(5) **Unattended motor vehicles.** No person driving or in charge of a motor vehicle shall permit it to stand unattended without first stopping the engine, locking the ignition, removing the key from the vehicle, and effectively setting the brake provided, however, the provision for removing the key from the vehicle shall not require the removal of keys hidden from sight about the vehicle for convenience or emergency.



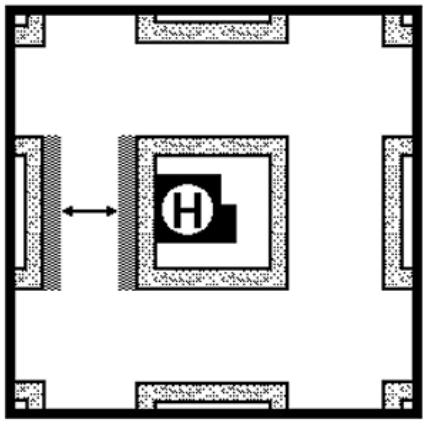
Hospital occupies full square block.



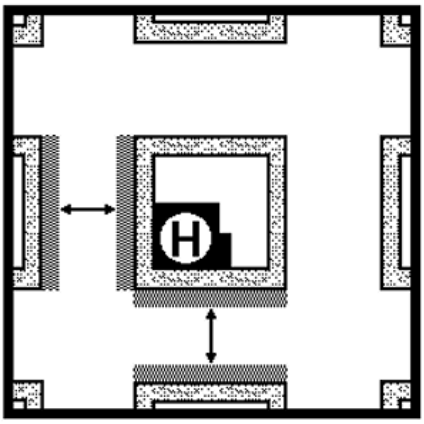
Hospital in mid block.



Hospital occupies part of block.



Hospital in part of mid block



Hospital in corner of block

Shaded areas are considered adjacent.

(6) **Moving parked vehicle.** No person shall move a vehicle not lawfully under his/her control into any position where stopping, standing, or parking would be unlawful.

(7) **Unofficial reserving of parking space.** It shall be unlawful for any person to reserve or attempt to reserve a parking space, or prevent any vehicle from parking on a public street through his/her presence in the roadway, the use of hand-signals, or by placing any box, can, crate, handcart, dolly or any other device, including unauthorized pavement, curb or street markings or signs in the roadway.

(8) **Vehicles must have proper equipment.** No person shall stand or park a motor vehicle, motorcycle or limited use vehicle on any street at any time unless it is equipped with head lamps, rear lamps, reflectors and any other equipment required by any provision of the Vehicle and Traffic Law.

(o) **Permits.** For purposes of this section, a "permit" is the authorization granted by the Department to qualified individuals for special parking privileges as set forth in this subdivision. At the discretion of the Department, a permit may be represented by a permit card inscribed with information that describes the specific parking privileges it authorizes or by an IVPS programmed to contain the same information. Where this rule states that a permit must be displayed in the vehicle, a permittee using a permit card must place it in the appropriate place in a vehicle; a permittee using an IVPS must activate the system before so displaying it, in order to authorize parking pursuant to the permit. The registration numbers of the electronic component, the electronic debit card, and all related windshield stickers comprising an IVPS must match in order for such system to be considered properly activated.

(1) **Permits for people with disabilities.** (i) **Authorized parking areas.** An operator of a vehicle bearing a valid New York City Special Parking Identification permit may park:

(A) in any "No Parking" zone, including those marked "except authorized vehicles,"

(B) in any "No Standing Except Authorized Vehicles" zone,

(C) at parking meters without using an authorized payment method, and

(D) in "No Standing Except Trucks Loading and Unloading" zones.

Such special parking permit shall be displayed so that it is visible through the windshield. An IVPS must be activated to authorize parking.

(ii) **Prohibited parking areas.** Such special parking identification permits do not authorize parking:

(A) in a bus stop,

(B) in a taxi-stand,

(C) within 15 feet of a fire hydrant,

(D) in a fire zone,

(E) in a driveway,

(F) in a crosswalk,

(G) in a no stopping zone,

(H) in a no standing zone, or

(I) double parking.

(iii) **Issuance of permits.** The Special Parking Identification permit shall be issued by the Commissioner or his/her designee to a New York City resident certified by the Department of Health or a provider designated by the Department or the Department of Health, who shall make such certification in accordance with standards and guidelines prescribed by the Department of Health, as having a permanent disability seriously impairing mobility, who requires the use of a private automobile for transportation and to a non-resident similarly certified who requires the use of a private automobile for transportation to a school in which such applicant is enrolled or to a place of employment. A permit shall also be issued to such person upon application made on such person's behalf by a parent, spouse, domestic partner as defined in New York City Administrative Code §1-112(21), guardian, or other individual having legal responsibility for the administration of such person's day to day affairs. The permit may include no more than ten (10) license plate numbers for the vehicle(s) which will be used to transport the permittee. Upon application for a permit, applicant shall submit to the department a copy of the vehicle registration for each license plate which will be registered on the permit. Any vehicle displaying such a permit shall be used exclusively in connection with parking a vehicle in which the person to whom it has been issued is being transported or will be transported within a reasonable period of time.

(iv) **Replacement permits.** In case of a lost or stolen permit, the permittee must, upon request for a replacement, submit to the department a copy of a valid police report. In case of a stolen vehicle which is registered on the permit, permittee must submit to the department a copy of a valid police report. In the event a vehicle registered on the permit is unable to be used as a result of an accident or mechanical defect, a substitution of plates will be permitted only if the permittee has three or fewer plates registered on the permit. The permittee must provide proof to the department of the inability to use the vehicle. If the permittee has four or more plates registered on the permit, no temporary substitution will be allowed.

(v) **Revocation.** Any abuse by any person of any privilege, benefit or consideration granted by such permit, shall be sufficient cause for revocation of said permit.

(2) **Municipal parking permit.** A municipal parking permit licenses the permittee to park one automobile at the permittee's risk in the area designated by signs. Fees charged are for the use of a parking space in the designated facility only. Only a license to park is granted by this permit and no bailment is created. The Department of Transportation assumes no responsibility for loss due to fire, theft, collision or otherwise to the car or its contents.

(i) A municipal parking permit must be displayed when parked in authorized spaces, and in such a manner that the permit is visible through the left side of the windshield. An IVPS must be activated to authorize parking.

(ii) A municipal parking permit is to be displayed only on vehicles bearing license plate numbers on file at the Bureau of Parking. For license plate changes call the Permit Section of the Bureau of Parking, weekdays (10 AM to 4 PM).

(iii) A municipal parking permit is to be displayed only when a vehicle is parked in areas reserved for use of this permit.

(iv) Failure to comply with the above regulations will result in a summons.

(3) **Yearly permits for parking in contradiction to rules on city streets.** Yearly permits are issued on dates determined by the Department of Transportation or any other agency authorized by the Department to non-profit organizations needing to park in contradiction to parking rules when the vehicle is essential to the performance of their organizational functions. These organizations generally are medical, blood, government and human service programs. Such permits shall be displayed so that they are visible through the windshield. An IVPS must be activated to authorize parking.

(i) **Parking permitted.** Parking with yearly permits is permitted in areas specified on or programmed into the permit and may include some or all of the following:

(A) Meters.

(B) Truck loading and unloading zones.

(C) No Standing/Parking Except Authorized Vehicles, when the permit matches the signs, and

(D) "No Parking" areas.

(ii) **Parking not permitted.** Parking with yearly permits is not permitted at:

(A) "No Standing" areas.

(B) "No Stopping" areas.

(C) Fire hydrants.

(D) Bus stops.

(E) Double parking.

(F) Driveways.

(G) Bridges and highways, and

(H) Areas where a traffic hazard would be created.

(iii) **Duration.** Yearly permits are issued for the minimum hours and days essential for the activity. Such permits are issued on an annual basis on dates determined by the Department of Transportation. The Commissioner or his/her designee may, at his/her discretion, issue, extend or revoke these permits.

(4) **Single issue permits for parking in contradiction to rules on city streets.** Single issue permits are issued by the Department of Transportation or any other agency authorized by the Department to for-profit and not-for-profit medical, blood and human service programs; press events; and concerts, film production companies, special events and emergencies. Such permits shall be displayed so that they are visible through the windshield. An IVPS must be activated to authorize parking.

(i) **Information required.** The request for such a single issue permit shall be made in writing to the Department of Transportation and must include:

(A) Date(s) of the event,

(B) Hours,

(C) Location,

(D) Number and size of vehicles, and

(E) License plates or identifying markings of the vehicles.

(ii) **Parking permitted.** Parking with single issue permits is permitted in areas specified on or programmed into the permit and may include some or all of the following:

(A) Meters.

(B) Truck loading and unloading zones.

(C) No Standing/Parking Except Authorized Vehicles, and

(D) "No Parking" areas.

(iii) **Parking not permitted.** Parking with single issue permits is not permitted at:

(A) "No Standing" areas.

(B) "No Stopping" areas.

(C) Fire hydrants.

(D) Bus stops.

(E) Double parking.

(F) Driveways.

(G) On bridges and highways, and

(H) Areas where a traffic hazard would be created.

(iv) **Duration.** Single issue permits are issued for the minimum hours and days essential for the event. The Commissioner or his/her designee may, at his/her discretion, issue, extend or revoke these permits.

(5) **Clergy parking permits.** (i) **Definitions.**

Hospital. A general hospital, nursing home or hospice inpatient facility certified pursuant to the public health law or a psychiatric center established pursuant to §7.17 of the mental hygiene law.

House of worship. A building or space owned or leased by a religious corporation or association of any denomination or used by a religious corporation or association of any denomination pursuant to the written permission of the owner thereof, which is used by members principally as a meeting place for divine worship or other religious observances presided over by a member of the clergy and which is classified in occupancy group F-1(b) pursuant to article eight of subchapter three of chapter one of title twenty-seven of the New York City Administrative Code. Such term shall not include a dwelling unit as defined in the housing maintenance code.

Member of the clergy. A clergyperson or minister as defined in the religious corporations law including, but not limited to, a pastor, rector, priest, rabbi or imam who officiates at or presides over services on behalf of a religious corporation or association of any denomination. Such term shall not include clergy who derive their principal income from any other occupation or profession or who do not officiate at or preside over services on behalf of a religious corporation or association of any denomination.

Passenger car. Notwithstanding any other provision of these rules, for the purposes of this paragraph (5), a passenger car shall mean a motor vehicle designed and used for carrying not more than fifteen people, including the driver. Such term shall not include a vehicle licensed to operate pursuant to chapter five of title 19 of the New York City Administrative Code or a commercial vehicle as defined in §19-170 of the Code.

(ii) **Application requirements.**

(A) The religious corporation or association applying for a permit on behalf of a member of the clergy shall submit an application on a form to be provided by the department and signed by an officer of the corporation or association or

by a person otherwise authorized to act on behalf of the corporation or association. Such application shall be accompanied by a copy of a deed or lease and a certificate of occupancy indicating classification in occupancy group F-1(b) (plus the type of house of worship) for the New York City house of worship used by the religious corporation or association. In the absence of a deed or lease, the religious corporation or association shall submit a sworn written statement of the owner of the house of worship attesting to the fact that said religious corporation or association has the permission of said owner to use the premises as a house of worship. In the event a house of worship was constructed prior to the existence of a certificate of occupancy or occupancy group F-1(b) so that a certificate of occupancy is not available, the religious corporation or association shall submit such other documentation as the department may require.

(B) The religious corporation or association shall, on behalf of a clergy member, submit a copy of title, registration or lease in the clergy member's name for a New York State registered vehicle to be covered by a permit. Such religious association or corporation shall, on behalf of a member of the clergy, also submit a copy of a current automobile insurance identification card for such vehicle.

(C) The religious corporation or association shall certify on a form provided by the Department that only the member of the clergy on whose behalf the application is made will use such permit, that such use will occur only while the member of the clergy is performing official duties at the house of worship at whose services such member of the clergy officiates or presides or while performing such official duties at a hospital, that such member of the clergy derives his/her principal income from officiating at or presiding over services on behalf of said religious corporation or association, that such member of the clergy possesses a valid New York State driver's license and that such member of the clergy otherwise qualifies for the benefits of this permit.

(D) In addition, the religious corporation or association shall submit any other documents deemed necessary by the Department.

(iii) **Parking permitted.** Parking is permitted only in "No Parking" areas designated by posted sign for up to four hours on a roadway adjacent to the house of worship's address as it appears on the permit or for up to three hours on a roadway adjacent to a hospital when the clergy member is performing official duties at such hospital. For the purposes of this paragraph, only those portions of a roadway corresponding to the shaded areas on the diagrams shall be considered adjacent to a house of worship or hospital.

(iv) **Issuance of permit.** Only one permit shall be issued to any religious corporation or association. The front of such permit shall include the license plate numbers of up to three passenger cars, as defined in subparagraph (i), above, that are owned, registered or leased by the members of the clergy for whose benefit the religious corporation or association has applied for such permit. No permit shall be issued with the license plate number of any vehicle that has one or more summonses in judgment according to the records of the New York City Parking Violations Bureau.

(v) **Duration.** Permits issued in accordance with this paragraph (5) shall be valid for one year, unless revoked pursuant to subparagraph (viii).

(vi) **Renewal.** Sixty days prior to the expiration of the permit, the religious corporation or association may apply for a renewal by completing a form provided by the Department.

(vii) **Replacement permits.**

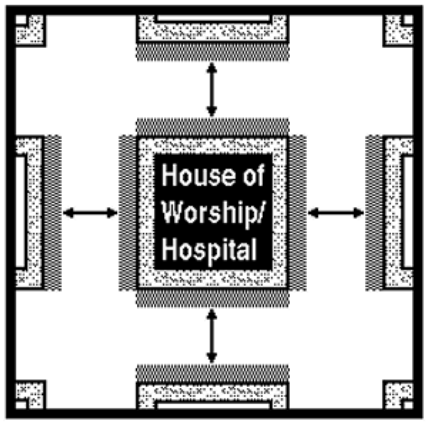
(A) In case of a lost or stolen permit, the religious corporation or association shall, upon request for a replacement, submit to the Department a copy of a valid police report. In the case of a stolen vehicle containing a permit that was also stolen, the religious corporation or association shall submit a copy of a valid police report for the stolen vehicle, which report also lists the permit as stolen.

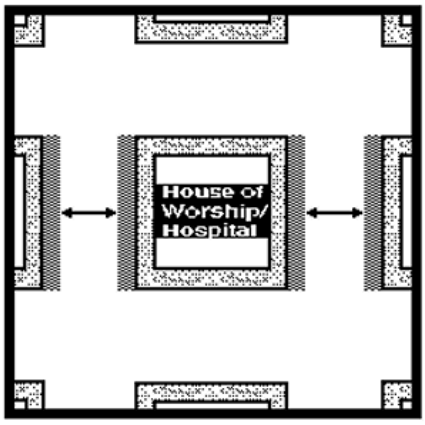
(B) To receive a replacement permit with a changed license plate number or an additional plate number up to a total of three, the religious corporation or association shall supply the documentation required by subparagraphs (B), (C)

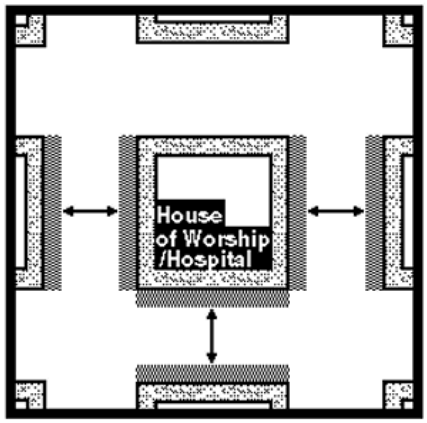
and (D) of paragraph (ii), above, in addition to the police report, if applicable. Changes to the permit may only be made by the Department.

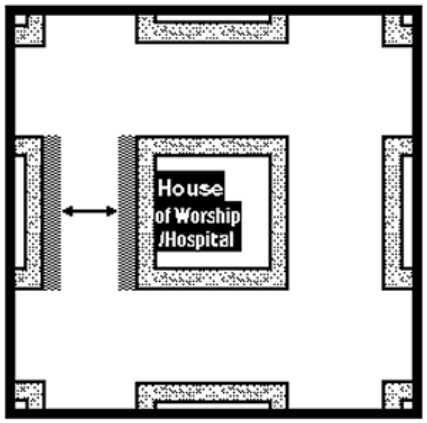
(viii) **Revocation.** A member of the clergy who engages in or allows the improper use or alteration of a permit issued pursuant to this paragraph may be excluded from the benefits of this paragraph. The department shall mail written notice to the religious corporation or association with which such clergy member is associated of the improper use of a permit issued to such corporation or association. The religious corporation or association may submit a response within ten days of the date of mailing of such notice. After ten days from the date of mailing of such notice, the department may send notice to the religious corporation or association of the exclusion of a member from the permit and the corporation or association shall forthwith return the permit to the department. If the permit contains more than one license plate number, the license plate number of the vehicle of the excluded member shall be deleted and the department shall promptly reissue the permit with the remaining license plate numbers. If the permit contains only the license plate number of the excluded member, the religious corporation or association may submit an application for a new permit pursuant to this paragraph. The member of the clergy who engaged in or allowed such improper use shall not be eligible for inclusion in any future application submitted pursuant to this paragraph.

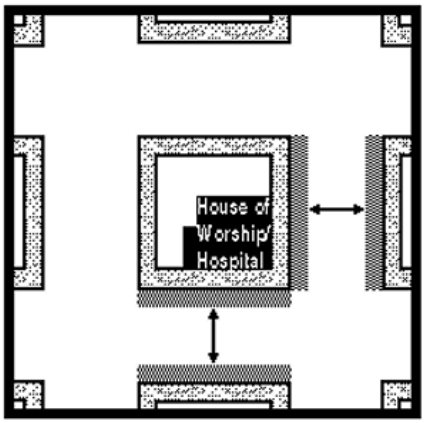
(p) **Engine idling.** (1) **Idling of vehicle engines prohibited.** Except as provided for buses in paragraph (p)(2) hereof, no person shall cause or permit the engine of any vehicle, other than a legally authorized emergency motor vehicle, to idle for longer than three minutes while parking, standing or stopping unless the engine is being used to operate a loading, unloading or processing device.











Shaded areas are considered adjacent.

(2) **Idling of bus engines prohibited.** No person shall cause or permit the engine of any bus to idle at a layover or terminal location, whether or not enclosed, when the ambient temperature is in excess of forty (40) degrees Fahrenheit. When the ambient temperature is forty (40) degrees Fahrenheit or less, no person shall cause or permit any bus to idle for longer than three minutes at any layover or terminal location. For the purpose of this rule, at a layover or terminal location a bus engine shall not be deemed to be idling if the operator is running the engine in order to raise the air pressure so as to release the air brakes, provided however, that this shall not exceed a period of three minutes.

NOTE

1. Statement of Basis and Purpose in City Record Oct. 29, 1999:

The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to §2903(a) of the New York City Charter.

Section 4-08(e)(8) is being amended to clarify that the Department's intent along certain divided highways is to prohibit parking only during certain days and/or hours and allow parking the rest of the time. The rule would still prohibit parking, standing or stopping at all times along the medians of divided highways where there is no sign.

2. Statement of Basis and Purpose in City Record July 14, 2000: The Commissioner of the Department of Transportation is authorized to regulate traffic pursuant to §2903(a) of the New York City Charter. Section 4-08(k) is being amended to clarify the requirements for altering a commercial vehicle for parking purposes.

3. Statement of Basis and Purpose in City Record Sept. 6, 2000: The Commissioner of the Department of Transportation is authorized by §2903 of the New York City Charter and §1642 of the New York State Vehicle and Traffic Law, and in accordance with §1043 of the Charter, to regulate parking, standing, and stopping of vehicles in the City of New York. By creating a Pilot Program for metered commercial parking areas, this amendment will help alleviate a serious problem in Manhattan-the severe traffic congestion caused by commercial vehicles that double park and stand in the area for long periods. By creating a metered parking area specifically designated for such vehicles, with a three-hour time limit on a block (both sides of a single street constitute a "block"), traffic flow should be greatly enhanced. Additionally, enforcement currently is very difficult; creating metered parking areas for these vehicles will provide easily tracked time frames for enforcement personnel. The initiative is being implemented as a Pilot Program for a period of eighteen months in order to test its efficacy and effect on traffic flow and enforcement. This rule also clarifies the procedures to be followed when a driver seeks to park at a space controlled by a broken or missing "Muni-Meter."

4. Statement of Basis and Purpose in City Record July 20, 2001: The Commissioner of the Department of Transportation is authorized by §2903 of the New York City Charter and §1642 of the New York State Vehicle and Traffic Law, and in accordance with §1043 of the Charter, to regulate parking, standing, and stopping of vehicles in the City of New York. An on-going Pilot Program for metered commercial parking areas in a limited area in Manhattan appears to be effective. By expanding the Pilot Program to a larger geographical area, this amendment will further aid the City in studying the effect of metered commercial parking in alleviating traffic congestion.

5. Statement of Basis and Purpose in City Record Oct. 22, 2001: Cars parked illegally in bus stops force buses to stop in lanes carrying moving traffic. This delays traffic and creates the potential for rear-end collisions and accidents involving cars attempting to pull around buses. The gap between the roadway and the first step in the bus is uncomfortable for boarding and alighting passengers to negotiate, and the elderly and disabled can encounter significant difficulties. For wheelchair users, it may be impossible to negotiate the curb to board the bus. For these reasons, it is imperative that vehicle operators clearly receive the message that they must not block bus access to bus stops. One way that MTA New York City Transit personnel with summons issuance authority can reinforce the importance of this requirement is by affixing notices on the driver side backseat windows of violators. The Department of Sanitation has similar authority to use against violators of street cleaning regulations. The notice would not interfere with driving, nor would it damage the vehicle to which it is applied, but it would give highly conspicuous notice to the operators of offending vehicles who are contemptuous of the rights of others that the City takes bus stop violations seriously.

6. Statement of Basis and Purpose in City Record Oct. 22, 2002: These rules set forth amendments to existing New York City Department of Transportation rules to raise the fees charged for illegally parked vehicles which are immobilized, towed, stored, and released, and to add new fees for towing or releasing heavy duty vehicles. The immobilization (booting) fee would increase from $75 to $185. Regular towing fees would be raised from $150 to $185. The storage fee would increase from $15 to $20. The vehicle release fee would increase from $75 to $100. Two new fees would be added, heavy duty towing and heavy duty release, at $370 and $200 respectively. In order to ensure that roadways and traffic lanes are open for efficient traffic flow, and especially to ensure that emergency vehicles such as fire engines, police vehicles and ambulances have swift and unobstructed movement through city streets to sites of emergencies, the City of New York maintains a Violation Tow Program to deter illegal parking and to remove illegally parked vehicles. The fees charged to persons who violate the parking rules were last fixed in 1989 and consequently do not reflect increased personnel and office equipment/space costs. Therefore, at present, the public and not the violator pays the difference between what the fees bring in and what is needed to pay for the program. The fee increases are based on User Service Cost Analyses of the New York City Office of Management and Budget to ensure that the fees charged are commensurate with the administrative costs needed to run the program. The two new fees for heavy duty towing and heavy duty release reflect the additional expense of utilizing heavier towing equipment, requiring more

highly trained and qualified personnel, and the need for more space at the tow pound to store heavy or large vehicles and trucks.

7. Statement of Basis and Purpose in City Record Apr. 10, 2003: The Commissioner of the Department of Transportation is authorized to regulate parking, standing, and stopping of vehicles in the City of New York pursuant to §2903 of the New York City Charter and §1642 of the New York State Vehicle and Traffic Law. Section 4-08(l)(3)(ii) is being amended to extend a program for commercial parking in part of Manhattan. NYC Department of Transportation: I hereby find, pursuant to §1043, subdivision e, paragraph 1(c) of the New York City Charter, that there is a substantial need for implementation of the rule extending the commercial parking meter program upon publication of its Notice of Adoption in the City Record. The implementation of such rule upon publication is necessary because the pilot program expired April 1 and the Department wishes to continue it.

Iris Weinshall Apr. 7, 2003

8. Statement of Basis and Purpose in City Record Nov. 22, 1995: The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to section 2903(a) of the New York City Charter. Section 4-08(a)(7) is being amended to clarify the term "legal holidays" because the fact that there are some listed in subparagraph (i) and others listed in subparagraph (iii)(A) and (C) was causing confusion to the motoring public. Also, subparagraph (iii)(C) is being amended to clarify that the parking meter zones where No Parking rules are suspended are on-street metered zones, not those in municipal parking lots.

9. Statement of Basis and Purpose in City Record Sept. 3, 1996: The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to section 2903(a) of the New York City Charter. Section 4-08(a)(7)(iii) is being amended to clarify what rules are suspended on days when street cleaning rules are suspended. The "No Parking 8 a.m. to 6 p.m." rule exists for traffic mobility purposes only. However, it was causing confusion because some signs only list one day or alternating days that the rule is in effect, thereby putting it into the category of street cleaning rule under subparagraph (iii)(B) and making it unclear whether the rule should be suspended along with other street cleaning rules. This amendment clarifies that the 8-6 rule should not be suspended on days when street cleaning rules are suspended.

10. Statement of Basis and Purpose in City Record Sept. 3, 1996: The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to section 2903(a) of the New York City Charter. Section 4-08(m) is being amended by adding a new paragraph (8) prohibiting the leaving of certain types of vehicles on any street for more than 24 hours. The prohibition on leaving non-commercial vehicles on any street for more than 24 hours was repealed in 1993 for lack of enforcement. Since then, quality of life issues have arisen that may best be addressed by this 24-hour limit. Such issues include boat owners in residential areas attaching their boat trailers to licensed vehicles and storing them indefinitely on the streets and medical diagnostic vehicles being used as extensions of medical offices and remaining on the street for long periods of time.

11. Statement of Basis and Purpose in City Record Oct. 17, 1997: The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to section 2903(a) of the New York City Charter. Section 4-08(a)(7)(iii)(C) is being amended to conform to the suspension schedule for other alternating restrictions. This amendment will suspend rules restricting parking at meters before the time when the meters go into effect on religious as well as legal holidays.

12. Statement of Basis and Purpose in City Record Aug. 14, 1997: The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to section 2903(a) of the New York City Charter. Section 4-08(a)(7)(iii)(D) is being amended to clarify that all alternating restrictions, and not just the "No Parking 8 a.m. to 6 p.m." rule, are also suspended on days when street cleaning rules are suspended. This proposed amendment would cover signs restricting parking for six or more hours (e.g. 10 a.m. to 4 p.m., 8 a.m. to 6 p.m., etc.) This change is needed because motorists are confused over what exactly is suspended on what days.

13. Statement of Basis and Purpose in City Record Feb. 25, 1997: In-vehicle Parking Systems ("IVPSs") are small portable electronic components slightly larger than pocket calculators that are designed to be placed on top of a vehicle's dashboard behind the windshield and which can be used instead of traditional paper permits or instead of depositing coins in parking meters. IVPSs are capable of reading and writing to and from a free or pre-paid electronic debit card, and incorporate an electronic display on which information can be readily seen by enforcement agents. DOT plans to conduct an IVPS pilot demonstration comprised of consecutive phases, each of which will last four months. While the pilot parameters are still under discussion, it appears likely that it will begin with holders of certain official City parking permits. The pilot will then be expanded to include volunteer private automobile drivers who will use the IVPSs instead of coins at existing on-street parking meters around the City, subject to the same time restrictions as other parkers at those locations. If the pilot program is deemed successful, the use of IVPSs will likely be expanded to permanent use for a broader number of permits and for more users of parking meters. The Department of Transportation is introducing the use of IVPSs to provide for a higher level of customer service. IVPSs do not require drivers to carry coins and can result in reduced parking costs by crediting parkers for unused prepaid parking time. IVPSs also will help reduce public confusion regarding parking regulations, because the electronic component of the IVPS will be programmed to reflect the parking regulations for each zone. When the user activates the system and inputs the parking zone, the IVPS automatically knows how much time is allowed at that spot, at that time, on that day, and credits the parker with the maximum allowable parking time. If the parker returns before the time has expired, the unused time is credited back to the IVPS when the electronic debit card is next inserted, so there is a savings to the driver that cannot be achieved with the use of coins inserted into the meter.

14. Statement of Basis and Purpose in City Record Apr. 9, 1996: The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to section 2903(a) of the New York City Charter. Section 4-08(e)(6) is being amended to effect the repeal of recent changes to the rule because further discussion is needed to determine which types of vehicles may be allowed in street excavation areas in order to perform construction-related activities. Section 4-08(f)(1) is being amended to correct an oversight. The reference to section 4-08(m)(1) should have been removed when that section, which related to parking more than twelve inches from the curb, was repealed in 1993.

15. Statement of Basis and Purpose in City Record Nov. 24, 1995: The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to section 2903(a) of the New York City Charter. Section 4-08(e)(6) is being amended to enable the Department to issue summonses to contractors who block off a greater area of a street than they need for the actual work to be performed and store their private vehicles in that extra space. Since such parking does not obstruct a traffic lane because the excavation already prevents traffic from using the lane, these private vehicles are not parked in violation of this paragraph as it is currently written. The public should not be inconvenienced by having to avoid a greater obstruction than necessary so that contractors can park all day in the middle of the street.

16. Statement of Basis and Purpose in City Record Oct. 15, 1996: The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to section 2903(a) of the New York City Charter and section 1642 of the Vehicle and Traffic Law. Section 4-08(f)(2) is being amended to separate pedestrian ramps from driveways because section 237(2)(a) of the State Vehicle and Traffic Law provides for higher fines for violations involving areas for the disabled. A new paragraph (7) is, therefore, being added to make it a separate violation to stand in front of a pedestrian ramp.

17. Statement of Basis and Purpose in City Record Dec. 14, 1995: The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to section 2903(a) of the New York City Charter. Section 408(h)(10) is being added because motorists who purchase parking time may not park in excess of the amount of time indicated on the receipt or tag. Unlike parking at all but one off-street facilities, motorists are required to display payment receipts at municipal on-street parking spaces. Section 408(i)(3) and (i)(4) are being amended in order to eliminate a requirement which is not necessary for the proper enforcement of parking at Municipal lots using the "Muni-Card" system, namely the display of the receipt or tag in the windshield in off-street parking facilities.

18. Statement of Basis and Purpose in City Record June 3, 1996: The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to section 2903 of the New York City Charter. This rule is proposed in order to improve the economic atmosphere in the city for manufacturing and distributions firms. The current rule which prohibits the parking of detached trailers on city streets, causes considerable hardship to many companies as it precludes the most efficient use of time regarding loading of trailers. Allowing detached trailers or semi-trailers to park while unattached to a cab in industrial zoned property will facilitate the expeditious movement of goods and relieve the undue burden placed on many firms by the current rule. Properties designated for industrial use are defined in the zoning resolution. The areas which the rule change will affect are industrial properties which have extremely wide streets and are not located near residential areas.

19. Statement of Basis and Purpose in City Record Dec. 4, 1995: The Commissioner of the Department of Transportation is authorized to regulate the parking, stopping and standing of vehicles pursuant to section 2903 of the New York City Charter. This rule is proposed in order to prevent operators from leaving the platform lift in a lowered position while the vehicle is unattended. Leaving platform lifts in a lowered position is a safety hazard, prevents unlawfully parked vehicles from being towed, and can be used for the purpose of unlawfully reserving parking spaces. The proposed rule will assist in eliminating these undesirable situations.

20. Statement of Basis and Purpose in City Record Jan. 24, 1997: The Commissioner of the Department of Transportation is authorized to regulate the parking, stopping and standing of vehicles pursuant to section 2903 of the New York City Charter. This rule will allow for the standing of all trucks and vans with commercial plates to load and unload in the garment district between the hours of 7 a.m. and 7 p.m. daily.

21. Statement of Basis and Purpose in City Record June 13, 1997: The Commissioner of the Department of Transportation is authorized to adopt rules regarding the parking of vehicles pursuant to section 1642 of the New York State Vehicle and Traffic Law and section 2903 of the New York City Charter. This rule is proposed in order to prohibit motorists from storing vehicles on the streets for extended periods of time in certain neighborhoods throughout the City, where the Department of Sanitation has determined that street cleaning rules, which require the limited parking of vehicles, do not apply.

22. Statement of Basis and Purpose in City Record Dec. 21, 1998: Mayoral Executive Orders spanning the past two administrations have established several rights and procedures relative to domestic partnerships, including a procedure for City residdents to register their domestic partnerships in the office of the City Clerk. Such orders have further provided, among other things, that (i) registered domestic partners are eligible for visitation rights in City hospitals and correction facilities; (ii) City employees with registered domestic partnerships are eligible for child care leave and bereavement leave on the same basis as those benefits are afforded to employees with regard to their spouses; and (iii) registered domestic partnership is evidence of the right to succession to tenancy rights in facilities operated by the New York City housing authority and the department of housing preservation and development. By the end of April, 1998, there were approximately 8,700 couples registered as domestic partners in New York City. More than 55% of those registered domestic partners were heterosexual couples, and less than 45% were same sex couples. Almost forty percent of registered domestic partnerships have accessed City health benefits available to partners of City employees and retirees. On July 7, 1998, the Mayor signed into law Local Law No. 27 of 1998 to incorporate the provisions of these orders into the New York City Charter and the Administrative Code of the City of New York. Consistent with the intent of such orders and subject to applicable federal or state law, Local Law No. 27 of 1998 also extended to domestic partners the various provisions applicable to spouses in the New York City Charter and the Administrative Code of the City of New York. In accordance with Local Law No. 27 of 1998, and pursuant to the authority vested in the Commissioner of Transportation by section 2903(a) of the New York City Charter, and in accordance with Section 1043 of the Charter, the Commissioner of Transportation is now acting to provide that a rule applicable to spouse should now be extended to domestic partners.

23. Statement of Basis and Purpose in City Record Dec. 5, 1995: The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to section 2903(a) of the New York City

Charter. Section 4-08(o)(1) is being amended by adding three new subparagraphs to bring the rule into compliance with amendments to subparagraphs (a) and (c) of paragraph (15) of subdivision (a) of section 2903 of the Charter. These amendments were passed by the City Council in April of 1995 and approved in May. They went into effect in September of 1995.

24. Statement of Basis and Purpose in City Record Apr. 2, 1997: The Commissioner of the Department of Transportation is authorized to regulate the parking of vehicles pursuant to section 2903(a) of the New York City Charter. Section 4-08(o) is being amended to conform to a local law enacted in August of 1996. This local law added a new section 19-162.1 to the New York City Administrative Code allowing clergy to park in certain areas for a prescribed amount of time adjacent to hospitals and houses of worship.

25. Statement of Basis and Purpose in City Record Nov. 18 2003: The commissioner of the Department of Transportation is authorized to regulate parking, standing and stopping of vehicles in the City of New York pursuant to section 2903 of the New York City Charter and Section 1642 of the New York State Vehicle and Traffic Law. The Department of Transportation issues meter inserts which either say "No Standing" or "No Parking". The purpose of these inserts is to prohibit parking when meters are temporarily taken out of service for particular purposes, including, but not limited to, construction, bus stops, taxi stands, authorized mobile health vans and movie shoot vehicles. The inserts are used in order to avoid removing existing posted regulations.

26. Statement of Basis and Purpose in City Record Aug. 15 2003: The Commissioner of the Department of Transportation is authorized to regulate parking, standing, and stopping of vehicles in the City of New York pursuant to section 2903 of the New York City Charter and Section 1642 of the New York State Vehicle and Traffic Law. Section 4-08(l)(3)(ii) is being amended to expand a program for commercial parking to the whole city in order to enhance curb space usage and efficiency, insure appropriate space turnover, improve compliance with the traffic regulations and improve traffic flow.

27. Statement of Basis and Purpose in City Record May 9, 2003: The Commissioner of Transportation is authorized to make rules and regulations for the conduct of vehicular traffic in the City pursuant to section 2903(a) of the New York City Charter. Sections 4-01, 4-08 and 4-11 of Title 34 of the Rules of the City of New York are being amended to conform the rules to an agreement reached between the City and the United States Department of State regarding the standing and parking of diplomatic and consular vehicles issued "A," "C" or "D" series license plates by the Department of State. In addition, the section heading of section 4-11 has been amended to include a reference to "Commuter Vans", which are addressed in that section. This amendment is a technical correction unrelated to the agreement the City and the State Department.

28. Statement of Basis and Purpose in City Record Dec. 5, 2003: The Commissioner of Transportation is authorized to make rules and regulations for the conduct of vehicular traffic in the City pursuant to section 2903(a) of the New York City Charter. Subparagraph (iii) of paragraph (7) of subdivision (a) of section 4-08 is being amended to reflect recent amendments to the Administrative Code passed by the City Council that added three holidays to the list of those on which parking rules are suspected and to reflect the fact that Washington's Birthday is now celebrated on President's Day.

29. Statement of Basis and Purpose in City Record Mar. 3, 2004: Paragraph 7 of subdivision (a) of section 4-08 is being amended to provide that meter rules, even those in effect seven days a week, are suspended on major legal holidays. Paragraph 4 of subdivision (d), subdivision (i) and paragraph 2 of subdivision (m) of section 4-08 are being amended to clarify that a vehicle shall not be angle parked if it is too long or too wide to fit into one space as it would cause an impediment to traffic and deprive other motorists of public parking spaces.

30. Statement of Basis and Purpose in City Record Jan. 11, 2007: The Commissioner of the Department of Transportation is authorized to promulgate rules regarding parking and traffic in the City pursuant to §2903 of the New York City Charter. Paragraph (1) of subdivision (f) of §4-08 is being amended to clarify the meaning of "expeditiously

making pick-ups, deliveries, or service calls" for the purposes of double parking for commercial vehicles. This clarification will primarily benefit the public by providing a time frame for such deliveries, pick-ups, and service calls. It will also benefit administrative law judges interpreting whether a delivery was made in an expeditious manner, and will also benefit the police department in their enforcement of this provision.

31. Statement of Basis and Purpose in City Record Aug. 28, 2008: The Commissioner of the Department of Transportation is authorized to promulgate rules regarding parking and traffic in the City pursuant to §2903 of the New York City Charter. Subdivision (e) of §4-08 is being amended to incorporate recent amendments to the New York State Vehicle & Traffic Law. The Governor of the State of New York recently signed legislation specifying that, in cities with a population of one million or more, blocking an intersection can be adjudicated as a parking violation. The Department is amending the Traffic Rules to implement this change, and to facilitate effective enforcement by the New York City Police Department. Statement of Substantial Need for Earlier Implementation Chapter 241 of the Laws of 2008 added a new subdivision 2-a to §236 of the Vehicle and Traffic Law ("VTL"), which provides that in the City of New York, a violation of §1175 of the Vehicle and Traffic Law is to be considered a parking violation in addition to being a moving violation. VTL §1175 prohibits a driver from driving a vehicle into an intersection when traffic is stopped on the opposite side of the intersection and there is not adequate space on the opposite side of the intersection to accommodate the vehicle ("blocking the box"), unless the driver is making a turn. Pursuant to the New York City Charter, parking, stopping and standing regulations are established by rule of the Department of Transportation. This amendment to the Rules Relating to General No Stopping zones incorporates VTL §1175 into DOT's Traffic Rules and establishes "blocking the box" as a parking violation therein. As traffic congestion continues to be a significant problem in New York City, immediate implementation of this rule amendment is necessary to facilitate the prompt enforcmeent of the new violation by the New York City Police Department. Therefore, pursuant to §1043(e)1(c) of the New York City Charter, the Department of Transportation hereby finds that there is a substantial need for the earlier implementation of the amendment to the Rules Relating to General No Stopping Zones. Consequently, the attached amendment to the Rules Relating to General No Stopping Zones shall be effective upon the final publication of the amendment in the City Record, and the requirement that thirty days first elapse after such publication shall not apply.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Due to a two-vehicle accident, the defendant motorists were stopped, blocking part of an intersection. The injured plaintiff's vehicle was struck by a third vehicle as plaintiff was attempting to get his vehicle around the blocked area. Plaintiff alleged that the defendants' failure to remove their vehicles from the intersection constituted a violation of Section 4-08 and was the proximate cause of the accident. The court, however, held that since, after the defendants' vehicles were immobilized after their collision, and the defendants expeditiously moved their vehicles once the police arrived and a tow truck was made available, the defendants did not stop, stand or park their vehicles in violation of the statute. Thus, the court dismissed the action against these defendants. Siegel v. Boedigheimer, 743 N.Y.S.2d 137 (App.Div. 2d Dept. 2002).

¶ 2. A violation of a statutory prohibition on double parking is some evidence of negligence. Murray-Davis v. Rapid Armored Corp., 300 A.D.2d 96, 752 N.Y.S.2d 37 (1st Dept. 2002). See also Lau v. Doe, 2002 WL 32068294 (App. Term 2d & 11th Judic. Dists.).

¶ 3. In one case, a vehicle operated by the defendant was sideswiped, and swerved across a lane and into a cement median divider. The vehicle came to rest with its left fender impacted against the divider, and its body extending out, blocking two lanes of moving traffic. Several other impacts by other vehicles followed, one of which involved the taxi cab in which plaintiff was a passenger. The court held that, in order for defendant to avoid negligence liability for his failure to remove the vehicle from this dangerous place, defendant had the burden of proving that his vehicle was disabled or that he was unable to move it before the next impact occurred. Eltahan v. Rejouis, 776 N.Y.S.2d 833 (2d Dept. 2004).

¶ 4. 34 RCNY 4-08(e)(5) can furnish a basis for liability if a defendant was negligent in stopping his vehicle in a

crosswalk and such negligence was the proximate cause of plaintiff's injuries. Thomas v. Vezza, 29 A.D.3d 678, 815 N.Y.S.2d 154 (2d Dept. 2006).

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 4-09

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 4 TRAFFIC RULES AND REGULATIONS

§4-09 Equipment.

(a) **Brakes.** No person shall operate or park a motor vehicle unless such vehicle is in compliance with §375(1) of the Vehicle and Traffic Law.

(b) **Lights while driving.** (1) When the display of head lamps is required, no operator shall operate the vehicle with parking lights only. The operator shall use the lower beam of multiple beam head lamps, except that the upper beam may be used where the street is not lighted sufficiently to reveal any person, vehicle or substantial object straight ahead of such vehicle for a distance of at least 350 feet, and provided that there is no vehicle within 500 feet approaching from the direction ahead.

(2) No person shall operate a motor vehicle or motorcycle on any street at any time unless it is equipped with head lamps, rear lamps and reflectors complying with the provisions of §§375(2) and 376 of the Vehicle and Traffic Law.

(c) **Colored lights prohibited.** No operator of a motorcycle or motor vehicle, other than authorized emergency vehicles, shall operate said vehicle when displaying other than white or yellow lights visible from in front of the vehicle. No operator of an authorized emergency vehicle shall operate said vehicle when displaying other than white or yellow lights visible from in front of the vehicle except when actually engaged in emergency service.

(d) **Lights on horse-drawn vehicles and pushcarts.** No person shall drive a horse-drawn vehicle or propel a pushcart in the roadway between sunset and sunrise unless such vehicle or cart displays a white or yellow light visible from 200 feet directly in front and a red light visible from 200 feet directly to the rear.

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 4-10

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 4 TRAFFIC RULES AND REGULATIONS

§4-10 Buses.

(a) **Franchise regulations.**

(1) **Franchise required.** No person shall operate or cause to be operated on any street a bus for the operation of which a franchise, consent, or certificate of convenience and necessity, order, or other authorization of any municipal, state, or federal authority is required, unless such franchise, consent, certificate of convenience and necessity, order or other authorization shall have been obtained. No person shall operate or move or cause to be operated or moved on any street a bus operating pursuant to a certificate of convenience and necessity, order or other written authorization of any state or federal authority for which operation of a franchise or consent of the Department of Transportation of the City of New York is not required, unless there shall be filed with the Commissioner, not later than two weeks after issuance, duly authenticated copies of such certificates, orders, authorizations and amendments thereto.

(2) **Franchise not required.** Every person applying to any governmental authority other than the City of New York for authorization to operate a bus into or through the City of New York, for which operation or a franchise or consent of the Department of Transportation of the City of New York is not required, shall, within ten days after the date of submitting such application to such governmental authority, file a duly authenticated copy thereof with the Commissioner, and attach thereto a statement setting forth the address, by street and number, of any proposed off-street terminal or terminals to be used within the City of New York.

(b) **Designated routes.** No person shall operate or cause to be operated on any street a bus operating pursuant to a franchise or consent of the Department of Transportation of the City of New York which designates the route to be followed, except on the route so designated. No person shall operate or cause to be operated on any street any other bus,

other than a charter bus, except over a route designated by the Commissioner in writing.

(c) **Pickup and discharge of passengers and layovers.** (1) Pickup and discharge of passengers at designated bus stops. Except as provided in paragraph (2) below, no operator of a bus shall pick up or discharge passengers on a street except at a bus stop designated by the Commissioner in writing. Only buses designated by the Commissioner in writing may stop at such locations. A charter bus may stop on the highway at points of origin and destination for the purpose of expeditiously receiving or discharging passengers, except where prohibited by sign or by the Commissioner. While engaging in the picking up or discharging of passengers, buses must be within twelve inches of the curb and parallel thereto, except where a bus stop is physically obstructed.

(2) Pickup and discharge of passengers at locations other than designated bus stops.

(i) (A) At times and along those portions of bus routes designated by the Commissioner, the operator of a bus authorized to operate in the City of New York that provides local or express service along a bus route may discharge a passenger, on such passenger's request, at a curbside location other than a bus stop as described in paragraph (1) above, provided that such location affords the alighting passenger a safe point of departure from the bus and provided that complying with such request will not interfere with the flow of traffic.

(B) Prospective passengers shall be picked up only at a bus stop as provided in paragraph (1) above.

(C) The provisions of this subparagraph (i) shall be clearly posted, in a format approved by the Commissioner, in all buses authorized to discharge passengers between designated stops.

(ii) A charter bus may stop on the highway at points of origin and destination for the purpose of expeditiously receiving or discharging passengers, except where prohibited by sign or by the Commissioner.

(3) **Layovers.** No operator of a bus shall make a bus layover, except in locations designated by sign or by the Commissioner in writing. For the purposes of this rule, layover is defined as follows: for a bus without passengers a layover consists of waiting at a curb or other street location; for a bus with passengers a layover consists of waiting at a curb or other

street location for more than five minutes. The Commissioner may define the terms, including duration and authorized companies, for use of layover areas.

(d) **Approved bus terminals.** No person shall operate or cause to be operated on any street any intrastate or interstate bus unless such intrastate or interstate bus operates from an off-street terminal or terminals duly approved by the proper authorities of the City of New York.

(e) **Routes.** (1) Operators of empty buses and buses with "charter," "special," "contract carriage" or similar non-route specific authority given by the City of New York, the Department of Transportation, the Interstate Commerce Commission, or other legally authorized body, must adhere to the truck routes as described in §4-13 of these rules, or other additional bus routes, except that an operator may operate on a street not designated as a truck route or bus route for the purpose of arriving at his/her destination. This shall be accomplished by leaving a designated truck route or bus route at the intersection that is nearest to his/her destination, proceeding by the most direct route, and then returning to the nearest designated truck route or bus route by the most direct route. If the operator has additional destinations in the same general area and there is no designated truck route or bus route that can be taken to the next destination, the operator may proceed to his/her next destination without returning to a designated truck route or bus route. The operator shall have in his/her possession throughout each trip a route slip, or similar document, showing the points of origin and destination of the trip. Upon the request of a law enforcement officer, or other authorized person, the bus operator shall present for inspection the above stated document or documents.

(2) Notwithstanding the provisions of §4-10 paragraph (e)(1) above, no operator of a bus as described in paragraph

(1) shall operate his/her vehicle upon any of the streets within the area served by the limited local truck route network in Staten Island as described in §4-13(c) of these rules, except for the purpose of arriving at a destination within the area served by the network. This shall be accomplished by using a designated truck route or bus route to the closest limited local truck route to the destination, using this limited local truck route to the intersection that is nearest to the destination. The operator shall then continue via the most direct route to the closest designated limited local truck route and then to the closest designated truck route or bus route. If the operator has additional destinations in the same general area, and there is no designated truck route, limited local truck route, or bus route that can be taken to the next destination, he/she may proceed to his/her next destination without returning to a designated limited local truck route.

(f) **Required inspection of buses.** No person shall operate or cause to be operated on any street any bus required by law, ordinance, resolution, or rule of any municipal, state, or federal authority to display a certificate, disc, sticker, poster, or other insignia evidencing that such bus has been inspected and is mechanically fit, or has been bonded or insured, or that prescribed fees have been paid, unless such a certificate, disc, sticker, poster or other insignia, currently valid, shall be displayed in the lower right hand corner of the interior surface of the windshield of such bus. In the event it is required that any writing be placed on any such certificate, disc, sticker, poster, or other insignia by someone other than a public official, no person shall operate or move or cause to be operated or moved on any street any such bus unless such writing shall have been placed on such certificate, disc, sticker, poster, or other insignia in black ink and in letters or numbers no less than one inch in height and three-fourths of an inch in width.

(g) **Leased and rented buses.** No person shall operate or cause to be operated a bus leased, rented, or borrowed from another person unless there is marked on the side of the bus in letters at least three inches in height the words "chartered by" followed by the name of the person operating such leased, rented, or borrowed bus. Notwithstanding the foregoing, buses leased, rented or borrowed from the City of New York shall not be required to have such markings.

(h) **Limitation on backing buses.** No person shall back any bus from or into any street or across or along any sidewalk.

(i) **Bus parking on streets prohibited.** No person shall park a bus at any time on any street within the City, unless authorized by signs, except that a charter bus may park where parking is otherwise permitted at point of destination.

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 4-11

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 4 TRAFFIC RULES AND REGULATIONS

§4-11 Taxis, Commuter Vans, For-Hire and Certain Diplomatic and Consular Vehicles.

(a) **Standing.** No operator of a taxi, while awaiting employment shall stand his/her vehicle in any street except:

(1) At an authorized taxi stand.

(2) In front of fire hydrants where standing or stopping is not prohibited by signs or rules, provided that the operator remains in the operator's seat ready for immediate operation of the taxi at all times and starts the motor on hearing the approach of fire apparatus, and provided further, that the operator shall immediately remove the taxi from in front of the fire hydrant when instructed to do so by any member of the police, fire, or other municipal department acting in his/her official capacity.

(3) In the area of the Borough of Manhattan, bounded by the north side of 60th Street, the east side of First Avenue, the south side of 14th Street and the west side of Eighth Avenue, on those streets where "No Standing Except Trucks Loading or Unloading" is posted and in effect, the operator of a taxi, while waiting for a passenger, may stand for the period of one traffic signal cycle, provided that no taxi shall stand in any area where parking is restricted to diplomatic or other classes of vehicles and provided further that the operator remains in attendance at the vehicle and shall immediately remove it when instructed to do so by any law enforcement officer.

(b) **Cruising prohibited.** An operator of a vehicle other than a taxi shall not operate his/her vehicle along a street for the purpose of soliciting passengers or searching for passengers.

(c) **Pickup and discharge of passengers by taxis, commuter vans and for-hire vehicles.** Operators of taxis,

commuter vans and for-hire vehicles may, in the course of the lawful operation of such vehicles, temporarily stop their vehicles to expeditiously pick up or discharge passengers at the curb in areas where standing or parking is prohibited. Taxis, commuter vans and for-hire vehicles, while engaged in picking up or discharging passengers must be within 12 inches of the curb and parallel thereto, but may stop or stand to pick up or discharge passengers alongside a vehicle parked at the curb only if there is no unoccupied curb space available within 100 feet of the pickup or discharge location; however, picking up or discharging passengers shall not be made:

(1) Within a pedestrian crosswalk.

(2) Within an intersection, except on the side of a roadway opposite a street which intersects but does not cross such roadway.

(3) Alongside or opposite any street excavation when stopping to pick up or discharge passengers obstructs traffic.

(4) Under such conditions as to obstruct the movement of traffic and in no instance so as to leave fewer than 10 feet available for the free movement of vehicular traffic.

(5) Where stopping is prohibited.

(6) Within a bicycle lane.

(7) Within horse-drawn carriage boarding areas.

(d) **Pickup and discharge of passengers by certain diplomatic and consular vehicles.** A vehicle bearing "A", "C" or "D" series license plates issued by the U.S. Department of State and displaying a valid non-transferable service vehicle decal issued by the City of New York that is affixed to the inside of the operator's side of the windshield shall be treated like a for-hire vehicle while actively engaged in and for the purpose of expeditiously picking up or discharging passengers, in a manner that does not obstruct traffic, provided that the operator of such vehicle bearing such "A" "C" or "D" series license plates and displaying such non-transferable service vehicle decal:

(1) may not pick up or discharge passengers in a for-hire vehicle stop;

(2) remains in attendance at the vehicle; and

(3) shall immediately remove such vehicle when instructed to do so by any law enforcement officer.

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 4-12

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 4 TRAFFIC RULES AND REGULATIONS

§4-12 Miscellaneous.

(a) **Compliance with directions of law enforcement officers.** (1) An operator must at all times comply with any direction given by a law enforcement officer, a bridge and tunnel officer of the Port Authority of New York and New Jersey, or an officer of the Triborough Bridge and Tunnel Authority authorized to enforce these rules, or a school crossing guard by hand, voice, whistle or mechanical device.

(2) A law enforcement officer, school crossing guard or a bridge and tunnel officer may disregard any traffic light signal or rule in order to expedite the movement of traffic or to safeguard pedestrians or property.

(3) Vehicle operators must present and/or surrender their operator's license, vehicle registration and insurance documents upon request of a law enforcement officer.

(b) **Passengers in vehicle.** No person shall ride in any place or in any part of a vehicle except that provided for passenger carrying purposes, nor shall he/she permit any part of his/her body to extend outside of any part of a vehicle, except when required to extend the hand to indicate an intention to turn, slow down, stop, or start from the curb.

(c) **Getting out of vehicle.** No person shall get out of any vehicle from the side facing on the traveled part of the street in such manner as to interfere with the right of the operator of an approaching vehicle or a bicycle.

(d) **Fire drill line.** The operator of any vehicle, except authorized emergency vehicles, shall not drive through or approach within one hundred feet of a line of children during a fire drill, nor interfere with, hinder, obstruct, or impede in any way whatsoever any such fire drill.

(e) **Operator's hand on steering device.** No person shall operate or ride a motor vehicle or bicycle without having his/her hand on the steering device or handle bars. A person riding or leading a horse or driving a horse-drawn carriage shall have the reins in his/her hand continuously.

(f) **Unbridled horse.** No person shall leave a horse unbridled or unattended in a street or unenclosed place unless the horse is securely fastened, or harnessed to a vehicle with wheels so secured as to prevent it from being dragged faster than a walk.

(g) **Peddlers.** No peddler, vendor, hawker, or huckster shall stop or remain or permit any cart, wagon, or vehicle owned or controlled by him/her, to stop, remain upon or otherwise encumber any street in front of any premises if the owner or lessee of the ground floor thereof objects. No peddler, vendor, hawker, or huckster shall permit his cart, wagon, or vehicle to stand on any street when stopping, standing, or parking is prohibited or on any street within 25 feet of any corner of the curb or to stand at any time on any sidewalk or within 500 feet of any public market or within 200 feet of any public or private school.

(h) **Reporting accidents by operators of other than motor vehicles.** The operators of any bicycle or vehicle other than a motor vehicle involved in an accident resulting in death or injury to a person or damage to property must stop and give their names and addresses and information concerning liability insurance coverage to the party sustaining injuries or damage, and in the case of death or injury, he/she must, in addition to the above, without delay report the accident to the nearest police station, unless he/she has supplied the information to a police officer on the scene. Accidents involving motor vehicles must be reported as required by the Vehicle and Traffic Law.

(i) **Horn for danger only.** No person shall sound the horn of a vehicle except when necessary to warn a person or animal of danger.

(j) **Commercial advertising vehicles.** (1) **Restrictions.** No person shall operate, stand, or park a vehicle on any street or roadway for the purpose of commercial advertising. Advertising notices relating to the business for which a vehicle is used may be put upon a motor vehicle when such vehicle is in use for normal delivery or business purposes, and not merely or mainly for the purpose of commercial advertising, provided that no portion of any such notice shall be reflectorized, illuminated, or animated, and provided that no such notice shall be put upon the top of the vehicle and that no special body or other object shall be put upon vehicles for commercial advertising purposes. Advertisements may be put upon vehicles licensed by the New York City Taxi and Limousine Commission in accordance with the Commission's rules.

(2) **Buses and Sanitation Vehicles.** Notwithstanding the foregoing provisions of this subdivision (j), buses operated pursuant to a franchise or consent from the Department of Transportation of the City of New York, and cleaning and collection vehicles owned or operated by the New York City Department of Sanitation may display commercial advertisements, including reflectorized and illuminated advertisements, on the exterior surface areas of such vehicles and may have installed on such vehicles the necessary frames, supports and related appurtenances in order to display such advertisements.

(k) **Snow Emergency.** (1) **Standing and Parking Prohibited.** When the Commissioner declares a state of snow emergency, no person shall stand or park a vehicle upon a street designated by signs as a snow street, or upon any part of the right of way, including the berm or shoulder adjacent to the roadways, entrances and exits of the expressways, parkways, bridges and tunnels set forth in §4-07 subdivision (i) of these rules, except in such areas and for such purposes as shall be designated by the Commissioner, until the Commissioner declares the prohibition of such standing or parking terminated. On certain designated snow streets, posted signs may prohibit parking on only one side of the street.

(2) **Operating vehicles prohibited.** When the Commissioner declares a state of snow emergency, no person shall operate a vehicle upon a street designated by signs as a snow street or upon any part of the right of way, including the

berm or shoulder adjacent to the roadways, entrances, and exits of the expressways, parkways, bridges and tunnels set forth in §4-07 subdivision (i) of these rules unless the drive, traction or powered wheels of said vehicle are equipped with skid chains or snow tires, until the Commissioner declares the state of snow emergency terminated.

(3) **Snow tires defined.** For the purposes of this rule, snow tires are defined as:

(i) Any radial tire (a radial tire is a tire in which the ply cords, extending to the beads, are nearly at right angles to the center line of the tread).

(ii) Any tire with tread which has ribs, lugs, blocks or buttons arranged in a generally discontinuous pattern; when inflated, a substantial number of the lug, block or rib edges in the tread design are at an angle greater than 30 degrees to the tire circumferential center line; and, on at least one side of the tread design, have shoulder lugs that protrude at least one-half inch in a direction generally perpendicular to the direction of travel.

(iii) Any tire labelled on the sidewall with the words "MUD AND SNOW" or any contraction using the letters "M" and "S" (e.g. MS, M/S, M-S or M&S).

(4) **Worn or damaged tires.** Worn or damaged tires which no longer provide effective traction shall not constitute snow tires within the meaning of this section regardless of their original classification or designation.

(5) **Use of parkways by certain vehicles.** Notwithstanding any other provision of these rules, during snow emergencies declared by the Commissioner, commercial vehicles owned or operated by oil heating companies that are no more than 7 feet in height, no more than 8,500 pounds in maximum gross weight, and have no more than two axles and four tires may travel on parkways and other roadways where commercial vehicles are normally prohibited when such vehicles are responding to heat emergencies which require the repair of heating and hot water equipment. Such vehicles must abide by all posted weight limits and clearances on such roadways.

(l) **Emergency repairs.** No person shall solicit or render repair service or push or tow any vehicle on any part of the right of way, including the berm or shoulder adjacent to the roadways, entrances and exits of the expressways and parkways, and bridges enumerated in §4-07 subdivision (i) of these rules, except persons and vehicles operating pursuant to a permit issued by the Commissioner. This subdivision (l) shall not be deemed to prohibit emergency repairs by the occupants of a disabled vehicle.

(m) **Bus lane restrictions on city streets.** When signs are erected giving notice of bus lane restrictions, no person shall drive a vehicle other than a bus within a designated bus lane during the hours specified, except that a person may use such bus lane in order to make the first available right hand turn where permitted into a street, private road, private drive, or an entrance to private property in a safe manner or when necessary to avoid conflict with other traffic or at the direction of a law enforcement officer. Notwithstanding any provision of this subdivision, no person shall drive a vehicle other than a bus in the bus lane on Madison Avenue for the purpose of making a right hand turn during the restricted hours specified by sign between 42nd street and 59th street. During such restricted hours, the first permissible right hand turn for vehicles other than buses is at 60th street, except that a taxicab carrying a passenger may use the bus lane to make a right hand turn at 46th street.

(n) **Work affecting traffic.** The rules contained in the New York State Manual on Uniform Traffic Control Devices shall be complied with by public and private organizations when temporary disruption of street traffic is required for street repaving or repairs, subsurface utility line installations or other repairs and similar projects.

(o) **Use of roadways.** (1) **Pedestrians, horses, bicycles and limited use vehicles prohibited.** In order to provide for the maximum safe use of the expressways, drives, highways, interstate routes, bridges and thruways set forth in §4-07 subdivision (i) of these rules and to preserve life and limb thereon, the use of such highways by pedestrians, riders of horses and operators of limited use vehicles and bicycles is prohibited, unless signs permit such use.

(2) **Flat tires.** No operator shall stop on the improved or paved roadway of any of the arteries set forth in §4-07 subdivision (i) of these rules, for the purpose of removing or replacing a flat tire. No person shall remove or

replace a flat tire unless the vehicle is completely off the improved or paved roadway so that no part of the vehicle or person is exposed to passing vehicles.

(p) **Bicycles.** (1) **Bicycle riders to use bicycle lanes.** Whenever a usable path or lane for bicycles has been provided, bicycle riders shall use such path or lane only except under any of the following situations:

(i) When preparing for a turn at an intersection or into a private road or driveway.

(ii) When reasonably necessary to avoid conditions (including but not limited to, fixed or moving objects, motor vehicles, bicycles, pedestrians, pushcarts, animals, surface hazards) that make it unsafe to continue within such bicycle path or lane.

(2) **Driving on or across bicycle lanes prohibited.** No person shall drive a vehicle on or across a designated bicycle lane, except when it is reasonable and necessary:

(i) to enter or leave a driveway; or

(ii) to enter or leave a legal curbside parking space; or

(iii) to cross an intersection; or

(iv) to make a turn within an intersection; or

(v) to comply with the direction of any law enforcement officer or other person authorized to enforce this rule; or

(vi) to avoid an obstacle which leaves fewer than ten feet available for the free movement of vehicular traffic.

Notwithstanding any other rule, no person shall drive a vehicle on or across a designated bicycle lane in such manner as to interfere with the safety and passage of persons operating bicycles thereon.

(3) **Bicycles permitted on both sides of 4O-foot wide one-way roadways.** Any person operating a bicycle upon a roadway that carries traffic in one direction only and is at least 40 feet wide may ride as near as is practicable to either the left or the right hand curb or edge of such roadway, provided that bicycles are not prohibited from using said roadway.

(4) **Bicycle safety poster.**

(i) Every person, firm, partnership, joint venture, association or corporation which engages in the course of its business, either on behalf of itself or others, in delivering packages, parcels, papers or articles of any type by bicycle shall post one or more bicycle safety posters at each employment site.

(ii) The bicycle safety poster shall be in English, Spanish and any other language spoken predominately by any bicycle operator utilized by the business. It shall be clear and conspicuous to the bicycle operators and patrons of the business.

(iii) The poster shall be at least eleven (11) inches by seventeen (17) inches in size. It shall be printed with dark colored ink on durable material with a light colored background. The titles on the poster shall be a minimum of 0.3 inches or twenty-one (21) point font and must be accommodated on only one line. The headings on the poster shall be a minimum of 0.25 or eighteen (18) point font and must be accommodated on only one line. The lettering on the rest of the poster shall be a minimum of 0.22 inches in height or sixteen (16) point font.

(iv) A model of the poster shall be made available on the Department of Transportation's website.

(v) The poster shall include the following:

(A) Responsibilities of Commercial Bicycle Operators:

Obey Traffic Signs and Signals.

· Bicyclists are subject to all applicable New York state and local laws, rules and regulations, including NYC Traffic Rules.

Wear a Helmet.

· While working, commercial bicyclists must wear a properly fitted bicycle helmet.

Never Ride Against Traffic.

· Bicyclists cannot ride against the flow of traffic. Ride with traffic to avoid accidents.

· If available, bicyclists must use bicycle lanes.

Stay Off Sidewalks and Limited Access Roadways.

· Bicycles are not permitted on sidewalks unless bicycle wheels are less than 26 inches in diameter and the rider is 12 years or younger, or if signs allow.

· Bicycles are also prohibited on expressways, drives, highways, interstate routes, bridges and thruways, unless authorized by signs.

Be Safe.

· Yield to pedestrians.

· Bicyclists must have at least one hand on the steering device or handlebars at all times.

· Bicyclists cannot wear more than one earphone attached to a radio, tape player or other audio device while riding.

· No attaching of a bicycle to another vehicle being operated on the roadway.

· Any bicyclist involved in an accident resulting in a death or injury to a person or damage to property must stop and give their name, address, insurance information, etc., and must report the accident to the police department.

Be Visible.

· It is advisable to ensure visibility at night by wearing light-toned clothing with reflective tape material.

· From dusk to dawn, bicyclist must use a white headlight and red taillight.

Be Prepared.

· Bicycle operators must wear upper body apparel with the business' name and the operator's identification number.

· Bicycle operators must also carry and produce, on demand, a numbered business ID card with the operator's photo, name, home address and business' name, address and phone number. It is recommended that the operator also carry a second form of photo identification.

(B) Responsibilities of Business Owners Who Employ Bicycle Operators:

Businesses must provide their bicycle operators with the following:

· A bicycle helmet in good condition, which properly fits the operator;

· Upper body apparel with the business' name and operator's identification number;

· Numbered business ID card with the operator's photo, name, home address and the business' name, address and phone number;

· A white headlight and red taillight;

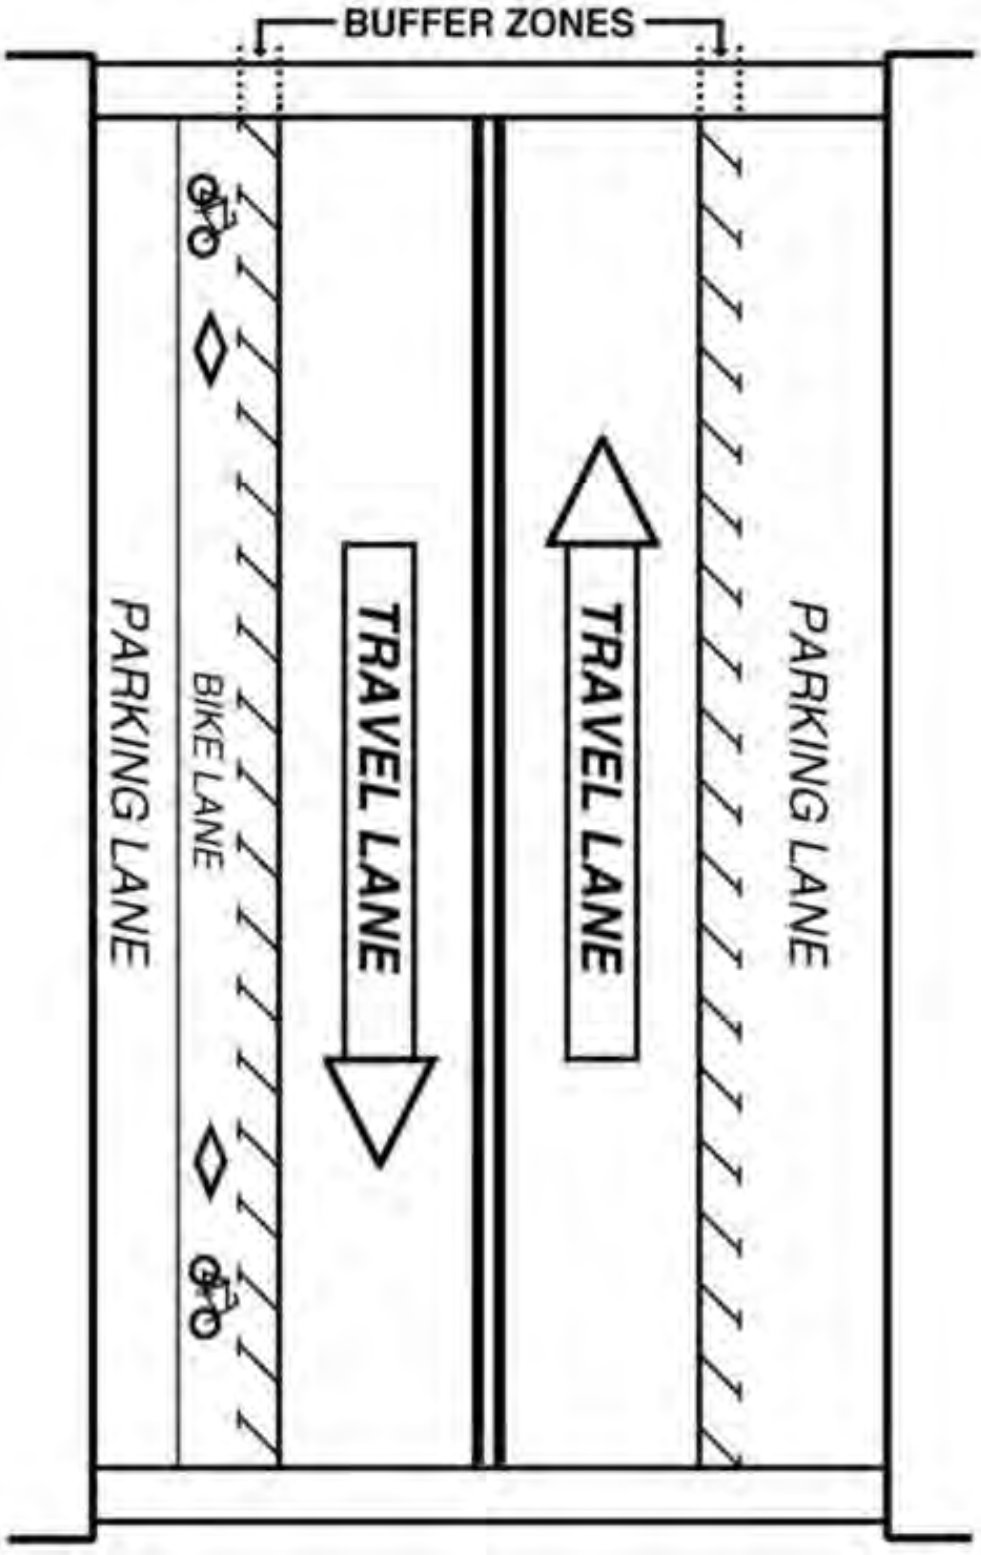
· A bell or other audible signal (not whistle);

· Working brakes;

· Reflective tires and/or other reflective devices on new bicycles.

Businesses must maintain a log book, which must be available for inspection during regular and usual business hours.

Some of the responsibilities listed above are imposed by law and failure to comply with them may subject violators to legal sanctions.



BUFFER ZONES
PARKING LANE
TRAVEL LANE
TRAVEL LANE
BIKE LANE
PARKING LANE

(q) **Transportation of radioactive materials.** Shipments of radioactive materials meeting or exceeding the specifications of "large quantities" and/or "fissile Class III" as specified by the Interstate Commerce Commission and the Nuclear Regulatory Commission, shall follow the same truck routes designated for vehicles having an overall length of 33 feet or more, in §4-13 of these rules. All such shipments are required to be so classified under the NRC license or contract before being shipped and the carrier shall obtain the proper classification. All vehicles carrying such shipments shall adhere to the rules of the fire department, the Department of Environmental Protection and §175.111 of the New York City Health Code.

(r) **Restricted use and limited use streets.**

(1) **Restrictions.** No operator of a vehicle or combination of vehicles shall operate, enter, stop, stand or park any such vehicle on any street designated as a restricted use street or a limited use street by the Department of Transportation, unless such vehicle or combination of vehicles

(i) is being used for the purpose of loading or unloading at premises legally utilizing an entrance, loading bay or elevator that fronts upon said street during authorized hours or,

(ii) is a bus traversing a route, franchised by the Department of Transportation, which includes said street, and the vehicle stands only at a designated bus stop or,

(iii) is a maintenance or utility vehicle operated or engaged by proper authority for the purpose of construction or maintenance of said street or any utility located on, above or below the street surface or for the construction or maintenance of any structure located on said street.

(2) **Driving across permitted.** Notwithstanding any other provision stated herein, the operator of any vehicle may drive across any restricted use or limited use street that intersects the street along which he is travelling.

(3) **Commissioner may suspend.** The commissioner, upon 24 hours' notice to the public, may suspend the application of this subdivision (r) for a specified period or indefinitely. If suspended for a specific period, the provisions of this subdivision (r) shall become effective at the termination of such period. If suspended indefinitely, the provisions of this subdivision (r) shall become effective upon order of the Commissioner and 48 hours notice to the public.

(4) **Definitions.** For the purpose of this subdivision (r), a restricted use street is a legally mapped street to be permanently closed to motor vehicles by the Department of Transportation, except as provided herein, and open to use by pedestrians. A limited use street is a legally mapped street to be temporarily closed to motor vehicles by the Department of Transportation, except as provided herein, and in accordance with lawfully authorized signs or other traffic control devices.

(s) **Crossing buffer zones.** (1) For the purposes of this subdivision, a buffer zone is defined as an area in the roadway, created by white lines, that is used to separate a parking lane from a travel lane or a bicycle lane from a travel lane, as indicated on the diagram below.

(2) No person shall drive a motor vehicle on or across a designated buffer zone, except when it is reasonable and necessary to enter or leave a legal curbside parking space or a driveway.

NOTE

1. Statement of Basis and Purpose in City Record July 30, 2007:

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding parking and traffic in the City pursuant to §2903 of the New York City Charter.

Subdivision (p) of §4-12 is being amended to add the requirements set forth in §10-157.1 of the Administrative Code of the City of New York, added by Local Law No. 10 of 2007. This new section of the Administrative Code requires the Department to effectuate the rules and regulations governing the content, size and manner of display of a poster setting forth bicycle safety procedures. The poster must be placed at commercial business locations where the business is engaged in delivering packages, parcels, papers or articles of any type by bicycle.

An English language model of the poster required by this proposed rule will be made available and model posters in other languages, including but not limited to, Spanish, Chinese, Korean and Russian, may be made available on the Department's website.

CASE AND ADMINISTRATIVE NOTES

¶ 1. An off duty police officer who obstructed traffic on the Brooklyn Bridge while engaged in a demonstration was found guilty of conduct unbecoming a police officer. Loeffel v. Kelly, 214 A.D.2d 431, 625 N.Y.S.2d 39 (1st Dept. 1995).

¶ 2. A company which allegedly operated vehicles used solely for the purpose of displaying commercial advertising, challenged the regulation as being an unconstitutional restriction upon commercial speech. The court, however, upheld the regulation, citing the city's substantial interest in controlling the flow of traffic. People v. Target Advertising, Inc., N.Y.L.J., May 26, 2000, page 28, col. 1 (Crim.Ct. New York Co.).

¶ 3. The statute prohibits vehicles which contain advertisements for businesses other than the business of the owner of the vehicle. One defendant, who was charged with a violation, claimed that the statute violated the First Amendment of the U.S. Constitution, and was void by reason of vagueness in violation of the Due Process clause of the Constitution. First, defendant argued that the statute was unconstitutional on its face, since it did not differentiate between ordinary commercial advertising (such as the type present on the defendant's vehicle) and advertisements covering political campaigns and non-profit public service groups. The court, however, held that since the rule by its own terms was not applicable to non-commercial speech, it was not unconstitutional on its face. The defendant next argued that the rule impermissibly differentiated between people based on the content of the message, but the court rejected this argument. The sovereign can lawfully regulate the time, place and manner of commercial speech (not its content) to effectuate a significant governmental interest. That interest, in this case, was to regulate traffic, and there was no intent to suppress a particular message. In other words, the statute was content neutral, in the sense that no one was permitted to advertise someone else's product but everyone was permitted to advertise one's own product. The court also rejected the "void for vagueness" argument, stating that "commercial speech" has been well defined in prior cases, so that defendant should be able to ascertain the types of advertisements which are permitted or prohibited (for example, defendant can lawfully

carry advertisements for political candidates or groups such as Unicef or Red Cross). People v. Professional Truck Leasing Systems, Inc., N.Y.L.J., Sept. 1, 2000 page 27, col. 5 (Crim.Ct. New York Co.); aff'd 190 Misc.2d 806, 737 N.Y.S.2d 767 (App.Term 1st Dept. 2002). Another court reached a similar result in People v. Target Advertising, 184 Misc.2d 903, 708 N.Y.S.2d 597 (Crim.Ct. New York Co. 2000); in that case, the court held that the rule directly advanced the City's interest in controlling traffic, since the ban on the use of advertising-only vehicles lessened the amount of potential traffic on City streets.

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 4-13

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 4 TRAFFIC RULES AND REGULATIONS

§4-13 Truck Routes.

(a) **General provisions.** (1) **Definitions.** For the purpose of these rules, a truck is defined as any vehicle or combination of vehicles designed for the transportation of property, which has either of the following characteristics: two axles, six tires; or three or more axles

(2) **Exceptions.** These rules do not apply to authorized emergency vehicles and authorized public utility company vehicles engaged in an emergency operation as defined in §114-b of the Vehicle and Traffic Law.

(3) **Enforcement.** An operator of any truck as defined above shall have in his/her possession throughout each trip a bill of lading, or similar document, showing the points of origin and destination of the trip. Upon the request of a law enforcement officer or other authorized person, the truck operator shall present for inspection the above stated document or documents.

(b) **Truck routing rules for the Borough of Queens.** (1) **Through trucks.** An operator of any truck as defined above, having neither an origin nor a destination within the Borough of Queens shall restrict the operation of such vehicle to those street segments on the following list. These are designated as "Through Truck Routes." All trucks must adhere to all posted signs indicating locations that limit the height of vehicles permitted to operate thereon.

213th Street	Hempstead Avenue to Jamaica Avenue

(2) **Local trucks.** An operator of any truck as defined in paragraph (a)(1) above, with an origin or destination for the purpose of delivery, loading or servicing within the Borough of Queens, shall only operate such vehicle over the following listed streets, except that an operator may operate on a street not designated below for the purpose of arriving at his/her destination. This shall be accomplished by leaving a designated truck route at the intersection that is nearest and provides the most direct route to his/her destination, proceeding by the most direct route while observing existing street directions and turn restrictions, and then returning to the nearest designated truck route by the most direct route. If the operator has additional destinations in the immediate vicinity, he/she may proceed by the most direct route to his/her next destination without returning to a designated truck route, provided that the operator's next destination does not require that he/she cross a designated truck route. All trucks must adhere to all posted signs indicating locations that limit the height of vehicles permitted to operate thereon.

(3) **Limited truck zones.** (i) **Restrictions.** Notwithstanding the provisions of paragraphs (a), (d)(1) and (d)(2) of this section, no operator of a truck as defined in paragraph (a)(1) of this section shall operate, enter, stop, stand or park his/her vehicle upon any of the streets designated on the following list as "Limited Truck Zones" except for the purpose of making a delivery, loading or servicing within said zone. This shall be accomplished by leaving a designated truck route at the intersection that is nearest and provides the most direct route to his/her destination, proceeding by the most direct route while observing existing street directions and turn restrictions, and then returning to the nearest designated truck route by the most direct route. If the operator has additional destinations in the immediate vicinity, he/she may proceed by the most direct route to his/her next destination without returning to a designated truck route provided that the operator's next destination does not require that he/she cross a designated truck route.

(ii) **Time period.** 24 hours per day, 7 days per week.

(iii) **Zones**

Zone A-**Chelsea** Bounded by the northern property line of 16th Street, the eastern property line of Ninth Avenue, the northern property line of 18th Street, the eastern property line of Tenth Avenue, the southern property line of 30th Street, the western property line of Eighth Avenue, the southern property line of 25th Street, the western property line of Seventh Avenue, the northern property line of 19th Street and the western property line of Eighth Avenue. Trucks passing completely through the designated area, or entering it for the purpose of reaching or leaving a street within these boundaries, are permitted to traverse 23rd Street, Eighth Avenue and Ninth Avenue only.

Zone B-**Chinatown** Bounded by the northern property line of Worth Street, the eastern property line of Baxter Street, the southern property line of Canal Street, the western property line of the Bowery, and the western property line of Chatham Square.

Zone C-**Greenwich Village** Bounded by the northern property line of Spring Street, the eastern property line of Varick Street, the eastern property line of Seventh Avenue South, the northern property line of Clarkson Street, the eastern property line of Hudson Street, the northern property line of Morton Street, the eastern property line of Washington Street, the southern property line of Gansevoort Street, the southern property line of 14th Street, the western property line of Avenue of the Americas, the southern property line of 12th Street, the western property line of University Place, the southern property line of 8th Street, the western property line of Mercer Street, the northern property line of Houston Street, and the western property line of West Broadway. Trucks passing completely through the designated area, or entering it for the purpose of reaching or leaving a street within these boundaries, are permitted to traverse Avenue of the Americas, Eighth Avenue, Eighth Street, Greenwich Avenue, Hudson Street (Northbound only), Seventh Avenue South, Varick Street and Houston Street only. Trucks with neither an origin nor a destination within Manhattan are restricted to Houston Street and Avenue of the Americas between Spring and Houston Streets only.

Zone D-**Little Italy** Bounded by the northern property line of Canal Street, the eastern property line of Centre Street, the eastern property line of Cleveland Place, the eastern property line of Lafayette Street, the southern property line of Houston Street and the western property line of Bowery. Trucks passing completely through the designated area, or entering it for the purpose of reaching or leaving a street within these boundaries, are permitted to traverse Grand Street, Kenmare Street and Canal Street only. Trucks with neither an origin nor a destination within Manhattan are restricted to Canal Street only.

Zone E-**Lower East Side** Bounded by the northern property line of Senator Robert F. Wagner Place, the eastern property line of St. James Place, the eastern property line of East Broadway, the southern property line of Montgomery Street, and the western property line of South Street. Trucks passing completely through the designated area, or entering it for the purpose of reaching or leaving a street within these boundaries, are permitted to traverse Pike Slip and Pike Street only.

(4) **Special garment center rule.**

(i) **Restrictions.** Notwithstanding the provisions of paragraphs (a), (d)(1) and (d)(2) of this section, no operator of a truck as defined in paragraph (a)(1) of this section shall operate, enter, stop, stand or park his/her vehicle upon any of the streets included within the boundaries designated below except for the purpose of making a delivery, loading or servicing on said streets. An operator shall not enter a street within the designated boundaries for the sole purpose of gaining access to a designated truck route, or to an adjacent street within said boundaries.

(ii) **Time period.** 9:00 A.M. to 5:00 P.M., Monday through Friday.

(iii) **Boundaries.** Bounded by the northern property line of 34th Street, the eastern property line of Eighth Avenue, the southern property line of 42nd Street and the western property line of Avenue of the Americas. Trucks passing completely through the designated area, or entering it for the purpose of reaching or leaving a street within these boundaries, are permitted to traverse Seventh Avenue and Broadway only.

(5) **Operation of vehicles 33 feet or more in length restricted.** Notwithstanding the provisions of §§4-08(1)(2) and (3) and 4-13 of these rules, no operator of a vehicle or combination of vehicles used for the transportation of merchandise, having an overall length of 33 feet or more including load and bumpers, shall operate, enter, traverse, stop, stand, or park any such vehicle or combination of vehicles upon any of the streets included in the area bounded by the south property line of West 42nd Street, the west property line of 5th Avenue, the north property line of West 34th Street, and the east property line of 9th Avenue, all in the Borough of Manhattan, between the hours of 8 a.m. and 10 a.m., and between 12 noon and 6 p.m., Monday through Friday inclusive, except that the operator of any such vehicle or combination of vehicles who has lawfully entered this area may allow such vehicle or combination of vehicles to remain therein while being expeditiously loaded or unloaded, but must remove same therefrom before 12 noon, and provided that any vehicle or combination of vehicles 33 feet or more in length may enter such area in order to reach an off-street parking facility or terminal therein where such parking facility or terminal is sufficient in size to accommodate the vehicle or combination of vehicles, and where no waiting, loading, or unloading on the street by such vehicle or combination of vehicles will take place. Such vehicle or combination of vehicles may not stop between an entry point into the area and its destination for any purpose other than to conform with traffic rules.

(6) **Special rules for vehicles 33 feet or more in length in the financial district and midtown core.** (i) **Financial district.**

(A) **Time period.** 11:00 A.M. to 2:00 P.M., Monday through Friday.

(B) **Restrictions.** Notwithstanding the provisions of subdivisions (a), (d)(1) and (d)(2) of this section, no operator of a vehicle having an overall length of 33 feet or more shall enter his/her vehicle upon any of the streets included within the boundaries designated below.

(C) **Exceptions.** Trucks having an overall length of 33 feet or more whose operator has in his/her possession a special permit issued by the Department of Transportation.

(D) **Boundaries.** Bounded by the eastern property line of Whitehall Street, the eastern property line of Broadway, the eastern property line of Park Row, the southern property line of Frankfort Street, the western property line of Pearl Street, and the western property line of Water Street.

(ii) **Midtown core.** (A) **Time period.** 12:00 Noon to 6:00 P.M. Monday through Friday.

(B) **Restrictions.** Notwithstanding the provisions of paragraphs (a) and (d)(1), through (d)(4) of this section, no operator of a vehicle having an overall length of 33 feet or more shall enter his/her vehicle upon any of the streets included within the boundaries designated below.

(C) **Exceptions.** Vehicles having an overall length of 33 feet or more whose operator has in his/her possession a special permit issued by the Department of Transportation.

(D) **Boundaries.** Bounded by the northern property line of 42nd Street, the eastern property line of Seventh Avenue, the southern property line of Central Park South, the southern property line of 59th Street, and the western property line of Third Avenue. Trucks having an overall length of 33 feet or more passing completely through the designated area are permitted to traverse 57th Street and Lexington Avenue only.

(e) **Truck routing rules for the Borough of Brooklyn.** (1) **Through trucks.** An operator of any truck as defined in paragraph (a)(1) above, having neither an origin nor a destination within the Borough of Brooklyn, shall restrict the operation of such vehicle to those street segments on the following list. These are designated as "Through Truck Routes." All trucks must adhere to all posted signs indicating locations that limit the height of vehicles permitted to operate thereon.

NOTE

1. Statement of Basis and Purpose in City Record Aug. 14, 1997:

The Commissioner of the Department of Transportation is authorized to regulate traffic pursuant to section 2903(a) of the New York City Charter.

Section 4-13(b)(2) is being amended to add 14th Road to the Local Truck Route Network in the Borough of Queens in order to improve truck access to industrial and commercial facilities and to reduce truck traffic on narrow residential streets.

2. Statement of Basis and Purpose in City Record Feb. 4, 2004 The Commissioner of the Department of Transportation is authorized to regulate traffic pursuant to §2903(a) of the New York City Charter. Section 4-13(e)(2) is being amended in connection with the recommendations contained in the Red Hook Truck Study. The study recommends truck route changes in order to minimize truck traffic on residential streets, regulate truck traffic in Red Hook, and to improve circulation and safety of vehicular and pedestrian traffic in Red Hook. The recommendations were reviewed and approved by elected officials, the community board, and other interested groups.

3. Statement of Basis and Purpose in City Record June 21, 2004: The Commissioner of the Department of Transportation is authorized to regulate traffic pursuant to §2903(a) of the New York City Charter. Section 4-13(f)(2) is being amended to improve traffic circulation and safety and reduce truck traffic in residential areas.

4. Statement of Basis and Purpose in City Record Sept. 17, 2007: The Commissioner of the Department of Transportation is authorized to promulgate rules regarding parking and traffic in the City pursuant to §2903 of the New York City Charter. The Department of Transportation has undertaken a study of Truck Route Management and Community Impact Reduction. One goal of the study is to help improve the City's existing overall truck management framework. To assist in achieving this objective, the study recommends that the Department of Transportation amend specific provisions of Title 34, §4-13 of the Rules of the City of New York to ensure consistency and clarity among truck-related definitions, rules and regulations, and to ensure that changes made to the truck route network are accurately reflected. In addition, though height restrictions are eliminated from these rules in order to remove outdated and inconsistent information, trucks are still required to adhere to posted signs indicating any such restrictions on the City's streets and roadways.

5. Statement of Basis and Purpose in City Record Feb. 9, 2009: The Commissioner of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903(b) of the New York City Charter and Title 19 of the New York City Administrative Code. Castleton Avenue from Jewett Avenue to Port Richmond Avenue is being added as a local truck route in Staten Island to improve truck operations by allowing a connection to the Richmond Avenue local truck route. Westbound trucks at Castleton Avenue and Jewett Avenue are only allowed to turn left or right. If they turn right, they arrive at Jewett Avenue and Richmond Terrace which only allows right turns. The trucks are being forced into a circle as a result of the turn restrictions. By adding Castleton Avenue from Jewett Avenue to Port Richmond Avenue as a local truck route, truck operations will be improved in this area, and truck movements will be more efficient. Due to land use changes two local truck routes are being eliminated, specifically, New Dorp

Lane from Old Mill Road to Cedar Grove Avenue and Ebbitts Avenue from Old Mill Road to Cedar Grove Avenue. Adding Richmond Valley Road as a local truck route, between Arthur Kill Road and Page Avenue will allow for east-west connection between two north-south local truck routes.

Rules of the City of New York

34 RCNY 4-14

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 4 TRAFFIC RULES AND REGULATIONS

§4-14 Parkways and Parks.

(a) **Parkways.** The following provisions shall govern the use of all parkways: (1) **Peddlers, vendors, hawkers and hucksters.** No peddler, vendor, hawker or huckster shall stop or remain on any part of the right of way or service roads or entrances.

(2) **Use of parkways restricted.** Commercial vehicles, pedestrians, horses, limited use vehicles and bicycles are prohibited on parkways.

(3) **Flat tires.** No operator shall stop his/her vehicle on the improved or paved roadway of a park or parkway for the purpose of removing or replacing a flat tire. No person shall remove or replace a flat tire unless the vehicle is completely off the improved or paved roadway so that no portion of the vehicle or the person is exposed to passing vehicles.

(b) **Restrictions on vehicles.** (1) **Commercial vehicles.** Commercial vehicles are prohibited from using any park, except under permit where necessary to make deliveries in such park. Wherever service roads adjoin the main roadway to a park such vehicles are required to use the service roads set apart for such use. In all cases such vehicles must enter the park from the nearest street intersection or entrance, in the direction of traffic, and leave by the nearest intersecting street or exit in the direction of traffic.

(2) **Business or advertising purposes.** Vehicles having any name, insignia, or sign painted or displayed thereon for business or advertising purposes are prohibited in parks or parkways except as provided in paragraph (b)(1), above.

(3) **Carriers of offensive refuse or heavy materials.** No garbage, ashes, manure, or other offensive material shall be carried through any park. When such refuse is to be removed from premises fronting on any park or improved or paved roadway in a park, the vehicle collecting it must leave the park or improved or paved roadway as soon as the collection has been accomplished, and within the time prescribed by the Commissioner of Parks.

(4) **Buses.** No persons shall, except under a permit, drive or operate a bus within any park or on a parkway. Charter buses will be permitted to operate between the shortest possible routes from outside a park to deliver or to pick up their passengers from a picnic, bathing or other recreation area only if a permit to enter the park has been issued to the person sponsoring the outing, picnic, etc. Buses must proceed over the route and to the parking space designated in the permit. Parking in the designated parking space will be limited to the time prescribed in the permit.

(5) **Hearses.** No hearse or other vehicles carrying or used for carrying the body of a dead person shall enter or be allowed in any park except by permit.

(c) **Restricted areas of parks.** No person shall, in any park, drive or operate a vehicle within or upon a safety zone, walk, bridle path or any part of any park designated or customarily used for such purposes. No person shall ride a bicycle, limited use vehicle, or scooter in any park, except in places designated for such riding; but persons may push such machines in single file to and from such places, except on beaches and boardwalks. No person shall ride a limited use vehicle upon any bicycle, pedestrian or bridle path or upon any street or walkway that has been set aside for bicycling while such designation is in effect. No wheelchairs shall be operated in any part of any park unless licensed by the Commissioner of Parks, except that invalids' wheelchairs may be pushed along the boardwalk and pedestrian walks. No person shall ride or lead a horse or other beast of burden in a park, except on a bridle path or along routes customarily used for access to and from bridle paths.

(d) **Projecting articles.** No person shall operate or drive in any park or parkway a vehicle containing any person or object projecting or hanging outside or on the top thereof; except that outdoor sports and recreation equipment such as skis, ski poles, fishing rods, beach chairs, beach umbrellas, tent poles, toboggans, and sleds may be carried on the rear of such vehicles or on a rack designed for the purpose and attached to the top thereof, provided that in all cases fastenings shall be secure and substantial, and provided that such equipment so carried shall in no case project more than 12 inches above the top or to the rear of such vehicle.

(e) **Driving off pavement.** (1) No vehicle shall be operated or driven off the improved or paved roadways of any park or parkway unless it is disabled.

(2) All stalled or disabled vehicles must be removed from paved roadways in parks and parkways so as to prevent obstruction of traffic. If not so removed by the owners then they may be removed by Department of Transportation forces or licensed tow operators at the expense of the owners and in such event neither the City nor such licensed tow operators shall be liable for damages caused to such vehicles during removal.

(3) No disabled vehicle shall be permitted to remain in a park for a longer period than two hours.

(f) **Parking.** No person shall, in any park area designated as a parking space,

(1) fail to comply with an order of a law enforcement officer or any park employee or disobey or disregard the notices, prohibitions, instructions or directions on any park sign or parking meter including the Rules of Museums or Zoological or Botanical Gardens, posted on the grounds or buildings of said institutions.

(2) between one-half hour after sunset and one-half hour before sunrise, stop or park in a vehicle, except at places designated or maintained therefor.

HISTORICAL NOTE

Section repealed and added City Record Apr. 22, 1992 eff. May 22, 1992.

Section in original publication July 1, 1991.

Rules of the City of New York

***** Current through December 2009 ****

34 RCNY 4-15

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 4 TRAFFIC RULES AND REGULATIONS

§4-15 Limitations Upon Dimensions and Weights of Vehicles.

(a) **Definitions.** (1) **Highway.** When used in this section, a highway shall mean the entire width between the boundary lines of every public way publicly maintained when any part thereof is open to the use of the public for purposes of vehicular travel and includes any street, avenue, road, square, place, alley, lane, highway, boulevard, concourse, parkway, driveway, culvert, sidewalk, crosswalk, boardwalk, viaduct, underpass and any private street open to public motor vehicle traffic.

(2) **Exception.** The provisions of this section shall not apply to any vehicle authorized by the Federal Surface Transportation Assistance Act of 1982, as amended, when such vehicle is operating pursuant to the provisions of such act.

(b) **Dimensions and weights of vehicles.** No person shall operate or move, or cause or knowingly permit to be operated or moved on any highway or bridge any vehicle or combination of vehicles of a size or weight exceeding the limitations provided for in this subdivision (b).

(1) **Width of vehicle.** The width of a vehicle, inclusive of load, shall not be more than eight feet except that the width of school buses and fire vehicles shall not exceed 98 inches and the width of buses having a carrying capacity of more than seven passengers shall not exceed 102 inches.

(2) **Height of vehicle.** The height of a vehicle from underside of tire to top of vehicle, including its load, shall not be more than 13 1/2 feet; provided, however, that air cargo carried in containers and pallets loaded onto flatbed trucks that thereby exceed such height may travel between any airport under the jurisdiction of the port of New York authority

and off-airport facilities involved in the handling of air cargo located within one mile of such airport on local routes to be designated by the Commissioner. Any such vehicle on such route shall not be required to obtain a permit for such travel.

(3) **Length of single vehicles.** The length of a single vehicle, inclusive of load and bumpers shall not be more than 35 feet. The provisions of this paragraph (3) shall not apply to semitrailers, fire vehicles, single unit buses having a capacity of more than fifteen passengers, provided the length of such buses does not exceed 45 feet; or articulated buses provided the length of such bus does not exceed 65 feet. Operators of buses longer than 45 feet in length may be required to demonstrate that on-street stops and terminal areas used by such buses are of sufficient length to accommodate them. In no case shall any bus that has a turning radius greater than 50 feet operate without a permit for such operation issued by the Commissioner;

(4) **Length of combinations of vehicles.** The total length of a combination of vehicles, inclusive of load and bumpers, shall not be more than 55 feet, except that the combination of vehicle, load and bumper of vehicles hauling poles, girders, columns or other similar objects of great length which are indivisible, shall not be more than 60 feet. The provisions of this paragraph (4) shall not apply to any fire vehicle or to a vehicle or combination of vehicles that is disabled and unable to proceed under its own power and is being towed for a distance of not more than ten miles for the purpose of repair or removal from the highway.

(5) **Number of wheels and axles.** In determining the number of wheels and axles on any vehicle or combination of vehicles within the meaning of this subdivision (b), only 2 wheels shall be counted for each axle, and axles that are fewer than 46 inches apart from center to center shall be counted as 1 axle. However, in the case of multiple tires or multiple wheels, the sum of the widths of all tires on a wheel or combination of wheels shall be taken in determining tire width.

(6) **Weight per inch of tire.** The weight per inch width of tire of any one wheel of a single vehicle or a combination of vehicles, equipped with pneumatic tires, when loaded, shall not be more than 800 pounds.

(7) **Weight on one wheel.** The weight on any one wheel of a single vehicle or a combination of vehicles, equipped with pneumatic tires, when loaded, shall not be more than 11,200 pounds.

(8) **Weight on one axle.** The weight on any one axle of a single vehicle or combination of vehicles, equipped with pneumatic tires, when loaded, shall not be more than 22,400 pounds.

(9) **Weight on two axles.** The weight on any two consecutive axles of a single vehicle or a combination of vehicles, equipped with pneumatic tires, when loaded, and when such axles are spaced fewer than 10 feet from center to center, shall not be more than 36,000 pounds. Axles shall be counted as provided in paragraph (5) of this subdivision (b).

(10) **Weight on three axles.** A single vehicle or a combination of vehicles having 3 axles or more and equipped with pneumatic tires, when loaded, may have a total weight on all axles not to exceed 34,000 pounds, plus 1,000 pounds for each foot and major fraction of a foot of the distance from the center of the foremost axle to the center of the rearmost axle. Axles shall be counted as provided in paragraph (5) of this subdivision (b). In no case, however, shall the total weight exceed 80,000 pounds without any tolerance for enforcement purposes.

(11) **Weight on solid rubber tires.** A vehicle or combination of vehicles equipped with any solid rubber tires shall not have a load weighing more than 80% of the total weight permitted in this subdivision (b) for pneumatic tires.

(12) **Width of tires.** For the purpose of this subdivision (b), the width of pneumatic tires shall be ascertained by measuring the greatest width of the tire casing when the tire is inflated. The width of solid rubber tires shall be ascertained by measuring the width of the tire base channel or between the flanges of the metal rim. No vehicle equipped with solid rubber tires, which has at any point less than 1 inch of rubber above the top or beyond the flange or

rim, shall be operated upon a public highway. The width of metal tires shall be ascertained by measuring the width of contact of the tire with the road surface.

(13) **Weight and height restrictions on bridges, viaducts and other structures.** No person shall operate or move a vehicle or combination of vehicles over, on or through any bridge, viaduct or other structures on any highway if the weight of such vehicle or combination of vehicles and load is greater than the posted capacity of the structure or exceeds the height of the posted clearance as shown by an official sign or other marking or device.

(14) **Other limits also in effect.** Nothing m this subdivision (b) shall be construed as preventing the enforcement of rules now in effect or hereafter promulgated by the Department of Transportation further limiting the size and weight of vehicles in designated areas.

(15) **Permits.** Upon application in writing showing good cause, the Commissioner may issue a permit to operate or move a vehicle or a combination of vehicles, the weights and dimensions of which exceed the limitations provided for in this subdivision (b), upon any highway under his/her jurisdiction. Every such permit may designate the route to be traversed and may contain any other restrictions or conditions deemed necessary by the Commissioner. Every such permit shall be carried on the vehicle to which it refers and shall be open to the inspection of any law enforcement officer or any inspector of the Bureau of Weights and Measures of the Department of Consumer Affairs of the City of New York. All permits issued shall be revocable by the Commissioner at his/her discretion without a hearing or the necessity of showing cause.

(i) If an operator of a vehicle with a gross weight of 300,000 pounds or more seeks to cross a bridge under the jurisdiction of the Department of Transportation of the City of New York, the operator must comply with the following:

(A) A load rating determined by a New York State licensed Professional Engineer with at least three years experience in the design, inspection and load rating of bridges must be submitted with the permit application. The information contained within such load rating shall include, but is not limited to: (1) the ratings for the inventory and operating level for all structural elements of the bridge so that the critical element of the bridge is identified; (2) the actual weight of the vehicle per axle and the actual axle spacing; and (3) the method used for establishing the capacity of the bridge(s). Load ratings shall be submitted for each bridge on the travel route. Load ratings should conform to "Level 1" load ratings pursuant to New York State Department of Transportation Engineering Instructions for Load Ratings and the latest edition of the American Association of State Highway and Transportation Officials (AASHTO) Condition Evaluation of Bridges. Each load rating must be stamped and certified by the licensed Professional Engineer who prepared it.

(B) Within one week from the vehicle's crossover of the bridge(s), the permittee must file a post inspection report of the bridge(s) with the Department. The post inspection report should analyze the structural integrity of the bridge(s), to the Department's satisfaction, as a result of the vehicle's crossover. If the post inspection report indicates any type of distress to the bridge(s), the permittee must rectify the distress and/or damage to the Department's satisfaction. The permittee may submit a pre-inspection report of the bridge's structural integrity for comparison purposes; otherwise the Department will use its latest biennial inspection reports for such purposes. Any pre or post inspection report must comply with the requirements set forth in the latest edition of the New York State Department of Transportation Bridge Inspection Manual. Any distress that is not identified in the pre-inspection report or the biennial inspection reports will be deemed to have been caused by the move.

(C) Should the permittee fail to comply with any of the requirements contained in this subparagraph, the Commissioner may refuse to issue future overweight and/or overdimensional vehicle permits to the permittee.

(ii) Reserved.

(16) **Permits for vehicles operating pursuant to governmental regulation.** (i) Where compliance with the requirements of a governmental regulatory agency necessitates exceeding the weight limitations provided herein, a

permit may be issued by the Commissioner on application therefor, for a vehicle to exceed such prescribed weight limitations to the extent necessary to meet the governmental regulatory requirements, but in no event shall the allowable total vehicle weight provided herein be exceeded.

(ii) The application shall include the type of vehicle, the manner and extent to which the weight limitations are to be exceeded, the design details causing such excess and a copy of the governmental regulatory agency requirements.

(17) **Fees.** An administrative fee of $35.00 shall be charged for each and every permit issued under this subdivision (b) unless otherwise provided by law. This fee shall not be refundable and is payable in addition to any other fees or charges provided for under the rules of the Department of Transportation.

(18) **Exemptions.** (i) **Fire Department vehicles.** The provisions of this subdivision (b) with respect to the limitations of the weight on axles shall not apply to vehicles of the Fire Department, but in no event shall the allowable total vehicle weight provided hereby be exceeded.

(ii) **Department of Sanitation vehicles.** The provisions of this subdivision (b) with respect to the width of a vehicle shall not apply to the sweepers of the Department of Sanitation, provided they do not exceed 11 feet in width.

(iii) **Vehicles working on highways.** The provisions of this subdivision (b) with respect to the width of a vehicle shall not apply to vehicles engaged in work on a highway.

(c) **Enforcement; measurement and weight of vehicles.** Any law enforcement officer or any inspector of the Department of Consumer Affairs of the City of New York having reason to believe that any vehicle or load is in violation of the restrictions in subdivision (b), above, is authorized to stop the vehicle on any public highway or private street open to public motor vehicle traffic and measure and weigh it by means of portable or stationary measures and scales. Any law enforcement officer or such inspector may require that the vehicle be driven to the nearest scales, if they are within 3 miles.

(d) **Responsibility for damages.** The owner and operator of any vehicle used in the business of a motor carrier, and the carrier, if the vehicle is actually engaged in the conduct of the business, shall be jointly and severally responsible for all damages, to any highway, bridge or culvert resulting from the movement over or under them of any such vehicle that violates any of the weight or size provisions of subdivision (b) above.

(e) **Special concrete plant.** Upon application in writing and for cause shown, the Commissioner may issue permits to exceed the maximum weight limits provided for in these rules for two- or three-axle vehicles operated in connection with the manufacture or supply of concrete for construction projects located in New York City, provided that such vehicles are registered to or leased by the owner of a manufacturing facility constructed subsequent to January 1, 1986 on land provided by the City for such purposes.

(f) **Annual overweight load permit.** (1) **Permits generally.** Except where inconsistent with any federal law, rule or regulation, the Commissioner may issue an annual oveweight load permit, as provided in subdivision fifteen of section three hundred eighty-five of the Vehicle and Traffic Law, to expire on the date of expiration of the registration of the vehicle, for any vehicle designed and constructed to carry loads that are not of one piece or item, which vehicle currently is registered in this State and operational on public highways in this State and which was registered in this State and operational on public highways in this State immediately prior to January first, nineteen hundred eight-six, in accordance with the following subparagraphs. The Commissioner also may issue an annual permit to a vehicle or combination of vehicles which replaces a vehicle, which vehicle or combination of vehicles was registered in this State and operational on public highways in this State immediately prior to January first, nineteen hundred eighty-six, provided the manufacturer's recommended maximum gross weight of the replacement vehicle or combination of vehicles does not exceed the weight for which a permit may be issued and the maximum load to be carried on the replacement vehicle or combination of vehicles does not exceed the maximum load which could have been carried on the vehicle being replaced or the registered weight of such vehicle, whichever is lower, in accordance with the

following subparagraphs. Motor carriers having apportioned vehicles registered under the international registration plan either must have a currently valid permit as of January first, nineteen hundred ninety-four or shall have designated New York as their base state under the international registration plan in order to be eligible to receive such permit.

If a permit holder operates a vehicle or combination of vehicles in violation of any posted weight restriction, the permit issued to such vehicle or combination of vehicles shall be deemed void as of the next day and shall not be reissued for a period of twelve calendar months; provided, however, that if such violation is adjudicated in favor of the permittee by the New York State Traffic Violations Bureau, the permit shall be reinstated immediately upon presentation of a copy of such judgment to the Commissioner.

(i) A permit may be issued for a vehicle having at least three axles and a wheelbase not exceeding forty-four feet nor less than seventeen feet or for a vehicle with a trailer not exceeding forty feet.

A permit may only be issued for such a vehicle having a maximum gross weight not exceeding seventy-nine thousand pounds and any tandem axle group weight shall not exceed fifty-nine thousand pounds, and any tridem shall not exceed sixty-four thousand pounds.

(ii) A permit may be issued only until December thirty-first, nineteen hundred ninety-nine for a vehicle or combination of vehicles that has been permitted within the past four years having five axles and a wheelbase of at least thirty-six and one-half feet. The maximum gross weight of such a vehicle or combination of vehicles shall not exceed one hundred five thousand pounds and any tandem axle group weight shall not exceed fifty-one thousand pounds.

A permit may be issued for a vehicle or combination of vehicles having at least five axles and a wheelbase of at least thirty feet. The maximum gross weight of such vehicle or combination of vehicles shall not exceed ninety-three thousand pounds and any tandem axle group weight shall not exceed forty-five thousand pounds and any tridem axle group weight shall not exceed fifty-seven thousand pounds.

(iii) A permit may be issued for a vehicle or combination of vehicles having at least five axles or more and a wheelbase of at least thirty-six and one-half feet, provided such permit contains routing restrictions.

Until December thirty-first, nineteen hundred ninety-four, the maximum gross weight of a vehicle or combination of vehicles permitted under this subparagraph shall not exceed one hundred twenty thousand pounds and any tandem or tridem axle group weight shall not exceed sixty-nine thousand pounds, provided, however, that any replacement vehicle or combination of vehicles permitted after January first, nineteen hundred ninety-five, shall have at least six axles, any tandem axle group shall not exceed fifty thousand pounds and any tridem axle group shall not exceed sixty-nine thousand pounds.

After December thirty-first, nineteen hundred ninety-four, the tridem axle group weight of any vehicle or combination of vehicles issued a permit under this subparagraph shall not exceed sixty-seven thousand pounds, any tandem axle group weight shall not exceed fifty thousand pounds and any single axle weight shall not exceed twenty-five thousand seven hundred fifty pounds.

After December thirty-first, nineteen hundred ninety-nine, all vehicles issued a permit under this subparagraph must have at least six axles.

(iv) A permit may be issued for a vehicle having two axles and a wheelbase not less than ten feet, with the maximum gross weight not in excess of one hundred twenty-five percent of the total weight limitation as set forth in subdivision ten of section three hundred eighty-five of the New York State Vehicle and Traffic Law. Furthermore, any axle weight shall not exceed twenty-seven thousand pounds.

(2) **Combination permits.** (i) Each power unit of a combination of vehicles must have its own annual overweight load permit. A power unit may be used to obtain any number of permits for different combinations of vehicles as long

as each permit has a maximum of five trailers per power unit. Only the first permit issued to a power unit pursuant to this paragraph is transferable pursuant to subparagraph (ii) of paragraph three of this subdivision.

(ii) A permit issued to a power unit for a combination of vehicles under subparagraph (i) of this paragraph may not be used for trailers other than those specifically listed on each permit.

(iii) All trailers must be listed on the corresponding permit by vehicle identification number (VIN), license plate number or trailer certificate of title number.

(iv) For each permit issued to a power unit for a combination of vehicles, up to five trailers will be listed with the payment of a $25.00 fee for each trailer other than the first trailer in addition to the permit fee set forth in subparagraph (ii) of paragraph six of this subdivision.

(3) **Replacement vehicle permits.** A "replacement vehicle" is a vehicle or combination of vehicles that replaces a vehicle with a current annual overweight load permit. A replacement vehicle may be eligible for an annual overweight load permit, subject to the following:

(i) A replacement vehicle or combination of vehicles may be eligible for an annual overweight load permit, provided the manufacturer's recommended maximum gross weight of the replacement vehicle or combination of vehicles does not exceed the weight for which a permit may be issued pursuant to this section and the maximum load to be carried on the replacement vehicle or combination of vehicles does not exceed the maximum load which could have been carried on the vehicle being replaced or the registered weight of such vehicle, whichever is lower.

(ii) Effective October 1, 1995, an annual overweight load permit may only be transferred to a replacement vehicle with the same registrant or transferred with the permitted vehicle as part of the sale or transfer of the permit holder's business. Acceptable forms of proof of the sale or transfer of the permit holder's business shall include, but not be limited to, a notarized statement, a statement attested to by at least two independent witnesses, a certified copy of the document of sale or transfer, a will or other official document disposing of the business. Only one permit issued to a power unit pursuant to paragraph two above is eligible for transfer.

(iii) **Banking.** (A) For purposes of this section, "banked weight" shall mean the New York State highest registered gross legal weight of a vehicle or combination of vehicles prior to April first, nineteen hundred eighty-seven; such vehicle or combination of vehicles must have been registered in New York State and operational on public highways in this State immediately prior to January first, nineteen hundred eighty-six in order to be part of the banked weight system.

(B) Excess weight capacity that can be banked arises from the following situations:

(a) a replacement vehicle has a gross vehicle weight less than the banked weight capacity of the replaced vehicle; or

(b) the statutory reduction in allowable maximum weights under the permit results in a permissible maximum weight less than the banked weight capacity; or

(c) there is a voluntary surrender of a permit or permits in order to obtain one or more replacement permits, and there is excess weight after the issuance of the new permit or permits; or

(d) there is a voluntary surrender of a permit without obtaining a new permit.

(C) Any vehicle whose permit has been surrendered voluntarily, and its weight banked, cannot obtain another annual overweight load permit.

(D) Banked weight can be used only to justify the acquisition of additional vehicles or combinations of vehicles

pursuant to this subdivision.

(a) Claims of replacement vehicle rights based on banked weight capacity must indicate the source of the banked weight capacity.

(b) The banked weight capacity for any replacement vehicle or combination of vehicles shall not exceed the allowable permitted weight for such replacement vehicle or combination of vehicles, and shall not exceed the gross weight capacity of the replaced vehicle or combination of vehicles.

(c) Unused banked weight capacity cannot justify a replacement vehicle or combination of vehicles that has a gross weight capacity greater than the replaced vehicle or combination of vehicles.

(d) Any replacement vehicle may be replaced pursuant to the provisions of this section; when a replacement vehicle; has been replaced it becomes ineligible for further annual overweight load permits pursuant to this section.

(E) If a permit is revoked pursuant to the provisions of this subdivision, the permitted weight cannot be banked.

(4) **Leasing.** (i) The lessor of a leased vehicle may obtain a permit for the vehicle pursuant to this subdivision (f).

(ii) The lessee of a leased vehicle who has an exclusive leasing arrangement that exceeds thirty days will be presumed to be the registrant for purposes of obtaining a permit, unless shown otherwise.

(iii) Where a leasing agreement is for thirty days or less, and the lessor has not obtained a permit for the leased vehicle, the lessee must obtain a single use permit for each day of operation of the leased vehicle pursuant to paragraph fifteen of subdivision (b) of this section.

(5) **Permit application.** (i) **General.** (A) Except as otherwise provided in this section for daily permits, eligible vehicles or combinations of vehicles exceeding allowable weights pursuant to law are required to obtain an annual overweight load permit from the Commissioner pursuant to this subdivision in order to operate on those highways under the jurisdiction of the Commissioner. An annual overweight load permit is not valid unless the vehicle or combination of vehicles is operated and maintained in accordance with the provisions of these Rules and with any other special requirements indicated on the permit.

(B) All applications must be on the forms prescribed by and available from the Commissioner.

(C) The permit application and procedures for granting permits shall be made available to a registrant upon request at the Department of Transportation, Authorized Permits and Parking Division, by mail or in person, and must be completed in all respects by the registrant or his legal representative. The applicant must be the registrant of the vehicle, except where there is a leased vehicle as provided in this subdivision.

(ii) **Proof of registration.** (A) All vehicles, including vehicles to be replaced, must have been registered in this State and operational on public highways in the State of New York immediately prior to January first, nineteen hundred eighty-six. To obtain a permit, the registrant must show proof of valid New York State registration for the vehicle or combination of vehicles and must maintain such New York State registration for the duration of the permit.

(B) The applicant must submit with his application a copy of the registration of each vehicle or replacement vehicle.

(C) The burden of proof in establishing the validity and existence of the New York State registration is upon the applicant.

(iii) **Identification of vehicle and load.** (A) The power unit shall be identified by make, year of manufacture, model number, vehicle identification number (VIN), and license plate number.

(B) The manufacturer's recommended gross weight rating and the registered gross vehicle weight shall be indicated on an annual overweight load permit application for replacement vehicles.

(C) Manufacturer's maximum axle weight(s), axle spacing, number of tires, and maximum tire load spacing shall be indicated on an annual overweight load permit application for all vehicles.

(iv) **Procedure.** The applicant must complete the required application information and submit the required number of copies of such application, together with the required permit fee(s), as well as any required documentation, to the Commissioner by mail or in person. All applications must be signed by the registrant or his legal representative.

(v) **Reapplication fee.** When a reapplication is made for a permit for the same vehicle or combination of vehicles that have been denied a permit, the initial annual vehicle fee shall be increased by $25.00.

(vi) **No refund after granting of permit.** No refund shall be made once an application for a permit has been filed and a permit granted by the Commissioner.

(vii) **False information voids permit.** Permits which have been issued on the basis of falsely stated information shall be null and void.

(viii) **New owners must obtain new permits.** If the registrant of the vehicle has been changed after a permit has been issued, the new owner(s) must obtain a modified permit.

(ix) **Permit application information.** (A) Registrants of vehicles eligibile for permits pursuant to this section must furnish to the Commissioner a certified copy of the vehicle's current New York State registration or registration pursuant to the international registration plan with New York State designated as the base state. The registrant also must provide a certified copy of the vehicle's registration, or other verifiable proof acceptable to the Commissioner, demonstrating that the vehicle was registered in New York State immediately prior to January first, nineteen hundred eighty-six; once such fact has been established with the Commissioner, subsequent permit applications do not require such proof, provided the most recent permit number for the vehicle is provided in the new permit application.

(B) The registrant must furnish to the Commissioner, vehicle measurements consisting of:

(a) Trailer length; and

(b) Number of axles; and

(c) Axle spacing; and

(d) Manufacturer's recommended gross vehicle weight; and

(e) Total wheelbase measurement (including tractor/steering axle); and

(f) Tire size and number of tires of each axle; and

(g) Manufacturer's maximum axle weight rating.

(6) **Fees.** (i) The following fees shall be charged and collected by the Commissioner for obtaining an annual overweight load permit. Fees shall be paid by money order, certified check, bank check, check drawn on a New York State bank, or a negotiable instrument acceptable to and made payable to the "New York City Department of Transportation." Fees must accompany each permit application. Improperly filed permit applications shall be subject to an administrative fee of $25.00.

(ii) The fee for an annual overweight load permit shall be $600 if for a period of six months or more. The fee for an

annual overweight load permit shall be $300 if for a period of less than six months.

(iii) If a check delivered to the Commissioner or his agent as payment of any fee for the registration of any vehicle or combination of vehicles is dishonored for insufficient funds, all permits issued in the name of that registrant shall be suspended and no other permit shall be issued to such person until full satisfaction of the fee is made and an additional fee of $25.00 is paid to the Commissioner. No such suspension shall be issued until thirty days after notification is mailed to the registrant at the address given on the application for the permit. If satisfaction is made within thirty days from the date of mailing of such notification, no suspension shall be issued and no additional fee shall be charged.

(g) **Crane Permits.** (1) Upon application in writing, the Commissioner may issue a special hauling permit to move certain mobile hoisting machines, also known as self-propelled cranes, the weight and dimensions of which exceed the limitations provided herein, upon any highway under his/her jurisdiction. Such hoisting machines shall be considered to constitute a nondivisible load.

(2) The special hauling permit, which shall expire on the 31st day of December next succeeding the date of issuance, may designate the route to be traversed and contain any other restrictions deemed appropriate by the Commissioner.

(3) The permittee shall be required to secure and maintain owners' protective liability and property damage insurance coverage in such amounts and upon such terms as deemed appropriate by the Commissioner.

(4) The fee for the issuance of such annual special hauling permit or renewal thereof shall be $100.00.

(h) **Vehicular weights on F.D.R. Drive.** No person shall operate or cause to be operated any vehicle in excess of 8000 lbs. (4 tons), including the weight of passengers and cargo, on the F.D.R. Drive northbound from 23rd Street to 63rd Street and the F.D.R. Drive southbound from 63rd Street to 23rd Street. These vehicles include, but shall not be limited to trucks, vans, government-owned vehicles, stretch limousines and buses. For the purposes of enforcement, signs need not be posted for this rule to be in effect.

(i) **Overdimensional and/or Overweight Vehicle Bulk Milk Permit.**

(1) **Permits Generally.**

(i) Except where inconsistent with any federal or state law, rule or regulation, the Commissioner may issue a permit, as provided for in paragraph (c) of subdivision fifteen of section three hundred eighty-five of the Vehicle and Traffic Law, to operate or move a combination of vehicles, which for the purpose of this rule shall be limited to one power unit and one trailer except as provided in subparagraph (viii) of paragraph (3) of this subdivision, designed and constructed to carry milk in bulk, the lengths and/or weights of which exceed the limitations provided in subdivision b of this section.

(ii) The permit shall authorize only the transportation of bulk milk within the City of New York to a milk processing facility located within the City of New York or the transportation by such a combination of vehicles out of the City of New York empty or carrying bulk cream, at weights not to exceed the limitations provided in subdivision b of this section, from the milk processing facility.

(iii) A permit issued pursuant to this subdivision shall designate a route approved by the Commissioner. A combination of vehicles operating under a permit issued pursuant to this subdivision may only travel along the route designated on the permit. There shall be one permit per combination of vehicles allowing the combination of vehicles to enter the City of New York and a separate permit allowing the combination of vehicles to leave the City of New York.

(iv) Combinations of vehicles designed and constructed to carry milk in bulk that exceed allowable lengths and/or weights pursuant to law are required to obtain a permit from the Commissioner pursuant to this subdivision in order to

operate on those highways under the jurisdiction of the Commissioner.

(v) No permit shall be issued for a combination of vehicles that exceeds 99,000 pounds.

(vi) Permits shall be issued on a quarterly basis.

(2) **Permit Application.**

(i) **Generally.**

(A) A permit issued pursuant to this subdivision is not valid unless the combination of vehicles is operated and maintained in accordance with the provisions of this subdivision and with any other special requirements indicated on the permit.

(B) The applicant shall be the registrant of the combination of vehicles except, in the case of a combination of vehicles leased pursuant to an exclusive leasing arrangement that exceeds thirty days, the applicant shall be the lessee. The applicant shall supply his/her Federal Tax ID number.

(C) The permit application and the procedures for granting permits shall be made available to an applicant upon request at the Department of Transportation, Division of Bridges, Truck Permit Unit, by mail, email or in person, and shall be completed in all respects by the applicant or his/her legal representative.

(D) All applications shall be on the forms prescribed by and available from the Commissioner.

(ii) **Identification of vehicle and load.** The power unit and trailer(s) shall be identified on the application by make, year of manufacture and license plate numbers and State.

(iii) **Vehicle Measurements.** Applicants shall furnish to the Commissioner all of the following vehicle measurements:

(A) Trailer length;

(B) Number of axles, including axle spacing and axle weights;

(C) Total wheelbase measurement (including tractor/steering axle);

(D) Overall width;

(E) Overall length;

(F) Overall height; and

(G) Total gross vehicle weight including load (tractor, trailer and load).

(iv) **Attestation.** Applicants shall furnish to the Commissioner a sworn and notarized statement attesting that the vehicles for which a permit application has been submitted will be used solely for the transport of bulk milk or cream.

(v) **Procedure.** The applicant shall complete the required application information and submit the required number of copies of such application, together with the required permit fee(s), as well as any required documentation, to the Commissioner by mail or in person. All applications shall be signed by the applicant or his/her legal representative.

(vi) **Reapplication Fee.** When a reapplication is made for a permit under this subdivision for the same combination of vehicles that has been denied a permit, the initial permit fee shall be increased by an administrative fee of $25 in accordance with subparagraph (vii) of paragraph (3) of this subdivision.

(vii) **No refund after granting of permit.** No refund shall be made once an application for a permit under this subdivision has been filed and a permit granted by the Commissioner.

(viii) **False information voids permit.** Permits that have been issued on the basis of falsely-stated information shall be null and void.

(ix) **New owners shall obtain new permits.** If the ownership of a combination of vehicles, or the identity of the lessee in the case of a combination of vehicles leased pursuant to an exclusive leasing arrangement that exceeds thirty days, changes after a permit under this subdivision has been issued, the new owner(s) or lessee(s) shall obtain a modified permit and shall pay the applicable quarterly fee specified in paragraph (3) of this subdivision.

(3) **Permit Fees.**

(i) The following fees shall be charged and collected by the Commissioner for obtaining a permit or modified permit, issued on a quarterly basis, pursuant to this subdivision. Fees shall be paid by money order, certified check, bank check, check drawn on a New York State bank, or a negotiable instrument acceptable to and made payable to the "New York City Department of Transportation." Fees shall accompany each permit application. The fee for a permit issued pursuant to this subdivision shall be $650 per combination of vehicles, except as otherwise provided in this subparagraph (3).

(ii) At the beginning of the third year following the effective date of this Rule:

(a) If the total number of permits pursuant to this subdivision issued to the applicant in the second year following the effective date of this Rule is at least 25% less than the total number of permits issued to the applicant in the first year following the effective date of this Rule ("the base-line year amount"), then the fee for a permit shall be $650 per combination of vehicles.

(b) Otherwise, the fee for a permit shall be $715 per combination of vehicles.

(iii) At the beginning of the fourth year following the effective date of this Rule:

(a) If the total number of permits pursuant to this subdivision issued to the applicant in the third year following the effective date of this Rule is at least 50% less than the base-line year amount, then the fee for a permit shall be $650 per combination of vehicles.

(b) Otherwise, the fee for a permit shall be $780 per combination of vehicles.

(iv) At the beginning of the fifth year following the effective date of this Rule:

(a) If the total number of permits pursuant to this subdivision issued to the applicant in the fourth year following the effective date of this Rule is at least 75% less than the base-line year amount, then the fee for a permit shall be $650 per combination of vehicles.

(b) Otherwise, the fee for a permit shall be $812.50 per combination of vehicles.

(v) At the beginning of the sixth year following the effective date of this Rule:

(a) If the total number of permits pursuant to this subdivision issued to the applicant in the fifth year following the effective date of this Rule is 100% less than the base-line year amount, the fee for a permit shall be $650 per combination of vehicles.

(b) Otherwise, the fee for a permit shall be $845 per combination of vehicles.

(vi) Permit fees specified in this paragraph shall apply separately to permits to enter the City of New York and permits to leave the City of New York.

(vii) Reapplication for a permit that has been denied shall be subject to an administrative fee of $25.

(viii) The permit fees provided in subparagraphs (i) through (v) of this paragraph shall apply to permits for one specific power unit and one specific trailer. Applicants may apply for a quarterly permit under this subdivision to attach up to four additional specific trailers to one specific power unit, provided that only one trailer may be used with such power unit at any given time. The fee for a multiple trailer-single power unit combination permit shall be $100 per quarter more than the permits fees provided in subparagraphs (i) through (v) of this paragraph.

(ix) If a check delivered to the Commissioner or his/her agent as payment of any fee for the permitting of any combination of vehicles is dishonored for insufficient funds, all permits issued in the name of that applicant shall be suspended and no other permit shall be issued to such person until full satisfaction of the fee is made and an additional fee of $25 is paid to the Commissioner. No such suspension shall be issued until thirty days after notification is mailed to the applicant at the address given on the application for the permit. If satisfaction is made within thirty days of mailing such notification, no suspension shall be issued and no additional fee shall be charged.

(4) **Expiration of Permit Program.** After the sixth year following the effective date of this Rule, no permit shall be issued.

NOTE

1. Statement of Basis and Purpose in City Record Jan. 3, 2007:

The Commissioner of the Department of Transportation is authorized to promulgate rules regarding traffic operations in the City pursuant to §2903(a) of the New York City Charter.

Paragraph (15) of subdivision (b) of §4-15 is being amended to require applicants filing for an overweight and/or overdimensional vehicle permit to file with their permit application an engineer's load rating for every bridge under the jurisdiction of the Department of Transportation which the applicant expects to cross. It also requires post inspection reports to be filed by the permittee's engineer for a structural integrity analysis of the bridge(s) crossed. This will expedite the permit process and safeguard the integrity of the bridges subjected to heavy loads.

2. Statement of Basis and Purpose in City Record Feb. 9, 2009: The Commissioner of Transportation is authorized to promulgate rules regarding streets and highways in the City pursuant to §2903(b) of the New York City Charter and Title 19 of the New York City Administrative Code. The Department is increasing the legal weight limit for trucks in order to comply with state-wide standards. Engineers within the Department currently use the same formula as those from the New York State Department of Transportation when evaluating the permissible weight of vehicles crossing structures in New York City. As State DOT permits weight of up to 80,000 pounds, the Department wants its rules to be accordingly consistent in order to minimize disruptions in interstate commerce.

3. Statement of Basis and Purpose in City Record May 13, 2009: The Commissioner of Transportation is authorized to promulgate rules regarding parking and traffic in the City pursuant to §2903 of the New York City Charter. Section 4-15 is being amended to increase the fees collected for overweight and overdimensional truck permits. The fee currently charged by the Department no longer accurately reflects administrative and labor costs incurred in processing these permits.

4. Statement of Basis and Purpose in City Record June 17, 2009: The Commissioner of Transportation is authorized pursuant to Section 2903(a)(1) of the New York City Charter to promulgate rules and regulations for the conduct of vehicular and pedestrian traffic in the streets, squares, avenues, highways and parkways of the City of New York. This rule amends section 4-15 of Chapter 4 of Title 34 of the Rules of the City of New York by adding a new subdivision (i) to authorize the issuance of permits for overdimensional and/or overweight combinations of vehicles utilized by haulers of bulk milk. On a daily basis, over one hundred vehicles hauling bulk milk enter the City of New York to transport bulk milk to processing facilities and exit the City empty or carrying bulk cream. The vast majority of these vehicles currently exceed the length and weight limitations set forth in section 4-15 for vehicles operating or moving on highways or bridges in the City. These overdimensional and overweight trucks damage City streets and highways. At the same time, milk haulers will require additional time to convert their fleets to trucks that comply with the City's length and weight requirements. Section 385(15)(d) of the Vehicle and Traffic Law recognizes that milk haulers may be offered permits not available to other truck haulers. Thus, the Commissioner promulgates a rule that will provide the haulers of bulk milk an incentive to phase in, over a six-year period, the use of smaller trucks that, when carrying bulk milk or cream, would meet the City's length and weight limitations. To accomplish this goal, the rule authorizes the issuance of quarterly overdimensional and overweight permits over a period of six years and imposes a schedule of fees that increase if the applicant does not decrease the number of permits required by a certain percentage. The increases will be implemented beginning with those permits issued during the third year of the rule if the number of permits issued during the prior year has not decreased by a fixed percentage from the first year that the proposed rule is in effect. After the sixth year, no permits will be issued.

CASE NOTES

¶ 1. Absent reasonable suspicion of a vehicle violation involving excess weights of vehicles, a "routine traffic check" to determine whether the vehicle is in compliance with the law is permissible only when conducted according to non-arbitrary, non-discriminatory uniform procedures for detecting violations. Where there is no evidence that the petitioner was stopped pursuant to such a procedure, the charges of violation of Section 34 RCNY §4-15 must be dismissed. Casolino Interior Demolition Corp. v. Martinez, 29 A.D.3d 691, 814 N.Y.S.2d 720 (2nd Dept. 2006).

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 5 PARATRANSIT PROGRAM (ACCESS-A-RIDE)

§5-01 Definitions.

Access-a-Ride. "Access-a-Ride" is the service name of the City-sponsored program to provide transportation to eligible persons.

Advance-reservation trip. "Advance-reservation trip," means a one-way trip for which a reservation shall have been made in accordance with §5-03(b) hereof.

Carrier. "Carrier" means a company that has contracted with the City to provide Access-a-Ride transportation to eligible persons in a borough of the City.

Director. "Director" means the official of the City Department of Transportation whose duties consist of or include the management and oversight of Access-a-Ride, or his or her designee.

Eligible person. An "eligible person" means a transportation-disabled person who has been certified as eligible to participate in Access-a-Ride, in accordance with the requirements established by the Transportation Disabled Committee and set forth in the Access-a-Ride registration form.

Late cancellation. "Late cancellation" means any cancellation received by a carrier after 3:00 p.m. on the day preceding a scheduled subscription trip or advance-reservation trip.

No show. A "no show" means an occasion on which a participant has not cancelled a prescheduled subscription trip or advance-reservation trip and has subsequently failed to be present at the scheduled pick-up site as provided in

§5-05(a) hereof.

Office of Paratransit Operations. "Office of Paratransit Operations" means the City Department of Transportation's Office of Paratransit Operations, and any successor governmental office, bureau, or agency thereof.

Participant. "Participant" means an eligible person.

Subscriber. "Subscriber" means an eligible person who has been granted an Access-a-Ride subscription by the Office of Paratransit Operations.

Subscription trip. "Subscription trip" means a regularly scheduled one-way trip taken pursuant to an Access-a-Ride subscription.

Transportation Disabled Committee. "Transportation Disabled Committee" means the committee established pursuant to §15-b of the Transportation Law, and any successor committee, agency, bureau or entity thereof.

CHAPTER 5 PARATRANSIT PROGRAM (ACCESS-A-RIDE)

§5-03 Subscription and Advance-Reservation Trips.

(a) **Subscriptions.** (1) Subscriptions shall be for not less than one one-way trip per week and not more than five round trips per week. The Office of Paratransit Operations may set an expiration date for each subscription, which in no case shall be later than three years after the date the subscription was granted.

(2) The Office of Paratransit Operations may hold one or more lotteries to select subscribers, in which case the lottery pool shall consist of all eligible persons who have applied for an Access-a-Ride subscription.

(b) **Advance-reservation trips.** An advance-reservation trip shall be reserved in advance by a participant not more than three days and not less than one day preceding the trip. Such trip may be provided on a space available basis. A participant may request a same-day trip, which trip the carrier shall also provide on a space-available basis.

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 5 PARATRANSIT PROGRAM (ACCESS-A-RIDE)

§5-06 Eligibility Review Board.

(a) There shall be in the Access-a-Ride program of the Department an eligibility review board (the "Board") consisting of the assistant director of Access-a-Ride, who shall be chairperson, and two persons who shall be appointed by the Director, who shall serve on the Board at the pleasure of the Director, without compensation, and who are not otherwise employed by the Department. One of such two members shall be one of the following: a licensed physician, a license occupational therapist, a licensed physical therapist, a licensed rehabilitation counselor, chiropractor, certified social worker (C.S.W.) or a registered nurse. The other member shall be an eligible passenger. The chairperson shall have the power to exercise or delegate any of his or her functions, powers or duties as chairperson and member of the Board to any employee of the Department, subject to the written approval of the Deputy Commissioner of Transit Operations.

(b) The Director may appoint an alternate member, who shall meet the qualification requirements of paragraph (a) of this section, for any member who is unable to attend a particular meeting. The Director may appoint a replacement member to fill any vacancy on the Board.

(c) A quorum shall consist of a majority of the members of the Board, and any decision of the Board shall be approved by vote of a majority of the board.

(d) Any person who is the subject of a decision of the Department for any of the reasons set forth below may request the Board to review such decision:

(1) a denial of participation in Access-a-Ride because of a decision that he or she does not meet the criteria for

eligibility; or

(2) a termination of participation in Access-a-Ride because of a decision that his or her application was not certified in accordance with the eligibility requirements established by the Transportation Disabled Committee; or

(3) a suspension or termination of participation in Access-a-Ride in accordance with the rules of the Access-a-Ride program.

(e) When a person requests Board review of a Department decision, the Board shall review written materials provided to the Board by the Department and the person who is making the request for review. The Board, in its sole discretion, may request additional information from the Department and/or the person making the request or may provide the person making the request an opportunity to appear before the Board.

(f) After reviewing all information provided, the Board shall make a recommendation to the director of Access-a-Ride, who shall make the final decision. The Director shall inform the person who made the request of the Department's final decision.

CHAPTER 5 PARATRANSIT PROGRAM (ACCESS-A-RIDE)

§5-07 Participant Behavior.

(a) No participant shall perform any act which causes or may tend to cause harm, injury or damage to any other participant in Access-a-Ride, to an employee of an Access-a-Ride carrier or the Access-a-Ride program, or to any vehicle or other property of an Access-a-Ride carrier.

(b) No participant shall cause harm to or interfere with the safe and efficient operation of Access-a-Ride service.

(c) A violation of any of the provisions of this section by a participant may result in the suspension or termination of such participant from Access-a-Ride, at the discretion of the Director.

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 7 REVOCABLE CONSENTS*1

§7-01 Definitions.

Administrative Code. "Administrative Code" means the Administrative Code of the City of New York.

Charter. "Charter" means the New York City Charter.

Commissioner. "Commissioner" means the Commissioner of the Department of Transportation of the City of New York or his or her designee.

Department. "Department" means the Department of Transportation of the City of New York.

DCP. "DCP" means the Department of City Planning of the City of New York.

DoITT. "DoITT" means the Department of Information Technology and Telecommunications of the City of New York.

Improvement. "Improvement" means a tangible thing or object which may be installed on, over or under a street, or any private use of a street.

Public Service Corporation. "Public Service Corporation" means an entity subject to the jurisdiction of the Public Service Commission under the Public Service Law.

Revocable Consent. "Revocable Consent" means a grant of a right, revocable at will, (1) to any person to construct and use for private use pipes, conduits and tunnels under, railroad tracks upon, and connecting bridges over inalienable

property, (2) to an owner of real property or, with the consent of the owner, to a tenant of real property to use adjacent inalienable property for the purposes stated in §7-04 hereof or as may be permitted by rules of DoITT, or (3) to a public service corporation for facilities ancillary to, but not within, a franchise granted prior to July 1, 1990.

ULURP. "ULURP" means the Uniform Land Use Review Procedure as set out in §§197-c and 197-d of the Charter.

Section added City Record May 31, 1991 eff. June 30, 1991.

FOOTNOTES

1

[Footnote 1]: * Chapter 7 (§§7-01-7-14) repealed and added City Record May 30, 2003 eff. June 29, 2003. Note: Statement of Basis and Purpose of Proposed Rules.

The Commissioner of the Department of Transportation is authorized to grant revocable consents with respect to City property under its jurisdiction pursuant to section 364 of Chapter 14 of the New York City Charter. Since 1991 the granting of such revocable consents has been made in accordance with rules promulgated by the Department of Transportation.

These proposed amendments are intended to update and simplify the rules. The standards and rates have been combined with the list of improvements for ease of reference. The rates have increased slightly more than the rate of inflation since they were last amended in 1990. In addition, these amendments streamline the approval process and make the rates and requirements more equitable for revocable consent applicants. After consultation with the Department of City Planning the Department of Transportation is proposing standards for the following improvements: bench, fenced or walled-in area, flagpoles, stoop in landmark district or at landmark building, planted area, planter, post, pole or bollard, accessibility ramp, sockets for poles or stanchions, stoop, step or other entrance detail, street lamp, trash receptacle container and litter receptacle for public use.

On February 10, 2003, Mayor Bloomberg signed Local Law 8 of 2003, which provides for the transfer of authority to issue revocable consents for sidewalk cafes from the Department of Transportation to the Department of Consumer Affairs. Accordingly, these proposed rules for revocable consents make no reference to sidewalk cafes.

CHAPTER 7 REVOCABLE CONSENTS*1

§7-02 Requirement to Obtain a Revocable Consent.

No person or entity shall install or maintain any of the improvements listed in §7-04 of these rules without first obtaining a revocable consent from the Department. The Department shall not issue a revocable consent for any improvement which, in the judgment of DCP, has land use impacts or implications, unless such revocable consent has been reviewed and approved pursuant to ULURP. Revocable consents may not be assigned, transferred or otherwise conveyed without the prior written approval of the Commissioner.

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 7 REVOCABLE CONSENTS*1

§7-03 DCP Review.

(a) The Department shall submit to DCP petitions for those improvements listed in §7-04(a) of these rules that do not meet the locational or dimensional standards in such §7-04(a). The Department shall also submit to DCP all petitions for the following improvements: bridge, above-ground cable, guard booth, information sign/kiosk, parking area for private use, and above-ground pipe/fuel line.

(b) DCP shall review each petition submitted by the Department to determine whether or not a proposed revocable consent has land use impacts or implications and whether, as a result, ULURP applies, and shall notify the Department of its determination. The Department shall notify the petitioner of the determination by DCP regarding the applicability of ULURP and shall stay its final decision pending ULURP approval.

(c) If ULURP is required, the petitioner shall obtain information and application forms pertaining to ULURP from DCP and file a ULURP application with DCP in accordance with the rules governing ULURP.

(d) No revocable consent shall be granted by the Department if the application for such consent has been disapproved pursuant to ULURP. A revocable consent may be granted by the Department if the application for such consent has been approved pursuant to ULURP or if DCP determines the proposed improvement has no land use impacts.

(e) The Department shall submit to DCP for review any petition for a renewal or amendment for an improvement listed in §7-04(a) of these rules where:

(1) such renewal or amendment includes a modification that does not meet a locational or dimensional standard in §7-04(a) or increases the degree of non-compliance with such locational or dimensional standard; or

(2) such petition is for a bridge, above-ground cable, guard booth, information sign/kiosk, parking area for private use, above-ground pipe/fuel line, and the renewal or amendment includes a modification to the location or an increase in the dimension of such improvement; or

(3) such petition is for a renewal or amendment of a consent that was approved by the City Planning Commission for a specific term, and the renewal or amendment would extend the consent beyond the term approved by the Commission.

34 RCNY 7-04

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 7 REVOCABLE CONSENTS*1

§7-04 Eligible Improvements; Standards; Annual Rates.

(a) The Commissioner may, in his or her discretion, grant, renew, modify, or rescind revocable consents for any of the improvements listed in this subdivision to be constructed or maintained on, over, or under City streets, in accordance with the requirements set forth in §364 of the Charter. Except as otherwise provided, annual compensation for the improvements listed in this subdivision shall be as set forth herein and, unless otherwise provided, shall not increase during the term of the revocable consent.

(1) **Accessibility lift to provide access for people with disabilities.**

(i) **Standard.** The lift shall be stored at the building end of its run and shall include appropriate safety devices. The lift shall not extend more than five and one half feet in the direction of the curb from the base of the steps when in use. In no instance shall the lift or any portion thereof extend beyond the curbline when in use.

(ii) **Annual rate.** $25. The annual fee for an accessibility lift shall be in addition to the normal fee for a stoop or stairway.

(2) **Bench.**

(i) **Standard.** No bench shall be greater than six feet in length. Benches greater than four feet in length shall be designed to discourage people from reclining. Benches adjacent and parallel to the building shall be installed no more than six inches from the building face and, if multiple benches are installed, they shall be at least three feet apart. A bench which is not anchored to the sidewalk shall be placed against the building face during hours that the benefited

property is open to the public and shall be stored inside the building when the building is closed.

(ii) **Annual rate.** $150.

(3) **Bridge.**

(i) To be referred to DCP to determine whether the improvement has land use impacts.

(ii) **Annual rate.** See §7-10. If the structure is not in use, the rate shall be 10% of the rate in effect pursuant to the formulas described in §7-10.

(4) **Cable, above-ground.**

(i) To be referred to DCP to determine whether the improvement has land use impacts.

(ii) **Annual rate.** See §7-10.

(5) **Cellar door, including stair.**

(i) **Standard.** All cellar doors required by §27-292(b)(4) of the Administrative Code shall be constructed pursuant to the requirements of the Administrative Code.

(ii) **Annual rate.** See §7-10.

(6) **Clock.**

(i) **Standard.** The base shall be no more than 18 inches in diameter. The lowest portion of the clock face shall be at least eight feet above the sidewalk. The overall height of the clock shall not exceed 15 feet. The clockface shall be no more than two feet in diameter. Time shall be maintained accurately. The name or logo and address of the adjacent premises may be displayed on the clockface; however, the total display space shall be no greater than one third of the square footage of the clockface.

(ii) **Annual rate.** $300.

(7) **Conduit and underground cable.**

(i) **Standard.** All conduit shall be underground.

(ii) **Annual rate.** See §7-10.

(8) **Electrical socket.**

(i) **Standard.** All electrical sockets shall be installed pursuant to the requirements of the New York City Department of Buildings.

(ii) **Annual rate.** $25.

(9) **Enclosure for trash receptacle, adjoining a building, for private use.**

(i) **Standard.** The enclosure shall be of non-flammable construction and shall be rodent proof. The enclosure shall be between three feet and five feet high, except in areas in the Bronx, Queens, Brooklyn and Staten Island zoned for manufacturing, mixed-use (MX), special purpose districts which allow manufacturing, or for automotive or other heavy commercial uses (C8), where the enclosure shall be between three feet and ten feet high, and shall be securely affixed to the sidewalk, fence, building, or other appropriate fixture.

(ii) **Annual rate.** The greater of $5 per square foot of area, as projected onto a horizontal plane or $25, except in areas zoned for manufacturing, where the annual rate shall be $1 per square foot of area, as projected onto a horizontal plane.

(10) **Fenced or walled-in area, including the enclosing structure, not used for planting or parking, including a fenced or walled-in area containing a drainage basin or a shopping cart storage area.** An area enclosed by a privately installed guard rail shall be deemed a fenced-in area and shall be subject to the standards below. Fences may be approved for no more than one year pursuant to the provisions in §2-10(j) of Chapter 2 of this Title 34, provided the placement of such fences is for temporary security purposes.

(i) **Standard.**

(A) The fence shall be no fewer than three and no greater than four feet high in residential and commercial zoning districts and shall be no fewer than three and no greater than ten feet high in manufacturing zoning districts, as such zoning districts are set forth in the Zoning Resolution, except that athletic play field fences may extend as high as 15 feet. Smooth edged finials may be attached to fence posts up to a maximum height of four feet, six inches in residential or commercial zoning districts. No chisel points or spikes shall be included on fences shorter than eight feet, except as approved by the Landmarks Preservation Commission.

(B) The fence shall be constructed of non-flammable, non-wood material. The use of opaque material (such as masonry) is limited to the base of the fence up to 21 inches in height and to vertical columns spaced at least five feet apart. Solid or opaque materials may comprise no more than 35 percent of the total vertical area of the fence above any opaque base. For metal fences, picket interspace shall measure between four and five and three-quarters inches, and picket width may measure up to one inch wide. Chain-link, where approved, shall have a two inch mesh and shall not include screening. Barbed wire is permitted in manufacturing zoning districts only. Razor wire is prohibited.

(C) No sign shall be attached to a fence.

(ii) **Annual rate.**

(A) Except as provided in §7-04(a)(10)(ii)(B), below, the first year's annual rate shall be the greater of $1500 or (C × L × 0.16 × A), as defined in §7-10(a) of these rules, and subsequent years' rates shall be determined in accordance with §7-10(c) of these rules.

(B) For non-commercial use connected to a residential building of six or fewer units, the greater of $100 or (C × L × 0.01 × A), as defined in §7-10(a) of these rules.

(11) **Flagpole.**

(i) **Standard.** The base shall be no larger than 18 inches in diameter and no fewer than 30 inches in height.

(ii) **Annual rate.** None (pursuant to §19-125(e) of the Administrative Code).

(12) **Guard booth.**

(i) To be referred to DCP to determine whether the improvement has land use impacts.

(ii) **Annual rate.** See §7-10.

(13) **Information sign or kiosk.**

(i) To be referred to DCP to determine whether the improvement has land use impacts.

(ii) **Annual rate.** See §7-10.

(14) **Litter receptacle for public use.**

(i) **Standard.** The litter receptacle shall be constructed of non-flammable, non-wood material and shall be securely affixed to the sidewalk or sufficiently heavy to prevent movement without considerable force. The minimum height of the receptacle shall be two feet, six inches, the maximum height shall be four feet and the maximum width shall be three feet, with an overall area not to exceed nine square feet. No side of the receptacle shall exceed three feet in width. The litter receptacle may include the grantee's logo and/or building or institution name no greater than one square foot in size, if the receptacle is adjacent to the named property.

(ii) **Annual rate.** $25.

(15) **Overhead Building Projection in excess of that allowed by the Administrative Code.**

(i) **Standard.** Overhead building projections shall be permitted over the street provided the minimum height above the siewalk is ten feet and the depth of the projection does not exceed three feet ten inches, inclusive of any depth permitted by §27-313(a) of the Administrative Code, to a height 30 feet above the sidewalk. Above 30 vertical feet the permitted depth shall be four feet, ten inches, inclusive of any depth permitted by the Administrative Code. Except for architectural details such as cornices, brackets and belt courses, which may extend across the full street frontage of a building, projections shall not have an aggregate width at any level of the building greater than 50 percent of the building frontage. Projections containing floor area shall be referred to DCP.

(ii) **Annual rate.** See §7-10.

(16) **Parking area for private use for non-residential property (if there is no charge to vehicle operator).**

(i) To be referred to DCP to determine whether the improvement has land use impacts.

(ii) **Annual rate.** The first year's annual rate shall be the greater of $600 or (C × L × 0.36 × A), as defined in §7-10(a) of these rules, and subsequent years' rates shall be determined in accordance with §7-10(c).

(17) **Pipe or fuel pipeline, above-ground.**

(i) To be referred to DCP to determine whether the improvement has land use impacts.

(ii) **Annual rate.** See §7-10. If the grantee is not using the structure, the Department may set rates without reference to the formulas described in §7-10.

(18) **Planted area, including any surrounding fence or wall.**

(i) **Standard.** Live vegetation shall occupy 80 percent of the area. No vegetation may overhang a sidewalk beyond the boundary of the planted area, including any fence, unless the overhanging vegetation is at least eight feet above the adjacent sidewalk area. No rocks, timbers, wickets (hoops) or other trip hazards shall serve as a border. Any surrounding fence or wall shall conform to the standards provided in item (10), above.

(ii) **Annual rate.** The greater of $2 per square foot of area, as projected onto a horizontal plane, or $25.

(19) **Planter that is larger than two feet in diameter or that occupies more than four square feet in area.** Planters may be approved for no more than one year pursuant to the provisions in §2-10(j) of Chapter 2 of this Title 34, provided the placement of such planters is for temporary security purposes. (Smaller planters may be approved through a permit obtained from the Department.)

(i) **Standard.**

(A) The planter shall be no fewer than 18 and no greater than 48 inches high. The maximum area, measured at the planter's widest point, shall be 25 square feet, and the maximum dimension of the planter shall be five feet along the side which is perpendicular to the curb or eight feet along the side which is parallel to the curb. (Planters installed against the building face may be continuous.)

(B) If a planter is proposed to be placed above a sidewalk vault, a professional engineer shall certify that the sidewalk can support a 600-pound per square foot live load.

(C) No planter shall be constructed of wood. Wood cladding of other planter types is permitted if such cladding is fireproof and graffiti resistant. Concrete tubs, two inches thick, are recommended.

(D) The Department recommends the planting of small shrubs and flowers as they require less maintenance and are hardier than small trees. No woody growth shall overhang the edge of the planter. Suggested tree species for planters are: Crab Apples (Florida Snow Drift); Euonymus Pateris (Shrub); Taxus O. Densifornius (Japanese Yew); Scotch Pine; Austrian Pine; Ilex Meserva; Cornus Mass (Corneliean Dogwood); Syringia Reticulata (Japanese Tree Lilac); Prunus Sargentii (Columnaris); Acer Ginnala (Amur Maple); Acer Truncatum; Viburnum Sieboldii (Tree Form Viburnum).

(E) Planters shall be maintained, shall contain live plants at all times and shall be kept free of debris and graffiti.

(ii) **Annual rate.** The greater of $2 per square foot of area as projected onto a horizontal plane, or $25 per planter.

(20) **Post, pole or bollard not otherwise governed by permit procedures contained in §19-125 of the Administrative Code.**

(i) **Standard.** The post, pole or bollard shall be no fewer than 30 inches high, no greater than 48 inches high, and no greater than 18 inches in diameter. If more than one post, pole or bollard is to be installed, they shall be at least four feet apart and shall not be joined with horizontal members. If a concrete-filled pipe design is used, it shall be capped or smoothed.

(ii) **Annual rate.**

(A) $125 each, minimum of $500 per consent.

(B) Post, pole or bollard adjacent to a building containing a marquee pursuant to a permit granted by the Department of Buildings, $25 each, minimum of $100 per consent.

(21) **Public service corporation facility ancillary to, but not within, a franchise granted prior to July 1, 1990.**

(i) **Standard.** Refer to standards in this section for individual structures.

(ii) **Annual rate.** See §7-10. This rate shall not apply to revocable consents approved as provided in subdivision (b) of this section.

(22) **Railroad tracks for private use.**

(i) **Standard.** Railroad tracks shall be located in an M or C8 zoning district outside any area improved for vehicular or pedestrian use, except that tracks may cross an existing or future driveway with the permission of the property owner served by such driveway.

(ii) **Annual rate.** The first year's annual rate shall be the greater of $500 or ($C \times L \times 0.04 \times A$), as defined in §7-10(a) of these rules, and subsequent years' rates shall be determined in accordance with §7-10(c).

(23) **Ramp intended to provide access for people with disabilities.**

(i) **Standard.**

(A) The Department may grant a revocable consent for a ramp which extends more than 44 inches from the building line for buildings erected prior to December 6, 1969, including any additional steps attached or ancillary to the ramp structure made necessary by the creation of the ramp. (§27-308 of the Administrative Code permits ramps to extend up to 44 inches from the building line for such buildings.) (Buildings erected after December 6, 1969 must contain ramps within the property line.)

(B) In the case of buildings erected between December 6, 1969 and September 5, 1987, the Department may grant a revocable consent for a ramp which extends more than 44 inches from the building line if the ramp will make a primary entrance to the building accessible.

(C) The ramp shall conform to the standards of the Americans With Disabilities Act, 36 CFR Part 1191, and §27-308 of the Administrative Code. A canopy may be erected above the ramp provided such canopy does not fully enclose the ramp and provided such ramp is adequately illuminated and complies with all other applicable regulations.

(ii) **Annual rate.** $25.

(24) **Retaining walls.**

(i) **Standard.** Retaining walls may be constructed only where warranted by existing grade or by a change in grade undertaken with prior approval by the Department of Buildings.

(ii) **Annual rate.** See §7-10.

(25) **Sidewalk plaque or logo.**

(i) **Standard.** The size of the logo or plaque shall not exceed nine square feet with a maximum dimension of three feet along any side. The plaque or logo shall be limited in design and content to a symbol or other element referring to or naming the adjoining property owner, a district organization, the district/neighborhood character, or consistent with an area-wide way-finding graphic design system. The plaque or logo shall consist of material that provides a stable, firm and slip-resistant surface and shall be installed flush with the sidewalk surface.

(ii) **Annual rate.** $300 per plaque or logo.

(26) **Socket with removable poles, posts, or similar devices, including any connecting devices such as ropes, ribbons, horizontal poles, and the area thereby enclosed.**

(i) **Standard.** Sockets shall be flush with the sidewalk and fitted with spring-mounted flush covers. Posts or poles shall be no fewer than 30 inches and no greater than 48 inches high, including any connecting devices.

(ii) **Annual rate.** The first year's annual rate shall be the greater of $750 or ($C \times L \times 0.16 \times A$), as defined in §7-10(a) of these rules, where A is the area of the enclosed area, and subsequent years' rates shall be determined in accordance with §7-10(c).

(27) **Stoop, step, ramp, vestibule or other entrance detail extending beyond limits set in Articles 8 and 9 of Subchapter 4 of Chapter 1 of Title 27 of the Administrative Code, other than a ramp described in §7-04(a)(23) hereof or a stoop or other improvement described in §7-04(a)(29) hereof.**

(i) **Standard.** Such structures shall be constructed pursuant to the requirements of the New York City Department of Buildings and shall have a maximum width of eight feet and shall extend as far as such structures on adjacent

buildings.

(ii) **Annual rate.** See §7-10.

(28) **Stoop or any other improvement eligible for a revocable consent pursuant to these rules and adjacent to a building which is located within a designated New York City historic district or which is a designated New York City landmark.**

(i) Standard. No revocable consent shall be granted for such a structure located in a designated New York City historic district or attached to a designated New York City landmark building without the prior written approval of the Landmarks Preservation Commission pursuant to Chapter 3 of Title 25 of the Administrative Code. Refer to standards in this section for individual structures.

(ii) **Annual rate.** $25 for residential buildings with fewer than six units. For all other buildings, see the appropriate paragraph of this subdivision.

(29) **Street lamp or light fixture.**

(i) **Standard.** Street lamps or light fixtures which replace or augment existing lighting shall be placed and illuminated as approved by the Department's Division of Street Lighting. The base shall be no greater than 18 inches in diameter. Hours of illumination shall coincide with those of the City's street lights.

(ii) **Annual rate.** $150.

(30) **Tunnel.**

(i) **Standard.** All tunnels and related structures shall be constructed underground or within the adjacent building pursuant to the requirements of the New York City Department of Buildings.

(ii) **Annual rate.** See §7-10. If the structure is not in use, the rate shall be 10% of the rate in effect pursuant to the formulas described in §7-10.

(31) **Vault extending beyond the curbline or underground improvement not otherwise governed by license procedures contained in §19-117 of the Administrative Code.**

(i) **Standard.** All vaults shall be constructed underground pursuant to the requirements of the New York City Department of Buildings.

(ii) **Annual rate.** See §7-10.

(32) **Any improvement listed in §7-04 for which a consent is proposed to be granted where the grantee has filed an application concerning the subject property pursuant to §4-105 of the Administrative Code, or any improvement listed in §7-04 of these rules where the construction of such improvement was funded 50 percent or more by a City agency.**

(i) **Standard.** Refer to standards listed above for individual structures.

(ii) **Annual rate.** The Department may set rates for such consents without reference to the formulas described in §7-10; such rates shall be set forth in the agreements memorializing the consents.

(33) **Any improvement listed in §7-04 which has been approved for use for security purposes by the New York City Police Department.**

(i) **Standard.** Refer to standards listed above for individual structures.

(ii) **Annual rate.** None.

(b) **Other improvements approved by the Board of Estimate.** Revocable consents that were granted by the Board of Estimate prior to July 1, 1990 for private improvements which are not listed in subdivision (a) above may be renewed, amended, or revoked by the Commissioner in his or her sole discretion, provided that any renewal or amendment shall be submitted to DCP when required pursuant to §7-03 of these rules. In each year of such consent, the annual rate shall increase by the average of the Consumer Price Index for All Urban Consumers in New York and New Jersey published by the U.S. Department of Labor's Bureau of Labor Statistics ("CPI") increase for the ten years prior to the date of the renewal of the consent.

(c) **Compliance with requirements.** All improvements for which a revocable consent is granted shall comply with the general conditions in §7-06 of these rules.

DERIVATION

Former §7-04 became §7-05.

See Derivation for §7-02 for this section.

NOTE

1. Statement of Basis and Purpose in City Record July 26, 2005:

The Commissioner of Transportation is authorized to grant revocable consents with respect to City property under its jurisdiction pursuant to §364 of Chapter 14 of the New York City Charter. Since 1991 the granting of such revocable consents has been made in accordance with rules promulgated by the Department of Transportation.

The annual rates for a bridge, planter, sidewalk plaque or logo, stoop and step or other entrance detail and tunnel rules are amended to more accurately reflect how the rates are calculated. Paragraph thirty-two, which refers to improvements funded 50% or more by a government agency, is being amended to read City agency to reflect current Department policy.

After consultation with the Department of City Planning, the Department is also proposing to amend standards for trash receptacle containers. This rule is being amended to allow for larger trash receptacle containers in districts zoned for manufacturing and in other districts that allow manufacturing because these types of districts have different needs than other districts. It is anticipated that this change will better fit the intent of the original rule as applied to manufacturing districts and other districts that allow manufacturing.

2. Statement of Basis and Purpose in City Record Oct. 17, 2005: The Commissioner of Transportation is authorized to grant revocable consents with respect to City property under its jurisdiction pursuant to §364 of Chapter 14 of the New York City Charter. Since 1991 the granting of such revocable consents has been made in accordance with rules promulgated by the Department of Transportation. Security concerns have grown citywide, as have the number of buildings installing structures for security purposes. The Department will grant consents for structures approved for these purposes by the Police Department and will not charge either an annual rate or a filing fee.

FOOTNOTES

1

[Footnote 1]: * Chapter 7 (§§7-01-7-14) repealed and added City Record May 30, 2003 eff. June 29, 2003. Note: Statement of Basis and Purpose of Proposed Rules.

The Commissioner of the Department of Transportation is authorized to grant revocable consents with respect to City property under its jurisdiction pursuant to section 364 of Chapter 14 of the New York City Charter. Since 1991 the granting of such revocable consents has been made in accordance with rules promulgated by the Department of Transportation.

These proposed amendments are intended to update and simplify the rules. The standards and rates have been combined with the list of improvements for ease of reference. The rates have increased slightly more than the rate of inflation since they were last amended in 1990. In addition, these amendments streamline the approval process and make the rates and requirements more equitable for revocable consent applicants. After consultation with the Department of City Planning the Department of Transportation is proposing standards for the following improvements: bench, fenced or walled-in area, flagpoles, stoop in landmark district or at landmark building, planted area, planter, post, pole or bollard, accessibility ramp, sockets for poles or stanchions, stoop, step or other entrance detail, street lamp, trash receptacle container and litter receptacle for public use.

On February 10, 2003, Mayor Bloomberg signed Local Law 8 of 2003, which provides for the transfer of authority to issue revocable consents for sidewalk cafes from the Department of Transportation to the Department of Consumer Affairs. Accordingly, these proposed rules for revocable consents make no reference to sidewalk cafes.

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 7 REVOCABLE CONSENTS*1

§7-06 General Conditions.

(a) **Advertising prohibited.** No advertising shall appear on any improvement which is the subject of a revocable consent agreement.

(b) **Maintenance.** Graffiti shall be removed within seven days of appearance. Art Commission approved colors shall be used and maintained. Sidewalks fronting the entire property must be in good condition, without violations or illegal encroachments.

(c) **Clearances for above-ground structures.**

(1) **Corner clearance policy.** No revocable consent will be granted for above-ground structures located within the corner quadrant (the area ten feet from either side of the area created by extending the building line to the curb) pursuant to Executive Order #22 of 4/13/95, as amended.

(2) Improvements shall be at least 18 inches from the curb line (front face of curb).

(3) **Clear path.** A straight unobstructed path ("clear path") for pedestrian circulation on the sidewalk shall remain after the installation of the improvement. The minimum width of the clear path shall be the greater of eight feet or one-half of the sidewalk width. The minimum width of the clear path shall be the greater of ten and one-half feet or one-half of the sidewalk width where a bench, information kiosk or bicycle rack with bicycles parallel to the curb or a queuing area enclosed by poles abuts the clear path. The minimum width of the clear path shall be the greater of $12^{1}/_{2}$ feet or one-half of the sidewalk width where a bicycle rack with bicycles perpendicular to the curb abuts the clear path.

The clear path shall be maintained for 15 feet to either side of the improvement. When possible, the improvement shall abut, be aligned with, or be located between other major obstructions such as subway entrances, bus stop shelters, newsstands, and sidewalk cafes.

(4) Improvements shall not be located under fire escapes.

(5) (i) The following minimum distances shall be required between the revocable consent improvement and the specified element or object, except as otherwise specified herein:

Subway Entrance (open side)

15'

Sidewalk Cafes

15'

Newsstand

15'

Bus Stop (with/without shelter)

15'

Fire Hydrant/Standpipe

10'

Driveway 10'

Bicycle Rack (including all bicycles)

8'

Street Tree

5'

Bench

5'

Principal Building Entrance

5'

Ramp intended to provide access for people with disabilities

5'

Subway Entrance (closed end or side)

5'

Public Telephone

5'

Planters on the sidewalk not adjacent to the building fa;alcade

5'

Mail Box

4'

Street Lights

4'

Parking Meters

4'

Edge of Tree Pit

3'

Street Signs

3'

Utility Hole Covers, Cellar Doors, Areaways

3'

Transformer Vault, Sidewalk Grates

3'

All Other Legal Street Furniture

5'

(ii) Benches, information kiosks, litter receptacles, mail boxes, planters and public telephones may be located in an aligned grouping with a reduced minimum clearance between them of three feet. Other structures may be incorporated into such groupings provided the minimum clearances in subparagraph (i) above are provided. In no case shall such groupings extend for a length greater than 30 feet along the sidewalk. The listed elements may also be combined, without separation, into a single structure provided the overall length of such unitary structure and any other of the listed elements outside the grouping or unitary structure shall be no more than 15 feet. In no case shall a grouping or unitary structure be less than 15 feet from another grouping or unitary structure.

(d) **Waiver.**

(1) Where strict compliance with these rules shall create undue hardship, the Commissioner may waive or modify these rules, in specific cases, except where prohibited by law, if in his/her opinion, the public health, safety and general welfare will not be endangered thereby. The petitioner shall request such waiver in writing and shall provide any information requested by the Department which may assist the Commissioner in his or her determination.

(2) Notwithstanding the above provisions, prior to waiving the standards or rules related to the location or dimensions of improvements, the Department shall refer the proposed change to DCP for review.

***** Current through December 2009 ****

34 RCNY 7-07

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 7 REVOCABLE CONSENTS*1

§7-07 Application Requirements.

(a) **Petition form.** An application for a new revocable consent or for a renewal, modification, assignment or rescission of an existing revocable consent shall be made on a petition form obtained from the Department, and shall be signed by the petitioner or a person authorized to enter into binding agreements on behalf of the petitioner. In the case of a new consent, the petitioner shall submit the original plus ten copies of the completed form; in the case of a renewal, modification, assignment or rescission, petitioner shall submit the original plus five copies.

(b) **Business certificates.** The petitioner shall submit a copy of any applicable business certificate, such as a certificate of incorporation or partnership certificate. With respect to petitions for an assignment or transfer of a revocable consent, the petitioner shall submit a copy of the business certificate of the assignee or transferee.

(c) **Plans.**

(1) Paper or mylar prints of a plan shall be submitted in the equivalent number of prints as are required for the petition form. Each plan print shall measure 18 by 24 inches unless otherwise authorized by the Department.

(2) The plan shall bear the seal of a Professional Engineer or Registered Architect licensed by the State of New York.

(3) The plan shall be drawn to scale and shall indicate the block and lot number of the property of the petitioner. The plan shall indicate in detail the method of construction, applicable technical information, and the materials to be used. A title box shall be placed on the right hand side of each sheet containing the words "Plan Showing Location of

Proposed (structure type) to be Constructed in (name of street), Borough of (borough), to Accompany Application of (petitioner's name), dated (petition date), to the Department of Transportation of the City of New York" and shall indicate the date it was prepared and any subsequent revisions.

(4) All details of existing structures shall be shown in standard line thickness. All proposed new construction and existing structures which are the subject of the petition shall be plainly shown in red. Proposed removals or relocations, if any, of existing conduits, pipes lines, or other structures shall be clearly indicated by red dashed lines.

(5) The plan shall show the building lines and curb lines, railroad tracks, and, if applicable, any electrical conduits, sewers and other substructures in the street which may be affected in any manner by the proposed construction. All such information shall be obtained and verified by the petitioner. The location, character and dimensions of all such structures and substructures shall be accurately shown and indicated by dimensions on the plan.

(6) The plan shall include longitudinal and transverse sections to show the relative position of the existing structures in the street and the proposed new construction.

(7) The applicant shall provide photographs of the existing conditions and may be required to provide photo simulations of the proposed structure and its surroundings as they would appear after installation.

(8) The plan shall also include the Profesional Engineer's or Registered Architect's estimate of the current cost to remove or deactivate the proposed improvement and restore all sidewalks and pavements to current Department standards for new construction. Alternatively, the cost of removal may be provided on a separate sheet of paper provided that it is signed and sealed by a Professional Engineer or Registered Architect.

(9) Following the installation of any improvement for which a consent has been granted, the petitioner shall submit to the Department two copies of a plan indicating the "as built" condition. Such plan shall include any changes approved by the Department, with any deviations from the original plan shown by a double red line. Such plan shall be signed, sealed and dated by a Professional Engineer, Registered Architect or a Licensed Land Surveyor and shall include a certification which reads: "This drawing represents the as-built condition and shows the actual location of all subsurface conditions uncovered during this installation."

(d) **Pedestrian congestion.** The Department may require a petitioner to submit additional information concerning pedestrian density and volume as well as the width of the usable pedestrian path at the site of a proposed revocable consent structure. The Department may require that such information include a pedestrian flow analysis conducted according to the performance standards described in the Transportation Research Board's Highway Capacity Manual chapter on pedestrian flow.

(e) **Additional copies and information.** Upon the request of the Department, the petitioner shall provide additional copies of the petition and/or plan. The petitioner shall also provide any additional supporting information requested by the Department or by DCP, where referral has been made to DCP.

(f) **Waiver of plan requirements.** For petitions concerning minor improvements, such as planters, trash and litter receptacles, or benches, the Department may waive the requirement that the plan be prepared by a Professional Engineer or Registered Architect where such submission is not otherwise required by law, and where the petitioner has requested a waiver in writing.

(g) **Exception.** The requirements of this section shall not apply to revocable consents for public service corporation facilities ancillary to, but not within, a franchise, if the revocable consent covers multiple structures whose locations are not known at the time of the granting of the consent. Plans for each such structure shall be submitted prior to construction and shall meet the requirements of Chapter 2 of Title 34 of the Rules of the City of New York.

***** Current through December 2009 ****

34 RCNY 7-09

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 7 REVOCABLE CONSENTS*1

§7-09 Action by the Department.

(a) The Department shall, within 30 calendar days of receipt of a complete petition for a revocable consent, forward a copy of such petition to: the Borough President for the borough in which the proposed improvement is to be located; all Community Boards in whose districts the proposed improvement is to be located; DCP, if required to do so pursuant to §7-03; and all other City agencies affected by the proposed consent. The Department shall allow 30 calendar days for the Borough President, Community Board, and other affected agencies to comment on the petition.

(b) The Department shall inform the petitioner in writing of all objections. Review of the petition shall be stayed until all objections are resolved. The petitioner shall be given the opportunity to revise the petition or plan in order to resolve the objection(s). If any objection has not been resolved within 90 days from the date the petitioner was informed of the latest objection, such petition may, in the discretion of the Department, be deemed to have been withdrawn.

(c) Prior to granting any revocable consent or renewal or modification to the location or an increase in the dimension of an improvement, the Department shall hold a public hearing on the terms and conditions of the proposed revocable consent agreement. Notice of such hearing shall be published by the Department at the expense of the petitioner in accordance with §371 of the Charter.

(d) Notwithstanding the foregoing, the Department may deny a petition for a revocable consent without a hearing if, in the sole judgement of the Commissioner, the grant of such consent would interfere with the use of the inalienable property of the City (including streets and sidewalks) for public purpose or would otherwise not be in the best interest of the City.

(e) The revocable consent agreement shall be filed by the Department with the appropriate County Clerk.

Title 34 Department of Transportation

CHAPTER 7 REVOCABLE CONSENTS*1

§7-10 Annual Rate Schedule for Revocable Consent Improvements.

For all improvements that do not have an annual rate set forth in §7-04(a), the annual rate of compensation for the first year of the term of each revocable consent shall be calculated in accordance with the following:

(a) **Definitions and variables.**

"A" means the maximum area of the improvement for which a consent has been or is proposed to be granted, as projected onto a horizontal plane (the "footprint").

"Benefited Property" means the real property which is adjacent to the improvement for which a revocable consent has been or is proposed to be granted, and which is benefited by the improvement.

"C" means 100 percent plus the percent change (plus or minus) in the Consumer Price Index for All Urban Consumers in New York and New Jersey published by the U.S. Department of Labor's Bureau of Labor Statistics ("CPI") on July 1 of the year for which the revocable consent annual rate is being calculated, compared to the CPI on July 1, 2003.

"E" means the standard escalating factor, which shall be a percentage equal to the average annual percentage increase in the CPI for the ten years immediately preceding the year for which the standard escalating factor is being determined; the Department shall determine the standard escalating factor on July 1 of the year to be applied to all consents granted or renewed between that July 1 and the next succeeding June 30, inclusive.

"L" means the Current Transitional Assessed Value or the Actual Assessed Value, whichever is lower, of the Benefited Property, in its unimproved state (in dollars and cents per square foot); provided, however, that if there is more than one Benefited Property, "L" shall be equal to the average of the Current Transitional Assessed Values of all the Benefited Properties in their unimproved states (in dollars and cents per square foot). Note: For cables contained within conduit owned by another entity, L=0.

"M" means the applicable multiplier. For pipes and conduits with up to 25 square feet in cross-sectional area, the applicable multiplier is 0.04. For all other improvements, the applicable multiplier is 0.08.

"Minimum Annual Charge" shall be assessed as follows: For improvements having a maximum cross-sectional area greater than four square feet, the Minimum Annual Charge shall be $3,000. For improvements having a maximum cross-sectional area of four square feet or less, the Minimum Annual Charge is $1,500, except that pipes and conduits having an outside diameter of three inches or less (inclusive of any protective sheath or casing) shall be assessed a Minimum Annual Charge of $750.

"R1" means the rate of compensation for the first year of the revocable consent agreement which shall be determined in accordance with §7-10(b), below.

"V" means the rate (in dollars and cents) obtained from Table A relating to the volume occupied by the improvement. For improvements exceeding nine feet in height, the computation will be made in units up to nine feet in height and then added together.

(b) **Rate for first year.** R1 shall equal C[V + (L × M × A)], or the Minimum Annual Charge, whichever is greater.

(c) **Rate for each subsequent year.**

second year = R1 + (E × R1)

third year = R1 + (2E × R1)

fourth year = R1 + (3E × R1)

fifth year = R1 + (4E × R1)

sixth year = R1 + (5E × R1)

seventh year = R1 + (6E × R1)

eighth year = R1 + (7E × R1)

ninth year = R1 + (8E × R1)

tenth year = R1 + (9E × R1)

(d) **Consents granted on or prior to June 30, 1991.** For those consents granted on or before June 30, 1991 which provide for annual fees to be computed based upon the rate schedule currently in effect, annual compensation shall equal R1 as calculated pursuant to §7-10(b).

(e) **Revenue.** All revocable consent revenue shall be collected by the Department.

Table A

Length	Cross-Section Area Up to 1.4 sq.	1.4 to 4	4 to 20 sq.	20 to 81	81 to 162 sq.	162 to 243	Smaller Pipes up to 3"

in feet	ft.	sq. ft.	ft.	sq. ft.	ft.	sq. ft.	
Up to 100'	$13.90 per ft.	$27.83 per ft.	$34.78 per ft.	$41.72 per ft.	$69.56 per ft.	$83.48 per ft.	$7.26 per ft.

DERIVATION

Former §7-09 amended City Record Apr. 22, 1993 eff. May 22, 1993, added City Record May 31, 1991 eff. June 30, 1991.

FOOTNOTES

1

[Footnote 1]: * Chapter 7 (§§7-01-7-14) repealed and added City Record May 30, 2003 eff. June 29, 2003. Note: Statement of Basis and Purpose of Proposed Rules.

The Commissioner of the Department of Transportation is authorized to grant revocable consents with respect to City property under its jurisdiction pursuant to section 364 of Chapter 14 of the New York City Charter. Since 1991 the granting of such revocable consents has been made in accordance with rules promulgated by the Department of Transportation.

These proposed amendments are intended to update and simplify the rules. The standards and rates have been combined with the list of improvements for ease of reference. The rates have increased slightly more than the rate of inflation since they were last amended in 1990. In addition, these amendments streamline the approval process and make the rates and requirements more equitable for revocable consent applicants. After consultation with the Department of City Planning the Department of Transportation is proposing standards for the following improvements: bench, fenced or walled-in area, flagpoles, stoop in landmark district or at landmark building, planted area, planter, post, pole or bollard, accessibility ramp, sockets for poles or stanchions, stoop, step or other entrance detail, street lamp, trash receptacle container and litter receptacle for public use.

On February 10, 2003, Mayor Bloomberg signed Local Law 8 of 2003, which provides for the transfer of authority to issue revocable consents for sidewalk cafes from the Department of Transportation to the Department of Consumer Affairs. Accordingly, these proposed rules for revocable consents make no reference to sidewalk cafes.

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 8 EMPLOYEE COMMUTE OPTIONS PROGRAM

§8-01 Background and Authority.

Section 182(d)(1)(B) of the Clean Air Act Amendments of 1990, 42 U.S.C. 7511(a)(d)(1)(B), requires states with severe or extreme nonattainment areas for ozone to revise their state implementation plans by adopting new regulations to reduce work-related vehicle trips and miles traveled by employees. The New York State Consolidated Metropolitan Statistical Area, which includes New York City was designated by the Federal Environmental Protection Agency ("EPA") as a severe ozone nonattainment area, 40 C.F.R. §81.333. Section 14(31) of the New York State Transportation Law authorizes the State Department of Transportation to promulgate rules and regulations to implement the requirements of §182(d)(1)(B) of the Clean Air Act Amendments and to establish an employee commute options ("ECO") program. The state rules require employers of one hundred or more employees at work locations within severe ozone nonattainment areas in New York State to develop and implement employee trip reduction programs and to make a good faith effort to achieve a twenty-five percent increase in average vehicle occupancy for commuting trips by November 15, 1996. The state transportation law and the rules promulgated pursuant to it also delegate the local administration of the program to counties in the severe ozone nonattainment areas and pursuant to such delegation, the New York City Department of Transportation ("the Department") has been designated the local administrative agency.

Title 34 Department of Transportation

CHAPTER 8 EMPLOYEE COMMUTE OPTIONS PROGRAM

§8-02 Applicability.

This chapter shall apply to any affected employer in the City of New York who is subject to the ECO rules of the New York State Department of Transportation, codified at 17 NYCRR Part 38. This chapter shall apply with respect to any and all affected worksites. Pursuant to 17 NYCRR §38.4(b)(3), the counties of New York (Region 1) and Bronx, Kings, Queens, and Richmond (Region 2) shall be consolidated into a single region consisting of the subregions identified in table one below.

AVO AND TARGET APO METHODOLOGIES

ESTABLISHING AVO VALUES

The 1994 AVO values were established by applying the methodolgy mandated by the New York State Dept. of Transportation Employee Commute Options Regulations. These Regulations require the use of United States Census Journey-to-Work data for 1980 and 1990 to estimate the number of employees and the number of vehicles used to get to

work in 1994. The method consists of subtracting 1980 total workers from 1990 total workers, and dividing the result by the number of years (ten, in this case), thereby yielding an "annual change." This "annual change" then is used to project the number of employees for 1994 by adding the "annual change" multiplied by the number of years (four, in this case) to 1990 total workers.

A comparable process is used to estimate the number of vehicles used to get to work. The projected number of workers in 1994 then is divided by the projected number of commuter vehicles in 1994 to establish the 1994 AVO. It is important to note that these projected numbers are not intended to represent actual employment or vehicle numbers for 1994, but are solely for the purpose of establishing an AVO.

ESTABLISHING TARGET APOs

Target APOs are also derived following the methodology mandated by the New York State Regulations. The target APO for the region equals the regional AVO multiplied by 1.25. Reaching the APO target is equivalent to reducing the number of vehicles to the "permitted" number. The "permitted number" of vehicles equals the number of employees at all worksites with 100 or more employees, divided by the target APO. We are required to calculate the number of "permitted" vehicles in order to determine whether achieving Target APOs for all the subregions taken together would reduce the number of commuter vehicles to the level required to meet the APO Target for the region.

Target APOs for each subregion were established by increasing the AVO for each subregion by between 10 and 25%.

(a) Each affected employer shall submit its annual fee on the date its initial compliance plan is submitted, and thereafter on each subsequent anniversary of such date.

(b) Fees are as follows:

(1) for employers with one thousand one (1,001) or more affected employees, the fee shall be two thousand dollars ($2000.00);

(2) for employers with five hundred one (501) to one thousand (1,000) affected employees, the fee shall be twelve hundred dollars ($1200.00);

(3) for employers with two hundred fifty-one (251) to five hundred (500) affected employees, the fee shall be six hundred dollars ($600.00);

(4) for employers with thirty-three (33) to two hundred and fifty (250) affected employees, the fee shall be three hundred dollars ($300.00);

(c) Fees shall be reduced by fifty percent (50%) of the amount due for all affected employers submitting plans not later than August 15 of the year a submission is due. Fees shall be reduced by thirty-three and one third percent (33 1/3%) of the amount due for all affected employers submitting plans not later than September 15 of the year a submission is due. Fees shall be reduced by twenty percent (20%) of the amount due for all affected employers

submitting plans not later than October 15 of the year submission is due. Fee reductions shall be available only in years when such plans are required to be filed.

(d) An affected employer filing a consolidated plan or report shall submit a fee equal to the total of the fees that the affected employer would pay if filing separate plans or reports for each affected worksite.

(e) Fees shall be in the form of a company check, bank check, money order, or other form of payment acceptable to the commissioner, made payable to the New York City Department of Transportation. Cash and credit card payments shall not be accepted.

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 8 EMPLOYEE COMMUTE OPTIONS PROGRAM

§8-09 Penalties.

(a) The Department shall send a notice of violation fo any provision of this chapter by registered mail to the affected employer. Such notice shall specify the nature of the violation and the fine due.

(b) Failure of an affected employer to comply with the requirements specified in the rules of the ECO program at 17 NYCRR §38.11(a) shall constitute a violation of such rules. The civil penalty for each violation shall be no less than fifty cents ($.50) and no more than one dollar ($1.00) per employee per day for each affected work site, not to exceed five hundred dollars ($500.00) per day for each affected worksite.

(c) Failure of an affected employer to register pursuant to 17 NYCRR §38.3(b) shall constitute a violation of such rules. The penalty for such violation shall not exceed one dollar ($1.00) per employee per day for each affected work site, not to exceed five hundred dollars ($500.00) per day for each affected worksite.

34 RCNY 8-10

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 8 EMPLOYEE COMMUTE OPTIONS PROGRAM

§8-10 Department Conference.

(a) Any affected employer who receives a notice of violation may request a conference with the Commissioner or his/her representative at which the employer shall have the opportunity to explain or justify the actions that are the subhect of the notice. Such request must be made in writing and sent by registered mail within thirty (30) days of the date of receipt of such notice. If a conference is not requested, the full amount of the penalty shall be due not later than thirty days from the receipt of the notice.

(b) Any employer who, within thirty (30) days of the date of any notice of violation, fails either to pay the penalty stated in the notice or request a conference with the Department in writing, shall be liable for the penalties specified in the notice. Such employer shall be liable for additional penalties for the continuing violation of the rule until the violation is corrected.

RULES OF THE CITY OF NEW YORK

Title 34 Department of Transportation

CHAPTER 8 EMPLOYEE COMMUTE OPTIONS PROGRAM

§8-11 Hearings.

(a) Any affected employer who has received a notice of violation from the Department, has had a Department conference, and does not consent to a settlement agreement with a settlement officer, may appeal the determination of the Department, as provided in 17 NYCRR §38.13, by requesting a hearing with the New York City Office of Administrative Trials and Hearings ("Oath"). A petition appealing the determination, as well as a copy of the notice of violation, and the factual findings and decision of the Department shall be filed with OATH, with proof that copies were sent to the Department, not later than fifteen (15) days after the date of the settlement offer of the Department.

(b) Hearings to review decisions of the Department shall be conducted by OATH in accordance with its rules of practice and procedure, except that for the purposes of this chapter, (i) the petition shall be deemed to consist of the notice of violation and the factual findings and decision of the Department filed by the affected employer, (ii) the answer shall be deemed to consist of the employer's petition appealing the decision, (iii) the Department shall be deemed the petitioner, and (iv) the affected employer shall be deemed to be the respondent. Notwithstanding the provisions of §1-23, subdivision (a) of OATH's rules (48 RCNY §1-23, subdivision (a)), the Department shall not be required to serve the petition on the respondent. Notwithstanding the provisions of §1-26, subdivision (d) of OATH's rules (48 RCNY §1-26, subdivision (d)), the employer shall not place the case on OATH's trial or conference calendar **ex parte.**

(c) The proceeding at OATH shall be **de novo** and the determination of OATH shall be final.

35 RCNY 1-01

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-01 Definitions.

Accessible taxicab. An "accessible taxicab" is a taxicab that complies with section 3-03.2 of this title.

Adequate Mail Notice to Claimant. "Adequate mail notice to claimant" shall mean for the purposes of §1-81 of this chapter, notice by certified mail, return receipt requested, with a copy by regular mail and with a copy to the Commission, attention legal department, transfer division, to holders of claims that may be excess claims as follows, provided that proof of attempted mailing is provided to the Chairperson:

(1) to a holder of a claim as may be disclosed by the lien, judgment and lawsuit searches required to be obtained in §1-80.1(p) of this chapter, to the address for such claimant disclosed by such search and, if such notice is returned as non-deliverable, to any other address for such claimant or attorney of record of such claimant as disclosed by such search, with such notice to be deemed given if attempts to mail are made to all such addresses even if any such notice is returned as non-deliverable;

(2) to a holder of a claim as may be disclosed by a prior claim letter or a valid claim letter, to the address for such claimant as disclosed by such letter and to the sender of the letter, or, if there is no such address disclosed for the claimant, to the address of the sender of such letter, or such address as the sender may provide, with such notice to be deemed given if an attempt is made to mail to such address even if any such notice is returned as non-deliverable; provided that, if the sender provides another address for the claimant (or recipients at any such subsequent address provide a further address for claimant), notice must be mailed to all such other, subsequently provided, addresses;

(3) to a holder of a claim as may be disclosed by tort letters provided as required in §1-80.1(q) of this chapter, to

the address as may be disclosed in, by or through any such tort letter, or to any counsel of record as may be disclosed in, by or through such tort letter, or, if neither is indicated, by consultation with the insurers providing the tort letters as to either an address of a claimant or a counsel of record for such claimant as obtained therefrom, with such notice to be deemed given, even if any such notice is returned as non-deliverable after two mailings; provided that, if any recipient of such notice provides another address for the claimant (or recipients at any such subsequent addresses provide a further address for claimant), notice must be mailed to all such other, subsequently provided addresses; provided, further however, if no address for either a claimant or claimant's counsel or representative can be obtained, public notice of the contents of the notice must be provided by running the notice in The New York Times and The New York Law Journal as a public notice for one business day (that is, not a Saturday, Sunday, or public holiday).

Agent. An individual, partnership, or corporation that acts, by employment, contract or otherwise, on behalf of one or more owners to operate or provide for the operation of a licensed vehicle in accordance with the requirements of these rules. The term "agent" shall not include an attorney or representative who appears on behalf of one or more owners before the Commission or the TLC hearing tribunal, and taxicab drivers licensed pursuant to Chapter 5, Title 19 of the Administrative Code when acting in that capacity.

Applicant. (a) An "applicant" is an individual, partnership, limited liability company or corporation seeking a license for a medallion taxicab.

(b) Whenever within this chapter reference is made to the partners, general partners, shareholders and/or officers of an applicant, such reference shall also include the members and managing members of any applicant which is a limited liability company.

Association. An "association" is a group of owners which has registered its name and business address with the Commission and furnished a copy of its emblem, if any.

Chairperson. The "Chairperson" shall mean the Chairperson of the Commission, or his or her designee.

Chauffeur's license. A "chauffeur's license" is a valid license of the State of New York to operate a vehicle for hire, or a valid license of similar class from another state of which the licensee is a resident.

Claim Letter. A "claim letter" is a letter asserting a possible excess claim against an owner of a taxicab medallion or against the taxicab medallion itself. Claim letters which are neither prior claim letters nor valid claim letters will not be considered for purposes of the escrow determination to be made in §1-81 of this chapter.

Clean air taxicable. A "clean air taxicab" is a taxicab that complies with section 3-03.3 of this title.

Commission. "Commission" means the New York City Taxi and Limousine Com- mission.

Compliance date. The compliance date for the installation of taxicab technology systems in medallion taxicabs shall be the date of the first regularly scheduled inspection for each taxicab on or after October 1, 2007, unless extended pursuant to section 1-11(g) of this chapter.

Driver. A "driver" is a person licensed by the commission to drive a medallion taxicab in the City of New York.

Escrow Amount. The "escrow amount" is the amount for which an escrow account is required to be established in order to satisfy one or more excess claims. The escrow amount will be determined as set forth in §1-81 of this chapter and shall not in any event exceed the maximum escrow amount.

Excess Claim. An "excess claim" is a tort claim asserted against the owner of a taxicab medallion for an amount in excess of the amount covered by an insurance policy in effect at the time the claim arose.

Fair Market Value. The "fair market value" in reference to the transfer of a taxicab medallion shall be the average

value for arms-length transactions for similar medallions for the prior calendar month as maintained by the Commission.

Fleet. A "fleet" is a corporate entity or limited liability company:

(1) organized for the ownership or operation of twenty-five (25) or more taxicabs;

(2) which are dispatched from a single location serving as both garage and office of record, which has been approved by the Commission as adequate for the storage, maintenance, repair and dispatch of the fleet taxicabs; and

(3) which has a dispatcher on the premises at least eighteen (18) hours every day, who is responsible for assigning drivers to fleet taxicabs.

Independent taxicab owner. An "independent taxicab owner" is an individual, partnership, limited liability company or corporation owning only one medallion taxicab in the City of New York.

Licensed vehicle. A "Licensed vehicle" is a medallion taxicab authorized by the Commission to accept passengers for hire.

Long-term driver. A long-term driver is a licensed taxi driver who meets all of the following conditions: The driver must be:

(1) A steady driver, who drives the taxicab at the rate of at least 160 hours per month; and

(2) A named driver, who is named on the rate card pursuant to Rules 1-47 and 1-48; and

(3) Either an owner of the medallion (including a shareholder in a corporation owning the medallion) or a lessee of the medallion pursuant to a lease with a term of no less than five months; and

(4) A long-term driver on no more than one taxicab.

Mailing address. A "mailing address" is the address designated by the owner for the mailing of all notices and correspondence from the commission and for service of summonses. A post office box is not acceptable. An owner may designate the address of the owner's agent as the owner's mailing address.

Market Value. The "market value" in reference to the transfer of a taxicab medallion shall mean the consideration for the transfer unless the transfer is for less than fair market value, in which case the "market value" shall be the fair market value of the medallion being transferred.

Maximum Escrow Amount. The "maximum escrow amount" equals the greater of (a) the market value of a taxicab medallion being transferred less the value of any debt or liens secured by such medallion and the costs of transfer (including the costs of any foreclosure or similar action and any outstanding fines or fees owed to the Commission or the Parking Violations Bureau) or (b) the market value of a taxicab medallion being transferred less the value of any debt or liens secured by such medallion and the costs of transfer (including the costs of any foreclosure or similar action and any outstanding fines or fees owed to the Commission or the Parking Violations Bureau) PLUS the value of any proceeds of any refinancing received by the owner which was not used to reduce any previously existing debt or liens secured by such medallion following the date of an occurrence of an alleged tort involving the taxicab which tort gives rise to a potential excess claim, except that in a transfer resulting from a sale by a lender or judgment creditor, the maximum escrow amount in respect of proceeds of sale held by such lender or creditor shall not exceed (a).

Medallion. A "medallion" is a plate issued by the Commission as the physical evidence of a taxicab license, and affixed to the outside of such taxicab.

Merchant. A "merchant" is an individual or business entity licensed by the Commission that contracts with a merchant bank provider of credit/debit card services and other merchant account related services, which merchant bank provider is approved by the Commission as a subcontractor to one or more taxicab technology service providers for the purpose of providing in-cab payment of taxicab fares, surcharges, tolls and tips by credit/debit cards.

Minifleet. A "minifleet" is a limited liability company or corporation licensed by the Commission to own and operate two (2) or more taxicabs.

MTA Tax. The "MTA Tax" is the 50-cent tax on taxicab trips that is imposed by article 29-A of the New York State Tax Law.

Owner. (a) An "owner" is an individual, partnership, limited liability company or corporation licensed by the Commission to own and operate a medallion taxicab or taxicabs. A trust, foundation, or non-profit or not-for-profit entity may not be an owner and may not own any interest in an owner except as specifically provided in this chapter.

(b) Whenever within this chapter reference is made to the partners, general partners, shareholders and/or officers of an owner, such reference shall also include the members and managing members of any owner which is a limited liability company.

Passenger. A "passenger" is any individual seated in a taxicab for travel for hire to a given destination.

Prior Claim Letter. A "prior claim letter" is a claim letter received by the Commission prior to February 1, 2009.

Prospective passenger. A "prospective passenger" is a person who has hailed or sought to hire a taxicab for the purpose of being transported to a destination, or one who is awaiting the arrival of a radio dispatched taxicab and who is not seated in the taxicab.

Rate card. A "rate card" is a card issued by the Commission for each medallion taxicab, which displays the taxicab license number, rates of fare, and such other data as the Commission may prescribe.

Renewal applicant. A "renewal applicant" is an owner seeking a renewal of a valid taxicab license.

Standby vehicle. A "standby vehicle" is any vehicle approved by the Commission for use as a replacement vehicle.

Taxicab. A "taxicab" is a motor vehicle licensed by the Commission to carry passengers for hire, designed to carry a maximum of five (5) passengers, and authorized to accept hails from prospective passengers in the street. As used in these rules the term taxicab also includes the license issued by the Commission to operate the motor vehicle as a taxicab.

Taxicab drivers license. A "taxicab driver's license" is the authority granted by the Commission to an individual to drive a taxicab in the City of New York.

Taxicab license. A "taxicab license" is the authority granted by the Commission to an owner to operate a designated vehicle as a taxicab in the City of New York.

Taxicab technology service provider. A "taxicab technology service provider" is a vendor who has contracted with the Commission to install and maintain the taxicab technology system in taxicabs.

Taxicab technology system. The "taxicab technology system" is hardware and software that provides the following four core services (collectively "four core services"): (i) allows credit, debit and prepaid card payment required by section 3-03(e)(7) of this title, (ii) text messaging required by section 3-03(e)(8) of this title, (iii) trip data collection and transmission required by section 3-06 of this title, and (iv) data transmission with the passenger information monitor required by section 3-07 of this title.

Taximeter. A "taximeter" is an instrument or device approved by the Commission by which the charge to a passenger for hire of a licensed taxicab is automatically calculated and on which such charge is plainly indicated.

Taxpayer. "Taxpayer" is a person or entity who is liable under article 29-A of the New York State Tax Law to pay the MTA Tax to the New York State Department of Taxation and Finance.

Tort Letter. A "tort letter" is a statement from the insurer of a taxicab as to whether or not the insurer is aware of excess claims against the taxicab medallion or its owner.

Transfer. A "transfer" is a conveyance of an interest in a taxicab license or interest in a limited liability company owning a taxicab license or stock in a corporation owning a taxicab license, from one party to another.

Transferee. A "transferee" is an applicant approved by the Chairperson to own and operate a medallion taxicab which is acquiring an interest, either directly or indirectly, in a taxicab license pursuant to §§1-80, 1-80.1 and 1-80.2 of this chapter. A secured lender foreclosing upon, repossessing, or otherwise realizing against its security interest in, a taxicab license is not a transferee provided that such lender places the medallion in storage as required by §1-80.2(c) of this chapter.

Transfer form. A "transfer form" is a document, kept in a standby vehicle with an SBV rate card when such standby vehicle is used as a replacement vehicle, containing the medallion number and SBV number.

Trip record. A "trip record" also known as a trip sheet or trip log, is the written, computerized, automated and/or electronic accounting of a taxicab ride. The trip data to be transmitted or recorded shall include the taxicab license number (medallion number); the taxicab driver's license number; the location of trip initiation; the time of trip initiation; the number of passengers; the location of trip termination; the time of trip termination; the itemized metered fare for the trip (tolls, surcharge, and tip if paid by credit or debit card); the distance of the trip, the trip number, the method of payment, the total number of passengers, as well as such other information as may be required by the Commission. The data captured by the trip record may be stored in paper, electronic or such other form as approved by the Commission. Trip record information shall be available to the TLC, the taxicab driver, medallion owner, taxicab owner and/or leasing agent at the end of each shift and/or lease term. The trip record shall be kept in an approved archived form for a minimum of three years after the data of the taxicab ride.

Valid Claim Letter. A "valid claim letter" is a claim letter which is not a prior claim letter, and which must (a) be dated no more than one year prior to the date of submission to the Chairperson of the documentation seeking approval for a proposed transfer of a taxicab medallion as set forth in this chapter, (b) set forth a minimum claim amount in an amount sufficient to be an excess claim, (c) include a copy of the police report regarding the incident in question, and (d) include a representation by the sender that the party against which the excess claim has been asserted has been provided with a copy of the claim letter.

NOTE

1. Statement of Basis and Purpose in City Record Dec. 29, 1995:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The promulgation amends the Drivers Rules in the following manner: nine penalties are eliminated; drivers are able to go off-duty for more than an hour; drivers are not responsible if an owner placed unauthorized signs in taxi or failed to place required signs; the penalty for failure to safeguard the hack license is eliminated, as that is a summons which drivers often find galling, as it penalizes them for mishaps.

The promulgation amends the Owners Rules in the following manner: nine penalties are eliminated and five changed to permit guilty pleas by mail instead of requiring personal appearances at hearings; requirement that owners must sign trip sheets daily is eliminated; owners will take possession of trip records on a weekly basis; taxis may be driven to a repair facility by someone other than a licensed taxi driver; less restrictive rules for markings and emblems.

In addition, unnecessary definitions and duplicative sections are eliminated from both sets of rules.

The purpose of the promulgation is to simplify and consolidate the Taxicab Owners and Drivers Rules. Streamlining and clarifying the regulations, we believe, better enables the individuals working in the taxi industry to be aware of and follow the requirements. The proposed changes would also present clearer guidelines for enforcement personnel and the TLC adjudications tribunal.

The proposal did not appear in a regulatory agenda for the agency. The preparation of an agenda for this fiscal year was postponed, until after the appointment of a new Chairman. The new Chairman has established this proposal as a priority.

2. Statement of Basis and Purpose in City Record June 20, 2006: The rules amend existing rules to allow limited liability companies to own and operate taxicab medallions. In addition, the rules provide that members and managing members of such limited liability companies will be subject to the same requirements as are partners, shareholders, officers and directors of corporate and partnership owners and operators of taxicab medallions, for all purposes of the Taxicab Owners Rules, including with respect to fitness to own taxicab medallions. The prior rules provide that taxicab medallions may be owned by individuals, partnerships and corporations. The governing statute, §19-502(i) of the New York City Administrative Code, authorizes a broader scope of entities that may own taxicab medallions: "any person, firm, partnership, corporation or association." The limited liability company structure may offer certain advantages for some owners when compared with the personal, partnership or corporate forms of ownership-in particular, industry representatives have indicated that the limited liability company structure can have tax advantages over other forms of taxicab medallion ownership. At the same time, based on review of the law governing limited liability companies, the Taxi and Limousine Commission believes that taxicab medallion owners' use of the limited liability company structure will not impair the Commission's ability to regulate and monitor the taxicab industry.

3. Statement of Basis and Purpose in City Record June 12, 2007: These rules revise the existing Taxi and Limousine Commission ("TLC") rules applicable to the requirements of the taxicab technology system, which consists of hardware and software that allows credit and debit card payment of taxicab fares, text messaging to taxicab drivers, electronic taxicab trip data collection and transmission, and data transmission to a passenger information monitor. The rules provide exemptions from the system installation requirement to taxicabs that will be retired within six (6) months following the installation date, and provide that any taxicab technology service provider who has contracts for installation of the taxicab technology systems in more than three thousand (3,000) taxicabs may, upon prior written approval from the Chairperson, or his or her designee, extend the date for each taxicab to receive such taxicab technology system to the next date that each such taxicab is due for inspection at the TLC's Safety and Emissions Facility following February 1, 2008. The taxicab technology system is in development by vendors pursuant to contracts with the TLC. These rules require installation of the taxicab technology system in taxicabs on the date of the first regularly scheduled inspection for each taxicab on or after October 1, 2007, unless the taxicab is exempt. The rules allocate responsibility for the operation and maintenance of the taxicab technology system among the taxicab driver, owner and agent, and require the driver, owner and agent to report malfunctions in the taxicab technology system within prescribed times after the malfunction is discovered or should reasonably have been discovered. Provided that those reporting requirements are met, the rules allow continued operation of the taxicab, with a written trip sheet if the electronic trip data collection is malfunctioning, for up to 48 hours after the malfunction is reported. If the taximeter fails to operate, however, the taxicab is prohibited from picking up a passenger. Further, if the taxicab technology system in a particular taxicab requires six or more repairs within any thirty-day period, the taxicab must promptly be brought for inspection to, or an inspection must be scheduled with, the TLC Safety and Emissions Facility. Pursuant to the contracts between the Commission and the taxicab technology service providers, the service providers are subject to audits by the City and the Commission, and they are required to provide the City and the Commission with periodic reports and reasonable access to the service providers' performance measurement and management reporting tools. The rules increase from two to six the number of different fare calculations that the taximeter must be capable of processing. Existing rules require that the taximeter be capable of processing the regular fare pursuant to section 1-70 of the TLC rules, and the flat fare between Kennedy Airport and Manhattan pursuant to section 1-69 of the TLC rules. These rules require that the taximeter be capable of processing the fare to Newark Airport pursuant to section 1-73 of the TLC rules, the adjustment of the metered fare to points in Westchester and Nassau counties pursuant to section 1-73(b) of the TLC rules, the negotiated flat fares to points outside New York City other than the Newark Airport and Westchester and Nassau counties pursuant to section 1-73(a) of the TLC rules, and flat fares per person for group rides pursuant to section 1-71 of the TLC rules. The rules also require taxicabs equipped with taxi technology systems to display signs or logos identifying the credit and debit cards that are accepted for payment on the passenger information monitor screen and to permit advertising on the passenger information monitor screen. The rules also require that the taxicab technology system ports and peripheral connections be secured from tampering and that the connections to the taximeter harness, roof light wires and pulse wires use switches, wiring and wire caps meeting the specifications of the Society of Automotive Engineers. The rules at Sections 1-85(b) and 12-06(u)(4) contained a cap of 5 % that medallion owners, or

their agents, would be able to charge drivers for credit/debit card transactions. The rules set forth terms that explicitly require that each taximeter approved by the Commission be capable of transferring data and communicating with the taxicab technology system of all taxicab technology service providers that have chosen to interface with the taximeter. Section 15-44, added by the rules, requires that taximeter businesses which manufacture taximeters make available to taxicab technology service providers certain of their taximeter specifications, subject to appropriate confidentiality obligations, to enable the taxicab technology service providers to effect an interface between their systems and each taximeter; or, alternately, that the taxicab technology service providers make available to taximeter businesses which manufacture taximeters certain of their system specifications, again subject to appropriate confidentiality obligations, to enable the taximeter businesses to effect an interface between their taximeters and each of the taxicab technology systems. The rules also make clear that, effective July 18, 2007, manufacturers of taximeter devices must be licensed by the TLC in order for their taximeters to be installed or maintained in taxicabs licensed by the TLC. Development and implementation of the taxicab customer service enhancements has made it clear that manufacturers of taximeters must work with the taxicab technology service providers, which are TLC contractors, to ensure that all equipment interfaces properly. The Commission achieves this purpose by requiring manufacturers to hold a license and to implement the interface requirements set forth in section 15-44 of the TLC rules. To alleviate difficulties in licensing manufacturing entities which may not be located in New York City, the Commission allows that a manufacturer may meet its licensing requirement by designating a representative to hold a license on its behalf. Any representative designated must hold, and will be deemed to hold, all the necessary authority to carry out the manufacturer's duties as a licensee, including duties regarding interface requirements. The licensing of a representative shall not relieve a manufacturer of its duties with respect to such requirements.

35 RCNY 1-02

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-02 General Provisions for Licensing.

(a) An applicant for a taxicab license shall file an application jointly with the transferor of the license.

(b)(1) An individual, the members of a partnership, or the officers and shareholders of a corporation, applying for a taxicab license must provide to the Commission proof of identity in the form of

(i) A valid form of photo identification issued by the United States, any state or territory thereof or any political subdivision of such state or territory, and

(ii) A valid, original social security card.

(2) An individual, the members of a partnership, or the officers and shareholders of a corporation applying for a taxicab license or its renewal

(i) must be at least 18 years of age; and

(ii) must be of good moral character.

(c) The applicant must demonstrate to the satisfaction of the commission:

(1) that he is qualified to assume the duties and obligations of an owner of a taxicab license;

(2) that he is the owner of a vehicle meeting all requirements of the commission and those of all other

governmental agencies having concurrent jurisdiction;

(3) that he has liability insurance coverage by bond or policy as required by the State of New York and the rules of the Commission;

(4) that he has the certificate of title or photostat thereof and the certificate of registration, both of which must be in the name of the applicant unless title is retained by a lessor or conditional vendor; and

(5) that he has furnished to the Commission all required information concerning the financing of the purchase price of the medallion and/or taxicab.

(6) in the case of an applicant on or after January 7, 1990 to acquire a medallion owned by an independent taxicab owner, that he possesses a current taxi driver's license issued by the Commission and represents that he will drive the taxicab himself in fulfillment of the service requirements of §l-09(b). In the event that the applicant is a corporation or partnership, then one shareholder or partner, as the case may be, must fulfill this requirement.

(d) An individual, the members of a partnership, and officers and shareholders of a corporation applying for an owner's license shall be fingerprinted. Fingerprinting shall also be required of new officers and shareholders of a corporation holding a taxicab license, and of the officers and shareholders of a management company which operates a taxicab fleet. An individual, the members of a partnership and officers and shareholders of a corporation, who provide funds for any owner, shall also be fingerprinted, unless such provider is a licensed bank or loan company. The requirements of this paragraph may be waived by the Commission in its discretion. All such fingerprints must be submitted in the manner prescribed by the Chairperson prior to the approval of the application for ownership of any interest in any medallion and each person fingerprinted must pay any required fees or costs for the taking and processing of fingerprints and securing criminal history records from the New York State Division of Criminal Justice Services, provided that, if any person required to be fingerprinted hereby has an electronic fingerprint record made no earlier than one year prior to the date of the proposed transfer on file with the Commission, such person need not submit an additional set of fingerprints.

(e) If the owner is a partnership, it shall file with its license application a certified copy of the partnership certificate from the clerk of the county where the principal place of business is located.

(f) No corporate or trade name will be accepted by the Commission which is similar to a name already in use by another owner.

(g) If the applicant is a corporation, it shall file with its license application a certified copy of its certificate of incorporation. A list of officers and shareholders and a certified copy of the minutes of the meeting at which the current officers were elected shall also be furnished. Each officer or shareholder shall disclose to the Commission each medallion in which he or she has any interest whatsoever, including but not limited to, any interest as individual owner, partner, shareholder, director or officer. Such disclosure shall be made upon original application for a vehicle license, upon application for renewal of such license, and upon application for transfer of such license.

(h) An applicant or renewal applicant shall not offer or give any gift or gratuity to any employee, representative or member of the Commission, or any public servant, and shall immediately report to the inspector general of the Commission or to the New York City Department of Investigation any request or demand for any gift or gratuity by any employee, representative or member of the Commission, or any public servant.

(i) If the Commission determines that the applicant has failed to meet the requirements for a taxicab license it may deny the license or its renewal and specify in writing to the applicant the reason for such denial.

(j) Any material falsification contained in an original or renewal application for a license, any failure to notify the commission of any material change in the information contained therein or any attempt by an owner or applicant to

conceal the identity of a party having an interest in the ownership of a taxicab shall be cause for denial of such application or revocation or suspension of such license, in addition to any other sanctions imposed by the Commission.

(k) If at anytime during the term of the taxicab owner's license the Commission becomes aware of information that the owner no longer meets the requirements for a taxicab owner's license the Commission may deny his renewal application or suspend or revoke his license.

(l) Each individual medallion owner, member of a partnership owning one or more medallion taxicabs, or shareholder, director or officer of any corporation owning one or more medallion taxicabs shall furnish to the Commission a financial disclosure statement, executed under oath, together with all attachments and documentation required by the Commission. This disclosure statement will be completed on a form provided by the Commission, and shall include but not be limited to the entire disclosure of assets, liabilities, income and net worth of the owner, partner, shareholder, officer or director.

(m) Each individual applicant and renewal applicant shall submit with his or her application the child support certification required by New York General Obligation Law §3-503.

NOTE

1. Statement of Basis and Purpose in City Record June 26, 1998:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, which permits TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b)(13) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The regulations require corporate officers or directors and shareholders of corporations owning medallions to reveal their ownership interests in other medallions to the Commission. It also requires all medallion owners to disclose financial information concerning assets, liabilities, income and expenses, to the Commission.

The purpose of these regulations is to enable the Commission to identify officers, directors and shareholders who possess multiple ownership interests in corporations which own medallion taxicabs. This regulation will assist the Commission in protecting the riding public by assuring that beneficial ownership interests in medallion taxicabs are

fully disclosed. The Commission will now be able to determine: (1) who are the true owners of each licensed medallion; and (2) how many medallions are owned, in whole or in part, by each individual.

The regulation requiring financial disclosure will enable the Commission to protect the public by assuring that medallion owners have sufficient income and assets to operate their businesses, and sufficient assets available to protect the public in the event of serious personal injury and/or other loss where the medallion owner is held liable. The Commission is charged with the responsibility of making certain that persons who have ownership interests in medallion taxicabs have sufficient resources to enable them to operate their taxicabs safely and responsibly.

In addition, this information will enable the Commission to assure that persons who have financial interests other than ownership in medallion taxicabs, such as creditors, financiers and lienholders, are identified and known to the Commission. This will enable the Commission to protect the riding public by preventing fraud, undisclosed interests in medallions, and other forms of abuse.

2. Statement of Basis and Purpose in City Record Oct. 31, 2006: The rules amend existing Taxi and Limousine Commission ("TLC") rules to eliminate the requirement that applicants for certain licenses issued by the TLC must prove their citizenship or residency status in order to obtain licenses. This change is made to enhance consistency of application requirements for the various licenses issued by TLC. The rules as amended would preserve the TLC's ability to verify the identity of those applicants who formerly had to prove their citizenship or residency status. Verifying identity is crucial to the completion of accurate background checks and fitness assessments, and therefore is necessary to protect the public interest in the safety and integrity of operations of the for-hire transportation industry. The rules provide that each applicant must establish his or her identity by producing a government-issued photo ID and an original social security card. These standards apply to applicants who are individuals, and to partners, officers, members and/or shareholders of applicants who are partnerships or corporations. These rules leave unchanged the TLC's ability to fingerprint applicants for the purpose of conducting criminal background checks.

CASE AND ADMINISTRATIVE NOTES

¶ 1. The regulation requiring financial disclosure from taxi cab owners, members of partnerships, or shareholders, directors or officers of corporations owning medallions, has been upheld. The regulation furthers legitimate governmental objectives of assuring sufficient information to identify taxi cab owners who have abused the corporate form by fragmenting their ownership into many undercapitalized corporations in order to shield assets from persons injured as a result of negligence. New York City Committee for Taxi Safety v. New York City Taxi and Limousine Commission, 256 A.D.2d 136, 681 N.Y.S.2d 509 (App. Div. 1st Dept. 1998).

¶ 2. Medallion owners brought a challenge to the financial disclosure regulations, claiming that the Taxi and Limousine Commission (TLC) lacked statutory authority to enact the regulation and that the regulation was an unconstitutional infringement on the right of privacy. The court, however, said that the TLC had the necessary authority. Specifically, under City Charter Section 2303, the TLC was given authority to enact regulations relating to financial responsibility of owners. The court also held that the regulations did not violate the right of privacy. In any privacy case, the court said, it was necessary to balance the right to be left alone, against the value of disclosure as a remedy for adverse social conditions. The plaintiffs had cited a number of cases in which financial disclosure requirements for public employees had been upheld, and sought to distinguish them on the grounds that they were private businesses or individuals. The court, however, said that while taxi owners might not be in the same category as public employees, they had chosen to enter a highly regulated industry. Thus, the court applied an "intermediate scrutiny" standard to the constitutional challenge. Under that standard, the regulation was to be upheld if it was designed to further a substantial governmental interest and did not land wide of any reasonable mark in making the classifications. The regulation had a legitimate objective-to insure that owners were adequately capitalized to operate the business safely and to satisfy any tort judgments obtained by persons injured in accidents involving taxi cabs. Even though, as pointed out by the owners, the regulations did not specify a minimum capitalization requirement, they were needed to insure that the corporate form was not being abused. The information should be made available to persons

injured in accidents involving cabs owned by undercapitalized corporations. In other words, the injured persons would need that information in order to prove, if they could, that the corporation was being used to conduct personal business and that there was a basis for piercing the corporate veil. The owners also challenged those parts of the regulation that potentially permitted members of the public to obtain the financial information through a Freedom of Information Law (FOIL) request. The court did not reach this issue, since the TLC promised to implement procedures under which sensitive information would not be released to people not involved in TLC work. If the TLC later fails to safeguard owners' privacy, a new challenge can be expected. Statharos v. New York City Taxi & Limousine Commission, 198 F.3d 317 (2d Cir. 1999).

¶ 3. TLC inspector's testimony that taxicab owners had bribed him to pass taxicabs at inspection was insufficient to establish the charge under section 1-02(k) due to the inconsistencies in and lack of credibility of the Inspector's testimony. **Taxi and Limousine Comm'n v. Chrisanthos, Inc.,** OATH Index Nos. 1626-32/95 (July 21, 1998).

¶ 4. Taxicab owner's license should be revoked based on a finding that he attempted to bribe a TLC inspector to pass his taxicab at inspection. **Taxi and Limousine Comm'n v. N & J Taxi, Inc.,** OATH Index Nos. 1542-53/95 (Jan. 9, 1996), **aff'd in part, remanded on other grounds sub nom. Statharos v. NYC Taxi & Limousine Comm'n,** 269 A.D.2d 280, 703 N.Y.S.2d 461 (1st Dep't 2000). The court had affirmed the administrative law judge's findings of fact but remanded on penalty, holding that one of the owner-driver respondent's had not been given notice in the petition that ownership of his taxicab medallion was at risk. After a hearing on remand, the administrative law judge adhered to her original recommendation that the owner's license be revoked and that he be forced to divest himself of all ownership interest he may have in any corporation owning a taxicab medallion.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 1-03

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-03 Standards and Criteria for Ownership.

(a) All medallion transfers together with all transferees, owners or officers of transferees must be approved by the Taxi and Limousine Commission. Otherwise, transfer will not be effective.

(b) Corporate officers are subject to the same standards and criteria as are individual owners. Corporate officers will not be recognized by the Commission unless they have met with the approval of the Commission. It is a violation of the owners rules for a corporate owner to appoint a new officer without the approval of the Commission; and upon a finding of guilt, an appropriate penalty will be imposed. Temporary approval contingent on final approval may be permitted in cases in which an officer has resigned or died and another individual must be able to continue the regular daily operation of the owner corporation.

(c) The standards and criteria for ownership are to be equally applicable when the stock or shares of a corporate owner are held by another corporation or by an association. Each principal, shareholder, and officer of an entity succeeding in interest to any party must be approved by the Commission, and particularly before that entity can purchase an interest in an additional medallion.

(d) The following criteria shall be considered by the TLC in granting permission to own a medallion or additional medallions. For purposes of this subdivision, the term applicant refers to both an individual and to officers and shareholders of a legal entity.

(1) Applicant's criminal history will be considered in a manner consistent with the Corrections Law of the State of New York.

(2) Applicant's TLC and DMV records. TLC History Check will determine whether a prospective owner has owned or currently owns other medallions, directly or as a shareholder, or has been an officer of such a corporation; or possessed or currently possesses a TLC driver license. Ownership or transfer will not be approved if in the past two years, the prospective owner has been found guilty of rule violations involving:

(i) assaultive behavior toward a passenger, official or member of the public in connection with any matter relating to a taxicab,

(ii) any instance of bribery or unlawful gratuity toward a city employee not otherwise covered in §l-03(d)(1), above,

(iii) providing TLC with false information,

(iv) two or more passenger service refusals,

(v) two or more incidents of overcharging, as a driver,

(vi) three failures to respond to an official communication,

(vii) three or more vehicle safety violations for a particular taxicab, or

(viii) ten or more outstanding unexcused failures to appear at scheduled TLC hearings or unsatisfied TLC fines that remained or remain unsatisfied until renewal, or, if other than personal summons, was a stockholder or officer of such an entity.

A prospective owner or shareholder will not be approved to own another medallion, hold stock or be an officer in another corporate medallion owner if he has evidenced a chronic disregard for the rules and regulations that impact on the welfare, safety or security of the riding public.

(3) A medallion owner, stockholder or owner of any type of interest in a taxicab license must be at least eighteen (18) years of age. Stock or membership interests in a limited liability company may be owned in the form of a formal trust for the benefit of a minor who retains equitable interest, only as provided by §1-82(d) of this chapter.

(4) If an owner dies or is declared incompetent by a court of competent jurisdiction, the interest in the medallion or the medallion owning entity must be transferred to an owner approved as required by this chapter and meeting the requirements of §§1-02, 1-03, 1-80, 1-80.1, 1-80.2 and 1-81 of this chapter or must be operated by an administrator, executor, conservator or guardian as provided in §1-82 of this chapter.

(5) An independent taxicab owner must also possess a taxi driver's license issued by the Commission, and for any individual medallion transferred on or after January 7, 1990, he must represent that he will drive the taxi himself in fulfillment of the service requirements of §l-09(b). In the event that the independent taxicab owner is a corporation or partnership, then one shareholder or partner, as the case may be, must fulfill this requirement.

(e) In addition to the foregoing, the Commission will require shareholder responsibility as follows:

A stockholder in a closed corporation that owns a medallion will be personally accountable for adherence to TLC regulations and relevant law directly and uniquely pertaining to medallion ownership.

The Commission will require that prior to approval of any future stock transfers or medallion transfer to a closed corporate owner that all stockholders execute a personal assumption of all the duties and responsibilities in the Commission's Owners Rules and Regulations including personal indemnification for all unpaid Commission fines or fees regarding the medallion or medallions owned by the corporation. This will be the assumption and indemnification agreement.

HISTORICAL NOTE

Section repealed and added City Record Apr. 30, 1992.

DERIVATION

Former §1-03 subds. (l), (m) added City Record Jan. 2, 1992 eff. Feb. 1, 1992.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Testimony from TLC inspector, who admitted that he accepted bribes from those who presented taxicabs to him for inspection, was found insufficient to establish charges that taxi owners had bribed the inspector, due to inconsistencies in the inspector's testimony and other problems with his credibility. **Taxi and Limousine Comm'n v. Chrisanthos, Inc.,** OATH Index Nos. 1626-32/95 (July 21, 1998).

¶ 2. TLC inspector's testimony was found to be sufficient to establish that medallion owners attempted to bribe the inspector. **Taxi and Limousine Comm'n v. N & J Taxi, Inc.,** OATH Index Nos. 1542-53/95 (Jan. 9, 1996), **aff'd in part, remanded on other grounds sub nom. Statharos v. NYC Taxi & Limousine Comm'n,** 269 A.D.2d 280, 703 N.Y.S.2d 461 (1st Dep't 2000).

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 1-04

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-04 License Fees.

(a) Pursuant to §19-504(b) of the Administrative Code of the City of New York, the license fee for each taxicab and coach shall be five hundred fifty dollars ($550) annually, pro rated if the license period is for a period other than one year.

(b) Except as set forth in subdivision (e), a license to operate a taxicab shall be for a term of two years and shall expire on May 31 each alternate year. The Chairman may, however, extend the effectiveness of a taxicab license until the completion of the next scheduled inspection of the taxicab, or until such other time as may be appropriate in the administration of the renewal of taxicab licenses.

(c) Unless the time to renew the license has been extended by the Chairman, an owner shall be responsible for filing a completed renewal application for the vehicle license together with the required fee no later than April 30 of each year in which a license is scheduled to expire. It shall be the owner's responsibility to obtain said renewal application in order to comply with the filing requirements described above.

(d) Pursuant to §19-504(j) of the Administrative Code of the City of New York, the fee for replacement of a medallion "tin" when such medallion is replaced shall be ten dollars ($10).

(e) Taxicab licenses expiring on May 31, 2003 shall be renewed for one year, except for licenses containing the letters A, E, J, and N in their license designation, which shall be renewed for two years. Taxicab medallion licenses expiring on May 31, 2004 shall be renewed for one year, except for licenses containing the letters B, F, K and P, which shall be renewed for two years. Taxicab medallion licenses expiring on May 31, 2005 shall be renewed for one year,

except for licenses containing the letters A, C, E, G, J, L, N, W, and all Standby Vehicles, which shall be renewed for two years. All taxicab licenses expiring on or after May 31, 2006 shall be renewed for two years.

HISTORICAL NOTE

Section amended City Record Apr. 8, 2003 §1, eff. May 8, 2003. [See Note 1]

Section repealed and added City Record Apr. 30, 1992.

Section in original compilation July 1, 1991.

NOTE

1. Statement of Basis and Purpose in City Record Apr. 8, 2003:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City, under §2303(b)(5) of such Charter, authorizing the TLC to promulgate rules and regulations relating to issuance of licenses to owners of taxicabs; under §19-504(b) of the Administrative Code of the City of New York, authorizing the TLC to issue taxicab licenses for a period of at least one, but not more than two years.

The rules of the Commission currently provide that all taxicab licenses are issued for a one-year period and expire on May 31st of each year. Most other licenses issued by the TLC are valid for two years.

This amendment provides that taxicab licenses are renewed on a biennial basis. All licenses would continue to expire on May 31st. A phase in of this requirement over a three-year period will enable the TLC to process these transactions without an increase in staff and other resources, and ultimately, approximately one-half of all licenses would be subject to renewal each year.

The issuance of two-year taxicab licenses will reduce the number of renewals processed each year, and will conform the procedures for processing renewals of taxicab licenses with the procedures for processing the renewal of other licenses issued by the TLC.

CHAPTER 1 TAXICAB OWNERS RULES

§1-05 Inspection Fees.

(a) The fee payable to TLC for the inspection required for the issuance of a certificate of inspection of a taxicab, inclusive of the issuance of such certificate, shall be fifty dollars ($50).

(b) An owner shall pre-pay upon license renewal the inspection fees, set by §l-05(a), for the three inspections per year required by §l-10(b). Pre-payment for each inspection scheduled during renewal period shall be made in connection with an application for renewal of a taxicab license and shall be a condition for license renewal.

(c) If any taxicab fails to pass any of the inspections required by §l-10(b), it shall be reinspected for no additional fee. If any taxicab fails to pass such reinspection, it shall be reinspected a second time for an additional fee of thirty-five dollars ($35). If any taxicab fails to pass such second reinspection, it shall be reinspected a third time. No additional fee shall be charged for third or subsequent reinspections.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-07 Licensing Requirements.

(a) A taxicab in operation for hire shall be currently licensed by the Commission and have a current medallion affixed thereto.

(b) An owner who is not currently licensed shall not advertise or hold himself out as doing business as a "taxi," "taxicab" or "hack" service.

(c) A taxicab may be operated only while the registration of the vehicle remains valid. Operation of a vehicle without a valid registration shall constitute operation without a Commission-issued license in violation of §19-506 of the Administrative Code of the City of New York, regardless of whether a Commission-issued license had previously been obtained while a registration was valid.

HISTORICAL NOTE

Section repealed and added City Record Apr. 30, 1992.

Section in original compilation July 1, 1991.

Subd. (c) added City Record Nov. 2, 2006 §1, eff. Dec. 2, 2006. [See Note 1]

DERIVATION

Former §1-07 subd. (v) par (3) added City Record Jan. 2, 1992 eff. Feb. 1, 1992.

NOTE

1. Statement of Basis and Purpose in City Record Nov. 2, 2006:

These rules create procedures for suspending licenses pending compliance with applicable rules, as an alternative to the existing procedure for suspending licenses pending revocation of those licenses. This rulemaking follows the pattern of recently promulgated amendments to the Commission's drug testing rules, which provided for suspension of licensees who fail to submit to required annual drug testing-the new rule provides for suspension pending compliance as an alternative to suspension pending revocation. This rulemaking creates the alternative of suspension pending compliance for several rules violations involving pre-hearing suspensions, in order to protect against an imminent threat to the health and safety of the riding public.

Because the suspensions are pre-hearing, prompt post-suspension review of the suspension is provided for in these rules. Section 8-17(a) provides for post-suspension review based on the submission of papers, and is applicable only to a suspension imposed for failure to submit to required annual drug testing. Section 8-17(b) provides for post-suspension hearings, and is applicable to all other summary suspensions that are imposed pending compliance. Both §8-17(a) and §8-17(b) provide deadlines within which the suspended licensee may contest the suspension. Where a suspension is imposed and a summons is issued for the same violation, the hearing on the summons will be consolidated with any hearing on the suspension pursuant to §8-17(b). Each rule that may result in a summary suspension pending compliance includes a reference to 8-17(a) or (b) in the penalty in these rules.

In addition to or instead of contesting a summary suspension that is imposed pending compliance, a licensee has the alternative of complying with the underlying rule, and demonstrating compliance to the Commission, whereupon the suspension will be lifted without a hearing, and regardless of whether a hearing has been scheduled or has been held.

Other substantive changes in these rules include:

· Elimination of suspensions for failure to comply with Commission rules requiring personal appearances at hearing. This requirement is eliminated in anticipation of future rulemaking to substitute fixed fines for "range fines," which were the reason underlying the personal appearance requirements.

· Amendment of §8-15 to provide for pre-hearing suspension of a licensee pending a fitness hearing, where the licensee fails a drug test and the licensee's continued operation would pose a threat to the public safety. As with other summary suspensions, the amendment provides for prompt post-suspension process-in this case, a prompt fitness hearing.

· Explicit provision for summary suspension pending revocation where the licensee is arrested on charges that are relevant to the licensee's qualification for licensure and pose a threat to public health or safety. Prompt post-suspension challenges are provided for, and a revocation proceeding must be commenced, or the suspension lifted, promptly upon notice to the Commission of disposition of the criminal proceedings.

· Provision that holders of probationary taxicab driver licensees must complete their continuing education requirements within a prescribed time, and that failure to do so results in expiration of their licenses.

· Elimination of the existing rule requiring surrender of a license as a precondition to appearing at a hearing. The new rule requires only that photo identification be shown, in conformance with current practice.

· Rule 8-11(e) is deleted and instead incorporated into each penalty table, to make the requirement of paying fines more clear throughout the rules.

Finally, this rulemaking corrects various typographical errors, eliminates references only to the male pronoun, and provides for more consistent usage of terms.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-09 Service Requirements.

(a) A taxicab fleet or minifleet owner shall operate each taxicab or its replacement standby vehicle of such fleet for a minimum of two (2) shifts of nine (9) hours each day including weekends and holidays.

(b) An independent owner, while not required to double shift his vehicle, is nevertheless required to provide service to the public on a regular basis. An independent owner must provide service for at least two hundred ten (210) nine (9) hour shifts in every calendar year. An independent owner who obtained the medallion through a transfer on or after January 7, 1990 must drive the taxicab himself to fulfill the above-stated requirement. In the event that the independent taxicab owner is a corporation or partnership, then one shareholder or partner, as the case may be, must fulfill such requirement. Upon written request by an owner, the Commission may waive or modify the requirements of this rule, for a limited time, for good cause shown.

CHAPTER 1 TAXICAB OWNERS RULES

§1-10 Taxicab Inspections.

(a) No new or replacement taxicab shall operate for hire unless it has been inspected and approved by the Commission.

(b) An owner shall have his taxicab inspected every four months at a date and time designated by the Commission and at any other time deemed necessary by the Commission.

(c) An owner shall comply with all notices and directives to correct defects in taxicabs.

(d) An owner shall repair or replace a taxicab when the Commission determines that the vehicle is unsafe or unfit for use as a taxicab, and directs the owner to remove it from service. The owner shall surrender the medallion and rate card to the Commission for storage and shall be suspended pursuant to §8-17(b) of this title.

35 RCNY 1-11

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-11 Vehicle Condition.

(a) While a taxicab is in operation, all equipment, including brakes, tires, lights and signals must be in good working order and meet all requirements of the New York State Vehicle and Traffic Law, the Commission, and sections 3-03 and/or 3-03.1 or 3-03.2 of this title and these rules.

(b) The taxicab's exterior and interior must be clean.

(c) The medallion number on the front and rear of the roof light must be clean and unobstructed so that the medallion number is plainly visible.

(d) The trunk compartment must be capable of securely holding passengers' baggage.

(e) (i) For any taxicab that is required to be equipped with the taxicab technology system, such equipment shall at all times be in good working order and each of the four core services shall at all times be functioning. (ii) In the event of any malfunction or failure to operate of such taxicab technology system, the owner shall file an incident report with the authorized taxicab technology service provider promptly and in no event more than two (2) hours following the owner's discovery of such malfunction or failure to operate or such time as the owner reasonably should have known of such malfunction or failure to operate. If the driver or taxicab agent previously filed a timely incident report regarding such malfunction or failure to operate, the owner shall not be required to file a separate incident report but shall obtain an incident report number from the driver, agent or authorized taxicab technology service provider. The owner shall meet, or shall instruct the taxicab agent to meet the appointment for repair scheduled by the authorized taxicab technology service provider following the filing of an incident report with such authorized taxicab technology service provider. A

taxicab in which any of the four core services of the taxicab technology system, or any part thereof, are not functioning shall not operate more than forty-eight (48) hours following the timely filing of an incident report by the owner, driver or agent.

(f) The owner of any taxicab required to be equipped with the taxicab technology system shall equip such taxicab, except as provided in subdivision (g) of this section, with a taxicab technology system as set forth in sections 3-03(e)(7) and (8), 3-06 and 3-07 of this title.

(g) The owner of any taxicab required to be equipped with a taxicab technology system shall contract to procure such equipment on or before August 1, 2007. Except as provided in this subdivision, the owner shall install a taxicab technology system no later than the compliance date set forth in section 1-01 of this chapter. Taxicabs that are to be retired within six (6) months of the compliance date for each such taxicab shall be exempt from the requirement that the taxicab technology system be installed in the taxicab. If any taxicab technology service provider contracts to provide more than three thousand (3,000) taxicabs with its taxicab technology system on or before August 1, 2007, the date by which each such taxicab is required to be equipped with such taxicab technology system may, upon prior written approval from the Chairperson, or his or her designee, be extended to each such taxicab's first scheduled inspection at the Commission's Safety and Emissions Facility on and after February 1, 2008.

(h) The owner of any taxicab requiring six (6) or more repairs of the taxicab technology system in any thirty (30) day period shall promptly take such vehicle for inspection to, or schedule an inspection with, the Commission's Safety and Emissions Facility. Such requirement shall not apply to the owner if compliance is made by the driver or agent of such vehicle.

NOTE

1. Statement of Basis and Purpose in City Record Mar. 29, 1996:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The promulgated amendments are technical changes to the Taxicab Owners Rules which correspond with rules recently adopted by the Commission. At the Commission meeting held on January 25, 1996, the taxicab rate of fare was increased and the Taxicab Specifications were renumbered. The amendments change the references to the Taxicab

Specifications to reflect the new section numbers, and ensure that the Taxicab Marking Specifications correspond to the increased taxicab rate of fare.

§1-13 Optional Equipment.

(a) A taxicab may be equipped with a two-way radio only in the Citizens Radio Service and only on the forty frequencies, within allowed deviation, specifically authorized under the rules of the Federal Communications Commission. Emissions, transmission power and antenna length shall be in accordance with limits established by the rules of the Federal Communications Commission. Such two-way radio may not be used for purposes of dispatch or passenger reservations.

(b) (1) A taxicab may be equipped with a cellular telephone which is accessible for passenger use and driver use by use of a credit card and by use of a calling card. Such cellular telephone may also be accessible by third party billing.

Such a cellular telephone must be of a make and type acceptable to the Commission, and installed in a manner approved by the Commission. Such a cellular telephone must be equipped with an emergency 911 feature, which does not require a telephone card or a credit card to operate. Such a cellular telephone shall not receive incoming telephone calls.

(2) Such a cellular telephone shall not be used for purposes of dispatch or passenger reservations.

(3) An owner of a taxicab equipped with a cellular telephone shall not charge a passenger or a driver a fee to use such telephone.

(4) A taxicab equipped with a cellular telephone must display a sign describing the cost per telephone call in the interior of the taxicab next to the telephone, in accordance with §1-36.

(5) A taxicab equipped with a cellular phone may indicate that a telephone is available with a sign on the exterior of the taxicab, in accordance with §1-36.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-17 Partition.

(a) An owner shall equip all taxicabs, except as provided in subdivision (b) of this section, with a partition that meets the specifications set forth in section 3-03(e)(3)(i) of this title and with provision for air conditioning for the rear passenger compartment, as set forth in section 3-05 of this title.

(b) An owner of an independent taxicab or a shareholder of a corporation owning one or more medallions shall be exempt from the provisions of subdivision (a) if:

(1) the taxicab is driven by the medallion owner or corporate shareholder(s), and

(2) the rate card lists only the persons named in subdivision (1) as driver(s), and

(3) the taxicab is equipped with a cellular telephone which has an emergency dialing feature, in accordance with section 1-13(b) of this chapter, and the taxicab is equipped with some other device specifically approved by the Commission to satisfy this requirement in addition to the trouble light required by section 1-18(a) of this chapter, and

(4) the owner has not previously been in violation of this rule with respect to the subject medallion, and

(5) the owner has applied for and received a certification of exemption from the Commission. Notwithstanding compliance with above conditions, if a partition is the only approved location for display of the rate card and driver license in a particular model of automobile, then a partition is required.

(c) A taxicab that is equipped with factory installed curtain airbags shall be equipped with a partition which shall

not extend the full width of the interior of the taxicab, but instead shall allow a space of six inches at each side, sufficient to permit proper deployment of the curtain airbags, and shall conform in all other respects with the applicable requirements of section 3-03(e)(3)(i) of this title.

(d) Where section 3-03(e)(3)(v) of this Title applies, the taxicab shall be equipped with a cellular telephone as set forth in subdivision (b) of this section and an in-vehicle camera system that meets the specifications set forth in such section 3-03(e)(3)(v), in addition to the trouble light required by section 1-18(a) of this chapter.

(e) An in-vehicle camera system shall be installed and maintained by the manufacturer's authorized installer and shall be in good working order.

(f) Each taxicab equipped with an in-vehicle camera system shall display decals on each rear passenger window, visible to the outside, that contain the following information: "This vehicle is equipped with camera security. YOU WILL BE PHOTO- GRAPHED."

NOTE

1. Statement of Basis and Purpose in City Record May 3, 2000:

In accordance with §1043(h)(1) of the New York City Charter, the Taxi and Limousine Commission ("Commission") hereby makes the following finding of imminent and immediate threat to public health, safety, and property, and the provision of a necessary public service.

Since January 1, 2000, seven (7) for-hire vehicle drivers have been murdered while operating livery vehicles in the City of New York. In addition, eleven (11) for-hire vehicle drivers were killed during 1999. The recent increase in crimes committed against for-hire vehicle drivers has occurred at a time when overall crime rates, and in particular, crimes committed against medallion taxicab drivers, has been steadily declining.

Since March 1, 1996, the Taxi and Limousine Commission has mandated that virtually all New York City taxicabs be equipped with protective partitions. In March 2000, the Commission also approved an in-vehicle security camera as an alternative to the partition. Since partitions or other security devices have become mandatory in taxicabs, there has been a significant decrease in the number of crimes committed against taxicab drivers.

On June 1, 1997, a rule mandating partitions in certain for-hire vehicles became effective. Although the rule mandates that all for-hire vehicles be equipped with a partition, unless the vehicle owner qualifies for one of the enumerated exemptions, most for-hire vehicles have not been equipped with partitions or other security devices.

Section 6-13(a)(2) of the for-hire vehicle rules provides that a vehicle owner shall be exempt from the partition requirement if, **inter alia,** the vehicle is driven exclusively by the owner. A similar exemption exists in the Taxicab Owners' Rules, §1-17(b). Since approximately ninety (90%) percent of all for-hire vehicles, and a smaller but significant number of taxicabs are driven by owner-operators, a substantial percentage of vehicles transporting passengers for hire are presently exempt from the partition requirement. This exemption was created because many taxicab and for-hire vehicle owners also use their vehicles as private and family vehicles, and the Commission had allowed such owner/operators the option to purchase partitions to protect themselves. However, many taxicab and for-hire vehicle owners place themselves at risk by not installing protective equipment in their vehicles where such equipment has been proven to be an effective deterrent to crime.

Independent studies have clearly demonstrated that the installation of partitions has reduced the number of crimes committed against taxicab and for-hire vehicle drivers. Accordingly, mandating the use of such devices will have a positive effect on reducing crimes committed against the drivers of such vehicles.The mandatory use of partitions or other safety devices is directly related to public safety. In light of the recent increase in the number of serious crimes committed against such drivers, immediate action is necessary.

On April 18, 2000, the Commission found an imminent threat to public health and safety, and voted to amend its Rules to eliminate the provisions that exempted for-hire vehicles and medallion taxicabs driven exclusively by owner-operators from the mandatory partition requirement.

It is hereby certified that the immediate effectiveness of rule amendments eliminating certain exemptions to the requirement for the mandatory installation of protective partitions or other security equipment in for-hire vehicles, as provided herein, is necessary to address an immediate threat to public safety.

. . . . . .

Statement of Basis and Purpose The emergency rule adopted herein by the New York City Taxi and Limousine Commission ("TLC") is promulgated pursuant to §1043(h)(1) of the Charter of the City of New York, authorizing the Commission to promulgate emergency rules upon a declaration of an emergency relating to the public health, safety or welfare, or the provision of public services; §2303(a) of the Charter of the City of New York, which permits the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under §2303(b) of such Charter, authorizing the TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under §19-503 [City Record Apr. 21, 2000 read "§§19-503 and 19-503.1-Editor] of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. In accordance with §1043(h)(1) of the New York City Charter, the TLC has made a finding of imminent and immediate threat to public health, safety, and property, and to the provision of a necessary public service. ["This finding has been approved by the Mayor." This sentence is in City Record Apr. 21, 2000.] On June 1, 1997, a rule mandating partitions in certain for-hire vehicles became effective. Although the rule mandates that all for-hire vehicles be equipped with a partition, unless the vehicle owner qualifies for one of the enumerated exemptions, most for-hire vehicles have not been equipped with partitions or other security devices. Sections 1-17(b) of the Taxicab Owners' Rules and 6-13(a)(2) of the For-Hire Vehicle Rules provide that a vehicle owner may be exempt from the partition requirement if, **inter alia,** the vehicle is driven exclusively by the

owner. Since approximately ninety (90%) percent of all for-hire vehicles are driven by owner-operators, the vast majority of for-hire vehicles are presently exempt from the partition requirement. In addition, a substantial number of taxicabs are driven exclusively by the vehicle owner or long-term lessee ["long term lessee" reads "shareholder" in City Record Apr. 21, 2000], and are exempt from this requirement. This exemption was created because many for-hire vehicle owners and individually-owned taxicabs also use their vehicles as private and family vehicles, and the Commission allowed such owner/operators the option to choose to purchase partitions to protect themselves. Many taxicab and for-hire vehicle owners have placed themselves at risk by not installing protective equipment in their vehicles, where such equipment has been proven to be an effective deterrent to crime. Independent studies have clearly demonstrated that the installation of partitions has reduced the number of crimes committed against taxicab and for-hire vehicle drivers. Accordingly, eliminating exemptions from the mandatory use of partitions or other security devices will promote driver safety. Taxicabs that are presently mandated to have partitions shall not be relieved of this requirement through the installation of an in-vehicle camera or other approved security device. Taxicabs presently not required to have partitions could comply with this rule through the installation of either a partition or an approved security device.

2. Statement of Basis and Purpose in City Record June 1, 2000: This Rule by the New York City Taxi and Limousine Commission ("TLC") is promulgated pursuant to authority conferred under §2303(a) of the Charter of the City of New York, which permits the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under §2303(b) of such Charter, authorizing the TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under §§19-503 and 19-503.1 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. In 1996, the Taxi and Limousine Commission mandated that most taxicabs be equipped with partitions. Immediately after the enactment of this Rule, the number of violent crimes committed against taxicab drivers dropped significantly. On June 1, 1997, a Rule mandating partitions in certain for-hire vehicles became effective. That Rule requires that all for-hire vehicles be equipped with a partition, unless the vehicle owner qualifies for one of the enumerated exemptions. Section 6-13(a)(2) of the For-Hire Vehicle Rules provides that a vehicle owner may be exempt from the partition requirement if, **inter alia,** the vehicle is driven exclusively by the owner. Since most for-hire vehicles qualify for an exemption from the partition requirement since they are driven exclusively by the vehicle owner, relatively few for-hire vehicles have been equipped with partitions or other security devices. Section 1-17(b) of the Taxicab Owners' Rules also exempts certain taxicabs driven exclusively by the vehicle owner or a shareholder in the corporation owning taxicabs from the mandatory partition requirement. These exemptions to the partition requirements were enacted primarily because many for-hire vehicle owners and individually-owned taxicabs also use their vehicles as private and family vehicles, and the Commission allowed such owner/operators the option to choose to purchase partitions to protect themselves. Many taxicab and for-hire vehicle owners have placed themselves at risk by not installing protective equipment in their vehicles, where such equipment has been proven to be an effective deterrent to crime. A recent increase in the number of assaults and violent crimes committed against drivers of for-hire vehicles prompted the Commission to issue a declaration of an immediate and imminent threat to the public health and safety on April 18, 2000, which was approved by the Mayor. The Commission also adopted an Emergency Rule pursuant to §1043(h) of the New York City Charter, repealing both the taxicab and the for-hire vehicle owner-operator exemptions to the partition requirement. The Rule promulgated herein adopts the text of this Emergency Rule as a final Rule of the Commission. Independent studies have clearly demonstrated that the installation of partitions has reduced the number of crimes committed against taxicab and for-hire vehicle drivers. Accordingly, eliminating exemptions from the mandatory use of partitions or other security devices will promote driver safety. Taxicabs that are presently mandated to have partitions shall not be relieved of this requirement through the installation of an in-vehicle camera. Taxicabs presently exempt from the partition requirement may comply with this Rule through the installation of either a partition or the in-vehicle camera, presently approved by the Commission as an alternative safety device, or another security device that may be approved by the Commission in the future. For-hire vehicles that are not equipped with partitions may install either a partition or an approved in-vehicle camera to comply with the requirements of this Rule.

3. Statement of Basis and Purpose in City Record May 26, 2006: This rulemaking amends existing rules requiring

installation of partitions in taxicabs, to create an exception for taxicabs that are equipped with factory installed curtain airbags. Taxi and Limousine Commission ("Commission") staff have found that partitions that conform to existing rules will impede the proper deployment of curtain airbags that are factory installed in 2006 Toyota Sienna minivans, a vehicle model that is approved for use as a taxicab pursuant to §3-03(c)(7) of the Commission's rules, thereby reducing or eliminating the safety value of those curtain airbags, and creating additional risk of injury to the driver and passengers of a taxicab in the event of an accident. In order to permit proper deployment of curtain airbags, this rule allows the owner of a taxicab equipped with factory installed curtain airbags to install a modified partition or to install no partition, and requires the owner in either event to install a cellular telephone with an emergency dialing feature and a security camera system approved by the Commission pursuant to §1-17(b)(3) of the Commission's rules. This rule further provides that the penalty for installation of an improper partition or for the failure to install a proper cellular telephone and security camera system is the same as the penalty provided in existing rules for failure to install a proper partition.

4. Statement of Basis and Purpose in City Record Apr. 23, 2007: The rules promulgated herein enhance and clarify the requirements for security equipment in taxicabs and for-hire vehicles. Existing rules require, with certain exceptions, that taxicabs be equipped with partitions, and that each taxicab without a partition be equipped with a cellular telephone that has an emergency dialing feature, and with "some other device specifically approved by the commission" (section 1-17(b)(3)). Existing rules provide that a for-hire vehicle affiliated with a livery base station must have either a partition or both an FCC commercial two-way radio with an emergency button and "[s]ome other device specifically approved by the Chairperson" (section 13(a)(3)(ii)). The only device the Commission has approved pursuant to section 1-17(b)(3) and the only device the Chairperson has approved pursuant to section 6-13(a)(3)(ii) is an in-vehicle camera system. Therefore, the rules promulgated herein specify that the "other device" for taxicabs and liveries that are not furnished with partitions must be an in-vehicle camera system. In addition, the rules promulgated herein add an alternative in the for-hire vehicle rules to the outmoded FCC commercial two-way radio, specifically a cellular telephone with an emergency dialing feature. The rules promulgated herein also provide further specifications for the transparent portions and protective plate of partitions. Existing taxicab rules require that a partition have a protective plate as part of the partition and a bullet-resistant, clear and scratch-resistant material for the transparent portion of the partition, and further require that the partition allow passengers to pay fares either by cash or by credit card should the taxicab be capable of accepting credit card payments. The rules promulgated herein for taxicabs require the transparent portion of partitions be a mar-resistant polycarbonate that shall be not less than 0.375 inch thick and a protective plate that shall be constructed of a 0.085 inch thick ballistic steel or its equivalent. Existing rules for for-hire vehicles require that a partition have a protective plate and a transparent portion of the partition that is made of lexan, margard or other polycarbonate material not less than 0.375 inch thick. The rules promulgated herein for for-hire vehicles delete the two brand name polycarbonates, lexan and margard, and require that the polycarbonate material be mar-resistant, and further that the partition allow passengers to pay fares either by cash or by credit card should the livery vehicle be capable of accepting credit card payments. In addition, the rules promulgated herein allow for a new L-shaped partition that separates the driver from both front-seat and rear-seat passengers and a new partition that accommodates curtain airbags, as alternatives to the traditional flat partition that separates the front and rear areas of the vehicle. An L-shaped partition model was approved by the Commission on September 14, 2006, and the partition model for vehicles that are factory-equipped with curtain airbags was approved on December 14, 2006. The rules promulgated herein codify those approvals. Presently, taxicabs that are equipped with factory installed curtain airbags are exempted by existing rules from the partition requirement, and the for-hire vehicle rules are silent as to vehicles with curtain airbags. The rules promulgated herein require partitions for all such taxicabs and for all such for-hire vehicles which are not equipped with a cellular telephone with an emergency dialing feature and an in-vehicle camera system. On and after the effective date of the rules promulgated herein, a taxicab or for-hire vehicle affiliated with a livery base station, when its existing partition is required to be replaced or when a partition is installed (including, but not limited to, at hack-up or first licensing), must be equipped with a partition that meets or exceeds the new specifications, unless the taxicab or for-hire vehicle is exempt from the partition requirement and complies with the alternative requirements. Finally, on and after the effective date of the rules promulgated herein, a taxicab or a for-hire vehicle that does not have a partition, when its existing in-vehicle camera system is required to be replaced or when an in-vehicle camera system is installed (including,

but not limited to, at hack-up or first licensing), shall have installed an in-vehicle camera system that complies with these rules. Some taxicabs may have in-vehicle camera systems that comply with the specifications promulgated herein. Others may need expanded memory and, therefore, may require upgrades to comply with these rules. Similarly, in-vehicle camera systems previously approved for use in for-hire vehicles do not have sufficient memory to comply with the rules promulgated herein. Therefore, on and after the effective date of these rules, when in-vehicle camera systems are required to be replaced or installed, those systems previously approved for for-hire vehicles will require upgrades, if available, or replacement. The rules promulgated herein do not alter the exemptions from the partition requirement for taxicabs that are subject to existing rules, with the exception of taxicabs equipped with factory-installed curtain airbags. Existing rules exempt the following taxicabs from the partition requirement: owner driven taxicabs (section 1-17(b)), taxicabs equipped with factory-installed curtain airbags (section 1-17(c)) and hybrid electric taxicabs (section 3-03.1(c)(10)). Now that there is an approved partition that can accommodate the deployment of curtain airbags, the rules promulgated herein require that such a partition be placed in taxicabs and for-hire vehicles equipped with factory-installed curtain airbags, unless they are otherwise exempt. Existing rules exempt the following for-hire vehicles from the partition requirement: for-hire vehicles affiliated only with black car and/or luxury limousine base stations (section 6-13(a)(2)), and for-hire vehicles equipped with in-vehicle camera systems and two-way radios (section 6-13(a)(3)). The rules promulgated herein for for-hire vehicles add a cellular telephone with an emergency dialing feature as an alternative to the two-way radio. The rules promulgated herein also require that taxicabs and for-hire vehicles equipped with in-vehicle camera systems be provided with decals on the rear passenger windows advising that the vehicle is equipped with camera security and that passengers will be photographed. Section 3-03(e)(3)(v)(U) of the rules promulgated herein was amended after publication in order to permit not only manufacturer authorized installers of in-vehicle camera systems that were also taximeter businesses licensed by the Commission but also such installers who are currently licensed by the Department of Consumer Affairs to install, repair or modify such systems. Further, section 3-03(e)(3)(v)(V) of these rules was amended to provide that within fourteen (14) calendar days after installation, repair or modification, rather than upon installation, repair or modification, a notarized affidavit signed by a manufacturer's authorized installer attesting to the proper functionality of the in-vehicle camera system shall be provided to the Commission by the authorized installer.

5. Statement of Basis and Purpose in City Record Dec. 18, 2007: The rule promulgated herein requires that taxicabs, other than accessible taxicabs, put into service beginning on October 1, 2008, must have a minimum rating of 25 miles per gallon in city driving and beginning on October 1, 2009, must have a minimum rating of 30 miles per gallon in city driving. In order to enable taxicabs to satisfy that standard, taxicabs will be permitted to meet the smaller vehicle specifications currently in place for hybrid electric vehicles (section 3-03.1(c)). The rule also specifically permits the operation of taxicabs fueled only by Compressed Natural Gas if such vehicles are originally manufactured vehicles and meet other requirements of the taxicab specifications. Only accessible vehicles as defined in section 3-03.2 are exempt from these minimum gas mileage requirements. The city gas mileage rating of a vehicle is determined pursuant to chapter 329 of title 49 of the United States Code and regulations promulgated pursuant thereto. Ratings for 2008 model vehicles are available at **http://www.fueleconomy.gov/feg/FEG2008.pdf,** and it is anticipated that the 2009 ratings will be available at a similar Web site. When fully phased in, the rule is expected to result in savings of more than $4,500 in gasoline costs per vehicle per year. Therefore, the rule is expected to result in industry-wide gasoline savings of approximately $60,000,000 per year. These savings are expected to increase the economic health of the industry by decreasing driver costs and increasing medallion value, and to further benefit the public by reducing upward pressure on taxicab fares. In light of recent advancements in the design of driver-passenger partitions, the new higher-mileage taxicabs put into service pursuant to this rule will not be exempt from partition requirements. In addition, the rule eliminates the exemption from partition requirements for hybrid electric taxicabs. When the use of hybrid electric vehicles as taxicabs was first approved by the Commission in September 2005, there was no existing partition design that would retain sufficient passenger legroom in the smaller vehicles. However, experience with an "L-shaped" partition, first approved by the Commission in September 2006, and subsequently incorporated into the Commission's rules in April 2007, has resolved this concern. Therefore, given the importance of driver safety, and given the demonstrated effectiveness of partitions over the years in furthering driver safety, the rule requires partitions in smaller vehicles that already operate as hybrid electric taxicabs and will operate under the rule as higher mileage

taxicabs. The exemption from partition requirements for owner-driven taxicabs that deploy security camera systems (section 1-17(b)) is not affected by this rule.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-18 Trouble Lights.

(a) An owner shall equip all taxicabs with a help or distress signaling light system in accordance with §3-03(e)(3)(ii) of the Taxicab Specifications.

HISTORICAL NOTE

Section added City Record Feb. 8, 1994 eff. Mar. 6, 1994.

Subd. (a) amended City Record Mar. 29, 1996 eff. Apr. 30, 1996. [See T35 §1-11 Note 1]

Subd. (a) amended City Record Dec. 29, 1995 §5, eff. Feb. 1, 1996. [See T35 §1-01 Note 1]

CASE NOTES

¶ 1. Taxi cabs are equipped with distress lights, which are designed for alerting police when a driver is in danger. Where a taxi driver accidentally activated the car's distress light, the police officer reasonably believed that the taxi was in distress. Thus, the officer had justification to stop the cab and direct defendant to step out of the cab. The officer had the right to conduct a search of defendant when he noticed a bulge in defendant's pocket. Thus, in a prosecution for weapons possession, a motion to suppress the gun evidence was denied. People v. Rennie, 2003 WL 145541 (Sup.Ct. Kings Co.).

35 RCNY 1-19

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-19 Electrical Dual Message Taxi Reminder Voice. [Repealed]

HISTORICAL NOTE

Section repealed City Record Apr. 8, 2003 §1, eff. May 8, 2003. [See Note 1]

Section amended City Record Apr. 29, 1997 eff. June 1, 1997. [See T35 §3-03 Note 4]

Section added City Record Mar. 29, 1996 §2, eff. Apr. 30, 1996. [See T35 §3-03 Note 2]

NOTE

1. Statement of Basis and Purpose in City Record Apr. 8, 2003:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which authorizes the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the City; under §2303(b)(2) of such Charter, which authorizes TLC to establish standards of safety, design and comfort for vehicles licensed by the TLC; §2303(b)(11) of such Charter, which authorizes the TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter; and under §19-503 of the Administrative Code of the City of New York, which authorizes the Commission to promulgate rules to further the objectives of the Charter and the Administrative Code.

This promulgation repeals the requirement contained in TLC Rules and the Taxicab Specifications that each

taxicab be equipped with an electronic dual message taxi reminder voice.

Since 1997, the Rules of the TLC have required that each taxicab be equipped with an electronic dual message taxi reminder voice. After the taximeter is engaged, the electronic message reminds passengers to fasten their seat belts. At the conclusion of the trip, passengers are reminded through the electronic voice to take their receipt and personal property before leaving the taxicab. The purpose of this rule was to encourage passengers to wear seat belts while riding in taxicabs, as well as to take their receipt and remember their property.

According to surveys of passengers conducted both by the TLC and by other entities, most passengers in taxicabs do not wear seat belts despite the electronic taxi reminder message. A recent TLC survey of passengers also indicates that most passengers do not find the electronic message to be helping in reminding them to fasten their seat belts, remember their receipt or take their property. Furthermore, according to this survey, most passengers found the messages to be annoying.

The Rules of the Commission require that each taxicab be equipped with seat belts that are accessible, visible and in good working order. The Commission believes that the message to advise passengers of the benefits of wearing seat belts can be better achieved through improved signage in taxicabs, and through training drivers on the importance of communicating the importance of wearing seat belts to their passengers. TLC rules require that a driver provide the passenger a receipt at the conclusion of the trip, even if the passenger does not request a receipt. Therefore, the electronic reminder to take a receipt is not necessary.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-20 Taximeters.

(a) An owner shall equip the taxicab with a taximeter subject to the following conditions:

(1) it shall be of a make and type acceptable to the Commission;

(2) Reserved.

(3) it shall be affixed to the vehicle's dashboard so as to be clearly readable and visible to all passengers in the vehicle;

(4) its serial number shall be the same as that shown on the rate card assigned to the taxicab; or entered on the rate card by an authorized meter shop; and

(5) tire size shall be the same as that for which the taximeter is calibrated, as indicated by the rate card.

(b) A taxicab shall be equipped with a taximeter which shall be in good working condition and shall accurately compute the rate of fare currently established by the commission. Penalties for violation are as follows:

(1) The penalty is $50, if the meter is found to be at least 52.8 feet (one percent) inaccurate, but less than 264 feet (five percent) inaccurate in computing distance, or more than one percent but less than five percent inaccurate in computing time.

(2) The penalty is $200, if the meter is found to be at least 264 feet (five percent) inaccurate, but less than 528 feet

(ten percent) inaccurate in computing distance, or more than five percent but less than ten percent inaccurate in computing time.

(3) The penalty is $300, if the meter is found to be at least 528 feet (ten percent) inaccurate in computing distance or ten percent inaccurate in computing time, for a first violation.

The penalty is $600, if the meter is found to be at least 528 feet (ten percent) inaccurate in computing distance or ten percent inaccurate in commuting time, for a second and subsequent violation within thirty-six months.

HISTORICAL NOTE

Section added City Record Apr. 30, 1992 effl May 30, 1992.

Section amended City Record Aug. 4, 1995 §1, eff. Sept. 6, 1995. [See Note 1]

Subd. (a) amended City Record Dec. 29, 1995 §6, eff. Feb. 1, 1996. [See T35 §1-01 Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Aug. 4, 1995:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The purpose of the amendment is to protect the riding public from overcharges due to inaccurate meters and tampered meters. The amendment increases the penalty for owners whose meters are found to be fast or in any way tampered or altered when tested by the TLC.

Upon consideration of public comments, the increases in the penalties were changed.

First, the thresholds for violation were raised. The thresholds for higher penalties were established for meters that are five percent fast and ten percent fast, rather than at the original proposed thresholds of three and five percent fast. This change was made to make the penalties relate more closely to perceivable variations in the meter's rate of advance.

Subd. (b) added City Record Jan. 31, 2000 §1, eff. Mar. 1, 2000. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Jan. 31, 2000:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which authorizes the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under §2303(b) of such Charter, which authorizes the TLC to promulgate rules and regulations reasonably necessary to exercise the authority conferred upon it by the Charter; under §19-503 of the Administrative Code of the City of New York, which authorizes the Commission to promulgate rules to further the objectives of the Charter and the Administrative Code; under §19-506 of said Code, authorizing it to impose reasonable penalties for violations of its rules; and under §§19-507.1(g) and (h) of said Code, enumerating certain affirmative defenses to the charge of taximeter tampering.

These rule amendments set forth certain affirmative defenses that may be raised in defense of a charge of taximeter tampering against a taxicab owner or driver, and create an affirmative obligation to report evidence of taximeter tampering to the Commission.

Local Law No. 20 of 1999 amended the Administrative Code of the City of New York to add certain enumerated affirmative defenses that may be asserted in defense of a charge of taximeter tampering. These defenses are set forth in the Code, and permit a respondent to assert as an affirmative defense that: (a) he or she did not know of or participate in the taximeter tampering; and (b) he or she exercised due diligence to ensure that taximeter tampering does not occur. With respect to allegations of taximeter tampering against owners, the Code enumerates examples of the exercise of due diligence.

This rule amendments conform the language of the Commission rules with respect to taximeter tampering with the Administrative Code by including the affirmative defenses in the appropriate rule relating to taximeter tampering. The language in the proposed rule is substantially identical to the language with respect to affirmative defenses set forth in the Code.

The amendments also impose upon Taxicab Owners and Drivers an affirmative obligation to report evidence of taximeter tampering to the Commission. Under the existing rules of the Commission, licensed taximeter businesses are required to notify the Commission whenever evidence of tampering is discovered with respect to a taximeter and/or its wiring. The proposed penalty for a violation of this rule is identical to the penalty provided for similar misconduct in the Taximeter Business Regulations.

This reporting requirement will enable the Commission to protect the public through enhanced enforcement of its rules prohibiting taximeter tampering.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Operation of a taxicab by the respondent, the owner and driver of the cab, with a device known as a "zapper," the purpose of which was to enable the operator to tamper with the taximeter and artificially increase the fare to be charged to customers, constituted a violation of this section, as well as §§1-60(b), 1-67(a), 2-26(d), 2-30(a), 2-31(a),

2-61(a) and 2-66(a), the penalty for which was revocation of the respondent's hack license and forced sale of his medallion. Taxi and Limousine Commission v. Malek, OATH Index No. 1540/97 (Aug. 5, 1997).

¶ 2. A taxicab owner is strictly liable for meter tampering pursuant to this section, even if the owner had no knowledge of that tampering. Taxi and Limousine Commission v. Mayfield Cab Corp., OATH Index No. 1378/95 (Aug. 2, 1996).

¶ 3. Medallion owner, who leased medallion through agent leasing broker to drivers held liable for meter acceleration device found in taxicab during inspection pursuant to section 1-23(a) of owner's rules, which imposes strict liability upon medallion owners even where, as here, the owner claims he was unaware of the violation. **Taxi and Limousine Comm'n v. Hom,** OATH Index Nos. 433 & 435/99 (Oct. 28, 1998).

¶ 4. Medallion owner, who actively managed the medallion from its garage, was strictly liable under section 1-23(a) where unauthorized meter acceleration device had been installed in the taxi. Forced divestiture of one medallion and a $5,000 fine is imposed for the corporate owner. **Taxi and Limousine Comm'n v. Mohammad,** OATH Index Nos. 173-75/99 (Oct. 6, 1998).

¶ 5. Although no zapper was found in respondent's taxicab, the meter pulse wires had been tampered with. Administrative law judge found that notwithstanding the absence of evidence as to the presence of a zapper, under the TLC rules, the wire configuration and tape on the meter connections were sufficient to sustain the charges, where respondent was the sole owner/driver of the medallion. **Taxi and Limousine Comm'n v. Singh**, OATH Index No. 1174/99 (July 13, 1999).

¶ 6. Where indicia of tampering was found, meter wiring pulse divider was missing its seal and exposed pulse wires were lying flat against metal bracket attached to meter, respondent was found in violation of paragraph (a) of this section. As an owner, respondent is held strictly liable for meter tampering. **Taxi and Limousine Comm'n v. Boodhram**, OATH Index No. 761/99 (Jan. 29, 1999), **modified on penalty**, Comm'n Dec. (Mar. 25, 1999).

¶ 7. **But see**, Administrative Code section 19-507.1 (added by Local Law 20/1999), which provides that it shall be an affirmative defense for a taxi owner or driver charged with meter tampering that the owner or driver did not know of or participate in the meter tampering and exercised due diligence to ensure that meter tampering does not occur.

¶ 8. Where a zapper device, used to accelerate taximeters, was concealed inside the driver's side door of a taxicab and where the inspector observed that a portion of the pulse wire was bare, three drivers were found to have violated this section. The visibly exposed pulse wire gave the three drivers, one of whom was the medallion owner, "reason to know that the taxicab's equipment had been tampered with by another driver." Revocation of three drivers' licenses and forced sale of the medallion imposed. **Taxi and Limousine Comm'n v. Singh**, OATH Index Nos. 828-30/99 (Apr. 15, 1999), **modified on penalty**, Comm'n Decision (May 20, 1999).

CHAPTER 1 TAXICAB OWNERS RULES

§1-25 Taximeter Inspection.

(a) A taxicab's taximeter shall be tested by personnel authorized by the commission for accuracy over a measured mile course and its installation shall be tested by such personnel for compliance with the rules of the Commission. The results of such test shall be indicated on the rate card:

(1) within one year of the date of the last test;

(2) whenever a taximeter is installed in a vehicle;

(3) when the transmission, pinion gear or differential is altered, repaired or replaced; (4) when a change is made in any other part of the taxicab that may affect the meter reading; and

(5) at any other time required by the Commission.

35 RCNY 1-26

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-26 Taxicab Identification Braille and Raised Lettering Plaques.

(a) As of October 1, 1997, an owner shall equip all taxicabs with a Taxicab Identification Braille Plaque and a Taxicab Identification Raised Lettering Plaque, in conformance with the following specifications:

(1) The Taxicab Identification Braille Plaque shall be made of .040 gauge aluminum with a matte finish and measure three and a quarter inches in length by one and three quarter inches in height, with radius corners. The plaque shall state, in Raster Braille grade two, the medallion number centered on the first line, the word "COMPLAINTS" centered on the second line, and the telephone number "212 NYC TAXI" centered on the third line. The plaque shall be permanently affixed on the door armrest of the horizontal plane of the right rear door, or another location approved by the Chairperson.

(2) The Taxicab Identification Raised Lettering Plaque shall be made of one eighth of an inch thick black acrylic plastic and measure eleven inches in length and five inches in height, with radius corners and four holes (one in each corner) for attachment with screws. The plaque shall state, in one inch high white Helvetica lettering that is permanently affixed, the medallion number centered on the first line, the word "COMPLAINTS" centered on the second line, and the telephone number "212 NYC TAXI" centered on the third line with appropriate spacing between the three words. The plaque shall be permanently affixed on the rear of the front right passenger seat or partition, not more than six inches below the lexan or polycarbonate portion of the partition.

HISTORICAL NOTE

Section added City Record July 8, 1997 eff. Aug. 11, 1997. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record July 8, 1997:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The rule requires taxicabs to be equipped with two Taxicab Identification Braille and Raised Lettering Plaques. The plaques will aid passengers who are blind and visually impaired to identify the taxicab they are riding in.

The purpose of this rule is to provide blind and visually impaired passengers with an opportunity to file complaints with the TLC if they are dissatisfied with their ride, and to report lost property.

Based on public comment, the rule was amended to provide for two separate plaques, one in Braille and one in raised lettering, for easier reading. The rule was further amended to provide that an offense of a missing plaque would not result in a fine if corrected within forty-eight hours.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-35 Markings and Advertising.

(a) An owner of a taxicab shall apply taxicab markings approved by the Commission, specifically, two taxicab logo decals, two rate of fare decals, two medallion number decals and two checkerboard stripe decals, to such taxicab at the locations described in section 1-36 of this chapter. An owner of a taxicab shall obtain the approved taxicab markings from a person or entity authorized by the Commission to print and distribute such decals. A depiction of the decals described herein and a list of persons authorized to print and distribute such decals shall be available on the Commission's website and/or through other means determined by the Commission and announced on its website. Authorized stand-by vehicles shall display SBV number decals in lieu of the medallion number decals.

(b) An owner shall not display any lettering, emblem, or advertising of any kind on the exterior of a taxicab, its windows or an exterior accessory, by means of paint, stencil, decal, sticker, or otherwise, unless authorized by the Commission, except:

(1) the taxicab markings specified in subdivision (a) of this section;

(2) such inscriptions as are permitted or required by these rules or the Commission's Marking Specifications for Taxicabs;

(3) such advertising as may be authorized by the Commission on the vehicle's rate card;

(4) Reserved.

(5) for an accessible taxicab, insignia, the designs of which shall be provided by the Commission on its website or through other means it deems appropriate as set forth on its website, that identify the vehicle as an accessible taxicab. Such insignia shall be located on the exterior of the C-pillars of a sedan or an SUV or on the exterior of the D-pillars of a minivan, on both sides of such taxicab, and shall be visible to passengers entering the accessible taxicab and shall also be located on the middle of the hood of such taxicab so as to be visible to passengers hailing or approaching such taxicab; and

(6) for a clean air taxicab, insignia, the design of which shall be provided by the Commission on its website or through other means it deems appropriate as set forth on its website, that identify the vehicle as a clean air vehicle. Such insignia shall be located on the exterior of the C-pillars of a sedan or an SUV or on the exterior of the D-pillars of a minivan, on both sides of such taxicab, and shall be visible to passengers entering the clean air taxicab.

Such inscriptions and advertising shall be maintained in good condition.

(c) An owner shall not display inside a taxicab any advertising or other notice not specifically authorized by these rules or the Commission's Marking Specifications for Taxicabs unless approved by the Commission, except:

(1) industry signage/logos of all credit/debit cards accepted by the taxicab technology system, all of equal size, shown in the information content on the passenger information monitor screen; and

(2) advertising in the information content on the passenger information monitor screen as set forth in section 1-36 of this chapter and in section 3-07 of this title.

(d) An owner shall not display emblems on his vehicle's exterior, other than an emblem identifying the owner, an association of owners, a taxicab drivers' union, or the taxicab manufacturer. Such emblems shall conform to the Marking Specifications for Taxicabs and shall be subject to the approval of the Commission. No more than two of the same emblem may be displayed on a taxicab, unless otherwise authorized by the Commission.

NOTE

1. Statement of Basis and Purpose in City Record May 23, 2007:

These rules implement Local Laws 54 and 55 for the Year 2006, which added §§19-514(h) and (i) and 19-536 of the Administrative Code of the City of New York, requiring that each Taxi and Limousine Commission-licensed accessible or clean air vehicle be marked with two insignia identifying it as an accessible or clean air vehicle. The rules incorporate the statutory definition of a clean air vehicle, which apply to taxicabs and for-hire vehicles. The rules retain the existing definition of an accessible taxicab (§3-03.2 of the Commission's rules) and add a definition of an accessible for-hire vehicle.

The rules provide that a clean air vehicle insignia design and an accessible vehicle insignia design will be made available on the Commission's website or by other means the Commission deems appropriate as set forth on its website. The insignia will be posted on the exterior of the C-pillars of a sedan or an SUV or on the exterior of the D-pillars of a minivan, on both sides of the accessible vehicle visible to passengers entering the vehicle.

In addition, pursuant to the Administrative Code provisions, the rules require that the owner of a clean air taxicab dislay in the rear passenger compartment, visible to all passengers in the back seat, passenger information to be provided by the Commission. That information shall include identification of the clean air taxicab as a clean air vehicle, the Commission's Web page address, and, to the extent practicable, the estimated air quality benefits associated with the use of such vehicle and the type of fuel used to power such vehicle.

2. Statement of Basis and Purpose in City Record June 20, 2007: The rules promulgated herein enhance the visibility of medallion taxicabs, making them more identifiable to the riding public and making the exterior posted rates of fare and medallion number decals more easily visible to the passengers entering the taxicabs. The rules promulgated herein require that taxicab logo decals be placed on the front doors of medallion taxicabs, rather than on the rear doors, and rate of are decals be placed on the rear doors of taxicabs, rather than on the front doors, permitting the rate of fare to be observed by the passengers entering through rear doors. The rules promulgated herein also require that checkerboard stripe logo decals to be placed horizontally on the rear quarter panels of the vehicle, just below the window, increasing the visibility of medallion taxicabs. The medallion number decals shall be placed forward of and aligned with the checkerboard stripe decals so that the two decals appear to be one stripe. The decals shall be of the non-detachable type only.

3. Statement of Basis and Purpose in City Record Sept. 16, 2008: Pursuant to Local Law 55 of 2006 (Administrative Code §19-514, subd. h), existing Taxi and Limousine Commission ("Commission") rules require markings on wheelchair accessible taxicabs, specifically on the C-pillars of a sedan or an SUV or D-pillars of a minivan. Feedback from taxicab passengers who use wheelchairs indicates that these markings may not always be sufficiently visible to passengers attempting to hail wheelchair accessible taxicabs. Therefore, this promulgated rule requires an additional marking to be placed in the middle of the hood of the taxicab. As with the previous markings, the new marking will be designed by the Commission. The Commission intends to use a larger marking for the hood than is used for the pillars, in order to enhance the visibility of wheelchair accessible taxicabs for street hails.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-36 Marking Specifications for Taxicabs Inscription Location Size.

Inscription	Location	Size
(a) Rate of fare decals (required). (Non-detachable type only.)	Both rear doors centered left to right and located in the upper half of the flat surface between the bottom edge of the door and the door handle.The base line of the rate of fare and taxicab logo decals shall be parallel and the same distance to the bottom door edge.	The size of the approved rate of fare decals shall be determined by the Commission.
(b) Taxicab logo decals (required)(Non-detachable type only.)	Both front doors centered left to right and located in the upper half of the flat surface between the bottom edge of the door and the door handle.The base line of the rate of fare and taxicab logo decals shall be parallel and the same distance to the bottom door edge.	The size of the taxicab logo decals shall be determined by the Commission.
(c) Medallion number (required)	Front and rear of roof light.	23/4" to 3" high letters 1/2" thick.
(d) "OFF DUTY" (required)	Each end of roof light.	11/4" high letters 1/4" thick.
(e) "Owner-Driver" (optional)(Detachable signs suspended from door frames are not permitted.)	Rear of taxi.	3" maximum height.
(f) EMBLEMS (Optional)	On rear baggage compartment in lower right corner of deck	2" high letters 1/4" thick.

(1) Fleet Owner (2) Owner Association (3) Taxicab Drivers' Union insignia (4) Taxicab manufacturer	lid. Consult the Commission if contour of lid requires another location on the lid.	Avoid overcrowding.
(g) Medallion number, interior. (required) Maybe a one-piece decal or astencil. The numbermust be of a colorcontrasting with theseat, to provide for easylegibility.	On the back of the front seat. The top of the number shall be located not more than two inches below the top of the front seat.	Numbers and letter shall be 3" minimum in height.
(h) Passenger Information Sign. (required) Shall contain the information required by the Chairman or his designee.	On the back of the front seat or on a safety partition, displayed in a manner which is clearly visible to the passengers in the back seat. If the taxi is equipped witha safety partition, the passenger information sign may be placed on the partition behind the driver's head, but no higher than a headrest would be.	Approximately 12" wide by 6" high.
(i) "Drivers Wanted" sign. May include the telephone number of the owner. (Optional)	Rear of taxi.	No more than 24" wide by 3" high.
(j) "If this taxi is parked for over 24 hours, please call owner at (telephone number)..." (Optional)	Rear of taxi or horizontal on dashboard.	No more than 24" wide by 3" high.
(k) Rate for cellular connections to telephone network, plus a statement that telephone network charges would be additional. (required for taxicabs equipped with cellular telephones)	Interior of passenger compartment.	To be approved by the Commission.
(l) Telephone available, or similar language or symbol (optional)	Exterior, on a door or a side window.	4" by 6" or smaller.
(m) Brand name of passenger information monitor manufacturer or taxicab technology service provider	On the bezel of the frame of the passenger information monitor	Not to exceed 11/4" in height and 4" in length
(n)* This[See Footnote 1] vehicle is equipped with camera security. YOU WILL BE PHOTOGRAPHED." (Decal; non-detachable type only.)	On each rear passenger window	Letters shall be at least one-half inch high.
(n)* Medallion number decals (required). (Non-detachable decals only.)	Immediately before the checkerboard stripe decal so that the two decals appear to be one stripe. The decals shall be applied to both rear quarter panels, just be-	The size of the medallion number decals shall be determined by the Commission.

	low the rear windows or following the line created by the bottom edge of the windows, such that the number and checkerboard are aligned and appear to be one stripe.On some vehicles, such as minivans, the medallion number may be placed at the rear of the sliding door, but must still align with the checkerboard stripe.	
(o) Checkerboard stripe decals (required). (Non-detachable decals only.)	Immediately behind the medallion number decal so that the two decals appear to be one stripe. The decals shall be applied to both rear quarter panels, just below the rear windows or following the line created by the bottom edge of the windows, such that the number and checkerboard are aligned and appear to be one stripe.The tailing end of the checkerboard may be shortened, if necessary, on vehicles with short quarter panels.	The size of the checkerboard stripe decals shall be determined by the Commission.
(p) Drivers are not allowed to use cell phones or handheld electronics. Decal or sticker shall be issued by the Commission.	Interior of passenger compartment, plainly visible to passengers.	As issued by the Commission.

35 RCNY 1-37

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-37 E-Z Pass Required.

(a) An owner shall participate in the E-Z Pass New York Program. An owner shall maintain a current account with the Metropolitan Transportation Authority, Triborough Bridge and Tunnel Authority ("MTA Bridges and Tunnels") E-Z Pass New York Program with a sufficient balance as required by said program. An owner shall have available at least one E-Z Pass tag for each medallion.

(b) An owner shall equip all taxicabs with an E-Z Pass tag provided by the MTA Bridges and Tunnels, which shall be attached as required by MTA Bridges and Tunnels, unless a driver has elected to use his own E-Z Pass tag as permitted pursuant to Rule 2-27(d).

(c) An owner shall be reimbursed by a driver for any discount toll amount incurred during the driver's shift through use of the E-Z Pass at the conclusion of the shift or lease period, or if not so reimbursed, may deduct said amount from any replenishment account established pursuant to Rule 1-83. However, an owner may not require the driver to reimburse more than the E-Z Pass discount toll amount.

HISTORICAL NOTE

Section added City Record Dec. 1, 1999 §1, eff. Dec. 31, 1999. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Dec. 1, 1999:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which authorizes the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under §2303(b) of such Charter, which authorizes the TLC to promulgate rules and regulations reasonably necessary to exercise the authority conferred upon it by the Charter; under §19-503 of the Administrative Code of the City of New York, which authorizes the Commission to promulgate rules to further the objectives of the Charter and the Administrative Code; and under §19-506 of said Code, which authorizes the Commission to impose reasonable penalties for violations of its rules.

These rule amendments require that all medallion taxicab owners equip their vehicles with an E-Z Pass tag and maintain a current account with the Metropolitan Transportation Authority, Triborough Bridge and Tunnel Authority ("MTA Bridges and Tunnels") E-Z Pass Program. All taxicab drivers operating for hire shall be required to use E-Z Pass when crossing New York City toll bridges and tunnels and to not charge passengers a toll amount in excess of the discounted E-Z Pass rate. The E-Z Pass tag must be attached to the inside of the windshield, behind the rearview mirror of the taxicab, or as otherwise required by the MTA Bridges and Tunnels E-Z Pass Program.

Drivers are required to ensure that a taxicab is equipped with E-Z Pass and would be required to use the E-Z Pass. Passengers could not be charged an amount in excess of the E-Z Pass charge. A driver using E-Z Pass and charging a passenger the full toll fare is committing an act in violation of the Taxicab Drivers' Rules which prohibit charging a passenger a fare in excess of the approved rate of fare. Drivers are also required to record tolls incurred on their trip sheets to assist the E-Z Pass tag holders in maintaining records of charges incurred.

Participation in the E-Z Pass program will benefit New York City in several ways. First and foremost, customer satisfaction would be improved. The electronic toll collection system has proven to be a faster and more convenient method of crossing bridges and tunnels. The use of E-Z Pass and express lanes help to alleviate delays at tollbooths. In addition, using E-Z Pass is a less expensive method for the passenger due to the discounted toll charge. Furthermore, E-Z Pass users will be reducing auto emissions attributable to idling in line at tollbooths, thereby improving the City's air quality.

Original rule proposals were published in the City Record on August 23, 1999. Additional amendments were published on September 27, 1999.

In response to public comments received by the Commission at its August 23, 1999 [meeting], the Commission published additional amendments that authorize the establishment of a replenishment account that could be used by owners for reimbursement of toll charges incurred by the driver but not paid to the owner. The rules permit an E-Z Pass tag holder to require drivers to establish an E-Z Pass replenishment account of up to $10 per shift (not to exceed a total of $100) from a driver. An E-Z Pass tag holder may also seek restitution from a driver for tolls that were collected by him but not reimbursed to the tag holder. A driver may also seek restitution from an owner who fails to return any excess amount in the replenishment accounts to the driver.

CHAPTER 1 TAXICAB OWNERS RULES

§1-40 Insurance Coverage.

(a) An owner shall comply with the New York State Vehicle and Traffic Law and the New York State Insurance Law regarding coverage by bond or policy of liability insurance and all other forms of insurance required by law.

(b) An owner shall notify the Commission, in connection with an application for renewal of a taxicab license each year, of the name and address of the carrier and the number of the policy for each taxicab owned by him, and submit proof of such coverage. The provision of such insurance information shall be a condition for license renewal.

(c)(1) An owner shall immediately report to his/her insurance carrier, in writing all accidents involving his/her taxicab which are required to be reported to the insurance carrier.

(2) An owner shall immediately report to the Commission, in writing, all accidents involving his or her taxicab which are required to be reported to the Department of Motor Vehicles pursuant to §605 of the Vehicle and Traffic Law. A copy of any report furnished to the Department of Motor Vehicles pursuant to law shall be furnished to the Commission within ten (10) days of the date by which the owner is required to file such report with the Commission of Motor Vehicles.

(d) Notwithstanding any inconsistent provision of subdivision a of this rule, each owner shall, for each taxicab owned by him, maintain for purposes of insurance or other financial security, coverage in an amount not less than $200,000 per person, payable for those expenses specified in paragraphs 1, 2 and 3 of subdivision a of §5102 of the New York State Insurance Law, and coverage in an amount of not less than $100,000 minimum liability and of not less than $300,000 maximum liability for bodily injury or death, as said terms are described and defined in §370(1) of the

Vehicle and Traffic Law.

Subd. (d) repealed City Record July 12, 1993 eff. Aug. 11, 1993.

NOTE

1. Statement of Basis and Purpose in City Record June 26, 1998:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under sections 2303(b)(2) and (7) of such Charter, authorizing TLC to regulate insurance and standards of service; under section 2303(b)(13) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred uon it by the Charter.

The regulations require owners of medallion taxicabs and for-hire vehicles to furnish the Commission with copies of reports of accidents involving their vehicles which are presently required to be filed with the Department of Motor Vehicles. The purpose of the regulation is to ensure public safety by enabling the Commission to maintain accurate and complete records of accidents involving medallion taxicabs and for-hire vehicles, and to enable the Commission to identify and take appropriate action against licensees who engage in unsafe driving practices which cause accidents.

The Department of Motor Vehicles receives required reports from motorists involved in accidents. That agency compiles accident data and makes it available to the Commission. The Commission does not have access to the most recent accident data involving taxicabs since the Department of Motor Vehicles is approximately two years late in compiling statistical reports on accident data involving Commission licensees.

The regulation enacted by the TLC does not create an additional reporting requirement upon medallion taxicab and for-hire vehicle owners. This regulation mandates that a copy of the report required to be filed with the Department of Motor Vehicles also be filed with the Commission. This will enable the TLC to obtain current, up-to-date, accurate information concerning accidents involving its licensees.

Furthermore, the For-Hire Vehicle Rules would be amended to conform to the existing requirement in the Taxicab Owners Rules that vehicle owners immediately report, in writing, all accidents involving said vehicle that are required to be reported to the insurance carrier. A rule requiring medallion owners to report accidents to their insurance carriers is already in effect. A similar rule covering owners of for-hire vehicles is necessary to assure that individuals involved in accidents are not denied coverage because no accident report was filed, a situation which could result in a failure to cooperate with the insurance carrier.

2. Statement of Basis and Purpose in City Record June 26, 1998: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b)(7) of such Charter, authorizing TLC to establish insurance and

financial responsibility requirements for vehicles under its jurisdiction; under section 2303(b)(13) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The regulations require owners of both medallion taxicabs and for-hire vehicles to obtain and maintain higher levels of liability insurance than presently required by TLC rules and New York State Law. This insurance would be available to passengers and drivers injured in an accident resulting from the use or operation of the insured vehicle. The purpose of the regulation is to protect the public by assuring that medallion and for-hire vehicle owners maintain reasonable levels of insurance reasonably sufficient to satisfy claims of those injured as a result of accidents involving their vehicles. The levels presently mandated by New York State Law and TLC regulations are substantially lower than those levels required by many other cities, and are inadequate to satisfy the claims of many accident victims. A study conducted by the Commission revealed that the mandatory levels of insurance which are required by the TLC for taxicabs and for-hire vehicles are substantially lower than those required by other major cities, such as Chicago, Los Angeles, and San Francisco. Many victims of accidents involving taxicabs or for-hire vehicles are not adequately compensated for their injuries. Most larger cities, as well as smaller cities within New York State, require licensed taxicabs to maintain levels of insurance which are higher than the State statutory minimums. The Commission has raised both the level of required no-fault insurance and liability insurance. The increase in no-fault insurance will not provie a remedy to pedestrians who are injured since supplemental no-fault coverage is not available to them, pursuant to New York State insurance regulations. The higher levels of insurance mandated herein are comparable to the levels of coverage many motorists in the State voluntarily purchase; this level is still below the levels commonly purchased by private commercial common carriers such as trucking and bus companies. The Commission has considered the cost of additional insurance coverage to owners of vehicles, and notes that although there is an increased cost, this increase may be offset by general reductions in the cost of insurance which would occur as the quality of the driver pool is improved, through other initiatives such as mandatory defensive driving courses, probationary licenses, and stricter penalties for traffic offenses.

CASE NOTES

¶ 1. The constitutionality of Sec. 1.40(d), which relates to insurance requirements, has been upheld. United Car & Limousine Foundation, Inc. v. New York City Taxi and Limousine Comm., 178 Misc.2d 734, 680 N.Y.S.2d 815 (Sup.Ct. New York Co. 1998).

§1-45 Maintaining a Business Premise.

(a) Any agent, any owner who leases or otherwise dispatches one or more taxicabs for return at the end of a shift, and any business entity in which a principal holds in the aggregate a substantial interest in taxicab medallions, shall maintain a business premise in a location zoned for the operation of a business, with:

(1) Sufficient off-street space at or near its business premise to store the lesser of 25 vehicles or the following: fifty percent of the taxicabs leased or otherwise dispatched on a daily or a shift basis, plus five percent of the taxicabs leased for longer than one day;

(2) Sufficient office space to conduct business, where all records required by the Commission, including trip sheets and driver records, are kept;

(3) Regular business hours, including the hours of 9:00 a.m. through 5:00 p.m. for every weekday; and

(4) A business address and telephone number on file with the Commission.

(b) For purposes of this section, a "principal" shall mean a person who holds an equity interest in an entity or who is an officer of a corporation; and "substantial interest in taxicab medallions" shall mean either

(1) ownership of 25 percent or more of the stock in one or more corporations which own medallions, or a partnership interest in one or more partnerships which own medallions, or any other form of full or partial ownership, such that the number of medallions in which the principal has a direct or indirect equity interest exceeds three, or

(2) a position or positions as an officer of one or more corporations which in the aggregate have a direct or indirect equity interest in more than three medallions.

§1-48 Named Driver.

(a) If an owner elects to lease to named drivers, the owner shall file a driver authorization statement for each lessee, prior to the lessee's taking possession of the taxicab. The owner must file the driver authorization statement with the Commission in person or by power of attorney. The driver authorization statement shall be signed by both parties and shall include but not be limited to:

(1) the date of execution of the lease;

(2) the names and addresses of the lessor and lessee and their social security or federal tax identification numbers;

(3) the medallion and license plate numbers of the leased taxicab; its vehicle identification number and titled owner;

(4) the term of the lease;

(5) the name and address of the auto liability and workers' compensation insurance carriers, the policy numbers and expiration dates;

(6) the name, address and telephone number of the owner's agent, if such agent arranged or manages the lease; and

(7) the charges to lessee.

(b) If a lease or its renewal, the disclosure of which is required pursuant to subsection (a) herein, is terminated for

any reason, the lessor shall notify the Commission in writing within forty-eight hours of such termination, unless exempted by the Commission.

35 RCNY 1-55

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-55 Reporting Requirements.

(a) **Passenger lost property.** (1) Passenger lost property found in a taxicab shall be taken without delay to the police precinct in which the garage is located unless it can be returned to its rightful owner within a reasonable time.

(2) The owner shall promptly inform the Commission of any property which has been taken to a police precinct pursuant to §1-55(a).

(b) **Address and Telephone Number.**

(1) Each owner shall maintain a mailing address as defined in Section 1-01. In addition, each owner shall maintain such owner's personal address and a telephone number where such owner can be reached directly, on file with the Commission. This requirement of a personal address may not be satisfied by filing the address and telephone number of an agent or any other indirect means of reaching the owner. The Commission is not required to send any communication to the owner's personal address, except as provided in Section 1-77(b)(5). It is otherwise in the Commission's sole discretion as to when, and if, any communications will be sent to the owner's personal address.

(2) An owner shall appear at the Commission, in person with the rate card of every vehicle which he or she owns, to report a change of office of record or mailing address, within seventy-two (72) hours of such change, exclusive of weekends and holidays. Any notice from the Commission shall be deemed sufficient if sent to the mailing address furnished by the owner.

(3) An owner shall maintain on file with the Commission a current telephone number (which must be connected to

an answering machine or recording device), pager number, answering service telephone number or similar means of telephone contact, so that the owner may be reached by the Commission on a twenty-four hour basis.

(4) An owner must respond to any telephone or pager contact from the Commission within forty-eight hours, seven days a week.

(c) **Conviction of a felony or misdemeanor.** An owner, including a member of a partnership or any officer or shareholder of a corporation, shall immediately notify the Commission of his conviction of a felony or misdemeanor. Such notification shall be in writing and must be accompanied by a certified copy of the certificate of disposition issued by the Clerk of the Court.

(d) **Lost license plates.** An owner shall report to the Commission the replacement of any lost or stolen New York State license plates within forty-eight (48) hours, exclusive of weekends and holidays, after obtaining such plates.

(e) **Lost medallion or rate card.** An owner shall notify the Commission and the police department, within forty-eight (48) hours exclusive of weekends and holidays, of the theft, loss or destruction of any medallion or rate card, and furnish such affidavit or information as may be required including the police receipt number; a substitute medallion and rate card will be issued by the Commission.

(f) **Found medallion or rate card.** An owner shall notify the Commission and the police department within twenty-four (24) hours exclusive of weekends and holidays, when any medallion or rate card that was reported as stolen or lost is located or returned, and shall furnish such affidavit or information as may be required.

(g) **Lost taximeter. If** a taximeter is lost, stolen or damaged beyond repair, the owner shall notify the Commission and the police department, within forty-eight (48) hours exclusive of weekends and holidays, of the loss, theft or destruction, and shall furnish such affidavit or information as the Commission may require.

NOTE

1. Statement of Basis and Purpose in City Record Jan. 31, 2000:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the City; under §2303(b) of such Charter, authorizing the TLC to promulgate rules and regulations relating to standards and conditions of service which

are reasonably designed to carry out its purposes; §2303(c) of such Charter, establishing certain procedures regarding the conduct of the Commission's adjudications tribunal; under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter; under §19-506 of such Code, authorizing the Commission to adopt regulations governing the transportation of passengers for hire; and under §19-507.3 of such Code, which sets forth mandatory response times for owners who receive messages from the Commission.

The regulations require the owner of each For-Hire Vehicle, Paratransit Service Vehicle and Commuter Van, as well as the owner of each base licensed by the Commission to maintain a telephone or pager number with the Commission and to respond to any telephone or pager message received from the Commission within forty-eight (48) hours. Current rules impose this requirement upon taxicab medallion owners and require that such communication be responded to within twenty-four (24) hours.

The present rule with respect to medallion owners was adopted as part of the regulatory reforms of the Commission approved on May 28, 1998 and effective July 26, 1998. The purpose of the rule is to ensure that the Commission can make prompt contact with a taxicab owner for a regulatory purpose requiring an immediate response. Local Law No. 20 of 1999, signed into law on May 26, 1999, added a new §19-507.3 to the Administrative Code that changed the mandatory response time for owners from twenty-four (24) to forty-eight (48) hours. The rule change proposed herein conforms the Commission Rules to the Administrative Code with respect to medallion owners.

This rule adds an identical requirement upon other vehicle and base licensees of the Commission. The purpose of this change is to provide for uniformity in the rules governing Commission licensees and to ensure that all vehicle owners and bases licensed by the Commission may be reached quickly whenever there is a need for immediate response.

2. Statement of Basis and Purpose in City Record June 26, 1998: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under Section 2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City, under Section 2303(b)(2) of such Charter, authorizing the TLC to promulgate rules and regulations relating to standards and conditions of service which are reasonably designed to carry out its purposes; and under Section 19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter. The regulation promulgated herein requires that medallion owners: (1) keep a current telephone number together with answering machine, pager number or answering service telephone number on file with the Commission, so that the Commission may contact any medallion owner in an emergency or for any other important purpose; and (2) respond to any Commission telephone call within twenty-four (24) hours of receipt of the message for the purpose of resolving the exigent situation in a timely manner. This regulation enables the Commission to communicate with medallion owners quickly whenever an emergency situation arises. It is not the intent of the Commission to use telephone communication entailed by this rule where mail correspondence would be sufficient. Emergency situations may include information that the owner's taxicab was involved in an accident or crime, that property was lost, or where immediate contact with the owner is essential to complete a Police or other investigation. The cost to individual owners in complying with this regulation is minimal since owners are already required to provide the Commission with a telephone number.

CASE AND ADMINISTRATIVE NOTES

¶ 1. The Commission is entitled to presume that an address filed by a medallion owner pursuant to subparagraph (b)(1) of this section is an address at which the owner can be reached. A medallion owner's failure to respond to a Commission notice sent to the address filed by the medallion owner is not excusable on the ground that the address actually belonged to the medallion owner's fleet manager, who failed to forward the notice. Taxi and Limousine Commission v. Borko, OATH Index No. 1117/94 (Aug. 8, 1994).

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-56 Records.

(a) A fleet or mini-fleet owner shall maintain for a period of three years a written record of every shift setting forth the following information for each taxicab: the driver's name, the taxicab driver's license number, the state license plate number, the medallion number, the time of leaving garage, and the exact time of return.

(b) An owner shall maintain for a period of three (3) years, the following additional records:

(1) drivers' electronic or written trip records;

(2) receipts and disbursements from the taxicab operations;

(3) payments to drivers;

(4) mileage record of each vehicle;

(5) Workers' compensation insurance coverage, if any;

(6) liability insurance coverage; and

(7) such other information as the Commission may require.

(c) An owner shall make available to a driver any records which the owner is required to maintain, or photocopies thereof, which the driver may be required to present to the Commission or any other governmental agency.

(d) (1) An owner shall not knowingly transmit false information to the electronic trip data record keeper for entry on the electronic trip record nor make erasures or obliterations on a written trip record, or other record which he or she is required to maintain. If a wrong entry is made on any such electronic or written record, the driver or owner shall correct it on the electronic record or written record and record the date, time, and reason for the change so long as a record of the manually changed entry exists.

(2) Trip records shall not be changed, either in whole or in part, unless authorized by the Commission.

(e) An owner shall take possession of the written trip records from the driver on a weekly basis, until the taxicab is required to be equipped with the taxicab technology system and thereafter whenever the taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider, as set forth in section 1-11(e) of this chapter.

CHAPTER 1 TAXICAB OWNERS RULES

§1-59 Stand-By Vehicles.

(a) Each fleet may maintain stand-by vehicles ("SBVs"), equal in number to ten percent (10%) of all currently licensed taxicabs owned or operated by the fleet. (If ten percent [10%] of the fleet does not equal a whole number, the number shall be rounded to the nearest digit.) A stand-by vehicle may be dispatched in place of a currently licensed taxicab only when the currently licensed taxicab is out of service for repairs or for required inspection. An SBV vehicle may be used to replace a vehicle that has been stolen or permanently retired from service for no more than thirty (30) days from the date of such theft or retirement. When a stand-by vehicle is dispatched, the medallion and medallion number in the roof light shall be transferred from the out-of service taxicab to the stand-by vehicle. A stand-by vehicle shall not be dispatched unless there is also present in the vehicle the SBV transfer form and SBV rate card.

(b) Reserved.

NOTE

1. Statement of Basis and Purpose in City Record Mar. 27,2000:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which authorizes the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the City; under §2303(b)(11) of such Charter, which authorizes TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter; under §19-503 of the Administrative Code of the City of New York, which authorizes the Commission to promulgate rules to further the objectives of the Charter and the Administrative Code; and under §19-506 of said Code, which authorizes the Commission to impose penalties for the failure to comply with a Rule of the Commission.

This Rule repeals the requirement contained in TLC Rules that all stand-by vehicles be fueled by Compressed Natural Gas (CNG).

The Rules of the TLC permit fleets to maintain stand-by vehicles (SBVs) in a number equal to ten (10%) percent of the number of taxicabs licensed by the fleet. These SBVs may be dispatched in place of a licensed taxicab when the vehicle is out of service for either repairs or a required TLC inspection. On March 1, 1996, TLC Rule 1-59(b) became effective. This Rule provided that, effective December 31, 1997, all SBVs must be fueled by CNG.

On December 16, 1999, the TLC held a public hearing to review the effectiveness of the CNG vehicle program. The TLC heard testimony and received written comments from the taxicab industry (including taxicab owners and drivers), the black car and limousine industry, the livery industry, government officials, various gas and utility companies, as well as other individuals and organizations. These comments indicated that there are problems associated with the present CNG program, including the lack of a sufficient number of twenty-four (24) hour fueling sites, the lack of sites in locations near taxicab garages, the extensive amount of time needed to refuel CNG vehicles, cost and maintenance issues relating to the vehicles, and the unwillingness of taxicab drivers to lease such vehicles because of the additional time needed to fuel the vehicles. Other persons provided testimony in favor of the CNG program, noting the positive impact such a program has upon the environment.

After review of the testimony, the TLC has voted to repeal the mandatory CNG vehicle usage for SBVs, while retaining provisions in the Rules encouraging the voluntary use of CNG-powered vehicles. The TLC promulgates this change because while it encourages the use of CNG-powered vehicles as a measure to protect the environment, the Agency also recognizes the practical difficulties incurred by Owners in maintaining such vehicles at the present time.

2. Statement of Basis and Purpose in City Record Jan. 30, 1996: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The purpose of the regulations is to establish a significant number of taxicabs that are fueled by Compressed Natural Gas (CNG). Federal funding is available to equip taxicabs with CNG fueling systems. However, there has been hardly any use by taxicab owners of these available funds. An important issue is coordinating CNG fueling stations with CNG powered vehicles. It appears to be a classic situation of the cart before the horse, except that the horsepower here would be provided by CNG. Convenient fueling stations are necessary to interest taxicab owners in using CNG. The participation of taxicab owners is necessary to make investments in fueling stations worthwhile for the providers of CNG within the City, which include Brooklyn Union Gas and Con Edison. Stand-by vehicles are used by taxicab fleets as temporary replacements for vehicles out of service for repairs. At present, about 150 stand-by vehicles are in use. Present rules would permit as many as 200 stand-by vehicles. The decision to use stand-by vehicles is discretionary with fleet operators. By requiring that stand-by vehicles must be fueled by CNG, the regulations would establish between 120 and 150 CNG powered taxicabs. If those vehicles are among the first 300 taxicabs using CNG, the federal

funds to install the CNG fuel systems would be available for them. The regulations provide nearly two years before the CNG requirement for stand-by vehicles would take effect. This is intended to provide ample time for adequate CNG fueling stations to be built. The fundamental purpose of this measure is to explore means to improve the City's air quality. In response to public comments, the proposal was changed to allow for a reserve tank of gas to be used in instances where the taxi is unable to immediately refuel with compressed natural gas.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-60 Compliance with Law and Proper Conduct.

(a) An owner shall comply with the Commission's taxicab specifications, the Marking Specifications for Taxicabs, all pertinent provisions of the Administrative Code and other laws, rules or regulations governing taxicab owners.

(b)(1) An owner, while performing his duties and responsibilities as a taxicab owner, shall not commit or attempt to commit, alone or in concert with another, any act of fraud, misrepresentation or larceny against a passenger, Commission representative, public servant or any other person.

(2) An owner, while performing his duties and responsibilities as a taxicab owner, shall not commit or attempt to commit, alone or in concert with another, any willful act of omission or commission which is against the best interests of the public, although not specifically prescribed in these rules.

(c) An owner shall not use or permit any other person to use his taxicab, garage or office of record for any unlawful purpose.

(d) An owner shall not conceal any evidence of crime connected with his taxicab, garage or office of record.

(e) An owner shall report immediate to the policy any attempt to use his taxicab to commit a crime or escape from the scene of a crime.

HISTORICAL NOTE

Section amended City Record Sept. 28, 1994 eff. Oct. 31, 1994.

Section added City Record Apr. 30, 1992 eff. May 30, 1992.

Subd. (b) amended City Record Aug. 10, 1998 §1, eff. Sept. 9, 1998. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Aug. 10, 1998:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the city; under section 2303(b)(2) of such Charter, authorizing the TLC to regulate standards of service; under section 2303(b)(13) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under section 19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter; and under section 19-505 of said Administrative Code, authorizing the TLC to issue taxicab drivers licenses, for-hire vehicle drivers licenses and paratransit vehicle drivers licenses.

The rule amendments change the existing rules for taxicab and for-hire vehicle owners and drivers which prohibit fraud, misrepresentation, larceny or other actions against the best interest of the public, by dividing each rule into two subdivisions: one, prohibiting fraud, misrepresentation and larceny against either the Commission, a passenger, or another member of the public; and the other, prohibiting acts of commission or omission which are not otherwise prohibited by the rules but which are against the best interests of the public. The first subdivision, which would prohibit the most serious offenses acts of larceny or fraud against the Commission or the public, would carry a penalty which can include the possibility of a substantial fine, suspension or revocation. The second subdivision would carry a lower monetary penalty, but would also include the possibility of suspension or revocation.

The purpose of these rule changes is to protect the riding public from serious acts committed by owners and drivers of taxicabs and for-hire vehicles by enabling the Commission to impose severe penalties, up to and including license revocation, against those who commit serious acts of fraud or larceny against the Commission or the public. The rule, as presently drafted, is very broad. Its provisions apply to both egregious forms of misconduct and less serious offenses. Establishing two separate classifications of offenses, with different penalties, enables the Commission to better protect the public by ensuring that the penalties imposed under these rules are proportionate to the offense and have a significant deterrent effect.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Submission of forged workers' compensation insurance certificates by or on behalf of a medallion owner violated this section. Taxi and Limousine Commission v. Borko, OATH Index No. 1117/94 (Aug. 8, 1994).

¶ 2. Operation of a taxicab by the respondent, the owner and driver of the cab, with a device known as a "zapper," the purpose of which was to enable the operator to tamper with the taximeter and artificially increase the fare to be charged to customers, constituted a violation of paragraph (b) of this section, as well as §§1-23, 1-67(a), 2-26(d), 2-30(a), 2-31(a), 2-61(a) and 2-66(a), the penalty for which was revocation of the respondent's hack license and forced sale of his medallion. Taxi and Limousine Commission v. Malek, OATH Index No. 1540/97 (Aug. 5, 1997).

¶ 3. Medallion owner, who leased medallion through agent leasing broker to drivers, held liable for meter acceleration device found in taxicab during inspection pursuant to section 1-23(a) of owner's rules, which imposes strict liability upon medallion owners even where, as here, the owner claims he was unaware of the violation. **Taxi and Limousine Comm'n v. Hom,** OATH Index Nos. 433 & 435/99 (Oct. 28, 1998).

35 RCNY 1-69

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-69 Flat Rates from Kennedy Airport to Manhattan.

(a) Notwithstanding the rate of fare set forth in §1-70(a) and (b), the fare for a trip between Kennedy Airport and Manhattan shall be a flat rate of Forty-five Dollars ($45), plus any tolls; and beginning on November 1, 2009, plus the MTA Tax of fifty cents per trip.

(1) The surcharge set forth in §1-70(b) shall not be added to this flat rate.

(2) The taximeter shall reflect that this trip is a flat fare.

(b) If passengers request multiple stops on a trip from Kennedy Airport to Manhattan, the fare shall be as follows: the first stop in Manhattan is paid in accordance with subdivision (a) of this section; the meter is then turned on for a separate trip at the rate of fare as set forth in §1-70, and the total on the meter is paid at the last stop by the remaining passenger. (For example, if three passengers request stops at 42nd St., 18th St. and 4th St., then $45.50 will be collected at 42nd St. and the meter will be turned on. When the second passenger exits at 18th St., the meter remains on, and no money is paid to the driver. The passenger dropped off at 4th St. must pay the fare on the meter.)

(c) All trips between Kennedy Airport and a borough other than Manhattan shall continue to be governed by the meter rate of fare as set forth in §1-70.

(d) The Chairperson is authorized to suspend the enforcement of this provision at any time, if in the judgment of the Chairperson such a suspension is necessary to preserve adequate levels of service to and from Kennedy Airport.

NOTE

1. Statement of Basis and Purpose in City Record May 31, 2001:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City; §2303(b) of such Charter, authorizing the TLC to enact rules and regulations relating to standards and conditions of service which are reasonably designed to carry out its purposes; §2304(b) of such Charter, authorizing the Commission to establish rates of fare for taxicabs; and §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter.

The regulations promulgated herein raise the flat fare rate for a trip from Kennedy Airport in Manhattan from the present rate of $30, to a rate of $35, exclusive of tolls. The $30 flat fare rate has been in effect since April 29, 1996.

The Commission adopted the JFK flat fare rate in 1996 to provide passengers with a consistent and uniform fare that approximated the average cost of a metered trip from Kennedy Airport to typical destinations in Manhattan, taking into account differences in traffic conditions and other variables such as the selection of a faster, but longer alternative route by drivers or passengers. The flat fare was also adopted in 1996 to prevent overcharging of passengers by drivers. The purpose of this increase in the flat fare rate by $5 per trip is to more closely approximate the average cost of a metered trip between Kennedy Airport and various locations in Manhattan, based upon average distance and time traveled. Since 1996, the Commission has conducted analyses of sample trips from Kennedy Airport to various destinations in midtown, lower and upper Manhattan. The results of these studies demonstrate that the average recorded meter charge for trips to midtown Manhattan was approximately $30. However, fares for trips to destinations in lower Manhattan averaged in excess of $35, while fares for trips to destinations in the northern end of Manhattan were approximately $35.

Lower Manhattan has developed in recent years into a primary residential and commercial area. In 1970, the Community Planning District comprising lower Manhattan (generally below the City Hall area) had a population of approximately 6,000 persons. By 1990, the population had increased in excess of 25,000, and preliminary census data for the year 2000 indicates that more than 30,000 people now live in lower Manhattan-a five-fold increase in thirty years. This demographic change has significantly impacted upon the use of taxicabs to destinations in lower Manhattan.

This rule establishes a flat fare rate that is more equitable to drivers transporting passengers traveling to destinations in upper and lower Manhattan. The existing flat fare structure does not adequately compensate drivers who are required to transport passengers to such destinations. By providing a flat fare rate that adequately compensates drivers for time and distance traveled with respect to trips to these destinations, drivers may also have a greater incentive to provide service at Kennedy Airport and seek fares to these destinations.

Accordingly, an increase in the flat fare rate is justified, consistent with the purposes of the Rule, to ensure that passengers traveling between Kennedy Airport and Manhattan are charged a fare that closely approximates the average metered fare for an average trip to destinations throughout Manhattan.

2. Statement of Basis and Purpose in City Record Dec. 29, 1995: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under section 2304(b) of such Charter, authorizing TLC to prescribe the rates of fare which may be charged for each type of service rendered; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The purpose of the promulgated regulations is to reduce the incidence of overcharges to visitors to this City who arrive through Kennedy Airport. It is the experience of the Commission that a small group of drivers who seek to overcharge their passengers concentrate much of their effort on Kennedy Airport. The drivers who overcharge may hope that language confusion, and the novelty of some passengers' first transactions in American currency will provide opportunities to cheat passengers. The relatively lengthy trip from Kennedy Airport to Manhattan may enhance opportunities to boost a fare by manipulating the meter. There is more time to use a meter zapper (which sends an electronic signal causing the meter to skip forward). A meter that is set fast will accrue a larger overcharge during a lengthier trip. Some drivers may seek opportunities to take passengers who are new to the City on circuitous and more costly routes. Those drivers may also hope that a passenger who is soon returning to a distant home is less likely to pursue a complaint against the driver with TLC. For all these reasons, overcharges from Kennedy Airport are persistently the most serious instances of overcharges. By setting a fixed fare, and working with the Port Authority to adequately inform the arriving visitors of the flat fares for taxis, TLC should be able to reduce the serious instances of overcharges. A meter zapper or a fast meter would be useless in the context of a flat rate of fare that is understood by the passenger. Circuitous routes would be pointless too. Those few fraudulent drivers would be less able to trick a passenger who has information about the flat fare. The promulgated flat rates are based on empirical study of metered trips made under a variety of conditions, including time of day, traffic and weather. The rate is set at an average fare. The regulation is in the form of an experimental 120-day trial period in order to ascertain whether the flat fare will improve service, or if there may be negative consequences. This reflects concern that if a flat fare is believed by drivers to be insufficient, then drivers may be less likely to await passengers at Kennedy Airport. That is not to suggest that many drivers cheat; rather, the question is whether drivers will be concerned about uncompensated time spent awaiting passengers or stuck in traffic from Kennedy Airport. An average fare may be regarded by drivers as inadequate, based on drivers' anecdotal recollections of some better fares. It is hoped that drivers will also recall the fares that were lower than the flat rate, and will continue to serve Kennedy Airport in appropriate volume. A flat fare may have competitive consequences among modes of travel, and that effect too needs to be evaluated. Subsection (b) was added to proposed rule 1-69 in order to clarify that the flat fare is not to be collected as a group ride. That is, multiple passengers are not to be charged $30 each. Once the first passenger exits in Manhattan, the flat rate should be paid, and the meter is turned on. The last remaining passenger must pay the amount shown on the meter. Amendment of Section 2-33(a) was added in order to avoid any possible dispute or confusion which may occur between the driver and the passengers at the end of the trip if the metered rate of fare is substantially different from the flat rate of fare.

3. Statement of Basis and Purpose in City Record July 1, 1996: Section 4. The Commission shall review the flat fare program as of October 1, 1996, and every six months thereafter. The Commission shall consider factors including the demand for taxis and the availability of taxis at Kennedy Airport, the wait times for drivers in airport holding areas

awaiting passengers, traffic and other factors affecting the time required for a trip to Manhattan, competitive conditions relating to alternative modes of service, and the experience of drivers and consumers. The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under section 2304(b) of such Charter, authorizing TLC to prescribe the rates of fare which may be charged for each type of service rendered; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The promulgated regulations establish a permanent flat fare from Kennedy Airport to Manhattan. An experiment was established beginning on January 30, 1996, and the initial results indicate that the flat fare has been successful. The experiment will "sunset" on July 31, 1996, and this rulemaking establishes a permanent program beyond that date. The purpose of the flat fare is to reduce the incidence of overcharges to visitors to this City who arrive through Kennedy Airport. It is the experience of the Commission that a small group of drivers who seek to overcharge their passengers concentrate much of their effort on Kennedy Airport. The drivers who overcharge may hope that language confusion, and the novelty of some passengers' first transactions in American currency will provide opportunities to cheat passengers. The relatively lengthy trip from Kennedy Airport to Manhattan may enhance opportunities to boost a fare by manipulating the meter. There is more time to use a meter zapper (which sends an electronic signal causing the meter to skip forward). A meter that is calibrated fast will automatically accrue a larger overcharge during a lengthier trip. Some drivers may seek opportunities to take passengers who are new to the City on circuitous and more costly routes. Those drivers may also hope that a passenger who is soon returning to a distant home is less likely to pursue a complaint against the driver with TLC. For all these reasons, overcharges from Kennedy Airport are persistently the most serious instances of overcharges. By setting a fixed fare, and working with the Port Authority to adequately inform the arriving visitors of the flat fares for taxis, TLC should be able to reduce the serious instances of overcharges. A meter zapper or a fast meter would be useless in the context of a flat rate of fare that is understood by the passenger. Circuitous routes would be pointless too. Those few fraudulent drivers would be less able to trick a passenger who has information about the flat fare. There are several changes to the regulations that were adopted as an experiment. One change is that the meter be equipped to reflect that the trip is a flat fare. Taximeters will be required to be capable of operating with either of two alternative rates of fare. This will provide the passenger with a printed receipt from a flat fare ride. This change in the meter specifications will require some taxicab operators to replace their meters and require all taxicab operators to reprogram their meters.

4. Statement of Basis and Purpose in City Record Oct. 31, 2006: The rules alter the existing rates of fare for taxicabs in two respects. First, the rules create a new flat fare for rides originating from any point in Manhattan to John F. Kennedy International (JFK) Airport. The flat fare will be $45, the same as is provided by existing rules for rides from JFK Airport to any point in Manhattan. Second, the rules adjust the metered rate of fare by changing from 20 cents to 40 cents the rate for time during which the taxicab is standing still or moving less than twelve miles per hour. The purposes of these changes are to promote taxicab service to tourists, and thereby to promote tourism, and to bring fare calculations into closer alignment with fare calculations in use in other major cities around the country. In addition, the adjustment to the rate of fare for waiting time increases the effective hourly rate for waiting time to approximate the existing effective hourly rate for time when the taxicab is moving normally. This adjustment thus enhances the equity of the fare structure, treating more equitably taxicab drivers whose fares on a particular day may happen to involve disproportionate amounts of waiting time.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 1-70

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-70 Metered Rate of Fare.

(a) **Metered rate of fare.** The rate of fare for taxicabs shall be as follows, regardless of the number of passengers or stops:

(1) The charge for the initial unit is $2.50.

(2) The charge for each additional unit is $.40.

(3) The unit of fare is:

(i) one-fifth of a mile, when the taxicab is travelling at 12 miles an hour or more; or

(ii) 60 seconds (at a rate of forty cents per minute), when the taxicab is travelling at less than 12 miles an hour.

(4) The taximeter shall combine fractional measures of distance and time in accruing a unit of fare. Any combination of distance or time specified in paragraph (3) above shall be computed by the taximeter in accordance with Handbook 44 of the National Institute of Standards and Technology.

(5) The fare shall include pre-assessment of the unit currently being accrued; the amount due may therefore include a full unit charge for a final, fractional unit.

(b) **Surcharge.** In addition to the rate of fare set forth in §1-70(a), all taxicabs shall charge One Dollar ($1.00) for all trips beginning after 4:00 p.m. and before 8:00 p.m., weekdays, excluding legal holidays, and fifty cents ($.50) for

all trips beginning after 8:00 p.m. and before 6:00 a.m. on all days, including weekends and holidays.

(c) In addition to the rate of fare set forth in §1-70(a) and, if applicable, the surcharge set forth in §1-70(b), all taxicabs shall charge, beginning on November 1, 2009, the MTA Tax of fifty cents per trip on any trip that originates in New York City and terminates either in New York City or in the county of Dutchess, Nassau, Orange, Putnam, Rockland, Suffolk or Westchester.

Subd. (c) added City Record Sept. 25, 2009 §3, eff. Oct. 25, 2009. [See T35 §15-15 Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Jan. 30, 1996:

Section 2. The amended provisions of Rule 1-70 shall take effect on March 1, 1996; provided however, that if the provisions of proposed Rule 1-78, concerning limits as to the lease prices that owners may charge to drivers, are for any reason declared invalid by a court of competent jurisdiction, then the metered rate of fare set forth above in proposed Rule 1-70 shall be void, and the metered rate of fare shall revert to that in effect prior to March 1, 1996.

The Taxi and Limousine Commission ("TLC") promulgates such regulations pursuant to the authority vested in the TLC under Charter sections 2303(a), 2303(b) and 2304; and under section 19-503 of the Administrative Code of the City of New York.

The purpose is to provide increases in earnings to taxi drivers and operators, to maintain and improve levels of service after nearly six years without an increase.

The fare increase is estimated to increase the fare for an average trip of 2.64 miles by 20%. Nearly half the increase for the average trip is concentrated in the "drop," the cost of the first unit, when the meter is first engaged. That increases from $1.50 to $2.00. The price per each subsequent one-fifth of a mile increases by five cents, from $0.25 to $0.30. A 2.64 mile trip will cost $0.70 cents more for the first mile, $0.25 more for the second mile, and $0.15 more for the final 0.64 miles. Both calculations assume 306 seconds of waiting time in the average trip, for a constant cost of $1.00. The total is an increase of $1.10 above the previous average fare of $5.50.

Waiting time is unchanged, at twenty cents per minute. However, the waiting time equal to a unit of meter operation (thirty cents) is ninety seconds, rather than seventy-five seconds as at present (when a unit of distance costs twenty-five cents). The current rate posted on taxicabs for waiting time, twenty cents per minute, remains unchanged.

In an average shift of thirty trips, the total increase in revenue would be $33.

Increases in the costs of vehicles and increases in insurance costs, related in part to part to higher levels of insurance coverage required by New York State as of January 1, 1996, are among the items necessitating a fare increase to maintain and improve levels of service.

A key purpose of the proposal is to improve taxicab service and safety by retaining experienced taxi drivers.

Higher earnings are a major component of retaining experienced drivers. TLC studies have found that experienced drivers receive substantially fewer summonses than new drivers. That is an indication of better service. In taxi operations, a better worker is more knowledgeable, more courteous, and a safer driver.

Public safety is directly related to working conditions, particularly earnings. Over the past several years, passenger complaints about the driver's operation of the vehicle have risen. In that same period, drivers' real earnings have actually declined. (Lease rates have risen while the rate of fare has remained constant and the volume of business has remained steady or declined. This has resulted in lower earnings for drivers.) The most direct relationship between earnings and driving safety is the pressure a driver may feel to go faster, and to be bolder in traffic in an effort to proceed faster than the flow of traffic, in order to carry more fares and maximize income. Steady or higher earnings would help alleviate that immediate pressure. The indirect benefit-that is, the benefit of retaining experienced drivers-may be much greater. Higher earnings should encourage drivers to remain in the business.

The accompanying proposal that would cap the lease rates charged to drivers is so central to the Commission's analysis of the industry and its needs, that the Commission has made the increase in the taxi rate of fare contingent upon the continued applicability of the cap on lease prices. If the provisions of the proposed rules concerning limits as to lease prices are for any reason declared invalid by a court of competent jurisdiction, then the rate of fare shall revert to its current level, erasing the proposed increase in the fare. In the Commission's analysis, driver quality must improve. To accomplish that, the earnings of drivers must increase enough to retain experienced drivers. In the context of a government limit on the number of taxicab licenses, the Commission is compelled to balance the market forces by capping lease prices.

2. Statement of Basis and Purpose in City Record Apr. 2, 2004: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under Section 2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City, under Section 2303(b)(1) of such Charter, authorizing the TLC to adopt rules and regulations relating to taxicab fares, and Section 2304 of said Charter, which authorizes the TLC to establish rates of fare for taxicabs. On December 19, 2003, the TLC accepted for consideration two rulemaking petitions relating to amending the rules setting forth the rate of fare that may be charged by taxicab owners. One petition, filed by the Metropolitan Taxicab Board of Trade (MTBOT), requested that taxicab fares be increased as follows: · The initial "drop" be increased from $2.00 to $2.50;

· Mileage change be increased from $.30 per 1/5 mile to $.30 per 1/6 mile;

· Waiting time be increased from $.30 per 90 seconds to $.30 per 60 seconds.

The MTBOT proposal also requested that the flat fare for trips from JFK Airport to Manhattan be increased from $35 to $49.

On the same date, the TLC accepted for consideration a rulemaking petition from the Taxi Workers' Alliance (TWA) which requested that taxicab fares be increased as follows:

· Mileage change be increased from $.30 per 1/5 mile to $.40 per 1/5 mile;

· Waiting time be increased from $.30 per 90 seconds to $.40 per 45 seconds.

The TWA made no request for an increase in the initial drop, but requested that the flat fare for trips from JFK to Manhattan be increased from $35 to $45.

Each petitioner supplied certain income, expense and other data which was used to evaluate the fare increase proposals. The TLC also reviewed other data, including, but not limited to, taxicab fares in other cities, comparable fares for other modes of public transportation, return on investment, ridership data, income and expense data, and

projections with respect to industry conditions that may occur after a fare increase is implemented. Such criteria are set forth in the New York City Charter as factors which may be considered by the Commissioners. After careful review of all of the data submitted herein, as well as the public comments received and the testimony given at the March 30, 2004 public hearing the TLC is promulgating adjustments to the rate of fare which could restore the relationship between taxicab fares with other modes of transportation; provide drivers with incomes that are comparable with similar occupations; and create relationships between the different industry segments that facilitate the delivery of the desired quality and quantity of taxicab service. The Commission reviewed the evidence submitted and determined that the evidence supports an increase in the rate of fare.

Although both petitioners have requested that the fare calculated for waiting time, or time when the vehicle is in heavy traffic, be increased, the TLC has not adjusted the rate of fare for waiting time. Rather, the TLC has promulgated a $1.00 per trip surcharge for the evening rush hours, from 4:00 p.m. to 8:00 p.m. During these hours, there is often an imbalance between supply and demand. The imposition of a surcharge during these hours seeks to reestablish a balance between supply and demand by providing an incentive for drivers to work during these hours. Although the TLC initially proposed that the fifty-cent night surcharge, in effect from 8:00 p.m. until 6:00 a.m. be eliminated, the Commissioners retained this surcharge as an incentive for drivers to work during these evening and nightime hours after receiving public comment and testimony in support.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 1-71

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-71 Group Rides.

(a) [Reserved]

(b) **Group ride fare from York Avenue.** Notwithstanding the rate of fare set forth in §1-70(a) and (b), the fare for trips made pursuant to a group riding plan from York Avenue to the Financial District shall be as follows for each passenger: $6.00. In addition, there may be such fee for dispatch services as the Commission may determine.

(c) **Experimental Group Ride Programs.**

(1) The Chairperson shall have the authority to recommend, subject to Commission approval, additional experimental group riding plan pickup locations on a temporary basis as pilot programs to determine the effectiveness of each such group riding plan. The Chairperson shall also have the authority to recommend, subject to Commission approval additional group riding plans on a temporary basis for a limited period of time to respond to demand created by special events or unique circumstances. Such pickup locations shall be established for the transportation of more than one passenger from a common location to destinations within a specified common geographic area. Notwithstanding the rate of fare set forth in §1-70(a) and (b), the fare charged each passenger shall be set by the Commission and shall be less than the average metered rate of fare for such trip.

(2) Any group ride plan established by the Commission pursuant to this subdivision shall terminate one year after the date such plan was established, unless: (i) final rulemaking has been enacted establishing the group riding plan location and rate of fare; or (ii) the Commission has determined that it is in the best interest of the Commission to extend the group riding plan pilot program for an additional definite period of time not to exceed one year. The

Commission may discontinue any group riding plan that has not been the subject of final rulemaking upon a determination, in its sole discretion, that continuation of such plan is not in the best interest of the public.

(d) **MTA Tax.** The fare for any passenger paying the MTA Tax for any group ride trip will be reduced by the amount of the MTA Tax paid. Therefore, all passengers in a particular group ride plan will pay the same total amount. (Example: If three passengers are taking a group ride for which the fare is $6.00 per person, the fare will be adjusted so that the total fare for all three passengers equals $17.50 plus the $0.50 MTA Tax.)

Subd. (d) added City Record Sept. 25, 2009 §4, eff. Oct. 25, 2009. [See T35 §15-15 Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Apr. 14, 2004:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under Section 2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City, under §2303(b)(1) of such Charter, authorizing the TLC to adopt rules and regulations relating to taxicab fares, and §2303(b)(9) of said Charter, authorizing the TLC to develop a broad transportation policy through the experimentation with respect to modes of service and manners of operation which may, for a limited period of time, depart from the requirements of the Charter, Administrative Code, or rules of the Commission.

The Commission has established rates of fare for passengers in licensed taxicabs. Such rates are typically established on a per trip basis; the driver is not permitted to collect separate fares from each passenger. The TLC has, through rulemaking, established fare structures that depart from the metered rate of fare. One such fare structure is the flat fare rate for trips from Kennedy Airport to Manhattan. The TLC has also promulgated rules authorizing the establishment of group riding locations, where passengers traveling to an essentially common destination may share a taxicab and be charged a flat rate which is below the average metered rate of fare. Such group riding locations have been permitted for trips between LaGuardia Airport and Manhattan, as well as for trips between York Avenue, on the upper East side of Manhattan, and the Financial District in lower Manhattan. The York Avenue group riding plan is heavily used in the morning rush hours, while the LaGuardia plan is not active.

The TLC intends to expand group riding plans to include other locations throughout the City. Group ride locations may serve to complement existing transportation modes to accommodate passengers travelling between a common origin and a common destination in areas where there is a lack of existing mass transit, similar to the existing group ride location established to transport passengers between York Avenue on the Upper East Side and the Financial District during the morning rush hour period. Other factors may be relevant in determining the success and effectiveness of a group ride program. Accordingly, the TLC hereby authorizes the Chairperson to propose group riding locations to the Commission, which will then review such recommendations and, if adopted, set fares, on an experimental basis for a limited period of time. In addition, the Commission is hereby authorized to establish temporary group ride locations to respond to unique temporary circumstances, such as special events. The establishment of these pilot programs will enable the Commission to monitor demand for service as well as the willingness of the industry to provide service at

these locations prior to commencing rulemaking to permanently establish these group riding plan locations and fares. The regulation will require that within one year of the establishment and operation of such a location, the Commission must either permanently establish the plan and fare through rulemaking, or terminate the plan. The rule also authorizes the Commission to extend the pilot program for an additional period of time if it is necessary to further evaluate the effectiveness of the location.

2. Statement of Basis and Purpose in City Record Dec. 30, 2009: Since 1993, Taxi and Limousine Commission rules have permitted three different group ride fares from LaGuardia Airport to specified areas in Manhattan. However, these group rides are no longer used. The LaGuardia group rides were put in place at a time when there was a shortage of taxicabs at LaGuardia, which is no longer the case. Therefore, the TLC and the Port Authority agree there is no longer a need for this group ride rate. The TLC is interested in studying, by means of a pilot program, whether a different group ride structure might attract more passenger interest. For instance, it may be that there are shortages of taxicabs at the airport at certain times of day, or at certain locations such as the Marine Air Terminal, where many commuters arrive on shuttle flights. Also, it may be that business travelers who are heading to similar destinations in the Manhattan Business District may be interested in a group ride program. The repeal of the existing unused group ride structure is necessary to facilitate such future pilot programs.

35 RCNY 1-72

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-72 Tolls.

(a) On all trips within the City of New York, any bridge and tunnel tolls to the destination shall be reimbursed by the passenger, who shall be so informed before the start of the trip. The amount of the reimbursement shall not exceed the E-Z Pass toll amount. Said reimbursement shall be remitted to the E-Z Pass tag holder by the driver.

(b) On all trips within the City of New York, there shall be no reimbursement for return tolls except for trips over the Cross Bay Veterans, and Marine Parkway-Gil Hodges Memorial Bridges. The amount of the reimbursement shall not exceed the E-Z Pass toll amount. Said reimbursement shall be remitted to the E-Z Pass tag holder by the driver.

(c) On trips beyond the City of New York, all necessary tolls to and from the destination shall be paid by the passenger. If E-Z Pass is used on tolls on trips beyond the City of New York, the amount of the reimbursement shall not exceed the E-Z Pass toll amount. Said reimbursement shall be remitted to the E-Z Pass tag holder by the driver.

(d) A driver who charges a passenger an amount in excess of the E-Z Pass toll amount shall be guilty of an overcharge as prohibited by §2-34(a). A driver who fails to reimburse an E-Z Pass tag holder for all toll charges incurred, including toll charges for which there is no passenger reimbursement, shall be subject to the provisions of §2-25(i). In addition to any other penalty permitted, the Commission may order restitution to a passenger or the E-Z Pass tag holder.

CHAPTER 1 TAXICAB OWNERS RULES

§1-73 Trips Beyond the City.

(a) For a trip beyond the limits of the City of New York, except for the Counties of Westchester or Nassau, or the facilities of the Port Authority of New York and New Jersey at Newark Airport, the fare shall be a flat rate. (A flat rate is a definite amount fixed between the driver and the passenger at the start of the trip. For example, "$20" is a flat rate. "Double the meter" is not a flat rate and is not the proper fare.) Beginning on November 1, 2009, the MTA Tax of fifty cents per trip shall be added to the total fare on any trip that originates in New York City and terminates either in New York City or in the county of Dutchess, Nassau, Orange, Putnam, Rockland, Suffolk or Westchester.

(b) For a trip to the Counties of Westchester or Nassau the fare shall be:

(1) the amount shown on the taximeter for that portion of the trip that is inside the City limits, plus twice the amount shown on the meter for that portion of the trip that is outside the City limits;

(2) all necessary tolls to and from the destination shall be paid by the passenger; and

(3) beginning on November 1, 2009, the MTA Tax of fifty cents per trip shall be added to the total fare.

(c) For a trip to Newark Airport the fare shall be:

(1) the amount shown on the taximeter plus a surcharge of $15.00; and

(2) all necessary tolls to and from the destination shall be paid by the passenger.

(d) Any continuous trip where the point of origin and the destination are both within the limits of the City of New York shall not be considered a trip beyond the City limits, even though the shortest and most direct route requires traveling outside such limits but within continuous counties. For such a trip the meter must be kept in the recording position throughout.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Because Belmont Park lies mostly within Nassau County, it was proper pursuant to subparagraph (b)(1) of this rule for a taxicab driver to charge a passenger a fare equal to the amount shown on the meter for the portion of the trip inside city limits plus twice the amount shown on the meter for the portion of the trip outside the city limits. Taxi and Limousine Commission v. Panic, OATH Index No. 1875/96 (Aug. 28, 1996), modified as to penalty, Comm'n Decision (Nov. 7, 1996).

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-75 Owner's Direct Operational Responsibility.

(a) Except as otherwise provided in §1-76 of these rules, an owner shall operate a taxicab through personal observation of the vehicle, personal oversight of compliance with inspection, insurance and all other regulatory requirements, and personal communication with drivers. An owner may, however, utilize employees or a licensed agent to perform any or all such functions. The use of an employee or agent shall not relieve an owner of any obligation under these rules. An owner remains fully accountable for any violations of commission rules, committed by any employee or agent in the operation of such owner's medallion.

NOTE

1. Statement of Basis and Purpose in City Record Oct. 30, 1995:

Section 9. This proposal shall take effect thirty days after its promulgation, except that the requirements limiting the use of an agent who does not have the requisite business premises shall take effect on February 1, 1996. Furthermore, the requirement of Section 1-76(c), shall take effect as to each owner only upon the expiration of any management contract that is outstanding as of December 1, 1995, but shall take effect in no case later than February 1,

1996.

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The amendments require that taxi owners either operate their taxicabs themselves, through direct participation in operation of the vehicle, selection of drivers and compliance with regulatory requirements, or else operate through a designated agent. Designation of an agent would not relieve an owner of the responsibilities of a licensee. An owner would be limited to having only one agent for a taxicab. Under certain circumstances, the Commission could direct owners not to use an agent who has been involved in serious misconduct.

The purpose of the amendments is to establish controls concerning the use of agents who manage taxicabs on an owner's behalf. The most common form of agency is the use of lease managers, who "lease" the medallion from the taxicab licensee. That "lease" is similar to a management contract. The lease manager then leases the medallion to taxi drivers.

Lease managers have become a major element of the taxi industry, operating a substantial percentage of the taxicabs in service. A Commission study in May 1994 found that 2,730 cabs were operated by management companies whose insurance policies permit any licensed driver to drive the cabs. There were 29 such management companies running at least 25 cabs, and 37 other companies that operated between 5 and 24 taxis. In addition, 2,370 taxis were leased to named drivers for periods of weeks or months. A significant portion of those longer term leases are also handled by lease management companies.

Taxi fleets operated 2,620 cabs out of 28 fleet garages, in May 1994. A portion of those fleet cabs are not owned by the fleet, but instead are managed by the fleet operator as the agent of the medallion owners.

These figures suggest that roughly half of the 11,787 taxis in service are now operated by agents for the owners.

Although the question of agency is usually discussed within the taxi industry in terms of "lease managers," these proposed rules would also apply to any fleet, broker, or other entity which operates medallions that the entity does not own.

The growth of agency relationships in the taxi industry has, in practice, diffused owner responsibility for the operation of taxicabs. To provide continued standards of responsibility for public safety, the Commission has adhered to the fundamental policy of Rule 1-58(a), "The designation of an agent shall not relieve the owner of any obligations under these rules." That provision is preserved in Rule 1-75(a). In the Commission's view, a medallion owner is the holder of a public license to operate a taxicab, and cannot escape the responsibilities of a licensee by using an agent. The Commission holds the licensee strictly accountable for the operation of a taxicab. The Commission considers the operation of a taxicab to include all aspects of service, including compliance with insurance and other regulatory requirements. The Commission's answer to the diffusion of responsibility, is that the licensee remains fully responsible. The Commission has followed that principle in a recent series of cases concerning vehicle-switching and insurance fraud.

The Commission needs an additional measure, to maintain standards of responsibility. In the recent cases involving vehicle-switching and insurance fraud, the Commission held absentee owners of taxicabs responsible for the actions of their agents, and punished the owners with substantial fines or ordered them to divest their medallions. Meanwhile, their agents have continued to operate those owners' taxis and many others, because the Commission has lacked rules requiring owners to refrain from making use of particular agents. In the Commission's view, this is a serious gap in its

ability to regulate the provision of transportation for hire in New York City.

The Regulations enable the Commission to determine when, on the basis of an agent's misconduct, owners may not enter into or continue in any business relationship with that agent. The proposal provides for an opportunity for the agent to be heard as to the circumstances of the violation, prior to the issuance of such a direction to owners, except in cases requiring immediate action to protect the public health, safety or welfare. The direction not to use an agent may include a directive not to use certain principals in the agent. The purpose of that provision is to prevent the use of multiple enterprises to mask the continuing role of persons involved in misconduct in taxicab operations.

The promulgated regulations permit an owner to designate only one agent for the owner's taxicabs. Furthermore, the owner's designation of an agent cannot be delegated by the agent to another party. In the recent series of cases, a substantial portion of the taxi owners had contracted with one company to manage their medallions, but another company was actually operating them. In the Commission's view, these multiple relationships contributed to the diffusion of responsibility for the safe operation of taxicabs.

The minifleet, a corporation which owns only a few medallions, is a common form of ownership in the taxicab industry. Persons who hold beneficial interests in numerous medallions typically establish several minifleet corporations, each of which is the owner of a few medallions. Under the proposal, each taxicab minifleet could have only one agent to operate the taxicabs owned by the minifleet. The purpose is to simplify accountability. However, a person who owns more than one minifleet could use different agents for each minifleet, because each minifleet is a separate owner.

Based on public comments, several changes were made to the proposed regulations.

- The term "agent" has been further clarified. An agent acts ". . . to operate or provide for the operation of a licensed vehicle . . .". The term is not intended to cover such persons as a bookkeeper or auto mechanic who may work for a variety of owners in the limited capacity of their trade. - Certain draft provisions concerning persons who own less than 10% of the stock in an ownership corporation have been deleted. Those provisions were considered confusing and unnecessary. - The effective date for the requirement that an owner cannot use more than one agent has been extended for certain owners who already have outstanding contractual arrangements with their agents. Such owners are given until February 1, 1996 to comply with this requirement. This is approximately a ninety day period, which will provide time to alter present business arrangements. - The requirement that owners may only designate agents who maintain specified business premises has likewise been given an effective date of February 1, 1996, approximately three months from promulgation of the rule. - The requirement in Section 1-77(a)(3), that owners may only designate agents who provide certain information to the Commission, has been clarified to include specifically information as to the identity of principals of the agent. - The penalty for non-compliance of Rule 1-77(c) has been deleted. No penalty is necessary to accomplish its purpose.

The proposal does not appear in a regulatory agenda for the agency. The preparation of an agenda for this fiscal year was postponed, until after the appointment of a new Chairman. The new Chairman has established this proposal as an immediate priority.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-76 Owners Who Use Agents.

(a) An owner may designate an agent to act on the owner's behalf to operate a licensed vehicle and perform all functions incident thereto. Such agent shall be licensed by the Commission in accordance with §19-530 of the Administrative Code. Such designation shall be in effect until revoked by the owner and the Commission is notified, or until such agent's license is suspended or revoked by the Commission.

(b) An owner who uses an agent shall file a designation of the agent with the Commission, prior to use of such agent.

(c) An owner shall not designate or use more than one agent for such owner's taxicabs. Minifleet taxicabs may be split, each to a different agent, to comply with the terms of a management contract in effect prior to February 1, 1996, but in no case may such taxicabs be split among agents after December 31, 1996. Upon the expiration of such a contract, the minifleet taxicabs must be managed by no more than one agent. At all times, an owner shall comply with the requirement that no more than one agent shall be designated for a taxicab.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-77 Limitations on an Owner's Use of an Agent.

(a) An owner may designate or use an agent, only if the agent:

(1) shall operate the taxicab through personal observation of the vehicle, personal oversight of compliance with inspection, insurance and all other regulatory requirements, and personal communications with drivers. An agent may, however, utilize employees to assist in fulfilling such functions, to the extent consistent with the terms of the owner's designation of the agent. The owner's designation of an agent shall be ineffective if delegated by the agent to another party; and

(2) shall maintain a business premises which meets the requirements of §1-45(a) and §12-05 of these rules.

(b) An owner may not designate or continue to use an agent, if the Commission has notified the owner that the specified agent's license is suspended or revoked.

(c) The Commission shall direct owners not to continue to use a specified agent, by mailing to the owner's personal address, if such owner is currently using such specified agent. The Commission shall further maintain on file a list of all agents with respect to whom such directives have been issued and are currently in effect, and shall make such list available for inspection by any person. Any owner who, notwithstanding the availability of such list, seeks to designate an agent who has been the subject of a directive not to designate shall be notified of such directive by the Commission at the time the designation is filed.

(d) No contract or other agreement entered into by an owner with an agent shall include a provision which purports

to supersede or impair the effectiveness, in whole or in part, of the provisions of this rule.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 1-78

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-78 Limitations on Standard Lease Rates Charged to Drivers.

(a) **Standard Lease Cap.** An owner of a taxicab may charge a lease rate to a driver that is not greater than the Standard Lease Cap.

(1) The Standard Lease Cap for a medallion and vehicle for one twelve-hour shift shall not exceed:

(i) $105, for all day shifts;

(ii) $115, for the night shift on Sunday, Monday and Tuesday;

(iii) $120, for the night shift on Wednesday;

(iv) $129, for the night shifts on Thursday, Friday and Saturday.

(2) The Standard Lease Cap for a medallion and vehicle for one shift for a week or longer shall not exceed $666 weekly.

(3) **Cost adjustments.** The Standard Lease Caps set forth in paragraphs one and two of this subdivision shall be adjusted as follows:

(i) For a vehicle that is hacked up pursuant to section 3-03.1 of this title, including a vehicle that is authorized by section 3-03(c)(10) of this title, the Standard Lease Cap shall be adjusted upward by $3 per shift ($21 per week).

(ii) For a vehicle that is hacked up pursuant to section 3-03 of this title, excluding section 3-03(c)(10) of this title, the Standard Lease Cap shall be adjusted downward by $4 per shift ($28 per week) beginning on May 1, 2009, by $8 per shift ($56 per week) beginning on May 1, 2010, and by $12 per shift ($84 per week) beginning on May 1, 2011.

(4) Limits on Additional Charges. No owner, including any employee or agent of an owner, may charge to or accept from a driver any payment of any kind, such as a tax, surcharge, pass-along, tip or fee of any kind, for the lease of a medallion or of a medallion and a vehicle, other than a lease amount no greater than the applicable Standard Lease Caps set forth in paragraphs one and two of this subdivision, plus

(i) a credit card pass-along no greater than permitted by section 1-85(b) of this chapter;

(ii) a security deposit no greater than permitted by section 1-79(c) of this chapter, less any deductions permitted by section 1-79(a) of this chapter;

(iii) the discount toll amount for use of the EZ-Pass as permitted by sections 1-37 and 1-83 of this chapter;

(iv) a late charge not to exceed $25 for any shift; and

(v) a reasonable cancellation charge, subject to the provisions of section 1-79.1(b)(6) of this chapter; and

(vi) parking tickets and red light violations permitted to be deducted from the security deposit pursuant to section 1-79(a)(3) and (4) of this chapter provided that the lessor and agent of the lessor permits the driver to challenge such tickets and violations.

(vii) If the owner or agent is a Taxpayer who is liable for the MTA Tax, the owner or agent may collect the MTA Tax due from the driver by, first, deducting the MTA Tax due from credit card reimbursements due to the driver pursuant to §1-78(d); second, deducting any additional MTA Tax due from the driver's security deposit pursuant to §1-79(a)(5); and third, charging the driver for any remaining MTA Tax due.

(viii) The lease of a medallion and vehicle under paragraphs one and two of this subdivision includes service and maintenance. Service and maintenance of the vehicle is the responsibility of the lessor of the medallion and vehicle and the lessor and an agent of lessor may not charge the lessee for service and maintenance costs for the vehicle.

(5) (i) The Standard Lease Cap for a medallion only, covering the entire time during a week or longer, shall not exceed $800 weekly.

(ii) **Cost adjustment.** The Standard Lease Cap set forth in subparagraph (i) of this paragraph shall be adjusted as follows:

For a vehicle that is hacked up pursuant to section 3-03.1 of this title, including a vehicle that is authorized by section 3-03(c)(10) of this title, the Standard Lease Cap shall be adjusted upward by $42 per week.

(iii) **Maintenance.** The lease of a medallion under this paragraph does not include, and does not require a medallion owner or its agent to provide, service and maintenance of the vehicle. A medallion owner or an agent of the medallion owner must not require the lessee to obtain service and maintenance from any particular provider, including, but not limited to the medallion owner or an agent of the medallion owner.

(c) The provisions of this rule do not apply to owners and lease drivers whose business relationship is governed by the terms of a collective bargaining agreement which regulates the subject of lease prices.

(d) **Credit Card Charges.** (1) An owner or the owner's agent must pay a driver daily in cash the driver's receipts that are charged to a credit card on that day, less only a credit card pass-along no greater than permitted by section 1-85(b) of this chapter for any lease under paragraphs one or two of subdivision (a) of this section. For all other leases,

an owner or an owner's agent must pay the driver in cash no less often than weekly the driver's receipts that are charged to a credit card, less only a credit card pass-along no greater than permitted by section 1-85(b) of this chapter.

(2) If any owner or owner's agent is a Taxpayer, then the owner or owner's agent may deduct from the driver's credit card receipts payable under this subdivision (d) the amount due for the MTA Tax as a result of the trips driven by the driver.

NOTE

1. Statement of Basis and Purpose in City Record Dec. 2, 1996:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The promulgated regulatons are intended to resolve certain issues which a group of taxi lease managers had raised in two lawsuits and before the City Council.

The promulgated regulations provide a more flexible cap on lease prices, which allows greater flexibility in business practices in the taxi industry. The regulations extend the period of operation for some taxicabs before their mandatory retirement dates. The regulations also provide enhanced incentives for taxi operators using compressed natural gas for fuel.

The upper limit on taxi lease rates.

The promulgated regulations establish Standard Lease Caps, at fixed prices, which could be used by any taxi operator. This provision supplements the current rule, which fixes a Baseline Lease Cap for each medallion. The

Standard Lease Cap is within the range of lease rates permissible for numerous medallions pursuant to their Baseline Lease Cap. It does not raise, therefore, the cap on prices available in the taxi leasing market. It does permit operators whose prior lease rates were below average to raise their lease rates to match the higher end operators. This reflects the higher operating requirements established in 1996 by Commission regulations. The higher end lease prices were obtained by taxi operators who could offer a new car to drivers. The taxi operators who offered used cars at lower rates must be able to reach the lease rate level of those operators providing newer cars, now that they must also provide newer cars.

The current TLC regulations forbid operators to change the terms of the current leases in effect for each medallion. The consequence is a freeze on each medallion's manner of operation. Such a freeze was necessary in the first phase of a lease cap, to assure that hidden charges or reduced services did not subvert the limitation on lease rates. In that regard, the freeze was successful. However, a continued freeze on each medallion's manner of operation is not in the public interest, as it inhibits change in the taxi industry.

Under the promulgated rule, an operator could change the manner of operation, for example, from daily shift operation to long-term leasing. The operator must, however, set the lease price within the limitation of the Standard Lease Cap.

The Standard Lease Cap for one shift was modified, based on written comment. Current lease prices for the night shifts on Thursday, Friday and Saturday are higher than $103. The Standard Lease Cap was modified to reflect what is currently charged pursuant to the Baseline Lease Cap. The rule was also modified to state that only operators of taxicabs of model year 1994 or newer taxicabs are permitted to use the Standard Lease Cap rather than the Baseline Lease Cap. In the Commission's view, the higher prices that may be permitted under the Standard Lease Cap should only be available when an operator has a new car. The 1994 model was still among the new cars as of the Baseline Period ending in September 1995. Those owners who operated new cars immediately prior to the new car requirement are thereby eligible for the Standard Lease Cap.

Deleted from the final rule is a provision which would have provided a 17% baseline lease cap to the operators of the oldest vehicles, upon hacking up new vehicles. The provision stirred misapprehension that the lease cap was being raised across the board to 17%. That was not the case. The provision applied only to a small group of operators. They may still utilize the Baseline Lease Cap, and when they field a new vehicle they may utilize the Standard Lease Cap.

The Baseline Lease Cap remains as an alternative for those operators who under current regulations would be permitted rates higher than the new Standard Lease Cap. Consequently, no operator's lease cap is reduced by the proposal.

The promulgated regulations provide that the Commission shall not lower lease rate caps unless there is substantial evidence in the record that costs for affected taxi operators have decreased. The rule establishes periodic review of operating expenses in the taxi industry. The first such review shall be held no later than March 1998, and thereafter at least once every two years. This provision does not limit the rights of taxi owners pursuant to the City Charter to petition for rule changes at any time.

The promulgated rule, in this connection, deletes a requirement for a certain report due in March 1997. An extended period of litigation and negotiations, with continued consideration of operating methods and expenses, and retaining experienced drivers, has led to these proposed changes in TLC rules. That review process obviates the need for any further report by March 1997.

Vehicle Retirement Schedule

The Commission has found that the new car requirement has led to rapid and significant improvements in the age and quality of taxicab rolling stock. The Commission believes that even with the promulgated changes in the mandatory vehicle retirement schedule, the pace of improvements will remain rapid. By no longer permitting the hack-up of used

police cars, the Commission has quickly established a higher proportion of new cars. The new cars are much superior to used vehicles in vehicle emission rates, especially during the first two years of operation as taxis. Commission data shows that a vehicle that is just a few years old emits four times as much pollution as a car in its first year of operation.

The Commission has focused on the role of the so-called "Driver Owned Vehicles" or "DOV", and has concluded that the DOV terminology fails to describe actual operating practices. In many cases the DOV is not owned by the driver, who is simply leasing the vehicle under a separate contract which contains an option to purchase the vehicle. In the promulgated regulations the operative term replacing "driver owned vehicle" is simply "Long-Term Driver". The retirement schedule recognizes that a vehicle driven regularly by a Long-Term river is more likely to be well maintained than is a vehicle operated by many different drivers. A Long-Term Driver is defined as a steady driver who drives at the rate of at least 160 hours a month, who is named on the rate card as a regular driver, and who is either a medallion owner or the holder of a lease with a term of at least five months. The number of hours of driving required was raised, based on comments, from 128 hours to 160 hours a month. This better reflects a full-time operator. Similarly, the rule was clarified to state that a person can be a long-term driver for only one taxicab.

A vehicle hacked-up on or after March 1, 1996 which is driven by at least one Long-Term Driver must be retired five years after hack-up. All other vehicles must be retired within three years of hack-up.

There is a transitional provision, which allows those operators who hacked-up new cars since March 1, 1996 to begin using a Long-Term Driver no later than March 1, 1997 and still receive the five year retirement schedule. Those vehicles may be operated without Long-Term Drivers until March 1, 1997. After that date, a new car must always be driven by at least one Long-Term Driver in order to qualify for the five year retirement schedule. A period without a Long-Term Driver is one in which care and maintenance are not appropriate for the longer retirement schedule.

The additional years of operation for a vehicle driven by a Long-Term Driver also serves as a powerful incentive to operate with such drivers. This should enhance the market value of steady drivers, improving their earnings and working conditions. The Commission has found that experienced, steady drivers receive the fewest summonses, a strong indicator that they are the best, safest drivers. Emphasis on the role of long-term drivers therefore enhances public safety.

The promulgated regulations provide a simpler and slower schedule for the retirement of vehicles that were already in service as taxicabs prior to March 1, 1996. The promulgated regulations use one schedule for all such vehicles of the same model year. This eliminates the difficult task of determining retirement dates for vehicles based on prior use, as the current regulations require. The retirement schedule is also extended somewhat. The first retirement period was to have begun on November 1, 1996. That period is postponed until the period beginning April 1, 1997. Similar extensions for newer models extend their permitted usage by six to twelve months. This provides more time for owners to form capital to meet the new car requirement.

The Commission expects that this extension would not significantly slow the transition to new cars.

Incentives for Compressed Natural Gas

The promulgated regulations provide enhanced incentives for vehicles using Compressed Natural Gas. The incentive is two additional years of operation before mandatory retirement. The incentive is offered for new vehicles. It is also offered for vehicles of model year 1995 and 1996 that convert to CNG use before April 1, 1997. The purpose of these incentives is to promote the use of a fuel which emits substantially less pollution. This improvement in emissions meets a key objective of a mandatory vehicle retirement schedule.

This provision was modified, based on TLC staff comment, to offer the incentive for vehicles which are converted to CNG within six months of hack-up. This change is based on experience that conversions to CNG are being made after solicitations of the owners of newly hacked-up cars. Owners are not converting to CNG prior to hack-up.

Conclusion

The promulgated regulations satisfy the most serious concerns within the taxi industry about the 1996 taxi reforms. The promulgated regulations preserve the essential features of these reforms and consolidate their achievements.

The regulations were not included in a regulatory agenda. They are a consequence of review pursuant to negotiations of matters in litigation.

2. Statement of Basis and Purpose in City Record Jan. 30, 1996: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The adopted regulations cap the lease rates that owners could charge to drivers for the use of a licensed taxicab. The cap applicable to each owner is based on that owner's highest lease charges for that medallion during 1995, through September 30, 1995. The cap limits any increases in the lease price to no more than fourteen percent above the medallion's previous lease rate. The fourteen percent figure is intended to provide roughly a 60-40 split between driver and owner of the fare increase. The fare increase, which is provided in a separate rule proposal, is estimated to increase taxi revenue by $33 per shift. That estimate is based upon a $1.10 increase in the fare for an average trip, and an average of thirty trips per shift. The purpose of the adopted regulations is to improve taxicab service and safety by retaining experienced taxi drivers. Higher earnings are a key component of retaining experienced drivers. TLC studies have found that experienced drivers receive substantially fewer summonses than new drivers. That is an indication of better service. In taxi operations, a better worker is more knowledgeable, more courteous, and a safer driver. Public safety is directly related to working conditions, particularly earnings. Over the past several years, passenger complaints about the driver's operation of the vehicle have risen. In that same period, drivers' real earnings have actually declined. (Lease rates have risen while the rate of fare has remained constant and the volume of business has remained steady or declined. This has resulted in lower earnings for drivers.) The most direct relationship between earnings and driving safety is the pressure a driver may feel to go faster, and to be bolder in traffic in an effort to proceed faster than the flow of traffic, in order to carry more fares and maximize income. Steady or higher earnings would help alleviate that immediate pressure. The indirect benefit-that is, the benefit of retaining experienced drivers-may be much greater. Higher earnings should encourage drivers to remain in the business. The cap on lease rates will affect the taxi labor market in conjunction with other TLC initiatives. The Commission has recently taken over the testing of applicants for taxi driver licenses. Previously, the tests were administered by the taxi schools which the TLC requires applicants to attend to qualify for a license. Perhaps the schools had a competitive incentive to pass their students in order to attract more applicants into their respective schools. Perhaps TLC then did not express a high enough standard to the schools. For whatever reason, only two percent (2%) of applicants failed the tests given by the schools. Over the years, passengers continued to complain that drivers did not adequately know the City or even conversational English. The test that TLC administers is now failing over thirty percent (30%) of applicants. This has reduced the influx of new drivers. Applications for licenses have also declined. The influx of new, inexperienced drivers has previously tended to keep the price of labor low in the taxi industry. Experienced drivers could not continue the stressful job of taxi driving for sustained periods in the face of the downward pressure on earnings (the upward pressure on lease rates) from a continually arriving pool of further applicants. The labor market for taxi drivers has long been unbalanced to the disadvantage of drivers, with serious consequences for taxi service and public safety. The supply of jobs-opportunities to drive a taxicab for a shift-has remained fixed, due to the limit on the number of medallions. There has been no limit on the number of new drivers seeking work. Experienced drivers have been pushed out of the industry by low wages resulting from the government created imbalance of supply and demand. These TLC initiatives-stricter standards for new applicants, and higher earnings for qualified drivers, are intended to retain experienced drivers, providing better and safer taxi service. This new regulation capping the lease rates is so central to the Commission's analysis of the industry and its needs, that the Commission has made the increase in the taxi rate of fare contingent upon the continued applicability of this cap on

lease prices. If the provisions of this new regulation concerning limits as to lease prices are for any reason declared invalid by a court of competent jurisdiction, then the rate of fare shall revert to its current level, erasing the proposed increase in the fare. That provision appears in the companion proposal concerning the taxicab rate of fare. In the Commission's analysis, driver quality must improve. To accomplish that, the earnings of drivers must increase enough to retain experienced drivers. In the context of a government limit on the number of licenses, the Commission is compelled to balance the market forces by capping lease prices. The cap on lease prices is only an upper limit. Market forces, related to a declining rate of influx of new taxi drivers, may create competitive conditions which cause owners to attract drivers by raising their lease prices by less than the permitted amount. These regulations require the Chairman to study the effects of the cap during its first year in effect, and to report to the Commission no later than March 15, 1997. That report will evaluate the extent to which the Commission's policy objective of improving taxi service and public safety by retaining more experienced drivers has been met. Several changes were made to the proposal in response to public comments. The proposal was amended by limiting any increases over baseline leases to no more than fourteen percent, rather than limiting increases to no more than $13 per shift. The reason for the change is that there are too many varying leases, such as medallion leasing with and without a vehicle, to fix specific dollar amounts by regulation. For similar reasons, the language explaining the term equivalent lease was added. In addition, the baseline period was changed from December 15, 1995 to September 30, 1995 in order to counteract any lease prices which were deliberately increased in anticipation of the proposed regulations being adopted. These regulations do not override any collective bargaining agreement in effect between taxi owners and lease drivers. The only such agreement now in effect is between the fleet owners in Metropolitan Taxicab Board of Trade and the members of Local 3036, Taxi Drivers and Allied Workers Union, SEIU, AFL-CIO.

3. Statement of Basis and Purpose in City Record Apr. 2, 2004: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City, and by §19-503 of the Administrative Code, which authorizes the TLC to promulgate regulations to implement provisions of the Charter. In 1996, the TLC first promulgated regulations establishing maximum lease rates that may be charged drivers who lease taxicabs by the shift, or for longer periods. Section 1-78(e) of the Taxicab Drivers' Rules permit the TLC to raise or lower this lease cap upon a demonstration of substantial evidence of increased or reduced operating expenses of the affected medallion owners. If the TLC proposes to increase the maximum lease rates, a review shall also include, but not limited to, the effects on driver earnings and the retention of experienced drivers. The TLC received two rulemaking petitions, each of which have requested adjustments to the maximum lease rates charged by taxicab owners. One petition, filed by the Metropolitan Taxicab Board of Trade ("MTBOT"), has requested that maximum lease rates be increased for all shifts; the other petition, filed by the Taxi Workers' Alliance ("TWA"), has requested maximum lease rate reductions. The TLC has considered the two petitions, and it has reviewed the data submitted by the petitioners. Lease rates have remained constant since 1996, despite increases in many of the expenses incurred by taxicab owners. The data submitted by the owners' groups filing a petition has indicated that an increase in maximum lease rates would be needed to compensate owners for these increases in expenses such as vehicle replacement, insurance and maintenance. However, a substantial increase in lease rates would have an adverse impact upon a driver's income. The TLC initially proposed lowering the maximum lease rate for two shifts during which it appeared that drivers earn a lower income, in order to encourage drivers to provide service to the public during these periods. The TLC also initially proposed raising the lease cap during certain other shifts, resulting in an overall increase in maximum lease rates of approximately 3.4%. The TLC also proposed an increase in weekly lease rates that is proportionate to the increase in daily rates. After reviewing the public comments received and testimony given at the public hearing held on March 30th, the Commissioners voted to make some adjustments to the proposed maximum lease rates to ensure that taxicab owners would be adequately compensated for the additional expenses they had incurred since maximum lease rates were established in 1996. To this end, the Commission approved an overall increase in maximum lease rates of approximately eight percent (8%). The TLC further notes that taxicab owners and drivers are free to agree upon lease rates that are below the maximum set by regulation. Many garages have reported to the TLC that the actual lease rates charged are lower than the maximum set by TLC rules for a majority of shifts.

4. Statement of Basis and Purpose in City Record Apr. 1, 2009: These rules modify existing Taxi and Limousine Commission rules governing taxicab leasing in several respects. In light of the determination in **Metropolitan Taxicab Board of Trade v. City of New York**, 08 Civ. 7837 (PAC) (Oct. 31, 2008), these rules rescind the existing rules mandating that taxicabs hacked up beginning on October 1, 2008, must be city-rated at or above 25 miles per gallon, and that taxicabs hacked up beginning on October 1, 2009, must be city-rated at or above 30 miles per gallon. In the place of that rescinded requirement, the new rules alter the maximum lease rates in such a way as to create incentives for taxicab owners to buy cleaner vehicles. Specifically, the proposed rules permit owners of medallions used for hybrid electric taxicabs and "clean diesel" taxicabs to charge $3.00 per shift more than the maximum lease rate that would otherwise be allowed. Similarly, owners of less clean taxicabs will, after a phase-in period, be permitted to charge $12.00 per shift less than the maximum lease rate that would otherwise be allowed. Lease rates for wheelchair accessible taxicabs will remain unchanged. Under existing rules, a taxicab owner who purchases a vehicle that is costly to run does not bear the gasoline costs incurred in the operation of that vehicle. Instead, gasoline costs are borne by the drivers, who may have no voice in the owner's choice of vehicles. These newly promulgated rules are intended to place gasoline costs on the owner who chooses the vehicle. An owner who chooses a vehicle which is also a fuel efficient vehicle will be able to realize greater lease income than an owner who chooses a less efficient vehicle, while the expenses of leasing drivers will be roughly equal regardless of the taxicab owner's vehicle choice. The newly promulgated rules also specify that owners and agents may not add costs to the lease, other than charges specifically provided for by Commission rules. Therefore, under the new rules, the maximum lease rates cap the total of all charges, other than the credit card pass-along and the security deposit, a late charge and a reasonable cancellation charge (subject to certain required contract provisions) that an owner or agent may charge to a leasing driver. In addition, the new rules specify that owners and agents must settle credit card charges with drivers, in cash, on a daily or weekly basis. The newly promulgated rules formalize the leasing relationship in several respects. A lease, including any amendment to a lease, is required to be in writing and signed by the leasing driver; to contain an itemization of all charges; and to clearly state a lease term; and, if a cancellation charge is permitted, to contain certain provisions regarding cancellation. Similarly, the rules require that owners and agents provide leasing drivers with receipts for all payments made leasing drivers. The rules further expressly prohibit retaliation by an owner against a driver for filing a complaint alleging in good faith an owner's violation of the TLC's lease rules. In view of TLC's experience that drivers are extremely reluctant to file such complaints for fear of such retaliation, the proposed penalty for retaliation is $1,000. Finally, the new rules make two procedural changes in the Commission's existing rules. While owners and drivers could continue to petition for changes to lease caps, the Commission, on its own initiative, would be able to modify lease caps, by rulemaking, on the basis of its assessment of appropriate policy considerations. The rules also eliminate the requirement that a complaint for a violation of a lease cap provision can be made only by the driver subject to the lease. Drivers may be reluctant to report lease cap violations due to concerns about retribution and blacklisting. Effective enforcement of lease caps requires that complaints of violations be investigated actively, regardless of the source of the information.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-78.1 Changes to Lease Caps.

(a) During March of each even-numbered year, the Commission shall hold a public hearing and solicit written comment as to operating expenses, driver earnings, the retention of experienced drivers in the taxi industry, and other matters relevant to the setting of lease caps, for purposes of considering changes to the Standard Lease Caps set forth in section 1-78 of this chapter.

(b) Notwithstanding the provisions of subdivision (a) of this section, the Commission may initiate lease cap changes at any time, based on the Commission's assessment of appropriate policy considerations.

35 RCNY 1-79

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-79 Limitations on Security Deposits Required of Drivers.

(a) An owner may include in a lease a provision for a security deposit from the driver, in addition to lease payments, subject to the limitations of this paragraph. At the termination or expiration of a lease an owner may be reimbursed from the security deposit for:

(1) any unpaid but owing lease charges;

(2) damage to the vehicle, if the lease clearly and prominently states that the driver is responsible for damage;

(3) any parking tickets issued during the lease;

(4) any red light violations issued to the owner during the lease, pursuant to the N.Y.C. Dept. of Transportation's camera surveillance system; and

(5) if the owner or agent is a Taxpayer liable for the MTA Tax, any MTA Tax remaining due from the driver after deductions from credit card reimbursements due to the driver.

(b) An owner shall not withhold or deduct from a security deposit any reimbursement additional to those specified in subdivision (a). An owner shall not require a driver to pay any summons that is written to the owner as respondent, other than those specified in subdivision (a).

(c) An owner shall not require a driver to post any security deposit that is greater in amount than the rate for one lease term. However, if the lease term is for more than one week, an owner shall not require a driver to pay a security

deposit in an amount greater than the lease rate for one week. Examples:

(1) An owner who leases a taxicab for one shift at the rate of $80 per shift may require up to an $80 security deposit.

(2) An owner who leases a taxicab or medallion for one week at the rate of $500 a week may require up to a $500 security deposit.

(3) An owner who leases a taxicab for six months at the rate of $2,000 a month may require up to a $500 security deposit.

(d) An owner shall provide written receipts for any security deposits made by a driver. An owner shall provide a driver with a written itemization of any items withheld or deducted from a security deposit. An owner shall return a security deposit either by check or by cash exchanged for a written receipt from the driver. An owner shall return a security deposit no later than thirty days after the end of the lease term.

(e) An owner who requires a security deposit shall deposit same in an interest-bearing account in a bank or credit union within the City of New York, which account is devoted to security deposits and not commingled with funds of the owner. The owner shall indicate in writing provided to the driver the name and address of such bank or credit union and the applicable account number. Interest on such security deposit shall accrue to the benefit of the driver furnishing the security, except, however, that the owner may retain one percentage point of any interest, as compensation for bookkeeping expenses.

(f) The provisions of this section do not apply to owners and lease drivers whose business relationship is governed by the terms of a collective bargaining agreement which regulates the subject of security deposits.

Subd. (a) par (5) added City Record Sept. 25, 2009 §7, eff. Oct. 25, 2009. [See T35 §15-15 Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Dec. 29, 1995:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The regulations limit the amounts of security deposits that owners may require of drivers. Such deposits may be no larger than the lease rate for one lease term. However, if the lease term is longer than one week, the deposit may be no larger than the rate for one week. The regulations also limit the items which may be deducted by an owner from security deposits.

The promulgated regulations are intended to reduce the incidence of abuses of security deposits. TLC staff have

been conducting informal mediation of numerous complaints by drivers of security deposit abuses. In some instances, the driver complaints have been unfounded. In other instances, drivers have not been returned their money as properly due. Abuses, real or apparent, may cause drivers to leave the taxi industry.

A common practice, which the Commission wishes to prevent, is for the owner to require the driver to pay any summonses that are written to the owner as respondent during the driver's lease term. In the Commission's view, a summons written to a taxicab owner reflects the owner's responsibility for the operation of the taxicab. The Commission's summonses of an owner are intended to reflect violations that are the owner's responsibility.

The promulgated regulations prevent an owner from assessing a driver for most summonses written to the owner. However, an owner could require a driver to pay parking summonses. Those summonses are written to the vehicle's registered owner, the medallion owner, although the parking violation was committed by the driver. The rules also permit an owner to assess a driver for any red light violations issued to the owner during the lease, pursuant to the N.Y.C. Dept. of Transportation's camera surveillance system. Those summonses are issued to the vehicle's registered owner, the medallion owner, as identified by the license plate shown in photographs. The driving violation, however, was committed by the driver.

The promulgated rules permit an owner to assess a driver for damage if the lease clearly and prominently states that the driver is responsible for damage.

The regulations require that security deposit transactions be made in writing, to improve accountability and clarify the transactions in some cases. It requires that the security deposit be returned within thirty days of the end of the lease term.

The regulations require that security deposits be kept in interest-bearing accounts, and that the interest be paid to drivers, although the owner is permitted to retain one percentage point of the interest to compensate the owner for bookkeeping expenses.

The regulations provide penalties for violations of the requirements and provides for restitution to the driver for prohibited charges. Penalties are necessary to enforce the cap on lease prices and the limits on security deposits.

The new regulations do not override any collective bargaining agreement in effect between taxi owners and lease drivers. The only such agreement now in effect is between the fleet owners in Metropolitan Taxicab Board of Trade and the members of Local 3036, Taxi Drivers and Allied Workers Union, SEIU, AFL-CIO.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-79.1 Lease Terms and Form of Lease.

(a) Every lease entered into pursuant to section 1-78 of this chapter, including any amendment to such lease, must be in writing, and must be signed by the owner or a person duly authorized to act on behalf of the owner, and by the leasing driver or drivers. A copy of the fully executed lease must be provided to the leasing driver or drivers.

(b) Every such lease must contain the following terms:

(1) **The length of the lease.** The lease must state the beginning date and time of the lease and the ending date and time of the lease. A weekly lease must run for seven consecutive calendar days. A shift must run for 12 consecutive hours.

(2) **Itemization of the costs covered by the lease.** The lease must state the total lease amount, and an itemization of that total cost. The itemization must separately state the amount of the lease that applies to the medallion and the amount if any that applies to the vehicle.

(3) **Other costs.** The lease must state the amounts if any of the security deposit, the percentage credit card pass-along and any other costs that the driver will be charged.

(4) **Notices.** For each cost itemized pursuant to paragraphs two and three of this subdivision, the lease must include a reference to the Commission rule authorizing the imposition of such cost on the driver. The lease must either recite the complete text of each such rule or state the address of the Commission's Web page on which the rule is published.

(5) **Overcharges.** Every lease must contain clearly legible notice that overcharges are prohibited by the Commission's rules, and that complaints of overcharges may be made in writing to the Commission or by telephone call to 311.

(6) **Cancellation charges.** Any cancellation charge contained in the lease must be reasonable, and will not be permitted unless the lease also provides that

(i) no cancellation charge may be charged to driver if the medallion owner or its agent demands the return of the medallion and the driver is not late in making lease payments at the time of such demand;

(ii) if an agent demands the return of a medallion upon the request of an owner, the driver has the right to request that the agent supply a replacement medallion and, if a medallion is provided through the agent, the driver will not be responsible for the costs of hacking up a replacement vehicle; and

(iii) when a cancellation payment is made, the driver's obligation to make lease payments terminates upon such payment.

(7) Deposit information. Each lease must include the information regarding deposits required by section 1-79(e) of this chapter.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-80 General Provisions Concerning Medallion Transfers.

(a) Transfer of a taxicab license may be accomplished by purchase, gift, bequest, operation of law, acquisition of the stock or assets of a corporation, or acquisition of membership interests in or assets of a limited liability company and only with the written approval of the Chairperson as to the transferee. Any transfer of any interest in a taxicab license, whether in whole or in part, and whether directly or indirectly, is subject to the provisions of this section. Any proposed transferee of any direct or indirect interest in a taxicab license must apply for a taxicab license and must comply with the provisions of this chapter and meet the qualifications and requirements for ownership and operation of a medallion taxicab as set forth in this chapter, including those contained in §§1-02 and 1-03 of this chapter, the tort claim provisions contained in §1-81 of this chapter, and the medallion transfer provisions in this section and §§1-80.1 and 1-80.2.

(b) No person or entity shall attempt to transfer or participate in the transfer of any taxicab medallion without fulfilling the requirements of subdivisions (c) and (d) of this section, as applicable to such person, and obtaining the written approval of the Chairperson for such transfer. Submission to the Chairperson of an application to transfer a taxicab medallion shall not be a violation of this subdivision.

(c) An applicant for a taxicab license which is a transferee, or an applicant which is an executor, administrator, conservator or guardian seeking to operate a taxicab under the provisions of §1-82 (c) of this chapter, in order to complete the transfer of such license to applicant pursuant to this section, must appear in person as directed by the Chairperson, except that an applicant (or as to any shareholder, partner or member of an applicant who is required to appear by the following sentence) who (i) holds an existing, continuing license from the Commission, and (ii) has an electronic fingerprint record made no earlier than one year prior to the date of the transfer on file with the Commission,

may appear by power of attorney. If the applicant is a corporation, partnership or limited liability company, applicant must be represented in such appearance by all individual shareholders, general partners, or members, except those to whom the exception in the preceding sentence is applicable.

(d) A transfer of the interest in the taxicab license shall be complete and effective upon the Chairperson's approval of the applicant's application, the appearance of the transferee as required in subdivision (c) of this §1-80, payment of any New York City taxicab license transfer tax due as required in subdivision (h) of this §1-80 and in subdivision (m) of §1-80.1 of this chapter, the transferor's and the transferee's fulfillment of the requirements as to tort liabilities set forth §1-81 of this chapter and the fulfillment by the parties of the applicable medallion clearance requirements of §1-80.2 of this chapter.

(e) Each transferee of a taxicab medallion must place the medallion into service with a vehicle eligible for use as a taxicab under chapter 3 of this title and which has been hacked up as that term is used in §3-01(a) of this title within seven (7) days of the effectiveness of the transfer of the taxicab. Each applicant which is an executor, administrator, conservator or guardian seeking to operate a taxicab under the provisions of §1-82 (c) of this chapter must place the medallion into service with a vehicle eligible for use as a taxicab under chapter 3 of this title and which has been hacked up within seven (7) days of approval of the application.

(f) No voluntary transfer or sale of a taxicab license may be made if a judgment has been filed within the City of New York against the holder of a license and remains unsatisfied and notice of said judgment has been filed with the Chairperson, except that a transfer may be permitted if an appeal is pending from an unsatisfied judgment and a bond is filed in an amount sufficient to satisfy the judgment but not to exceed the fair market value of the medallion or medallions being transferred. A transfer may also be permitted without filing a bond provided that all the judgment creditors of unsatisfied judgments file written permission for such a transfer with the Chairperson or provided that the proceeds of sale are paid into court or held in escrow, on terms and conditions approved by the Chairperson.

(g) An owner's interest in such a taxicab license may be transferred involuntarily and disposed of by public or private sale in the same manner as personal property. However, upon such involuntary transfer, the owner's license shall immediately be cancelled. A new license shall be issued to the purchaser or his or her vendee when the transfer is effective as provided in subdivision (d) of this section, provided that (i) such purchaser or vendee has qualified as a transferee under and met the requirements as provided in this §§1-80 through 1-80.2 of this chapter and (ii) the tort liability requirements of §1-81(e) of this chapter have been met or are met at the time of such transfer; except that if the involuntary transfer is by reason of a tort judgment against an involuntary transferor, no bond need be provided with respect to the same judgment.

(h) A transferee of a taxicab license must satisfy his or her transfer tax liability as determined by the Department of Finance pursuant to Title 11 of the Administrative Code, prior to or at the time of transfer.

(i) A transfer of the taxicab license of an independent taxicab owner shall be made only to a transferee that will be an independent taxicab owner; similarly, the transfer of the license of a fleet or minifleet taxicab owner shall be made only to transferee that will be a minifleet or fleet owner.

(j) An independent taxicab owner may not have a financial interest in any other taxicab; a taxicab fleet or minifleet, including any officer, director, partner, and/or member of an owner thereof, may not have a financial interest in an independently owned taxicab. For purposes of this subdivision, "financial interest" shall mean any direct or indirect ownership interest or any interest given or received as a pledge or security or subject to a security agreement to secure any financing or obligation.

(k) **Conditional sales agreements.** (1) No transfer of an interest in a taxicab medallion through a conditional sales agreement shall be effective until the requirements of §§1-02, 1-03, 1-80, 1-80.1, 1-80.2 and 1-81 of this chapter have been fulfilled and the vendee has qualified as a transferee under this §1-80. Any fines or penalties imposed against the

taxicab license for violations occurring during the term of any conditional sales agreement shall remain the responsibility of the seller until the transfer is effective under subdivision (d) of this §1-80.

(2) Parties to a conditional sales agreement are subject to the "lease cap" provisions of §1-78 of this chapter.

(3) Parties to a conditional sales agreement shall provide the Chairperson with a disclosure statement indicating the terms of agreement.

(4) The vendor party to a conditional sales agreement shall notify the Chairperson in writing of any repossession by the vendor of the taxicab within seventy-two (72) hours exclusive of weekends and holidays.

(5) For purposes of this subdivision, "conditional sales agreement" shall mean an agreement for the transfer of a taxicab medallion for which the effectiveness as between the parties is contingent upon the completion and/or satisfaction of certain conditions, including, but not limited to, the completion of payment of financial consideration.

(l) **Applicability.** (1) Any person seeking to become a transferee of an interest in a taxicab license, including a person acquiring a taxicab license from or through a secured lender as a result of a foreclosure, repossession, or other realization upon security, must comply with the provisions of this section, must meet the standards and criteria for ownership of a taxicab medallion as set forth in §§1-02 and 1-03 of this chapter, must provide the documentation required in §§1-80.1 and 1-81 of this chapter, except if such person seeks to become a transferee of a medallion acquired pursuant to an auction of taxicab medallions under chapter 13 of this title, such person need not comply with §§1-80.1(m)-(n), 1-80.1(p)-(r) and 1-81 of this chapter, although any subsequent proposed transferee therefrom must so comply.

(2) Any seller or transferor of an interest in a taxicab medallion (other than a secured lender foreclosing upon or repossessing its security) must comply with the provisions of §§1-80.2 and 1-81 of this chapter.

(3) Any secured lender foreclosing upon, repossessing, or otherwise realizing upon its security in a taxicab license and not seeking to be a transferee is not required to comply with these provisions or with §§1-80.1, 1-80.2 and 1-81 of this chapter except to the extent required in §§1-80.1(n), 1-80.2(c) and 1-81 (e) of this chapter, although any proposed transferee acquiring an interest from or through such lender must so comply.

(4) Any administrator, executor, conservator or guardian seeking authority to operate a taxicab medallion must comply with the provisions of §1-82 of this chapter as must any distributee from an estate or trust as permitted by this chapter.

NOTE

1. Statement of Basis and Purpose in City Record Dec. 24, 2008:

These rules amend the provisions of chapter 1 of Title 35 of the Rules of the City of New York (the "Taxicab Owner's Rules") to revise and clarify procedures regarding the medallion transfer process. The rules specify the documents to be submitted in order to obtain approval of the transfer and enumerate the requirements a proposed transferee of an interest in a taxicab medallion must fulfill in order to qualify to own a taxicab medallion. In addition, the rules provide procedures to be followed in the event the owner of an interest in a taxicab medallion dies or is

declared incompetent, and set forth the circumstances under which the taxicab may be operated by the estate or guardian and what must happen before a successor may be qualified to operate the taxicab and hold the taxicab license. Finally, the rules set forth procedures by which possible claims against a transferring medallion interest owner or that owner's taxicab may be addressed consistent with the provisions of §19-512 of the Administrative Code. These rules provide that transferring owners must establish an escrow account to satisfy tort claims, in excess of insurance amounts, that have been asserted against them. In most cases, the amount placed into the escrow account will not exceed the transferor's "equity" in the medallion (that is, the value of the transfer minus pre-existing secured debt). Transferors objecting to the amounts of claims asserted against them may have these amounts determined (for purposes of establishing the appropriate escrow amount) in an administrative proceeding before OATH upon giving proper notice to the claimants. These rules are intended to be consistent with the requirements of §7-201 of the New York General Obligations Law and the provisions of the New York Uniform Commercial Code. These rules, as designed, replace the previous transfer rules which appeared at §1-80 through §1-82 of the Taxicab Owner's Rules. In addition, the rules amend provisions of the Taxicab Agents' rules appearing at Chapter 12 of Title 35 of the Rules of the City of New York to provide that taxicab agents have a duty to notify the Commission of the death or incompetency of an owner of an interest in a taxicab medallion.

These rules were proposed to codify, and in some cases to streamline, Taxi and Limousine Commission processes with respect to the transfers of taxicab medallions and, in particular, to make clear in the Taxicab Owners Rules, the documents and processes required to complete a transfer. In addition, the rules are intended to create a procedure by which the amount of possible tort claims outstanding in excess of insurance proceeds in respect of a medallion being transferred are evaluated and provided for, in a manner consistent with the requirements of law, and actual conditions existing within the taxicab industry.

35 RCNY 1-80.1

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-80.1 Documentation and other Requirements for Qualification as a Transferee.

An applicant for a taxicab license, in order to qualify for ownership of a medallion taxicab as a transferee under §1-80 of this chapter, shall include the following with his, her or its application for a taxicab license:

(a) a completed application in form prescribed by the Chairperson;

(b) payment of the fees in the amount of

(i) fifty dollars, in accordance with §19-504(h) of the Administrative Code of the City of New York, for the transfer of a medallion or license from one vehicle to another, where applicable; and

(ii) one hundred sixty dollars, in accordance with §19-512(d) of the Administrative Code of the City of New York, which must be paid upon submission of the application provided for in subdivision (a) of this section for the transfer of (a) the owner's interest in a taxicab license, or (b) stock in a corporation or membership interests in a limited liability company which is an owner of a taxicab license or an interest therein.

(c) payment of the license and inspection fees required pursuant to §§1-04 and 1-05 of this chapter;

(d) proof of identity in the form prescribed in §1-02(b) of this chapter, including the identity of all partners of a partnership, officers and shareholders of a corporation, and members and managing members of a limited liability company and disclosure of any trade name or entity name under which the owner intends to operate;

(e) if the applicant is acquiring an interest in a medallion from an independent taxicab owner, a current, valid

number of a taxicab driver's license issued by the Commission to the person who will fulfill the service requirements of §1-09(b) of this chapter;

(f) proof of purchase in the form of a bill of sale of vehicle eligible to be used as a taxicab under chapter 3 of this title or an affidavit from the applicant specifying that the applicant will have a vehicle eligible to be used as a taxicab under chapter 3 of this title within seven days following the effectiveness of the transaction, pursuant to §1-80(d) of this chapter;

(g) proof of payment of any outstanding fines or fees owed to the Commission, the Parking Violations Bureau, or the successors thereto by the applicant, or any officers, shareholders, partners or members thereof;

(h) documentation in form satisfactory to the Chairperson detailing the sources of the applicant's funds used in the transaction including

(i) copies of bank account passbooks or bank statements;

(ii) affidavit explaining cash sums and deposits over $10,000 paid to or by the applicant within six months prior to the date of submission of documentation required in this section;

(iii) affidavits from donors of any gifts;

(iv) statements from secured and/or unsecured lenders detailing amounts lent, security if any, and terms of payment; and

(v) copies of IRS Form 8300 filed by any broker in respect of funds received in the context of the transaction.

(i) if the applicant is a corporation,

(i) in the case of a corporation that is a newly formed corporation, the filing receipt of the certificate of incorporation and a copy of the certificate of incorporation;

(ii) in the case of a corporation that is not a newly formed corporation, either the filing receipt of the certificate of incorporation together with a copy of the certificate of incorporation or, alternatively a certified copy of the certificate of incorporation;

(iii) a copy of the resolution of or action by the incorporators, shareholders or directors electing officers of the corporation; and

(iv) a list of stockholders, including number of shares owned.

(j) if the applicant is a partnership,

(i) a copy of the applicant's certificate of partnership; and

(ii) a list of the partners, including the percentages owned.

(k) if the applicant is a limited liability company,

(i) a copy of the applicant's articles of organization;

(ii) a copy of the applicant's operating agreement; and

(iii) a list of the members, including the percentages owned.

(l) if the applicant is a partnership, corporation or limited liability company not organized under the laws of the State of New York, in addition to the foregoing, proof of authorization of such entity to operate in New York State.

(m)(i) payment of the New York City taxicab license transfer tax due in connection with the transfer and/or

(ii) if the transfer is by a gift or is for less than market value, a New York City Department of Finance Waiver letter, together with any documentation referred to therein.

(n) if the transfer is the result of a foreclosure or similar action by a creditor,

(i) a hypothecation agreement, stock pledge or stock pledge agreement if the transfer is occurring by transfer of, or foreclosure upon, stock;

(ii) a UCC Article 9 Foreclosure "Affidavit of Disbursements" showing that all claims have been satisfied or will be satisfied or acceptable documentation regarding any claims not satisfied;

(iii) copies of UCC-1 filings (including file stamp or file number) filed against the owner or owner's interest in the medallion;

(iv) copies of all security agreements involved in the transfer in respect of the lenders' interests in the medallion;

(v) bill of sale, if any, or proof of other transfer in respect of any security agreement;

(vi)(A) proof of advertisement of the auction together with the attendance sheet or

(B) a copy of the Notice of Sale;

(o) an affidavit or affirmation under penalty of perjury from the applicant in a form approved by the Chairperson that the applicant does not rely upon the actions or determination of the Commission with respect to the medallion. In addition, if circumstances warrant, the applicant will provide an affidavit or affirmation in a form approved by the Chairperson as to other matters pertaining to documentation.

(p) copies of a New York State UCC lien search, together with a lawsuit and judgment search for all counties in which the transferor has been domiciled for the shorter of either five (5) years prior to the transfer or while owning an interest in the medallion(s) being transferred, which searches shall also provide copies of all active records, together with an affidavit or affirmation under penalty of perjury executed by the transferor and the applicant that they have reviewed all such searches and are familiar with the contents thereof, and warranting that all disclosed liens and judgments will be satisfied prior to or from the proceeds of the transfer, included in the escrow amount, or assumed by the applicant, together with a copy of the results of such lien search.

(q) tort letters from the transferor's insurer covering the shorter of (i) six years prior to the date of the proposed effective date of transfer, as set forth in §1-80 (d) of this chapter or (ii) the transferor's period of ownership of the taxicab medallion, down to and including the date that the medallion is placed into storage as required by §1-80.2 of this chapter, or if not placed into storage, the date prior to the proposed effective date of transfer, together with such documentation as may be required in respect of potential excess claims as may be disclosed thereby, together with any information held by the applicant or transferor regarding any potential excess claims or as may be necessary to determine the escrow amount for the purposes of §1-81 of this chapter. If tort letters are not available, or such letters as are available indicate a lapse in coverage during such six year period, or a secured lender is transferring an interest in a taxicab medallion as a result of foreclosure, repossession, or other realization upon its security and has not obtained tort letters, the provisions of §1-81(e) of this chapter regarding the establishment of the escrow amount in the absence of tort letters, shall apply.

(r) if the applicant seeks to purchase an interest in a corporation, partnership, or limited liability company that

owns a taxicab medallion or medallions, such applicant must also furnish with respect to such entity the documents required in subdivisions (i), (j), (k), and (l) of this section;

(s)(i) the transferor must provide proof of notice of the transfer to the taxicab technology service provider that holds the contract for the taxicab technology system for such medallion pursuant to §1-11(g) of this title. The notice must be mailed to the taxicab technology service provider at the address specified in the contract at least thirty days prior to the date of the proposed transfer by certified mail, return receipt requested. Proof of notice shall consist of a copy of the notice, a copy of the certified mail receipt and an affidavit or affirmation under penalty of perjury verifying the mailing;

(ii) the transferor must also provide, on a form prescribed by the Chairperson, a statement of intent regarding the contract for the taxicab technology system, stating the transferor's intention to (A) either cancel the contract or assign the contract to the transferee, and (B) either return the taxicab technology system to the taxicab technology service provider if the transferor does not own that equipment, or, if the transferor does own that equipment, retain the taxicab technology system or transfer the equipment to the transferee;

(iii) the transferee must also provide, on a form prescribed by the Chairperson, a statement that either (A) states the transferee's intent to assume the transferor's contract for the taxicab technology system or (B) identifies the approved taxicab technology service provider with which the transferee intends to enter into a contract for the taxicab technology system.

(t) such other documentation as may be required by the Chairperson in order to assist in the determination whether the proposed transferee meets the criteria for licensing and ownership of a taxicab medallion, including as set forth in §§1-02, 1-03, 1-80, 1-80.1, 1-80.2 or 1-82 of this chapter.

CHAPTER 1 TAXICAB OWNERS RULES

§1-80.2 Medallion Clearance.

Pursuant to the transfer of any interest in a taxicab license and before the transfer can be effective, the transferor of the interest in the taxicab license must, or must cause the owner of the taxicab license to:

(a) place the medallion in storage with the Chairperson for at least seven (7) days not counting the day it is put in storage or the day the clearance is given; except that a medallion owned by a corporation, or limited liability company need not be placed in storage if the transfer is to be effected by a transfer of stock or membership interests therein; and

(b) clear all open items (including response to all summons issued by the Commission, payment of all outstanding fines and penalties due to the Commission, the Parking Violations Bureau, or the successors thereto, and completion of all uncompleted renewal requirements) against the medallion or the owner of the medallion or the officers, shareholders, partners or members of the owner, as well as any fines and penalties against the owner's taxicab drivers license (including those of any officer, shareholder, partner or member of the owner).

(c) Any secured lender which is foreclosing upon, repossessing or otherwise realizing upon its security in respect of any taxicab license must, upon obtaining possession of the medallion, place the medallion in storage with the Chairperson.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 1-81

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-81 Tort Claims and Medallion Transfers.

(a) An applicant for a taxicab license, in order to be qualified as a transferee, shall supply proof to the Chairperson that the applicant or the transferor has filed a bond with the Chairperson to cover all outstanding tort liabilities of the vendor or transferor; however this requirement shall not apply to an applicant who is a legatee or distributee of a decedent's estate owning a taxicab license.

(b) In lieu of filing a bond as provided in subdivision (a) of this section, the applicant or his or her transferor may establish an escrow account in the amount of the escrow amount, not to exceed the maximum escrow amount, to satisfy excess claims. No transfer of the taxicab medallion(s) may occur until the bond is posted, or the escrow account is established, and the escrow agent has given an undertaking to the Chairperson to establish the escrow account and hold it on the terms required by this section, with confirmation of the establishment to occur in writing within five (5) days of such establishment, or it is determined by the Chairperson that none of the foregoing is required as provided in this section.

(c) Establishing the claim amount.

(i) The transferor must first attempt to establish the amount of each claim that is a potential excess claim for purposes of determining the escrow amount by the following process:

(A) The transferor must request copies of claim letters held in the Commission's medallion file.

(B) The transferor must notify the holder of each potential excess claim that may be indicated by either a valid

claim letter, a prior claim letter, a tort letter, or the lien, judgment and lawsuit searches required to be obtained in §1-80.1(p) of this chapter of the escrow amount transferor proposes to establish in respect of such claim. The transferor must provide adequate mail notice to such claimant by certified mail, return receipt requested, with a copy by regular mail and with a copy mailed to the Commission, to the attention of the legal department, transfer division. The transferor must provide to the Chairperson proof of mailing of all such notices in the form of copies of the mailing receipts together with an affidavit or affirmation under penalty of perjury verifying the mailing.

(C) The transferor's notice shall be of a form approved by the Chairperson:

(1) The notice to each potential claim holder must state whether such holder's claim is believed by the transferor to be a potential excess claim or not and must state a specific dollar amount (including $0) proposed to be established as the escrow amount for such claim.

(2) Such notice must further state that the claimant has thirty days from the date of the notice to object thereto, by notice to the transferor, with a copy of such notice to be provided to the Commission, to the attention of the legal department, transfer division.

(3) Such notice must further state that failure of the Commission to receive the claimant's objection within such thirty day period shall be deemed acceptance of the transferor's proposal regarding the escrow amount to be established for such claim.

(4) Such notice must further state that the claimant's acceptance of, or failure to object to, the transferor's proposed escrow amount for such claim shall not prejudice any rights, claims, or remedies the claimant may have against the transferor.

(5) Failure of the claimant to object to the transferor's proposed escrow amount within thirty (30) days of the transferor's notice provided pursuant to this paragraph (c)(i) (and the Commission's non-receipt of an objection shall be deemed a failure to object) shall be deemed acceptance of the proposed escrow amount in respect of such claim. Claimant's objection to the transferor's proposed escrow amount must state the basis for such objection.

(ii) If claimant objects to the transferor's proposed escrow amount as to such claim, the Chairperson shall refer the matter to the New York City Office of Administrative Trials and Hearings (OATH) to determine the amount of the claimant's claim to be included in the escrow amount.

(A) In any proceeding before OATH to determine the amount of the claim to be included in the escrow amount, OATH's rules of practice shall govern. In determining the amount of the claim to be included in the escrow amount, OATH shall apply principles of tort law.

(B) For the purposes of such proceeding, the transferor shall be the respondent and the transferor's notice containing the proposed escrow amount as provided in paragraph (c)(i) of this subdivision shall be the answer and the claimant shall be the petitioner and the claimant's objection required by this paragraph (c)(ii) shall be the petition. In the proceeding, the petitioner shall have the burden of proof that the claim is an excess claim. The administrative law judge assigned by OATH to decide the matter shall issue a determination which shall be a final determination.

(iii) At any time, the transferor and the claimant may agree as between themselves as to the amount of the claim for purposes of establishing the escrow amount in respect of such claim. Such agreement must be executed by both parties and a copy of such agreement must be provided to the Chairperson.

(d) The Chairperson shall determine the required escrow amount following completion of the steps set forth in subdivision (c) of this section as to each claim, except for those claims for which a determination was made by an administrative law judge at OATH. This determination shall be based upon the transferor's proposed amount in the event that the claimant agrees, or does not object, to such proposed amount as provided in paragraph (i) of subdivision

(c) of this section or the parties' agreement as to the proposed amount as provided in paragraph (iii) of subdivision (c) of this section. If an administrative law judge at OATH has made a determination as to any claim, as provided in paragraph (ii) of subdivision (c) of this section, the escrow amount for such claim shall be the amount as set forth in such determination. The determination shall be a final agency determination as to the amount of the claim to be used in determining the escrow amount, although nothing contained in these rules or in any such determination is intended to be, and shall not be, determinative as to the actual merits of the claim.

(e) If tort letters cannot be obtained for all or any part of the period for which they are required to be provided in §1-80.1(q) of this chapter, or if a secured lender seeking to transfer an interest in a taxicab medallion pursuant to a foreclosure, repossession or other realization upon its security has not obtained such tort letters, no transfer may occur unless an escrow account is established as provided in subdivision (f) of this section in the maximum escrow amount. Notwithstanding the provisions of subdivision (f) of this section, such escrow account must be maintained for not less than the shorter of six (6) years following the date of the transfer, or until such date that tort letters can be obtained and the transferor has validated the appropriate escrow amount to be established for any possible excess claims disclosed as required in this section and the Chairperson has determined the escrow amount for each such claim as provided in subdivision (d) of this section (with any such resulting escrow amounts to be held as required by subdivision (f) of this section).

(f) Once the escrow amount has been determined, an escrow account in the amount of the escrow amount shall be established from the proceeds of the transfer or other resources of the transferor, provided that no transfer may be effective as provided in §1-80 (d) of this chapter until either such escrow account is established or the holder of the escrow account has given to the Chairperson an undertaking to establish the escrow account, to hold it on the terms required by this section, with written confirmation of the establishment to occur in writing within five (5) days of such establishment. The account established may be held by any of counsel for the claimant, the transferor, or otherwise as the claimant and transferor agree, although the parties must advise the Chairperson as to the holder of such account, and such account will be maintained until all the claims represented therein are satisfied or released, although amounts in the escrow account allocable to specific claims may be released upon satisfaction of, or in satisfaction of, such specific claims. Any person or entity seeking a release of escrowed funds from the escrow account shall provide proof of release, satisfaction or dismissal of the underlying claim or agreement of the parties as to resolution of such claim, or a judgment of a court directing payment of all or part of the escrow amount to a party, and if the evidence is an order of a court, such order must constitute a final order, which must be fully executed and, if appropriate filed or entered. No funds shall be released from the escrow account without the prior written approval of the Chairperson.

35 RCNY 1-82

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-82 Special Provisions Regarding Estates and Incompetency.

(a) When a medallion or stock or membership interests in a corporation or limited liability company owning a medallion is distributed from an estate to a legatee or distributee, the recipient of such interest must qualify as a transferee under §1-80 and must fulfill the requirements of §§1-02, 1-03, 1-80, 1-80.1 and 1-80.2 of this chapter and the following additional documents shall be submitted to the Commission:

(1) a certified copy of the death certificate of the former owner listed with the Commission;

(2) a certified copy of letters testamentary or letters of administration, and, if the estate is not a New York estate, a certified copy of ancillary letters testamentary or letters of administration covering the estate's New York property; and all such letters must have been issued no earlier than six months prior to the date of submission and must be either (i) unqualified as to the amount of estate assets which the executor or administrator is authorized to administer and distribute or transfer or (ii) if qualified as to amount, such amount must be in excess of the value of the medallion(s) to be operated or transferred, as the case may be; and

(3) a copy of the will, if any, certified by the appropriate surrogate or probate court.

(b) Upon the death of an owner of an interest in a taxicab medallion, or upon a declaration of incompetence or the appointment of a guardian for such owner by a court of competent jurisdiction, the medallion may continue to be operated by the estate or executor or administrator of such owner's estate or conservator, guardian, or such other representative, as the case may be for a period of up to one hundred twenty (120) days following the death or date of declaration of incompetence of the owner, provided that such medallion is operated pursuant to an agreement with an

agent licensed by the Commission. If, during such 120 day period, an executor, administrator, conservator, guardian or other representative is appointed, such representative shall have sixty (60) days from the date of appointment to be approved to operate the medallion as provided in subdivision (c) of this section. If the decedent, or the incompetent owner, was an independent taxicab owner, the service requirements of §1-09(b) of this chapter are waived during the 120 day period, and, if a representative is appointed within such period, during the 60 day period following the appointment thereof. Thereafter, neither the estate nor such representative may continue to operate the medallion and the medallion must be placed in storage until either an executor, an administrator, conservator, guardian or new owner has qualified to operate the medallion as provided in subdivision (c) of this section. If no representative qualifies to operate the medallion as provided in subdivision (c) of this section within one hundred eighty (180) days of the death of the previous owner or the declaration of incompetence or disability of the owner, the interest of such owner must be transferred to a transferee who has received the approval of the Chairperson following submission of an application to own a taxicab license and compliance with the provisions of §§1-02, 1-03, 1-80, 1-80.1, 1-80.2 and 1-81 of this chapter. Notice of the death or incompetence of a medallion owner must be given to the Chairperson promptly upon such occurrence.

(c) Except as provided in subdivision (b) of this section, an executor, administrator, conservator, or guardian may continue the operation of a taxicab beyond the one hundred twenty-day period provided for in such subdivision only with approval of the Chairperson as to his or her qualifications. The executor, administrator, conservator or guardian must apply for such approval by submitting an application for a taxicab license and complying with the applicable provisions of §§1-02, 1-03, 1-80 and 1-80.1 of this chapter and must submit in addition the documentation set forth in subdivision (a) of this section if the applicant is an executor or administrator, or a copy of an order of a court of competent jurisdiction if applicant is a conservator or guardian. Notwithstanding anything else contained within this section, if neither an executor, administrator, conservator, guardian or a new owner has qualified to operate the taxicab within one hundred eighty days following the death of the previous owner, or the date of a judicial declaration of incompetence or disability of the owner, the taxicab may not be operated and the medallion must be placed into storage until a representative or transferee has qualified to operate the taxicab. A representative for an independent taxicab owner which qualifies to operate the taxicab must also meet the service requirements set forth in §1-09(b) of this chapter.

(d) A distribution of an ownership interest in a taxicab medallion may be made from an estate to a trust only if the distribution is of stock of a corporation or membership interests in a limited liability company distributed to a trust for the benefit of a minor. The interest in the taxicab medallion must be distributed out of the trust within 60 days following the date on which the beneficiary reaches the age for ownership of a taxicab medallion required by this chapter, and at the time of such distribution, such beneficiary must qualify as a transferee and be approved as an owner under, and fulfill the requirements of, §§1-02, 1-03 1-80, 1-80.1, 1-80.2 and 1-81 of this chapter if such beneficiary is to retain an interest upon its distribution. Notice must be given to the Chairperson promptly upon the beneficiary reaching the age for ownership of a taxicab medallion.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-85 Limitations on Credit and Debit Card Transaction Fees.

(a) A merchant shall not charge a mark-up to any passenger for credit/debit card transactions.

(b) A merchant who is an owner may charge a mark-up to a driver licensed by the Commission of not more than five percent (5%) of the total credit/debit charges incurred during the driver's shift.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-85 Procedures in the Event of a Violation of Commission Rules. [Repealed]

HISTORICAL NOTE

Section repealed City Record Dec. 1, 1999 §4, eff. Dec. 31, 1999. [See T35 Chapter 8 footnote]

Subd. (c) amended City Record Mar. 29, 1996 §7, eff. Apr. 30, 1996. [See T35 Chapter 12 footnote]

Subd. (c) amended City Record Oct. 30, 1995 §8, eff. Nov. 27, 1995. [See T35 §1-75 Note 1]

Subd. (e) amended City Record May 15, 1995 §1, eff. June 19, 1995. [See Note 1]

Subd. (h) amended City Record Mar. 17, 1993 eff. Apr. 16, 1993.

NOTE

1. Statement of Basis and Purpose in City Record May 15, 1995:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The purpose of the amendments is to limit the period of time within which a motion to vacate a default judgment will be accepted by the TLC hearings tribunal, except in instances where a question of jurisdiction exists. This amendment will permit the closure of many matters which otherwise would remain open indefinitely, pending a potential motion to vacate a decision made at inquest upon the default of respondent. Further technical amendments to the rules governing default judgments are being made to preserve consistency.

CASE NOTES

¶ 1. Where respondent was found guilty of knowingly submitting fraudulent receipts, the Taxi and Limousine Commission can requiring respondent to divest itself of all remaining medallions. Since the respondent had a history of violations, and the fraud impacted directly on public safety, the penalty of divestiture was not so grossly disproportionate to the offense as to be shocking to one's sense of fairness. King Victor Taxi Corp. v. New York City Taxi & Limousine Commission, 654 N.Y.S.2d 358 (App.Div. 1st Dept. 1997).

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-86 Penalties for Violation of Rules Governing Owners of Medallion Taxicabs.

Rule No.	PenaltyAll fines listed below also include a separate license suspension, to run concurrent with any underlying suspension, until such fine is paid, unless such fine is paid by the close of business on the day assessed.	PersonalAppearance-Required
§1-04(c)	$50-350 and/or suspension up to 30 days	Yes
§1-07(a)	$50-350 and/or suspension up to 30 days	Yes
§1-07(b)	$50-350 and/or suspension up to 30 days	Yes
§1-07(c)	$100-$350 and/or suspension up to 30 days; summary suspension until compliance pursuant to §8-17(b) of this title.	Yes
§1-09(a)	$75	No
§1-09(b)	$100-350 and/or suspension up to 30 days	Yes
§1-10(a)	$100 and seizure of the vehicle.	No
§1-10(b)	$100 and summary suspension until compliance pursuant to §8-17(b) of this title. If the failure to inspect extends 31 days after the scheduled inspection date or the date of an order to inspect or reinspect on other than the tri-annual schedule, $100-250 and summary suspension until compliance pursuant to §8-17(b) of this title. If the failure to inspect extends 61 days after the scheduled inspection date or the date of an order to inspect or re-inspect on other than the tri-annual schedule, $250-500 and summary suspension until	YesRate card must be brought.

	compliance pursuant to §8-17(b) of this title. If the failure to inspect extends 121 or more days after the scheduled inspection date or the date of an order to inspect or re-inspect on other than the tri-annual schedule, $500 and/or revocation. For failure to have the vehicle inspected on a tri-annually scheduled date, (or for failure to re-inspect after failing such inspection) an owner could be found in violation of this rule up to four times in the course of 121 days: for failure to inspect within 30 days, within 61-120 days, and for more than 120 days. In addition, the owner could also and concurrently be found in violation of any order(s) to have the vehicle inspected that may be issued in the course of street enforcement, without limit as to number.	
§1-10(c)	$50 and suspension after the hearing until the defective condition is corrected.	No
§1-10(d)	$100-350 and/or suspension up to 30 days; summary suspension until compliance pursuant to §8-17(b) of this title.	Yes
§1-11(a)	$100	No
§1-11(b)	$25	No
§1-11(c)	$50	No

NOTE

1. Statement of Basis and Purpose in City Record Mar. 29, 1996:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are

authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The promulgated amendment increases the penalties for violation of the rule establishing a cap on the lease rates that owners could charge to drivers for the use of a licensed taxicab. The cap limits any increases in the lease price to no more than fourteen percent above the medallion's lease rate in effect on September 30, 1995.

The purpose of the amendment is to ensure compliance with the lease cap by increasing the penalties for violation of the rule.

2. Statement of Basis and Purpose in City Record June 26, 1998: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City; under Section 2303(b)(13) of such Charter, authorizing the TLC to promulgate rules and regulations reasonably designed to carry out its purpose; under Section 19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter, and under Section 19-506 of said Administrative Code, authorizing the TLC to issue taxicab drivers licenses, for-hire vehicle driver licenses and paratransit vehicle drivers licenses. For serious acts committed against the riding public, Commission representatives and public servants, the current rules impose minimal fines with the possibility of a short term thirty day suspension. The amendments increase the monetary fines and impose suspensions, discretionary revocations, and in certain cases mandatory license revocation for serious offenses. The increased penalties involve amendments to the Taxicab Owners, Taxicab Drivers and For-Hire Vehicle Rules and apply to the violation of the following rules:

· **Using a taxicab, garage or office for any unlawful purpose** {Taxicab Owners Rule 1-60(c)};

· **Concealing evidence of a crime** (Taxicab Owners Rule 1-60(d); Taxicab Drivers Rule 2-61(c));

· **Offering gifts to Commission representatives, employees, public servants, dispatchers** (Taxicab Owners Rule 1-62(a); Taxicab Drivers Rule 2-62(a); FHV Rule 6-18(a));

· **Abuse, threats and harassment toward Commission representatives, public servants, passengers or other persons** (Taxicab Owners Rule 1-63(a); Taxicab Drivers Rule 2-60(a); FHV Rule 6-18(i));

· **Use of physical force against Commission representatives, public servants, passengers or other persons** (Taxicab Owners Rule 1-63(b); Taxicab Drivers Rule 2-60(b); FHV Rule 6-18(f));

· **Permitting another to use one's hack license** (Taxicab Driver Rule 2-13(b));

· **Driving while ability is impaired by drugs or alcohol** (Taxicab Driver Rule 2-20(a));

· **Discrimination by base owner against people with disabilities** (FHV Rule 6-07(e));

· **Base owner knowingly dispatches vehicle operated by a driver under the influence of drugs or alcohol** (FHV Rule 6-12(k)(3));

· **FHV driver refuses to transport a disabled person** (FHV Rule 6-16(1)).

The penalty of mandatory revocation, where required, empowers the Commission to remove from the industry those licensees who endanger the safety of the public. It also creates consistency and uniformity in the treatment of the

most serious offenders, since the Commission usually seeks discretionary revocation in such cases. Increasing monetary penalties and providing for the possibility for license suspensions or revocations in other cases will deter licensees from committing serious acts against the riding public, Commission representatives and other public servants.

Certain of these rule violations result in few convictions each year but are nonetheless serious. Others, such as Rules 2-60(a) and (b), which prohibit harassment or physical force against passengers or others, continue to occur with frequency. In 1997 alone, there were 464 convictions for violations of one of these two rules. The Commission believes that increasing the penalties for violations will have a significant deterrent effect and a positive impact upon public safety.

Rules of the City of New York

35 RCNY 1-87

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 1 TAXICAB OWNERS RULES

§1-87 Owners of Accessible Taxicabs.

An owner of an accessible taxicab medallion must also comply with chapter 16 of this title.

HISTORICAL NOTE

Section added City Record Nov. 23, 2007 §2, eff. Dec. 23, 2007. [See

Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Nov. 23, 2007:

These rules are designed to provide for the dispatch of accessible taxicabs and participating wheelchair accessible liveries to provide transportation for hire to passengers who use wheelchairs. The provisions of these rules are authorized by section 2303 of the New York City Charter and section 19-503 of the Administrative Code of the City of New York.

These rules accompany and implement a two-year demonstration project for dispatch technology and service. Although the program is a demonstration project, a successful result may lead to a permanent implementation following the conclusion of the demonstration project or earlier. Among other things, the project and these rules, which implement the project for TLC licensed drivers and vehicles, represent an effort to match wheelchair accessible taxicabs (which have entered or will enter service through recent auctions of taxicab medallions) with passengers who require the

service of such taxicabs.

The program is intended to permit passengers in wheelchairs seeking transportation to call New York City's 311 system and obtain referral to a dispatcher selected by the TLC to match service requests with the nearest available accessible vehicles and dispatch vehicles in response to those requests. These rules would implement this program.

Under the rules, wheelchair accessible taxicabs and participating wheelchair accessible liveries must accept dispatches from the central dispatcher designated by the TLC to provide transportation to persons in wheelchairs. Each vehicle must have equipment provided by the dispatcher in order for the vehicle to receive the dispatch. Drivers of these vehicles must provide the transportation as well as relaying certain information to the dispatcher for tracking purposes. Since fares will be metered, all accessible vehicles participating in the program must contain a taximeter.

Operators of participating vehicles must be trained in use of the dispatch equipment and passenger assistance techniques. The driver must obtain a certificate of completion from the training courses in addition to holding the appropriate license approved by the Commission prior to operating an accessible vehicle.

A driver must assist and secure a passenger in a wheelchair along with any packages he/she may have into and out of the vehicle. Drivers of accessible vehicles are expected to be available to accept dispatches to provide transportation for persons in wheelchairs during their shifts. Failure to accept dispatches will be seen as a failure to participate in the program and may result in penalties.

Passengers using the program must be able to be at the curb at the time specified for pick up by the dispatcher. The cost of the rides will be based on a metered fare corresponding to taxicab fares, and participating wheelchair accessible liveries must install taximeters to be used for dispatched rides. Taximeters installed in participating livery vehicles are intended to be used solely during rides originating with the dispatch program.

If a dispatch has been requested and no passenger at the pick up location is in a wheelchair, the driver may refuse to provide the transportation or, in the alternative, charge twice the metered fare (including any wait time) for the transportation. A driver may turn the meter on at the later to occur of the driver's arrival at the pick up location or the time of pick-up indicated by the dispatcher. The fare will include wait time necessary for the passenger to arrive curbside and enter the vehicle.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 2-01

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-01 Definitions.

Accessible taxicab. An "accessible taxicab" is a taxicab that complies with section 3-03.2 of this title.

Applicant. An "applicant" is a person seeking a license from the Commission to drive a taxicab in the City of New York.

Chauffeur's license. A "chauffeur's license" is a valid license of the State of New York to operate a vehicle for hire or a valid license of similar class from another state of which the licensee is a resident.

Commission. The "Commission" is the New York City Taxi and Limousine Com- mission.

Driver. A "driver" is a person licensed to drive a medallion taxicab in the City of New York.

Licensed vehicle. A "licensed vehicle" is a taxicab or coach authorized to accept passengers for hire pursuant to these Rules and the Administrative Code of the City of New York.

Mailing address of driver. The "mailing address of driver" is the address designated by the driver for the mailing of all notices and correspondence from the Commission and for service of summonses. However, a driver may also designate a post office box number address as a mailing address.

Medallion. A "medallion" is the plate issued and affixed by the Commission for displaying the license number of a taxicab on the outside of the vehide.

MTA Tax. The "MTA Tax" is the 50-cent tax on taxicab trips that is imposed by article 29-A of the New York State Tax Law.

Occupant classification system. An "occupant classification system" is a device that is placed by the original equipment manufacturer within a vehicle seat that detects whether a person is occupying the seat and detects the mass or weight of that person, for purposes of deploying an airbag protecting a passenger in that seat, in the event of a collision, with high force, low force, or not at all.

Passenger. A "passenger" is any individual who has hired or attempted to hire a taxicab for travel to a destination.

Person with a Disability. A person with a disability is an individual with a physical or mental impairment or incapacity, including a person who uses a wheelchair, crutches, three-wheeled motorized scooter, other mobility aid, or a service animal, but who can transfer from such a mobility aid to a taxicab with or without reasonable assistance.

Portable or hands-free electronic device. A "portable or hands-free electronic device" is any electronic device able to:

1. make a wireless telephone call

2. send or receive a text message

3. allow its user to speak on the telephone hands-free or operate a device by voice command, even when otherwise allowed by New York State law

4. act as a personal assistant (PDA)

5. send and or receive data from the internet or from a wireless network

6. act as a laptop computer or portable computer

7. receive or send pages

8. allow two-way communications between different people or parties

9. play electronic games

10. play music or video; or

11. make or display images; or

12. any combination of the above

This definition is to be liberally construed in light of its purpose to minimize the distraction of drivers, and in recognition of the rapid development of electronic technologies and proliferation of electronic devices that may be made available in the future that similarly transfer digital images, sounds or messages.

"Portable or hands-free electronic device" does not include: (1) any device the use of which while driving is specifically authorized by TLC rules, or (2) the use of a global positioning navigation system ("GPS") which uses voice functions to convey directions, so long as the driver is not inputting data unless legally standing or parked and the GPS is not capable of being used as a cell phone or other portable or hands-free electronic device.

Rate card. A "rate card" is a card issued by the Commission for a taxicab which displays the taxicab's license number, rates of fare and such other data as the Commission may prescribe.

Renewal applicant. A "renewal applicant" is a person seeking to renew a taxicab driver's license within the time period established by the Commission.

Service Animal. A service animal is a guide dog, signal dog or any other animal trained specifically to work or to perform tasks for an individual with a disability, including, but not limited to, guiding individuals with visual impairments, alerting individuals with hearing impairments to intruders or sounds, providing minimal protection or rescue work, pulling a wheelchair or retrieving dropped items.

Side Airbag. A "side airbag" is an airbag located by the original equipment manufacturer in a vehicle seat, and such airbag inflates between the seat occupant and the door.

Taxicab. A "taxicab" is a motor vehicle licensed and approved by the Commission to carry no more than five (5) passengers and authorized to accept hails from persons in the street.

Taxicab technology service provider. A "taxicab technology service provider" is a vendor who has contracted with the Commission to install and maintain the taxicab technology system in taxicabs.

Taxicab technology system. The "taxicab technology system" is hardware and software that provides the following four core services (collectively "four core services"): (i) credit, debit and prepaid card payment required by section 3-03(e)(7) of this title, (ii) text messaging required by section 3-03(e)(8) of this title, (iii) trip data collection and transmission required by section 3-06 of this title, and (iv) data transmission with the passenger information monitor required by section 3-07 of this title.

Taximeter. A "taximeter" is an instrument or device approved by the Commission by which the charge to a passenger of a taxicab is automatically calculated and on which such charge is plainly indicated.

Taxpayer. "Taxpayer" is a person or entity who is liable under article 29-A of the New York State Tax Law to pay the MTA Tax to the New York State Department of Taxation and Finance.

Trip record. A "trip record" also known as a trip sheet or trip log, is the written, computerized, automated and/or electronic accounting of a taxicab ride. The trip data to be transmitted or recorded shall include the taxicab license number (medallion number); the taxicab driver's license number; the location of trip initiation; the time of trip initiation; the number of passengers; the location of trip termination; the time of trip termination; the itemized metered fare for the trip (tolls, surcharge, and tip if paid by credit or debit card); the distance of the trip, the trip number, the method of payment, the total number of passengers, as well as such other information as may be required by the Commission. The electronic capture of required trip record data shall commence no later than the compliance date set forth in section 1-01 of this title. Trip record information shall be available to the TLC, the taxicab driver, medallion owner, taxicab owner and/or leasing agent upon reasonable demand based upon parameters set between the TLC and approved vendor(s). The trip record shall be kept in an approved archived form for a minimum of three years after the date of the taxicab ride.

Weapon. A weapon is any firearm (as defined in the New York State Penal Law) for which a license has not been issued as provided in the New York State Penal Law and the Administrative Code of the City of New York, electronic dartgun, gravity knife, switchblade knife, cane sword, billy, blackjack, bludgeon, metal knuckles, chuka stick, sandstick, slingshot, pilum ballistic knife, sand bag, sand club, wrist brace type slingshot, shirken, kung fu star, dagger, dangerous knife, dirk, razor, stiletto, imitation pistol or any other instrument or thing whether real or simulated, and capable of inflicting or threatening bodily harm, including but not limited to any other weapons, the possession of which is prohibited pursuant to the New York State Penal Law.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-02 Requirements for a Taxicab Driver's License to Operate a Medallion Taxicab.

(a) An applicant for a taxicab driver's license:

(1) must be at least 19 years of age;

(2) if an applicant for an original license, must provide to the Commission proof of identity in the form of

(i) A valid form of photo identification issued by the United States, any state or territory thereof, or any political subdivision of such state or territory; and

(ii) A valid, original social security card;

(3) must be a holder of a valid New York State chauffeur's license, or a holder of an equivalent class of valid license from another state of which he or she is a resident and who provides the Commission with an abstract of his or her driving record from that state. For the purposes of these rules, a valid chauffeur's license, or a license of an equivalent class, shall mean a license, issued by the New York State Department of Motor Vehicles or by the agency of another state which issues such license, which is neither probationary, suspended, revoked, conditional, nor restricted as to use for violations of traffic laws or regulations.

(4) must be of sound physical condition as certified to by a physician licensed to practice in New York State or in the state in which the applicant resides, on forms provided by the Commission. If the Commission has cause to believe that an applicant or driver has a physical or mental impairment that renders him or her unfit for the safe operation of a

taxicab, it may direct the applicant or driver to appear before a duly licensed physician designated by the Commission, for an examination of his physical or mental condition. Failure to appear as directed may lead to suspension or revocation of an existing license;

(5) must not be addicted to the use of drugs or intoxicating liquors;

(6) must be able to speak, read, write and understand the English language;

(7) must be of good moral character;

(8) must be familiar with the geography, streets and traffic regulations of the City of New York and the rules and regulations of the New York City Taxi and Limousine Commission, as well as the Vehicle and Traffic Law of the State of New York;

(9) must be the holder of a certificate of attendance for the required hours of instruction in taxi related subjects at a school approved by the Commission; and

(10) must be the holder of a certificate of completion for the required hours of instruction in a defensive driving course from a school, facility or agency authorized by the Commission and certified by the New York State Department of Motor Vehicles. The course must have been completed within six (6) months prior to the date of application.

(b) An application for a taxicab driver's license must be signed by the applicant and filed by him in person with the Commission, on the forms provided by the Commission. An applicant for a taxicab operator's license shall agree that service of any paper, notice, letter, summons, complaint or legal process of any kind or nature may be made by the City of New York, or any department thereof, upon the person to whom the license is issued by leaving a copy of any such paper, notice, letter, summons, complaint or legal process with any member of his or her family or other person with whom he or she may reside at the address listed in his or her application.

(c) An applicant is required to be fingerprinted and to pass all prescribed tests, both oral and written, as administered by the Commission or at its direction.

(d) Any member of the New York City Police Department, applying for a taxicab driver's license, and satisfying all the requirements herein for such a license, must present a letter from his commanding officer approving such application.

(e) Any material falsification contained in an original or renewal application for a license or any failure to notify the Commission of any material change in the information contained therein, shall be cause for denial, suspension or revocation of such license, in addition to any other sanctions imposed by the Commission.

(f) If at any time during the term of the taxicab driver's license the Commission becomes aware of information that the driver no longer meets the requirements for a taxicab driver's license, the Commission may deny his renewal application or suspend or revoke his license.

(g) An applicant or renewal applicant or any person acting on his behalf shall not offer or give any gift, gratuity or thing of value to any employee, representative or member of the Commission, or any public servant. An applicant or renewal applicant shall immediately report to the Inspector General of the Commission any request or demand for any gift, gratuity or thing of value by any employee, representative or member of the Commission, or any public servant.

(h) If the Commission determines that the applicant has failed to meet the requirements for a taxicab driver's license it will deny the license or its renewal and specify in writing to the applicant the reason for such denial.

(i) An applicant for a taxicab driver's license, other than an applicant who is a City of New York Police Officer, shall be tested, at the applicant's expense, for drugs or controlled substances, as set forth in §3306 of the Public Health

Law. Such testing shall be performed by an individual or entity designated by the Commission and possessing a requisite permit issued by the New York State Department of Health. A positive test shall result in the denial of a new application. Said determination shall be a final agency decision. A renewal applicant must be tested for drugs in accordance with §2-19(b) of this chapter.

DERIVATION

Former §2-02 subd. (j) amended City Record Jan. 2, 1992 eff. Feb. 1, 1992.

NOTE

1. Statement of Basis and Purpose in City Record July 15, 1999:

The rules promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the City, under §2303(b)(2) of such Charter, authorizing the TLC to promulgate rules relating to the standards and conditions of service, under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules necessary to exercise authority conferred upon it by the Charter, and under §19-505 of said Code, authorizing the Commission to establish qualifications for licensure.

The rule changes set forth herein establish uniform standards for the licensure of taxicab, for-hire vehicle, and paratransit services drivers, and prohibit such drivers from obtaining a TLC license while they hold a probationary, restricted, or conditional license issued by the New York State Department of Motor Vehicles or an equivalent agency of another State.

The purpose of these amendments is to protect public safety by ensuring that Commission licensees hold valid, unrestricted licenses. State law already precludes most holders of restricted or conditional licenses from obtaining TLC licenses. The amendments proposed herein would also prohibit the holders of probationary licenses from obtaining a TLC license until their probationary period has expired. Probationary licensees are newly licensed individuals. In most cases, probationary licensees have less than six months of driving experience. Prohibiting probationary drivers from holding TLC licenses will ensure that a licensee will have at least a minimum amount of driving experience, and will have demonstrated a satisfactory driving record.

No provision has been made for amending the commuter van rules since commuter van drivers are presently subject to the more rigorous requirements of Article 19-A of the Vehicle and Traffic Law.

2. Statement of Basis and Purpose in City Record June 26, 1998: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the city; under section 2303(b)(2) of such Charter, authorizing TLC to promulgate rules and regulations reasonably related to safety and service quality; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The regulation requires all taxicab drivers and for-hire vehicle drivers to complete a Defensive Driving Program authorized by the Commission. New applicants for a taxicab or for-hire vehicle driver's license would be required to have completed this course within six (6) months prior to the date of application. Licensed taxicab and for-hire vehicle drivers would be required to complete the course every three (3) years. The purpose of the regulation is to promote the safety of drivers, passengers and the general public, by ensuring that taxicab drivers and for-hire vehicle drivers are skilled in defensive driving and other safe driving techniques. The course is the same as now required for all new licensees by the New York State Department of Motor Vehicles, and enables drivers to receive benefits on their DMV licenses, such as point reductions, and to receive a discount on their motor vehicle insurance premiums. Independent studies conducted by the State of New York have determined that participants in such defensive driving programs tend to be safer drivers.

3. Statement of Basis and Purpose in City Record June 26, 1998: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City; under Section 2303(b)(2) and (13) of such Charter authorizing the TLC to promulgate rules and regulations related to safety and standards of service which are reasonably designed to carry out its purpose; and under Section 19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The amendments require the testing of new and renewal applicants for taxicab and for-hire vehicle driver's licenses for drugs and other controlled substances. The drugs and controlled substances that would be tested for include those listed in Section 3306 of the New York State Public Health Law. The possession or use of these substances is prohibited by law. A positive test result would lead to the denial of a new license application, and may lead to the denial of a renewal application following a hearing. In addition, if the Commission has reasonable suspicion to believe that a licensed taxicab or for-hire vehicle driver is impaired due to ingestion of a drug or other controlled substance and unable to drive his taxicab or for-hire vehicle safely, the Commission may direct that the driver be tested for such impairment. If the results of said test(s) or examination(s) are positive, the driver's license may be revoked following a hearing. Furthermore, if the taxicab or for-hire vehicle driver fails to be tested or examined as directed, the driver's license may be suspended or revoked. The regulations promulgated by the Commission are similar in content to the mandatory drug testing provisions contained in the United States Department of Transportation (USDOT) regulations mandating drug testing for individuals who hold safety related positions with public transportation systems. The method of drug testing proposed by the Commission, urinalysis, is the least expensive or personally intrusive, and most reliable test presently available. Except for new and renewal applicants, drug testing for other licensees will be conducted only where there is a reasonable basis to believe the individual is using an illicit drug. Such reasonable basis must be articulated, based

upon objective criteria. The regulations also prohibit taxicab or for-hire vehicle drivers from operating their taxicab or for-hire vehicle while their ability is impaired by liquor, drugs or other controlled substances, and prohibit the use or consumption of drugs, alcohol or other controlled substances within six (6) hours of operating their vehicle. This portion of the proposed regulation is similar to New York State Vehicle and Traffic Law ("VTL") Section 509-L, which provides that no bus driver shall consume a drug, controlled substance or an intoxicating liquor regardless of its alcoholic content for six hours prior to going on duty or operating or physically controlling a bus. It is also similar to the USDOT regulations which prohibit employees of mass transit systems in safety related functions from consuming alcohol within four (4) hours of performing such duties. The regulations also impose a penalty of mandatory revocation of a hack or for-hire vehicle operator's license for a conviction of operating a vehicle while impaired, or operating a vehicle within six (6) hours of consuming intoxicating liquor, drugs or other controlled substances. The purpose of these proposed amendments to TLC regulations is to promote the safety of passengers and the general public by ensuring that taxicab and for-hire vehicle drivers are not operating their vehicles when they are unfit because of impairment caused by drug, controlled substance or alcohol use. The regulations clearly establish a Commission policy of zero tolerance for licensees who use illegal substances, or who operate their vehicles while their ability to do so is impaired by substances, whether or not illegal.

Rules of the City of New York

35 RCNY 2-03

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-03 Driver License Applicant Training.

(a) Except as set forth in subdivisions (c) and (d) of this section, all applicants for a taxicab driver's license are required to attend and pass an authorized course of training in taxi-related subjects. This course shall contain eighty (80) hours of instruction. The course shall include, but not be limited to, instruction on Commission rules and procedures, geography, map reading skills, driver/passenger relations and courtesy, as well as any other material deemed appropriate or relevant by the Commission. An applicant must successfully complete such course, and pass an examination administered by the Commission on mandatory subjects, as well as proficiency in the English language, as a prerequisite to obtaining a taxicab driver's license.

(b) Providers of authorized training services must be approved by the Commission and must administer the curriculum required by the Commission as set forth in subdivision (a) or (c). The Commission must also approve any and all charges to applicants by authorized providers of training services.

(c) Applicants who are City of New York Police Officers shall be exempt from the course requirement as set forth in subdivision (a). Such applicants must pass an examination administered by the Commission as a prerequisite to obtaining a taxicab driver's license.

(d) Any applicant for a license under this chapter who previously held a taxicab driver's license pursuant to this chapter and who had previously met the requirements of §2-03(a) of this chapter shall not be required to meet such requirements again and shall be deemed to have fulfilled the pre-requisite to obtaining a taxicab driver's license as specified in §2-03(a) of this chapter, provided that

(1) Such applicant's prior taxicab driver's license expired solely because the applicant was not available to timely renew such license because the applicant was on active military service, and not as a result of any action taken or commenced by the Commission to suspend, revoke, or otherwise terminate such license;

(2) Such applicant's military service commenced prior to the expiration date of his or her prior license and such applicant applies for a new taxicab driver's license under these rules within ninety (90) days of completing active military service, and in no event later than three (3) years following expiration of the prior license, and applicant provides proof of the dates of active military service; and

(3) Such applicant meets all other requirements for obtaining a new taxicab driver's license.

NOTE

1. Statement of Basis and Purpose in City Record Oct. 31, 2000:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which permits TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the City; under §2303(b)(5) of such Charter, authorizing TLC to promulgate rules and regulations regarding the licensing of taxicab and for-hire vehicle drivers; under §2303(b)(13) of such Charter, authorizing the TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter; and under §19-505 of said Code, authorizing the TLC to promulgate Rules with respect to conditions for driver licensing.

The regulations shall exempt currently employed City of New York Police Officers from the 80-hour course requirement set forth in 35 RCNY §2-03, provided that they pass an examination administered by the Commission.

The purpose of this Rule amendment is to encourage Police Officers to apply for taxicab drivers' licenses by exempting such applicants from Commission course requirements.

Police Officers would also be exempt from mandatory drug testing applicable to both taxicab and for-hire vehicle drivers since such Officers are subject to random drug testing as a condition of their employment.

2. Statement of Basis and Purpose in City Record Oct. 21, 1998: The regulation promulgated herein by the New York City Taxi and Limousine Commission ("TLC") is authorized under section 2303(a) of the Charter of the City of New York, which permits TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b)(5) of such Charter, authorizing TLC to promulgate rules and regulations regarding the licensing of taxicab drivers; under section 2303(b)(13) of such Charter, authorizing the TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The adopted rule replaces the series of fourteen (14), forty (40) and eighty (80) hour applicant training classes presently being offered with one standardized eighty (80) hour class required of all applicants. Applicants for a taxicab driver's license are currently administered an English proficiency test by the Commission upon submission of their application. The examination is administered in two parts: (1) applicants who pass only the first component of the exam qualify for the 80 hour course; and (2) applicants who pass both the first and second portions of the exam qualify for the 40 hour course. An applicant who fails both portions of the exam does not qualify for either the 40 hour or the 80 hour course, and he or she is eligible to be re-tested after three months. The 40-hour course emphasizes taxi related subjects, including map reading and geography. The 80-hour course includes instruction in English language skills, as well as the same taxi related subjects that are covered in the 40 hour course. In addition, applicants may also qualify for a 14-hour advanced placement course-a condensed course which emphasizes geography and TLC regulations. Very few applicants have qualified for the 14-hour advanced placement class. This rule standardizes the applicant testing process by requiring that all applicants enroll in and complete a comprehensive, eighty (80) hour training class. This class will expand and intensify instruction on such topics as geography and map reading, which would assure the driver's familiarity with New York City locations. It will also include extensive instruction on route design, passenger courtesy, and familiarity with TLC rules and the consequences of violating them. Changes in the rules recently enacted by the Commission will be highlighted in this course. Instruction in these subjects is particularly important in light of the recent rule changes mandating more serious penalties, including possible suspension or revocation of licenses, for certain TLC rule violations. The Commission will no longer provide instruction in English language skills as part of the applicant training process. This change is consistent with existing TLC rules, which make English proficiency a prerequisite for licensure. In order to assure integrity and proper control over the issuance of licenses, the Commission will incorporate an English proficiency component into the final examination covering taxi-related subjects, upon the completion of the eighty (80) hour course of study. This rule abolishes both the 40 hour class and the 14 hour Advanced Placement class, replacing it with a standardized 80 hour course for all applicants. This change is necessary because the material to be taught to all applicants, includding essential taxi-related skills such as map reading and geography, driver courtesy, route design, and knowledge of TLC rules and procedures, cannot be adequately covered in less than eighty- (80) hours of instruction. The rule amendment also deletes references to the fee schedule charged for the course by the TLC approved taxi schools, thereby enabling the Commission to adjust the course fee, as necessary, without a rule amendment. The deletion of the fee schedule allows the Commission to exercise agency discretion and flexibility in its dealings with the taxi schools, so that it may administratively monitor limitations on the fees charged to taxicab driver applicants, as part of its oversight and control of the quality of the education offered by the designated schools.

3. Statement of Basis and Purpose in City Record May 26, 2006: The rules amend previously existing Taxi and Limousine Commission ("TLC") rules in two respects. First, the rules alter license application requirements for taxicab drivers whose licenses expire because they are unable to file renewal applications due to active military service. Existing rules require a new applicant for a taxicab driver's license to complete 80 hours of instruction in taxi-related subjects and pass an examination as a pre-requisite to obtaining a taxicab driver's license. The amended rules waive this requirement for a taxicab driver who is unable to renew his or her driver's license due to active military service, provided that the driver files an application for a driver's license within 90 days of discharge from active military service, and within three years of expiration of his or her previous driver's license. The purpose of this change is to

allow taxicab drivers to resume taxicab service with a minimum of delay upon return from military duty. Second, the rules amend existing TLC rules to permit a licensed taxicab driver or for-hire vehicle driver to advance the date of expiration of his or her non-probationary license one time during the second year of any renewal period. Previously existing rules provide that a licensed taxicab or for-hire vehicle driver must submit a completed renewal application by the expiration date of the license to be renewed, and that such application must include drug testing performed no earlier than 30 days before the expiration date of the license to be renewed. Failure to take a drug test by the license expiration date or to renew within the prescribed time period results in expiration of the license; thereafter, in order to obtain a license, the applicant must complete the requirements for a new license, which are more extensive than the requirements for a renewal license. Experience has demonstrated that a significant number of taxicab and for-hire vehicle drivers are periodically absent from the New York City area for personal reasons, for extended periods of time. In some cases, those absences extend through the entire 30-day period during which the licensee must submit to drug testing and apply for license renewal, resulting in substantial inconvenience or even hardship to the licensee. The amended rules will permit a driver (other than a driver still in his or her probationary period) who is in the second year of a license and who might not be able to timely file a completed renewal application because of such an extended absence to advance his or her expiration date and complete the renewal application prior to the period of absence. The amended rules allow the licensee, upon submission of the prescribed form, to advance his or her license expiration date as of right one time during the second year of any renewal period, provided that the licensee has completed the drug test required for licensees in the first year of a two year license. The licensee's 30-day drug test window would be advanced to correspond to the advanced expiration date, and all other requirements of a license renewal application are retained. The renewal license then issued will be valid for two years from the advanced expiration date of the previous license. Finally, the rules enable those few drivers who are unable to take advantage of the foregoing because their licenses expire in the period between the date the revised drug test rules became effective on March 16, 2006 and June 23, 2006 to seek relief if they have been unable to take the drug test within the required time as a result of being absent from the New York City area. Under the rule, such drivers will have until September 15, 2006 to apply to the Chairperson or his or her designee for a six-month extension of time to renew their licenses. A driver seeking such an extension will be required to supply documentation demonstrating that the driver was absent from New York City during the time required for the taking of the drug test and was therefore not reasonably able to submit a completed license renewal application before the expiration of such holder's license. If a driver's request for an extension of time is granted, the driver must complete all requirements applicable to renewal license applicants and pay the late filing fee provided by the current rules. Such renewal applicants will be required to take their drug test no sooner than thirty days prior to the completion of the renewal application. A driver's license will remain expired until the renewal license is issued. This change is made to accommodate the small number of drivers who may not be able to advance their expiration dates as permitted by these amendments but whose licenses may have expired when they were unable to comply with the new drug test date requirements which became effective on March 16, 2006. Under current rules, a renewal applicant must file a completed application by the expiration date for his current license and such license will expire automatically if the drug test is not taken by such expiration date. Notice of Promulgation of Rules Notice is hereby given in accordance with §1043(e) of the Charter of the City of New York ("Charter") that the Taxi and Limousine Commission ("TLC") hereby promulgates rules altering license application requirements for taxicab drivers whose licenses expire because they are unable to file timely renewal applications due to active military service; and allowing licensed taxicabs and for-hire vehicle drivers to advance the dates of expiration of their non-probationary licenses one time during the second year of any renewal period. These rules are promulgated pursuant to §1043 of the Charter and §§19-503 and 19-505 of the Administrative Code of the City of New York. Proposed rules were published for comment in the City Record on April 7, 2006. A public hearing on those proposed rules was held before the TLC at its offices at 40 Rector Street, 5th Floor; New York, New York 10006 on May 11, 2006, and amendments to the proposed rules were made at the hearing. Pursuant to §1043(e)(1)(c) of the Charter, these rules will take effect 30 days following publication in the City Record.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Taxi driver's request for an adjournment to obtain an interpreter for his license revocation hearing is denied, where administrative law judge determined that driver was able to understand English and make himself understood;

administrative law judge also noted that taxi drivers are required to be proficient in English pursuant to section 2-03(a)(2). **Taxi and Limousine Comm'n v. Dimitrie,** OATH Index No. 1582/98 (Aug. 4, 1998).

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 2-04

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-04 Probationary Licenses.

(a) An applicant will be issued a probationary license valid for a period of one year subsequent to the date the license was issued. The Commission will evaluate the applicant at the conclusion of the one-year probationary period, and will determine if renewal of the license is appropriate. In making such determination, the Commission may consider the driving record, any violation of the Taxicab Drivers Rules, or any other evidence that suggests that the driver no longer meets all requirements for a license.

(b) Issuance of a license following the probationary period will be automatically barred or the Commission may revoke a probationary license at any time if any of the following occurs during the probationary period:

(1) The driver is convicted of a crime in any jurisdiction.

(2) The driver is convicted of driving while impaired by alcohol or drugs.

(3) The driver is convicted of refusing to submit to a breathalyzer or other chemical test.

(4) The driver is convicted of leaving the scene of an accident.

(5) The driver accumulates eight or more points against his New York State Chauffeur's License or a comparable license issued by his State of residence, the total of which shall include points existing on the driver's State license prior to his or her application for a license with the Commission.

(6) The driver is convicted of three or more moving violations.

(7) The driver is convicted of two speeding violations.

(8) The driver accumulates four or more points in accordance with the Commission's persistent violator program described in Drivers Rule 2-70.

(9) The driver is convicted of two or more violations of Drivers Rules 2-34(a), 2-34(b), 2-50(a), or 2-50(b).

(c) For purposes of subdivision (b) of this rule, the Commission will consider the date of occurrence rather than the date of conviction when determining if a violation occurred within the probationary period.

NOTE

1. Former §2-04 Sponsored Taxicab Driver Applicants was repealed. Note Statement of Basis and Purpose in City Record June 26, 1998:

The rule deletion promulgated herein by the New York City Taxi and Limousine Commission ("TLC") is authorized under Section 2303(a) of the New York City Charter, which empowers the TLC to regulate and supervise the business and industry of transportation of such persons by licensed vehicles for-hire in New York City; under Section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under Section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The Commission is deleting the rule concerning the sponsorship taxicab program, as it discontinued this program several years ago. The Commission further believes that no applicant should be permitted to drive a taxicab until all records of prior criminal acts and other licensing standards matters have been reviewed. The original purpose of the sponsorship program was to enable individuals to operate on a conditional basis while their license application was being processed. In the past, processing of license applications took several months because the New York State Division of Criminal Justice Services was unable to complete criminal background investigations of prospective licensees in an expeditious manner. The State is now able to process background investigations in several days; hence the TLC is able to process license applications more expeditiously than was previously the case. The sponsorship program is no longer necessary nor is it desirable since it enables individuals to transport passengers for hire before their criminal backgrounds have been investigated.

2. Statement of Basis and Purpose in City Record June 26, 1998: The rules promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under Section 2303(a) of the New York City Charter, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in New York; under Section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under Section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred

upon it by the Charter. The rule promulgated herein provides for the issuance of a one-year probationary license to all new applicants. This regulation was patterned after the probationary driver program instituted by the New York State Department of Motor Vehicles, which permits the State to suspend the drivers licenses of new licensees who, in some instances, have committed only one traffic offense. The Commission is committed to raising the quality of service provided by taxicab and for-hire vehicle drivers, improving the driving habits of licensees, and identifying unsafe driving practices of licensees immediately after licensure. Under these regulations all new drivers will be closely scrutinized during the probationary period, and would not be able to renew their licenses as a matter of right. Drivers who are convicted of a crime, commit serious driving infractions, or repeatedly violate Commission rules will not be permitted to renew their licenses.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-07 Critical Driver Program

(a) The taxicab driver's license of any driver who, within a period of fifteen months, accumulates six or more points against his license issued by the Department of Motor Vehicles or an equivalent license issued by the driver's state of residence, unless previously revoked, shall be suspended for thirty days.

(b) The taxicab driver's license of any driver who, within a period of fifteen months, accumulates ten or more points against his license issued by the Department of Motor Vehicles or an equivalent license issued by the driver's state of residence shall be revoked.

(c) The Commission may at any time review the fitness of a driver to be licensed by the Commission in view of any moving violation, accident, or other driving related incident. Nothing contained herein shall preclude the imposition by the Commission of additional or more severe penalties, or any other action deemed appropriate, in accordance with the Rules of the Commission.

(d) For the purpose of this rule, the points assigned by the Department of Motor Vehicles for any violation shall be deemed to have been accumulated as of the date of occurrence of the violation.

(e) The relevant fifteen month period to be used for calculating any suspension or revocation imposed under subsection (a) or (b) herein shall be calculated from the date of the most recent occurrence which led to a conviction of a violation carrying points; provided however, that no action under subsection (a) or (b) shall be taken with regard to any violation carrying points which occurred prior to February 15, 1999.

(f) For the purpose of calculating penalties pursuant to subsection (a) or (b), herein, a driver who has accumulated points for multiple violations arising from a single incident shall be deemed to have accumulated points for the single violation with the highest point total.

(g) Any licensee who voluntarily attends and satisfactorily completes a motor vehicle accident prevention course approved by the Department of Motor Vehicles, and who furnishes the Commission with proof that the course was completed on or before August 31, 1999, shall have two (2) points deducted from the total number of points assessed for the purpose of determining any suspension or revocation pursuant to this Rule. No point reduction shall affect any suspension or revocation action which may be taken pursuant to these Rules prior to the completion of the course; and no person shall receive a point reduction unless attendance at the course is voluntary on the part of the licensee.

(h) Any licensee who voluntarily attends and satisfactorily completes a motor vehicle accident prevention course approved by the Department of Motor Vehicles, and who furnishes the Commission with proof that the course was completed on or after September 1, 1999, shall have two (2) points deducted from the total number of points assessed pursuant to this Rule. No point reduction shall affect any suspension or revocation action taken pursuant to these Rules prior to the completion of the course. No person shall receive a point reduction pursuant to this subsection more than once in any eighteen month period; and no person shall receive a point reduction unless attendance at the course is voluntary on the part of the licensee.

NOTE

1. Statement of Basis and Purpose in City Record Jan. 31, 2000:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, authorizing the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the city; under §2303(b) of such Charter, authorizing the TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter; and under §§19-507.1 and 19-507.2 of said Code, setting forth provisions for Persistent Violator and Critical Driver Programs.

The rules amend the Commission's Program for Persistent Violators of Taxicab Drivers Rules and For-Hire Vehicle Rules, as well as the Commission's Critical Driver Program to conform with amendments to the Administrative Code enacted into law on May 26, 1999. The period of time for review of a licensee record is reduced from eighteen (18) to fifteen (15) months under each program. In addition, under the Persistent Violator Program, the number of points needed to result in a license suspension is increased from five (5) to six (6) and for license revocation from eight (8) to ten (10). The rules also provide for the opportunity of a point reduction through the voluntary attendance at a safety-related course.

The purpose of these amendments is to conform the Commission rules to the provisions of the Administrative Code that became effective on May 26, 1999. The Administrative Code contains Critical Driver and Persistent Violator Programs that differ in certain respects from the programs previously set forth in Commission rules. The rules

promulgated herein adopt the changes contained in the Administrative Code as part of Commission Rules.

In addition, the rule amendments make changes in the number of points assigned for violations of certain Commission rules. These changes were made to provide consistency in the number of points assigned for equivalent violations of the Taxicab Drivers and For-Hire Vehicle Rules. In addition, points were assigned for certain serious violations that presently do not carry persistent violator points. The point schedule contained in the For-Hire Vehicle Rules is repromulgated in its entirety to add a reference description for each rule violation, thereby providing consistency with the Taxicab Drivers Rules.

2. Statement of Basis and Purpose in City Record Jan. 15, 1999: The rule promulgated herein by the New York City Taxi and Limousine Commission ("TLC") is authorized under §2303(a) of the New York City Charter, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in New York City; under §2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under §19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The rules establish a "Critical Driver Program," by which the Commission will review all driving infractions by taxicab and for-hire vehicle drivers which result in the imposition of "points" under Part 131 of the Regulations of the Department of Motor Vehicles ("DMV"). Those taxicab and for-hire vehicle drivers who accumulate six or more points on their New York State Department of Motor Vehicle Driver's Licenses within 18 months will have their TLC taxicab or for-hire vehicle driver licenses suspended for 30 days. Taxicab or for-hire vehicle ("FHV") drivers who accumulate ten or more points within a period of 18 months will have their taxicab or for-hire vehicle driver licenses revoked. This action will be taken irrespective of any action taken by DMV with respect to the licensee's state-issued operator's license. The purpose of this rule is to protect public safety by suspending or revoking the licenses of individuals who have an unsatisfactory driving record. This rule will relate the existing DMV "point" system, whereby motorists convicted of certain moving violations are assigned points based upon the severity of the offense, to the motorists's TLC license. The number of points required for TLC action against an individual's hack or FHV operator's license is less than the number of points that would result in licensing action being taken by DMV. However, where DMV has assigned points for more than one violation arising out of a particular incident, only the violation carrying the greatest number of points will be used in calculating Critical Driver penalties. The result of this program will be to hold licensees of the Commission to a higher standard with respect to their TLC licenses than the DMV currently holds the general public with respect to state-issued driver's licenses. This higher standard is justified based upon the direct impact licensees of the Commission have upon public safety. A review of the driving records of TLC licensees indicates that a significant number of licensees have accumulated excessive points on their DMV licenses and are still permitted to hold both a State-issued driver's license and a TLC license. Many of these drivers have been involved in serious accidents causing personal injury and property damage. For example, there are more than 100 TLC licensees who have accumulated at least 17 points on their DMV licenses within the past eighteen months. No action against these licensees has been taken by DMV. The Commission believes that adoption of the Critical Driver Program will reduce accidents and compel taxi and livery drivers to obey traffic regulations and operate their vehicles safely. This rule amendment may also reduce insurance costs by creating a better pool of qualified drivers. The Commission believes that a direct correlation between a licensee's DMV record and his or her ability to safely operate a taxicab or for-hire vehicle has been clearly established. The proposed text of this rule was first published in the **City Record** on April 26, 1998. A public hearing on this proposal was held on May 28, 1998. The text of the proposed rule was redrafted to clarify language contained in the earlier draft and to respond to comments received by the Commission in writing and at the public hearing.

35 RCNY 2-10

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-10 Term of a License.

(a) The term of a taxicab driver's license shall be as follows:

(1) A license issued to a new applicant shall expire one year subsequent to the date the license was issued as provided in §2-04 of this chapter.

(2)(A) A license issued to a renewing applicant shall expire two years from the date on which the previous license expired. The Commission may, in its discretion, extend the expiration date of such license by up to an additional thirty-one days.

(B) The holder of a renewal license under subparagraph (a)(2)(A) of this paragraph who is in the second year of such license and who has completed the drug test required by §2-19(b)(1) of this chapter for licensees in the first year of such license, may, upon written request to the Chairperson, advance the expiration date of his or her license to any date prior to the scheduled expiration of such license. One such request may be made during the term for such license. The request must be made on a form to be prescribed by the Chairperson or his or her designee and must be submitted in accordance with instructions on that form.

(C) The holder of a license seeking to renew such license after advancing the expiration date thereof hereunder must comply with all requirements for renewal applicants, including with the requirements imposed by §§2-02, 2-11 and 2-19 of this chapter; notwithstanding the provisions of §2-19(b) of this chapter, the drug test provided for therein shall be performed no sooner than thirty (30) days prior to, and in any event no later than, such advanced expiration date. For purposes of §2-19(b) of this chapter, a licensee who has advanced his or her expiration date shall be treated as

being a licensee in the second year of a two-year license.

(D)(i) Notwithstanding the provisions of §2-05(c) of this chapter, the holder of a renewal license under subparagraph (a)(2)(A) of this paragraph that expires between March 16, 2006, and June 23, 2006, inclusive, may request an extension of the time to submit a license renewal application on the ground that the licensee was unable to submit to license renewal drug testing as required by §2-19(b)(1) of this chapter due to the licensee's absence from the New York City area during the entire time provided by that section for submission to such drug testing.

(ii) The request for an extension of time to submit a license renewal application shall be made in writing to the Chairperson or his or her designee and shall include documentation demonstrating that the holder of the license was absent from the New York City area during the entire time provided by §2-19(b)(1) of this chapter for submission to drug testing for the renewal of such license, and was therefore not reasonably able to submit a license renewal application before the expiration of such license.

(iii) Any such request for an extension of time must be received by the Chairperson or his or her designee no later than September 15, 2006. If the Chairperson or his or her designee grants the request, the licensee's time to submit an application for renewal of his or her license shall be extended to six months after the expiration of his or her license.

(iv) A license renewal application submitted by a licensee granted such an extension must comply with all requirements for renewal applications, including payment of the late-filing fee provided by §2-05(c) of this chapter, except that the drug test required by §2-19(b) of this chapter shall be taken no sooner than thirty (30) days prior to the completion of such license renewal application.

(v) The expiration of a license shall not be affected by the licensee's eligibility for an extension, or request for an extension, of the time to submit a license renewal application under this paragraph, and such license shall remain expired until a renewal license is issued under item (iv) of this subparagraph.

(3) A person who engages in a licensed activity after the expiration date of a license and before the issuance of a renewal license is engaged in unlicensed activity and may be subject to penalties pursuant to applicable statutes and regulations. Nothing contained herein shall prevent the Commission from taking any action pursuant to §2-04(b) with respect to conduct which occurred during the probationary period of a new applicant's license, either prior or subsequent to the expiration of the probationary period.

Subd. (a) par (2) amended City Record May 26, 2006 §3, eff. June 25, 2006. [See T35 §2-03 Note 3]

NOTE

1. Statement of Basis and Purpose in City Record Mar. 1, 1999:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise

the business and industry of transportation of persons by licensed vehicles for-hire in the City; under §2303(b)(5) of such Charter, authorizing the TLC to adopt rules and regulations relating to issuance of licenses to drivers of taxicabs and for-hire vehicles; under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter; under §19-504(a)(1) of the Administrative Code of the City of New York, authorizing the Commission to issue for-hire vehicle licenses for a period of at least one (1), but not more than two (2) years; and under §19-505(g) of the Administrative Code of the City of New York, authorizing the TLC to issue taxicab driver's licenses and for-hire vehicle operator's permits for a period of at least one (1), but not more than three (3) years.

The rules of the Commission currently provide that all licenses issued by the Commission expire one year after issuance, and are renewable for additional one-year periods. The rules further provide that all licenses expire on the last day of each month, irrespective of the date issued.

This rule amendment provides that taxicab driver's licenses, for-hire vehicle permits and for-hire vehicle operator's permits, and paratransit service base and driver's licenses, would be initially issued and renewed for a period of two (2) years. The rule also provides that the license expiration date would be linked to the date of license issuance, in the case of a new applicant, or a date to be set by the Commission, in the case of a renewal applicant, instead of the last day of the month of issuance.

The existing rules place an unreasonable administrative burden upon the Licensing Division of the Commission. Since each license expires on the last day of a month, the Commission's licensing facility is expected to process a tremendous number of renewal applications at the end of each month. This volume creates delays and crowd control issues at the Commission's licensing facility, and does not provide for an efficient utilization of Commission personnel and other resources. The issuance of two (2) year new and renewal licenses will significantly reduce the number of persons appearing at the Commission's facility. Furthermore, setting the expiration date of a license at a date other than the end of the month will enable the Commission to better serve the public and to provide for the better utilization of resources.

CHAPTER 2 TAXICAB DRIVERS RULES

§2-11 Driver Continuing Education.

(a) All licensees are required to attend and satisfactorily complete an authorized course of training in taxi-related subjects prior to the expiration of their probationary license pursuant to §2-04 of this chapter. The course shall be a minimum of four hours and shall include an update of rule changes, a review of driver responsibilities and duties, driver-passenger relations, and an awareness of serving passengers with disabilities. A renewal applicant must successfully complete such course, as verified by the designated school, as a prerequisite to the first renewal of a taxicab driver's license. The course must be completed no sooner than sixty (60) days prior to, and in any event no later than the expiration date of the one-year probationary license.

(b) All licensed taxicab drivers with licenses expiring November 30, 1997 through October 31, 1998 are required to meet the course training certification requirement of section (a) with their renewal application, as if such application is their first renewal application.

(c) The authorized providers of a taxi driver refresher course shall charge each applicant enrolled in such course a fee of twenty dollars ($20).

(d) All renewal applicants are required to attend and complete a defensive driving course from a school, facility or agency authorized by the Commission and certified by the New York State Department of Motor Vehicles. A renewal applicant who submits a certificate of completion for an authorized defensive driving course completed less than three (3) years from the date of the renewal application shall be exempt from this requirement.

NOTE

1. Statement of Basis and Purpose in City Record July 8, 1997:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under section 2304(b) of such Charter, authorizing TLC to prescribe the rates of fare which may be charged for each type of service rendered; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The promulgated rule requires all taxicab drivers to pass a refresher course in taxi-related subjects prior to receiving their first renewal license. All current drivers must attend such a course within the next year. The purpose of this rule is to provide for the on-going training of drivers, in order to increase the level of service provided to the public.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Respondent taxi driver was issued a summons for operating a cab with a suspended hack license. His hack

license was suspended solely because his DMV chauffeur's license had been suspended for thirteen days four months before. Although DMV reinstated respondent's chauffeur's license, he did not check to make sure that the Commission reinstated his hack license. Administrative law judge dismissed the charge because respondent's chauffeur's license had in fact been reinstated when he was served with the summons and therefore the reason for the suspension of the hack license was no longer valid. Commission deemed license revoked as of January 1999 because during pendency of proceeding, respondent was convicted of a new violation at the Commission tribunal and also had a prior record. Commission deemed license revoked as of January 1999 because during pendency of proceeding, respondent was convicted of a new violation at the Commission tribunal and also had a prior record. **Taxi and Limousine Comm'n v. Younis**, OATH Index No. 624/99 (Feb. 24, 1999), **rev'd**, Comm'n Decision (Mar. 2, 1999).

Section amended City Record Dec. 29, 1995 §28, eff. Feb. 1, 1996. [See T35 §1-01 Note 1]

Section repealed and added City Record June 26, 1992 eff. July 26, 1992.

Section in original publication July 1, 1991.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Pursuant to this section, loss or theft of a hack license must be reported within 72 hours, excluding weekends and holidays. Where a taxicab driver lost his hack license on a Thursday and it was returned to him the following Tuesday, the recovery occurred within 72 hours of the loss as calculated pursuant to this section, and therefore the driver's failure to report the loss did not constitute a violation of this section. Taxi and Limousine Commission v. Ullah, OATH Index No. 1793/97 (Aug. 22, 1997).

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-19 Drug Testing of Licensed Taxicab Drivers.

(a) If the Commission has reasonable suspicion to believe that a driver has a drug or controlled substance impairment that renders him or her unfit for the safe operation of a taxicab, it may direct that the driver be tested or examined for such impairment, at the driver's expense, by an individual or entity designated by the Commission and possessing a requisite permit issued by the New York State Department of Health. If the results of said test(s) or examination(s) are positive, the driver's license may be revoked after a hearing. Failure of a driver to be tested or examined as directed may lead to suspension or revocation of such driver's license in accordance with §8-16 of this title.

(b)(1) Notwithstanding the foregoing, each licensee, other than a licensee who is a City of New York Police Officer, also shall be tested annually, at the licensee's expense, for drugs or controlled substances, as set forth in §3306 of the Public Health Law. For licensees in the first year of a two-year license, such testing must occur no sooner than thirty (30) days prior to, and in any event no later than, the date one year prior to the expiration date of such license. For licensees in the second year of a two-year license, such testing must occur no sooner than thirty (30) days prior to, and in any event no later than the expiration date of such license. Such testing shall be performed by an individual or entity designated by the Commission and possessing a requisite permit issued by the New York State Department of Health.

(2) If the results of said test are positive, the driver's license may be revoked after a hearing in accordance with §8-15 of this title.

(3) Failure of a licensee in the first year of a two-year license to be tested no sooner than thirty (30) days prior to, and in any event no later than, the date one year prior to the expiration date of such license shall result in suspension of the driver's license in accordance with §8-17 of this title. If such licensee undergoes the required testing within thirty

(30) days after the date one year prior to the expiration date of the current license, the suspension of the driver's license shall be lifted. If such licensee undergoes the required testing more than thirty (30) days after the date one year prior to the expiration date of the current license, such licensee shall also be required to pay a penalty of $200 to have the suspension of the driver's license lifted.

(4) Failure of a licensee in the second year of a two-year license to be tested by the expiration date of such license shall result in denial of a license renewal application, if any, and expiration of the license.

NOTE

1. Statement of Basis and Purpose in City Record Apr. 12, 1999:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City, under §2303(b)(5) of such Charter, authorizing the TLC to promulgate rules and regulations relating to issuance of licenses to drivers of taxicabs and for-hire vehicles; under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter; and under §19-505 of such Code, authorizing the Commission to establish criteria for licensure.

On February 18, 1999, the Commission adopted rules authorizing the issuance of two-year taxicab driver's licenses and for-hire vehicle operator's permits. The change in the term of licenses will have an impact upon the existing drug testing and continuing education requirements. Presently, applicants and licensees are tested annually for drugs and other controlled substances, in connection with the renewal of their licenses. New applicants are required to complete a continuing education program prior to the first annual renewal of their license.

The rule amendments set forth herein retain the annual drug testing requirement, notwithstanding the issuance of licenses for two year periods. In addition, newly-licensed taxicab drivers will still be required to complete the continuing education class within one year after obtaining a taxicab driver's license.

The purpose of these amendments is to ensure that existing driver continuing education and drug testing requirements remain unaltered, notwithstanding the issuance of taxicab driver's licenses and for-hire vehicle operator's permits for two-year periods.

2. Statement of Basis and Purpose in City Record Nov. 21, 2005: This rulemaking pursuant to §1043(h)(1) of the New York City Charter empowers the Taxi and Limousine Commission ("Commission") to impose fines on taxicab and for-hire vehicle drivers (collectively "licensees") for failure to take an annual drug test as required under the Commission's Rules. This rulemaking also establishes the procedure for suspension of licensees' driver's licenses following failure to comply with the annual drug test requirement. The rule provides that licensees who fail to undergo

annual drug testing shall have their driver's licenses suspended. Upon failure to be tested by the anniversary of the date of issuance of the current license, a licensee will not be allowed to operate a taxicab or a for-hire vehicle until he or she complies with the annual requirement and undergoes a drug test. This rule further clarifies that if the drug test result is positive, the licensee will undergo a fitness hearing to determine whether the license should be revoked. The rule establishes that if a licensee fails to take a drug test, the driver's license shall be summarily suspended. The Commission is required to notify the licensee either by personal service or by first class mail to the last mailing address filed with the Commission that the licensee's driver's license shall be suspended either immediately upon service of such notice if made by personal service, or five (5) days after the date of the mailing of such notice if mailed. The licensee is then given the opportunity to refute that suspension within ten (10) calendar days of such notice if such notice is given by personal service, or within fifteen (15) calendar days if such notice is sent by mail. Alternatively, instead of submitting documentation, a licensee may submit a guilty plea to the Commission, pay any applicable fine, comply with the underlying Rule or Administrative Code Section, and furnish proof of such compliance to the satisfaction of the Chairperson or his or her designee. If the licensee chooses to plead guilty, his or her opportunity to be heard shall be waived, and his or her suspension will be lifted upon the furnishing of the proof of compliance and the payment of a fine if applicable. If an ALJ determines that the licensee committed a violation by failing to take the drug test, or if the licensee waives the opportunity to be heard by failing to respond within ten (10) calendar days of personal service or fifteen (15) calendar days of the date of mailing if service is by mail, the penalty will be imposed and the suspension shall remain until the licensee complies with the requirement. An ALJ's determination is final, and the licensee may appeal the decision pursuant to §8-13 of the Commission Rules. Finally, to encourage prompt compliance with the drug test requirements, the rule provides that if a licensee who has failed to take his or her annual drug test by the anniversary of the date of the current license subsequently submits to such test within thirty (30) days of such anniversary, the suspension will be lifted, though a conviction will remain on the licensee's record. If a licensee waits to take the drug test until more than thirty (30) days after the anniversary of the issuance of the current license, the suspension will be lifted only after the licensee also pays a penalty of $200. Finding Pursuant to NYC Charter Section 1043(h)(1) I hereby make the following finding that a rulemaking pursuant to §1043(h)(1) of the New York City Charter relating to license suspension procedures for taxicab and for-hire vehicle drivers who fail to submit to required drug tests is necessary and proper. The Taxi and Limousine Commission licenses and regulates over 50,000 vehicles and approximately 100,000 drivers each year. Each day taxicabs and for-hire vehicles transport approximately 900,000 passengers. The vast number of New Yorkers affected by the use of taxicabs and for-hire vehicles requires that drivers be fit to operate such vehicles. A drug-free driving force ensures the health and safety of passengers, other motorists and pedestrians in the City of New York. The New York City Charter explicitly charges the Commission with the regulation and supervision of the industry of transportation of persons licensed by vehicles in the city, including the establishment of safety standards. City Charter §2303. The City Council previously established that taxicab and for-hire vehicle drivers must, as a requirement for licensure, not be addicted to the use of drugs or intoxicating liquors. Administrative Code §19-505(b)(6). Using such requirement as a guideline, the Commission required that all drivers must annually submit to a drug test as proof that they are not using drugs or alcohol. TLC Rules §2-19(b), 6-16(v). I find that this new procedure is necessary to ensure that the TLC licenses of drivers who fail to submit to their annual drug tests may be suspended immediately, pending their compliance with drug test requirements. THEREFORE, I find that the immediate effectiveness of a rule relating to the establishment of license suspension procedures for failure to be tested for drugs or controlled substances pursuant to Chapter 5 of Title 19 of the Administrative Code of the City of New York and §§2-19(b) and 6-16(v) of Title 35 of the Rules of the City of New York is necessary to address an imminent threat to health and safety. Dated: November 17, 2005

Matthew Daus, Chair Taxi and Limousine Commission Approved: Michael R. Bloomberg Mayor

3. Statement of Basis and Purpose in City Record Feb. 14, 2006: This rulemaking makes permanent the expedited rules promulgated pursuant to §1043(h)(1) of the New York City Charter on November 17, 2005. The rules empower the Taxi and Limousine Commission ("Commission") to impose fines on taxicab and for-hire vehicle drivers (collectively "licensees") for failure to take an annual drug test as required under the Commission's Rules. This rulemaking also establishes the procedure for suspension of licensees' driver's licenses following failure to comply with

the annual drug test requirement. In addition, the rules clarify the requirement that renewal applicants take a drug test no later than the expiration date of their driver's licenses, and the procedures that result from a failure to do so. The rule provides that licensees in the first year of a two-year license who fail to undergo annual drug testing shall have their driver's licenses suspended. Upon failure to be tested by the date one year prior to the expiration date of the current license, a licensee is not allowed to operate a taxicab or a for-hire vehicle until he or she complies with the annual requirement and undergoes a drug test. This rule further clarifies that if the drug test result is positive, the licensee will undergo a fitness hearing to determine whether the license should be revoked. The rule establishes that if a licensee in the first year of a two-year license fails to timely take a drug test, the driver's license shall be summarily suspended. The Commission is required to notify the licensee either by personal service or by first class mail to the last mailing address filed with the Commission that the licensee's driver's license shall be suspended either immediately upon service of such notice if made by personal service, or five (5) days after the date of the mailing of such notice if mailed. The licensee is then given the opportunity to refute that suspension within ten (10) calendar days of such notice if such notice is given by personal service, or within fifteen (15) calendar days of the date of mailing of the notice if such notice is sent by mail. Alternatively, instead of submitting documentation, a licensee may submit a guilty plea to the Commission, pay any applicable fine, comply with the underlying Rule or Administrative Code Section, and furnish proof of such compliance to the satisfaction of the Chairperson or his or her designee. If the licensee chooses to plead guilty, his or her opportunity to be heard shall be waived, and his or her suspension will be lifted upon the furnishing of the proof of compliance and the payment of a fine if applicable. If an ALJ determines that the licensee committed a violation by failing to take the drug test, or if the licensee waives the opportunity to be heard by failing to respond within ten (10) calendar days of personal service or fifteen (15) calendar days of the date of mailing if service is by mail, the penalty will be imposed and the suspension shall remain until the licensee complies with the requirement. An ALJ's determination is final, and the licensee may appeal the decision pursuant to §8-13 of the Commission Rules. To encourage prompt compliance with the drug test requirements, the rule provides that if a licensee who has failed to take his or her annual drug test one year prior to the expiration date of the current license subsequently submits to such test within thirty (30) days of such anniversary, the suspension will be lifted, though a conviction will remain on the licensee's record. If a licensee waits to take the drug test until more than thirty (30) days after the anniversary of the issuance of the current license, the suspension will be lifted only after the licensee also pays a penalty of $200. Finally, the rule provides that failure of a licensee in the second year of a two-year license to be tested by the expiration date of such license shall result in denial of any license renewal application and expiration of the license.

CASE NOTES

¶ 1. Documentary evidence was found sufficiently reliable, by itself without witness testimony, to establish prima facie case that licensee's urine tested positive for marijuana, which licensee failed to rebut. Documents included an affidavit from a toxicologist, with accompanying chain of custody form, toxicology reports and a confirmation from a medical review officer. Licensee was found unfit, license revocation recommended. **Taxi & Limousine Comm'n v. Shakoor**, OATH Index No. 860/08 (Nov. 30, 2007).

¶ 2. License revocation recommended under this section for driver who tested positive for marijuana. Driver failed to establish the affirmative defense of unknowing ingestion. **Taxi & Limousine Comm'n v. Moatassin**, OATH Index No. 643/08 (Oct. 29, 2007).

¶ 3. Taxi driver who tested positive for cocaine was found to be unfit; license revocation recommended. **Taxi & Limousine Comm'n v. Rodriguez**, OATH Index No. 950/08 (Nov. 19, 2007).

¶ 4. ALJ found Commission did not prove that urine sample that tested positive for marijuana was obtained from licensee and he recommended petition be dismissed. Commissioner/Chair found there was sufficient evidence in the record to find that the urine sample that tested positive had been obtained from the licensee and he imposed the penalty of license revocation. **Taxi & Limousine Comm'n v. Sajjad**, OATH Index No. 642/08 (Oct. 24, 2007), **rev'd**, Comm'r/Chair's Decision (Dec. 6, 2007).

¶ 5. In one case, a taxi driver, who allegedly tested positive for drugs, challenged the revocation of his license. The court held that 35 RCNY 2-19(b)(2) clearly puts licensees on notice that they are required to take annual drug tests, and upon failing such tests, their licenses may be revoked. In re Wai Lun Fung v. Matthew Daus, NYC Taxi and Limousine Comm., 45 AD3d 392, 846 N.Y.S.2d 104 (1st Dept. 2008).

CHAPTER 2 TAXICAB DRIVERS RULES

§2-21 Safe Driving and Traffic Accidents.

(a) A driver shall not operate his taxicab in such manner or at a speed which unreasonably endangers users of other vehicles, pedestrians, or his passengers.

(b) A driver shall operate his taxicab at all times in full compliance with all New York State and New York City traffic laws, rules and regulations and all rules, regulations and procedures of the Port Authority of New York and New Jersey, the Triboro Bridge and Tunnel Authority, and any regulatory body or governmental agency having jurisdiction over motor vehicles, with respect to matters not otherwise specifically covered in these rules. Violations of the foregoing shall be classified as follows for purposes of this subdivision:

(1) Laws, rules or regulations governing stationary vehicles.

(2) Laws, rules or regulations governing moving vehicles, other than hazardous moving violations defined by paragraph (3) of this subdivision.

(3) Laws, rules or regulations governing moving vehicles which involve hazardous moving violations defined as follows:

(i) speeding;

(ii) failing to stop for school bus;

(iii) following too closely;

(iv) inadequate brakes (own vehicle);

(v) inadequate brakes (employer's vehicle);

(vi) failing to yield right of way;

(vii) traffic signal violation;

(viii) stop sign violation;

(ix) yield sign violation;

(x) railroad crossing violation;

(xi) improper passing;

(xii) unsafe lane change;

(xiii) driving left of center;

(xiv) driving in wrong direction;

(xv) leaving scene of an accident involving property damage or injury to animal.

(c) A driver who, knowingly or having cause to know that personal injury has been caused to another person or that damage has been caused to the property of another person due to an accident involving the driver's taxicab, shall, before leaving the place where said damage or injury occurred, stop, exhibit to such other person his chauffeur's license, taxicab driver's license, and rate card, and give to such other person, his name, residence address, chauffeur's license number, taxicab driver's number, and taxicab medallion number, as well as the name of the taxicab's insurance carrier and the insurance policy number.

(d) A driver, while operating a taxicab, shall immediately report to the owner of the vehicle any motor vehicle accident in which he is involved.

Subd. (b) amended City Record June 26, 1998 eff. July 26, 1998. [See Note 1]

Subd. (b) amended City Record Dec. 29, 1995 §30, eff. Feb. 1, 1996. [See T35 §1-01 Note 1]

NOTE

1. Statement of Basis and Purpose in City Record June 26, 1998:

The regulation promulgated herein by the New York City Taxi and Limousine Commission ("TLC") is authorized under Section 2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City; under Section 2303(b)(2) of such Charter, authorizing the TLC to promulgate rules and regulations relating to standards and conditions of service; under section 2303(b)(13) of such Charter, authorizing TLC to promulgate rules and regulations which are reasonably designed to carry out its purposes; under Section 19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter; and under Section 19-505 of said Administrative Code, authorizing the TLC to issue taxicab drivers licenses,

for-hire vehicle drivers licenses and paratransit vehicle drivers licenses.

The purpose of these rule changes is to protect the riding public from drivers who operate their vehicles in an unsafe manner, and to provide for a more equitable penalty structure for those convicted of violations. Presently, all violations of the Vehicle and Traffic Law ("VTL"), Traffic Regulations and TLC Rules governing moving vehicles are treated identically. The fine structure under this amendment will now create more stringent penalties for the most serious offenses. For example, operating a vehicle with defective equipment, such as an inoperable tail light, would carry a lower fine than a hazardous moving violation, such as passing a red light or speeding.

In addition, the penalty for violations of Rule 2-21(a) and 6-16(a), dangerous driving, has been substantially increased. During 1997, there were 573 convictions for dangerous driving. These licensees committed acts which were so reckless that they presented a danger to their passengers, other vehicles, or pedestrians. The penalty for this violation has been increased from the present maximum of $350 per offense, to a maximum of $1,000 per offense, together with the possibility of license suspension, or revocation for repeat offenders.

During 1997, there were more than 15,000 summonses issued for violations of the Vehicle and Traffic Law or other traffic regulations. More than 11,500 of these summonses ended in convictions. This is an increase of more than 5,000 over the previous year. While part of the increase relates to enhanced enforcement efforts, it is nonetheless evident that unsafe driving is a major concern of the Commission and the riding public. The minimum penalty for each violation hereunder has been increased; the penalty now will be proportionate to the offense committed. The likelihood of greater monetary penalties will be a deterrent to this form of misconduct by licensees.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Taxi driver did not violate section 2-21(a) when he used care backing up cab, even though irate pedestrian believed that he was driving recklessly. Charge dismissed. **Taxi and Limousine Comm'n v. Singh,** OATH Index No. 280/99 (Sept. 22, 1998).

¶ 2. Taxi driver violated section 2-21(a) by engaging in reckless driving when he pulled away with the cab door open and while a passenger inside the cab was still saying goodbye to a passenger outside the vehicle. **Taxi and Limousine Comm'n v. Singh,** OATH Index No. 1359/98 (May 4, 1998).

¶ 3. Petitioner was not required to prove the elements of reckless driving as set forth in the Vehicle and Traffic Law, even though the language of the reckless driving statute and Drivers Rule 2-21 (a), under which respondent Ghulam was charged, track one another. Given the different focus of the Drivers Rules and the nature of the agency's mission, the lesser negligence standard is all that need be applied under Driver Rule 2-21(b), **i.e.,** was respondent Ghulam's conduct "unreasonable" in the circumstances. That ruling was followed by the First Department on appeal, which held that the Commission was "in no way limited by judicial precedents arising under New York's reckless driving statute, notwithstanding the textual similarity between the statute and the regulations pursuant to which petitioner was administratively disciplined." **Taxi and Limousine Comm'n v. Akhter,** OATH Index Nos. 1237-38/98 (June 3, 1998), **Ghulam** (1238/98) **modified on penalty,** Comm'n decision (Oct. 1, 1998), **aff'd sub nom. Ghulam v. NYC Taxi and Limousine Comm'n,** 261 A.D.2d 309, 691 N.Y.S.2d 408 (1st Dep't 1999).

¶ 4. Petitioner cannot sanction one cab driver under rule 2-21(b) for his split-second reaction to an unexpected and unforeseen event, even if another driver might have reacted differently and been able to maintain control of the cab. Mere errors of judgment or actions that are reflexive or reactive in nature, do not constitute driver misconduct. Petitioner could sanction another cab driver under rule 2-21(b) because it proved that he made an unsafe lane change which caused his cab to collide with another cab. **Taxi and Limousine Comm'n v. Akhter,** OATH Index Nos. 1237-38/98 (June 3, 1998), **Ghulam** (1238/98) **modified on penalty,** Comm'n decision (Oct. 1, 1998), **aff'd sub nom. Ghulam v. NYC Taxi and Limousine Comm'n,** 261 A.D.2d 309, 691 N.Y.S.2d 408 (1st Dep't 1999).

¶ 5. Taxi driver violated paragraph (a) of this section when he unreasonably endangered a bicyclist by driving his

taxicab in her direct path. **Taxi and Limousine Comm'n v. Smith**, OATH Index No. 498/00 (Oct. 12, 1999).

¶ 6. Taxi driver operated his taxicab recklessly in that he moved it forward while the rear door was open thereby endangering a passenger in the rear seat. Taxi driver also failed to obey all traffic laws in that he proceeded through a red stop light (2-21(b)). **Taxi and Limousine Comm'n v. Appelbaum,** OATH Index No. 724/00 (Jan. 27, 2000).

¶ 7. Revocation of taxi license recommended where taxi driver, drove away with the rear door open, while the passenger attempted to retrieve her bag, and the passenger was thrown to the street. Driver was aware that passenger had fallen to the street as his taxicab drove away and refused to stop. **Taxi and Limousine Comm'n v. Yousaf,**, OATH Index No. 984/00 (Feb. 18, 2000).

§2-25 Driver's Shift Responsibilities.

(a) A driver, while operating a taxicab, shall not, without the Chairperson's written authorization, have in his or her possession or in the vehicle, a weapon as defined by §2-01 of these Rules, or any other instrument which is intended to be used as a weapon.

(b) A driver shall be clean and neat in dress and person. A driver may not wear as outer clothing: underwear, tank tops, tube tops, body shirts, swimwear, bathing trunks, or cut-off shorts.

(c) A driver shall not smoke in a taxicab.

(d) During the workshift a driver shall not allow another person to operate the taxicab or occupy the driver's seat, except in the event of an emergency.

(e) A driver while on duty shall not lock either of the rear doors except at a passenger's request or with his consent or for a reason specified in these rules. A driver may lock the front doors. However, this does not give drivers the right to refuse parties of four persons, in which one person must occupy the front seat.

(f) The driver shall comply with the Air Pollution Control Code of the City of New York, and shall not cause or permit the engine of his taxicab to idle for longer than three minutes.

(g) A driver shall not permit the taxicab to be operated for hire by another person who is not currently licensed by the Commission as a taxicab driver.

(h) A driver shall not use a portable or hands-free electronic device while operating a taxicab, unless such taxicab shall be lawfully standing or parked. "Use" of a portable or hands-free electronic device means that the driver is deploying any of the functions of the portable or hands-free electronic device, or has a device that permits the hands-free use of a portable or hands-free electronic device in the immediate proximity of the driver's ear.

A driver may offer as an affirmative defense that he or she was using a portable or hands-free electronic device while operating a taxicab for the sole purpose of communicating with an emergency response operator that there exists an imminent threat to life or property, and that it was impossible for the driver to safely stop the vehicle before placing the call. The driver must provide documentary proof that the electronic communication was to an emergency response operator.

(i) A driver shall reimburse an E-Z Pass tag holder for all tolls paid through the use of the E-Z Pass immediately upon the return of the vehicle to the E-Z Pass tag holder or his agent at the end of the shift or lease period. If a driver has a replenishment account with the owner or agent pursuant to §1-83 of the Taxicab Owners rules, the driver shall be required to contribute to the reimbursement account any monies that have been depleted from the account to reimburse the owner or agent for E-Z Pass tolls paid by the owner or agent but not reimbursed.

(j) If the driver is not a Taxpayer who is liable for the MTA Tax, the driver shall forward to the Taxpayer the amount of fifty cents for each taxicab trip driven by the driver that originated in New York City and terminated either in New York City or in the county of Dutchess, Nassau, Orange, Putnam, Rockland, Suffolk or Westchester, no less often than weekly. A driver shall not collect the MTA Tax for any taxicab trip unless the trip originated in New York City and terminated either in New York City or in the county of Dutchess, Nassau, Orange, Putnam, Rockland, Suffolk or Westchester.

NOTE

1. Statement of Basis and Purpose in City Record May. 27, 1999:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City, under §2303(b)(2) of such Charter, authorizing the TLC to promulgate rules and regulations relating to the standards and conditions of service; and under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter.

The rule changes set forth herein prohibit a taxicab, for-hire vehicle, paratransit, or commuter van driver from using a telephone while operating a vehicle licensed by the Commission.

The purpose of these amendments is to protect public safety. The use of telephones while driving a vehicle constitutes a serious safety risk. Telephone use while driving creates a distraction that prevents a driver from devoting his or her undivided attention to road conditions and the proper handling of the vehicle. A driver using a telephone while the vehicle is in operation is less able to maintain control of the vehicle than other operators and presents an increased risk of accidents to passengers, pedestrians and drivers. Since the rule amendment does not prohibit drivers from carrying cellular or other telephones in their vehicles, there is no adverse impact upon driver safety.

2. Statement of Basis and Purpose in City Record June 26, 1998: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City; under Section 2303(b)(2) of such Charter, authorizing the TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under Section 19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter; and under Section 19-505 of said Administrative Code, authorizing the TLC to issue taxicab drivers licenses, for-hire vehicle drivers licenses and paratransit vehicle drivers licenses. The regulation prohibits drivers from carrying dangerous weapons and increases the penalty to mandatory revocation for any possession of either a weapon, as this term is defined in the Penal Law, or any other instrument intended to be used as a weapon, without the written permission of the Chairperson. The possession or carrying of any unlawful weapon or other dangerous object which is intended to cause harm in a taxicab cannot be condoned. The riding public should be assured of their personal safety when they are in a taxicab or for-hire vehicle operated by a driver duly licensed by the Commission. Previous initiatives adopted by the Commission, such as the mandatory partitions and trouble lights, provide for the safety of drivers and the riding public. A licensee who places the public at risk by carrying an illegal weapon or other dangerous instrument should not be permitted to operate a taxicab or other vehicle for-hire. During 1996 and 1997, there were approximately 50 convictions each year under these rules. Since the rule prohibits a driver from carrying not only any instrument prohibited by the Penal Law, but also any object which is intended to be used as a weapon, the TLC imposes a higher standard upon its licensees than the New York State Penal Law in light of a licensed driver's privilege to transport passengers, and the threat to the public safety which would be caused by any licensee carrying a dangerous instrument in a taxicab.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Respondent violated weapons rule, paragraph (a) of this section, by carrying mace. Commission authorization to carry the weapon was not in question because carrying Mace or pepper spray is illegal. **Taxi and Limousine Comm'n v. Dianis,** OATH Index No. 1832/00 (Apr. 10, 2000).

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-25.1 Additional penalties for use of a portable or hands-free electronic device while operating a taxicab.

(a) For purposes of this section, "portable or hands-free electronic device violation" shall mean a violation of §2-25(h) of this chapter or a violation of any state law or rule prohibiting or restricting the use of a portable or hands-free electronic device while driving, such violation having been adjudicated by a court or other tribunal having jurisdiction over such violations.

(b) Any taxicab driver who commits a portable or hands-free electronic device violation is required to attend and satisfactorily complete an authorized course of training in the dangers of driving while distracted by portable or hands-free electronic devices. The course shall be a minimum of one hour and shall include a review of the rules governing the use of portable or hands-free devices, and the dangers of driving while distracted. The course must be completed and verification of course completion provided by the designated school within sixty days of TLC's issuance of a directive to the taxicab driver that he or she is required to take such course.

HISTORICAL NOTE

Section added City Record Dec. 30, 2009 §4, eff. Jan. 20, 2010. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Dec. 30, 2009:

For more than ten years, Taxi and Limousine Commission rules have prohibited the Commission's licensed drivers

from using cell phones while driving. In May, 1999, the Commission was the first regulator in the country to ban hands-free cell phone use while driving. Despite enforcement of those rules, cell phone use remains a significant problem in the for-hire transportation industries. Moreover, the proliferation of both portable electronic devices and hands-free electronic devices in recent years demands that the Commission expand the prohibition beyond cell phones to other electronic devices. This rulemaking prohibits the use of portable or hands-free electronic devices while driving, and clarifies what constitutes use of such a device.

Recent studies have quantified the long-known dangers of driving while distracted by portable or hands-free electronic devices. Just one example is the Virginia Tech Transportation Institute's recently released study demonstrating that texting while driving increases a driver's collision risk 23-fold. In addition, the U.S. Department of Transportation's National Highway Traffic Safety Administration, as well as a study published by University of Utah psychologists, found that hands-free use of cell phones was no safer than handheld use. The studies concluded that the distracting effects of phone conversation are not mitigated by the use of hands-free devices.

This rule makes five changes to existing rules:

· The rule expands the Commission's prohibition of electronic devices from telephones to all portable and hands-free electronic devices.

· The rule expands the definition of "use" from using a telephone to using any of the functions of any portable or hands-free electronic device, or having a device that permits the hands-free use of a portable or hands-free electronic device in the immediate proximity of the driver's ear.

· The rule increases the assessment of persistent violator points against taxicab and for-hire vehicle drivers who use portable or hands-free electronic devices. The base penalty is increased from two to three persistent violator points, which would apply to first and second offenses. For a third offense, the driver would be assessed four points. As a result, even if the driver had no other persistent violator points, the driver's license would be suspended for 30 days after a second violation, and the driver's license would be revoked after a third violation committed within 15 months.

· The rule requires a driver who commits a violation to take a new driver education course emphasizing the dangers of driving while distracted by portable or hands-free electronic devices.

· The rule requires a passenger information decal in taxicabs, highlighting the new restrictions against driver use of portable or hands-free electronic devices.

Following publication of the proposed rule, Commission staff concluded a number of meetings about the proposed rules with a number of industry groups, representing taxicab, livery, black car and luxury limousine businesses. The staff has concluded that, unlike the taxicab, paratransit and commuter van industries, the for-hire industries rely on industries of a requirement that the use of electronic devices must be deferred until the vehicle is standing or parked would substantially impair the operation of those businesses. Furthermore, staff research indicates that short, simple conversations regarding specific issues, such as vehicle dispatch, do not adversely affect the driver's ability to maintain road position (Briem & Hedman, **Behavioral Effects of Mobile Phone Use During Simulated Driving,** 1995; Rakauskas, Gugerty & Ward, **Effects of a Naturalistic Cell Phone Conversations on Driving Performance,** 2004). Other studies have shown that listening to verbal material, by itself, does not interfere with a driver's safe operation of the vehicle (Strayer & Johnston, **Dual-Task Studies of Simulated Driving and Conversing on a Cellular Telephone,** 2001). The scientific literature distinguishes such communications from conversations of greater duration and intensity, which dangerously distract drivers and slow their reaction times, whether the conversation is conducted by handheld or hands-free device.

Some for-hire vehicle bases rely on two-way radios, while others have upgraded to devices that are voice-activated or that use pre-programmed function keys. Based on a review of the scientific literature and the unique business needs of the for-hire vehicle industries, the proposed rule was revised to allow for-hire vehicle drivers to engage in short,

solely business-related communications in connection with a dispatch from a base, by means of two-way radios, or by means of a device that is mounted in a fixed position and utilizes one-touch pre-programmed buttons or voice communications.

In addition, in response to a large number of comments regarding the requirement that the engine must be turned off in order to use a portable or electronic device, Commission staff concluded that it is sufficient that the vehicle be lawfully parked or standing. (Of course, laws limiting vehicle idling still apply.) Staff also responded to comments regarding the requirement that a GPS device may only be used if the device does not use video or image functions; the rule now permits GPS devices which use voice functions so long as the device is not being used as a cell phone or other portable or hands-free electronic device. These changes in the rule apply to all industries.

The Commission intends to deploy these rule revisions in combination with enhanced enforcement efforts, to address the continuing problem of driving while distracted by the use of portable or hands-free electronic devices.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 2-26

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-26 Condition of Taxicab.

(a) A driver shall not operate a taxicab without continuing personal inspection and reasonable determination that all equipment, including brakes, tires, lights, signals and passenger seatbelts and shoulder belts are in good working order.

(b) A driver, during his workshift, shall keep the taxicab's interior clean.

(c) A driver, during his workshift, shall keep clean and free from obstruction the medallion number on the front and rear of the roof light so that the medallion number shall be plainly visible at all times.

(d) A driver shall not (1) operate a taxicab having any equipment or mechanical devices not specifically enumerated in these rules, unless authorized in writing by the Commission; (2) place a cushion or other orthopedic device on the seat portion of a taxicab seat that is equipped with an occupant classification system; or (3) place a back rest or other orthopedic device on the back portion of a taxicab seat that is equipped with side airbags.

(e) A driver shall not place any signs in a taxicab not specifically enumerated in these rules, unless authorized in writing by the Commission.

(f) (i) For any taxicab that is required to be equipped with the taxicab technology system, such equipment shall at all times be in good working order and each of the four core services shall at all times be functioning. (ii) In the event of any malfunction or failure to operate of such taxicab technology system, the driver shall file an incident report with the authorized taxicab technology service provider promptly and in no event more than one (1) hour following the driver's

discovery of such malfunction or failure to operate or such time as the driver reasonably should have known of such malfunction or failure to operate, or the end of the driver's shift, whichever occurs first. If the owner or taxicab agent previously filed a timely incident report regarding such malfunction or failure to operate, the driver shall not be required to file a separate incident report but shall obtain an incident report number from the owner, agent or taxicab technology service provider. A taxicab in which any of the four core services of the taxicab technology system, or any part thereof, are not functioning shall not operate more than forty-eight (48) hours following the timely filing of an incident report by the owner, driver or agent.

(g) If any passenger information monitor is not operational and can be made operational by the driver, the driver shall do so.

NOTE

1. Statement of Basis and Purpose in City Record Oct. 1, 2008:

Automobile manufacturers recently advised the Taxi and Limousine Commission that the operation of airbags can be affected by the post-manufacture installation of vinyl seat covers and by the use of back rests and similar devices. Therefore, three modifications of existing Commission rules relating to taxicabs are required:

First, the promulgated rules eliminate the requirement of post-manufacture installation of vinyl seat coverings for taxicab seats that are equipped with OCS technology and for seats that are equipped with side airbags, and require the removal of any post-manufacture vinyl coverings previously placed over seats equipped with OCS technology or with side airbags.

The installation of post-manufacture vinyl seat coverings may impair the operation of occupant classification systems (OCS) that detect the presence of children or small adults in seats. In the event of a collision, the OCS prevents the seat's airbag from deploying, or limits the force of the deployment of the airbag. This innovation reduces the risk of injury to small adults and children who are at heightened risk of injury from the regular deployment of airbags. Installation of post-manufacture vinyl seat coverings creates the risk that airbags will not deploy even when adults occupy the seats equipped with OCS devices.

Also, the addition of post-manufacture vinyl seat coverings may impair the deployment of side airbags installed in seats. Side airbags reduce the risk of injury incurred during a collision with the side of a vehicle.

Second, the promulgated rules prohibit the use of seat cushions or similar devices on seats equipped with OCS, in order to avoid interference with the proper functioning of OCS technology.

Third, the promulgated rules prohibit the use of back rests and similar devices in the seats of taxicabs equipped with seat-mounted side airbags in order to avoid interference with the proper deployment of those airbags.

Statement of Substantial Need for Earlier Implementation

I hereby find, pursuant to §1043(e)(1)(c) of the New York City Charter, that there is a substantial need for the implementation, immediately upon the publication in the **City Record** of its Notice of Adoption, of rules amending the specifications governing taxicabs set forth in §§2-26(d) and 3-03(e)(iv) of Title 35 of the Rules of the City of New York.

The amendments eliminate the requirement that taxicab seats be re-covered with vinyl upholstery, for seats that are equipped with occupant classification systems (OCS). The post-manufacture re-covering of OCS-equipped seats impairs the functioning of the OCS, which controls the deployment of the front airbags based on the OCS sensors' determination of the weight and position of the occupant of the seat. Impaired functioning of the OCS creates a risk in a collision that the airbags might deploy incorrectly, thereby endangering the occupant of the seat.

The amendments also prohibit the use of seat cushions and other orthopedic devices on the seat portion of taxicab seats that are equipped with OCS. This amendment is needed in order that the OCS functions properly regarding the deployment of airbags.

Finally, the amendments prohibit the use of back rests and other orthopedic devices on the backs of taxicab seats that are equipped with front seat-mounted side airbags. This amendment is necessary in order that the airbags be able to deploy unobstructed in the event of a collision.

The earlier implementation of these rules is necessary because they relate to the proper functioning of the newest vehicle safety technologies in taxicabs. Delay in the implementation of these rules would unnecessarily risk the safety of taxicab drivers and of passengers riding in the front seats of taxicabs.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Operation of a taxicab by the respondent, the owner and driver of the cab, with a device known as a "zapper," the purpose of which was to enable the operator to tamper with the taximeter and artificially increase the fare to be charged to customers, constituted a violation of paragraph (d) of this section, as well as §§1-23, 1-60(b), 1-67(a), 2-30(a), 2-31(a), 2-61(a) and 2-66(a), the penalty for which was revocation of the respondent's hack license and forced sale of his medallion. Taxi and Limousine Commission v. Malek, OATH Index No. 1540/97 (Aug. 5, 1997).

¶ 2. A taxicab driver's possession in her cab of a "zapper," a device that enables the driver to accelerate the cab's meter, constituted a violation of paragraph (d) of this section even if the device was not actually connected to the meter when found by a police officer. Taxi and Limousine Commission v. Decriollo, OATH Index No. 1480/97 (Sept. 4, 1997).

¶ 3. A taxicab driver's operation of his cab with a device that increased the meter's fare calculation by 30 cents for every second that the device was engaged constituted a violation of paragraph (d) of this section. Taxi and Limousine Commission v. Fisher, OATH Index No. 1733/97 (July 23, 1997).

¶ 4. Taxi driver is found to have overcharged two passengers based upon testimony from the passengers and meter

acceleration device found in the cab during an inspection following the passenger complaints. **Taxi and Limousine Comm'n v. Flores,** OATH Index No. 1652/98 (Aug. 7, 1998).

¶ 5. Operation of a taxicab by defaulting respondent, one of two drivers and owners of the cab, with a meter acceleration device known as a "zapper," constituted a violation of this section and several others, the penalty for which was revocation of respondent's hack license and forced sale of his medallion. **Taxi and Limousine Comm'n v. Hom,** OATH Index Nos. 433 & 435/99 (Oct. 28, 1998).

¶ 6. Taxi driver violated section 2-26(d) when he installed a switch which could deactivate the roof light and the meter. The opportunity to pick and choose customers, to refuse passengers and to accelerate the meter are major concerns for the Commission, hence the prohibition against such devices in section 2-26(a). Petitioner failed to prove, however, that the driver engaged in a scheme to defraud the public by possessing a "zapper," where the Commission inspector testified that the device would not accelerate the meter without a battery and no battery was found when the cab was stopped by police following a near accident. **Taxi and Limousine Comm'n v. Drumond,** OATH Index No. 1114/98 (May 12, 1998).

¶ 7. Driver found in violation of this section after equipment used for meter acceleration was found inside cab and in trunk of cab during inspection. It is fair to infer that the presence of the equipment in the cab was for the purpose of operating an illegal device, and that operation of the cab by both authorized drivers with the illegal device took place on and prior to the date of inspection. License revocation recommended and imposed. **Taxi and Limousine Comm'n v. Kewal**, OATH Index No. 938/99 (Apr. 13, 1999), **aff'd**, Comm'n Dec. (May 20, 1999).

¶ 8. Discovery of a visible zapper or meter acceleration device in a vehicle results in the revocation of the current taxi drivers' hack licenses, whether the drivers were driving the cab at the time of discovery or not. Pursuant to this section, drivers have a general obligation of "continuing personal inspection" and are prohibited from operating a taxicab "having any equipment or mechanical devices not specifically enumerated in these rules." **Taxi and Limousine Comm'n v. Kandov**, OATH Index Nos. 941-42/99 (May 12, 1999).

¶ 9. Inspection of taxicab revealed tampered meter harness wiring and presence of unauthorized meter acceleration device in a CB radio. Respondents, identified on the rate card as regular drivers of the taxicab in which the device had been placed at least 6 or 7 months earlier, and possibly longer, were liable for meter tampering and operating cab with unauthorized device and engaging in a scheme to defraud the public, on and prior to date of discovery by Commission investigator. **Taxi and Limousine Comm'n v. Zargar**, OATH Index Nos. 1130-31/99 (Mar. 9, 1999), **rev'd in part**, Comm'n Dec. (April 15, 1999).

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-27 Items Which Must be Present in the Taxicab.

(a) A driver shall not operate a taxicab unless the following are present in the taxicab: (1) The taxicab technology system as defined in section 2-01 of this chapter, provided, however, that, if the taxicab is not yet required to be equipped with such taxicab technology system and whenever such taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider as set forth in section 2-26 of this chapter, the driver must maintain a written trip record also known as a "trip sheet," containing such information as required by sections 2-01 and 2-28(a) of this chapter and section 3-06(b) of this title.

(2) his taxicab driver's license in the appropriate frame;

(3) the rate card assigned to the taxicab, bearing the serial number of the taximeter, in the frame alongside the frame for his taxicab driver's license;

(4) a New York City five (5) borough indexed street map; and

(5) receipts for passengers.

(b) A driver shall not operate a taxicab after sunset unless all of the following items are illuminated so that they are clearly visible from the rear seat by a passenger with normal vision:

(1) the face of the taximeter;

(2) his taxicab driver's license; and

(3) the rate card.

(c) A driver shall not obstruct a passenger's view of any of the items required in a taxicab by these rules, including the taximeter.

(d) A driver shall not operate a taxicab for hire that is not equipped with an E-Z Pass tag and shall use E-Z Pass at all crossings within the jurisdiction of the Metropolitan Transportation Authority, Triborough Bridge and Tunnel Authority, where E-Z Pass is accepted. Nothing contained herein shall preclude a driver from using his personal E-Z Pass tag for any toll.

35 RCNY 2-28

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-28 Trip Records.

(a) Until a taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, and thereafter whenever the taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider as set forth in section 2-26 of this chapter, a driver shall keep a written trip record in the taxicab as specified in section 2-27(a) and shall enter the following information legibly in ink, as follows:

(1) at the start of each trip, the starting time, specific location and the number of passengers;

(2) on completion of the trip, the destination, the time, the amount of the fare, and any tolls paid;

(3) the taximeter readings and the concluding time of his or her workshift;

(4) any toll bridges or tunnels used by the driver, whether or not with a passenger; and

(5) all other entries required by these rules.

(b) Until a taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, and thereafter whenever the taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider as set forth in section 2-26 of this chapter, a driver shall, at the beginning of each workshift, sign and certify on the written trip record that, with the exception of the taxicab technology system, the taxicab and its equipment are in good working condition and

that, with the exception of such taxicab technology system, the items required in the taxicab are present, before operating the taxicab.

(c) For any taxicab that is required to be equipped with the taxicab technology system, a driver shall transmit to an electronic database all necessary corrections that need to be made to the electronic trip record. A driver shall at no time make erasures or obliterations on any written trip record, shall correct any wrong entry only by drawing a single line through the incorrect entry and recording the date, time and reason for the change, and shall not leave blank lines between entries on any written trip record.

(d) A driver shall at no time rewrite a written trip record either in whole or in part, unless authorized by the Commission.

(e) Until a taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, and thereafter whenever the taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider as set forth in section 2-26 of this chapter, a driver shall submit his written trip sheet to the owner at the conclusion of the driver's shift or lease period. Whenever a taxicab's taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider, the driver must maintain written trip records during the forty-eight (48) hours immediately following the filing of such incident report.

CHAPTER 2 TAXICAB DRIVERS RULES

§2-30 Taximeter Condition.

(a) A driver shall not drive a taxicab unless all taximeter seals and cable housing seals are in good condition and pressed by the Commission or its authorized designee. The serial number of the taximeter must be the same as that shown on the rate card assigned to the taxicab.

(b) A driver shall not pick up or transport a passenger unless the taximeter is properly equipped with paper for the printing of receipts.

(c) A driver while on duty shall not operate a taxicab unless the rooflight is lit when the taximeter is not in use, and unlit when the taximeter is in use.

HISTORICAL NOTE

Section added City Record June 26, 1992 eff. July 26, 1992.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Operation of a taxicab by the respondent, the owner and driver of the cab, with a device known as a "zapper," the purpose of which was to enable the operator to tamper with the taximeter and artificially increase the fare to be charged to customers, constituted a violation of this section, as well as §§1-23, 1-60(b), 1-67(a), 2-26(d), 2-31(a), 2-61(a) and 2-66(a), the penalty for which was revocation of the respondent's hack license and forced sale of his medallion. Taxi and Limousine Commission v. Malek, OATH Index No. 1540/97 (Aug. 5, 1997).

35 RCNY 2-31

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-31 Tampering with Taximeter, Taximeter Technology System and Rooflight Prohibited.

(a) A driver shall not operate a taxicab in which the taximeter or the seals affixed thereto by a licensed taximeter repair shop or the taxicab technology system have been tampered with, broken or altered in any manner. The operation of a taxicab with a broken taximeter seal shall give rise to a rebuttable presumption that the driver knew of the tampering or alteration and operated the taxicab with such knowledge.

(b) A driver shall not tamper with, repair or attempt to repair, or connect any unauthorized device to, the taximeter or the taxicab technology system, or any seal, cable connection or electrical wiring thereof, or make any change in the vehicle's mechanism or its tires which would affect the operation of the taximeter or the taxicab technology system.

(c) A driver shall not tamper with the roof light or any of the interior lights or connections except to replace a defective bulb or fuse. The rooflight of a taxicab shall be automatically controlled only by the movement of the taximeter button or ignition switch so that it is lighted only when the taximeter is in an off or "Vacant" position and unlighted when the taximeter is in a recording or "Hired" position. The operation of a taxicab with an unauthorized installation or device controlling interior or roof lighting shall give rise to a rebuttable presumption that the driver knew of the unauthorized installation or device and operated the taxicab with such knowledge.

(d) It shall be an affirmative defense to a violation of section 2-31(b) that the driver: (1) did not know of or participate in the alleged taximeter or taxicab technology system tampering; and (2) exercised due diligence to ensure that taximeter-tampering or tampering with the taxicab technology system does not occur.

Subd. (d) added City Record Jan. 31, 2000 §4, eff. Mar. 1, 2000. [See T35 §1-23 Note 1]

CASE AND ADMINISTRATIVE NOTES

¶ 1. Operation of a taxicab by the respondent, the owner and driver of the cab, with a device known as a "zapper," the purpose of which was to enable the operator to tamper with the taximeter and artificially increase the fare to be charged to customers, constituted a violation of this section, as well as §§1-23, 1-60(b), 1-67(a), 2-26(d), 2-30(a), 2-61(a) and 2-66(a), the penalty for which was revocation of the respondent's hack license and forced sale of his medallion. Taxi and Limousine Commission v. Malek, OATH Index No. 1540/97 (Aug. 5, 1997).

¶ 2. Operation of a taxicab by defaulting respondent, one of two drivers and owners of the cab, with a meter acceleration device known as a "zapper," constituted a violation of this section and several others, the penalty for which was revocation of respondent's hack license and forced sale of his medallion. **Taxi and Limousine Comm'n v. Hom,** OATH Index Nos. 433 & 435/99 (Oct. 28, 1998).

¶ 3. Where a zapper device, used to accelerate taximeters, was concealed inside the car door of a taxicab and where the inspector observed that a portion of the pulse wire was bare, three drivers violated this section. The visibly exposed wire gave the three drivers "reason to know that the taxicab's equipment had been tampered with by another driver." Administrative law judge recommended that the licenses of the three drivers be revoked and recommended forced sale of the medallion by the owner. **Taxi and Limousine Comm'n v. Singh**, OATH Index Nos. 828-30/99 (Apr. 15, 1999).

¶ 4. License revocation recommended where respondents operated taxicab with an unauthorized wire spliced into the pulse wire in violation of this section. **Taxi and Limousine Comm'n v. Kandov**, OATH Index Nos. 941-42/99 (May 12, 1999).

¶ 5. Testimony of overcharged passenger and tests on meter proved that respondent taxi driver operated cab while it was equipped with a meter acceleration device or zapper. **Taxi and Limousine Comm'n v. Ahmed**, OATH Index No. 2077/99 (July 22, 1999).

¶ 6. Inspection of taxicab revealed tampered harness wiring and presence of unauthorized meter acceleration device in a CB radio. Respondents, identified on the rate card as regular drivers of the taxicab in which the device had been placed at least 6 or 7 months earlier, and possibly longer, were liable for meter tampering, operating cab with unauthorized device and engaging in a scheme to defraud the public, on and prior to date of discovery by Commission investigator. **Taxi and Limousine Comm'n v. Zargar**, OATH Index Nos. 1130-31/99 (Mar. 9, 1999), **rev'd in part**, Comm'n Dec. (April 15, 1999).

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-32 If Taximeter or Credit/Debit Card Acceptance Equipment Is Defective During Shift.

(a) A driver shall not pick up or transport a passenger when the taximeter is defective, until it has been repaired at a licensed taximeter shop or replaced by such shop with a taximeter which has been inspected, sealed and approved within the preceding twelve (12) months. Until a taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, if the taximeter is equipped to accept credit or debit card payments for fares, a driver may not pick up or transport a passenger when the taximeter is incapable of accepting or processing credit or debit card transactions. When a taxicab is required to be equipped with the taxicab technology system, the driver may not pick up or transport a passenger when the system is incapable of accepting or processing credit or debit card transactions, unless: (i) in the event of any malfunction or failure to operate of the credit or debit card acceptance equipment, the driver promptly files an incident report with the authorized taxicab technology service provider, as set forth in section 2-26 of this chapter, and obtains an incident report number, and not more than forty-eight (48) hours have passed following the filing of such incident report, and (ii) the driver advises the passenger of the malfunction or failure to operate of the credit or debit card acceptance equipment prior to engaging the meter. In the event that the wireless payment equipment used to accept payment by credit and debit cards is inoperable at the destination of a trip as a result of a technical problem in the system's communication network that is not related to the equipment in the taxicab, the customer has the option of either (i) paying cash or (ii) requesting the taxicab driver continue to a location where the wireless payment system may communicate with its network. If a taximeter or its parts become defective during the driver's shift while a passenger is in the taxicab, or if the taxicab technology system or its parts become defective while a passenger is in the taxicab such that the driver is unable to inform the passenger of the proper fare, the driver shall immediately notify the passenger and offer him or her the option of continuing the trip with a mutually agreed upon reasonable fare, or terminating the trip and paying the fare shown on the taximeter to that point.

(b) Upon terminating a trip because of a defective taximeter or defective taxicab technology system, the driver shall illuminate the "Off Duty" light, lock the rear doors, transmit to an electronic database for entry on the electronic trip record that the taximeter and/or the taxicab technology system is defective or, until a taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, and thereafter whenever the taximeter technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report as set forth in section 2-26 of this chapter, enter on the written trip record that the taximeter and/or the taxicab technology system is defective. Whether or not the taxicab is required to be equipped with the taxicab technology system, the driver shall return the taxicab immediately to the garage of record or a licensed taximeter repair shop.

(c) A driver shall not charge a mark-up to any passenger for credit/debit card transactions.

35 RCNY 2-33

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-33 Taximeter Operation.

(a) When a taxicab is occupied by anyone in addition to the driver, the taximeter shall immediately be placed in the recording or "Hired" position and kept in that position until arrival at the destination, provided that if the passenger is not being charged a fare, the driver, in lieu of activating the meter, may illuminate the "Off Duty" light and transmit to an electronic database for entry on the electronic trip record that he or she is off duty and transporting a non-paying passenger and the details of time and distance of the free fare or until such time when a taxicab is required to be equipped with data collection and transmission equipment as described in Section 3-06 of the Taxicab Specifications enter on his or her written trip record that he or she is off duty and transporting a non-paying passenger and the details of time, distance and reason for the transportation without charge. When the taxicab is engaged in a flat fare trip from Kennedy Airport to Manhattan in accordance with Owners Rule 1-69, the driver shall not activate the meter, except in accordance with subdivision (b) of Rule §1-69, and shall transmit to an electronic database for entry on the electronic trip record or enter on the written trip record that this is a flat fare trip from Kennedy Airport and the details of time and distance. When a taxicab is occupied by a passenger who is a person with a disability, the driver shall place the taximeter in the recording or "Hired" position only after the passenger has safely entered the taxicab. A taxicab driver shall not place the taximeter in the recording or "Hired" position while the driver is assisting a person with a disability to enter the taxicab or while assisting with that passenger's mobility aid. Notwithstanding anything else contained in this section, a taxicab driver who is a driver of an accessible taxicab and who has accepted a dispatch of a wheelchair passenger pursuant to chapter 16 of this title shall turn on the meter as provided in section 16-08(d) of this title.

(b) Upon reaching the passenger's destination, the driver shall place the taximeter in a non-recording or "Time Off" position, inform the passenger of the fare due and leave the taximeter in a non-recording position until the fare is paid.

If the passenger is an individual with a disability who requires assistance to exit the taxicab, the driver shall place the taximeter in a non-recording position before assisting such passenger and shall leave the taximeter in a non-recording position until such passenger has paid the fare and safely exited the cab.

(c) Immediately after the passenger leaves the taxicab, the driver shall clear the taximeter, placing it in an off or "Vacant" position in which it must remain until the next passenger enters the taxicab.

CHAPTER 2 TAXICAB DRIVERS RULES

§2-35 Trips Beyond the City.

(a) For a trip beyond the limits of the City of New York, except for the counties of Westchester or Nassau, or the facilities of the Port Authority of New York and New Jersey at Newark Airport, the following shall be applicable:

(1) the driver shall not start the trip until agreement has been made on a flat rate, as set forth in Owner Rule §1-73;

(2) the driver shall place the taximeter in a recording position at the beginning of the trip, and the taximeter shall remain in such recording position for the entire trip;

(3) the out-of-City destination shall be transmitted to an electronic database upon arrival at the destination for entry on the electronic trip record or, until a taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, and thereafter whenever the taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider as set forth in section 2-26 of this chapter, entered on the written trip record; and

(4) the total charge shall be captured by an electronic database for entry on the electronic trip record or, until a taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, and thereafter whenever the taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider as set forth in section 2-26 of this chapter, entered on the written trip record.

(b) For a trip to the counties of Westchester or Nassau, or Newark Airport, the following shall be applicable:

(1) the driver shall place the taximeter in a recording position at the start of the trip and shall keep the taximeter in the recording position at all times;

(2) the driver must inform the passenger of the rate of fare, set forth in Taxicab Owners Rule §1-73, before the start of the trip, and for a trip to the Counties of Westchester or Nassau he or she shall advise the passenger when the taxicab crosses the City limit;

(3) the driver must inform the passenger before the start of the trip that all necessary tolls to and from the destination shall be paid by the passenger; and

(4) the total charge shall be transmitted to an electronic database for entry on the electronic trip record or, until a taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, and thereafter whenever the taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider as set forth in section 2-26 of this chapter, entered on the written trip record.

CHAPTER 2 TAXICAB DRIVERS RULES

§2-42 Courteous.

(a) A driver shall be courteous to passengers.

HISTORICAL NOTE

Section added City Record June 26, 1992 eff. July 26, 1992.

CASE AND ADMINISTRATIVE NOTES

¶ 1. A taxicab driver who, when questioned by a passenger about a delay, answered, "Do I want to sit in this street? I'm not making any money," did not violate the section. Taxi and Limousine Commission v. Rana, OATH Index No. 1396/96 (July 19, 1996).

¶ 2. Charge of directing abusive language towards the passenger in violation of 35 RCNY § 2-60(a) was conformed to proof of discourtesy in violation of 35 RCNY § 2-42. Administrative law judge credited the passenger's testimony that respondent had told her to shut up when she gave him her desired route. Administrative law judge found that the language used by respondent did not rise to the level of a 2-60(a) violation, because that rule addresses physical force and abuse. Nevertheless, the administrative law judge found that respondent's conduct amounted to a clear act of discourtesy, in violation of 2-42. **Taxi and Limousine Comm'n v. Ahmed**, OATH Index No. 1790/99 (May 3, 1999).

35 RCNY 2-43

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-43 Seating.

(a) A driver shall not permit more than four (4) passen- gers to ride in a four (4) passenger taxicab, nor more than five (5) passengers in a five (5) passenger taxicab, except that an additional passenger must be accepted if such passenger is under the age of seven (7) and is held on the lap of an adult passenger seated in the rear.

(b) A passenger who is unable to enter or ride in the passenger part of the taxicab, must be permitted to occupy the front seat alongside the driver. If a passenger's luggage, wheelchair, crutches, other mobility aid or other property occupies the rear passenger part of the taxicab, a passenger must be permitted to occupy the front seat alongside the driver.

(c) A driver shall not pick up additional passengers except if the passenger who hired the taxicab requests that the driver do so.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-45 Route and Method of Payment.

(a) A driver shall take a passenger to his destination by the shortest reasonable route unless the passenger requests a different route, or unless the driver proposes a faster alternative route which the passenger agrees to. The driver shall comply with all reasonable and lawful routing requests of the passenger.

(b) A driver shall comply with any request of a passenger during the trip to change his or her destination or terminate the trip, unless it is impossible or unsafe for the driver to comply with such request, and the passenger shall pay the amount shown on the taximeter until such time as the taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter or, after such time, the amount shown on the passenger information monitor, unless the taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider as set forth in section 2-26 of this chapter, or there is a discrepancy between the amount shown on the passenger information monitor and the taximeter. In that event, the passenger shall pay the amount shown on the taximeter, at the destination or time of termination.

(c) In a taxicab equipped with the taxicab technology system as defined in section 2-01 of this chapter or otherwise equipped to accept credit and debit card payment for fares, the driver shall comply with any request of a passenger as to the method for payment of the fare, whether in cash or by credit or debit card. Provided, however, that if such taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider as set forth in section 2-26 of this chapter, the driver shall not be required to accept payment by credit or debit card.

CASE AND ADMINISTRATIVE NOTES

¶ 1. A driver who misrepresented to a passenger that he knew the route to the passenger's destination, and failed to deliver her to that destination, then charged the passenger for the trip, thereby violated paragraph (a) of this section. Taxi and Limousine Commission v. Panic, OATH Index No. 1875/96 (Aug. 28, 1996), modified as to penalty, Comm'n Decision (Nov. 7, 1996).

¶ 2. A taxicab driver's choice to drive south from 54th Street on Fifth Avenue rather than on Seventh Avenue or Broadway, based on the driver's knowledge of the usual traffic conditions in the area, did not constitute a violation of his obligation to take the shortest reasonable route pursuant to paragraph (a) of this section. Taxi and Limousine Commission v. Rana, OATH Index No. 1396/96 (July 19, 1996).

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-46 Reasonable Requests.

(a) A driver shall comply with all the reasonable requests of a passenger, including but not limited to giving upon request his name, his taxicab driver's license number and the medallion number.

(b) A driver shall give a passenger a receipt for payment of the fare at the end of the trip. Such a receipt shall state the date, time, medallion number, fare paid, extras and the Commission Complaint Department telephone number.

(c) All audio equipment controlled by the driver shall be turned on or off at the request of the passenger. The passenger shall have the right to select what is to be played on the audio equipment. Whether or not a taxicab is hired, an audio device shall be played at normal volume only, and all noise ordinances shall be complied with.

(d) An air conditioning device in a taxicab shall be turned on or off at the request of a passenger.

Section added City Record June 26, 1992 eff. July 26, 1992.

Subd. (b) amended City Record Mar. 29, 1996 eff. Apr. 30, 1996. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Mar. 29, 1996:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The promulgated rules require that taxi drivers automatically provide passengers with a printed receipt at the end of the trip, rather than providing a receipt upon request. Similarly, taximeters must automatically print a receipt at the end of the trip.

The purpose of these amendments is to provide passengers with a written record of their trip, which will aid the passenger in making a complaint about the driver or the taxicab to the Commission, and will also help the passenger locate lost property.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Driver violated rule 2-46(b) when he refused to give a passenger a receipt upon request. **Taxi and Limousine Comm'n v. Hossain**, OATH Index No. 1296/99 (May 11, 1999).

¶ 2. Taxi driver unreasonably refused a passenger request to make two stops where passenger offered partial payment of the fair showing on the meter and gave assurances that he had every intention of returning to the taxi and continuing to the final destination. **Taxi and Limousine Comm'n v. Jaffar,** OATH Index No. 2174/00 (July 13, 2000).

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-50 Refusals.

(a) A driver shall not seek to ascertain the destination of a passenger before such passenger is seated in the taxicab.

(b) A driver shall not refuse by words, gestures or any other means, without justifiable grounds set forth in §2-50(e) herein, to take any passenger to any destination within the City of New York, the counties of Westchester or Nassau or Newark Airport. This includes a person with a disability and any service animal accompanying such person.

(c) A driver shall not require a person with a disability to be accompanied by an attendant. However, where a person with a disability is accompanied by an attendant, a taxicab driver shall not impose or attempt to impose any additional charge for transporting the attendant.

(d) A driver shall not refuse to transport a passenger's luggage, wheelchair, crutches, other mobility aid or other property.

(e) Justifiable grounds for the conduct otherwise prohibited by §§2-50(a), 2-50(b), 2-50(c) and 2-50(d) shall be the following:

(1) another passenger is already seated in the taxicab;

(2) a hail from another person has already been acknowledged by the driver, and that other person is being picked up or is about to be picked up. Provided, however, that a driver shall not acknowledge the hail of a prospective passenger over the hail of another prospective passenger with an intent to avoid transporting the passenger whose hail

was not acknowledged;

(3) the passenger is carrying, or is in possession of any article, package, case or container, other than a wheelchair or other mobility aid, which the driver may reasonably believe will cause damage to the interior of the taxicab, impair its efficient operation, or cause it to become stained or foul smelling;

(4) the driver is ending his or her workshift, has already illuminated the "Off Duty" sign, locked both rear doors, and has transmitted the relevant information to an electronic database for entry on the electronic trip record or, until a taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, and thereafter whenever the taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider as set forth in section 2-26 of this chapter, indicated on the written trip record that he or she is off duty and proceeding to his or her garage or home;

(5) it is necessary to take the taxicab out of service for one of the reasons specified in section 2-52(a) of this chapter, and the driver has already illuminated the "Off Duty" sign, transmitted the relevant information to an electronic database for entry on the electronic trip record or, until a taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, and thereafter whenever the taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider as set forth in section 2-26 of this chapter, made the appropriate written trip record entry, and the driver has further locked both rear doors;

(6) the driver is discharging his last passenger or passengers prior to going off duty, has already illuminated his "Off Duty" sign and transmitted the relevant information to an electronic database for entry on the electronic trip record or, until a taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, and thereafter whenever the taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider as set forth in section 2-26 of this chapter, made the appropriate written trip record entry;

(7) the passenger is escorting or accompanied by an animal which is not properly or adequately secured in a kennel case or other suitable container. This provision shall not apply to service animals accompanying people with disabilities;

(8) the destination is within the counties of Nassau or Westchester, or Newark Airport, and the driver has been operating the taxicab for more than eight (8) hours of any continuous twenty-four (24) hour period;

(9) the passenger is disorderly or intoxicated. Provided, however, that a driver shall not refuse to provide service to a person with a disability solely because such person's disability results in an appearance or involuntary behavior which may offend, annoy, or inconvenience the driver;

(10) a driver has a position on the "long haul" line at an airport taxi stand and the passenger desires "short haul" transportation and there is another taxicab available on the "short haul" line; or the driver has a position on the "short haul" line and the passenger desires "long haul" transportation and there is another taxicab available on the "long haul" line; or

(11) if the passenger has refused a request by the driver to obey the no-smoking requirement of law; the driver may discharge the passenger after asking the passenger to cease smoking in the taxicab, but if he does discharge the passenger it must be at a safe location.

Subd. (e) pars (4), (5), (6) amended City Record May 11, 2005 §12, eff. June 10, 2005. [See T35 §3-03 Note 10]

CASE AND ADMINISTRATIVE NOTES

¶ 1. A taxicab driver's termination of a trip due to a flat tire is permissible under paragraph (e) (formerly paragraph (d)) of this section. Taxi and Limousine Commission v. Rana, OATH Index No. 1396/96 (July 19, 1996).

¶ 2. In a default proceeding, the administrative law judge found that taxi driver violated section 2-50(b), when, while off-duty, he would not take a passenger to his requested downtown destination but was willing to take the passenger to either LaGuardia airport or midtown Manhattan. The administrative law judge held that limiting a passenger's destination in such a manner is equivalent to refusing to take a passenger to his destination. **Taxi and Limousine Comm'n v. Khan,** OATH Index No. 935/98 (Jan. 21, 1998).

¶ 3. See Padberg v. McGrath-McKechnie, 2002 WL 826795, N.Y.L.J., May 2, 2002, page 32, col. 1, U.S. Dist.Ct., E.D.N.Y., discussed under case note 2, 35 RCNY 2-61.

¶ 4. A refusal was proven where a passenger complained that the taxi driver's meter was too fast, the driver threatened the passenger, sped up, and refused to get off the highway at the exit the passenger requested. Pursuant to paragraph (b) of this section, drivers are prohibited from refusing to transport passengers to their requested destinations. **Taxi and Limousine Comm'n v. Raoul**, OATH Index No. 752/99 (Feb. 8, 1999).

¶ 5. Driver refused to transport a passenger to his destination, but the refusal was found to be not racially or ethnically motivated nor motivated by bias against a neighborhood. **Taxi and Limousine Comm'n v. Abubakar**, OATH Index No. 1174/00 (Feb. 29, 1999).

¶ 6. Where respondent took an alternate route despite having been told by the passenger to take another route, the taxi driver violated this section. When the passenger expressed a desire to terminate the ride and hail another cab, respondent stopped and as she was exiting, he accelerated, causing her to fall to the ground and respondent left the scene of the accident. **Taxi and Limousine Comm'n v. Ahmed**, OATH Index No. 1790/99 (May 3, 1999).

¶ 7. Taxi driver's fear that he would get lost in Staten Island is not a justification to refuse to transport a passenger. Taxi driver is expected to know the route or to at least be able to find it on a map if destination is within the five boroughs. **Taxi and Limousine Comm'n v. Ali,** OATH Index No. 1246/00 (Feb. 22, 2000), **penalty modified,** Comm'n Dec. (July 25, 2000).

¶ 8. Taxi driver found to have refused to pick up minority passengers in violation of §2-50(a), through Operation Refusal, a Commission and Police Department initiative. Administrative law judge recommended $350 fine, holding fine in that amount and not revocation to be the maximum penalty for a first refusal offense pursuant to section 19-507(b) of the Administrative Code. **Taxi and Limousine Comm'n v. Ouali,** OATH Index No. 1855/00 (May 3, 2000), **modified on penalty,** Comm'n Dec. (May 1, 2001).

¶ 9. Administrative law judge concluded that respondent refused to stop and pick up a passenger based on that passenger's race where the passenger was in respondent's direct line of vision, respondent briefly paused after making eye contact with the passenger, and respondent continued to drive fifty feet before stopping for another passenger. Drivers who refuse passengers based upon perceived or actual bias in any form should be penalized and need to

understand that such behavior while serving the public will not be tolerated. Administrative law judge recommends a fine of $500 and a 30-day suspension, the maximum permissible penalty for a second refusal offense pursuant to section 19-507(b) of the Administrative Code. **Taxi and Limousine Comm'n v. Hayat,** OATH Index No. 1834/00 (June 9, 2000), **modified on penalty,** Comm'n Dec. (May 10, 2001).

¶ 10. Commission is limited to imposition of mandatory penalties under Administrative Code section 19-507(b) for taxi driver's first refusal-to-take-passenger offense; revocation not available for a first offense. **Taxi and Limousine Comm'n v. Park,** OATH Index No. 1014/00, supp. rep. (Feb. 2, 2000), **modified penalty,** Comm'n Dec. (May 25, 2000).

¶ 11. Taxi driver's off-duty defense to refusal charge did not excuse refusal to pick up passenger where driver did not comply with the procedures for going off-duty. Administrative law judge recommended maximum fine of $350 for a first time refusal offense pursuant to §19-507(b) of the Administrative Code. **Taxi and Limousine Comm'n v. Azad,** OATH Index No. 1180/00 (Mar. 1, 2000), **modified on penalty,** Comm'n Dec. (May 1, 2001).

¶ 12. Taxi driver's simultaneous hail defense, §2-50(e), to refusal charge did not justify refusal to pick up passenger where driver did not pick up either passenger. **Taxi and Limousine Comm'n v. Islam,** OATH Index No. 1181/00 (May 1, 2000), **modified on penalty,** Comm'n Dec. (May 10, 2001).

¶ 13. Taxi driver was found not to have refused to intentionally transport a passenger where he saw another prospective passenger first. **Taxi and Limousine Comm'n v. Singh,** OATH Index No. 1173/00 (Apr. 19, 2000).

¶ 14. Pursuant to subsection (b) of this rule, a taxicab driver cannot refuse to take a passenger to any destination within New York City. An exception is provided in subsection (e)(9), which permits a driver to refuse to transport a passenger if the passenger is disorderly or intoxicated. A driver violated subsection (b) when he terminated a ride after going one block because the passenger and his date were kissing and embracing. Driver did not establish that the passengers were disorderly or intoxicated to the point that his refusal to transport them was justified under subsection (e)(9). **Taxi & Limousine Comm'n v. Hussein**, OATH Index No. 572/08 (Jan. 14, 2008).

CHAPTER 2 TAXICAB DRIVERS RULES

§2-52 Off-Duty Procedure.

(a) Before going off duty a driver shall transmit the relevant information to an electronic database for entry on the electronic trip record or, until a taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, and thereafter whenever the taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider as set forth in section 2-26 of this chapter, shall enter on his or her written trip record the time, place and reason for going off duty; he or she shall illuminate the "Off Duty" light or display a "Relief Time" sign inside the windshield and visible from the street; and he or she shall lock the rear doors.

(b) Upon completion of the off duty activity a driver shall immediately transmit the relevant information to an electronic database for entry on the electronic trip record or, until a taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, and thereafter whenever the taxicab technology system is inoperable for not more than forty-eight (48) hours following the filing of an incident report with the authorized taxicab technology service provider as set forth in section 2-26 of this chapter, enter on his or her written trip record the time thereof. The driver shall then turn off the "Off Duty" light or remove the "Relief Time" sign, and return to service.

(c) When the taxicab is operated for personal use, a "Personal Use-Off Duty" entry shall be transmitted to an electronic database for entry on the electronic trip record or made on the written trip record, and the "Off Duty" light shall be illuminated.

(d) A driver shall illuminate the "Off Duty" light only by use of a manually operated switch on the taxicab dashboard.

CHAPTER 2 TAXICAB DRIVERS RULES

§2-56 Taxi Stands.

(a) A driver has the right to take a position on any taxi stand having a vacancy, and no other taxicab driver may interfere with that right.

(b) A driver may not occupy a taxi stand for the purpose of repairing his taxicab, except for minor emergency repairs.

(c) A driver shall not overcrowd, crash or back into a front position on a taxi stand; he shall take the rear position on the line formed at such a stand, unless it is a relief stand that has a vacancy.

(d) A driver may occupy a taxi stand only when he is on duty or when, for a period not to exceed one hour, he has gone off duty pursuant to §§2-52(a) through (c).

(e) The driver of each of the first two taxicabs on a taxi stand, other than a relief stand, shall remain in the driver's seat ready to accept passengers; any other driver on such a stand shall be no more than fifteen feet from his taxicab unless if he is off duty and the required "Off Duty" light or "Relief Time" sign is visibly displayed.

(f) The space immediately in front of a fire hydrant on a street, where parking is not prohibited, is an active taxi stand for one taxicab, except when forbidden by §2-55(c). However, the driver must be seated in his taxicab, ready for operation at all times.

CHAPTER 2 TAXICAB DRIVERS RULES

§2-57 Terminals.

(a) The rules regarding taxi stands also apply to special taxi stands and feed lines at air, rail, bus and ship terminals. Where taxicab holding areas are provided at such terminals, a driver, before leaving on relief time, shall park the taxicab in such holding area, to which he may not bring any passengers; upon returning, he shall take a rear position on the feed line.

(b) Where at an airport taxi stand, there is a choice of "long haul" and "short haul" lines available to the taxicabs, a driver already on the "short haul" line may not accept a passenger who desires "long haul" transportation if there is an available taxicab on the "long haul" line; and conversely a driver already on the "long haul" line may not accept a passenger who desires "short haul" transportation, if there is an available taxicab on the "short haul" line.

CHAPTER 2 TAXICAB DRIVERS RULES

§2-59 Lost Property.

(a) The driver shall inspect the interior of the taxicab and the trunk compartment, if used, immediately after termination of each trip to Kennedy, La Guardia and Newark Airports.

(b) Property found by a driver in a taxicab shall be returned to the passenger if possible; otherwise it shall be taken without delay to the police precinct closest to where the passenger was discharged.

(c) If the property is not returned to the passenger, the driver shall promptly inform the Commission of the details regarding the found property and the police precinct where it is held.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-60 Abuse and Physical Force Prohibited.

(a) A driver shall not threaten, harass or abuse any passenger or any governmental or Commission representative, public servant or other person while performing his duties and responsibilities as a driver. A driver shall not distract or attempt to distract a service animal accompanying a person with a disability.

(b) A driver shall not use or attempt to use any physical force against a passenger, Commission representative, public servant or other person while performing his duties and responsibilities as a driver. A driver shall not harm or use physical force against or attempt to harm or use physical force against a service animal accompanying a person with a disability.

Section added City Record June 26, 1992 eff. July 26, 1992.

CASE AND ADMINISTRATIVE NOTES

¶ 1. By verbally abusing, threatening and spitting on a Commission inspector at the Commission's offices, a driver committed conduct under this section warranting revocation of his hack license. **Taxi and Limousine Commission v. Vedrine,** OATH Index No. 1001/95 (Sept. 7, 1995).

¶ 2. For a taxicab driver who was unable to make change for a twenty-dollar bill in violation of §2-47(b) of this

chapter, who spoke in a threatening manner to his passenger regarding payment of the fare in violation of paragraph (a) of this section, and who grabbed the passenger, threw him to the ground and attempted to kick him, in violation of paragraph (b) of this section, the penalty imposed was revocation of the driver's hack license. Taxi and Limousine Commission v. Kalontarov, OATH Index No. 1732/97 (Sept. 10, 1997).

¶ 3. A taxicab driver who struck his passenger in the face violated paragraph (b) of this section, notwithstanding the fact that the passenger took the keys to the driver's cab during a dispute between them that arose from the driver's refusal to drive the passenger to her destination. Although the driver may have believed that the passenger was trying to do something more than take the keys from the cab, striking a passenger is not justified even in extreme circumstances, except in self-defense. Taxi and Limousine Commission v. Ramadan, OATH Index No. 1644/97 (July 22, 1997).

¶ 4. Taxi driver was found to have violated rule 2-60(b) when he punched a passenger in the head and face, knocking the passenger to the ground, during a fare dispute. License revocation imposed. **Taxi and Limousine Comm'n v. Belenky,** OATH Index No. 121/99 (Aug. 10, 1998).

¶ 5. Taxi driver, angry that female passenger, a professional magician, was entering his taxicab with birds used in her act, pulled the magician's assistant out of the cab and pushed the magician into the cab, locked the door and proceeded rapidly up Madison Avenue. As she screamed to be let out, the driver told the magician "Lady, I'm going to take you for a ride you're never going to forget." The magician's little finger was broken during the incident. Driver's conduct violated rules 2-60(a) and 2-60(b). License revocation imposed. **Taxi and Limousine Comm'n v. Abit-Osman,** OATH Index No. 1452/98 (July 31, 1998).

¶ 6. Taxi driver found to have struck passenger, without provocation, with a stick and a clipboard. License revocation imposed. **Taxi and Limousine Comm'n v. Mohamed,** OATH Index No. 1206/98 (May 8, 1998).

¶ 7. Taxi driver visited JFK Airport while off-duty to handle outstanding summonses incurred as a cab driver. Driver got into an argument with Commission personnel and then assaulted law enforcement personnel who were called to eject driver from the facility. The administrative law judge determined that the assault had a sufficient nexus to the driver's hack license since it occurred "while performing his duties and responsibilities as a driver" as defined by rule 2-60(a). The fact that the visit occurred while the driver was not on duty driving his cab was deemed to be inconsequential. License revocation imposed. **Taxi and Limousine Comm'n v. Khan,** OATH Index No. 333/99 (Dec. 14, 1998).

¶ 8. Taxi driver's use of force against pedestrian, if any, was found to be defensive and therefore not in violation of rule 2-60. Charge dismissed. **Taxi and Limousine Comm'n v. Singh,** OATH Index No. 280/99 (Sept. 22, 1998).

¶ 9. Driver violated rules prohibiting threats, harassment, abuse, and physical force on passengers after a passenger complained that the meter was too fast and the taxi driver told her, "I'll put you in jail before you get me in jail" and threatened her life. Taxi driver also pulled her arm to force her to exit the cab. **Taxi and Limousine Comm'n v. Raoul**, OATH Index No. 752/99 (Feb. 8, 1999).

¶ 10. Use of force against pedestrian was unjustified even if pedestrian provoked some response by striking cab window. Administrative law judge found that pedestrian's action was prompted by respondent's reckless driving. **Taxi and Limousine Comm'n v. Smith**, OATH Index No. 498/00 (Oct. 12, 1999).

¶ 11. License revocation imposed where taxicab driver was found to have physically assaulted a passenger by kicking her after a verbal dispute over his failure to follow her directions as to what route to take. **Taxi and Limousine Comm'n v. Mughal**, OATH Index No. 1939/99 (June 16, 1999), **aff'd**, Comm'n Dec. (Sept. 27, 1999).

¶ 12. Taxi driver was found to have caressed and rubbed the hands and inner thigh of an eighteen year-old female passenger without her consent, after offering her a free ride in the front seat of the cab. Administrative law judge rejected respondent's alibi defense and credited the complainant's unequivocal in-court identification of respondent.

License revocation recommended. **Taxi and Limousine Comm'n v. Rauf**, OATH Index No. 2033/99 (July 30, 1999).

¶ 13. Taxi driver violated this section where he pushed complaining witness' car three or four times with the bumper of the taxi, causing the complainant to get out and ask respondent why he continued to push his car, and where the respondent got out of the cab and punched the complainant in the face. License revocation recommended because of driver's actions and past driving record. **Taxi and Limousine Comm'n v. Singh**, OATH Index No. 618/00 (Dec. 20, 1999).

¶ 14. License revocation imposed where taxi driver was found to have screamed at female passenger to get out of the cab and threatened to hit her "in the face." **Taxi and Limousine Comm'n v. Verma**, OATH Index No. 1085/99 (Mar. 9, 1999), **aff'd**, Comm'n Dec. (Apr. 26, 1999).

¶ 15. License revocation imposed where respondent spoke lewdly to four young women in his cab and assaulted one of the them. **Taxi and Limousine Comm'n v. Kouyate**, OATH Index No. 152/00 (Aug. 13, 1999), **aff'd**, Comm'n Dec. (Oct. 27, 1999).

¶ 16. Taxi driver found to have violated section 2-60(a) when he cursed at passenger in annoyance over passenger having dozed off before giving him full and specific directions. **Taxi and Limousine Comm'n v. Tokosi,** OATH Index No. 513/00 (Feb. 18, 2000), **modified on penalty,** Comm'n Dec. (Apr. 12, 2000).

¶ 17. Administrative law judge found that taxi driver abused and harassed the female passenger in violation of section 2-60(a) by manipulating and exposing his penis in her presence. **Taxi and Limousine Comm'n v. Kumar,** OATH Index No. 499/00 (Jan. 31, 2000)

¶ 18. Respondent used physical force against a passenger when he accelerated his taxicab while the rear door was open, the result of which was that the door closed and passenger was restrained from exiting the taxi in violation of section 2-60(b). **Taxi and Limousine Comm'n v. Appelbaum,** OATH Index No. 724/00 (Jan. 27, 2000).

¶ 19. Taxi driver abruptly drove his cab forward, with passenger partially inside the cab and the rear door open, causing the passenger to fall to the street, in violation of paragraphs (a) and (b) of this section. **Taxi and Limousine Comm'n v. Yousaf,** OATH Index No. 984/00 (Feb. 18, 2000).

¶ 20. Belief that passenger is attempting to evade fare, no matter how reasonable or certain, does not justify resort to physical self-help. Proof of injury not required to establish a violation of section 2-60(b). **Taxi and Limousine Comm'n v. Tokosi,** OATH Index No. 513/00 (Feb. 18, 2000), **modified on penalty,** Comm'n Dec. (Apr. 12, 2000)

¶ 21. Petitioner's unrebutted evidence was sufficient to establish that respondent used intemperate language and, without provocation, struck a passenger in the face. The rule imposes an absolute prohibition on verbal abuse and/or the use of physical force against a passenger while on duty as a driver. **Taxi and Limousine Comm'n v. Jaffar,** OATH Index No. 2174/00 (July 13, 2000).

¶ 22. License revocation recommended for taxi driver, who was unhappy with a decision after a hearing, pushed and cursed at Commission employee and guard. Driver's conduct violated sections 2-60(a) and 2-60(b). **Taxi and Limousine Comm'n v. Nicolas,** OATH Index No. 1762/00 (Apr. 12, 2000).

¶ 23. In default hearing, agency convincingly proved through testimony of another cab driver that the respondent sprayed a Mace-like substance into his face after a minor traffic incident. Identity of respondent was not in question-other driver picked him out of photo array and management company certified he was driving the particular cab at the time of the incident. **Taxi and Limousine Comm'n v. Dianis,** OATH Index No. 1832/00 (Apr. 10, 2000).

¶ 24. Subsection (a) of this rule prohibits taxi drivers from threatening, harassing, or abusing passengers or other persons while performing their "duties and responsibilities as a driver." Taxi driver argued this section did not apply to a

dispute with a female motorist that occurred while he was off-duty, driving his wife to a train station. ALJ found the rule did apply and that the driver violated it when he cursed at the female motorist. The rule requires drivers to conduct themselves with appropriate deportment not only before passengers but also before "other persons." The judge inferred from the evidence that the driver was on duty before his wife called and asked him to take her to the train station. **Taxi & Limousine Comm'n v. Narcisse**, OATH Index No. 1998/07 (Aug. 16, 2007), **modified on penalty**, Comm'r/Chair Decision (Sept. 24, 2007).

¶ 25. Taxi driver found to have verbally harassed a passenger in violation of subsection (a) of this rule, but not to have assaulted the passenger in violation of subsection (b) of this rule. ALJ credited driver's testimony that he put his hand out at arm's length to avoid further confrontation, finding no intent to cause harm. Fine of $500 recommended for verbal harassment. **Taxi & Limousine Comm'n v. Conille**, OATH Index No. 361/08 (Nov. 15, 2007).

¶ 26. A licensed driver was charged with both verbal abuse and physical force against two fourteen year old female passengers. He pleaded guilty and surrendered his license pursuant to a stipulation under which he could reapply for a license after one year. The stipulation also said that if he reapplied, the application would be subject to a fitness review, that such review would consider the facts underlying the charges, and that there was no guarantee that the application would be approved. Petitioner waited three years before reapplying for a license. An administrative law judge reviewed the case, noted that only three years had elapsed since the incident, and found that petitioner was unfit to be a driver. The ALJ recommended that the application be denied, and the Commissioner agreed. The court upheld the denial of the application. Judicial review of an administrative determination is limited to whether this determination was arbitrary or capricious, or without a rational basis. The commission was free to weigh all the facts against petitioner, and consider any accomplishments made by the petitioner during the three year period that the petitioner's license was surrendered. The court agreed that the stipulation was based on serious misconduct which had occurred in the relatively recent past. In re Boutros Mankarios v. NYC Taxi and Limousine Comm. 2008 NY Slip Op. 2013, 49 AD3d 316, 853 NYS2d 69, 2008 NY App. Div. Lexis 1998.

¶ 27. Subsection (a) of this rule prohibits a driver from verbally abusing another person "while performing his duties and responsibilities as a driver." Driver charged with violation of this rule for cursing at another driver during an argument which ensued after a traffic incident. ALJ rejected driver's argument that the rule did not apply because the dispute occurred while he was off-duty. Regardless of whether the driver was on or off-duty, he was driving his taxi and he cursed at another person in a public place. Since the incident could reflect poorly on the Commission, it has an interest in regulating this conduct. **Taxi & Limousine Comm'n v. Sobczak**, OATH Index No. 1691/08 (Apr. 7, 2008), **modified on penalty**, Comm'r/Chair's dec. (May 9, 2008).

¶ 28.Announcing that "the time for more civilized drivers has come", Commissioner/Chair overrules **Taxi & Limousine Comm'n v. Baudin**, OATH Index No. 341/81 (Feb. 10, 1982), and progeny. In **Baudin**, the ALJ ruled that the use of profane language by a cab driver must be evaluated in the context of each case to determine whether such conduct goes beyond the mores of the community and "giving cognizance to the realities of life in New York City", and dismissed a charge that a taxi driver had violated this section when he used profanity during a fight with a pedestrian. **Taxi & Limousine Comm'n v. Sobczak**, Comm'r/Chair's dec. (May 9, 2008), **modifying on penalty** OATH Index No. 1691/08 (Apr. 7, 2008).

¶ 29. To the extent that prior precedent (**Taxi & Limousine Comm'n v. Baudin**, OATH Index No. 341/81 (Feb. 10, 1982), and progeny) could be read to exclude the penalty of license revocation for verbal abuse or harassment, those decisions were overruled by the Commissioner/Chair in **Taxi & Limousine Comm'n v. Sobczak**, Comm'r/Chair's dec. (May 9, 2008), **modifying on penalty** OATH Index No. 1691/08 (Apr. 7, 2008).

¶ 30. Commissioner/Chair imposed the penalty of a $1000 fine and a 30 day suspension for a taxi driver who cursed at another taxi driver following a traffic dispute. **Taxi & Limousine Comm'n v. Sobczak**, Comm'r/Chair's dec. (May 9, 2008), **modifying on penalty** OATH Index No. 1691/08 (Apr. 7, 2008).

¶ 31. The maximum suspension for a violation of subsection (a) of this section is thirty days. ALJ's recommendation of a ninety day suspension was impermissible. **Taxi & Limousine Comm'n v. Iqbal**, Comm'r/Chair's dec. (Nov. 25, 2008), **modifying on penalty** OATH Index No. 457/09 (Oct. 20, 2008).

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 2-61

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-61 Compliance with Law.

(a)(1) A driver, while performing his duties and responsibilities as a driver shall not commit or attempt to commit, alone or in concert with another, any act of fraud, misrepresentation or larceny against a passenger, Commission representative, public servant or any other person.

(2) A driver, while performing his duties and responsibilities as a taxicab driver, shall not commit or attempt to commit, alone or in concert with another, any willful act of omission or commission which is against the best interests of the public, although not specifically mentioned in these Rules.

(b) A driver shall not use or permit any other person to use his taxicab for any unlawful purpose.

(c) A driver shall not conceal any evidence of a crime nor voluntarily aid violators to escape arrest.

(d) A driver shall report immediately to the police any attempt to use his taxicab to commit a crime or escape from the scene of a crime.

(e) A driver shall, upon filing for Workers' Compensation benefits because of a disabling work-related injury, submit his or her driver's license to the Commission and cease driving, for so long as the driver claims a disability that prevents the driver from operating a taxicab. Such license shall not be returned until such driver presents to the Commission documentation of cessation of Workers' Compensation benefits due to recovery from such work-related disability, as provided in §1-43(d) of this title.

HISTORICAL NOTE

Section added City Record June 26, 1992 eff. July 26, 1992.

Subd. (a) amended City Record Aug. 10, 1998 §3, eff. Sept. 9, 1998. [See T35 §1-60 Note 1]

Subd. (e) amended City Record Sept. 28, 1994 eff. Oct. 31, 1994.

Subd. (e) added City Record Sept. 13, 1993 eff. Oct. 13, 1993.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Taxicab driver's license was revoked because evidence supported the determination that petitioner harassed, made sexual comments to and grabbed breast of female passenger in his taxicab. Taxicab Drivers rule 109 (35 RCNY 2-61(a)) prohibits driver, while performing his duties and responsibilities, from performing "any willful act of omission or commission which is against the best interests of the public, even though not specifically mentioned in these rules", is not unconstitutionally vague. Matter of Fernandez v. NYC Taxi & Limo. Comm., 193 AD2d 423 [1993].

¶ 2. Taxi driver violated this section in creating a disturbance in the Commission's offices, by swearing, yelling, threatening Commission employees, engaging in violent and tumultuous conduct, and refusing repeated lawful requests to leave the building. Taxi and Limousine Commission v. Cleef, OATH Index No. 306/95 (Oct. 12, 1994).

¶ 3. This rule, which prohibits a taxi driver from performing willful acts which are "against the best interests of the public," is broad enough to prohibit sexual harassment of and offensive touching of a female passenger. The court rejected a claim that the rule was unconstitutionally vague. Fernandez v. New York City Taxi and Limousine Commission, 193 A.D.2d 423 (1st Dept. 1993).

¶ 4. Appointing a gypsy cab to look like a medallion cab, including use of yellow paint reserved for medallion taxis, violates paragraph (a) of this section as well as §2-17 of this title, prohibiting the knowing operation of a vehicle for hire without a proper license, warranting revocation of the respondent's hack license. Taxi and Limousine Commission v. Min, OATH Index No. 669/96 (Nov. 13, 1995).

¶ 5. A taxicab driver who misrepresented to a passenger that he knew the route to the passenger's destination, then was unable to take her to that destination, violated paragraph (a) of this section. Taxi and Limousine Commission v. Panic, OATH Index No. 1875/96 (Aug. 28, 1996), modified as to penalty, Comm'n Decision (Nov. 7, 1996).

¶ 6. A taxicab driver who filed a report with the Commission falsely stating that his hack license had been lost, when in fact it had been forcibly taken by a passenger during a dispute, thereby committed the crime of offering a false instrument for filing in the second degree and a violation of paragraph (a) of this section. Taxi and Limousine Commission v. Ullah, OATH Index No. 1793/97 (Aug. 22, 1997).

¶ 7. A taxicab driver's false report to the Commission that his hack license had been lost constituted a violation of paragraph (a) of this section. Taxi and Limousine Commission v. Louis, OATH Index No. 1487/97 (Aug. 11, 1997).

¶ 8. Where a taxicab driver obtained a replacement hack license from the Commission by reporting that his original hack license had been lost, when in fact the original hack license had been confiscated by a police officer, the driver committed a violation of paragraph (a) of this section, the penalty for which was revocation of the hack license. Taxi and Limousine Commission v. Diallo, OATH Index No. 234/98 (Sept. 9, 1997).

¶ 9. Possession by a taxicab driver of a counterfeit hack license constituted a violation of paragraph (a) of this section, the penalty for which was revocation of the driver's hack license. Taxi and Limousine Commission v. Gondal, OATH Index No. 985/97 (Apr. 17, 1997).

¶ 10. Having obtained a replacement hack license by reporting his original hack license to be lost, the respondent posted as bond his superseded original hack license rather than his replacement license, in order to be able to continue driving his taxicab while his license was suspended. In addition, the respondent obtained a temporary hack license without disclosing his possession of the replacement hack license. Both acts constituted violations of paragraph (a) of this section, the penalty for which was revocation of the respondent's hack license. Taxi and Limousine Commission v. Mbaye, OATH Index No. 1749/97 (Sept. 11, 1997).

¶ 11. Operation of a taxicab by the respondent, the owner and driver of the cab, with a device known as a "zapper," the purpose of which was to enable the operator to tamper with the taximeter and artificially increase the fare to be charged to customers, constituted a violation of this section, as well as §§1-23, 1-60(b), 1-67(a), 2-26(d), 2-30(a), 2-31(a), and 2-66(a), the penalty for which was revocation of the respondent's hack license and forced sale of his medallion. Taxi and Limousine Commission v. Malek, OATH Index No. 1540/97 (Aug. 5, 1997).

¶ 12. Taxicab driver's possession in her cab of a "zapper," a device that enables the driver to accelerate the cab's meter, constituted a violation of §2-26(d) of this title and paragraph (a) of this section, the penalty for which was revocation of the driver's hack license. Taxi and Limousine Commission v. Decriollo, OATH Index No. 1480/97 (Sept. 4, 1997).

¶ 13. Taxicab driver's forgery of a hack license constituted a fraud in violation of paragraph (a) of this section. Taxi and Limousine Commission v. Windell, OATH Index No. 1748/97 (July 11, 1997).

¶ 14. This rule, which states that drivers shall not engage in willful acts of commission or omission which is "against the best interests of the public," is not unconstitutionally vague. In this case, drivers disciplined for refusal of service had more than fair warning that such conduct could subject them to disciplinary action. Padberg v. McGrath-McKechnie, N.Y.L.J., May 2, 2002, page 32, col. 1, 2002 WL 826795, U.S. Dist.Ct., E.D.N.Y.

¶ 15. In Fernandez v. New York City Taxi & Limousine Commission, 193 A.D.2d 423, 597 N.Y.S.2d 337 (1st Dept. 1993), the court held that the "public interest" rule was not unconstitutionally vague as applied to driver who made sexual comments to and grabbed breasts of female passenger.

¶ 16. The TLC has the power to revoke a taxi driver's license even for a first-time refusal of service. Any unjustified service refusals by licensed taxicab drivers threatens the best interests of the public, since such refusals not only perpetuate the insidious problem of discrimination, but also adversely impact a vital and integral component of the transportation system of the city. Arif v. New York City Taxi & Limousine Commission, 3 A.D.3d 345, 770 N.Y.S.2d 344 (1st Dept. 2004). The Court of Appeals has granted leave to appeal.

¶ 17. In Lys v. New York City Taxi and Limousine Commission, N.Y.L.J., Jan. 31, 2002, page 21, col. 4, 2002 WL 338187 (Civ.Ct. New York Co.) the court held where a driver was accused of refusal of service, that the TLC could not summarily suspend the driver's license without a hearing. Moreover, the court held that a post-hearing suspension of the driver's license by reason of a first offense of service refusal unlawfully deprived the driver of the property right which the license represented. The penalties imposed were in excess of those called for by Admin. Code Sec. 19-507, which provided for a fine of between $250 and $350 for a first offense.

¶ 18. Taxi driver fraudulently claimed that his failure to appear at Commission hearing was because he had been a crime victim. The driver submitted altered police reports which falsely attested to his being a crime victim four days after the scheduled hearing. License revocation imposed. **Taxi and Limousine Comm'n v. Dimitrie,** OATH Index No. 1582/98 (Aug. 4, 1998).

¶ 19. Operation of a taxicab by defaulting respondent, one of two drivers and owners of the cab, with a meter acceleration device known as a "zapper," constituted a violation of this section and several others, the penalty for which was revocation of respondent's hack license and forced sale of his medallion. **Taxi and Limousine Comm'n v. Hom,** OATH Index Nos. 433 & 435/99 (Oct. 28, 1998).

¶ 20. The Commission proved that an unauthorized meter acceleration device had been installed in a taxi. The two named respondents were the full time drivers of the cab who had the motive and opportunity to tamper with the meter. Respondents' default permitted the administrative law judge to infer that neither driver had any defense to the evidence presented. Both drivers were found to have engaged in a scheme to defraud the riding public in violation of section 2-61. License revocation imposed. **Taxi and Limousine Comm'n v. Mohammad,** OATH Index Nos. 173-75/99 (Oct. 6, 1998).

¶ 21. Taxi driver is found to have overcharged two passengers based upon testimony from the passengers and meter acceleration device found in the cab during an inspection following the passenger complaints. License revocation imposed**. Taxi and Limousine Comm'n v. Flores,** OATH Index No. 1652/98 (Aug. 7, 1998).

¶ 22. Driver violated section 2-13(a) and section 2-61(a) when he falsely reported his hack license stolen in order to obtain a replacement license and then allowed an unauthorized person to use his replacement hack license, while respondent continued to use his original license. Revocation imposed. **Taxi and Limousine Comm'n v. Nawaz,** OATH Index No. 1433/97 (Jan. 28, 1998).

¶ 23. License revocation imposed for a taxi driver, operating his taxi while his license was suspended, who presented a fake (photocopy of original) hack license to a police officer when the officer served the driver with summonses. **Taxi and Limousine Comm'n v. Ilyas,** OATH Index No. 1574/98 (June 17, 1998).

¶ 24. Hearsay evidence, including an affidavit and several e-mails from a foreign passenger, proved that taxi driver had exposed himself to the female passenger. License revocation imposed. **Taxi and Limousine Comm'n v. Fernandez,** OATH Index No. 334/99 (Oct. 16, 1998).

¶ 25. License revocation recommended where undisputed evidence established that an unknown imposter represented himself to be respondent and presented respondent's hack license and DMV license in attempting to register for a course required for hack license renewal. **Taxi and Limousine Comm'n v. Elsayed**, OATH Index No. 462/99 (Jan. 11, 1999).

¶ 26. Respondent participated in a scheme to alter hack license and permit an unauthorized individual to drive a taxicab in violation of this section. **Taxi and Limousine Comm'n v. Shah**, OATH Index No. 514/99 (Jan. 27, 1999).

¶ 27. Respondents engaged in a scheme to defraud the public by operating taxicab while it was equipped with a zapper, or unauthorized device to accelerate the taximeter. **Taxi and Limousine Comm'n v. Kandov**, OATH Index Nos. 941-42/99 (May 12, 1999).

¶ 28. Respondents violated this section when they engaged in a scheme to ensure that they and others received passing grades on the drivers final licensing examination. Respondents, who denied any knowledge of or in involvement in the scheme, could not explain how the former employee could have been provided with their Commission-issued hack license numbers, taxi school each attended and other personal information without their knowledge and cooperation in the scheme. **Taxi and Limousine Comm'n v. Ghotra**, OATH Index Nos. 659 & 1938/99 (July 21, 1999).

¶ 29. Respondents, identified on the rate card as regular drivers of the taxicab in which the devices had been placed at least 6 or 7 months earlier, and possibly longer, were liable for meter tampering and operating cab with unauthorized device and engaging in a scheme to defraud the public, on and prior to date of discovery by Commission investigator. Inspection of taxicab revealed tampered harness wiring and presence of unauthorized meter acceleration device in a CB radio. **Taxi and Limousine Comm'n v. Zargar**, OATH Index Nos. 1130-31/99 (Mar. 9, 1999), **rev'd in part**, Comm'n Dec. (April 15, 1999).

¶ 30. There was insufficient evidence that a taxi driver bribed a Commission employee to secure a passing score on a drivers examination. Administrative law judge found that the employee's written statement, indicating only that she

accepted bribes from unidentified "middlemen" on behalf of forty drivers, was insufficient to sustain the allegations and recommended that the charges be dismissed. **Taxi and Limousine Comm'n v. Khan,** OATH Index No. 584/99 (Jan. 5, 1999).

¶ 31. License revocation recommended for taxi driver who abruptly drove his cab forward, with passenger partially inside the cab and the rear door open, causing the passenger to fall to the street, in violation of Drivers Rules section 2-61(a) and Vehicle and Traffic Law sections 600(2) and 1162. **Taxi and Limousine Comm'n v. Yousaf,** OATH Index No. 984/00 (Feb. 18, 2000).

¶ 32. Administrative law judge found that taxi driver manipulated and exposed his penis in the presence of a female passenger. **Taxi and Limousine Comm'n v. Kumar,** OATH Index No. 499/00 (Jan. 31, 2000).

¶ 33. In a default proceeding, administrative law judge found that taxi driver exposed his penis to a pedestrian and at the same time and place, punched that pedestrian. **Taxi and Limousine Comm'n v. Majeed,** OATH Index No. 1540/00 (Apr. 12, 2000).

¶ 34. Held, the Commission could not use its general rule prohibiting acts against the best interests of the riding public (§ 2-61(a)) as justification to revoke a license for a first-time service refusal offense, because service refusals are governed by a specific Administrative Code provision (§19-507) which contains a mandatory graduated penalty scheme limiting the penalty for a first offense to a fine. For service refusal, administrative law judge found violation of refusal rule (§2-50) but not a separate violation of rule 2-61(a). Administrative law judge recommended dismissal of section 2-61(a) violation. See e.g. **Taxi and Limousine Comm'n v. Ouali,** OATH Index No. 1855/00 (May 3, 2000), modified on penalty, Comm'n Dec. (May 1, 2001); **Taxi and Limousine Comm'n v. Mussa,** OATH Index No. 1053/00 (Feb. 2, 2000).

¶ 35. Violation of rules prohibiting driver or owner from acting against the best interest of the public may be found for conduct which is also prescribed by other rules where conflicting penalty provisions are not at issue. **Taxi and Limousine Comm'n v. Egalite,** OATH Index No. 1542/00 (Aug. 4, 2000) (citing **Taxi and Limousine Comm'n v. Jaffar,** OATH Index No. 2174/00 (July 13, 2000).

¶ 36. Driver's physical and verbal abuse of passenger was found to have violated both specific rule prohibiting abuse of passenger (§ 2-60) and catchall rule prohibiting conduct against the best interests of the public (§ 2-61(a)(2)). In cases involving service refusals, the general best interests rule can not be invoked in order to impose the penalty of license revocation in contravention of the specific graduated penalties set for refusals. Where conflicting penalty provisions are not at issue, findings of multiple rule violations may be made where the same conduct violates more than one provision or rule. **Taxi and Limousine Comm'n v. Jaffar,** OATH Index No. 2174/00 (July 13, 2000).

¶ 37. Respondent's race-based refusal to stop to pick up a passenger violated section 2-50(b), however, it does not generate a separate violation under section 2-61(a)(2). Section 2-61(a)(2) is a general provision that, by its own language, yields to the more specific rules regulating the conduct of drivers and is not applicable to respondent in the instant case. The concluding phrase, "although not specifically mentioned in these Rules," indicates that this section regulates conduct not otherwise articulated. This interpretation is in accord with general principles of statutory construction and applies here. **People v. Lawrence,** 64 N.Y.2d 200, 204, 485 N.Y.S.2d 233, 236 (1984); **People v. Mobil Oil Corp.,** 48 N.Y.2d 192, 200, 422 N.Y.S.2d 33, 38 (1979); N.Y. Statutes § 238 (McKinney Supp. 1999) (It is a well established principle in the construction of statutes that, whenever there is a general and a particular provision in the same statute, the general does not overrule the particular, but applies only where the particular enactment is inapplicable.); **Prospect v. Cohalan,** 109 A.D.2d 210, 216, 490 N.Y.S.2d 795, 799 (2d Dep't), **aff'd,** 65 N.Y.2d 867, 493 N.Y.S.2d 293 (1985). **Taxi and Limousine Comm'n v. Hayat**, OATH Index No. 1834/00 (June 9, 2000), **modified on penalty,** Comm'n Dec. (May 10, 2001).

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 2-62

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-62 Gifts Prohibited.

(a) A driver or any person acting on his behalf shall not offer or give any gift, gratuity or thing of value to any employee, representative or member of the Commission, or any public servant, or any dispatcher employed at a public transportation facility.

(b) A driver shall immediately report to the Commission and the NYC Department of Investigation any request or demand for a gift, gratuity or thing of value by any employee, representative or member of the Commission or any public servant or any dispatcher employed at a public transportation facility or authorized group-ride taxi line.

(c) A driver shall remove all currency from the taxicab's interior prior to its examination by any Commission personnel.

HISTORICAL NOTE

Section added City Record June 26, 1992 eff. July 26, 1992.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Testimony from TLC inspector, who admitted that he accepted bribes from those who presented taxicabs to him for inspection, was found insufficient to establish charges that taxi cab driver had bribed the inspector, due to inconsistencies in the inspector's testimony and other problems with his credibility. **Taxi and Limousine Comm'n v. Chrisanthos, Inc.,** OATH Index Nos. 1626-32/95 (July 21, 1998).

¶ 2. TLC inspector's testimony was found to be sufficient to establish that medallion owners attempted to bribe the inspector. **Taxi and Limousine Comm'n v. N & J Taxi, Inc.,** OATH Index Nos. 1542-53/95 (Jan. 9, 1996), **aff'd in part, remanded on other grounds sub nom. Statharos v. NYC Taxi & Limousine Comm'n,** 269 A.D.2d 280, 703 N.Y.S.2d 461 (1st Dep't 2000).

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-66 Cooperating with TLC.

(a) A driver shall, at all times, cooperate with all law enforcement officers, authorized representatives of the Commission, the NYC Department of Investigation, and dispatchers at public transportation terminals and at authorized group-ride taxi lines, and shall comply with all their reasonable requests, including but not limited to giving, upon request, his or her name and taxicab driver's license number and exhibiting the rate card, the required electronic or written trip record and, when the taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, if off duty produce the off-duty code receipt, and other documents required to be in his or her possession.

(b) A driver shall promptly answer and comply as directed with all questions, communications, directives and summonses from the Commission or its representatives and the NYC Department of Investigation or its representatives. A driver shall produce his or her taxicab driver's license and DMV license, required electronic or written trip records and, when the taxicab is required to be equipped with the taxicab technology system as defined in section 2-01 of this chapter, if off duty produce the off-duty code receipt, or other documents whenever the Commission requires him or her to do so.

(c) A driver shall notify the Owner and the Commission by telephone immediately, and in writing within twenty-four (24) hours, upon the discovery of any of the following with respect to the following equipment:

(1) Any taximeter other than the taximeter approved by the Commission and indicated on the rate card, has been installed in the taxicab operated by the driver;

(2) Any taximeter seal in the taxicab operated by the driver has been removed or tampered with;

(3) Any unauthorized device has been connected to the taximeter, any seal, cable connection or electrical wiring of the taxicab operated by the driver, which may affect the operation of a taximeter;

(4) Any intervening connections, splices, "Y" connections or direct or indirect interruptions or connections of any kind whatsoever have been discovered on any wiring harness attached to the taximeter in the taxicab operated by the driver.

HISTORICAL NOTE

Subd. (a), (b) amended City Record June 12, 2007 §23, eff. July 12, 2007. [See T35 §1-01 Note 3]

Subds. (a), (b) amended City Record May 11, 2005 §15, eff. June 10, 2005. [See T35 §3-03 Note 10]

Subd. (c) added City Record Jan. 31, 2000 §5, eff. Mar. 1, 2000. [See T35 §1-23 Note 1]

CASE AND ADMINISTRATIVE NOTES

¶ 1. Operation of a taxicab by the respondent, the owner and driver of the cab, with a device known as a "zapper," the purpose of which was to enable the operator to tamper with the taximeter and artificially increase the fare to be charged to customers, constituted a violation of this section, as well as §§1-23, 1-60(b), 1-67(a), 2-26(d), 2-30(a), 2-31(a) and 2-61(a), the penalty for which was revocation of the respondent's hack license and forced sale of his medallion. Taxi and Limousine Commission v. Malek, OATH Index No. 1540/97 (Aug. 5, 1997).

¶ 2. Respondent was found to have failed to appear at a Commission hearing despite having received adequate notice of the hearing. Respondent's license was suspended after his default at the Commission hearing. Petitioner's proof of service showed notice was "unclaimed." Address to which notice was sent was the same address as multiple other notices, which respondent acknowledged receiving. **Taxi and Limousine Comm'n v. Shah**, OATH Index No. 514/99 (Jan. 27, 1999).

¶ 3. Taxicab drivers are required to comply with directives from the Commission and its representatives. Driver was found to have failed to comply with a directive to provide certain documents regarding a small claims judgment. The penalty for a proven violation of this rule is a $200 fine and license suspension until driver complies with directive. Suspension until compliance, without fine, is imposed where Commission requested only that sanction. **Taxi & Limousine Comm'n v. Hussain**, OATH Index No. 1297/08 (Jan. 11, 2008).

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-70 Program for Persistent Violators of Taxicab Drivers Rules (effective date, October 15, 1989).

(a) Any driver who has been found guilty of three or more violations that occurred within a fifteen month period and whose license has not been revoked shall be required to attend a remedial or refresher course and will accumulate one point on his taxicab driver's license. Any driver who does not complete such course upon notification by the Commission shall have his license suspended until compliance.

(b) Any driver who has accumulated six or more points against his taxicab driver's license within a fifteen month period and whose license has not been revoked shall have his license suspended for thirty days.

(c) Any driver who has accumulated ten or more points against his taxicab driver's license within a fifteen month period shall have his license revoked.

(d) For the purposes of subdivisions (a) through (c) of this section, a driver who has been found guilty of multiple violations arising from a single incident shall be deemed guilty of the single violation with the highest point total for purposes of this section.

(e) The minimum penalties set forth in subdivisions (a) through (c) of this section shall not preclude the imposition by the Commission of additional or more severe penalties in accordance with Rules of the Commission.

(f) The penalties set forth herein will be imposed following the hearing where the driver has been found in violation of rules that bring his accumulated point total to the level described in subdivisions (b) and (c). Persistent violator penalties will be in addition to those penalties imposed for the underlying rule violations.

(g) Rule violations that occurred prior to July 26, 1998 will not be deemed to have any point value for the purpose of imposing any persistent violator penalty under this section.

(h) The Schedule of Points is as follows:

Rule No.	Points	Reference Description
§2-12(a)	2	Operating a taxicab while taxi driver license is revoked, suspended or expired
§2-12(b)	2	Operating a taxicab without a valid class 1, 2, 3, or 4, or equivalent state driver license
§2-12(c)	1	Failure to surrender taxi driver license
§2-13(a)	3	Applying for or possession of more than one taxi driver license
§2-15(a)	1	Altered or mutilated taxi driver license
§2-17(a)	3	Operating an unlicensed vehicle
§2-21(a)	4	Reckless driving
§2-21(b)(3)		Hazardous moving violations as follows:
		Speeding:
§2-21(b)(3)(i)	3	1 to 10 miles above posted speed limit
	4	11 to 20 miles above posted speed limit
	5	21 to 30 miles above posted speed limit
	6	31 to 40 miles above posted speed limit
	8	41 or more miles above speed limit
§2-21(b)(3)(ii)	5	Failing to stop for school bus
§2-21(b)(3)(iii)	4	Following too closely
§2-21(b)(3)(iv)	4	Inadequate brakes (own vehicle)
§2-21(b)(3)(v)	2	Inadequate brakes (employer's vehicle)
§2-21(b)(3)(vi)	3	Failing to yield right of way
§2-21(b)(3)(vii)	3	Traffic signal violation
§2-21(b)(3)(viii)	3	Stop sign violation
§2-21(b)(3)(ix)	3	Yield sign violation
§2-21(b)(3)(x)	3	Railroad crossing violation
§2-21(b)(3)(xi)	3	Improper passing
§2-21(b)(3)(xii)	3	Unsafe lane change
§2-21(b)(3)(xiii)	3	Driving left of center
§2-21(b)(3)(xiv)	3	Driving in wrong direction
§2-21(b)(3)(xv)	3	Leaving scene of an accident involving property damage or injury to animal
§2-21(c)	3	Failure to stop after an accident
§2-21(d)	3	Failure to report accident to owner
§2-23(a)	1	Operation for more than 12 consecutive hours
§2-24(a)(1)	1	Driver's name not on rate card
§2-24(a)(2)	1	Vehicle operated by unspecified driver
§2-24(b)	2	Improper sublease
§2-25(e)	2	Locking rear doors while on duty
§2-25(g)	5	Permitting operation by unlicensed driver
§2-25(h)	3	Use of portable or hands-free electronic device while operating taxicab; first offense or second offense committed within any 15-month period
	4	Use of portable or hands-free electronic device while operating taxicab; third offense committed within any 15-month period
§2-26(d)	1	Operating taxicab with unauthorized equipment
§2-27(a)(2)	2	Operating a taxicab without taxi driver license in the display frame
§2-27(a)(3)	1	Operating a taxicab without a rate card
§2-30(a)	2	Operating taxicab with broken meter seals, or with unauthorized meter

§2-30(c)	1	Rooflight not illuminated
§2-31(a)	3	Operating with taximeter seals broken
§2-31(b)	3	Tampering with taximeter or equipment
§2-31(c)	3	Tampering with rooflight
§2-32(a)	1	Failure to follow prescribed procedure when taximeter becomes defective during a trip
§2-33(a)	1	Improper operation of rooflight
§2-33(c)	1	Improper operation of rooflight after passenger leaves taxicab
§2-34(b)	2	Collection of separate fares from individuals sharing a taxicab ride
§2-34(c)	2	Failure to give correct change
§2-35(a)(1-4)	2	Violation of rules applicable to trips beyond the limits of New York City
§2-35(b)(2)	2	Failure to inform a passenger of the rate of fare before the start of trips beyond the limits of New York City, or to inform a passenger when the taxi crosses the City limit
§2-42(a)	2	Discourteousness to passengers
§2-43(c)	2	Picking up additional passengers
§2-45(a)	2	Not using shortest reasonable route
§2-45(b)	2	Not complying with request to change destination
§2-46(a)	1	Failure to comply with a reasonable request from a passenger
§2-46(b)	1	Failure to give passenger a receipt
§2-52(a-b)	1	Abuse of procedure to go "OFF DUTY"
§2-53(a)	1	Abuses while "OFF DUTY"
§2-54(a)	1	Soliciting
§2-54(c)	3	Soliciting passenger by giving misleading information
§2-55(a)	1	Soliciting near bus stop
§2-55(c)(1-4)	1	Soliciting at airports, near taxi stand, et al.
§2-60(a)	3	Harassment
§2-60(b)	4	Physical abuse
§2-61(a)(1)	4	Fraud or larceny
§2-61(a)(2)	3	Action against the best interests of the public
§2-61(b)	3	Using taxicab for any unlawful purpose
§2-61(c)	3	Concealing evidence of a crime
§2-61(d)	3	Failure to report attempt to use taxi to commit crime
§2-62(b)	3	Failure to report request for gift/gratuity
§2-63(a)	3	Failure to notify TLC of criminal conviction
§2-66(a)	2	Failure to cooperate with law enforcement officials
§2-66(b)	2	Failure to comply with Commission request

(i) Any licensee who voluntarily attends and satisfactorily completes a remedial or refresher course approved by the Commission and who furnishes the Commission with proof that the course was completed on or before August 31, 1999, shall have two (2) points deducted from the total number of points assessed for the purpose of determining any suspension or revocation pursuant to this Rule. No point reduction shall affect any suspension or revocation action which may be taken pursuant to these Rules prior to the completion of the course; and no person shall receive a point reduction unless attendance at the course is voluntary on the part of the licensee.

(j) Any licensee who voluntarily attends and satisfactorily completes a remedial or refresher course approved by the Commission, and who furnishes the Commission with proof that the course was completed on or after September 1, 1999, shall have two (2) points deducted from the total number of points assessed pursuant to this Rule. No point reduction shall affect any suspension or revocation action which may be taken pursuant to these Rules prior to the completion of the course. No person shall receive a point reduction pursuant to this subdivision more than once in any five year period.

(k) It shall be an affirmative defense that the act which formed the basis for the violation was beyond the control and influence of the taxicab driver.

NOTE

1. Statement of Basis and Purpose in City Record June 26, 1998:

The rules promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under Section 2303(a) of the New York City Charter, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in New York City; under Section 2303(b)(2) of such Charter, which empowers the TLC to establish standards for service and safety under Section 2303(b)(13) of such Charter, which empowers the TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under Section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The rules amend and reconstitute the TLC's Persistent Violator Program, replacing the current system where Taxicab Driver rule violations are assigned a class number with a point system. Also, a Persistent Violator Program with a similar point system is established for for-hire vehicle drivers.

The Commission currently has a Persistent Violator Program in place which imposes progressive penalties upon taxicab drivers who chronically violate Commission rules. The amendment simplifies the process by establishing a point system for certain rule violations. The most serious offenses are assigned the highest number of points. Some offenses are assigned no points; however, a driver convicted of any three rule violations within an 18 month period will be assigned one additional point. This new program identifies problem taxicab drivers more expeditiously, and unsafe drivers will be promptly suspended or removed from the industry. The Commission currently utilizes a cumbersome review process that involves classifying rule violations and counting the different classes of violations to determine if any of the six combinations of rule violations have been met. This process is administratively difficult to monitor and control. Hearings are then conducted in which an Administrative Law Judge reviews the accuracy of Commission records.

It is equally important to identify for-hire vehicle drivers who chronically violate Commission rules. The Commission, by adding a point based "Persistent Violator Program" to the For Hire Vehicle Rules, will be able to promptly identify and discipline problematic drivers.

2. Statement of Basis and Purpose in City Record Oct. 21, 1998: The rules promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under Section 2303(a) of the New York City Charter, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in New York City; under Section 2303(b)(2) of such Charter, which authorizes the TLC to establish standards for service and safety under Section 2303(b)(13) of such Charter, which authorizes the TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under Section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. On May 28, 1998, the TLC adopted changes to its rules which amended and reconstituted the TLC's Persistent Violator Program, replacing the system where taxicab driver rule violations are assigned a class number with a point system. In addition, a Persistent Violator Program with a similar point system was established for for-hire vehicle drivers. This amendment makes certain technical changes to the numbering of several rules. As part of the TLC Reforms adopted on May 28, 1998 by the Commission, certain traffic offenses were defined as hazardous moving violations and renumbered. These violations were assigned points pursuant to the Persistent Violator Program. For the purpose of clarity, the rule sections assigning points under the Persistent Violators Program are renumbered to conform to the changes in the hazardous moving violation sections.

CASE AND ADMINISTRATIVE NOTES

¶ 1. The constitutionality of Sec. 2-70, which relates to points to be assigned to taxicab drivers for violations of proscribed conduct, has been upheld as a valid exercise of the police power. United Car & Limousine Foundation, Inc. v. New York City Taxi and Limousine Comm., 680 N.Y.S.2d 814 (Sup.Ct. New York Co. 1998).

¶ 2. Where a taxi driver accumulates 8 points within an 18 month period, suspension of the driver's license is mandatory, and the Taxi and Limousine Commission does not have discretion to impose a lesser penalty. Muscadi v. McGrath-McKechnie, N.Y.L.J., Dec. 20, 1999, page 33, col. 1 (Sup.Ct. Queens Co.).

Section added City Record June 26, 1992 eff. July 26, 1992.

Subd. (c) amended City Record Mar. 29, 1996 eff. Apr. 30, 1996. [See Note 1]

Subd. (e) amended City Record Mar. 29, 1996 eff. Apr. 30, 1996. [See Note 1]

Subd. (e) amended City Record May 15, 1995 §2, eff. June 19, 1995. [See T35 §1-85 Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Mar. 29, 1996:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

The adopted regulations shorten the amount of notice required to be given for hearings on summonses written to drivers for traffic violations. The 15 day notice of hearing remains in effect for all other violations.

The purpose of the adopted regulations is to rapidly respond to public safety concerns. Drivers who are accused of driving in an unsafe manner could be dealt with in a speedy fashion. Timely response is an important element in the deterrence of misconduct.

Based on public comments, the proposal was revised to require five business days prior notice, rather than calendar days. This provides at least two additional days of prior notice. The rule was then clarified to specify as to other violations that calendar days will be counted, as at present. In addition, the rule allows respondents in this instance to adjourn the hearing up until the date of the hearing in order to provide ample opportunity to obtain counsel.

NOTE

1. Statement of Basis and Purpose in City Record Dec. 1, 1999:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under Section 2303(a) of the Charter of the City of New York, authorizing the TLC to regulate and supervise the business and industry of the transportation of persons by licensed vehicles for-hire in the city; under Section 2303(b) of such Charter, authorizing the TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under Section 19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter; and under Section 19-506 of said Code, authorizing the Commission to impose penalties for violation of Commission Rules.

The rules promulgated herein amend the penalties for violation of various rules requiring licensees to comply with TLC directives, such as appearing at the TLC Adjudications Tribunal to answer summonses. The present range of fines are replaced with a set fine of $200. The current range of fines for these Rule violations are: from $75 to $350 for medallion taxicab owners, taxicab drivers, and commuter van operators; from $100 to $250 for for-hire vehicle licensees; and from $50 to $150 for Paratransit Vehicle Owners or Drivers. In addition, the penalty will continue to include suspension of a TLC license until compliance with TLC directives or until the respondent has answered the TLC summons.

These rule violations are cited when a licensee has failed to appear for a scheduled hearing or has failed to comply with a Commission request to supply information, such as a trip sheet, insurance or accident information, or the identity of a driver involved in an incident. Many of these requests directly impact upon passenger safety (such as requests made to an owner to identify a driver involved in an incident). A summons is issued in order to penalize the respondent for non-compliance and to compel the respondent to cooperate with the TLC. The respondent's license is then suspended until the summons is answered either through providing the required information, or in the case of a hearing default, payment of the fine or the filing of a motion to vacate the default.

The Commission is increasing the penalty for these rule violations in order to deter respondents from engaging in this type of misconduct. For example, during 1997, 497 summons were issued to medallion taxicab drivers, 2,947 summons were issued to medallion taxicab owners and approximately 55 summonses were issued to FHV licensees for failure to comply with TLC communications. These statistics do not include charges for failure to appear for a hearing at the TLC Adjudications Tribunal. During 1997 and 1998, approximately twenty (20%) percent of all respondents failed to appear for their scheduled hearings. In most cases, a fine of $75 was imposed upon an adjudication of guilt. By substantially increasing the penalty, the Commission anticipates increased compliance with Commission directives and communications, as well as an increased rate of appearances at hearings.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 2 TAXICAB DRIVERS RULES

§2-87 Penalties Mandated by Local Law.

The following penalties shall apply to those violations committed on or after February 15, 1990.

(a) (1) Any driver who has been found to have violated a provision of §§2-34(a), 2-50(a), 2-50(b), 2-50(c) and 2-50(d) or any combination thereof, shall be fined not less than $200.00 nor more than $350.00. Any driver who has been found in violation of any of the provisions of such rules or any combination thereof, for a second time within a twenty-four month period, shall be fined not less than $350.00 nor more than $500.00, and the Commission may suspend the driver's license of such driver for a period not to exceed thirty days. The Commission shall revoke the driver's license of any driver who has been found to have violated any of the provisions of §§2-34(a), 2-50(a), 2-50(b), 2-50(c) and 2-50(d) or any combination thereof, three times within a thirty-six month period.

Nothing contained herein shall limit or restrict any other authority the Commission may have to suspend or revoke a driver's license.

(2) Notwithstanding the provisions of paragraph (a)(1) above, the Commission shall revoke the driver's license of any person found to have violated §2-34(a) by charging or attempting to charge a fare of ten dollars or more above the approved rate of fare for taxicabs.

(b) The twenty-four and thirty-six month periods referred to above are to be calculated with reference to the dates the violations occurred. The period begins to run from the date of the first violation. No violation committed prior to February 15, 1988 shall be counted as a prior violation.

(c) The Commission shall not issue any license to any person, who has had his taxicab driver's license revoked pursuant to §§2-34(a), 2-50(a), 2-50(b), 2-50(c) and 2-50(d) for a period of one year from the date of such revocation.

35 RCNY 3-01

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 3 TAXICAB SPECIFICATIONS

§3-01 Vehicle Hack-Up and Vehicle Transfer.

(a) "Hack-up" means to outfit a vehicle as a taxicab and obtain approval from the Commission for that vehicle to serve as a taxicab, for the first time. Hack-up requires compliance with:

(1) all specifications, outfitting requirements, and other requirements of Rule 3-03;

(2) all vehicle inspection requirements;

(3) all insurance requirements, meter and meter testing requirements, marking specifications, and other requirements of the Owner's Rules, as set forth in Chapter 1 of these Rules; and

(4) the requirements concerning a vehicle's age, as set forth in subdivisions (b) and (c) of this section.

(b) Except as otherwise provided in subsection 3-01 (c)*1 a vehicle may be hacked-up only if it is a new vehicle that meets all of the following requirements:

(1) It is purchased in the first sale from a licensed dealer or a manufacturer. An original of the manufacturer's certificate of origin (MSO) or of the certificate of title must be submitted, in addition to relevant documents of ownership.

(2) The vehicle must be of the latest model year available from the manufacturer or of the model year immediately preceding the latest. When a manufacturer ceases production of a model, then vehicles of the last two model years may only be hacked-up until September 30 of the calendar year two years subsequent to the designated model year. (For

example, if Chevrolet ceases production of the Caprice after the 1996 model, then a new vehicle of the 1996 Chevrolet Caprice may only be hacked-up until September 30, 1998.)

(3) The vehicle must have accumulated fewer than 500 miles traveled, at the time of hack-up.

(c) Upon hack-up, a vehicle may continue in service with the same medallion, so long as the vehicle passes inspection and has not yet met its retirement date, as specified in Rule 3-02.

(d) A vehicle that was hacked-up pursuant to subdivision (b) may be transferred to another medallion, with the approval of the Commission, only if the vehicle passes inspection, has not yet met its retirement date as specified in Rule 3-02, and meets the requirements of either subsection (1), (2), (3), or (4).

(1) **Repossessions.** The title owner at the time of transfer of the vehicle to another medallion has acquired the vehicle pursuant to a repossession sale by the previous owner's purchase money lender, and the repossession occurs within twenty-four months of hack-up.

(2) **Long-term drivers.** The title owner at the time of transfer of the vehicle to another medallion was a long-term driver of the vehicle, as defined in Rule 1-01, for at least five months of its operation under the previous medallion and will be a long-term driver under the new medallion.

(3) **Same medallion owner or agent.** The owner of the medallion or the owner's agent transfers the vehicle to another medallion operated by the same owner or agent.

(4) **Compressed natural gas vehicle.** The owner of a medallion or the owner's agent may transfer a vehicle fueled by Compressed Natural Gas to any other medallion owner or owner's agent.

(e) Upon inspecting a vehicle to authorize its transfer to another medallion pursuant to subdivision (f) (a "re-hack"), the Commission may charge an inspection fee of $50 as well as a $25 fee pursuant to Rule 1-06.

(f) Notwithstanding the foregoing, an Independent Taxicab Owner or a long-term driver, who is also the owner of a vehicle may apply to the Chairperson or his/her designee for an extension of the scheduled retirement date of said vehicle, for a period not to exceed twelve (12) months from the original retirement date. Such application shall comply with each of the following conditions:

(1) The vehicle owner shall submit a request in writing, together with any supporting documentation, to the Chairperson or his/her designee, at least thirty (30) days prior to the scheduled retirement date. This thirty (30) day requirement may be waived by the Chairperson or his/her designee upon a showing of a significant change in the vehicle owner's circumstances that occurred within thirty (30) days of the scheduled retirement date, or for other good cause demonstrated to the Chairperson.

(2) The vehicle owner must demonstrate an economic or other personal hardship which the Chairperson or his/her designee determines would create an undue burden upon the owner if the extension were not granted.

The Chairperson, or his/her designee, may grant an extension of up to twelve months from the original retirement date. The vehicle must continue to meet all safety and emissions requirements of the Commission. The Chairperson or his/her designee shall withdraw any such extension granted in the event the subject vehicle is determined by the Commission at any time to be unsafe for operation.

NOTE

1. Statement of Basis and Purpose in City Record Jan. 29, 2002:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York ("Charter"), empowering the TLC to regulate and supervise the business and industry of transporting passengers by licensed vehicles for-hire in the City; under §2303(b) of such Charter, authorizing the TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under §2303(b)(6) of such Charter, authorizing the TLC to establish requirements for safety, design and comfort of vehicles; and under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter.

The existing vehicle retirement rules, adopted by the Commission for vehicles placed in service after March 1, 1996, require that taxicabs be retired within thirty-six (36) months of hack-up if double-shifted and not driven exclusively by long-term drivers, and within sixty (60) months if not double-shifted, or if driven exclusively by long-term drivers. This regulation grants to the Chairperson of the TLC, or his/her designee the discretion to extend the time for which an Independent Taxicab Owner (defined in the Rules of the Commission as an individual, partnership or corporation owning one taxicab), or long-term driver who is also the owner of the vehicle (commonly referred to as a driver-owned vehicle, or "DOV"), may operate his vehicle, for up to twelve (12) months.

The purpose of the vehicle retirement provisions is to ensure public safety by requiring the regular replacement of taxicabs. Vehicles that are operated by Independent Taxicab Owners or by individuals who own their vehicles, but lease their medallions, are generally safer and better maintained than vehicles owned by fleets or minifleets, since these owner/operators have a direct, personal financial interest in the operation of the vehicle. In most cases, the owner drives the vehicle regularly. In addition, many of these vehicles are not double-shifted; fleets and minifleets must double-shift their vehicles. Under this rule, vehicles owned and operated by either Independent Taxicab Owners or long-term drivers become eligible for an additional period of time in which they may operate their vehicle (up to twelve (12) months).

Such vehicles must nonetheless continue to meet all TLC safety and emissions requirements and pass required inspections in order to remain in service.

In order to be considered for this extension the vehicle owner must make a written request to the Chairperson or his/her designee not less than thirty (30) days prior to the scheduled vehicle retirement date. This requirement may be waived for good cause by the Chairperson. The owner must demonstrate a **bona fide** economic or other personal hardship that would create an undue hardship upon the owner if the extension were not granted. If an extension is granted, the owner must continue to pass regular inspections; the Commission also reserves the right to withdraw the extension if the continued operation of the vehicle would create a safety risk to the public.

The Commission also repeals the provision in its rules that permit owners who demonstrate the existence of a unique, unforeseen and unforeseeable hardship to hack-up a vehicle that is up to two model years old. The creation of the new hardship extension permitted by this Rule proposal renders the existing provision obsolete.

This promulgation differs from the original Rule proposal published in the **City Record** on March 23, 2001. A provision requiring that the vehicle has passed each of its previous three inspections without any intervening failures was deleted, since that provision would have disqualified vehicle owners who failed initial inspections for minor defects unrelated to passenger safety and which were subsequently corrected. This change to the previous draft of the Rule was made in response to comments received by the Commission at a public hearing held on April 26, 2001. In addition, the original rule proposal was applicable exclusively to Independent Taxicab Owners. As revised, this rule would also enable long-term owner-drivers, who own their own vehicles but lease the medallion, to also apply for this exemption upon a showing of an economic or other hardship. Like Independent Taxicab Owners, these individuals have a personal interest in maintaining their vehicles safely.

Since the World Trade Center disaster of September 11, 2001, the Commission has received reports for each segment of the for-hire industries it regulates, including the medallion taxicab industry, that there is a decline in the number of passengers transported and revenues received by licensees. Many taxicab and vehicle owners report that their vehicles are being driven fewer miles, and that revenues are declining. Requiring such owners to purchase a new vehicle at this time could create a serious economic hardship, and owners who could demonstrate the existence of such a hardship could apply for a retirement extension. The enactment of this Rule proposal will provide needed financial relief to eligible Independent Taxicab Owners and "DOVs" without compromising public safety.

2. Statement of Basis and Purpose in City Record June 1, 2000: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the City; under §2303(b)(6) of such Charter, which authorizes TLC to set standards for the safety, design, comfort and convenience of vehicles; under §2303(b)(11) of such Charter, which authorizes the TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter; and under §19-503(a) of the Administrative Code of the City of New York, which authorizes the Commission to promulgate rules to further the objectives of the Charter and the Administrative Code. This Rule amends the taxicab specifications that permit the transfer of a vehicle that was previously hacked-up pursuant to TLC rules, to another medallion. On December 16, 1999, the TLC held a public hearing to review the effectiveness of the current CNG vehicle program, which combines incentives, such as special vehicle retirement rules applicable to CNG vehicles, as well as mandates, such as the requirement, since repealed, that fleet maintained Stand-By Vehicles (SBVs) be fueled by CNG. The TLC heard testimony and received written comments from the taxicab industry which indicated that there were problems associated with the CNG program, including the lack of a sufficient number of twenty-four (24) hour fueling sites, the lack of sites in locations near taxicab garages, the extensive amount of time needed to re-fuel CNG vehicles, cost and maintenance issues relating to the vehicles, and the unwillingness of taxicab drivers to lease such vehicles because of the additional time needed to fuel the vehicles. Other persons provided testimony in favor of the CNG program, noting the positive impact such a program has upon the environment. After review of the testimony, the TLC voted to repeal the mandatory CNG vehicle usage for SBVs, while retaining existing provisions in the Rules encouraging the voluntary

use of CNG-powered vehicles. The TLC hereby amends the taxicab specifications to encourage continued voluntary usage of CNG vehicles. The TLC, from a policy standpoint, is committed to encouraging and promoting the voluntary use of CNG vehicles by its licensees. This Rule permits existing owners of vehicles fueled by CNG, which were originally hacked-up as new vehicles, to transfer these vehicles from one medallion owner to another, so long as the vehicle passes the required TLC inspection and meets vehicle retirement requirements. Generally, a medallion owner is required to "hack-up", or equip for service as a taxicab, only new vehicles. Exceptions presently exist in cases where the vehicle is repossessed by a lender, or is being transferred from one medallion operated by an owner or agent to another medallion owned by the same owner or agent. Under this amendment, a vehicle fueled by CNG could be transferred from one medallion owner to another, notwithstanding the fact that the vehicle does not otherwise qualify for a new vehicle "hack-up". This Rule would encourage the use of vehicles fueled by CNG since they could be sold or otherwise transferred to another taxicab owner or agent whose facilities might be more accessible to CNG fueling stations.

3. Statement of Basis and Purpose in City Record Jan. 30, 1996: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The new car requirement. The regulation will require that only new vehicles could be put into service as taxicabs. That would be a substantial change from current requirements, which permit used cars up to two years old to be put into service as taxicabs. The regulation will reduce the average age of the taxicab rolling stock in service in New York City. A higher prevalence of new cars would improve taxi service by providing a more comfortable ride, a safer trip, and lower emissions. These improvements reflect the better condition of a new vehicle as compared to a used car, and the improved emissions control systems of new cars. The Commission has documented that new cars in taxicab service pass the TLC inspections much more readily than the used cars now in operation. New cars also have significantly fewer failures of the emissions and the brake tests that are among the most important components of the inspection. The taxicab rolling stock has aged appreciably over the last several years. Taxicab owners have held onto their vehicles longer, making progressively more expensive repairs rather than retiring a vehicle. When they replace a vehicle, they may buy a used car rather than a new car. These make-do measures may be more expensive in the long run, but they may provide better cash flow to owners in the short run. Owners have felt the financial constraints of six years without a fare increase, and without a growth in ridership. They have maximized short run cash flow to the extent permitted by Commission rules. The result is a perceptible decline in taxicab service due to declining vehicle quality. A higher incidence of new vehicles will reduce the strain on the Commission's inspection facility; the strain has been caused in part by the higher failure rate for older cars and their consequent reinspection after further repairs by the owner. The original proposal was revised to clarify the provisions in Section 3-02(b)(2) concerning the Chevrolet Caprice. Additional time was provided to permit Chevrolet dealers to locate unsold Caprices and offer those cars to the New York City taxicab market. The vehicle retirement requirement. The regulation requires that vehicles be replaced after certain lengths of time in service as taxicabs. They would be retired regardless of whether they could still pass inspection. This proposal is a substantial change from the current rules, which permit a vehicle to remain in taxicab service so long at it can pass inspection. The purpose is to reduce the age of the taxicab rolling stock. A lower average age of vehicles would improve taxi service by providing a more comfortable ride, a safer trip, and lower emissions. These improvements reflect the better condition of newer vehicles, and the improved emissions control systems of newer cars. The improvements would be all the more striking, as vehicles that are retired would be replaced by completely new vehicles. Under the new regulation, a vehicle must be retired upon its retirement date, even if the vehicle would pass inspection. The inspection requirements set a minimum standard for vehicles. A vehicle retirement policy reaches beyond the "good enough" standard of passing inspection to reach a standard of excellence. A vehicle that cannot pass inspection must be retired, regardless of whether the retirement date has been reached. **Factors determining retirement** Retirement dates would depend on the following factors: - whether the vehicle is double-shifted or single-shifted. - whether or not the vehicle is driven by the owner of the medallion or vehicle. - participation in a pilot program using compressed natural gas as fuel - for vehicles currently in service, the model year

of the vehicle. - for vehicles currently in service, the inspection history of the vehicle in 1995. - for future vehicles, the number of months in service. **Double-shifted vehicles** All minifleet medallions are required to be double-shifted. Numerous independent medallions are also double-shifted; they are owned by persons who acquired the medallion prior to 1990. (In 1990, the Commission required that new owners of independent medallions must drive the taxicab themselves.) The new requirement for future vehicles is that double-shifted vehicles that are not owned by the driver must be retired within 36 months. This is a longer period than the 30 months first proposed; the six-month extension is intended to provide more time to amortize the expense of a new vehicle, based on numerous comments that the original proposal was too demanding financially. The six-month extension is 20% longer than the originally proposed period. The 36-month requirement would apply particularly to the fleets which own their vehicles and hire drivers on a daily shift basis. Some speakers commented that insomuch as several fleets retire their vehicles after 23 months, at present, this new requirement would work to extend the operation of heavily-used, double-shifted vehicles. They also commented that the proposal imposes no restriction upon the fleets. However, the fleets at present resell the vehicles to other taxicab operators, who hack-up the vehicle within the Commission's present 24 month limit on the age of vehicles at hack-up. The used taxicab, which was double-shifted for nearly two years, then re-enters the rolling stock of the industry and continues to operate for years to come. By retiring double-shifted vehicles after 36 months, the new requirement would in most cases shorten the period of use of heavily double-shifted vehicles. In reducing the resale market for used, fleet taxicabs, the requirement removes a considerable source of revenue from fleet operations. Numerous speakers have commented that a vehicle that is driven by the owner of the vehicle or the medallion is better operated than other vehicles. In respect of this widely and strongly held judgment, the Commission has provided an additional 12 months prior to retirement for those double-shifted vehicles that are driven by the owner. Their retirement date is 48 months. **A good inspection record** Numerous speakers also commented that medallion or vehicle owners who take good care of their cars deserve a longer period before vehicle retirement. In recognition that there is a wide disparity in maintenance and upkeep of vehicles, the Commission has modified the proposal, to provide an additional twelve months of operation to owners who had excellent inspection records in 1995. This record is defined as passing each of the three inspections conducted by TLC in 1995, on the first try, with no reinspection. The industry average is failure at 71% of initial inspections. This is a "grandfather" provision applicable to vehicles on the streets as taxicabs in 1995. It extends the period that current owners with excellent records utilize their current vehicles. There is no attempt to apply the concept to future inspections, out of concern that to do so would raise the stakes too much in TLC vehicle inspections. All parties would know that a discretionary failure on a relatively minor item could have serious financial repercussions for the owner. That situation would be hazardous to the integrity of the process. **CNG fuel** The proposal has been modified to extend the retirement date for certain CNG-fueled vehicles to 60 months, from the originally proposed 48 months. This is intended to preserve the incentive to participate in the CNG program, as the retirement date for gasoline-fueled vehicles is also extended. Retirement of future vehicles For double-shifted vehicles hacked up as taxicabs on or after March 1, 1996, which are not driven by the owner of the medallion or vehicle, the retirement date will begin thirty-six months after hack-up. Retirement will take place no later than the next regularly-scheduled, thrice-annual inspection of the vehicle by the Commission. To inspect each vehicle three times a year, the Commission has a four-month inspection cycle. A vehicle is inspected on a scheduled date within the cycle. The retirement date will average thirty-eight months from hack-up, and may extend as long as forty months, to reach the scheduled inspection date. For single-shifted vehicles driven by the owner of the vehicle or medallion, and hacked up on or after March 1, 1996, the retirement date will begin sixty months after hack-up. The retirement date will average sixty-two months from hack-up, and may extend as long as sixty-four months, to reach the scheduled inspection date. The Commission is currently encouraging taxicab operators to participate in a test of taxicabs powered exclusively by compressed natural gas (CNG). There is some reluctance to operate a vehicle which has relatively few refueling stations. The proposed rule would provide double-shifted, CNG-powered vehicles with a later retirement date, to offer longer utilization of CNG vehicles. That provides a business advantage of participating in the natural gas test. The enhanced usefulness of a vehicle that is participating in the test is the justification for providing a longer retirement date for double-shifted vehicles. The retirement date is not extended for independent medallions, because the sixty month retirement date is considered long enough, and because the CNG test focuses particularly on double-shifted vehicles, which are used so much more intensively and would provide quicker test results. Retirement of vehicles currently in operation as taxicabs. Vehicles in taxicab service as of March 1, 1996 would be retired according to their model year. That is a simpler

measure than ascertaining and applying the hack-up dates of nearly 12,000 cars. The retirement dates which the proposal would permit for current taxicabs extend longer than would be permitted for cars hacked-up after March 1, 1996. One reason for this provision is that a high percentage of the current rolling stock are old vehicles. Most would have to be replaced at once, if the retirement rates for future taxicabs were applied to current taxicabs. The new regulation does not require any vehicle to be retired before November 1, 1996. The purposes of this provision are:

to provide ample advance notice to owners that their vehicles must be replaced with new vehicles, so that they may plan financially for the change; and to provide time for the experiment with standard sedans and minivans (as described below) to proceed and be evaluated in a report of the Chairman, which would be due no later than July 31, 1996. That report would give owners information to help them choose a vehicle.

Beginning on November 1, 1996, all vehicles of model year 1992 or prior model years must be retired at their next scheduled inspection. Double-shifted taxicabs which are not driven by the owner would be replaced with new cars between November 1, 1996 and February 28, 1997. Taxicabs which are single-shifted or which are driven only by an owner of the medallion or vehicle would be replaced with new cars between April 1 and July 31, 1997. A vehicle of model year 1992 may have been purchased in the fall of 1991, and could have been in taxicab service for five years as of the fall of 1996. Earlier models of course may have been in taxi service longer. The number of vehicles which must be retired between November 1, 1996 and August 1, 1997 is quite large. Commission records indicate that some 4,000 vehicles now in service are of model year 1990 or earlier model years. About 1,000 vehicles are in each of the model years 1991 and 1992. The six thousand oldest vehicles-more than half the current taxi rolling stock-would have to be replaced with completely new vehicles by the summer of 1997. The number of vehicles in taxicab service that are more than five years old indicates that vehicle standards must change dramatically; it also indicates that any real change in standards will be dramatic. To field 6,000 completely new taxicabs in place of 6,000 taxicabs that are at least six years old would create substantial service improvement. The new regulation permits the Chairman to extend the retirement date for certain vintage cars. In the Chairman's discretion, that may apply to the four Checker cabs still in operation, which are each more than twenty years old. The purpose is to maintain this aspect of the public's comfort and convenience. It is a rare pleasure to see or ride in a vintage taxicab. Vehicle specifications. The new regulation revises the current vehicle specifications, to simplify and update the requirements. In most respects, the specifications are unchanged; many details can be eliminated, though, because they are superfluous in light of contemporary Federal and State requirements for motor vehicles. The new regulation continues to require that only heavy duty vehicles manufactured for taxicab, police or fleet service could be put into operation as taxicabs. However, the proposal would also authorize an experiment with standard sedans and minivans that meet certain minimum standards for interior space in the passenger compartment. The Chairman has initiated such an experiment pursuant to the Chairman's authority under current rules. By publishing the specific requirements of the present experiment, under authority of the Commission, it is intended to provide clear guidelines to the taxi industry. The proposal would require the Chairman to report to the Commission concerning the experiment no later than July 31, 1996, at least three months before owners must begin to replace the oldest taxicabs now in service. Establishing a maximum horsepower for new taxicabs. The new regulation establishes a maximum of 220 horsepower, for vehicles put into operation as taxicabs for the first time on or after February 1, 1996. The purpose is to improve public safety by reducing the ability of taxicabs to accelerate rapidly. This would inhibit the pattern of accelerating until braking, by which some taxi drivers seem to drive. It would inhibit the pattern of weaving in and out of lanes of traffic through sudden acceleration, which some drivers use to move faster than the flow of traffic. These patterns of driving are believed to cause accidents, and they alarm riders. These observations are based upon the Commission's considerable experience of passenger complaints. Unsafe driving has become the most frequent passenger complaint. Inhibiting these poor driving habits will improve passenger comfort and safety. The current models of the Chevrolet Caprice and the Ford Crown Victoria are available with standard engines that meet the proposed maximum of 220 horsepower. The requirement therefore does not constrain the industry's choice among vehicle models. The present ability of the taxi industry to outfit used police cars as taxicabs has in numerous instances resulted in the hack-up of powerful pursuit vehicles that were specially equipped for law enforcement emergency action. Taxi drivers do not need the same engine power as police officers. The Commission, working with the New York Police Department, is enhancing enforcement activity against driving violations by taxi drivers. The

proposal would complement the enforcement activities. Interior space requirements. The original proposal has been modified, to restore certain minimum dimensions of leg room, head room and seat width which are found in the current regulations. Public comment established that the EPA interior volume measurement of the passenger compartment was subject to too many variables to make it a sole and sufficient criterion of passenger comfort. The minimum dimensions set forth in the new regulation are found in the current regulations, along with numerous other requirements which have been deleted. The new regulation sets the minimum interior volume at 107 cubic feet. Among the vehicles that would meet that standard are the industry workhorses, the Chevrolet Caprice and the Ford Crown Victoria. The Commission is reluctant to authorize vehicles for service that are less roomy than the Caprice and the Crown Victoria, but the expected end to manufacture of those models necessitates consideration of alternatives. Among the standard sedans that would meet the interior volume standard are the Oldsmobile 88 and 98, and the Buick LeSabre. Those models, however, have not yet been brought forward for participation in the experiment with standard vehicles. Among the vehicles that would not meet the interior volume standard are the Chevrolet Lumina taxi package (100 cubic feet), and the Chrysler Concorde fleet package (104 cubic feet). Evaluation of a Lumina currently in operation pursuant to an experiment indicated that the Lumina was too small, in the judgment of TLC staff, when outfitted with the required partition. At a public hearing on November 9, 1995, representatives of Chevrolet were encouraged by the Chairman to outfit a Lumina with a less bulky partition, for further evaluation. The Concorde has not been made available yet for testing. The proposal would authorize the Chairman to experiment with the Concorde and with the Lumina, equipped with less bulky partitions, along with other vehicles. The Honda Odyssey minivan and the Ford Explorer sport/utility vehicle are also presently participating in an experiment. They meet the new standard for interior volume. Deletion of superfluous specifications. The current specifications were established early in the 1970's. Since then, automotive standards have advanced in many respects. Standard vehicles now have federally mandated safety features which make certain TLC requirements superfluous. In actual practice, TLC has in the past approved only the "taxi package" models that provide adequate head room and leg room. The Chevrolet Caprice and the Ford Crown Victoria have for a number of years been the only qualified vehicles. Certain obsolete specifications, such as that requiring a vent window in the driver's door, have remained on the books but have not been operative. Among the other provisions proposed for deletion are: - Dimensions for sun visors and rear view mirrors; - Requiring windshield wipers to have an intermittent mode; - Detailed specifications for turn signals; and - A ban on cloth upholstery. The current specifications contain detailed provisions concerning automotive emissions, which date from 1979. Those provisions require taxicabs to be equipped with the "California emissions package." That requirement is obsolete, in view of the New York State emissions package requirements for all new vehicles to be registered in the State. The "California package" is now essentially also a "New York State package." Detailed TLC specifications as to emission packages are superfluous in this context and are therefore omitted. TLC will inspect taxicabs to enforce the applicable State standards.

4. Statement of Basis and Purpose in City Record July 1, 1996: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The rulemaking refines certain details of the Commission's recently adopted rule, which requires that vehicles must be retired after stated periods of taxi service. The rulemaking defines who would be a "driver who owns the vehicle", and thereby eligible for a longer period of vehicle operation than are other taxicab owners. The use of the term "driver owned vehicle" or "DOV" by taxicab lease managers in public discussions applies much more widely than to the number of drivers who actually hold title to taxicab vehicles. Many drivers are making installment payments to purchase the vehicle from the title holder. The title holder in many cases is an affiliate of the lease manager. The Commission's rulemaking provides drivers who are making installment payments with the extended period of vehicle operation. Under the rulemaking, the Commission will not recognize conditional sales of taxicab vehicles, under which a driver who fails to make a payment may lose all rights in a vehicle, as situations in which a driver may be said in any way "to own the vehicle". A driver with only a conditional interest in the vehicle has not been shown to take the same care with maintenance and operation of the vehicle, as does a true owner. The rulemaking extends by four months the

period of time for operation of model years 1991 and 1992 vehicles which are driven by the owners. Instead of beginning on April 1, 1997, the retirement period for those vehicles would begin on August 1, 1997. The purpose of this extension is to spread out vehicle replacement over a slightly longer period of time, to promote an orderly replacement of taxicab rolling stock. Those two model years contain a total of nearly 2,000 vehicles. The rulemaking clarifies that the option to "re-hack" a vehicle by moving it from one medallion to another, under certain procedures, is available for cars in service prior to March 1, 1996 as well as new vehicles.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 3 TAXICAB SPECIFICATIONS

§3-02 Vehicle Retirement.

(a) The following requirements shall apply to all vehicles hacked-up on or after March 1, 1996:

(1) A vehicle which is double-shifted and not driven by at least one long-term driver, as defined in §1-01 of this title, for any period of time on or after March 1, 1997, and is not in service solely as an authorized stand-by vehicle from the time the vehicle is hacked-up, must be retired from taxicab service and replaced no later than the first scheduled inspection of the vehicle occurring 36 months after the vehicle was hacked-up.

(2) All other vehicles must be retired from taxicab service and replaced no later than the first scheduled inspection of the vehicle occurring 60 months after the vehicle was hacked-up.

(3) Notwithstanding the foregoing provisions of this subdivision 3-02(a), any vehicle hacked-up on or after March 1, 1996 and before April 17, 2007 which, no later than six months after hack-up, is dedicated to operate on compressed natural gas (with a maximum reserve gas tank of five gallons) and which remains so dedicated thereafter, throughout its operation, has an extension of its retirement date by twenty-four additional months of taxicab service.

(4) Notwithstanding the foregoing provisions of this subdivision 3-02(a), the retirement date of any vehicle hacked-up on or after March 1, 1996 and before April 17, 2007, which is a minivan approved for use as a taxicab by the Commission, is extended by:

(i) twelve additional months of taxicab service if doubled-shifted and not driven by at least one long-term driver, as defined in Rule 1-01; or

(ii) eighteen additional months of taxicab service if not subject to subparagraph (i) of this paragraph. A taxicab whose retirement date has been extended in accordance with the provisions of this paragraph is not eligible for the extended vehicle lifetime provided for clean air and accessible taxicabs pursuant to paragraphs five through seven of this subdivision.

(5) Notwithstanding the foregoing provisions of this subdivision 3-02(a), the retirement date of any vehicle that is a level one or level two clean air taxicab as defined in §3-03.3 of this chapter or an accessible taxicab as defined in §3-03.2 of this chapter, and that is otherwise required under paragraph (1) of this subdivision)*2 to be retired from taxicab service and replaced no later than the first scheduled inspection of the vehicle occurring thirty-six months after the vehicle was hacked-up, is extended by twelve months.

(6) Notwithstanding the foregoing provisions of this subdivision 3-02(a), the retirement date of any vehicle that is a level one clean air taxicab as defined in §3-03.3 of this chapter or an accessible taxicab as defined in §3-03.2 of this chapter, and that is otherwise required under paragraph (2) of this subdivision to be retired from taxicab service and replaced no later than the first scheduled inspection of the vehicle occurring sixty months after the vehicle was hacked-up, is extended by twenty-four months.

(7) Notwithstanding the foregoing provisions of this subdivision 3-02(a), the retirement date of any vehicle that is a level two clean air taxicab as defined in §3-03.3 of this chapter and that is otherwise required under paragraph (2) of this subdivision to be retired from taxicab service and replaced no later than the first scheduled inspection of the vehicle occurring sixty months after the vehicle was hacked-up, is extended by twelve months.

(b) A vehicle which cannot pass inspection must be replaced, regardless of whether its retirement date has been reached. A vehicle which has reached its retirement date, including any extensions provided for in this section, must be retired, regardless of whether it may still pass inspection.

NOTE

1. Statement of Basis and Purpose in City Record May 27, 1999:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, authorizing the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the city; under §2303(b) of such Charter, authorizing the TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under §2303(b)(6) of such Charter, authorizing the TLC to establish requirements for safety, design and comfort of vehicles; and under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter.

Present vehicle retirement rules adopted by the Commission for vehicles placed in service after March 1, 1996, require that taxicabs be retired within thirty-six (36) months if double-shifted, and within sixty (60) months if not double-shifted. This regulation extends the time for which a minivan may be used in taxicab service by twelve (12) months if double-shifted, and by eighteen (18) months if not double-shifted.

The overall reaction of the public to the minivans approved by the Commission has been overwhelmingly positive. Information and correspondence from the public indicates consumer satisfaction in terms of comfort, convenience and design.

The purpose of the amendment promulgated herein is to encourage the continued purchase and use of minivans as taxicabs by reducing the cost of operation. By extending the period of time that a minivan may remain in taxicab service, the cost of ownership is reduced, thereby creating a financial incentive for taxicab owners to purchase minivans.

2. Statement of Basis and Purpose in City Record Mar. 29, 1996: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The purpose of amendments is to make several technical changes to the Taxicab Specifications adopted by the Commission on January 25, 1996. The technical changes involve the retirement of vehicles which operate on compressed natural gas. Vehicles operating on compressed natural gas may have a reserve gas tank of five gallons. In addition, 1995 and 1996 vehicles which are converted to compressed natural gas may operate until July 1, 2001.

3. Statement of Basis and Purpose in City Record Aug. 30, 1996: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed

vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The rulemaking extends the date that vehicles of 1995 and 1996 model years could be converted to operate on compressed natural gas, and receive an extension of their mandatory retirement date. This rulemaking provides an opportunity to those vehicle owners who did not take advantage of this program by the cut-off date of July 1, 1996. Such owners now have until November 1, 1996. The purpose of this rulemaking is to further encourage the use of compressed natural gas. Based upon public comment, the rule proposal was amended to allow vehicles of 1995 and 1996 model years to continue in service until July 1, 2002.

4. Statement of Basis and Purpose in City Record Nov. 22, 2006: The rule amends existing rules to provide that the vehicle retirement deadline for a stand-by vehicle is 60 months, instead of 36 months. As provided in §§1-01 and 1-59 of the rules of the Taxi and Limousine Commission (TLC), a stand-by vehicle is a vehicle that is hacked-up as a taxicab, and is used by fleets as a replacement vehicle when a taxicab is unavailable for use-for instance, due to repairs or inspection. The reason for the rulemaking is that TLC inspection data over the past several years shows that a stand-by vehicle accrues significantly less mileage and aging than a regular fleet taxicab. Therefore, a 60-month retirement deadline is more appropriate to the actual taxicab usage of a stand-by vehicle. The rule is intended to apply to stand-by vehicles that are in service as of the effective date of the rule, as well as to stand-by vehicles that are hacked-up on or after the effective date of the rule. However, only vehicles which are or have been hacked-up as a stand-by vehicle when new will be assigned a 60-month retirement deadline.

5. Statement of Basis and Purpose in City Record Mar. 16, 2007: The rulemaking amends existing taxicab specification rules to comply with Local Law 52 of 2006, by providing vehicle retirement extensions for eligible clean air and accessible taxicabs. The rule would apply to taxicabs hacked up on or after April 17, 2007, as well as clean air and accessible taxicabs in service as of that date. As mandated by Local Law 52 of 2006, the new rules create incentives for taxicab owners to use accessible and clean air taxicabs. In addition, in order to increase the value and maximize the impact of these incentives on the taxicab industry, the new rules repeal retirement extensions for other types of vehicles. The rules eliminate the extensions for CNG-powered vehicles and minivans hacked up on or after April 17, 2007. The CNG extension had been established ten years ago to encourage the use of clean air vehicles as taxicabs. The new rules are much more effective by targeting incentives based upon actual vehicle cleanliness, rather than simply fuel type. CNG vehicles currently in use as taxicabs would not qualify as Level 1 or Level 2 clean air taxicabs as defined by Local Law 52 and these new rules. The minivan extension had been established to encourage the use of a new type of vehicle as a taxicab. Minivans now make up more than ten percent of the taxicab fleet and therefore these incentives are no longer required. Finally, sections regarding taxicabs that are no longer in service would be deleted as obsolete.

6. Statement of Basis and Purpose in City Record Apr. 3, 2009: This rulemaking eliminated the requirement in TLC's rules that in order for accessible and clean air taxicabs to qualify for an additional twelve to twenty-four months, such vehicles must pass at least two of the inspections, not including reinspections, conducted at the Commission's inspection facility pursuant to §19-504 of the New York City Administrative Code during the twelve-month period immediately preceding the time at which such vehicle would otherwise be required to be retired pursuant to §3-02(a) of the TLC rules. In light of two years' experience with that rule, the TLC found that such a requirement is unnecessarily restrictive: a vehicle should not be forced into retirement because of minor inspection failures (broken headlight; seatbelt not properly affixed; etc.) that can easily be remedied for a follow-up inspection. The adopted rule does of course retain the requirement that a vehicle must pass inspections to remain on the road, regardless of its scheduled retirement date.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 3 TAXICAB SPECIFICATIONS

§3-03 Taxicab Specifications.

(a) **Applicability.**

(1) These specifications shall apply to every motor vehicle which is to be outfitted as a taxicab and approved by TLC for service; on or after March 1, 1996.

(b) **General Requirements for Review of Vehicle Models.**

(1) The taxi shall conform to all applicable federal and New York State motor vehicle standards and requirements. Such standards include: seat belts for each seating position and shoulder belts for each outboard seating position; front disk brakes; and the vehicle emissions package requirements of New York State.

(2) The sponsor, either the manufacturer or his authorized sales agent, shall certify item by item that the candidate taxi meets all criteria herein. Where minimum or maximum is specified, the actual values of the taxi candidate must be given. The sponsor shall provide the Commission with a Motor Vehicle Manufacturer Association (MVMA) specifications form; a complete listing of interior dimensions on TLC form J-303 as measured on a bona fide example of the candidate vehicle; a complete listing of heavy duty equipment for the taxi vehicle; a list indicating the significance of characters in the Vehicle Identification Number (VIN); the manufacturer's repair shop manual for each candidate vehicle; and, upon request, full size layout drawings of the candidate vehicle. The sponsor shall provide an EPA Certificate of Conformity pertaining to the candidate taxi. The sponsor shall at his own expense, submit a bona fide example of the candidate vehicle for road testing and detailed measurements by Commission personnel or their authorized agents for the purpose of making objective judgments of the candidate vehicle model's conformance to these

specifications.

(3) After a model has been approved and examples of it are in service, the TLC reserves the right to require measurements of vehicles to ensure conformity with the model specifications. The cost of all tests shall be borne by the sponsor.

(4) The sponsor shall make provisions to immediately notify the commission of any vehicle safety recalls. In addition, the sponsor shall make provisions to have the Commission placed upon the mailing list for service bulletins and recalls.

(5) The manufacturer shall provide to the Chairman information as to the location of the confidential VINs for such model, pursuant to the manufacturer's confidentiality requirements for the provision of such information to law enforcement organizations.

(6) Experimental equipment designed to exceed existing safety standards is encouraged, but the Commission's Safety and Emissions Unit shall be kept fully informed of all such projects involving New York City taxicabs from inception to completion.

(7) The TLC reserves the right to approve limited quantities of vehicles which fail any of these specific rules provided only that the sponsor's vehicle is already purpose-built for taxi service, and therefore, substantially exceeds other criteria, or in the case where the sponsor wishes to demonstrate certain outstanding virtues that deserve to be tested in actual taxi service. The TLC further reserves the right to require detail changes to make a vehicle more suitable for New York City taxi service.

(c) **Vehicle Specifications.**

(1) The vehicle shall be manufctured with heavy-duty equipment for taxicab, police or fleet service, except as provided in paragraph (7). There shall be a term in the VIN or in a body tag, which distinguishes the taxicab, police or fleet package from the standard sedan on which it is based.

(2) The vehicle shall have EPA passenger compartment interior volume index of at least 107 cubic feet.

(3) The rear compartment of any sedan approved for use as a taxicab shall meet the following dimensions as defined by the Society of Automotive Engineers:

(i) Minimum effective legroom (L51) must be at least 43 inches.

(ii) Effective headroom (H63) must be at least 37.5 inches.

(iii) The seat depth (L16) must be at least 18 inches.

(4) The front compartment of any sedan approved for use as a taxicab shall meet the following dimensions:

(i) Effective headroom (H61) must be at least 37.5 inches.

(ii) Maximum effective legroom (L34) must be at least 42 inches.

(iii) Total legroom (the sum of L34 and L51) must be at least 85 inches.

(5) The vehicle shall be equipped with a factory installed air conditioning system. If the vehicle model has available air conditioning outlets for the rear seat area, then the vehicle shall be equipped with such outlets.

(6) The vehicle may not be equipped with an engine in which the maximum horsepower exceeds 220.

(7) The vehicle may be a sedan, which meets the requirements of paragraphs 2 through 6 of this subdivision, and of paragraph (1) of subdivision (d), or a minivan which has been approved by the Chairperson after a determination that the vehicle provides adequate safety and comfort to passengers, and which also meets the requirements of paragraphs 5 and 6 of this subdivision. If the Federal government or the Commission determines that any of such vehicles must be wheelchair accessible, then such vehicles shall be wheelchair accessible to the extent of such Federal or Commission determination and requirements.

(8) All windows of the vehicle must have a light transmittance of seventy (70) percent or more, with the exception of the uppermost six (6) inches of the front windshield.

(9) Beginning on October 1, 2008, a vehicle may be fueled only by Compressed Natural Gas if such vehicle is an originally manufactured vehicle and meets with the requirements of paragraphs (5) and (6) of this subdivision.

(10) Notwithstanding the foregoing provisions of this subdivision 3-03(c), a vehicle may be hacked up as a taxicab if the vehicle is powered by diesel fuel, and the vehicle otherwise meets the vehicle specifications provided in section 3-03.1(c) of this chapter, whether or not the taxicab is a hybrid electric vehicle.

(11) Repealed.

(d) **Experimental Vehicle Specifications.** Due to the limited production plans for "taxi package" vehicles, as well as an interest in testing features of standard production vehicles, including minivans, which are not "taxi package," the Chairman may conduct an experiment with vehicles meeting the following minimum specifications. The Chairman may, at his or her discretion, limit the number of vehicles participating in the experiment. The Chairman may, at his or her discretion, waive any particular requirement, if in his judgment the experiment may demonstrate certain outstanding virtues that deserve to be tested in actual taxi service. The Chairman shall report to the Commission concerning the experiment, no later than July 31, 1996.

(1) The vehicle shall be either a full size or larger four door sedan or a minivan equipped with at least four doors. Except for vehicles which are designed to be handicapped accessible, all doors shall open outward on hinges (not sliding doors), and the vehicle must be capable of carrying three passengers seated behind the driver. Any space which would otherwise be available to seat more than three passengers shall be used instead to provide luggage space.

(2) The vehicle shall have EPA passenger compartment interior volume index of at least 107 cubic feet.

(3) If the vehicle is equipped with shock absorbers, the rear shock absorbers must be of the heavy duty variety.

(4) The vehicle shall be equipped with a factory installed air conditioning system. If the vehicle model has available air conditioning outlets for the rear seat area, then the vehicle shall be equipped with such outlets.

(5) The vehicle may not be equipped with an engine in which the maximum horsepower exceeds 220.

(e) **Vehicle Modifications for Taxicab Service.**

(1) **Paint and Finish.**

(i) The exterior shall be painted taxi yellow, except for trim. Samples of paint color and code are to be submitted to the Commission for approval.

(ii) The front of the taxi, and especially the bumper, should be designed with strong emphasis on reducing injury to pedestrians. There shall be no unnecessary projections such as rigid hood ornaments.

(iii) The vehicle shall be provided with signs in conformance with the marking specifications, §1-36 of these rules.

(2) **Roof Light, Meter and Seals.**

(i) Provision shall be made for installing and adequately wiring a roof light of approved design on top of the roof.

(ii) Suitable wiring shall be provided for a pair of auxiliary turn signal lamps to be located adjacent to the roof light. These lamps shall not be activated with the brake lights.

(iii) A taximeter approved pursuant to Rule 3-04 shall be installed in a location which facilitates the driver's operation of it and any passenger's reading of the fare without interfering with the driver's safe operation of the taxi or the passenger's safety and comfort.

(iv) The taximeter shall be sealed with tamper resistant seals. The Commission will designate the type of seal, and will apprise the industry of the required locations for each taximeter approved pursuant to §3-04 of these rules.

(v) If the vehicle is equipped with a pinion gear, such pinion gear shall be sealed. The Commission will designate the type of tamper resistant seal to prevent removal or change of the pinion gear.

(3) **Security.**

(i) An owner shall install a partition that isolates the driver from the rear seat passengers or all passengers of the vehicle, in accordance with section 1-17 of this title. The purpose of the partition shall be to provide protection to the driver while ensuring passenger safety and enabling rear seat passengers to enjoy a clear and unobstructed view of the taxicab driver's license, rate card and front windshield.

(A) The partition shall consist of a transparent portion that shall extend from the ceiling to a point, as recommended by the Chairperson and approved by the Commission, based upon the make and model of the vehicle in service, that will provide passengers and drivers with maximum visibility. The transparent portion of the partition shall be constructed of a bullet-resistant material, recommended by the Chairperson and approved by the Commission, which is also clear and scratch-resistant.

(B) A protective plate shall join the transparent portion of the partition and extend from the lowest point of the transparent portion of the partition downward to the floor of the vehicle. The plate shall be constructed of a bullet-resistant material recommended by the Chairperson and approved by the Commission.

(C) Notwithstanding the provisions of clause (A) of this subparagraph, all taxicabs, except those that are exempt pursuant to section 1-17 of this title, when an existing partition is required to be replaced or when a partition is installed (including, but not limited to, at hack-up), shall be equipped with a partition, the transparent portion of which shall be constructed, at a minimum, of a mar-resistant polycarbonate and shall be not less than 0.375 inches thick, that will provide passengers and drivers with maximum visibility.

(1) For a flat partition and a partition for a taxicab with factory installed curtain airbags, the transparent portion shall extend from the ceiling to join or overlap with the protective plate of the partition.

(2) For an L shaped partition, on the side that is behind the driver, the transparent portion of the partition shall extend from the ceiling to join or overlap with the protective plate of the partition, and on the side that extends forward to back between the two front seats, the transparent portion of the partition shall extend from the ceiling to join or overlap with the protective plate of the partition on the right side of the center console located between the two front seats.

(3) The protective plate shall join or be overlapped by the transparent portion of the partition and shall extend from the point that the protective plate joins, or if overlapped by the transparent portion of the partition, the point that would be the point of joinder with the transparent portion of the partition, downward to the floor of the taxicab. The protective

plate shall be constructed of a 0.085 inch thick plate of ballistic steel or its equivalent installed inside and covering the entire back seat rest of the front seat which is exposed to the passenger compartment and, for an L shaped partition, on the right side of center console between the two front seats.

(4) Each partition shall have sufficient padding for the entire protective plate of the partition to prevent injury to any rear-seat passenger in case of an accident or sudden stopping and all surfaces shall be free of sharp and rough edges.

(5) There shall be no opening or gap between the partition and the body of the vehicle larger than one inch, except as set forth in section 1-17(c) of this title.

(6) No partition shall be installed unless it shall have the following features which do not compromise passenger or driver safety:

(A) A means for passengers and drivers to communicate with each other.

(B) The capacity for the passenger(s) to pay fares, either by cash, or by credit card if the taxicab is capable of accepting credit card payments, and for the passenger(s) to receive receipts for payments and transactions, while the passenger is in the rear passenger compartment.

(ii) No vehicle, other than a vehicle which is exempt from the partition requirements set forth in section 1-17 of these rules, may be hacked-up unless a new partition has been installed which complies with these specifications.

(iii) An owner shall equip all taxicabs with a help or distress signaling light system in accordance with the following specifications:

(A) The help or distress signaling light system shall consist of two turn signal type "lollipop" lights.

(B) One light shall be mounted on the front center of the vehicle, either on top of the bumper or forward or behind the grill. A second light shall be mounted on top of the rear bumper, to the left of the license plate.

(C) Each light shall be three to four inches in diameter, have a total rated output of thirty-two candle power and shall be the color amber or have an amber colored lens so that the light output of the device is the color amber at thirty-two candle power.

(D) The activator shall be installed within easy reach of the driver, shall be silent when operating, and shall be fully solid-state.

(E) The lights shall flash between 60 and 120 times per minute.

(F) The wiring shall not affect or interfere directly or otherwise with any wiring or circuitry used by the meter for measuring time or distance.

(iv) A door ajar notification light shall be provided which is located in front of the driver. This light shall turn on only when any door is not fully latched.

(v) When an existing in-vehicle camera system ("IVCS") is required to be replaced or when such system is installed (including, but not limited to, at hack-up), no such system shall be installed in any taxicab unless it meets the following specifications:

(A) The IVCS shall be connected to the vehicle battery, and the fuse for such connection shall be concealed in tamper-resistant housing.

(B) Wiring between the recording unit and camera head shall use registered jack (RJ) style connectors at either end

which shall be tamper-resistant.

(C) All electrical connections and wiring shall be protected from spike and dips in vehicle voltage.

(D) The camera head housing and brackets shall be tamper-proof and securely mounted to the right of the rear view mirror. The installation shall provide unobstructed vision for the driver.

(E) The camera's field of view shall include the full face of all occupants seated in passenger seats and facing forward.

(F) Images shall be recorded and stored in a unit separate from the camera head.

(G) The recording unit shall be concealed from view and fastened securely with tamper-resistant hardware.

(H) The IVCS shall provide a visual indication of system status that is located on the lower left portion of the dashboard, and is visible to the driver and law enforcement personnel inspecting the vehicle from outside of the driver door.

(I) The IVCS and components shall be sufficiently shock-resistant to withstand typical vehicle movement and collisions.

(J) The IVCS shall have a RS-232 connection or other means for secure image retrieval.

(K) Images shall be sharp, undistorted and enable the viewer to identify all passengers under all lighting conditions; for example, but not limited to, dark and bright light, daylight and backlight.

(L) Sensor resolution shall be, at a minimum, 510 by 480 pixels.

(M) Storage capacity shall be, at a minimum, 7000 images in an encrypted format, and all access to the storage unit shall result in the storage of an electronic "tag" including the installer identification number and date of the event.

(N) The IVCS shall have connection ports for a minimum of two (2) cameras.

(O) The IVCS shall have an event flag or panic button accessible to driver and located in an inconspicuous location.

(P) The IVCS shall record images and the following information for each image:

(a) Date and time;

(b) Taxicab medallion number;

(c) IVCS serial number; and

(d) IVCS indicator for event flags.

(Q) Image capture shall be linked to the following events: vehicle door openings and closings, meter engagement, event flag button activation and event flag in the test mode when the image(s) is/are recorded for inspection and test purposes. In the event of a panic button activation, systems shall record to protected memory a total of three (3) events that include, at a minimum, the previous 2.5 and subsequent 2.5 minutes immediately prior and subsequent to the button activation, at one frame per second.

(R) Image access shall be provided only to law-enforcement agencies including but not limited to the New York City Police Department;

(S) If the IVCS has a physical port for secure image retrieval it shall be located on the right side of the dashboard or in the trunk in an inconspicuous manner that is accessible to law enforcement personnel.

(T) When memory storage capacity is reached, the IVCS shall overwrite the oldest images as new images are recorded in sequence.

(U) Installations and repairs of IVCS may be done only by authorized installers approved by the manufacturer that are businesses currently licensed by the Department of Consumer Affairs or are taximeter businesses currently licensed by the Commission pursuant to chapter 15 of this title.

(V) Within fourteen (14) calendar days after installation, repair or modification, a notarized affidavit signed by a manufacturer's authorized installer attesting to the proper functionality of the IVCS shall be provided to the Commission by the authorized installer.

(W) A similar affidavit shall be provided annually by the authorized installer to the Commission and upon any repair to or change of the IVCS.

(4) **Credential Holders.**

(i) A credential holder shall be mounted on the right side of the dashboard, unless in the judgment of the Chairman, a dashboard mounting would be hazardous in a particular model of automobile. A model equipped with dual air bags is a model in which a dashboard mounting would be hazardous, unless in the judgment of the Chairman there is an alternative solution to the requirements of subdivision (ii).

(ii) A vehicle in which a dashboard mounting would be hazardous shall be equipped with a transparent partition and a protective plate, in accordance with §3-02(e)(3)(i), and shall have a TLC-approved credential holder frame mounted on the driver's side of the clear portion of the partition by either rivet and/or screw at least two inches above the frame supporting the clear portion of the partition and centered on the vehicle's steering column and/or the headrest on the driver's seat facing the rear passenger's compartment. The frame shall have a drop-in or slide-in slot accessible only from the driver's compartment for the rate card and the driver's license. The frame shall have sufficient illumination pursuant to Owners Rule 1-12(a). The frame shall be sufficiently padded so as not to cause injury to the driver.

(5) **Occupant accommodation.**

(i) There shall be a hold-open device on each door.

(ii) There shall be a door pull on each rear door. Assist straps shall be mounted either on each B-pillar or upon the partition. Both the door pulls and assist straps shall meet the impact requirements of federal MVSS 201. There shall be no coathook on the right-hand side.

(iii) There shall be an outboard armrest located appropriately for the driver and each outboard passenger.

(iv) The upholstery and trim shall be vinyl, shall meet or exceed all federal (MVSS) standards for vehicle seating including flame resistance. Notwithstanding the provision of this subparagraph, on the seats of a taxicab that are equipped with an occupant classification system as defined in §2-01 of this title, and on the seats of a taxicab that are equipped with side airbags, the upholstery shall be as provided by the original equipment manufacturer.

(v) A taxicab may not be equipped with power adjusted seats. A taxicab may be equipped with either bucket or bench seats, provided that the seats do not interfere with the partition and do meet all the requirements of the TLC. All replacement seats must be designed by the manufacturer for installation in the model and year of the vehicle in which the seats are installed.

(6) **Definitions.**

Taxicab technology service provider. A "taxicab technology service provider" is a vendor who has contracted with the Commission to install and maintain the taxicab technology system in taxicabs.

Taxicab technology system. The "taxicab technology system" is hardware and software that provides the following four core services (collectively "four core services"): (i) credit, debit and prepaid card payment required by section 3-03(e)(7) of this chapter, (ii) text messaging required by section 3-03(e)(8) of this chapter, (iii) trip data collection and transmission required by section 3-06 of this chapter, and (iv) data transmission with the passenger information monitor required by section 3-07 of this chapter.

(7) **Credit Card Acceptance Capability.** Each taxicab that is required to be equipped with the taxicab technology system as defined in section 3-03 of this chapter must be capable of accepting all major credit and debit cards which are accepted by such taxicab technology system as payment for fares. This specification shall be implemented no later than the compliance date set forth in section 1-01 of this title.

(8) **Text Messaging Equipment.** Each taxicab that is required to be equipped with the taxicab technology system as defined in section 3-03 of this chapter must be equipped with text messaging equipment enabling the driver to receive and send text messages. No text messaging equipment shall be installed unless it has been provided by a taxicab technology service provider and the equipment conforms with specifications set forth herein, meets appropriate safety standards, and fulfills the intended purposes for such equipment. No text messaging equipment shall be used in contravention of TLC Rules or for dispatch purposes. This specification shall be implemented no later than the compliance date set forth in section 1-01 of this title.

NOTE

1. Statement of Basis and Purpose in City Record Jan. 29, 2002:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York ("Charter"), empowering the TLC to regulate and supervise the business and industry of transporting passengers by licensed vehicles for-hire in the City; under §2303(b) of such Charter, authorizing the TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under §2303(b)(6) of such Charter, authorizing the TLC to establish requirements for safety, design and comfort of vehicles; and under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter.

These regulations amend the taxicab specifications to increase the minimum front and rear compartment legroom

requirements for sedans approved for use as taxicabs. The regulations also authorize the TLC Chair to approve minivans that may be used as taxicabs.

The Society of Automotive Engineers (SAE) has developed uniform interior and exterior measurements for motor vehicles. These SAE measurements are relied upon to ensure that vehicle dimensions of different vehicle models can be compared. The SAE has developed uniform measurements to determine both front and rear compartment passenger legroom, headroom and seat depth. These measurements are an indicator of vehicle size and passenger comfort. Minimum dimensions for headroom, legroom, and rear seat depth have been part of the TLC Specifications for taxicabs, and vehicles that do not meet these minimum size dimensions cannot be approved for use as taxicabs without specific approval from the TLC Chair.

These amendments to the Taxicab Specifications increase the interior front and rear passenger compartment legroom requirements. Front compartment minimum legroom dimensions are increased from 40 to 42 inches. Rear compartment minimum legroom requirements are increased from 37 to 43 inches.

The purpose of these amendments is to ensure that sedans authorized for use as taxicabs meet minimum standards for passenger comfort. There are currently available several sedan models available and suitable as taxicabs which meet these proposed minimum specifications for interior compartment legroom. These vehicles would provide a greater degree of passenger comfort than smaller sedans currently authorized for use as taxicabs provide. Vehicles with greater legroom are more comfortable, and provide ease in ingress and egress not available in smaller vehicles.

Additionally, these amendments authorize the TLC Chair to approve specific minivan models for use as taxicabs, after a determination that the vehicle meets reasonable safety and passenger comfort standards. Presently, the rules of the Commission, enacted in 1996, authorize three specific minivan/sport utility vehicle models to be used as taxicabs. The models that were approved in 1996 are no longer manufactured. Changes to these specific models have been made by their respective manufacturers, and these models are no longer suitable for use as taxicabs because of design changes.

There are other, newer minivan models that may be suitable for taxicab use. This regulation gives the TLC Chair the authority to approve specific models, after determining that these vehicles are safe and provide for adequate passenger comfort. Furthermore, the Chair could also disapprove models, previously suitable for use as taxicabs, that are no longer suitable for such use.

Minivans are exempted from the minimum headroom and legroom requirements set forth in subsections (3) and (4) of §3-03 of the Taxicab Specifications. SAE measurements for sedans are generally not comparable to minivans since minivans are generally built higher from the ground than sedans, have an open trunk compartment, and lack a transmission "hump". Accordingly, this rule provides the Chair with greater discretion in approving specific models that provide adequate passenger comfort and meet the Commission's safety requirements, even if these vehicles do not meet the specific headroom and legroom requirements applicable to sedans.

The Rule authorizing specific enumerated minivan models to be used as taxicabs was first approved by the Commission in 1996. Since the adoption of this Rule, there have been significant design changes made to these approved models, and they may no longer be suitable for use as taxicabs. Each year, manufacturers introduce new minivan models, change designs on existing models, and make other alterations which cause such models to be either more or less suitable for use as taxicabs. This Rule amendment authorizes the TLC Chair to approve those models which are best suited for use as taxicabs, and to remove from approval models that have been altered and are no longer suitable for taxicab use. Pursuant to authority conferred upon the TLC in the New York City Charter and the Rules of the Commission, the Chair may authorize the testing of new vehicles and equipment pursuant to pilot programs. If such a pilot program is successfully completed, the Chair could approve a vehicle for use as a taxicab. This amendment empowers the Chair to approve such models without separate rulemaking specific to manu- facturers or models.

2. Statement of Basis and Purpose in City Record Mar. 29, 1996: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The promulgated regulations require taxicabs to be equipped with an audible electronic device which will remind passengers to ask for a receipt and to take their belongings with them when they exit the vehicle. The purpose of the regulations is to reduce the large number of instances of lost property left in taxicabs. Every month, the TLC receives several thousand lost property inquiries. TLC believes a "talking taxi" reminder at the end of the trip will help reduce the number of instances of lost property. Based on public comments, the proposal was modified to permit operators an additional thirty days to install the device, until June 1, 1996. In addition, a nonfunctioning device was made a correctable condition which carries no penalty, but only requires compliance with a notice to correct.

3. Statement of Basis and Purpose in City Record Jan. 30, 1996: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. Commission regulations currently state that taxicabs must be equipped with air conditioning. The adopted further provide that the air conditioning actually reach the rear passenger compartment. The safety partitions installed in taxicabs in 1994 pursuant to Commission regulations have impeded the flow of air conditioning from the outlets in the front dashboard toward the rear passenger compartment. The amendments provide several options for taxicab owners to overcome this impediment to air flow. The proposal was amended in order to allow the Commission the opportunity to explore alternative mechanisms to permit air conditioning to reach the rear passenger compartment. A list of approved mechanisms will be established by April 1, 1996 and each owner with a taxicab equipped with a partition must install one of the approved mechanisms by May 15, 1996. The purpose of the regulations is to provide passengers with a more comfortable ride.

4. Statement of Basis and Purpose in City Record Apr. 29, 1997: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. Current regulations require that taxicabs be equipped with an audible electronic device which reminds passengers to ask for a receipt and to take their belongings with them when they exit the vehicle. The promulgated regulations require that the audible electronic device also be activated at the beginning of the trip to remind passengers to fasten their safety belts. The purpose of the regulations is to promote awareness that safety belts are available in taxicabs and should be worn by passengers. Based on public comment, the effective date for the requirement that all taxicab vehicles be equipped with the dual message device was extended until August 1, 1997. This provides the industry with over 100 days to come into compliance.

5. Statement of Basis and Purpose in City Record July 8, 1997: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the

Charter. The purpose of the amendments is to permit the Isuzu Oasis wagon to become a taxi. TLC organized an experimental operation of the vehicle model, and it was found to be a suitable taxi. The Isuzu Oasis meets the TLC's standards for interior volume, and enhances passenger comfort. The Isuzu Oasis is essentially the same vehicle, from the same assembly line, as the Honda Odyssey. The Odyssey was approved last year, after appropriate in-service testing. The TLC staff advises that the Isuzu Oasis has also passed a period of in-service testing. At present, there are approximately one hundred and thirty Odysseys and Isuzus in service as taxicabs.

6. Statement of Basis and Purpose in City Record July 1, 1996: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The purpose of the amendments is to permit two non-traditional taxi vehicles, the Honda Odyssey wagon and the Ford Explorer sport/utility vehicle, to become taxis. The present regulations provide full approval only to heavy-duty vehicles manufactured for police or taxi service. TLC organized an experimental operation of the two vehicle models, and both were found to be suitable taxis. They meet the standards for interior volume, and enhance passenger comfort. The Americans With Disabilities Act of 1990 ("ADA") provides that an entity providing transportation services, including a taxi service, when it acquires any "new van with a seating capacity of less than eight passengers including the driver," must ensure that such vehicle is fully accessible to persons with disabilities. 42 United States Code Sec. 12184(b)(3), (5). The term "van" is not defined for purposes of the above-quoted provision, and the United States Department of Transportation, the agency charged with implementing the transportation requirements of the ADA, has not yet determined whether the Honda Odyssey and the Ford Explorer are subject to that provision. In the event that these vehicles are determined to be "vans" for purposes of the ADA, they will be required to be made fully accessible to persons with disabilities, including persons in wheelchairs.

7. Statement of Basis and Purpose in City Record June 15, 1998: The regulation promulgated herein by the New York City Taxi and Limousine Commission ("TLC") is authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The regulation prohibits taxicabs from having more than a thirty (30) percent tint on any window in the vehicle with the exception of the uppermost six (6) inches of the front windshield which may have a tint greater than thirty (30) percent. The regulation is similar to New York State Vehicle and Traffic Law ("VTL") section 375, which states that no motor vehicle which operates upon any public highway, road or street shall have a light transmittance of less than seventy (70) percent on its front windshield or front side windows. The VTL allows a light transmittance of less than seventy (70) percent on the rear side windows of certain types of vehicles, and on the rear window of all motor vehicles if they are equipped with side mirrors giving the driver a clear and full view of the road and traffic conditions behind the vehicle. The regulation promulgated herein goes further than the VTL in that under no circumstance would a taxicab be allowed to have a light transmittance of less than seventy (70) percent on its rear side windows or its rear window. The purpose of the regulation is to promote the safety of drivers, passengers and the general public, by ensuring that taxicab drivers do not have their visibility impaired by excessive tint on the windows of their vehicles. The regulation also promotes the safety of police officers and TLC inspectors involved in taxicab enforcement by allowing them to see what activity is taking place within a stopped taxicab. Lastly, the regulation would make it more difficult for any criminal activity taking place within the taxicab to go unnoticed.

8. Statement of Basis and Purpose in City Record Apr. 14, 2004: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by

licensed vehicles for-hire in the City, under §2303(b)(6) of such Charter, authorizing the TLC to adopt regulations relating to taxicab safety, design and comfort; and §19-503(a) of the Administrative Code, authorizing the TLC to promulgate regulations necessary to exercise the authority conferred upon it under the Charter. The TLC amends the Taxicab Specifications to require that each taxicab be equipped with equipment which would enable the TLC to receive and collect trip data electronically from a taxicab. In addition, each taxicab is required to be capable of accepting major credit and debit cards from customers as an acceptable means of payment. These rules also require that each taxicab be equipped with a device to enable drivers to receive text messages, as well as a display map which would convey route and trip location information to passengers. Such technology will provide a number of advantages to the City, the industry and the riding public. This technology will enable the TLC to locate each taxicab at a given time and will assist in the recovery of lost property. The TLC receives, on average, more than 1,000 lost property reports each month. Currently, the TLC has no real-time method of communicating with the drivers of vehicles in which property was lost. A system that enables the TLC to promptly identify the vehicle in which the property was lost, and communicate quickly with the driver, will improve the chances that such property would be recovered. Technology is available to replace the hand-written trip sheets with an automatic data collection system. An automated collection of trip information, such as the date, time and location of each passenger pick-up and discharge, the number of passengers as well as the metered fare paid will provide a valuable resource for statistical purposes. The potential benefits of centralized data can include complex analysis of taxicab activity in the five boroughs for policy purposes, as well as the additional benefit of aiding in the recovery of lost property. In addition, a passenger monitor located in the rear of the taxicab will enable passengers to follow their route on a map. The rules also require that each taxicab have credit and debt card acceptance capabilities. Most major cities throughout the world permit the payment of taxicab fares by credit and/or debit cards. At this time, no more than 600 of the more than 12,000 New York City taxicabs are equipped with taximeters that accept credit cards. Mandating credit/debit card acceptance will provide convenience to passengers by providing a cashless method of payment. Since a period of time is needed to customize the technology necessary to equip each taxicab with the aforementioned enhancements this rule apples to vehicles placed into service or inspected after November 1, 2005. Because of the evolving nature of these technologies, it is necessary to allow the Commission some flexibility to approve the best systems and devices to implement the changes contemplated by these rules. Accordingly, the Commission has requested that the Chair present suggestions for approval to facilitate development and implementation of these technologies. The rule promulgated by the Commission was amended in light of comments received and testimony heard at the public hearing held on March 30th to clarify and expand the role of the TLC Board of Commissioners with respect to approving new equipment design and specifications for the manufacture and installation of equipment. Under these rules, the TLC Chair will make recommendations to the Commission with respect to the approval of taximeters and other technology systems that meet TLC specifications compatible with TLC internal software to ensure the uniform collection and processing of data, and the usability of transmitted data by the TLC.

9. Statement of Basis and Purpose in City Record Apr. 14, 2004: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under Section 2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City, under Section 2303(b)(6) of such Charter, authorizing the TLC to establish standards for vehicle safety, design and comfort; and under Section 19-503(a) of the Administrative Code, authorizing the TLC to promulgate regulations necessary to exercise the authority conferred upon it in the Charter. Section 1-17 of the Taxicab Owners' Rules requires each taxicab to be equipped with a partition that meets TLC Specifications, except for taxicabs operated exclusively by an owner-driver. These vehicles may be equipped with either a partition or an approved in-vehicle security camera. Section 3-03(e)(3)(i) sets forth the specifications for such a partition. The rules presently require that a partition by made of lexan, margard or another polycarbonate material. Lexan and margard are the trade names for bullet-resistant polycarbonate materials manufactured by General Electric. While these materials are durable and provide safety to the driver, lexan has the tendency to scratch and become opaque after a period of use. As the partition is no longer clear, the passenger's view of the driver's hack license and rate card, the meter, and the road through the front windshield could become compromised. Furthermore, the driver's view of the rear passenger compartment as well as his view through the rear view mirror, may likewise be affected. While margard, lexan product

treated with a scratch-resistant finish, represents an improvement over lexan, newer technologies may be developed in the future which would be superior with respect to both safety and clarity over the products presently on the market. In addition, there are other manufacturers who have developed suitable products that may be tested by the TLC. The TLC hereby repeals a portion of existing Rule 3-03(e)(3)(i) and replaces it with a rule to require an interior partition that is more durable and resistant to scratching, fading and clouding. The Chairperson is empowered to review partition design and make recommendations to the Commission for approval of partitions that meet functional specifications. This provides a better approach than listing specific approved products that may be used in partition manufacture and allows the Commission to more quickly adapt to evolving technology. Each taxicab is required to replace its existing partition with a new one that meets these specifications. In order to provide time for the industry to comply with this new requirement, it will not take effect until November 1, 2005. After that date, each owner hacking-up a new vehicle will be required to install a new partition that meets these specifications and is approved by the Commission. The rule promulgated by the Commission was amended in light of comments received and testimony heard at the public hearing held on March 30th to clarify and expand the role of the TLC Board of Commissioners with respect to approving new equipment design and specifications for the manufacture and installation of equipment.

10. Statement of Basis and Purpose in City Record May 11, 2005: The rules promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City, under §2303(b)(6) of such Charter, to adopt rules relating to taxicab safety, design and comfort; and §19-503(a) of the Administrative Code, to promulgate rules necessary to exercise the authority conferred upon it under the Charter. On March 30, 2004, the TLC promulgated rules which amended the Taxicab Specifications to require that each taxicab be provided with equipment 1) enabling the TLC to receive and collect trip data electronically, 2) allowing drivers to accept major credit and debit cards from customers as a means of payment, 3) enabling drivers to receive text messages, and 4) equipping each taxicab with a monitor capable of displaying a map providing route and trip location information to passengers. Since the TLC recognized that a period of time would be necessary to customize the technology necessary to equip each taxicab with the aforementioned enhancements, these rules became applicable to vehicles placed into service or inspected after November 1, 2005. Also, upon promulgation of these rules, the Commission requested that the Chair present suggestions to facilitate development and implementation of these technologies. Accordingly, TLC staff conducted an extensive information gathering process including: the issuance of a Request for Information on June 21, 2004, an Informational Exchange Conference with potential vendors and taxicab industry leaders, passenger and driver focus groups and meetings with industry groups. On March 2, 2005, the TLC issued a Request for Proposal for NYC Medallion Taxicab Technology Enhancements to implement the promulgated rules. The due date for proposal submission was May 10, 2005 with an anticipated contract start date of August 1, 2005. The final rules would allow taxicab drivers to receive as well as send text messages provided that the text messaging not be used in contravention of TLC rules and not be used for dispatch purposes. The final rules make conforming changes to TLC rules to reflect electronic trip sheet data collection in lieu of written record keeping. The actual implementation date of these enhancements cannot be determined in advance, and therefore these final rules remove references to a deadline of November 1, 2005 and substantiate references to a deadline to be fixed by the Commission. The TLC recognizes the evolving nature of the technological improvements and the possibility that these improvements will offer previously unrealized revenue opportunities for medallion taxicab owners while improving the quality of service to the riding public. This revenue potential might also offset the costs of installing and maintaining the new equipment contemplated by the service enhancement rules. The TLC therefore desires to allow some flexibility in approving the best systems and devices to implement the changes contemplated by the service enhancement rules and the final rules revise the implementation date to a date that is agreed upon between the TLC and the authorized contractor(s). While the March 30, 2004 rules are silent on revenue enhancement as a criterion for selection of the newly mandated technologies, the TLC has determined that the unrealized revenue opportunities for medallion taxicab owners to be derived from the Passenger Information Monitor should be explored. The final rules therefore revise the service enhancement rules to authorize the display of TLC Public Service Announcements and limited commercial advertising and commercial sponsorships on the Passenger Information Monitor to offset costs and/or provide additional sources of revenue. The final rules include two additional clauses in Rule §3-07(e)(4) in §3. These additions were adopted to

clarify that it would be at the medallion owner's discretion to run advertising or media content. Adoption of these revisions do not require further notice and comment pursuant to §1043 of the New York City Charter, based on the consideration of relevant agency or public comments.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 3-03.1

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 3 TAXICAB SPECIFICATIONS

§3-03.1 Hybrid Electric Taxicab Specifications.

(a) The purpose of this section is to implement §19-533 of the Administrative Code, as enacted by local law 72 of 2005.

(b) As used in this section, the term "hybrid electric vehicle" shall mean a commercially available mass production vehicle originally equipped by the manufacturer with a combustion engine system together with an electric propulsion system that operates in an integrated manner.

(c) Any hybrid electric vehicle manufactured for the general consumer market shall be approved for hack-up, as that term is defined in §3-01(a) of this chapter, provided that such vehicle is presented for hack-up on or after the effective date of this rule, and provided that such vehicle meets all requirements for vehicle hack-up except the following:

(1) The hybrid electric vehicle shall not be required to be manufactured with heavy-duty equipment for taxicab, police or fleet service, notwithstanding the provisions of §3-03(c)(1) of this chapter;

(2) Minimum interior volume index shall be 101.5 cubic feet, notwithstanding the provisions of §3-03(c)(2) of this chapter;

(3) Minimum effective rear compartment legroom (L51) shall be 34.6 inches, notwithstanding the provisions of §3-03(c)(3)(i) of this chapter;

(4) Minimum effective rear compartment headroom (H63) shall be 37.1 inches, notwithstanding the provisions of §3-03(c)(3)(ii) of this chapter;

(5) Minimum effective front compartment legroom (L34) shall be 41.6 inches, notwithstanding the provisions of §3-03(c)(4)(ii) of this chapter;

(6) Minimum total legroom (the sum of L34 plus L51) shall be 76.2 inches, notwithstanding the provisions of §3-03(c)(4)(iii) of this chapter;

(7) The maximum horsepower shall be 268, notwithstanding the provisions of §3-03(c)(6) of this chapter;

(8) The hybrid electric vehicle shall have at least four doors, and shall be a minivan, a compact or larger sedan, or a sport utility vehicle, notwithstanding the provisions of §3-03(c)(7) and (d)(1) of this chapter; provided that a hybrid electric vehicle designated a sport utility vehicle by either the vehicle's manufacturer or by the National Highway Traffic Safety Administration must be equipped with running boards;

(9) A hybrid electric vehicle designated a sport utility vehicle by either the vehicle's manufacturer or by the National Highway Traffic Safety Administration shall have a rear window and left and right rear side windows with the greatest degree of light transmittance available from the manufacturer or by dealer option, but in no event less than 20 percent light transmittance, notwithstanding the provisions of §3-03(c)(8) of this chapter; and

(10) Repealed.

HISTORICAL NOTE

Section added City Record Sept. 16, 2005 eff. Oct. 16, 2005. [See Note 1]

Subd. (c) par (10) amended City Record Apr. 23, 2007 §5, eff. May 23, 2007. [See T35 §1-17

Note 4]

Subd. (d) repealed City Record Mar. 16, 2007 §2, eff. Apr. 15, 2007. [See T35 §3-02 Note 5]

NOTE

1. Statement of Basis and Purpose in City Record Sept. 16, 2005:

This rule is intended to implement §19-533 of the Administrative Code of the City of New York, as enacted by Local Law 72 of 2005. That law requires that the Taxi and Limousine Commission ("TLC") approve one or more hybrid electric vehicle models for use as taxicabs.

The TLC recognizes the great importance of hybrid electric vehicle technology, as described in §1 of Local Law 72 of 2005. The benefits of hybrid electric vehicle technology include economic, because of the recent escalation in the retail price of gasoline; environmental, because of the pollutants created by comparatively low-mileage gasoline-burning vehicles; and public health, because of the adverse consequences of those pollutants.

TLC Commissioners and TLC staff extensively reviewed available hybrid electric vehicle models with four or more doors, culminating in an on-site inspection of samples of those models on July 26, 2005. None of the hybrid electric vehicle models available for sale to consumers in the United States complies with all of the taxicab vehicle specifications stated in Chapter 3 of the TLC's rules (Title 35, Rules of the City of New York). Non-compliances include passenger and driver comfort specifications, most importantly legroom; safety specifications, such as untinted

windows and maximum horsepower; and durability specifications such as heavy-duty construction. Existing specifications must be modified to comply with the mandate of Local Law 72 of 2005. Therefore, realization of the economic, environmental, and public health benefits of hybrid electric technology requires tradeoffs with the other interests served by the TLC's vehicle specifications.

TLC staff identified only six hybrid electric vehicle models with four doors or more that are available on the consumer market in the United States: the Ford Escape/Mercury Mariner, the Honda Accord, the Honda Civic, the Lexus RX400H, the Toyota Highlander, and the Toyota Prius. The rule permits the hack-up of any of these six models. TLC staff research indicates that the number of available hybrid electric vehicle models will likely double in the 2007 model year.

TLC staff will monitor the implementation of this rule and recommend any amendments that might be warranted by experience with those vehicles in actual taxicab usage.

The final rule differs from the proposed rule in that §3-03.1(c)(2) was revised based upon consideration of a public comment.

Rules of the City of New York

35 RCNY 3-03.2

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 3 TAXICAB SPECIFICATIONS

§3-03.2 Accessible Taxicab Specifications.

(a) Definitions. For purposes of this section:

(1) The term "accessible taxicab" shall refer to a taxicab that complies with federal regulations promulgated pursuant to the Americans with Disabilities Act applicable to vans under 22 feet in length, by the federal Department of Transportation, in Code of Federal Regulations, title 49, parts 37 and 38, and by the federal Architectural and Transportation Barriers Compliance Board, in Code of Federal Regulations, title 36, sections 1192.23 et seq., and the Federal Motor Vehicle Safety Standards, Code of Federal Regulations, title 49, part 571, that is hacked-up, as that term is defined in §3-01(a) of this chapter, to an accessible medallion or any other medallion on or after June 25, 2006.

(2) The term "OEM" shall refer to the original equipment manufacturer of the accessible taxicab who either manufactures the accessible taxicab in compliance with the specifications in subdivisions (c) and (d) of this section or manufactures the accessible taxicab such that the chassis complies with the specifications in subdivision (c) of this section and approves a second-stage manufacturer who modifies the vehicle to comply with the specifications of subdivision (d) and, to the extent applicable, of subdivision (e) of this section.

(b) An accessible taxicab shall be approved for hack-up if:

(1) It is a vehicle other than a van the chassis for which as originally manufactured is designed to seat eight or more persons, a bus, or a minibus;

(2) It is capable of transporting at least one passenger using a common wheelchair as defined in Code of Federal

Regulations, title 49, §37.3;

(3) As presented for hack-up, it does not seat more than five passengers in all; and

(4) It complies with the requirements stated in subdivisions (c) and (d) of this section, and all other requirements for hack-up that are not inconsistent with the provisions of this section; provided, however, that an accessible taxicab that is also a hybrid electric vehicle must also comply with the requirements stated in §3-03.1 of this chapter.

(c) The chassis of the accessible taxicab as originally manufactured must meet the following general OEM specifications:

(1) The maximum horsepower shall be 240;

(2) The suspension shall utilize the OEM's suspension and steering components; and

(3) No bumper modifications are allowed, except as provided in subdivisions (e) and (f) of this section.

(d) The accessible taxicab as manufactured by the OEM or as modified by an OEM-approved second-stage manufacturer must meet the following specifications:

(1) The minimum ground clearance (measured from frame, loaded to gross vehicle weight rating (GVWR)) shall be 5 inches;

(2) The minimum passenger compartment length (measured from rear of driver's seat base to rear seat base) shall be 56 inches;

(3) The OEM floor of the accessible taxicab, if lowered, shall be lowered from the base of the firewall to the area immediately in front of the rear axle;

(4) If a lowered floor assembly is used in the accessible taxicab, it shall be stainless steel (16 gauge minimum), and shall meet or exceed the 1000 hour salt spray rating;

(5) If a lowered floor assembly is used in the accessible taxicab, a vapor-insulating barrier of $^1/_2$ inch marine grade plywood shall be applied over the lowered metal floor and thoroughly secured;

(6) The wheelchair ramp shall not block any part of the door or glass while in the stowed position;

(7) The wheelchair securement system shall be provided to hold a wheelchair or wheelchairs and shall be the system known as Q straint QRT Standard or equal;

(8) No anchor points shall project more than $^1/_8$ of an inch above the finished floor;

(9) If the accessible taxicab has a middle fold-up passenger seat, it shall have a folding mechanism and base plate and shall meet the requirements of the Federal Motor Vehicle Safety Standard No. 207, Code of Federal Regulations, title 49, §571.207;

(10) Any modifications to the rear air conditioning must be approved by the OEM;

(11) Any and all electrical wiring in the accessible taxicab, other than as provided by OEM who manufactured the chassis, shall be PVC or better insulated and color coded for positive identification; and

(12) The back-up alarm in the accessible taxicab shall be an electrically operated device that produces an intermittent audible signal when the accessible taxicab's transmission is shifted to reverse.

(e) A vehicle that complies with this section, except that the rear bumper has been cut or otherwise modified to allow the installation of a rear-entry ramp for wheelchair access, shall nonetheless be approved for hack-up as an accessible taxicab if:

(1) The rear bumper is reinforced and the rear bumper modification is approved by the OEM;

(2) The vehicle modifications meet or exceed any applicable Federal Motor Vehicle Safety Standards crash testing requirements;

(3) If the rear door lock mechanism of the vehicle is modified, the modification must meet or exceed Federal Motor Vehicle Safety Standards and the lock mechanism must be affixed to the vehicle chassis, not the ramp assembly, unless a secondary lock is provided that is affixed to the vehicle chassis.

(f) A vehicle that complies with subdivision (e) above, except that the second-stage manufacturer does not perform the rear bumper modification pursuant to OEM approval shall nonetheless be approved for hack-up as an accessible taxicab if the modifier retains a licensed professional engineer who has either a bachelor's degree or higher in mechanical engineering or has a bachelor's degree or higher in electrical engineering and at least three years' experience in automotive manufacturing, who separately certifies for each vehicle that the vehicle was modified in conformance with the design as tested pursuant to paragraph (e)(2) above and such certification is presented to the Commission upon presentation of the vehicle for certification and hack-up as an accessible taxicab.

Subd. (f) added City Record June 17, 2008 §2, eff. July 17, 2008. [See Note 2]

NOTE

1. Statement of Basis and Purpose in City Record May 26, 2006:

The rules provide specifications for taxicabs to be used with accessible medallions pursuant to §19-532(b) of the Administrative Code of the City of New York. The specifications are applicable to taxicabs that are hacked-up for use with accessible and other medallions on or after June 25, 2006. The specifications incorporate federal regulations promulgated pursuant to the Americans with Disabilities Act of 1990 ("ADA") applicable to vans under 22 feet in length, by the federal Department of Transportation, Code of Federal Regulations, title 49, parts 37 and 38, and by the federal Architectural and Transportation Barriers Compliance Board, Code of Federal Regulations, title 36, sections 1192.23 **et seq.** The purpose of the rules is to ensure that accessible taxicabs are accessible to passengers who use wheelchairs.

The rules require that an accessible taxicab be a vehicle other than a van the chassis for which as originally manufactured is designed to seat eight or more persons, a bus, or a minibus. The vehicle must meet the specifications either after original manufacture or after modification by a second-stage manufacturer that is approved by the original manufacturer. The Taxi and Limousine Commission staff has identified two vehicles currently in production that meet the specifications-the Chevrolet Uplander, as modified by Eldorado National and sold as the American PT, and as

modified by the Braun Corporation and sold as the Braun Entervan.

2. Statement of Basis and Purpose in City Record June 17, 2008: The promulgated rule expands the specifications for accessible taxicabs to allow the use of rear-entry vehicles that have been successfully tested in two pilot programs subsequent to the adoption of the current accessible taxicab specifications in March 2007. Specifically, the promulgated rule permits the use of accessible taxicabs that have been modified by the cutting of the rear bumper to allow the installation of rear entry wheelchair ramps. The two pilot programs involved ADA-compliant minivans, modified after original manufacture to allow for rear entry rather than side entry as is the case with previously approved accessible taxicabs. The rear-entry vehicles proved during the pilot programs to be widely popular with taxicab drivers and passengers who use wheelchairs, and were found to reduce substantially the wheelchair-using passengers' "loading time." Despite that success, the Taxi and Limousine Commission maintains its paramount concern with vehicle safety, which in the case of these vehicles focused on two points. First, the Commission insists on assurances that the alteration of the rear bumper would not compromise the crash worthiness of the accessible taxicab. The promulgated rule sets forth the requirements imposed to provide those assurances: reinforcement of the rear bumper; compliance with applicable Federal Motor Vehicle Safety Standards crash testing requirements; and modification, if any, of the rear door lock mechanism pursuant to applicable federal standards. Second, because both pilot programs involved second-stage modifications performed without the sponsorship and approval of the original vehicle manufacturer, the Commission insisted on assurances that each vehicle would be modified in conformance with the design as tested. The promulgated rule requires the second-stage modifier to retain a licensed professional engineer who has a bachelor's degree or higher in mechanical engineering or has such a degree in electrical engineering together with at least three years' demonstrable experience in automotive vehicle manufacturing to certify that each vehicle is so modified. At present, Commission staff is aware of two post-manufacture modifications of the Toyota Sienna that would meet the specifications in the promulgated rule. In addition, Commission staff is aware that a second-stage modification of the Dodge Caravan that would meet the specifications of the promulgated rule is under consideration.

Rules of the City of New York

35 RCNY 3-03.3

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 3 TAXICAB SPECIFICATIONS

§3-03.3 Clean Air Taxicab Specifications.

As used in this chapter, the term "clean air taxicab" shall mean any vehicle that is either a level one or a level two clean air taxicab, as follows:

(a) "Level one clean air taxicab" shall mean any vehicle approved for use by the Commission as a taxicab that receives an air pollution score of 9.5 or higher from the United States Environmental Protection Agency ("EPA") or its successor agency and is estimated to emit 5.0 tons or less of equivalent carbon dioxide per year by the United States Department of Energy ("DOE") or its successor agency; provided that such vehicle is powered by the fuel for which such vehicle meets the above-specified standards.

(b) "Level two clean air taxicab" shall mean any vehicle approved for use by the Commission as a taxicab that receives an air pollution score of 9.0 or higher from the EPA or its successor agency and is estimated to emit 6.4 tons or less of equivalent carbon dioxide per year by the DOE or its successor agency and that does not meet the definition of a level one clean air taxicab; provided that such vehicle is powered by the fuel for which such vehicle meets the above-specified standards.

(c) As used in this section and in Chapter 1 of this title, the term "clean air taxicab" shall mean any taxicab licensed by the Commission that receives an air pollution score of 9.0 or higher from the United States Environmental Protection Agency or its successor agency and is estimated to emit 6.4 tons or less of equivalent carbon dioxide per year by the United States Department of Energy or its successor agency; provided that such vehicle is powered by the fuel for which such vehicle meets the above-specified standards.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 3-04

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 3 TAXICAB SPECIFICATIONS

§3-04 Taximeter Specifications.

(a) The Unit must:

(1) be fully electronic.

(2) have all access points sealed by a licensed N.Y.C. taxi meter shop.

(3) have casing made of hard impenetrable plastic or metal.

(4) be capable of operating within a temperature range of -20F and +120F.

(5) automatically produce a printed receipt for passengers which indicates date, time, medallion number, fare paid, extras, and Commission telephone complaint number. This receipt shall have all readouts in a minimum of five figures including decimals eg. 000.00.

(6) be capable of releasing a printed receipt within 10 seconds.

(7) be capable of producing a printed receipt for Commission personnel which shows total mileage, total paid mileage, total trips and total units, and total extras. All these readouts must show a minimum of six digits exclusive of decimals eg. 999,999. This function shall be operated by a separate button or switch.

(8) have all seals indicating on the sealed surface the licensed meter shop by name and license number. If an adjustment can be made to any component affecting the performance of the printer, then provision shall be made for

applying a seal in a manner which requires the seal to be broken before an adjustment can be made.

(9) have an auxiliary power source which operates independently of the vehicle's electrical system contained in the unit and it shall operate the memory at its full capacity for a minimum of 2 years.

(10) have a memory which shall be non-erasable. Upon reaching the limits of any display, the unit shall be capable of turning over.

(11) have a fully programmable fare structure with low cost rate change capability.

(12) for 2 piece units, have a printer capable of interfacing with and recording information from a fully approved electronic taximeter.

(13) for 2 piece units, have all connections between display meter and the unit permanently sealed and tamper-proof by use of approved tubing or electrical conduits. The display unit must be unable to function if disconnected from the memory unit.

(14) be capable of automatically making meter display inoperable if printer paper is not available in the printing unit.

(15) have model and serial numbers appearing on the face of the unit. For 2 piece units, model and serial numbers must appear on the display unit and the printer unit.

(16) all operating buttons and/or switches related to passenger functions must appear on the face of the unit, must be properly illuminated, and must indicate its function.

(17) extras shall appear separately on the display as well as the receipt for passengers. Extra indicator must be illuminated when in operation.

(18) fare display shall remain on a total of 15 seconds from time the printer begins to print the customers receipt at the completion of the ride.

(19) fare display shall be clearly visible.

(20) receipt disposal unit must be visible to the passenger.

(21) all illuminated indicators must be of sufficient candlepower to be visible to the passenger.

(22) be permanently affixed to the vehicle in a location approved by the Commission.

(23) the rooflight must be controlled by the engaging of the meter.

(24) be capable of calculating and displaying the regular metered rate of fare required by section 1-70 of this title, the flat rate of fare for a trip from Kennedy Airport to Manhattan or from Manhattan to Kennedy Airport, as required by section 1-69(a) of this title, the rate of fare for a trip to or from Newark Airport, as required by section 1-73(c) of this title, the rate of fare for trips to Nassau and Westchester counties, as required by section 1-73(b) of this title, the negotiated flat fares to points outside New York City other than the Newark Airport and Westchester and Nassau counties, as required by section 1-73(b) of this title, and the flat fares per person for group rides, as required by section 1-71 of this title.

(25) for any taxicab required to be equipped with the taxicab technology system as defined in section 3-03 of this chapter, be capable of transferring data to the taxicab technology systems of all taxicab technology service providers which have chosen such taximeter, in order to allow credit and debit card payment required by section 3-03(e)(7) of this

chapter, text messaging required by section 3-03(e)(8) of this chapter, trip data collection and transmission required by section 3-06 of this chapter and communication with the passenger information monitor required by section 3-07 of this chapter. This specification, unless the taxicab is exempt pursuant to section 1-11(g) of this title, shall be implemented no later than the compliance date set forth in section 1-01 of this title.

(26) use switches, wiring and wire caps in all connections to the taximeter harness, roof light wires and pulse wires that meet specifications of the Society of Automotive Engineers, where such specifications are applicable. All of the taxicab technology system ports and peripheral connections shall be physically secured from tampering that could disrupt the functionality or compromise the integrity of the taximeter.

(b) In addition, taxi meters shall meet the specifications and tolerances published in the National Bureau of Standards Handbook 44.

(c) In addition to fulfilling the requirements of subsections 3-03(a) and (b), each unit must be approved by the State of New York Department of Agriculture and Markets.

(d) Each such unit submitted to the Commission for approval will be subject to the Commission's normal testing period of three months minimum.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 3-05

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 3 TAXICAB SPECIFICATIONS

§3-05 Air Conditioning Specifications.

(a) All vehicles shall be equipped with an air conditioner. The air conditioner must be in good working condition from May 1st through September 30th each year. In vehicles equipped with a partition, the air conditioner shall include either an Auxiliary Unit or a Patch Unit, as required for various classifications of vehicles by this section.

(b) An Auxiliary Unit has controls which passengers may operate in the rear passenger area. It either:

(1) was built into the vehicle by the vehicle manufacturer; or

(2) operates off the vehicle's compressor and by means of a secondary evaporator core placed in a location approved by the Commission, and outlets from that evaporator core to provide cool air directly to the rear passenger compartment; or

(3) is a unit approved by the Chairperson, based upon a finding in his or her sole discretion, as to the unit's equivalence to items (1) and (2) above in the delivery of cool air to the rear passenger compartment; its effects on driver and passenger safety; its noise; and its effect upon passenger comfort and convenience. The Chairperson may, in his or her sole discretion, permit the trial operation of units in a limited number of taxicabs, in order to make such a finding. The Chairperson may terminate the trial and direct the removal of units used in the trial.

(4) The Chairperson may attach further conditions and specifications for any Auxiliary Unit. The Chairperson may require the refitting of taxicabs equipped with a previously approved Auxiliary Unit, only if such refitting either: (a) would cost less than $100; or (b) is based upon the Chairperson's finding as to a safety hazard.

(c) A Patch Unit has a conduit from one or more air conditioner vents in the dashboard into the rear passenger compartment. A Patch Unit must be approved by the Chairperson, based upon a finding, in the Chairperson's sole discretion, as to the unit's effects on driver and passenger safety, its sufficiency in the delivery of cool air, its noise, and other effects upon passenger comfort and convenience. Without limiting the authority of the Chairperson to approve other units, or to withdraw or modify the approval of a unit, there are three currently approved Patch Units:

(1) The Overhead Patch Unit consists of a commercially available extension outlet, which is fixed to the vehicle above the partition.

(2) The Center Patch Unit consists of a duct with an outlet in the metal portion of the partition. Effective July 3, 1998, this unit shall not include a fan in the partition outlet, because such a fan may create air pressure conditions within the duct which adversely affect the delivery of cool air.

(3) The Side Patch Unit reroutes the hose(s) to provide cool air conditioning to vents under the two front seats. The cool air then flows via a duct to the extreme left and right sides of the partition with an outlet discharging cool air into the rear passenger compartment.

(4) The Chairperson may withdraw approval or attach further conditions, and may require the refitting of taxicabs fitted with the unit for which approval was withdrawn or further conditioned. Such determination shall be based upon a finding, in the Chairperson's sole discretion, as to the foregoing factors of safety, comfort and convenience. The Chairperson must provide owners with sixty days notice of any such refitting requirement and shall report the determination to the Commission.

(d) All vehicles hacked-up or re-hacked on or after July 3, 1998, and equipped with a partition shall be equipped with an Auxiliary Unit.

(e) All vehicles hacked-up prior to July 3, 1998 and equipped with a partition shall be equipped with either an Auxiliary Unit or a Patch Unit.

HISTORICAL NOTE

Section added City Record June 3, 1998 eff. July 3, 1998. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record June 3, 1998:

The regulations adopted by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

This rule establishes new specifications for air conditioning in all taxicabs equipped with a partition. All taxicabs hacked-up on or after July 3, 1998 are required to have an Auxiliary Unit, which would provide cool air to the rear compartment, either by means of a secondary evaporator core in a location approved by the Commission, or alternatively from rear outlets factory produced by the original vehicle manufacturer. The rule includes a mechanism for the Chairperson to approve other Auxiliary Units besides those specified.

Vehicles hacked-up before July 3, 1998 are required to have either an Auxiliary Unit or a Patch Unit. A patch unit may be an overhead extension outlet, a center duct with an outlet in the metal portion of the partition, or rerouted hosing

in certain models.

The rule does not require the refitting of any taxicab now in service except as it requires the removal of any fans from the partition outlets in the Center Patch Unit. A fan is not permitted in the partition outlet, based upon operational experience. When it operates at a different speed than the dashboard-controlled fan, an additional fan in the partition may increase the air pressure within the duct and impede the delivery of cool air. Fans that are currently installed in the Center Patch Units must be removed by July 3, 1998. Removing the fan would be a low cost modification.

The purpose of this rule is to provide an efficient and effective method of providing air conditioning to the rear passenger compartment.

CHAPTER 3 TAXICAB SPECIFICATIONS

§3-06 Specifications for the Collection and Transmission of Required Trip Data.

(a) All vehicles, except as provided in section 1-11(g) of this title, shall comply with the data collection and transmission requirements of this section. This specification shall be implemented no later than the compliance date set forth in section 1-01 of this title.

(b) Each taxicab shall be capable of transmitting data to the Commission or its designated repository at pre-determined intervals established by the Chairperson. All transmissions shall be in a format and manner approved by the Chairperson. The data to be transmitted shall include the taxicab license number; the taxicab driver's license number; the location of trip initiation; the time of trip initiation; the number of passengers; the location of trip termination; the time of trip termination; the metered fare for the trip; and the distance of the trip. All data transmitted to TLC will be sent in a secure format as approved by the Chairperson.

(c) To the extent necessary to facilitate data transfer, the Commission may mandate that each taxicab be equipped with external antennas.

(d) No equipment designed to comply with the provisions of this section shall be installed unless it has been approved by the Commission, based upon a determination that the unit and equipment conforms with the specifications as set forth herein, is safe, and fulfills the intended purposes for such equipment.

§3-07 Passenger Information Monitor.

(a) All vehicles, except as provided in section 1-11(g) of this title, shall be equipped with a passenger information monitor which meets all the requirements of this section. This specification shall be implemented no later than the compliance date set forth in section 1-01 of this title.

(b) The passenger information monitor shall have the following minimum specifications or capabilities:

(i) Provide the passenger sitting in the rear of the vehicle with an unobstructed view of the monitor;

(ii) Be provided with a screen that is no less than ten (10) inches measured diagonally and placed in the rear passenger compartment of the taxicab; provided, however, for hybrid electric vehicles and other small clean air or low emission vehicles without a partition, licensed by the Commission for use as taxicabs, the screen size may be less than ten (10) inches but not less than five and one-half ($5^1/_2$) inches measured diagonally;

(iii) Display a map that indicates the current location of the vehicle as well as the route the vehicle has traveled from the point of trip initiation to the point of trip destination or termination;

(iv) Display without limitation the following: TLC Public Service Announcements (PSAs) including but not limited to the Passenger Bill of Rights, the Flat Fare Notice and any other TLC PSAs as designated by the Chairperson and, at the medallion owner's option, limited media content, which may include commercial advertising and commercial sponsorships as enumerated in the contract(s) between the TLC and taxicab technology service provider(s);

(v) Display itemized metered fare information at destination or termination of trip;

(vi) The capability for the passenger to turn off the monitor to a blank screen without illumination, after any TLC Public Service Announcements or any such other required information as designated by the Chairperson, which may remain visible or illuminated for all or a portion of the passenger trip. The monitor must also have the capability to re-illuminate upon disengagement of the meter to further display any additional TLC PSAs upon the passenger(s) leaving the taxicab. The monitor must also contain the capability for the passenger to control and/or mute the volume of content after any TLC Public Service Announcements or any such other required information as designated by the Chairperson.

(c) No passenger information monitor or related equipment shall be installed unless it has been provided by an authorized taxicab technology service provider on or before the compliance date set forth in section 1-01 of this title.

(d) If the credit/debit card acceptance equipment is not operational, but the passenger information monitor is operational, the passenger information monitor shall display the message, "Credit Card System Currently Not Available."

***** Current through December 2009 ****

35 RCNY 4-01

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-01 Definitions.

Applicant. An applicant is an individual applying for an original or renewal license for a paratransit vehicle and/or to operate such vehicle and/or to operate a paratransit base.

Base. A base is a central facility approved by the Commission which manages, organizes and/or dispatches a licensed vehicle or vehicles. This location should also be the official location on record with the New York State Department of Transportation.

Base Owner. A base owner is any individual, partnership or corporation licensed by the Commission to own and operate a base.

Chauffeur's license. Chauffeur's license means a valid New York State Chauffeur's license or its equivalent from another state of which the licensee is a resident.

Commission. Commission shall refer to the New York City Taxi and Limousine Commission.

Common carrier. A common carrier is a vehicle licensed by the state for public use in the conveyance of persons or property within New York State.

Dispatch of a paratransit vehicle. Dispatch of a paratransit vehicle is a dispatcher's instruction to a paratransit driver (usually by radio) directing the driver to provide service to a prospective passenger on a prearranged basis.

Driver. A driver is a person licensed by the Commission to drive a paratransit vehicle in the City of New York.

Fastening devices. A fastening device is a device, as approved by the New York State Department of Transportation, which will securely hold wheelchairs in position in a paratransit vehicle and will not cause a tripping hazard.

Electronic Trip Record System. The "electronic trip record system" is hardware and software that collects and stores the electronic trip record data required by section 4-09(gg). The specific locations and times of pick-up and drop-off and any other data that may be collected in the vehicle must be done contemporaneously with the trip.

Lease card. A lease card is a card issued to a lessee of a paratransit vehicle by the Commission, setting forth the name and address of the lessee, the period of the lease and any other information prescribed by the Commission.

Licensed vehicle. A licensed vehicle is a paratransit vehicle or ambulette authorized by the Commission to transport, by prearrangement and for hire, any person with a disability.

Mailing address. A mailing address is the address designated by the paratransit vehicle owner, base owner or driver for the receipt of all notices and correspondence from the Commission and for the receipt of service of summonses by the Commission. In the case of the base owner, the mailing address shall be the base address. In the case of the driver, it shall be the home address of the driver. In the case of the paratransit vehicle owner, an individual shall designate the home address of such individual or, if a partnership, of one of the partners and a corporation shall designate the address of the secretary of the corporation. However, the licensee may also designate a U.S. post office box number as a mailing address. Any notice from the Commission shall be deemed sufficient if sent to the address last furnished to the Commission by the paratransit vehicle owner, base owner or driver.

Owner. An owner is any individual, partnership, association, organization (including non-profit), or corporation licensed by the Commission to own a paratransit vehicle. Accordingly, under these rules, the term includes an agent or employee of such owner having authority to act on behalf of the owner, including a lessee of a paratransit vehicle.

Paratransit driver's license. A paratransit driver's license is a license issued by the Commission to persons who meet Commission qualifications as paratransit vehicle drivers.

Paratransit service. A paratransit service is a transportation service for persons with disabilities, including all ambulette services.

Paratransit vehicle. A paratransit vehicle is a wheelchair accessible van. For the purposes of these rules, this term shall include all ambulettes (whether wheelchair accessible or not).

Paratransit vehicle license. A paratransit vehicle license is a license issued by the Commission to an owner of a paratransit vehicle which displays the vehicle's license number and other data prescribed by the Commission which serves as evidence that the vehicle is licensed to operate in New York City.

Passenger. A passenger is any individual carried in a paratransit vehicle for travel for hire to a given destination.

Person with a disability. A person with a disability is an individual with a physical or mental impairment, including any person with a mobility impairment who uses a wheelchair, three-wheeled motorized scooter or other mobility aid, or is semi-ambulatory, and who cannot board, ride or disembark from a vehicle without the assistance of a wheelchair lift or other boarding assistance device.

Portable or hands-free electronic device. A "portable or hands-free electronic device" is any electronic device able to:

1. make a wireless telephone call

2. send or receive a text message

3. allow its user to speak on the telephone hands-free or operate a device by voice command, even when otherwise allowed by New York State law

4. act as a personal assistant (PDA)

5. send and or receive data from the internet or from a wireless network

6. act as a laptop computer or portable computer

7. receive or send pages

8. allow two-way communications between different people or parties

9. play electronic games

10. play music or video; or

11. make or display images; or

12. any combination of the above

This definition is to be liberally construed in light of its purpose to minimize the distraction of drivers, and in recognition of the rapid development of electronic technologies and proliferation of electronic devices that may be made available in the future that similarly transfer digital images, sounds or messages.

"Portable or hands-free electronic device" does not include: (1) any device the use of which while driving is specifically authorized by TLC rules, or (2) the use of a global positioning navigation system ("GPS") which uses voice functions to convey directions, so long as the driver is not inputting data unless legally standing or parked and the GPS is not capable of being used as a cell phone or other portable or hands-free electronic device.

Service Animal. A service animal is a guide dog, signal dog or any other animal trained specifically to work or to perform tasks for an individual with a disability, including, but not limited to, guiding individuals with visual impairments, alerting individuals with hearing impairments to intruders or sounds, providing minimal protection or rescue work, pulling a wheelchair or retrieving dropped items.

Trip Record. A trip record, also known as a trip sheet, is a written document or data in electronic form setting forth or containing the origin and destination of each trip as well as other information required by the Commission pursuant to section 4-09(gg) of this chapter. Written trip records, when permitted by section 4-10(m) of this chapter, must be carried by the paratransit vehicle driver.

Weapon. A weapon is any instrument or thing whether real or simulated, capable of inflicting or threatening bodily harm.

Wheelchair accessible van (also known as paratransit vehicle). A wheelchair accessible van is any motor vehicle, equipped with a hydraulic lift or ramp(s) designed for the purpose of transporting persons who use wheelchairs or containing any other devices designed to permit access to and the transportation of a person with a disability.

NOTE

1. Statement of Basis and Purpose in City Record July 8, 1997:

The rules promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the of New York City Charter, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in New York City; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter.

Discrimination against persons with disabilities by providers of transportation for hire is clearly prohibited under New York City, New York State and federal law. Such providers may not deny to a disabled person, or offer on different terms, a service which is available to other members of the public and which such person, with reasonable accommodation, is able to use. This requirement of law applies to all vehicles licensed by TLC.

Certain requirements regarding taxicab service for persons with disabilities are set forth in TLC's Taxicab Drivers Rules, chapter 2 of Title 35 of the Rules of the City of New York. Therefore, if a person with a disability is unlawfully denied service or discriminated against in any other way by a taxicab driver, such person may, in addition to invoking the remedies otherwise available under federal, State and local law, file a complaint against the driver with the TLC Tribunal. No comparable requirement, however, was set forth in the rules applicable to other vehicles licensed by TLC. A person with a disability who is unlawfully denied service or otherwise discriminated against with regard to transportation in a for-hire vehicle, a paratransit vehicle or a commuter van thus had no basis for seeking recourse from this agency. The purpose of the rulemaking promulgated herein is to make more detailed and explicit the current requirements regarding taxicab service for people with disabilities and to establish comparable requirements applicable to other vehicles licensed by TLC.

2. Statement of Basis and Purpose in City Record Aug. 17, 2007: The rules amend existing Commission rules relating to paratransit vehicles and paratransit services in three respects. First, the rules govern the age of paratransit vehicles for the first time. Beginning on January 1, 2008, newly licensed paratransit vehicles and qualified replacement paratransit vehicles are required to have been driven less than 100,000 miles. There will be a phase in period annually reducing the permissible mileage on the paratransit vehicles to 50,000, 25,000 and on and after January 1, 2011, to less than 500 miles. To verify the mileage, the Commission at licensing will confirm that the paratransit vehicle's mileage indicated on the New York State Department of Transportation Form MC300, dated not more than one month prior to the Commission licensing, is in accord with the qualified replacement vehicle requirements of §4-18(j). Also, after a phase-in period ending January 1, 2012, paratransit vehicles are required to be retired no later than seven years after the vehicle was first licensed. The Commission may grant a retirement extension to the owner of a paratransit vehicle who demonstrates that a replacement vehicle is unavailable and a shipment date that is not more than sixty (60) days from the retirement date. The purposes of these rules are to enhance the safety of paratransit vehicles and to reduce the volume of pollutants created by those vehicles. Newer vehicles generally operate more safely and efficiently, and more recently manufactured vehicles are generally equipped with more recent safety and air quality technologies. Second, the rules require the conversion from written to electronic trip records by July 1, 2008. The purposes of these rules are to enhance the accountability of paratransit drivers to paratransit vehicle owners and paratransit bases, and to enhance the accountability of the paratransit industry as a whole to its customers and to the Commission, by creating a more accurate and reliable record of the paratransit vehicle's operations. The rules require a vehicle owner and a base owner to transmit electronic trip records to the Commission once a month. Third, the rules clarify the responsibilities of paratransit bases and paratransit vehicle owners. Existing rules specify the responsibilities of paratransit vehicle owners (§§4-09 to 4-11), and assume that the paratransit base owner and the paratransit vehicle owner are identical-which is

usually, but not always, the case. Therefore, the rules separately state the obligations of paratransit bases and paratransit vehicle owners. The rules also provide that service of notice from the Commission to a paratransit base is sufficient if sent to the last mailing address furnished to the Commission by the base owner and also that the Commission may deny a base owner's renewal application or suspend or revoke the base owner's license should the Commission become aware of information that the base owner no longer meets the requirements for a base license.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-02 Term of Licenses.

(a) The term of every driver license and every base license issued by the Taxi and Limousine Commission under the Paratransit Services Rules shall be as follows:

(1) A license issued to a new applicant shall expire two years subsequent to the date the license was issued.

(2) A license issued to a renewing applicant shall expire two years from the date on which the previous license expired.

(b) A license issued to a new applicant for a vehicle license issued by the Taxi and Limousine Commission under the Paratransit Services Rules shall expire two years subsequent to the day the license was issued. A license issued to a renewal applicant for a vehicle license issued by the Taxi and Limousine Commission under the Paratransit Services Rules shall expire two years from the day on which the previous license expired. The Commission may, in its discretion, extend the expiration date of such license by up to an additional thirty-one days.

(c) A renewing applicant must file a completed renewal application on or before the expiration date of the license.

(d) A person who engages in a licensed activity after the expiration date of a license and before the issuance of a renewal license may be subject to penalties pursuant to applicable statutes and regulations.

35 RCNY 4-03

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-03 Paratransit Driver's License.

(a) An applicant for a paratransit driver's license:

(1) must be at least 18 years of age;

(2) if an applicant for an original license, must provide to the Commission proof of identity in the form of

(i) A valid form of photo identification issued by the United States, any state or territory thereof, or any political subdivision of such state or territory; and

(ii) A valid, original social security card;

(3) must be tested and evince a vision of at least 20/40 in each eye (with corrective lenses if necessary);

(4) must be holder of a valid New York State Motorist License Class A, B, C, or E. For the purposes of these rules, a valid license shall mean a license, issued by the New York State Department of Motor Vehicles, which is neither probationary, suspended, revoked, conditional, nor restricted as to use for violations of traffic laws or regulations.

(5) must be of sound mental and physical condition and fit to safely operate and drive a vehicle for hire as certified to by a licensed physician on forms provided by the Commission. The Commission may direct the applicant or driver to appear before a duly licensed physician designated by the Commission, for an examination of his or her physical or mental condition, should the Commission have cause to believe that an applicant or driver has a physical or mental impairment that renders him or her unfit for the safe operation of a paratransit vehicle. An existing license may be

suspended or revoked if the driver fails to appear as directed,

(6) must not be addicted to drugs or alcohol;

(7) must be of good moral character (a certified court transcript of disposition is required if ever convicted of a crime);

(8) must be fingerprinted and photographed;

(9) must be able to understand, speak, read and write the English language;

(10) must be familiar with New York City geography, streets and traffic regulations, as well as New York State Vehicle and Traffic Law;

(11) must be qualified pursuant to Article 19-A of the New York State Vehicle and Traffic Law to drive a paratransit vehicle.

(b) A Commission application for a paratransit driver's license must be signed and filed by the applicant with the Commission. An applicant for a driver's license shall agree that service of any paper, notice, letter, summons, complaint or legal process of any kind or nature may be made by the City of New York, or any department thereof, upon the person to whom the license is issued by leaving a copy of any such paper, notice, letter, summons, complaint or legal process with any member of his or her family or other person with whom he or she may reside at the address listed as a mailing address in his or her application.

(c) All applicants are required to be fingerprinted and to pass all prescribed tests, administered by the Commission or at its direction.

(d) A member of the New York City Police Department, applying for a paratransit driver's license must satisfy all the requirements herein for such license and provide a letter from his commanding officer approving such application to the Commission.

(e) Material falsification contained in an original or renewal application for a license shall be cause for denial, suspension or revocation of such license, as well as any other sanctions imposed by the Commission.

(f) Failure to notify the Commission of any material change in the information contained in the license application shall be cause for denial, suspension or revocation of such license, as well as any other sanctions imposed by the Commission.

(g) The Commission may deny the renewal application or suspend or revoke the license of any driver who no longer meets the requirements for a paratransit driver's license.

(h) An applicant or any person acting on his behalf shall not offer or give any gift or gratuity to any employee, representative, public servant, or member of the Commission.

(i) An applicant shall immediately report to the Inspector General of the Commission or to the New York City Department of Investigation any request or demand for any gift, or gratuity by any employee, representative, public servant, or member of the Commission.

(j) If the applicant has failed to meet the requirements for a paratransit driver's license, the Commission will deny the license or its renewal and will specify the reason for the denial in writing to the applicant.

(k) If an application for a license or its renewal is denied, the applicant or driver shall be entitled to a hearing before the Commission at which he may be represented by an attorney or a non-attorney representative. However, the

Commission may, for cause, deny a non-attorney representative the opportunity to appear at such hearing.

35 RCNY 4-04

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-04 Paratransit Vehicle Licensing.

(a)(1) An individual, the members of a partnership, or the officers and shareholders of a corporation applying for an original paratransit vehicle license must provide to the Commission proof of identity in the form of

(i) A valid form of photo identification issued by the United States, any state or territory thereof, or any political subdivision of such state or territory; and

(ii) A valid, original social security card.

(2) An individual, the members of a partnership or the officers and shareholders of a corporation applying for a paratransit vehicle license or its renewal must

(i) have ownership in a wheelchair accessible vehicle;

(ii) be at least 18 years of age;

(iii) be of good moral character (a certified court transcript of disposition is required if ever convicted of a crime);

(iv) operate from a base that is licensed;

(v) have a valid certificate of Operating Authority for the City of New York issued by the New York State Department of Transportation.

(b) The applicant must also:

(1) complete required Commission application forms;

(2) be qualified to assume the duties and obligations of an owner of a paratransit vehicle license, thereby rendering him "fit" as determined by the Commission; criminal records, driving records, medical conditions, mental health, as well as prior or current drug or alcohol use will be scrutinized in determining fitness.

(3) demonstrate that the vehicle is in safe operating condition and meets all requirements of the Commission and all other governmental agencies having concurrent jurisdiction;

(4) prove that he has the required liability insurance coverage by bond or policy as determined by the State of New York;

(5) provide the certificate of title or a copy thereof and the certificate of registration, both of which must be in the applicant's name unless title is retained by a lessor or conditional vendor; provided, however, in addition to the terms set forth in this paragraph (b)(5), on and after January 1, 2008, the applicant must provide (i) the certificate of title or a copy thereof and (ii) the certificate of registration that evidences that the paratransit vehicle is of a model year that is not excluded by section 4-18 of this chapter and will not be required to be retired prior to the expiration of the two-year term of licensing.

(6) provide a copy of the motor vehicle tax stamp receipt, a current rate schedule and a New York State Department of Transportation inspection checklist and

(7) demonstrate that the vehicle will be dispatched from a place of business approved by the Commission as a base, unless the applicant has been exempted from this requirement by the Commission.

(c) Fingerprinting shall be required of all individuals, the members a partnership, and officers and shareholders of a corporation applying for or holding an owner's license. Also, any individual, members of a partnership and officers and shareholders of a corporation who provide funds to an owner shall be fingerprinted unless such provider is a licensed bank or loan company. The Commission has the discretionary right to waive any requirements of this subdivision (c).

(d) If the paratransit vehicle is leased, a copy of the leasing agreement must be filed with the license application.

(e) A partnership shall file a certified copy of the partnership certification from the County Clerk, with its license application.

(f) A corporation, shall file a certified copy of its certificate of incorporation, with its license application. The applicant shall also furnish a list of its shareholders and current officers.

(g) A corporate or trade name which is similar to a name already in use by another owner will not be accepted by the Commission.

(h) The Commission will deny the paratransit vehicle license or its renewal if it determines that the applicant has failed to meet the requirements, and will specify in writing to the applicant the reason for such denial.

(i) The Commission may deny an owner's renewal application or suspend or revoke the owner's paratransit vehicle license should the Commission become aware of information that the owner no longer meets the requirements for a paratransit vehicle owner's license.

(j) Failure to notify the Commission of any material change in the information contained in the paratransit vehicle license or any attempt by an owner or applicant to conceal the identity of a party having an interest in the ownership of a paratransit vehicle or another material falsification contained in an application shall be cause for denial of such

application or revocation or suspension of such license, in addition to any other sanctions imposed by the Commission.

(k) If an application for a paratransit vehicle license or its renewal is denied, the applicant or owner shall be entitled to a hearing before the Commission at which the applicant or owner may be represented by an attorney or a non-attorney representative. However, the Commission may, for cause, deny a non-attorney representative the opportunity to appear at such hearing.

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-05 Base License.

(a) The base must be located on commercial property or within a zone which permits a base operation, unless there are four vehicles or less in which case the base may be maintained at the base owner's residence.

(b) The base operation must be maintained as a separate entity.

(c) The base must maintain outside advertising stating the business name and telephone number and indicating to the public that it is a paratransit base.

(d) The base must maintain records of all paratransit vehicles dispatched.

(e) The applicant for the base license must complete and file the required Commission application form and also submit:

(1) a copy of the New York State Department of Transportation Certificate of public convenience and necessity to operate as a common carrier of passengers by motor vehicle (operating authority);

(2) if the base owner is a corporation, a copy of the filing receipt and the certificate of Incorporation;

(3) if the base owner is a partnership, a copy of the partnership agreement if such agreement exists;

(4) a copy of the current Rate Schedule;

(5) if an applicant for an original license, proof of identity of the owner, its partners if the owner is a partnership, and, if the owner is a corporation, officers and stockholders, in the form of

(i) A valid form of photo identification issued by the United States, any state or territory thereof, or any political subdivision or such state or territory; and

(ii) A valid, original social security card.

(f) Base owners, corporate officers and active stockholders must all be fingerprinted at the Commission.

(g) A base licensing application must be accompanied by at least one paratransit vehicle licensing application. A paratransit base may dispatch only Commission licensed paratransit vehicles.

(h) The Commission may deny a base owner's renewal application or suspend or revoke the base owner's license should the Commission become aware of information that the base owner no longer meets the requirements for a base license.

35 RCNY 4-06

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-06 Paratransit Driver's Responsibility to the Commission.

PenaltyAll fines listed below also include a separate license suspension, to run concurrent with any underlying suspension, until such fine is paid, unless such fine is paid by the close of business on the day assessed.

(a)	A driver shall answer and comply as directed with all questions, communications, directives, restrictions and summonses from the Taxi and Limousine Commission or its representatives. A driver shall produce his or her paratransit driver's license, chauffeur's license, trip records or any other documents when required by the Commission.	$200 and suspension until compliance. Personal Appearance Required.
(b)	A driver shall not operate a paratransit vehicle for hire within the City of New York, unless it is properly licensed by the Taxi and Limousine Commission.	See §4-05 Personal Appearance Required.
(c)	A driver of a New York City paratransit vehicle for hire must be duly licensed as a driver by the Commission.	$100-1st Offense$250-2nd Offense$350-3rd Offense$500-4th or more offensesw/in 12 months-PersonalAppearance Required.
(d)	A driver shall not operate a paratransit vehicle unless: (1) he or she possesses a paratransit driver's license;	(1) $100 Personal Appearance Required.

	(2) he or she possesses a valid New York State chauffeur's license or appropriate valid license of similar class of the state of which he or she is a resident;	(2) $100-$350 and/or suspension up to 30 days; summary suspension until compliance pursuant to§8-17(b) of this title.
	(3) the vehicle is adequately insured in accordance with New York State Law.	(3) $100 Personal Appearance Required.
(e)	A driver shall not operate a paratransit vehicle in New York City while his paratransit driver's license is revoked, suspended or expired.	$100-1st Offense$250-2nd Offense$350-3rd Offense4 or more offenseswithin 12 months-OATHPersonal Appearance Required.
(f)	A driver shall immediately report the suspension or revocation of his state chauffeur's license (or its equivalent) to the Commission, at which time he shall also surrender his paratransit driver's license to the Commission.	$15-$150 Personal Appearance Required.
(g)	A driver shall notify the Commission within fifteen (15) days if he is convicted of a crime and he shall deliver to the Commission a certified copy of the certificate of disposition issued by the Court clerk within fifteen (15) days of sentencing.	$25-$150 Personal Appearance Required.
(h)	A driver shall safeguard his or her paratransit driver's license and the paratransit vehicle license. Locking the paratransit vehicle with the paratransit driver's license and paratransit vehicle license therein during his or her shift shall be deemed compliance with this rule. However, leaving either or both of them in the paratransit vehicle while another possesses the paratransit vehicle is not deemed compliance.	$25 Personal Appearance Not Required.
(i)	A driver shall notify the Commission in writing, within seventy-two (72) hours, exclusive of weekends and holidays, of the loss, theft or mutilation of his paratransit driver's license.He must report in person when applying for a replacement, and he shall furnish new photographs, and any affidavits required by the Commission.	$25 Personal Appearance Not Required.
(j)	A driver shall not in any way alter, deface, mutilate or obliterate any portion of his paratransit driver's license or the attached photograph so as to make them unreadable or unrecognizable.	$50 Personal Appearance Not Required.
(k)	A driver shall immediately surrender any unreadable, unrecognizable, or mutilated paratransit driver's license to the Commission.	$25 Personal Appearance Not Required.
(l)	A driver's photograph on his or her paratransit driver's license shall accurately reflect his or her appearance, including such details as the wearing of glasses, hearing aid, mustache, beard, etc. Should the driver's appearance change, he or she must, without delay, submit four (4) new photographs to the Commission, and a new paratransit driver's license shall be issued.	$25 Personal Appearance Not Required.
(m)	A driver shall not allow anyone to use his or her paratransit driver's license and he or she shall not use another's paratransit driver's license.	$250 Personal Appearance Required.
(n)	A driver shall notify the Commission of any change of mailing address within 72 hours, exclusive of weekends and holidays, either in person or by registered or certified mail return receipt requested. This also applies to a change in any other information requested on the application. Any notice sent by the Commission shall be deemed sufficient if	$50 Personal Appearance Not Required.

	sent to the last mailing address furnished by the driver.	
(o)	A driver shall not carry a weapon while operating a paratransit vehicle without the Commission's written authorization.	$100 and/or suspension up to thirty (30) days Personal Appearance Required.
(p)	A driver shall not operate a paratransit vehicle or use it at any time to carry passengers unless it is in safe operating condition, and it meets and is operated under all the requirements of New York State and New York City vehicle and traffic laws, and all Commission requirements set forth in Chapter 4 of Title 35 of the Rules of the City of New York.	$50-$150 Personal Appearance Required.
(q)	A driver shall personally inspect and reasonably determine that all equipment, inclusive of brakes, tires, lights, signals, wheelchair ramps and fastening devices are in good working order, before operating such vehicle.	$15-$150 Personal Appearance Required.
(r)	The following items must be present in the paratransit vehicle prior to its operation:(1) the driver's paratransit driver's license;(2) the certification of registration or copy thereof;(3) the paratransit vehicle license or copy thereof;(4) an insurance card or copy thereof;(5) the lease card, if any, or copy thereof;(6) the written trip record;(7) any notices required to be posted in theparatransit vehicle. (8) Notwithstanding any provision of this subdivision and any other provision of these rules, on and after July 1, 2008, an electronic trip record system required by section 4-10(n), in lieu of the written trip record set forth in section 4-06(r)(6); however, if such system malfunctions, the malfunction is timely reported and the paratransit vehicle is operated for hire not more than three (3) business days before being repaired a written trip record shall be used.	(1-7) $15 for each violation of this rule. Personal Appearance Not Required. (8) $250 Personal Appearance Required.
(s)	A driver shall maintain all written trip records as follows:(1) all entries must be in ink and the trip record must be current;(2) at the beginning of each work shift the driver shall sign and certify on the trip record that the paratransit vehicle and its equipment are in good working condition and that all required items are present. One entry for an owner/driver will be deemed sufficient.(3) the trip record shall contain the trip record entries required by section 4-09(gg) of this chapter.Note: The Commission has discretionary power to waive any of these requirements upon showing by the owner that the required information is maintained and is readily accessible to the Commission.Notwithstanding the provisions of this subdivision and any other provision of these rules, the driver shall make all system entries that must be collected contemporaneously with the trip, such as the location and date and time of pick-up and drop-off. All other entries required by section 4-09(gg) may be provided by the dispatching base.	$50 for each violation of this rule; however no fine for a violation of this rule shall exceed $100 for each vehicle stop. Personal Appearance Not Required.
(t)	At any time, a driver shall correct in a written trip record wrong entries by drawing a single line through the incorrect written entry and initialing the correction. Also, a driver shall not make erasures or obliterations or leave any blank lines between entries on a written trip record. Electronic trip record data collected in the paratransit vehicle shall not be erased, deleted, altered, changed or obliterated. A driver shall report all necessary corrections to the base owner.	$30 Personal Appearance Not Required.
(u)	A driver shall attempt to procure comparable transportation for the balance of a passenger's trip, if the paratransit vehicle becomes inoperable while a passenger is in the vehicle. This does not apply if the passenger desires to find his own transportation.	$50-$150 Personal Appearance Required.
(v)	The driver shall not cause or permit the engine of his paratransit vehicle to idle unnecessarily for longer than three minutes and will adhere to the New York City Air Pollution Control Code.	$25 Personal Appearance Not Required.

(w)	A driver or any person acting as his representative shall not offer or give any gift, gratuity or thing of value to any Commission member, employee, or representative or any public servant.	$1,000 up to Revocation Personal Appearance Required.
(x)	A driver shall immediately report to the Commission any request or demand for a gift, gratuity or thing of value from him or his representative by any Commission member, employee, or representative or any public servant.	$1,000 up to Revocation Personal Appearance Required.
(y)	A driver shall submit an application for renewal of his license prior to its expiration date, unless the Commission extends the date.	$25 Personal Appearance Not Required.
(z) (1)	A driver shall not use a portable or hands-free electronic device while operating a paratransit vehicle, unless such paratransit vehicle shall be lawfully standing or parked. "Use" of a portable or hands-free electronic device means that the driver is deploying any of the functions of the portable or hands-free electronic device, or has a device that permits the hands-free use of a portable or hands-free electronic device in the immediate proximity of the driver's ear.A driver may offer as an affirmative defense that he or she was using a portable or hands-free electronic device while operating a paratransit vehicle for the sole purpose of communicating with an emergency response operator that there exists an imminent threat to life or property, and that it was impossible for the driver to safely stop the vehicle before placing the call. The driver must provide documentary proof that the electronic communication was to an emergency response operator.(2) Additional penalties for use of a portable or hands-free electronic device while operating a paratransit vehicle.For purposes of this paragraph (z)(2), "portable or hands-free electronic device violation" shall mean a violation of §4-06(z)(1) of this chapter or a violation of any state law or rule prohibiting or restricting the use of a portable or hands-free electronic device while driving, such violation having been adjudicated by a court or other tribunal having jurisdiction over such violations.Any paratransit driver who commits a portable or hands-free electronic device violation is required to attend and satisfactorily complete an authorized course of training in the dangers of driving while distracted by portable or hands-free electronic devices. The course shall be a minimum of one hour and shall include a review of the rules governing the use of portable or hands-free devices, and the dangers of driving while distracted. The course must be completed and verification of course completion provided by the designated school within sixty days of TLC's issuance of a directive to the paratransit driver that he or she is required to take such course.	$200 Personal Appearance not Required.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-07 Driver's Responsibilities When Operating the Vehicle.

		Penalty
(a)	(1) A paratransit driver shall not operate his vehicle in such manner at a speed which unreasonable endangers others or their property.	(1) $25-$250 and/or suspen- sion up to or thirty (30) days or revocation if driver is found guilty of having violated this rule more than 3 times in a twelve month period. Personal Appearance Required.
	(2) A paratransit driver shall stop and identify himself if he has cause to know that personal injury has been caused to another person or to another's property due to an accident or to deliberate act involving the paratransit vehicle. Before leaving the place of occurrence the paratransit driver shall stop, exhibit to such person or to a police officer on the scene his chauffeur's license, para-transit driver's license and insurance card (or copy thereof) and he will give to such person his name residence address, paratransit driver's number, paratransit vehicle identification number as well as	(2) $25-$250 and/or suspension up to thirty (30) days or revocation if driver is found guilty of having violated this rule more than three (3) times within a twelve (12)

	the name of the vehicle's insurance carrier and the insurance policynumber.	month period. Personal Appearance Required.
	(3) A driver shall operate his paratransit vehicle in full compliance with all New York State and City traffic laws, rules and regulations, as well as all applicable New York and New Jersey Port Authority and Triboro Bridge and Tunnel Authority rules and regulations and any other regulatory body or government agency having jurisdiction over motor vehicles.	(3) $25-$250 and/or suspension up to thirty (30) days or revocation if driver is found guilty of having violated this rule more than three (3)times within a twelve(12) month period.Personal Appearance Required.
	(4) A driver shall immediately report to the owner any accidents in which the driver and the paratransit vehicle are involved and shall notify his or her employer of any traffic infraction, accident or conviction(s) as required in section 509-i of Article 19A of the New York State Vehicle and Traffic Law.	(4) $25-$250 and/or suspension up to 30 days. Personal Appearance Required.
(b)	When operating a paratransit vehicle, a driver shall cooperate with all law enforcement officers and authorized representatives of the Commission, and upon request shall provide his name, paratransit driver's license number, the vehicle identification card, trip record and any documents required to be in his possession.	$15-$150 Personal Appearance Required.
(c)	A driver shall not operate a paratransit vehicle if his driving ability is impaired by either alcoholor or drugs, nor will he consume alcoholicbeverages or illegal drugs while occupying such vehicle.	$50-$300 and/or suspension or revocation. Personal Appearance Required.
(d)	A driver shall not permit any individual who is not currently licensed by the Taxi and Limousine Commission to operate the vehicle in which he or she is dispatched, unless directed to do so by the owner or his or her agents.	See §4-13 Personal Appearance Required.
(e)	A driver shall not operate a paratransit vehicle if he has been working for more than twelve (12) consecutive hours, however if a driver has accepted a passenger prior to the conclusion of the twelfth hour he may continue providing service to that passenger if he is alert enough to not unreasonably endanger himself or others.	$25 Personal Appearance Not Required.
(f)	A driver shall never carry more passengers than the capacity of the vehicle as determined by the State Department of Transportation.	$25 Personal Appearance Not Required.
(g)	A driver shall not commit or accept to commit, alone or in concert with another, any act of fraud, misrepresentation, larceny, or perform any willful act of omission or commission which is against the interest or the public, while performing his duties and responsibilities as a paratransit driver.	$25-$350 and/or suspension up to 30 days. Personal Appearance Required.
(h)	A driver shall not use or permit another person to use his paratransit vehicle for any unlawful purpose and shall immediately report to the police any criminal use or attempt thereof involving the vehicle.	$25-$350 and/or suspension up to 30 days. Personal Appearance Required.
(i)	A driver shall not put any unauthorized equipment, devices or signs on or in a paratransit vehicle during his workshift (excluding mobility devices, such as grab bars, or non-slip flooring). This includes all items not specifically enumerated in these rules, unless there is written authorization by the Commission.	$25-$200 and/or suspension up to 30 days. Personal Appearance Required.
(j)	(1) A driver shall be clean and neat in appearance when operating a paratransit vehicle for hire.	(1) $25 Personal Appearance Not Required.
	(2) A driver shall keep the paratransit vehicle clean and of good appearance during his workshift.	(2) $25 Personal Appearance Not Required.
(k)	A driver shall use written trip records while the electronic trip record system is not functioning and the vehicle is permitted to operate.	$250 Personal Appearance Not Required.

35 RCNY 4-08

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-08 Driver's Responsibilities to the Passengers.

		Penalty
(a)	(1) A driver shall be courteous to the public. (2) A driver shall comply with all lawful and reasonable requests of passengers, including but not limited to giving upon request his or her name, his or her paratransit driver's license number and the paratransit vehicle's license number.	(1) $25 Personal Appearance Not Required. (2) $50-$100 Personal Appearance Required.
(b)	A driver shall not threaten, harass or abuse any passenger, Commission representative, or any other person while performing his or her duties and responsibilities as a driver. A driver shall not distract or attempt to distract a service animal that is accompanying a person with a disability.	$50-$350 and/or suspension up to 30 days. Personal Appearance Required.
(c)	A driver shall not use or attempt to use any physical force against a passenger, Commission representative or any other person while performing his or her duties and responsibilities as a driver. A driver shall not harm or use physical force against or attempt to harm or to use physical force against a service animal that is accompanying a person with a disability.	$25-$350 and/or suspension up to 30 days or possible revocation (OATH) Personal Appearance Required.
(d)	A driver shall comply with a passenger's reasonable request to change his destination or terminate the trip unless it is impossible or unsafe for the driver to comply with such request in a non-emergency situation any such change or termination is contrary to the best interest of the other passengers.	$25-$150 Personal Appearance Required.
(e)	A driver shall provide all necessary and reasonable assistance to all passengers whether	$100-$350 and/or sus-

	ambulatory, or using a wheelchair or other mobility aid, to board the vehicle, to be secured therein, to depart from the vehicle and to be delivered to his destination. Such assistance also shall include ensuring that a service animal has boarded and exited the vehicle. (The driver is not required to assist passengers up or down the steps).	pension up to 30 days and possible revocation (OATH) Personal Appearance Required.
(f)	A driver shall only use wheelchair ramps and fastening devices which are functioning properly and are secure.	$25-$250 and/or suspension up to 30 days. Personal Appearance Required.
(g)	A driver shall not refuse, by words, gestures or any other means, without justifiable grounds as set forth in section 4-09(h) herein to provide transportation, when dispatched, for a person who has prearranged the trip and the destination is within the City of New York. This includes a passenger accompanied by a service animal.	See §4-13 Personal Appearance Required.
(h)	The following are justifiable grounds for conduct otherwise prohibited under section 4-09(g) of this chapter:(1) the passenger possesses a weapon, an article, package, case or container which the driver may reasonably believe will cause injuries to others or cause damage to the interior of the paratransit vehicle, impair its efficient operation, or cause it to become stained or foul smelling;(2) the passenger is intoxicated or disorderly. Provided, however, that a driver shall not refuse to provide service to a person with a disability solely because such person's disability results in an appearance or involuntary behavior that may offend, annoy, or inconvenience the driver or other employees of the paratransit service.(3) the passenger is accompanied by an animal which is not properly or adequately secured in a kennel case or other suitable container. This provision shall not apply to service animals accompanying people with disabilities.(4) the passenger is in need of emergency medical assistance.	No penalty applicable.
(i)	(1) A driver shall not refuse to transport a passenger's wheelchair, crutches, or other property.	(1) See §4-13 Personal Appearance Required.
	(2) When necessary or upon the passenger's request, the driver shall load or unload such property, within reason, in or from the paratransit vehicle.	(2) $50-$100 Personal Appearance Required.
(j)	A driver shall be diligent and reasonably punctual in picking up and transporting passengers.	$25 Personal Appearance Not Required.
(k)	A driver shall turn the radio on or off at the passenger's request. The passenger has the right to select the radio station, however, the radio volume shall be played at a reasonable level only, and the driver shall adhere to all noise ordinances.	$25 Personal Appearance Not Required.
(l)	A driver shall turn the air conditioning or heating device in a paratransit vehicle on or off at a passenger's request.	$25 Personal Appearance Not Required.
(m)	A driver shall not smoke when transporting a passenger, or while assisting him or out of the vehicle.	Personal Appearance Not Required.
(n)	A driver shall not charge or attempt to charge a fare above the approved rate of fare established by the owner and filed with the Commission. A driver shall not impose or attempt to impose any additional charge for transporting a person with a disability, a service animal accompanying a person with a disability or a wheelchair or other mobility aid.	See §4-13 Personal Appearance Required.
(o)	(1) A driver shall give a passenger who has paid the fare, the correct change.	(1) $25-$150 Personal Appearance Required.
	(2) A driver must always be capable of making change of a $20 bill, when providing service on a cash basis.	(2) $25 Personal Appearance Not Required.
(p)	A driver shall not ask or in any way indicate to a passenger that a tip is expected or required.	$50 Personal Appearance Not Required.
(q)	A driver shall give a passenger a receipt for payment of the fare at the end of the trip, when requested to do so by the passenger. Such report shall legibly state the date, time,	$25 Personal Appearance Not Required.

	paratransit vehicle plate number, name of the base, fare paid, extras and the Commission Complaint Department telephone number.	
(r)	A driver shall not sell, or advertise any service or merchandise to the passengers without prior written approval from the Commission.	$50 Personal Appearance Not Required.
(s)	A driver shall take passengers to their destination by the most reasonable route unless the driver or passenger requests a different route and it is consented to by all of the other passengers.	$25-$150 Personal Appearance Required.
(t)	A driver shall only pick up passengers on a prearrangement basis, he shall not solicit or respond to hails.	See §4-14 Personal Appearance Required.
(u)	(1) The driver shall inspect the interior of the paratransit vehicle after each trip and any property found shall be returned to the passenger if possible; otherwise it shall be taken immediately to the police precinct closest to where the passenger was discharged. (2) The driver shall promptly inform the Commission of any property found and the police precinct where it is held, if the property is not returned to the passenger.	(1) $50-$250 Personal Appearance Required. (2) $25 Personal Appearance Not Required.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 4-09

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-09 Paratransit Vehicle Owner's and Base Owner's Responsibilities to the Commission.

PenaltyAn owner and a base owner shall each be separately responsible for compliance with and liable for violations of subdi-visions (a), (b), (c) and (d) and paragraph (k)(2).

(a)	An owner shall not allow to be dispatched, a base owner shall not dispatch and neither shall permit the operation of a paratransit vehicle for hire that is not currently licensed by the Commission as a paratransit vehicle.	See §4-13 Personal Appearance Required.
(b)	An owner shall only allow a paratransit vehicle to be dispatched and a base owner shall only dispatch a driver with a current paratransit driver's license.	See §4-13 Personal Appearance Required.
(c)	An owner shall not knowingly permit to operate and a base owner shall not dispatch a driver who does not have a current and valid state driver's license and neither shall employ a driver without complying with qualification procedures set forth in Section 509-d of Article 19-A of the New York State Vehicle and Traffic Law.	See §4-13 Personal Appearance Required.
(d)	An owner shall allow to be dispatched and a base owner shall dispatch a paratransit vehicle only from a base currently approved by the Commission, unless exempted by the New York State Department of Transportation.	$150 Personal Appearance Not Required.
(e)	A base owner must notify and get prior approval from the Commission before the base owner transfers, sells or assigns the base to another. The prospective new base owner must file the appropriate base license application form with the Commission. Should the Commission approve the sale of a base to another, the Commission will permit the transfer of the entire fleet to the new base as long as the vehicles meet the age/ retirement requirements set forth in section 4-18 of this chapter and the owner shall	$100 Personal Appearance Not Required.

	pay the paratransit affiliation fee to the TLC, if any is required.	
(f)	An owner and a base owner shall report any pertinent changes, including any changes regarding finances, ownership or title and registration, and for a base owner, a change in the base address, to the Commission within 72 hours. (Any notice or summons from the Commission shall be deemed sufficient if sent to the address last furnished by the owner and the base owner, respectively.)	$50 Personal Appearance Not Required.
(g)	A base owner shall maintain signage at the base, stating the base name and indicating to the public that it is a base.	$50 Personal Appearance Not Required.
(h)	An owner without a current paratransit vehicle license shall not advertise or hold the owner out as "having Paratransit Service" or comparable designation.	See §4-13 Personal Appearance Required.
(i)	A base owner shall not dispatch a paratransit vehicle unless the rate of fares for such vehicle has been filed with the Commission including minimum fare, different fares for different types of paratransit services, portal time, tolls and extra charges, if any.	$50 Personal Appearance Not Required.
(j)	A base owner shall file with Commission annually or whenever there is any change, the schedule of the rate of fare at least (ten) 10 days prior to the effective date.	$50 Personal Appearance Not Required.
(k)	(1) An owner shall comply with the Commission's Paratransit Vehicle Specifications and all other pertinent laws, rules or regulations governing owners.(2) An owner and a base owner shall comply with the Markings Specifications for paratransit vehicles.	$50 Personal Appearance Not Required.
(l)	A base owner operating a two-way radio service shall instruct the drivers and other employees on the rules of the Federal Communications Commission.	$50-$250 Personal Appearance Required.
(m)	An owner and a base owner shall each cooperate with all Commission enforcement officers and authorized representatives and shall comply with all their reasonable requests, including, but not limited to giving, upon request, the owner's or the base owner's name, the base license number and trip records, the paratransit vehicle license number and, for an owner the owner's paratransit vehicle license, and for a base owner the base license, and any other documents required to be maintained by the owner and base owner.	$15-$150 Personal Appearance Required.
(n)	An owner, applicant for a paratransit vehicle license, a base owner, or applicant for a base license shall not offer or give any gift or gratuity to any employee, representative or member of the Commission, or any public servant.	$1,000 up to revocation. Personal Appearance Required.
(o)	An owner or a base owner shall immediately report to the Commission any request or demand for a gift, gratuity, or thing of value from the owner or the base owner or a representative by any Commission member, employee, representative or any public servent.	$1,000 up to revocation. Personal Appearance Required.
(p)	An owner or a base owner shall not commit or attempt to commit, alone or in concert with another, any act of fraud, misrepresentation or larceny, perform any willful act of omission or commission which is against the best interests of the public while performing the owner's or base owner's respective duties and responsibilities as an owner or base owner.	$25-$350 and/or suspension up to 30 days. Personal Appearance Required.
(q)	An owner shall not use or permit another person to use his paratransit vehicle or garage for any unlawful purpose and shall immediately report to the police any criminal use or attempt thereof involving the vehicle or base.	$25-$350 and/or suspension up to 30 days. Personal Appearance Required.
(r)	An owner or a base owner, including a member of a partnership or any officer or shareholder of a corporation, shall notify the Commission within fifteen (15) days if he or she is convicted of a crime, and he or she shall deliver to the Commission a certified copy of the certificate of disposition issued by the court clerk within fifteen (15) days of the disposition.	$50-$250 Personal Appearance Required.
(s)	An owner and a base owner shall promptly answer and comply with all communications, directives, restrictions and summonses to each of them, respectively, from the	$200 and suspension until compliance. Per-

	Commission or its representatives.	sonal Appearance Required
(t)	A base owner shall be responsible for bringing to the attention of drivers and other employees, all rules governing the conduct of drivers while performing their duty as drivers and amendments thereof, and any other notices from the Commission. Also, a base owner shall be responsible for maintaining at the base a current copy of the Commission rules for the information of drivers and employees.	$50 Personal Appearance Not Required.
(u)	An owner shall be deemed to have designated every driver who operates his paratransit vehicle as his agent for accepting service by Commission personnel of notices to correct vehicle defects. Also, delivery of such notice to a driver shall be deemed proper service of the notice on the vehicle's owner.	No penalty applicable.
(v)	An owner shall surrender the owner's paratransit vehicle license to the Commission within forty-eight (48) hours, should such license be suspended or revoked.	$100 Personal Appearance Not Required.
(w)	An owner shall not make any unauthorized entry on a paratransit vehicle license or change, deface, conceal, obliterate or render unreadable any entry thereon.	See §4-13 Personal Appearance Required.
(x)	An owner shall immediately surrender an unreadable paratransit vehicle license to the Commission and will obtain a legible replacement.	$25 Personal Appearance Not Required.
(y)	An owner shall notify the Commission and the Police Department within forty-eight (48) hours exclusive of weekends and holidays of the theft, loss or destruction of a paratransit vehicle license or New York State license plates. The owner shall also furnish such affidavit or information as may be required including the police receipt number and a substitute paratransit vehicle license will be issued by the Commission.	$50 Personal Appearance Not Required.
(z)	An owner shall also report to the Commission the replacement of any New York State license plates within 48 hours, exclusive of weekends and holidays, after obtaining the new plates.	$50 Personal Appearance Not Required.
(aa)	An owner or a base owner shall submit an application for renewal of the owner's or the base owner's respective license prior to the expiration date of the license, unless the time to do so is extended by the Commission.	$25 Personal Appearance Not Required.
(bb)	A base owner shall only authorize the drivers the base owner dispatches to pick up passengers with a paratransit vehicle on a prearrangement basis and shall not allow them to solicit or respond to hails.	See §4-13 Personal Appearance Required.
(cc)	A base owner shall not require a driver to operate one or more paratransit vehicles more than twelve(12) consecutive hours; however, if a driver has accepted a passenger prior to the conclusion of the twelfth hour he or she may continue providing service to that passenger, if the driver is alert enough to not reasonably endanger himself, herself or others.	$50 Personal Appearance Not Required.
(dd)	(1) An owner shall maintain liability insurance for all paratransit vehicles and shall comply with all New York State Law regarding this coverage and will maintain at least the minimum amount prescribed by the New York State Department of Transportation. (2) An owner shall submit proof of liability insurance coverage to the Commission on or before the fifteenth (15th) day of January of each year, including the name and address of the carrier and the insurance policy number for each paratransit vehicle owned by him.	(2) $50 Personal Appearance Not Required.
(ee)	An owner shall notify the Commission in writing, within seventy-two (72) hours of receipt of notice, of a cancellation of the required liability insurance or a change of insurance carrier or the insurance policy number.	$100 Personal Appearance Not Required.
(ff)	An owner shall surrender the owner's paratransit vehicle license to the Commission prior to or on the termination date of the liability insurance, unless the owner is not notified or obtains new insurance which is effective on the termination date of the old	$100 Personal Appearance Not Required.

	policy.	
(gg)	An owner or the owner's specified agent shall only allow a paratransit vehicle to be dispatched after signing the owner's or agent's name to the written trip record.All trip records shall contain the following information:(1) the driver's paratransit driver's license number;(2) the paratransit vehicle's state license plate number;(3) the date and time of pick-up of passengers;(4) the date and time of drop-off of passengers;(5) the locations of pick-ups and drop-offs;(6) any other entries required by the Commission and local, state or federal law.	$50 for each violation of this rule; however no violation of this rule shall exceed $100 for each vehicle stop. Personal Appearance Not Required.
(hh)	When using written trip records the owner or the owner's agent shall examine the trip record, and shall enter, in ink, the date and time at the end of the driver's workshift. The owner or owner's agent shall also enter and sign a statement indicating that the driver's entries have been examined.	$25 Personal Appearance Not Required.
(ii)	(1) The owner shall correct wrong entries on a written trip record or other written records which the owner is required to maintain by drawing a single line through the incorrect entry and initialing the correction. Also, an owner shall not make erasures or obliterations or omit any essential information. On and after July 1, 2008, the owner and base owner shall make all necessary correction entries and addition entries that need to be made to the electronic trip record. The electronic trip record data collected in the paratransit vehicle shall not be erased, deleted, altered, changed or obliterated.	(1) $30 Personal Appearance Not Required.
	(2) An owner shall not rewrite a trip record in whole or in part, unless he has obtained prior Commission authorization.	(2) $75-$300 and/or suspension up to 30 days.
(jj)	An owner shall maintain and make available for inspection complete financial and other operational records for a period of three (3) years, including the following records:(1) vehicle liability insurance coverage; and(2) any other documents specifically prepared in conjunction with the operation of a paratransit service.A base shall maintain and make available for Commission inspection complete financial and other operational records for a period of three (3) years, including the following:	
	(1) the driver's trip records;(2) any workers' compensation insurance coverage; and(3) any other documents created or maintained in conjunction with the operation of a base.	$50 for violation of each subdivision hereof. Personal Appearance Not Required.
(kk)	An owner shall make any records which the owner is required to maintain, and a base owner shall make any records which the base is required to maintain, or photocopies thereof, available to a driver should the driver be required to present such documents to the Commission or any other governmental agency.	$50 Personal Appearance Not Required.
(ll)	A base owner shall comply with all provisions of the New York State Workers' Compensation Law and regulations promulgated thereunder with respect to the provision of coverage and benefits to eligible persons.	$25 for each day of non-compliance and either suspension until compliance or license revocation. Personal Appearance Required.
(mm)	(1) An owner and a base owner shall each maintain on file with the Commission a current telephone number (which must be connected to an answering machine or recording device), pager number, answering service number or similar means of telephone contact, so that the owner and base owner may each be reached by the Commission on a twenty-four hour basis.	$100 Personal Appearance Not Required.
	(2) An owner and a base owner must each respond to any telephone or pager contact from the Commission within forty-eight hours, seven days a week.	$500 Personal Appearance Not Required.
(nn)	On July 1, 2008, and thereafter, owners and base owners shall transmit electronically	For a violation that oc-

on a monthly basis to the Commission the electronic trip record data required by §4-09(gg).	curs on or before December 31, 2008, $250; otherwise $250 and suspension until compliance.Personal Appearance Not Required.

***** Current through December 2009 ****

35 RCNY 4-10

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-10 Owner's and Base Owner's Responsibilities for Paratransit Vehicle and Equipment.

PenaltyAn owner and a base owner shall be separately responsible for compliance with and liable for viola- tions of subdivisions (j), (k), (l) and (m) of this section.

(a)	An owner shall keep all for-hire vehicles clean, well-painted and of good appearance.	$25 Personal Appearance Not Required.
(b)	A base owner shall only dispatch a paratransit vehicle after the base owner inspects and reasonably determines that all equipment, including brakes, tires, lights, signals, wheelchair ramps, fastening devices, and heating and ventilation units are in good working order and meet all requirements of the New York State Vehicle and Traffic Law and these Commission rules. The owner shall be responsible for all repairs.	$50-$500 Personal Appearance Not Required.
(c)	An owner shall only allow paratransit vehicles to be dispatched which have been inspected and approved by the New York State Department of Transportation.	$100-$500 Personal Appearance Not Required.
(d)	An owner shall comply with the New York State Department of Transportation regulations and inspection requirements and schedules.	$100 Personal Appearance Not Required.
(e)	An owner shall make all repairs or alterations that the New York State Department of Transportation may require to meet their specifications or to maintain proper standards of safety and comfort. These repairs or alterations shall be made within the time period prescribed at state inspections.	$100 Personal Appearance Not Required.
(f)	An owner shall replace a paratransit vehicle when the New York State Department of Transportation Inspectorial Services determines that the vehicle is unsafe or unfit for	$100-$500 and/or suspension up to 30 days.

	use as a paratransit vehicle for hire and directs the owner to remove it from service immediately. Failure to comply with the order to replace the vehicle within one hundred and twenty (120) days of service thereof, shall be deemed by the Commission as abandonment of the paratransit vehicle license and revocation proceedings may be initiated.	Personal Appearance Required.
(g)	An owner is responsible for removing all official markings, when he sells or disposes of a paratransit vehicle, unless he obtains Commission approval in approved transfers.	$100 Personal Appearance Not Required.
(h)	An owner shall comply with all Commission notices, summons, and directives to correct defects in a paratransit vehicle.	$100 Personal Appearance Not Required.
(i)	An owner shall only allow to be dispatched paratransit vehicles having equipment and devices specifically required by the Vehicle and Traffic Law and the Commission for use of paratransit vehicles unless the owner obtains written authorization from the Commission (excluding mobility devices, such as grab bars or non-slip flooring).	$30-$300 and/or suspension up to 30 days. Personal Appearance Required.
(j)	An owner shall affix and a base owner shall be responsible for confirming that the vehicle has affixed a current New York City commercial use motor vehicle tax stamp to the lower right side of the paratransit vehicle windshield, so as to be plainly visible.	$25 Personal Appearance Not Required.
(k)	Prior to January 1, 2008, the owner shall affix and the base owner shall be responsible for confirming that the owner has affixed to the paratransit vehicle Commission identification stickers (exterior decals), the company name or trade name and other vehicle identification numbers and markings required by the Commission and New York State Law. Notwithstanding the provisions set forth in this subdivision (k), on and after January 1, 2008, the owner and base owner shall be responsible for:	
	(i) when the paratransit vehicle is first licensed by the Commission, having the mileage of the paratransit vehicle verified as being in accord with section 4-18(j) of this chapter, by producing to the Commission at licensing the New York State Department of Transpor- tation Form MC300 dated not more than one month prior to licensing indicating the vehicle mileage and,(ii) when the paratransit vehicle is first licensed by the Commission, its license is being renewed, or when otherwise necessary, having affixed to each paratransit vehicle a valid Commission decal so as to be plainly visible.	$50 Personal Appearance Not Required.
(l)	An owner and a base owner shall not display advertising on the exterior or interior of a paratransit vehicle unless the owner and base owner have first obtained Commission authorization.	$50 Personal Appearance Not Required.
(m)	An owner and a base owner shall only permit the operation and the dispatch of a paratransit vehicle when the following are present in the vehicle:(1) the driver's written trip record;(2) the driver's paratransit license;(3) the registration certificate or a photostat thereof; (4) the paratransit vehicle license or a photostat thereof;(5) the individual vehicle insurance card or photostat thereof; (6) the lease card or agreement, if any, or a photostat thereof;(7) all required notices; and(8) a two-way radio, if the base owner uses a radio system; and.(9) on and after July 1, 2008, an electronic trip record system in lieu of the written trip record set forth in paragraph (1) of this subdivision, unless such system malfunctions, the malfunction is timely reported to the Commission and the paratransit vehicle is operated for hire not more than three (3) business days before being repaired, during which time a written trip record shall be used.	$15 for each violation of this rule. Personal Appearance Not Required.
(n)	On July 1, 2008, and thereafter, owners and base owners shall install in all paratransit vehicles an electronic trip record system that collects electronic trip record data required by subdivision 4-09(gg) during and for each trip.	$250 and suspension until compliance. Personal Appearance Not Required.
(o)	(1) On July 1, 2008, and thereafter, an owner shall not allow to be dispatched and a base	(1) $500 Personal Ap-

owner shall not dispatch a paratransit vehicle unless the electronic trip record system in the paratransit vehicle required by subdivision (n) of this section is in good working order.	pearance Required.
(2) Should such system malfunction, the base owner shall report the malfunction to the Commission's Safety and Emissions Facility within twenty-four (24) hours of the time when the base owner knew or should have known of the malfunction, and the owner shall have the system repaired or replaced within three (3) business days of the report to Safety and Emissions. A paratransit vehicle in which the electronic trip record system is malfunctioning shall not be dispatched more than three (3) business days following the time when the malfunction was reported to Safety and Emissions.	(2) $250 Personal Appearance Required.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-11 Owner's and Base Owner's Responsibilities to the Passengers and Public.

		Penalty
(a)	Owners and base owners shall be courteous toward passengers and the general public, including Commission personnel, while performing the owner's and the base owner's duties and responsibilities as an owner and a base owner.	$25 Personal Appearance Not Required.
(b)	An owner and a base owner shall not threaten, harass, or abuse any passenger, Commission representative, or any other person while performing the owner's and the base owner's duties and responsibilities as an owner and a	

		Penalty
	base owner. An owner and a base owner shall not harm or use physical force against or attempt to harm or use physical force against a service animal that is accompanying a person with a disability.	$50-$350 and/or suspension up to 30 days. Personal Appearance Required.
(c)	An owner and a base owner shall not use or attempt to use any physical force against a passenger, Commission representative, or any other person, while performing the owner's and the base owner's duties and responsibilities as an owner and a base owner. An owner and a base owner shall not harm or use physical force against or attempt to harm or use physical force against a service animal that is accompanying a person with a disability.	$20-$350 and/or suspension up to 30 days possible revocation (OATH) Personal Appearance Required.

(d)	An owner and a base owner shall:(1) Schedule the daily pickups of passengers and the dispatchment of a paratransit vehicle as expeditiously as possible, to prevent and avoid an unreasonably late pickup or no pickup.	(1) $25 Personal Appearance Not Required.
	(2) If such pickup is unreasonably delayed or cancelled, the owner or base owner shall promptly notify the waiting passenger of the delay or cancellation.	(2) $50 Personal Appearance Not Required.
(e)	An owner shall train or arrange for the training of every driver in the knowledge, expertise and skills to properly and safely assist any person with a disability or other passenger in and out of a paratransit vehicle, and how to properly utilize the wheelchair ramp, the fastening devices, and any safety precautions or other devices contained in the vehicle.	$50-$150 Personal Appearance Required.
(f)	An owner and a base owner shall monitor the behavior and conduct of the drivers toward the passengers. An owner and a base owner shall also investigate complaints by a passenger and shall take appropriate and reasonable action.	$50-$250 and/or suspension until a monitoring procedure is devised and/or other appropriate action is taken to the satisfaction of the Commission. Personal Appearance Required.
(g)	An owner shall not charge or attempt to charge a fare above the approved rate of fare currently filed with the Commission. An owner shall not impose or attempt to impose any additional charge for transporting a person with a disability, a service animal accompanying a person with a disability or a wheelchair or other mobility aid.	See §4-13 Personal Appearance Required.
(h)	An owner shall not refuse by words, gestures or any other means, without justifiable grounds to provide transportation to any orderly person, who has prearranged the trip and the destination is within New York City, unless he does not have a vehicle then available for the requested transportation.	See §4-13 Personal Appearance Required.
	Penalty	
(i)	(1) An owner shall inspect the interior of the paratransit vehicle after each workshift and any property found shall be taken without delay to the police precinct where the garage is located unless its rightful owner is known or can be found and is notified within a reasonable time.(2) The owner shall promptly inform the Commission of any property found and taken to a police precinct.	(1) $50-$250 Personal Appearance Not Required.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-12 Owners' and Drivers' Responsibilities for the Handling of Passengers with Infectious Diseases.

		Penalty
(a)	Owners and Drivers shall adhere to all Federal, State and City laws, rules and regulations, if any, in regard to the handling of passengers with infectious diseases.	$25-$1,000 Possible suspension or revocation (OATH) Personal Appearance Required.
(b)	Owners shall adhere to all Federal, State and City laws, rules and regulations, if any, in regard to any necessary provisions which must be provided to the drivers or passengers when transporting passengers with infectious diseases (eg. masks, gloves, etc.).	$25-$1,000 Possible suspension or revocation (OATH) Personal Appearance Required.
(c)	(1) Owners and Drivers shall adhere to all Federal, State, and City laws, rules and regulations, if any, in regard to the cleaning of paratransit vehicles after transporting passengers with infectious diseases and the disposal of any contaminated materials. Note: According to the New York City Emergency Medical Service and the New York State Department of Health, the following is an appropriate disinfectant solution: One (1) part sodium hypochlorite solution (bleach) to nine (9) parts water-fill the bucket with water first and then add the solution. *(This solution is incompatible with acids, organic material or reducing agents. Therefore, this solution should never be mixed with hydrogen peroxide, ammonia or any other cleansing agent.) (2) The owner must provide protective clothing, (goggles, gloves, gowns, and masks) to anyone under his employ who disinfects the vehicle.(3) if a stretcher is contaminated,	$25-$1,000 Possible suspension or revoca-

clean/disinfect by wiping, however, if it is saturated then dispose of it in an appropriate manner. Also, dispose of any contaminated linen.Note: Dispose of contaminated material by placing the items in a buff-colored impervious plastic bag and seal the bag and tag it as "contaminated" and dispose of the material in the manner approved at a local hospital.(4) in the case of gross contamination, where the vehicle is saturated or encrusted then the vehicle must be sterilized, through the use of steam gas or liquid agents.	tion (OATH) Personal Appearance Required.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-13 Mandatory Penalties.

(a) Any licensee who has been found to have violated a provision of sections 4-06(b), 4-07(d), 4-08(g), 4-08(i)(1), 4-08(n), 4-08(t), 4-09(a), 4-09(b), 4-09(c), 4-09(h), 4-09(w), 4-09(bb), 4-11(g), 4-11(h) or any combination thereof, shall be fined not less than $100 nor more than $350 for each violation for which a licensee is convicted. Any licensee who has been found in violation of any of the provisions of such rules or any combination thereof, for a second time within a twenty-four month period shall be fined not less than $350 nor more than $500. The Commission shall mandatorily revoke the driver's, the base owner's or the owner's license of any paratransit driver, base owner or owner who has been found to have violated any of the provisions of sections 4-06(b), 4-07(d), 4-08(g), 4-08(i)(1), 4-08(n), 4-08(t), 4-09(a), 4-09(b), 4-09(c), 4-09(h), 4-09(w), 4-09(bb), 4-11(g), 4-11(h) or any combination thereof, three times within a twenty-four month period. Nothing contained herein shall limit or restrict any other authority the Commission may have to suspend or revoke a paratransit driver's license.

(b) The twenty-four month period referred to above shall be calculated with reference to the date of the conviction of the violation.

(c) The Commission will not issue any license to any individual, corporation or partnership who/which has had his/its license revoked for a period of at least one year from the date of such revocation.

Any licensee who has had five (5) or more summonses issued to him that remain open and outstanding for a twelve (12) month period shall have his license automatically revoked at the end of said twelve month period. The twelve month period shall be calculated from the date of the issuance of the summons.

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-15 Seizure and Forfeiture of Unlicensed Paratransit Vehicles.

(a) **Seizure.** In accordance with §19-506(h) of the Administrative Code of the City of New York, any officer or employee of TLC designated by the Chairperson of TLC, and any police officer may, upon service of a summons for violation of subdivision b or c of §19-506 of the Administrative Code, seize any vehicle which such officer or employee has probable cause to believe is operated or offered to be operated without an appropriate vehicle license in violation of such subdivision b or c. A vehicle seized in accordance with such §19-506(h) shall be removed to a designated secured facility.

(b) **Summons and Notice of Seizure.**

(1) The officer or employee effecting seizure shall serve a summons for violation of subdivision b or c of §19-506 of the Administrative Code upon the owner of the seized vehicle, by service upon the owner or upon a person who uses such vehicle with the permission of the owner, express or implied.

(2) An officer or employee of TLC who effects seizure as described in §4-15(a) shall also deliver to the vehicle owner a notice of seizure, including identification of the seized vehicle and information concerning these regulations and the designated secured facility to which the vehicle was or will be taken. Such notice of seizure may be delivered in the same manner as service of the summons.

(3) An officer or employee of TLC shall also mail a notice of seizure to the owner of the vehicle. Any defect in delivery or mailing of a notice of seizure shall not affect the validity of service of a summons upon the owner as described in §4-15(b)(1) herein.

(c) Expedited hearing concerning a seized vehicle. The summons shall set forth a date and time for a hearing in the administrative tribunal of TLC. Such hearing shall be held within seven calendar days after seizure, or, if the seventh day is a Saturday, Sunday or City government holiday, no later than on the business day next following the seventh day.

(d) **Release of a seized vehicle prior to the scheduled hearing.**

(1) An owner of a vehicle is eligible for release of a seized vehicle prior to the scheduled hearing if the owner meets the following criteria: the owner has not been found in violation two or more times of subdivision b or c of §19-506 of the Administrative Code for acts committed on or after February 20, 1990 and within a thirty-six month period.

(2) An owner meeting the criteria of §4-15(d)(1) herein may obtain the release of the vehicle by appearing at the administrative tribunal with the notice of violation, on or before the scheduled hearing date, either to:

(i) Plead guilty, be determined by TLC staff as having met the criteria of §4-15(d)(1) herein and be assessed a civil penalty by an administrative law judge. TLC staff shall also determine the amount of removal and storage fees. The owner must pay in full the civil penalty and removal and storage fees. Upon such payment, TLC shall issue an order to release the vehicle. The owner or his agent may present the order at the designated secured facility to obtain the vehicle.

(ii) Be determined by TLC staff as having met the criteria of §4-15(d)(1) herein, and post a bond in the amount of the maximum civil penalty, plus removal and storage fees. Upon the posting of such bond, TLC shall issue an order to release the vehicle. The owner or his or her agent may present the order at the designated secured facility to obtain the vehicle.

(3) If the owner does not obtain the vehicle by the date specified in the order of release, the owner shall be responsible for any further storage fees, and payment of such fees shall be made before the release of the vehicle.

(4) A vehicle shall not be released from storage prior to the scheduled hearing if the owner fails to meet the criteria of §4-15(d)(1) herein.

(e) **Decisions at the expedited hearing.**

(1) If the administrative law judge dismisses the summons, the administrative law judge shall issue an order for release of the seized vehicle without removal and storage fees.

(2) If the administrative law judge finds that the owner was in violation and that this was not the third or subsequent violation by the owner of subdivision b or c of §19-506 of the Administrative Code committed on or after February 20, 1990 and within a thirty-six month period, the administrative law judge shall assess a civil penalty as provided in §19-506(e) of the Administrative Code, and TLC staff shall assess removal and storage fees. The owner must pay the civil penalty and removal and storage fees in order to obtain from TLC an order for release of the seized vehicle.

(3) If the administrative law judge finds that the owner was in violation and that this was the third or subsequent violation by the owner of subdivision b or c of §19-506 of the Administrative Code committed on or after February 20, 1990 and within a thirty-six month period, the administrative law judge shall set a civil penalty, as provided in §19-506(e) of the Administrative Code, and shall issue a notice to the owner and to the Chairperson of TLC or his or her designee that the vehicle is subject to forfeiture upon a judicial determination.

(4) **Inquest hearings.** If the owner of the seized vehicle fails to appear for the hearing, an inquest hearing will be held. An administrative law judge shall make a determination pursuant to paragraph (1), (2), or (3) of this subdivision (e). TLC will inform the respondent of the inquest determination by first class mail. The information mailed to the owner shall include the provisions of §4-15(i) herein concerning abandoned vehicles. The respondent may appear at

TLC offices within seven calendar days of such mailing to comply with the inquest determination or to move in the administrative tribunal to vacate such inquest determination. In the event that such inquest determination is vacated, the respondent shall be entitled to a hearing de novo on the original summons. Such hearing shall be scheduled within seven calendar days of the order vacating the inquest determination, or, if the seventh day is a Saturday, Sunday or City government holiday, no later than on the business day next following the seventh day.

(f) **Appeals.** If found in violation of subdivision b or c of §19-506 of the Administrative Code, an owner must pay the civil penalty together with removal and storage fees in order to appeal. However, if the decision to be appealed was made pursuant to §4-15(e)(3), the owner must pay only the civil penalty in order to appeal. If upon appeal the decision is reversed in whole or part, the owner shall receive a refund of the relevant civil penalty and fees.

(g) **Forfeiture.**

(1) In addition to the penalties set forth in §19-506(e) of the Administrative Code, if an owner is convicted in the criminal court or found in the TLC administrative tribunal to be in violation of subdivision b or c of §19-506 of the Administrative Code three or more times, and all of such violations were committed on or after February 20, 1990 and within a thirty-sixth month period, the interest of such owner in any vehicle used to commit such third or subsequent violation shall be subject to forfeiture upon notice and judicial determination.

(2) The Chairperson of the TLC or his or her designee shall determine whether to pursue the remedy of forfeiture. If such person determines not to pursue the remedy of forfeiture, the owner shall be so notified by first class mail. The owner may obtain an order of release of the vehicle by paying the civil penalty determined pursuant to §4-15(e)(3) together with removal and storage fees.

(3) A forfeiture proceeding shall be commenced by proper service upon the owner of a summons and other papers pursuant to the provisions of the civil practice law and rules.

(h) **Public sale pursuant to forfeiture.**

(1) After a judicial determination of forfeiture, but no sooner than thirty days after such determination and upon notice of at least five days, the TLC shall sell such forfeited vehicle at public sale, except as provided in paragraph (2) herein. Such notice of sale shall be published in the City Record or in a newspaper of general circulation, and shall also be mailed to any lienholder or mortgagee shown in the records of the jurisdiction which issued the number license plates on the vehicle.

(2) Any person, other than an owner whose interest is forfeited pursuant to §19-506 of the Administrative Code and these rules, who establishes a right of ownership in a vehicle, including a part ownership or security interest, shall be entitled to delivery of the vehicle if such person:

(i) redeems the ownership interest which was subject to forfeiture by payment to the city of the value thereof;

(ii) pays the reasonable expenses of the safekeeping of the vehicle between the time of seizure and such redemption; and

(iii) either

(A) asserts a claim in the forfeiture proceeding; or

(B) submits a claim in writing to the commission within thirty days after judicial determination of forfeiture.

(3) Notwithstanding paragraphs (1) and (2) of this subdivision (h), establishment of a right of ownership shall not entitle a person to delivery of a vehicle if TLC establishes in the forfeiture proceeding or in a separate administrative adjudication of a claim asserted pursuant to §4-15(h)(2)(iii) herein that the violations of subdivision b or c of §19-506 of

the Administrative Code upon which the forfeiture is predicated were expressly or impliedly permitted by such person.

(4) If a person asserts a claim pursuant to §4-15(h)(2)(iii)(B) herein, the TLC shall schedule an adjudication of such claim in its administrative tribunal. Notice of the hearing shall be mailed to the claimant at least ten business days in advance of the hearing. The administrative law judge shall rule as to whether the violations upon which the forfeiture was predicated were expressly or impliedly permitted by the claimant. If the administrative law judge finds that there was such permission by the claimant, the claim shall be denied.

(i) **Abandoned vehicles.**

(1) If an owner does not assert an interest in a seized vehicle by removing it from storage within the time periods specified in paragraph (2) of this subdivision (i), the vehicle shall be deemed abandoned. A declaration of such abandonment may be made by the deputy commissioner for legal affairs of TLC or his or her designee, without further hearing.

(2) A vehicle shall be deemed abandoned, pursuant to paragraph (1) herein, if an owner:

(i) has not removed the vehicle from storage within five days of obtaining an order of release pursuant to section 4-15(d) or (e) herein; or

(ii) has not paid the civil penalty and removal and storage fees within five days of a hearing determination of violation pursuant to §4-15(e)(2) herein, or within seven days after notice of an inquest determination of violation was mailed to the owner pursuant to §4-15(e)(4) herein; or

(iii) has not obtained an order vacating an inquest determination of violation and setting a hearing de novo, within seven days after notice of such inquest determination was mailed to the owner pursuant to §4-15(e)(4) herein; or

(iv) has not paid the civil penalty and removal and storage fees, within seven days after a notice that the TLC will not pursue the remedy of forfeiture was mailed to the owner pursuant to §4-15(g)(2) herein.

(3) In the event that a vehicle has been deemed abandoned pursuant to paragraphs (1) and (2) of this subdivision (i), TLC shall mail to the owner a notice that the vehicle has been recovered by TLC as an abandoned vehicle and that, if unclaimed, its ownership shall vest in TLC and it will be sold at public auction or by bid after ten days from the date such notice was mailed. Such notice shall also be mailed to any lienholder or mortgagee shown in the records of the jurisdiction which issued the number license plates on the vehicle.

(4) An owner, lienholder or mortgagee may claim the vehicle within ten days from the date that the notice described in paragraph (3) of this subdivision (i) was mailed, by paying the removal and storage fees due and, in the case of an owner, the civil penalty claimed as a lien by TLC on such vehicle.

(5) In the event that an abandoned vehicle is not claimed within ten days after the notice described in paragraph (3) of this subdivision (i) was mailed, ownership of the abandoned vehicle shall vest in TLC. TLC may sell an abandoned vehicle at public auction or by bid. Any proceeds from the sale, less expenses incurred for removal, storage and sale of the vehicle and less the civil penalty claimed as a lien by TLC, shall be held without interest for the benefit of the former owner of the vehicle for one year. If not claimed within such one year period, such proceeds shall be paid into the general fund by TLC.

(j) **Removal and storage fees.**

(1) The removal fee shall be one hundred fifty dollars ($150).

(2) The storage fee shall be ten dollars ($10) per day or such other amount as may be set by the New York City Department of Transportation.

Section added City Record Mar. 29, 1996 eff. Apr. 30, 1996. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Mar. 29, 1996:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter; and under section 19-506(h) of such Code, authorizing TLC to seize unlicensed wheelchair accessible vans.

The promulgated regulations implement Section 19-506(h)of the Administrative Code, which provides that unlicensed wheelchair accessible vans may be seized by the Commission and the New York City Police Department. The regulations delineate the procedures for the seizure and release of unlicensed wheelchair accessible vans; establish fees for the removal and storage of such vehicles; and provide for the forfeiture of vehicles which are not redeemed.

The purpose of the regulations is to provide TLC with the enforcement tools needed to combat the public safety problem of wheelchair accessible vans operating without a license.

§4-16 License Fees.

(a) Pursuant to §19-511 of the Administrative Code of the City of New York, the license fee for the operation of a wheelchair accessible van base is five hundred dollars ($500) annually.

(b) Pursuant to §19-504(b) of the Administrative Code of the City of New York, the license fee for each wheelchair accessible van shall be two hundred seventy-five dollars ($275) annually.

(c) Pursuant to §19-505(j) of the Administrative Code of the City of New York, the fee for a paratransit vehicle driver's license shall be sixty dollars ($60) annually.

(d) The fee for an original license or a renewal thereof shall be paid at the time of filing the applications and shall not be refunded in the event of disapproval of the application.

(e) There shall be an additional fee of twenty-five dollars ($25) for late filing of a license renewal application where such filing is permitted by the Commission.

(f) An additional fee of twenty-five dollars ($25) shall be paid for each license issue to replace a lost or mutilated license.

(g) Pursuant to §19-504(h) of the Administrative Code of the City of New York, a vehicle licensee may change the base with which it is affiliated, subject to the approval of the Commission and upon payment of a fee of twenty-five dollars ($25).

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-17 Critical Driver Program.

(a) The paratransit driver's license of any driver who, within a period of fifteen months, accumulates six or more points against his license issued by the Department of Motor Vehicles, or an equivalent license issued by the driver's state of residence, unless previously revoked, shall be suspended for thirty days.

(b) The paratransit driver's license of any driver who, within a period of fifteen months, accumulates ten or more points against his license issued by the Department of Motor Vehicles, or an equivalent license issued by the driver's state of residence, shall be revoked.

(c) The Commission may at any time review the fitness of a driver to be licensed by the Commission in view of any moving violation, accident, or other driving related incident. Nothing contained herein shall preclude the imposition by the Commission of additional or more severe penalties, or any other action deemed appropriate, in accordance with the Rules of the Commission.

(d) For the purpose of this Rule, the points assigned by the Department of Motor Vehicles for any violation shall be deemed to have been accumulated as of the date of occurrence of the violation.

(e) The relevant fifteen-month period to be used for calculating any suspension or revocation imposed under subsection (a) or (b) herein shall be calculated from the date of the most recent occurrence which led to a conviction of a violation carrying points; provided however, that no action under subsection (a) or (b) shall be taken with regard to any violation carrying points which occurred prior to the effective date of this Rule.

(f) For the purpose of calculating penalties pursuant to subsection (a) or (b) herein, a driver who has accumulated points for multiple violations arising from a single incident shall be deemed to have accumulated points for the single violation with the highest point total.

(g) Any licensee who voluntarily attends and satisfactorily completes a motor vehicle accident prevention course approved by the Department of Motor Vehicles, and who furnishes the Commission with proof that the course was completed after the effective date of this Rule, shall have two (2) points deducted from the total number of points assessed pursuant to this Rule. No point reduction shall affect any suspension or revocation action taken pursuant to these Rules prior to the completion of the course. No person shall receive a point reduction pursuant to this subdivision more than once in any eighteen-month period, and no person shall receive a point reduction unless attendance at the course is voluntary on the part of the licensee.

HISTORICAL NOTE

Section added City Record Sept. 20, 1999 §1, eff. Oct. 20, 1999. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Sept. 20, 1999:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, authorizing the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City; under §2303(b) of such Charter, authorizing the TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter; under §19-506 of said Code, authorizing the Commission to adopt rules regulating the suspension or revocation of drivers' licenses issued by the Commission; and under §19-507.2 of said Code, setting forth a Critical Driver Program for licensees.

The rules adopt a Critical Driver Program for operators of Commuter Vans and Paratransit Services Vehicles, to conform with the program adopted by the Commission relating to Taxicab and For-Hire Vehicle drivers. This program was modified by changes to the Administrative Code enacted into law on May 26, 1999. A driver who accumulates six (6) or more points on his DMV license within fifteen (15) months shall have his TLC license suspended for thirty (30) days. A driver who accumulates ten (10) or more points within a fifteen month period shall have his TLC license revoked. The rules also provide the opportunity for a licensee to receive a two-point reduction through voluntary attendance at a safety-related course.

The purpose of these amendments is to conform Commission rules and standards applicable to paratransit services drivers and commuter van drivers to the rules presently applicable to Taxicab and For-Hire Vehicle drivers. This regulation protects the riding public by ensuring that drivers who have either multiple or serious convictions on their DMV licenses will not be permitted to transport members of the public for hire.

The regulations promulgated herein are more stringent than those applicable to commuter van drivers, and certain paratransit services drivers, pursuant to Article 19-A of the Vehicle and Traffic law, and will ensure that all licensees of the Commission are treated in the same manner.

35 RCNY 4-18

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 4 PARATRANSIT SERVICES-TRANSPORTING PEOPLE WITH DISABILITIES*1

§4-18 Vehicle Retirement and First Licensing.

(a) All paratransit vehicles first licensed by the Commission on or after January 1, 2008, shall meet the mileage specifications of a qualified replacement paratransit vehicle set forth in subdivision (j) of this section and shall comply with subdivision (h) of this section unless excepted pursuant to subdivision (i) of this section.

(b) All paratransit vehicles that are of model year 1998 or earlier must be retired from paratransit service no later than the expiration dates of their paratransit vehicle licenses on and after January 1, 2008.

(c) All paratransit vehicles that are of model year 2000 or earlier must be retired from paratransit service no later than the expiration dates of their paratransit vehicle licenses on and after January 1, 2009.

(d) All paratransit vehicles that are of model year 2002 or earlier must be retired from paratransit service no later than the expiration dates of their paratransit vehicle licenses on and after January 1, 2010.

(e) All paratransit vehicles that are of model year 2004 or earlier must be retired from paratransit service no later than the expiration dates of their paratransit vehicle licenses on and after January 1, 2011.

(f) On and after January 1, 2012, all paratransit vehicles shall be retired no later than seven (7) years after the vehicle was first licensed.

(g) A paratransit vehicle that cannot pass the New York State Department of Transportation inspection must be retired, regardless of whether its retirement date has been reached. A paratransit vehicle which has reached its

retirement date must be retired, regardless of whether it may still pass the New York State Department of Transportation inspection.

(h) When the paratransit vehicle is first licensed by the Commission, the Commission shall verify that the mileage on the New York State Department of Transportation Form MC300 for such vehicle, dated not more than one month prior to the paratransit vehicle licensing, accords with the specifications in subdivision (j) of this section.

(i) An owner may request an extension of a vehicle's retirement date no later than two months before that retirement date. The extension request must include documentation demonstrating that a new vehicle has been ordered but will not be delivered until after the retirement date, but no later than 60 days after the retirement date. The Commission's Chairperson, or his or her designee, may confirm the delivery date independently. Should the owner's documentation comply fully with the terms of this section and the compliant delivery date is confirmed, an extension of the vehicle's retirement date to the projected delivery date of the new vehicle shall be granted.

(j)(1) On and after January 1, 2008, all qualified replacement paratransit vehicles shall have been driven less than 100,000 miles;

(2) On and after January 1, 2009, all qualified replacement paratransit vehicles shall have been driven less than 50,000 miles;

(3) On and after January 1, 2010, all qualified replacement paratransit vehicles shall have been driven less than 25,000 miles; and

(4) On and after January 1, 2011, all qualified replacement paratransit vehicles be of the most recent model year or the immediately preceding model year and shall have been driven less than 500 miles.

35 RCNY 5-01

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 5 TAXICAB BROKERS

§5-01 Definitions.

Applicant. An applicant is an individual, partnership or corporation seeking a license as a taxicab broker.

Broker, taxicab. A taxicab broker is an individual, partnership or corporation, who may hereinafter be referred to as "broker," who, for another and whether or not acting for a fee, commission or other valuable consideration, acts as an agent or intermediary in negotiating the transfer of a taxicab license (medallion) or of stock of or in a corporation which holds a taxi license (medallion), and/or negotiating a loan secured or to be secured by an encumbrance upon or transfer of a taxicab license (medallion), or licensed vehicle.

Commission. Commission means the New York City Taxi and Limousine Com- mission.

Mailing address of broker. Mailing address of broker means the address, maintained by the broker as his principal place of business, and designated by him for the mailing of all notices and correspondence from the Commission and for service of summonses. However, a broker may also designate a post office box number address as a mailing address.

Medallion. A medallion is a plate issued by the Commission as the physical evidence of a taxicab license, and affixed to the outside of such taxicab.

Net listing. Net listing means an agency or other agreement whereby a prospective vendor of a taxicab or an interest therein, lists such taxicab or interest therein for sale with a licensed taxicab broker authorizing the sale thereof at a specified net amount to be paid to the seller and authorizing the broker to retain as commission, compensation, or otherwise, the difference between the price at which the taxicab or interest therein is sold and the specified net amount

to be received by the vendor.

Owner. Owner means an individual, partnership, limited liability company or corporation licensed by the Commission to own and operate a medallion taxicab or taxicabs.

Renewal applicant. Renewal applicant means a broker seeking a renewal of a valid taxicab broker's license.

Taxicab license. Taxicab license means the authority granted by the Commission to an owner to operate a designated vehicle as a taxicab in the City of New York evidenced by a medallion.

Transfer. A transfer is a conveyance of any interest in a taxicab license or stock in a corporation holding a taxicab license, from one party to another.

35 RCNY 5-02

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 5 TAXICAB BROKERS

§5-02 General Provisions for the Licensing of Taxicab Brokers.

(a)(1) An individual, the members of a partnership, or the officers and shareholders of a corporation, applying for a taxicab broker's license must provide proof of identity to the Commission in the form of:

(i) A valid form of photo identification issued by the United States, any state or territory thereof, or any political subdivision of such state or territory; and

(ii) A valid, original social security card.

(2) An individual, the members of a partnership, or the officers and shareholders of a corporation applying for a taxicab broker's license or its renewal:

(i) shall be at least twenty-one (21) years of age;

(ii) shall be of good moral character;

(iii) shall be able to speak, read, write and understand the English language; and

(iv) shall have actively participated in the taxicab brokerage business under the supervision of a licensed taxicab broker for a period of not less than one (1) year, or shall have had the equivalent experience in the general taxicab business for a period of at least two (2) years, the nature of which participation or experience shall be established by affidavit duly sworn to under oath and/or other and further proof as required by the Commission. This requirement may be waived by the Commission in its discretion.

(b) The applicant for a broker's license shall be in such form and detail as the Commission shall prescribe, and shall include the following:

(1) the place or places, with the street and number, where the business is to be conducted;

(2) the business or occupation theretofore engaged in by the applicant, or, if a partnership, by each member thereof, or, if a corporation, by each officer and shareholder thereof, for a period of two years immediately preceding the date of such application, setting forth the place or places where such business or occupation was engaged in and the name or names of employers, if any;

(3) if, in addition to services as a broker, the brokerage or any principal thereof will be acting as a lender, insurance broker or automobile dealer, or has a financial interest in such lender, insurance brokerage firm or automobile dealership, full information as to extent of such interest; and

(4) such further information as the Commission may require in order to determine if the applicant is qualified to assume the duties and obligations of a taxicab broker.

(c) The applicant shall deposit with the Commission a bond, in the penal sum of fifty thousand ($50,000) dollars, containing one or more sureties to be approved by the Commission. Such bond shall be payable to the City of New York and shall be conditioned that the license applicant or licensee will comply with the provisions of the Administrative Code and any rules or regulations of the Commission, and shall pay all fines imposed by the Commission and all judgments awarded for damages occasioned to any person by reason of any such licensee, his agents or employees, while acting within the scope of their employment, made, committed or omitted in the business conducted under such license, or caused by any other violation of Title 19, Chapter 5 of the Administrative Code in carrying on the business for which such license is granted. The term judgment shall include but not be limited to an order of an Administrative Law Judge of the Commission directing restitution to an aggrieved party. The broker is immediately liable for satisfaction upon determination of the fine or award judgment, or, if timely appeal is taken, upon final determination of the appeal.

(d) An individual, the members of a partnership, and officers and shareholders of a corporation, applying for a broker's license, shall be fingerprinted. Fingerprinting shall also be required of new officers and shareholders of such corporation. The Commission must be notified of any new officers or shareholders within five working days of their selection and continued use of the brokerage license may be permitted contingent upon completion of the background investigation. An individual, the members of a partnership and officers and shareholders of a corporation who provide funds for the brokers, shall be fingerprinted, unless such provider is a licensed bank or loan company. The requirements of this subdivision (d) may be waived by the Commission in its discretion.

(e) An attorney, applying for a taxicab broker's license, who demonstrates that he is a member in good standing of the Bar of the State of New York, need not submit proof as herein required by subdivisions (a) and (d) hereof.

(f) If the applicant is a partnership, it shall file with its license application a certificate from the clerk of the county where the principal place of business is located.

(g) No corporate or trade name will be accepted by the Commission which is similar to a name already in use by another taxicab broker.

(h) If the applicant is a corporation, it shall file with its license application a certified copy of its certificate of incorporation. A list of its officers and shareholders and a certified copy of the minutes of the meeting at which the current officers were elected shall also be furnished.

(i) An applicant or renewal applicant shall not offer or give any gifts or gratuity to any employee(s), representative(s) or member(s) of the Commission, any public servant(s) or other person(s) either to a specified

recipient or to a general group and whether or not the donor indicates an expectation of something in return in the course of occupation as a taxicab broker or applicant therefor, and shall immediately report to the Inspector General of the Commission any request or demand for any gift or gratuity by any employee(s), representative(s) or member(s) of the Commission, any public servant(s) or such other person(s).

(j) If the Commission determines that the applicant has failed to meet the requirements for a taxicab broker's license it will within a reasonable time deny the license or its renewal and specify in writing to the applicant the reason for such denial.

(k) Any material falsification contained in an original or renewal application for a license, any failure to notify the Commission of any material change in the information contained therein or any attempt by an applicant or broker to conceal the identity of a party having an interest, direct or indirect, in his business of taxicab brokerage shall be cause for denial of such application or revocation or suspension of such license, in addition to any other sanctions imposed by the Commission.

(l) Taxicab broker's licenses shall be issued as of January first and shall expire on December thirty-first next succeeding, unless sooner suspended or revoked by the Com- mission.

(m) If at any time during the term of the taxicab broker's license the Commission becomes aware of information that the broker no longer meets the requirements for a taxicab broker's license, the Commission may deny his renewal application, or suspend or revoke his license in the manner provided in the Procedures in the Event of a Violation of Commission Rules (§5-08).

(n) A taxicab broker's license issued to an individual may be used after the death of such licensee by his duly appointed administrator or executor in the name of the estate pursuant to authorization granted by the surrogate under the provisions of section two hundred fifteen-a of the surrogate's court act for a period of not more than one hundred twenty days from the date of death of such licensee in order to complete any unfinished taxicab transactions in the process of negotiation by the broker existing prior to his decease. The period of one hundred twenty (120) days may be extended upon application to the Commission, for good cause shown.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 5 TAXICAB BROKERS

§5-04 Office Procedure.

(a) A broker shall report to the Commission at its main administrative office, Legal Affairs, in person or by registered or certified mail return receipt requested, a change in his mailing address and in the address of any other office where his taxicab brokerage business is conducted, within seventy-two (72) hours, exclusive of weekends and holidays.

(b) A broker

(1) shall not request nor permit a party to sign a Power of Attorney or any other instrument in blank nor accept any such instrument signed in blank;

(2) if the broker shall request any instrument or document to be signed by any interested party and returned to said broker, the broker shall provide said interested party with a duplicate copy of the instrument for the party's own records. If any interested party attends a closing, at which time the interested party is presented with an instrument or other document for signature, the broker shall furnish such interested party with a photocopy of the signed instrument at the closing;

(3) upon completion of a closing, or other transaction, the broker shall, within ten (10) business days of such completion, deliver to the interested party copies of all other documents prepared by the broker or under the broker's supervision on behalf of such party;

(4) the broker shall request the party receiving such papers to acknowledge, in writing, receipt of same.

(c) A broker shall keep and maintain for a period of three (3) years the following records:

(1) the names and addresses of transferor(s), transferee(s), mortgagee(s), or other lien holder(s) if any;

(2) the purchase price;

(3) amount of deposit paid on contract;

(4) amount of commission paid to broker;

(5) expenses of procuring the mortgage loan, if any;

(6) closing statements; and

(7) listing placed with the broker.

(d) (1) A broker shall cooperate with all law enforcement personnel and authorized representatives of the Commission, and shall comply with all their reasonable requests.

(2) A broker shall answer and/or comply with all questions, communications, directives within seventy-two (72) hours of receipt from the Commission or its representatives. An emergency communication shall be answered immediately.

(3) A broker shall answer all summonses from the Commission on the scheduled date as same may be adjourned.

(4) A broker shall, upon demand, furnish to the Commission or its representatives for inspection all records and documents listed in §5-04(c).

35 RCNY 5-05

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 5 TAXICAB BROKERS

§5-05 Relationship to Parties of a Taxicab Transaction.

(a) (1) A broker shall not offer a taxicab for transfer unless he is authorized to do so by the owner.

(2) An owner may withdraw his authorization by giving written notice of such withdrawal to the broker except where an exclusive has been given for a fixed period.

(b) In all agreements obtained by a broker which provide for an exclusive listing of a taxicab, the broker shall have attached to the listing or printed in boldface type on the listing or printed on the reverse side of the listing and signed or initialed by the owner the following explanation in type size of not less than six point;

An "exclusive right to sell" listing, where the owner has surrendered to a specific broker the owners right to sell, means that if you, the owner of the taxicab medallion, find a buyer for your taxicab, or if another broker finds a buyer, you must pay the agreed commission to the present broker.

(c) A broker shall not be a party to an exclusive listing contract which shall contain an automatic continuation of the period of such listing beyond the fixed termination date set forth therein.

(d) A broker shall not induce any party to a contract for the transfer of a taxicab medallion to break such contract for the purpose of substituting in lieu thereof a new contract with another principal.

(e) A broker shall disclose the fact that in writing to his principals if, in addition to his services as a broker for their medallion transaction, he is acting also as a lender, insurance broker, automobile dealer or in any such other capacity, or

has a financial or other interest in such lender, insurance brokerage firm or automobile dealership.

(f) A broker shall not make or enter into a net listing contract for the transfer of a medallion or any interest therein unless it is part of a bulk transfer of ten (10) or more medallions owned by a fleet or minifleet and is completed within no more than six (6) months of the listing.

(g) A broker shall not accept any commission, rebate or profit on expenditures made by such broker for his principal without the latter's full knowledge and written consent which said consent shall be retained by the broker for a period of three years.

35 RCNY 5-06

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 5 TAXICAB BROKERS

§5-06 Standard of Conduct.

(a) A broker shall not directly or indirectly buy for himself any interest in a medallion listed with him without first disclosing such fact to the owner in writing.

(b) A broker shall not sell a medallion in which he owns an interest, unless he makes known to the vendee such interest in writing.

(c) (1) A broker with whom a medallion and rate card have been left for purposes of sale shall deliver said medallion and rate card to the Commission for placement into storage within 48 hours of receipt of same, exclusive of holidays or weekends.

(2) A broker shall not operate or cause to be operated any medallion delivered to him without the owner's knowledge and express written and duly acknowledged consent.

(d) (1) A broker, to whom money has been advanced on a contract by a transferee shall not pay over any part of such funds to the transferor or any other person without the written approval of the transferee.

(2) The broker shall not commingle such funds with his own, but shall deposit same promptly in a separate, Federally insured, special account.

(3) The broker, upon making such deposit, shall notify in writing the person who advanced the money, giving the name and address of the bank in which the money was deposited and the amount of such deposit.

(4) The broker shall not retain or benefit from accrued interest, if any, from such account, unless authorized, in writing by his principal.

(e) (1) Any advertisement placed by a broker shall indicate that the advertiser is a licensed broker.

(2) A broker shall not use deceptive or misleading advertising.

(f) A broker, while performing his duties and responsibilities as a taxicab broker, shall not commit or attempt to commit, alone or in concert with another, any act of fraud, material misrepresentation, dishonesty or larceny or perform any willful act of omission or commission which is against the best interests of the public.

(g) A broker, who arranges a loan for his principal shall give such principal a copy of the lender's commitment and of all other documents provided to the broker by the lender.

(h) A broker shall advise the parties to a sale, in writing, of their right to be represented by an attorney of their own choosing and/or an accountant with respect to such medallion transfer.

(i) (1) A broker within ten (10) business days after the completion of a closing (including the financial closing) shall provide his principal(s) and the Commission with a written closing statement setting forth the following:

(i) Names and addresses of seller(s) and purchaser(s).

(ii) Medallion(s) being sold.

(iii) Sales price.

(iv) Vehicle cost (if any).

(v) Amount of personal funds furnished by purchaser.

(vi) Names and addresses of lenders together with amount(s) of loans(s).

(vii) Broker's commission.

(viii) Itemization and explanation of all disbursements or payments made on behalf of such party.

(2) A broker shall, within ten (10) business days after completion of the financial closing, remit all monies due his principal(s).

Title 35 Taxi and Limousine Commission

CHAPTER 5 TAXICAB BROKERS

§5-07 Responsibility to the Commission.

(a) A broker, his representative(s) and/or employee(s), shall not offer or give any gift or gratuity to any employee(s), representative(s) or member(s) of the Commission, or any public servant(s), either to a specified party or to a general group of persons and whether or not there is an expectation of something in return.

(b) A broker shall immediately report to the Commission or to the New York City Department of Investigation any request or demand for a gift or gratuity by any employee(s), representative(s) or member(s) of the Commission, or any public servant(s).

(c) A broker, including a member of a partnership or any officer or shareholder of a corporation or representative and/or employee thereof, shall immediately notify the Commission of his conviction of a crime. Such notification shall be in writing and must be accompanied by a certified copy of the certificate of disposition issued by the Clerk of the Court.

(d) A broker, his representative and/or employee shall not threaten, harass or abuse any governmental or Commission representative, public servant or other person, in the course of his occupation as a taxicab broker or representative and/or employee of a broker.

(e) A broker, his representative and/or employee shall not use or attempt to use any physical force against a Commission representative, public servant or other person in the course of his occupation as a taxicab broker, or representative and/or employee of a broker.

(f) A broker without the consent of the Commission, shall not employ or use the services of any individual whose license as a taxicab broker has been revoked or is suspended or who was the chief executive officer of a partnership or corporation whose license has been revoked or is suspended.

(g) No broker or attorney in the capacity of a broker, without the prior written consent of the Commission, shall act on behalf of any broker who has not been licensed by the Commission or whose license has been suspended or revoked.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 6-01

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 6 FOR HIRE VEHICLES

§6-01 Definitions.

Accessible vehicle. An accessible vehicle is a wheelchair accessible vehicle that is authorized by the Commission to transport passengers by prearrangement and for-hire and that meets the specifications and requirements for accessible vehicles pursuant to the Americans with Disabilities Act of 1990, as amended, and regulations promulgated pursuant thereto.

Affiliated driver. An affiliated driver is a person who drives a for-hire affiliated vehicle and who is required to be licensed by the Commission.

Affiliated vehicle. An affiliated vehicle is a for-hire vehicle other than a black car or a luxury limousine which a base station is authorized by the Commission to dispatch.

Base. A base is a base station, a black car base, or a luxury limousine base.

Base license. A base license is a license issued by the Commission for operation of a base.

Base owner. A base owner is an individual, partnership or corporation licensed by the Commission to operate a base.

Base station. A base station is a central facility which manages, organizes or dispatches affiliated vehicles licensed under Chapter 5 of Title 19 of the Administrative Code, not including luxury limousines or black cars.

Base station owner. A base station owner is any individual, partnership or corporation licensed by the Commission

to own and operate a base station.

Black car. A black car is a for-hire vehicle dispatched from a central facility whose owner holds a franchise from the corporation or other business entity which operates such central facility, or who is a member of a cooperative that operates such central facility, where such central facility has certified to the satisfaction of the Commission that more than ninety percent of the central facility's for-hire business is on a payment basis other than direct cash payment by a passenger.

Black car base. A black car base is a central facility which operates a two-way radio or other communications system used for dispatching or conveying information to drivers of black cars.

Chairperson. The Chairperson is the chairperson of the Commission, or his or her designee.

Chauffeur's license. A chauffeur's license is a valid chauffeur's license of the State of New York or a valid license of similar class from another state of which the licensee is a resident.

Clean air for-hire vehicle. A clean air for-hire vehicle is a for-hire vehicle licensed by the Commission that receives an air pollution score of 9.0 or higher from the United States Environmental Protection Agency or its successor agency and is estimated to emit 6.4 tons or less of equivalent carbon dioxide per year by the United States Department of Energy or its successor agency; provided that such vehicle is powered by the fuel for which such vehicle meets the above-specified standards.

Commission. Commission means the New York City Taxi and Limousine Com- mission.

Decal. A decal is a sticker issued by the Commission evidencing licensing of a for-hire vehicle.

Dispatch. A dispatch is a request for a driver by a base to provide transportation to a passenger who has previously arranged for such transportation with the base.

Driver. A driver is a person who drives a for-hire vehicle and who is required to be licensed by the Commission.

For-hire vehicle. A for-hire vehicle is a motor vehicle carrying passengers for hire in the City, with a seating capacity of twenty passengers or less, excluding the driver, with three (3) or more doors, other than a taxicab, coach, wheelchair accessible van, commuter van or an authorized bus operating pursuant to applicable provisions of law, and not permitted to accept street hails from prospective passengers in the street and required to be licensed by the Commission.

For-hire vehicle driver's license. A for-hire vehicle driver's license is a license issued by the Commission to persons who meet Commission qualifications as for-hire vehicle drivers.

For-hire vehicle permit. A for-hire vehicle permit is a permit issued by the Commission to a for-hire vehicle or base owner to allow a vehicle affiliated with a base to be dispatched by said base.

Issuing jurisdiction. An issuing jurisdiction is a county within New York State contiguous to the City of New York that requires issuance of a license, permit, registration, certification or other approval for a vehicle to perform the pre-arranged pick up or drop off of one or more passengers for compensation in such jurisdiction.

Issuing jurisdiction driver's license. An issuing jurisdiction driver's license shall mean a license, permit, registration, certification or other approval issued by an issuing jurisdiction to operate a vehicle for transportation for hire by pre-arrangement.

Issuing jurisdiction vehicle license. An issuing jurisdiction vehicle license shall mean a license, permit, registration, certification or other approval issued by an issuing jurisdiction to the owner of a vehicle used to provide

transportation for hire by pre-arrangement.

Line work. Line work is a type of pre-arranged service provided pursuant to a contract with a black car base in which the dispatch and passenger assignment are completed at the point of pick up by an employee or contractor of either the black car base or the contracting party.

Livery. Livery means a for-hire vehicle designed to carry fewer than six passengers, excluding the driver, which charges for service on the basis of flat rate, time, mileage, or zones.

Luxury limousine. A luxury limousine is a for-hire vehicle with a seating capacity of twenty passengers or less, excluding the driver, which is dispatched by its base from a central facility which has certified to the satisfaction of the Commission that more than ninety percent of its for-hire business is on a payment basis other than direct cash payment by a passenger, and whose passengers are charged on the basis of garage to garage service and on a flat rate basis or per unit of time or mileage, for which there is maintained personal injury insurance coverage of no less than five hundred thousand dollars per accident where one person is injured and one million dollars per accident for all persons injured in that same accident if said vehicle has a seating capacity of fewer than nine passengers, and which meets the minimum liability insurance requirements set forth in these rules if the vehicle has a seating capacity of ten or more passengers.

Luxury limousine base. A luxury limousine base is a central facility which operates a two-way radio or other communications system used for dispatching or conveying information to drivers of luxury limousines.

Mailing address. Mailing address means the address designated for the mailing of all notices and correspondence from the Commission and for service of summonses. In the case of the base, it shall be the base address. In the case of the driver, it shall be the home address of the driver.

Passenger. A passenger is a person who has engaged a for-hire vehicle for the purpose of being transported to a destination, or a person who is awaiting the arrival of a dispatched for-hire vehicle.

Penalty point. A penalty point is a non-monetary penalty assessed against either a base owner or the owner of a for-hire vehicle upon conviction for violation of certain provisions of this chapter.

Person with a disability. A person with a disability is an individual with a physical or mental impairment or incapacity, including any person who uses a wheelchair, three-wheel scooter, crutches, other mobility aid or a service animal, but who can transfer from such a mobility aid to a for-hire vehicle with or without reasonable assistance.

Portable or hands-free electronic device. A "portable or hands-free electronic device" is any electronic device able to:

1. make a wireless telephone call

2. send or receive a text message

3. allow its user to speak on the telephone hands-free or operate a device by voice command, even when otherwise allowed by New York State law

4. act as a personal assistant (PDA)

5. send and or receive data from the internet or from a wireless network

6. act as a laptop computer or portable computer

7. receive or send pages

8. allow two-way communications between different people or parties

9. play electronic games

10. play music or video; or

11. make or display images; or

12. any combination of the above

This definition is to be liberally construed in light of its purpose to minimize the distraction of drivers, and in recognition of the rapid development of electronic technologies and proliferation of electronic devices that may be made available in the future that similarly transfer digital images, sounds or messages.

"Portable or hands-free electronic device" does not include: (1) any device the use of which while driving is specifically authorized by TLC rules, or (2) the use of a global positioning navigation system ("GPS") which uses voice functions to convey directions, so long as the driver is not inputting data unless legally standing or parked and the GPS is not capable of being used as a cell phone or other portable or hands-free electronic device.

Qualified jurisdiction. A qualified jurisdiction is an issuing jurisdiction which meets the requirements for reciprocity set forth in §498 of the New York State Vehicle and Traffic Law.

Rooflight. Rooflight means equipment attached to the roof of a vehicle, or extending above the roofline of a vehicle, for the purpose of displaying any information. In any instance in which Commission rules permit a rooflight, the permitted rooflight shall be of a one-piece solid translucent material; it shall not approximate the shape or appearance of a taxi rooflight; it may bear only the name of the base with which the vehicle is affiliated, alone or with either a telephone number or a car number; and the name shall not include the words "hack," "taxi," "taxicab," "cab" or "coach."

Seating Capacity. Seating capacity shall include any plain view location which is capable of accommodating a normal adult, is part of an overall seat configuration and design and is likely to be used as a seating position while the vehicle is in motion. For the purpose of determining "seating capacity", the definition of "designated seating position" contained in the United States Department of Transportation Regulations as set forth in the Code of Federal Regulations, as may be amended from time to time, is hereby incorporated by reference.

Service animal. A service animal is a guide dog, signal dog or any other animal trained specifically to work or to perform tasks for a person with a disability, including, but not limited to, guiding individuals with visual impairments, alerting individuals with hearing impairments to intruders or sounds, providing minimal protection or rescue work, pulling a wheelchair or retrieving dropped items.

Sponsor. Sponsor is a base owner who is licensed by the Commission and has entered into an agreement with a prospective driver, who, if licensed by the Commission, will be affiliated with said base for a stated period of time.

Vehicle owner. A vehicle owner is an individual, partnership or corporation in whose name a vehicle is titled. For purposes of these rules, the term shall also apply to the lessee of the vehicle from the titled owner. Service shall be deemed proper service on the vehicle owner if sent to the registrant or the lessee of the vehicle.

Weapon. A weapon is any firearm (as defined in the New York State Penal Law) for which a license has not been issued as provided in the New York State Penal Law and the Administrative Code of the City of New York, electronic dartgun, gravity knife, switchblade knife, canesword, billy, blackjack, bludgeon, metal knuckles, chuka stick, sandstick, slingshot, pilum ballistic knife, sand bag, sand club, wrist brace type slingshot, shirken, kung fu star, dagger, dangerous knife, dirk, razor, stiletto, imitation pistol or any other instrument or thing whether real or simulated and capable of

inflicting or threatening bodily harm, including but not limited to any other weapons, the possession of which is prohibited pursuant to the New York State Penal Law.

Wheelchair accessible livery. A wheelchair accessible livery shall mean a livery which meets the requirements of section 6-28(a) of this chapter and the owner of which vehicle has opted to participate in the dispatch program as set forth in chapter 16 of this title.

Wheelchair accessible vehicle. A wheelchair accessible vehicle is a for-hire vehicle which is designed for the purpose of transporting persons in wheelchairs or containing any physical device or alteration designed to permit access to and enable the transportation of persons in wheelchairs.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Base station owner was found to have operated a commuter van service without a license. The administrative law judge rejected owner's argument that the vehicle, a limousine with a seating capacity of ten, did not fit within the definition of either a luxury limousine (which is defined in section 6-01(a) as a for-hire vehicle designed to carry fewer

than nine passengers) or a commuter van (which is defined in section 9-01 as a for-hire motor vehicle having a seating capacity of at least nine passengers but not more than twenty passengers). The administrative law judge ruled that seating capacity, not physical shape of the vehicle, is the determinative factor. **Taxi and Limousine Comm'n v. Absolute Class Limousine, Inc.,** OATH Index No. 995/98 (Apr. 22, 1998).

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 6-02

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 6 FOR HIRE VEHICLES

§6-02 Terms of Licenses.

(a) The term of every driver and vehicle owner license issued by the Taxi and Limousine Commission under the For-Hire Vehicle Rules shall be as follows:

(1) A license issued to a new applicant for a for-hire vehicle driver's license shall expire one year subsequent to the date the license was issued as provided in §6-14.

(2)(A) A license issued to a renewing applicant for a for-hire vehicle driver's license shall expire two years from the date on which the previous license expired. The Commission may, in its discretion, extend the expiration date of such license by up to an additional thirty-one days.

(B) The holder of a renewal license under subparagraph (a)(2)(A) of this paragraph who is in the second year of such license and who has completed the drug test required by §6-16(v)(1) of this chapter for licensees in the first year of such license, may, upon written request to the Chairperson, advance the expiration date of his or her license to any date prior to the scheduled expiration of such license. One such request may be made during the term of such license. The request must be made on a form to be prescribed by the Chairperson or his or her designee and must be submitted in accordance with instructions on that form.

(C) The holder of a license seeking to renew such license after advancing the expiration date thereof hereunder must comply with all requirements for renewal applicants, including with the requirements imposed by §§6-02 and 6-16 of this chapter; notwithstanding the provisions of §6-16(v) of this chapter, the drug test provided for therein shall be performed no sooner than thirty (30) days prior to, and in any event, no later than, such advanced expiration date. For

purposes of §6-16(v) of this chapter, a licensee who has advanced his or her expiration date shall be treated as a licensee in the second year of a two-year license.

(D)(i) Notwithstanding the provisions of §6-02(a)(4) of this chapter, the holder of a renewal license under subparagraph (a)(2)(A) of this paragraph that expires between March 16, 2006, and June 23, 2006, inclusive, may request an extension of the time to submit a license renewal application on the ground that the licensee was unable to submit to license renewal drug testing as required by §6-16(v)(1) of this chapter due to the licensee's absence from the New York City area during the entire time provided by that section for submission to such drug testing.

(ii) The request for an extension of time to submit a license renewal application shall be made in writing to the Chairperson or his or her designee and shall include documentation demonstrating that the holder of the license was absent from the New York City area during the entire time provided by §6-16(v)(1) of this chapter for submission to drug testing for the renewal of such license, and was therefore not reasonably able to submit a license renewal application before the expiration of such license.

(iii) Any such request for an extension of time must be received by the Chairperson or his or her designee no later than September 15, 2006. If the Chairperson or his or her designee grants the request, the licensee's time to submit an application for renewal of his or her license shall be extended to six months after the expiration of his or her license.

(iv) A license renewal application submitted by a licensee granted such an extension must comply with all requirements for renewal applications, including payment of the late-filing fee provided by §6-03(e) of this chapter, except that the drug test required by §6-16(v) of this chapter shall be taken no sooner than thirty (30) days prior to the completion of such license renewal application.

(v) The expiration of a license shall not be affected by the licensee's eligibility for an extension, or request for an extension, of the time to submit a license renewal application under this paragraph, and such license shall remain expired until a renewal license is issued under item (iv) of this subparagraph.

(3)(A) A license issued to a new applicant for a for-hire vehicle license shall expire two years subsequent to the date the license was issued. A license issued to a renewing applicant for a for-hire vehicle license shall expire two years subsequent to the date on which the previous license expired. The Commission may, in its discretion, extend the expiration date of such license by up to an additional thirty-one days.

(B) A for-hire vehicle permit shall terminate prior to the expiration date upon revocation or surrender of the permit, or surrender of the vehicle's license plates to the applicable state department of motor vehicles, and such permit shall not thereafter be renewed or reinstated.

(4) (A) Prior to July 1, 2009, a renewing applicant must file a completed application on or before the expiration date of the license.

(B) (i) On and after July 1, 2009, a renewing applicant must file a completed application for renewal of a for-hire vehicle permit not less than thirty (30) days before the expiration date of the permit.

(ii) The Commission will permit a renewing applicant to file a completed application at any time up until the expiration date of the for-hire vehicle permit upon payment of a $25 late fee.

(iii) No renewal application will be accepted after the expiration date of the for-hire vehicle permit and such permit will expire and not be renewed.

(5) A person who engages in a licensed activity after the expiration date of a license and before the issuance of a renewal license is engaged in unlicensed activity and may be subject to penalties pursuant to applicable statutes and regulations. Nothing contained herein shall prohibit the Commission from taking any action pursuant to §6-14(b) with

respect to conduct which occurred during the probationary period of a new applicant's driver's license, either prior or subsequent to the expiration of the probationary period.

(6) All new applicants must attend and complete a defensive driving course from a school, facility or agency authorized by the Commission and certified by the New York State Department of Motor Vehicles. The course must have been completed within six (6) months prior to the date of application.

(7) All renewal applicants are required to attend and complete an authorized defensive driving course as described in subsection (5). A renewal applicant who submits a Certificate of Completion for an authorized defensive driving course completed less than three (3) years from the date of the renewal application shall be exempt from this requirement.

(b) The term of every base license issued by the Taxi and Limousine Commission under the For-Hire Vehicle Rules shall be as follows:

(1) A license issued to a new applicant applying for a license on or after July 1, 2009 shall expire three years subsequent to the last day of the month in which the new license is issued. (For example, a new applicant files on October 10, 2009 and TLC issues a license on March 24, 2010. That license would expire on March 31, 2013.)

(2) A license issued to a renewing applicant with a license expiring on or after July 1, 2009 shall expire three years from the date on which the previous license expired. (For example, a renewing applicant whose license expired on July 31, 2009 would receive a license expiring on July 31, 2012. An applicant who did not submit a completed renewal application until July 31, 2009 would still receive a license that expired on July 31, 2012, and may be subject to penalties pursuant to paragraphs (5) and (6) below.)

(3) Licenses issued prior to July 1, 2009 shall expire (A) two years from the date on which the previous license expired if a renewal license or (B) two years subsequent to the last day of the month in which the license was issued, if a new license.

(4) A renewing applicant for a base license must file a completed application by no later than sixty days before the expiration date of the license. A renewing applicant must pay a late fee of $25 with any late application filed later than 60 days before the expiration date of the license. No renewing applicant shall be permitted to file a renewal application after the date of expiration of its license. The license of a base which fails to file a completed renewal application prior to the expiration date of the base's license will expire and not be renewed.

(5) A person who engages in a licensed activity after the expiration date of a license and before the issuance of a renewal license is engaged in unlicensed activity and may be subject to penalties pursuant to applicable statutes and regulations, except as provided in paragraph (6).

(6) If timely application for renewal of the license has been made pursuant to Rule 6-02(b)(4), the Chairperson shall extend the effectiveness of the license pending the review of the renewal application. If a renewal license is subsequently issued in such case, its term shall expire as provided in paragraphs (2) and (3) above. If a renewal application is denied, the applicant shall not be considered to have been unlicensed prior to the date of denial of the renewal application.

(c) The Commission may deny an application for a license or renewal of a license or, after notice and hearing, revoke or suspend any license issued, if it finds that an applicant has made a material misstatement or misrepresentation on an application for such a license or the renewal thereof.

NOTE

1. Statement of Basis and Purpose in City Record Mar. 27, 1997:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city, under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter; and under section 19-511 of such Code, authorizing TLC to require base licenses "upon such terms as it deems advisable."

The promulgated rules establish two-year licenses for base stations, black car bases and luxury limousine bases. Local Law 51 of 1996 established a detailed review process for base station licenses that would be more appropriate to a two-year license. An annual license renewal requirement would be burdensome on both the applicant and the agency. For simplicity, a term is established for other base licenses that is equal to the term for base station licenses. Provision is made to continue the effectiveness of licenses during the renewal application review process, if the application is timely. The rule requires that an application for renewal must be made no less than sixty days prior to expiration of the license, to be considered timely. This is intended to establish adequate time for an orderly review process as required by local law, reducing the need to extend the effectiveness of licenses during the renewal application review process.

35 RCNY 6-03

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 6 FOR HIRE VEHICLES

§6-03 License and Administrative Fees.

(a) Pursuant to section 19-511 of the Administrative Code of the City of New York, the license fee for the operation of a base station is five hundred dollars ($500) annually. The license fee for the operation of a black car base is five hundred dollars ($500) annually. The license fee for the operation of a luxury limousine base is five hundred dollars ($500) annually.

(b) Pursuant to §19-504(b) of the Administrative Code of the City of New York, the license fee for each for-hire vehicle shall be two hundred seventy-five dollars ($275) annually.

(c) Pursuant to §19-505(j) of the Administrative Code of the City of New York, the fee for a for-hire vehicle driver's license shall be sixty dollars ($60) annually.

(d) The fee for an original license or a renewal thereof shall be paid at the time of filing the application and shall not be refunded in the event of a disapproval of the ap- plication.

(e) There shall be an additional fee of twenty-five dollars ($25) for late filing of a license renewal application where such filing is permitted by the Commission.

(f) An additional fee of twenty-five dollars ($25) shall be paid for each license issued to replace a lost or mutilated license.

(g) Pursuant to §19-504(h) of the Administrative Code of the City of New York, a vehicle licensee may change the

base with which it is affiliated, subject to the approval of the Commission and upon payment of a fee of twenty-five dollars ($25).

(h) Pursuant to §19-504(k) of the Administrative Code of the City of New York, the fee for replacement of license plates issued by the New York State Department of Motor Vehicles shall be twenty-five dollars ($25) per vehicle.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 6-04

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 6 FOR HIRE VEHICLES

§6-04 License to Operate a Base Station, Black Car Base or Luxury Limousine Base.

(a) (i) No person shall operate a base without a current and valid license from the Commission, which license is not suspended, revoked or expired. In addition to any penalties specified by this chapter, any person operating a base without a current and valid license, including a license which is suspended, revoked or expired shall be subject to penalties applicable to unlicensed operation. Subdivisions (b) through (d) and (f) and (g) and (j) of this section shall apply only to applicants for a base station license or renewal thereof, or to applicants for a change in base station location pursuant to §6-06(d) of this Chapter, except where otherwise noted.

(ii) For purposes of this subdivision (a), no suspension of a base license following a hearing under chapter 8 of this title shall be effective until notice of the suspension is given by the Commission. Such suspension shall be effective, for purposes of this subdivision (a), (A) ten days after mailing if service is made by certified mail, or (B) upon delivery if service is made by hand delivery. Where a base license is suspended for failure to pay a fine, the suspension shall be effective ten days after service of notice of the suspension, regardless of the method of service of the notice.

(b) (1) An applicant for a license to operate a base station shall demonstrate to the satisfaction of the Commission that the operator of the base station shall provide and utilize lawful off-street facilities for the parking and storage of the licensed for-hire vehicles that are to be dispatched from the base station equal to not less than one parking space for every two such vehicles or fraction thereof. The maximum permissible distance between the base station and such off-street parking facilities shall be one and one-half miles. The off-street parking facilities shall be in a location zoned for the operation of a parking facility.

(2) A license for a base station which was valid on September 18, 1996 shall only be renewed upon the condition

that within two years of such renewal the licensee shall provide off-street parking facilities as required by paragraph (1) of this subdivision. (Example: Base Station ABC license expires on May 31, 1997. Base Station ABC must have off-street parking by May 31, 1999 in order to renew at that time.)

(3) Notwithstanding the provisions of paragraphs (1) and (2), the Chairperson may reduce the number of required off-street parking spaces or may waive such requirement in its entirety upon a determination that sufficient lawful off-street parking facilities do not exist within the maximum permissible distance from the base station or an applicant demonstrates to the satisfaction of the Chairperson that complying with the off-street parking requirements set forth in paragraphs (1) and (2) would impose an economic hardship upon the applicant; except that the Chairperson shall not reduce or waive the off-street parking requirements where it has been determined in an administrative proceeding that the applicant, or a predecessor in interest, has violated any provision of section 6-05 of the rules of the Commission or any successor thereto, as such may from time to time be amended. A determination to waive or reduce the off-street parking requirements shall be made in writing, shall contain a detailed statement of the reasons why such determination was made and shall be made a part of the Commission's determination to approve an application for a base station license.

(4) No base station license shall be renewed where it has been determined after an administrative proceeding that the applicant has failed to comply with the off-street parking requirements set forth in paragraph (1) of this section or as they may have been modified pursuant to paragraph (3) of this section.

(c) (1) An applicant for a license to operate a base station shall demonstrate to the satisfaction of the Commission that he or she is fit to operate a base station. The Commission shall consider the ability of the applicant to adequately manage the base station, the applicant's financial stability and whether the applicant operates or previously operated a licensed base station and the manner in which any such base station was operated. The Commission shall also consider any relevant information maintained in the records of the Department of Motor Vehicles or the Commission.

(2) No license for a new base station shall be issued for a period of three years subsequent to a determination in a judicial or administrative proceeding that the applicant or any officer, shareholder, director or partner of the applicant operated a base station that had not been licensed by the Commission.

(3) An applicant for a license to operate a base station, black car base or luxury limousine base shall be fingerprinted for the purpose of securing criminal history records from the New York State Division of Criminal Justice Services. The criminal history shall be reviewed in a manner consistent with Article 23-A of the New York State Correction Law. The applicant shall pay any processing fee required by the State. Fingerprints shall be taken of the individual owner if the applicant is a sole proprietorship; the general partners if the applicant is a partnership; the officers, principals, and stockholders owning more than ten percent of the outstanding stock of the corporation if the applicant is a corporation. If subsequent to the fingerprinting of the applicant or during the term of the license, one or more partners, officers, principals or stockholders who are required to be fingerprinted pursuant to this subdivision is changed or added, such applicant shall, within five days of such change or addition, file with the Commission an application for an approval of the change or addition of partners, officers, principals or stockholders on such forms as are prescribed by the Commission, and such new partners, officers principals or stockholders shall be fingerprinted in accordance with this subdivision. Alternatively, an applicant who plans to change or add one or more partners, officers, principals or stockholders who are required to be fingerprinted pursuant to this subdivision may require that such fingerprinting be done prior to the change or addition of such new partner, officer, principal or stockholder.

(d) (1) In reviewing an application for a license to operate a base station, the Chairperson shall examine and consider the adequacy of existing mass transit and mass transportation facilities to meet the transportation needs of the public, and any adverse impact that the proposed operation may have on those existing services. The Chairperson shall also consider the extent and quality of service provided by existing lawfully operating for-hire vehicles and taxicabs.

(2) In its review of an application for a license to operate a new base station and in its review of an application to

renew a base station license the Commission shall consider the possible adverse effects of such base station on the quality of life in the vicinity of the base station including, but not limited to, traffic congestion, sidewalk congestion and noise. In its review of an application to renew a base station license the Commission shall consider whether a determination has been made after an administrative proceeding that the operator has violated any applicable rule of the Commission.

(e) Prior to the issuance of a license for a base or the renewal of a valid base license, the applicant shall provide to the Commission a bond in the amount of five thousand dollars with one or more sureties to be approved by the Commission. Such bond shall be for the benefit of New York City and shall be conditioned upon the licensee complying with the requirement that the licensee dispatch only vehicles which are currently licensed by the Commission and which have a current New York City commercial use motor vehicle tax stamp and upon the payment by the licensee of all civil penalties imposed pursuant to any provision of this chapter. The bond must be maintained by the base owner for the term of the license. The bond shall further permit the Commission to draw upon the bond to satisfy any penalties incurred by the base for any violation of this chapter which have not been paid following the imposition of the penalty and the completion of any appeal. The Chairperson will give the base owner 30 days' notice prior to drawing upon the bond to satisfy any penalty. In the event that the Commission draws on the bond, the base owner shall be assessed one penalty point.

(f) Upon receiving an application for the issuance of a license for a new base station or for the renewal of a license for a base station pursuant to this section, the Commission shall, within five business days, submit a copy of such application to the City Council and to the district office of the City Council member and the community board for the area in which the base station is or would be located.

(g) (1) The determination by the Commission to approve an application for a license to operate a new base station or for the renewal of a license to operate a base station shall be made in writing and shall be accompanied by copies of the data, information and other materials relied upon by the Commission in making that determination. Such determination shall be sent to the City Council and to the district office of the Council member within whose district that base station is or would be located within five business days of such determination being made.

(2) Any determination by the Commission to approve an application for a license to operate a new base station or to renew a license to operate a base station shall be subject to review by the City Council, in accordance with section 19-511.1 of the Administrative Code of the City of New York.

(h)(1) Every black car base and luxury limousine base that is a "central dispatch facility", as said term is defined in New York Executive Law §160-cc, shall, as a condition of obtaining a license or of continued licensure, become a member of the New York Black Car Operators' Injury Compensation Fund, Inc. ("Fund"), and shall register with the Department of State as a Member of the Fund. This provision shall not apply to a black car or luxury limousine base that owns fifty (50%) percent or more of the vehicles it dispatches.

(2) Each base which is a central dispatch facility under New York State Executive Law §160-cc shall furnish to the Commission a copy of its certificate of registration with the Fund. Every such black car base and luxury limousine base shall, as a condition of licensure, pay to the Department of State all fees due to said Department as required pursuant to State law.

(3) Every black car base and luxury limousine base subject to the provisions of the Fund shall add the surcharge required by State law and established by the Fund, to each invoice and billing for services, and to each credit payment of services performed by a vehicle affiliated with the base where the call originated from a centralized dispatch facility located within the State of New York, or wherein the trip originated from a point within the State of New York.

(4) In accordance with New York State Executive Law §160-jj, every black car base and luxury limousine base shall remit to the Fund all surcharges due and owing pursuant to subdivision (3) by no later than the fifteenth day of the

month following the month in which the surcharge is collected by the black car base or luxury limousine base.

(5) Every black car base and luxury limousine base shall comply with all applicable provisions of law governing the New York Black Car Operators' Injury Compensation Fund, Inc., and all rules and regulations promulgated thereunder.

(i) Every base station shall comply with all provisions of the New York State Workers' Compensation Law and rules and regulations promulgated thereunder with respect to the provision of coverage and benefits to eligible persons.

(j) Each applicant for a base station license or for the renewal of a base station license or for a change of ownership of a base station license must submit a business plan for the base station with such application. Such business plan must, at a minimum, set forth:

(1) The business name, address, telephone number, email address and 24 hour contact number for the base station;

(2) The base station's methods and practices for ensuring compliance with the rules of this chapter by itself, its employees, owners of vehicles affiliated with the base station, and drivers operating such vehicles;

(3) Such base station's plans to operate within the scope of, and in compliance with, the Commission's rules and how the base station intends to prevent recurrence of violations of the rules of this chapter incurred during the ending licensing term and the term preceding the ending term; (4) Policies and procedures to ensure that affiliated vehicles will make use of the base station's off-street parking location, the address of the off-street parking location and such location's distance from the base station, and policies and procedures to ensure that affiliated vehicles not using the off-street parking location shall comply with all applicable traffic and parking regulations;

(5) The number of vehicles affiliated with the base station (or, in the case of an applicant for a new license, the number of vehicles anticipated to be affiliated with the base station upon licensure) and the average number of vehicles anticipated to be affiliated during the term of the license;

(6) The number of requests for transportation received and the number of trips dispatched on a daily basis (or, in the case of an applicant for a new license, the number of requests anticipated to be received and the number of trips anticipated to be dispatched), and the average number of trips anticipated to be dispatched during the term of licensure;

(7) A description of how calls will be answered, rides dispatched, and complaints handled;

(8) Hours of operation of the base and office hours;

(9) A fare schedule in a form and format prescribed by the Chairperson;

(10) A plan for assuring that affiliated vehicles and the drivers of such vehicles provide transportation only through pre-arrangement made with the base station and do not accept passengers by street hail or other than by dispatch by the base station; and

(11) Such other matters as may be required by the Chairperson or the Commission as a condition of renewal of a base station license in light of the specifics of the base station's application and operating history.

NOTE

1. Statement of Basis and Purpose in City Record Jan. 30, 2000:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City; under §2303(b)(2) of such Charter, authorizing the TLC to promulgate rules and regulations relating to the standards and conditions of service; and under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter.

The rule amendments require all commuter van services, paratransit services, base stations, black car bases, and luxury limousine bases to comply with the applicable provisions of the New York State Workers' Compensation Law and other laws governing the provision of Workers' Compensation benefits for drivers affiliated with such licensees.

Chapter 49 of the Laws of 1999 was signed by the Governor into law on May 25, 1999 and became effective June 24, 1999. This Law amended the Workers' Compensation Law and added a new article of the Executive Law, to create the New York Black Car Operators' Injury Compensation Fund, Inc. ("Fund"). This Fund was created to provide a mechanism to secure Workers' Compensation benefits for owner-operators and designated drivers of vehicles affiliated with black car and luxury limousine bases. All black car and luxury limousine bases that either operate a centralized dispatch facility in New York State, or that dispatch vehicles for the acceptance of passengers within the State, are subject to this Law, unless the facility owns fifty (50%) percent or more of the vehicles it dispatches. The Executive Law mandates that all centralized black car and luxury limousine dispatch facilities located or doing business within the State of New York become members of the Fund. Section 160-hh(2) of the Executive Law further requires that each such centralized dispatch facility become a member of the Fund as a condition of receiving and retaining a local license.

The Law also requires that a surcharge, determined by the Fund, be added to all invoices and charges for covered transportation services. The surcharges collected must be remitted to the Fund by the fifteenth day of the month following the imposition of the charge. The Law provides a mechanism for the Local licensing authority to conduct hearings to adjudicate violations of the Law.

The maximum proposed fines for violations of the rules relating to participation in the Fund and compliance with all regulations are provided in the New York State Executive Law. Section 160-oo of the Executive Law provides for a fine in an amount not to exceed ten thousand dollars for any violation of the Law. If the violation is for a failure to remit surcharges to the Fund, a fine of up to five thousand dollars for each twenty days the payment is overdue, together with restitution and interest, is provided for. In addition, the Executive Law provides for discretionary revocation of the licensee's Fund membership. Since Fund membership is a requirement for licensure, such action would effectively revoke the license of any base required to become a member of the Fund. The minimum fine of twenty-five dollars for each day of violation is identical to the fine presently in effect with respect to the Taxicab Owners' rule requiring compliance with the Workers' Compensation Laws.

The purpose of the rules amendments is to ensure that black car and luxury limousine bases licensed by the TLC become members of the Fund, pay the required registration fees, charge the required surcharges, and remit the proceeds to the Fund.

For-hire vehicle base stations that do not meet the statutory definition of a Central Dispatch Facility, commuter van services, and paratransit services are not required to become a part of the Fund. However, under the proposed rule amendments, each licensee must nevertheless demonstrate that it is in compliance with all provisions of the Workers' Compensation Laws, either by providing coverage for their drivers and other eligible employees, or by demonstrating that they have no employees required to be covered under the Law. An amendment to the Rules is promulgated to require that each such licensee demonstrate that it is in compliance with the Law. The fine imposed is identical to the fine imposed for a violation of the Taxicab Owners' Rules with respect to the failure to comply with the Workers' Compensation Laws.

The purpose of this amendment is to ensure that all licensees of the Commission comply with State laws governing the provision of Workers' Compensation benefits for covered employees.

2. Statement of Basis and Purpose in City Record Sept. 20, 1999: The rules promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City; under §2303(b) of such Charter, authorizing the TLC to promulgate rules relating to the standards and conditions of service; under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules necessary to exercise authority conferred upon it by the Charter; and under §19-511 of such Code, setting forth requirements for the licensing of base stations by the Commission. The rule modifications set forth herein simplify the procedures for the change of location for licensed car service bases. The rules no longer provide that a change in the location of a licensed car service base requires the owner to file a new base application. Rather, the Commission will now review the application for the proposed base location change, utilizing the criteria for review of the proposed location as set forth in the Administrative Code §19-511. The base owner shall still be required to establish that the base meets the off-street parking requirements at the new location. Furthermore, the Commission will continue to review the need for additional transportation at the proposed location and perform an assessment of the impact of the base upon the quality of life at the proposed location. The purpose of the rule amendment is to streamline the review process for licensed bases seeking to change location, and to promote the more efficient utilization of Commission's resources. This change also enables the Commission to process requests for approval to relocate licensed bases more quickly, thereby reducing the negative impact the approval procedure has upon the operation of bases and their ability to provide adequate service to the public.

3. Statement of Basis and Purpose in City Record Sept. 27, 1996: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under section 2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; under section 19-502 of the Administrative Code of the City of New York, which defines terms used in the Administrative Code; under section 19-503 of such Code, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter; under section 19-506(e) of such Code, which establishes mandatory penalties for unlicensed operation; under 19-511 of such Code, authorizing the licensing of base stations; under section 19-511.1 of such Code, requiring TLC to forward determinations of base station licenses to the City Council; and under section 19-518 of such Code, governing the transfer of base station licenses. This rulemaking, in part, implements the provisions of Local Law 51 of 1996, which go into effect on September 18, 1996. The new law requires TLC to consider a number of factors in the licensing of base stations, such as adequate parking, the availability of mass transit, and quality of life issues. TLC's approval of an application, including a license renewal application, is subject to City Council review. The newly adopted law also increases the penalties for unlicensed operation of a base station and of a for-hire vehicle to $200-$1,500 per violation. This rulemaking also addresses a proposal which is not set forth in the local law but was recommended by an industry

panel. This proposal prohibits the use of meters. For-hire vehicle fares shall be set by distance or the use of fare zones. The purpose of this rule is to reduce the incidence of trips which respond to street hails and are not pre-arranged, contrary to the requirements of local law.

35 RCNY 6-05

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 6 FOR HIRE VEHICLES

§6-05 Transfer of Base Station Licenses.

(a) (1) (A) Any base station license or ownership interest in the licensee may be transferred to a proposed transferee who has demonstrated to the satisfaction of the Commission the qualifications to assume the duties and obligations of a base station owner provided that either the transferor or transferee shall have filed a bond to cover all the outstanding tort liabilities of the transferor arising out of the operation of a base station and the for-hire vehicle owners by the transferor which is in excess of the amount covered by any bond or insurance policy in effect pursuant to the New York State Vehicle and Traffic Law, and all outstanding fines, penalties and other liabilities which the transferor owes to the Commission shall have been satisfied. An application for approval of a transfer of an interest in a base station license or base station owner must include a business plan meeting the requirements of section 6-04(j) of this chapter. All such transfers and any changes in corporate officers or directors must be approved by the Commission in order to be effective and no such transfer or change shall be effective until approved and the Chairperson has given notice of the approval to the licensee. Furthermore, no application to approve a transfer of a base station license or an interest in a base station license or an interest in a base station owner shall be complete, and no approval of such application shall be effective, until both the transferor and transferee have appeared in person as directed by the Chairperson to complete the transfer, with such appearance to be in person for a party who is an individual, or by a general partner, if the party to the transfer is a partnership, or by an officer and stockholders holding a majority of the stock of the party, if the party to the transfer is a corporation.

(B) A base license or ownership interest in a black car base or luxury limousine base may be transferred to a proposed transferee who has demonstrated to the satisfaction of the Chairperson the qualifications to assume the duties and obligations of a base owner provided that all outstanding fines, penalties and other liabilities which the transferor

owes to the Commission shall have been satisfied. All such transfers and any changes in corporate officers or directors must be approved by the Chairperson and no such transfer or change shall be effective until approved and the Chairperson has given notice of the approval to the licensee. Furthermore, no application to approve a transfer of any black car base or luxury limousine base license or an interest in such a base license or an interest in the owner of such a base shall be complete, and no approval of such application shall be effective, until both the transferor and transferee have appeared in person as directed by the Chairperson to complete the transfer, with such appearance to be in person for a party who is an individual, or by a general partner, if the party to the transfer is a partnership, or by an officer and stockholders holding a majority of the stock of the party, if the party to the transfer is a corporation.

(2) No voluntary transfer of a base station license may be made if a judgment in favor of the City of New York or any agency thereof or any state or federal agency has been docketed with the clerk of any county within the City of New York against the licensee and remains unsatisfied, except that a transfer may be permitted if an appeal is pending from an unsatisfied judgment and a bond is filed in an amount sufficient to satisfy the judgment. A transfer may also be permitted without filing a bond provided that all the judgment creditors of a licensee file written permission for such a transfer with the Commission or that the proceeds from the transfer are paid into court or held in escrow on terms and conditions approved by the Commission which will have the effect of protecting the rights of all parties who may have an interest therein.

(b) In reviewing a proposed base station license transfer or transfer of the ownership interest in the license, the Commission shall consider:

(1) the criminal history of the proposed transferee and of the transferee's officers, shareholders, directors and partners, if any, or the proposed officer or directors, in a manner consistent with Article 23-A of the New York State Correction Law.

(2) any relevant information maintained in the records of the Department of Motor Vehicles or the Commission.

(3) transferee's financial stability.

(c) A transfer shall not be approved if in the past two years, the proposed transferee or any officer, shareholder, director or partner of the proposed transferee, where appropriate, has been found to have violated any law or rule involving:

(1) assaultive behavior toward a passenger, official or member of the public in connection with any matter relating to a for-hire vehicle;

(2) conviction for giving or offering an unlawful gratuity to a public servant, as defined in section 10.00 of the New York State Penal Law;

(3) providing the Commission with false information; or

(4) three unexplained failures to respond to an official communication of the Commission or the Department of Investigation which was sent via certified mail, return receipt requested.

(d) The fee for the transfer of a base station license or ownership interest in the licensee shall be $500.

(e) The Commission shall revoke any base station license for nonuse in the event it shall find after a hearing that the base station has not been in operation for sixty consecutive days, provided that such failure to operate shall not have been caused by strike, riot, war, public catastrophe or other act beyond the control of the licensee. The Commission shall also revoke, after a hearing, any base license in the event that the base location is not occupied by the base. Where the Commission finds that a particular base station cannot be operated due to an act beyond the control of the licensee, a temporary base station license shall be issued to the same licensee for an alternative location, provided that all other

requirements for such license are met and provided further that the unexpired term of the original license is six months or more. Such temporary base station license shall be for a term not to exceed 60 days. During the 60 day period, the base owner must either file an application to change the base location or must return to operation at the original base location and notify the Chairperson of the return. The temporary base station license will not be extended unless within the 60 day period the base owner either (1) files an application to change the base location and the Commission has not completed its review of the application within the 60 day period or (2) demonstrates that good cause exists for a further extension because the base owner requires additional time to return the base to the original location.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 6-06

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 6 FOR HIRE VEHICLES

§6-06 Base License Requirements.

A base station owner, black car base owner and luxury limousine base owner shall be responsible for compliance with the following provisions and shall be liable for violations thereof:

(a) A licensed base owner must at all times:

(1) Have at least ten (10) affiliated vehicles on or after January 1, 1988; however, a base that was first licensed prior to January 1, 1988, shall have at least five (5) affiliated vehicles.

(2) Maintain a principal place of business in a commercially zoned area, from which affiliated vehicles and drivers may be dispatched;

(3) Provide safe and adequate storage at such principal place of business for all business records which are required to be kept;

(4) Maintain an operable telephone at the base; and

(5) Provide a mechanism for transmitting trip request information to affiliated drivers.

(6) Conspicuously display within the base the current schedule of rates charged by the base;

(7) Conspicuously display the base name, any trade, business or operating name, and the TLC license number on the front or office door of the base's premises.

(8) Maintain and have available for inspection at the base the evidence of compliance with off street parking requirements in the form required by section 6-04(b)(1) of this chapter.

(b) (1) A base owner shall not hold himself out for business to the public as a for-hire service, which term shall include, but not be limited to, "livery," "car service," or "limousine," without applying for and obtaining a license issued by the Commission for that activity.

(2) A base owner shall not hold himself out for business as a "taxi" or "taxicab" service or in any way use the word "taxi," "taxicab," "cab," "hack" or "coach" to describe his business.

(3) A base owner shall file with the Commission the name, including any trade, business, or operating name used in the operation of the base or in promotions or advertising, and address of the base from which for-hire vehicles affiliated with such base are dispatched. The Chairperson may reject any such trade, business or operating name if, in the judgment of the Chairperson, such name is substantially similar to the trade, business or operating name of another base, and the base owner may not use such name. A base may use only one trade, business or operating name in its operations, including in its public communications, advertising, promotional activities, and passenger solicitation activities although a base may add an additional word such as "premium" or "select" to its approved trade name to promote a different level of service if the base offers multiple levels of service.

(4) Any trade, business or operating name approved by the Chairperson for one base may not be used by any other base, and such name will not be approved for use by any other base, unless both bases seeking to use the same trade, business or operating name share identical ownership.

(5) A base owner shall file with the Chairperson all contact information made available to or offered to the public for purposes of pre-arranging transportation for hire, including telephone numbers, Web sites and email addresses. Such telephone numbers, Web sites, email addresses and other contact information and methods may be used only with the name approved pursuant to paragraph (3) of this subdivision.

(6) A base owner shall file with the Chairperson the base's hours of operations and shall notify the Chairperson of any change in such hours of operation.

(c) A base owner shall conspicuously state in all advertising, whether print, broadcast, electronic and internet advertising and in all handbills, fliers, Web sites or other promotional materials and on all business cards and receipts that the base is licensed by TLC and shall include the number of the TLC license issued to the base in all such materials.

(d) A base owner who seeks to change the address of a base must apply for approval of the new location by the Commission. The proposed location must comply with all of the requirements of §6-04, except that if there has been no change in the ownership of the base, the requirements of §6-04(c) and (e) may be waived by the Commission. A base owner who moves a base to any location without the prior approval of the Commission is operating as an unlicensed base, and is subject to the penalties of §6-04(a).

(e) A base owner shall not transfer or assign the base owner's license to another without the Commission's written approval.

(f) A base owner shall not dispatch a for-hire vehicle from any location other than that specified in the base license, except that a wheelchair accessible livery may be dispatched as provided in chapter 16 of this title.

(g)(1) A base owner shall maintain on file with the Commission a current telephone number (which must be connected to an answering machine or recording device), pager number, answering service telephone number or similar means of telephone contact, so that the owner may be reached by the Commission on a twenty-four hour basis.

(2) An owner must respond to any telephone or pager contact from the Commission within forty-eight hours, seven

days a week.

NOTE

1. Statement of Basis and Purpose in City Record Apr. 29, 1997:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under §2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and

regulations necessary to exercise the authority conferred upon it by the Charter.

The rule reorganizes the For-Hire Vehicle Rules, for purposes of simplification and clari- fication.

After receiving public comments regarding the rule proposal, the following changes have been made: Rule 6-06(a)(1), the option of posting a bond to satisfy the ten-vehicle requirement was eliminated; recognizing a receipt for a vehicle license for ninety days was eliminated; and the penalty for violation of Rule 6-11(a) was changed to reflect Local Law 51 of 1996.

The Commission has not adopted at this time the portions of the proposal requiring permanent exterior markings identifying for-hire vehicle bases and display of FHV drivers licenses in a credentials holder; such proposals are still under consideration.

2. Statement of Basis and Purpose in City Record Mar. 27, 1997: The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, authorizing TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for hire in the city; under section 2303(b) of such Charter, authorizing TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under section 19-503 of the Administrative Code of the City of New York, authorizing TLC to promulgate rules and regulations necessary to exercise the authority conferred upon it by the Charter. The promulgated rules increase penalties for violation of several for-hire vehicle rules by base owners. Those rules concern key requirements of vehicle and driver licensing, vehicle inspection and responsibility for quality of life violations. The following requirements have increased penalties: Rule 6-05(f)(2) prohibits bases from dispatching vehicles which fail to comply with the marking requirements and licensing requirements of the TLC; Rule 6-05(n) requires base owners to comply with TLC directives; Rule 6-05(s)(2) prohibits base owners from dispatching unlicensed drivers; Rule 6-05(t)(2) requires base owners to verify on a regular basis that affiliated vehicles display current inspection stickers; and Rule 6-05(v)(2) requires base owners to ensure that base personnel and drivers do not double park, park on the sidewalk, or otherwise park, stop or stand in a manner that violates traffic rules, or repair vehicles on the street, within the immediate area of the base. The purpose of the increase in penalties is to improve compliance by base owners. In addition, the promulgated rules require a base owner to monitor each vehicle's compliance with TLC inspection requirements on a continuing basis, rather than annually. Regular inspection of for-hire vehicles is done by inspection stations authorized by the N.Y.S. Department of Motor Vehicles. Local law requires that such inspections of for-hire vehicles be done three times a year. By making the base responsible for inspections on a continuing basis, the rule improves compliance with inspection requirements, further protecting the safety of the riding public.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Base station owners were found to have operated a base station at a location not approved by the Commission in violation of section 6-06(b)(1). The Commission proved that respondents dispatched for hire vehicles from a base located at an address other than the address which had been approved by the Commission in violation of section 6-06(f). Respondents also violated sections 6-06(f) and 6-04(a) by dispatching for hire vehicles while their base license had been suspended. **Taxi and Limousine Comm'n v. Absolute Class Limousine, Inc., OATH Index No. 995/98 (Apr. 22, 1998).**

§6-07 Operation of the Base.

A base station owner, black car base owner and luxury limousine base owner shall be responsible for compliance with the following provisions and shall be liable for violations thereof:

(a) A base station owner shall provide an accurate and binding price quote to any prospective passenger contacting the base for transportation to a specified destination and intermediate stop(s), and if the passenger engages to receive the transportation, the price for such transportation shall be the price quoted by the base unless the passenger changes the

destination or number of stops. A base owner shall not quote or charge a fare in excess of the fare prescribed by the schedule of the rates of fare on file with the Commission as required by section 6-08(c) of this chapter. A base owner shall be responsible for ensuring that transportation is provided only by pre-arrangement through the base.

(b) A base owner shall be responsible for overseeing the management of the base to ensure that base personnel, and the owners and drivers of vehicles affiliated with the base, whether on duty or not, do not, within the area set forth in paragraph (3), engage in any of the following activities:

(1) double park, park on the sidewalk, park across a driveway, park by or at a fire hydrant or bus stop, or otherwise park, stop or stand in a manner that violates the Vehicle and Traffic Laws of the State of New York and the New York City Traffic Rules; or

(2) engage in mechanical maintenance or repair of any vehicle, except to make such emergency repairs as may be necessary to move a disabled vehicle. A dead battery or a flat tire is an example of a disabling condition.

(3) The base owner's responsibilities pursuant to paragraphs (1) and (2) shall extend to the public streets and sidewalks on either side of the street, within the city block front where the base is located, including both sides of the street on which the base is located.

(4) A base owner shall further be responsible for ensuring that vehicles affiliated with the base or dispatched by the base and their drivers will obey all applicable traffic and parking regulations within the area set forth in paragraph 3.

(5) A base owner shall further be responsible for ensuring that vehicles affiliated with the base or dispatched by the base and their drivers when visiting the base will not create a nuisance such as by engaging in unnecessary horn honking, littering, or the playing of loud audio material within the area set forth in paragraph 3.

(c) A base owner shall maintain and enforce rules governing the conduct of affiliated drivers while performing their duty as for-hire vehicle drivers. Said rules shall be submitted in writing to the Commission when the base is licensed by the Commission, and within seven (7) days, exclusive of holidays and weekends, thereafter whenever said rules are updated or amended.

(d) Upon filing with the Workers' Compensation Board to end the disbursement of benefits for the driver of an affiliated vehicle who has recovered from a disability and is ready to return to work, a base owner shall provide the driver with documentation that benefits have ceased in order for the Commission to return such driver's license.

(e) A base owner shall not instruct, authorize or permit an affiliated driver to discriminate unlawfully against people with disabilities. Such discrimination includes, but is not limited to, refusing to serve people with disabilities, refusing to load and unload the mobility aids of people with disabilities, and imposing any charge in addition to the authorized fare for the transportation of people with disabilities, service animals, wheelchairs, or other mobility aids.

(f) Effective October 31, 2001, a base owner shall be responsible for providing transportation service to persons with disabilities. A base owner may fulfill this requirement either by:

(1) dispatching an affiliated accessible vehicle, upon request; or

(2) arranging for the dispatch of an accessible vehicle affiliated with another licensed base, upon request, if the base owner has entered into a contractual or other arrangement with such base for the provision of accessible vehicles to persons with disabilities. The Chairperson may, in his or her discretion, approve vehicles for the provision of accessible service that deviate from the requirements set forth in the Americans with Disabilities Act or the Regulations promulgated thereunder.

Whether a base owner dispatches an affiliated accessible vehicle, or arranges for the dispatch of vehicles affiliated

with another base, said base owner shall be responsible for the provision of "equivalent service" to persons with disabilities. This service equivalency requirement shall be met only if the service available to persons with disabilities, when viewed in its entirety, is provided in the most integrated setting to the needs of such individual and is equivalent to the service provided to other individuals with respect to the following service characteristics:

(a) Response time to requests for service;

(b) Fares charged;

(c) Hours and days of service availability;

(d) Ability to accept reservations;

(e) Restrictions based upon trip purpose;

(f) Other limitations on capacity or service availability.

(g) A base owner shall maintain and enforce rules and policies preventing vehicles affiliated with the base or dispatched by the base and drivers of such vehicles from accepting street hails.

(h) A base owner may terminate the affiliation of a vehicle only by (1) submitting to the Chairperson a signed and dated agreement in which the vehicle owner consents to such termination or (2) by giving the vehicle owner notice to the vehicle owner's address as on file with the Commission by certified mail with return receipt requested, together with proof of mailing of such notice, with copies of the notice and proof of mailing mailed to the Commission. Such termination will become effective upon the date of the vehicle owner's agreement if termination occurs by option (1) or the date of mailing if termination occurs by option (2).

(i) Notwithstanding the provisions of subdivision (h) of this section, a vehicle's affiliation with a base will terminate automatically upon revocation of the base's license, suspension of the base's license for a continuous period in excess of 30 days, or upon expiration of the base's license. In addition, a vehicle's affiliation with a base will terminate automatically upon expiration or revocation of such vehicle's for-hire vehicle permit.

(j) A base owner shall not dispatch a vehicle which is not affiliated with such base unless (1) the base is dispatching an accessible vehicle pursuant to contract as provided by section 6-07(f) or (2) the base is dispatching a vehicle affiliated with another licensed base and the customer is informed of the dispatch of the vehicle from the second base.

(k) A base owner shall be responsible for handling customer complaints when directed by the Chairperson and shall provide any information requested by the Chairperson regarding such complaints.

NOTE

1. Statement of Basis and Purpose in City Record Dec. 19, 2000:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City; under §2303(b)(6) of such Charter, authorizing the TLC to promulgate rules and regulations relating to requirements for the safety, design and comfort of vehicles; under §2303(b)(11) of such Charter, authorizing the TLC to promulgate rules and regulations reasonably designed to carry out the purposes of the Charter; under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter; and under §19-503.1 of such Administrative Code, authorizing the TLC to promulgate regulations with respect to the standards of operation of for-hire vehicles.

This Rule amends the For-Hire Vehicle Rules to provide either accessible vehicles or alternative service to persons with disabilities, including passengers in wheelchairs.

The Commission recognizes a need for the provision of service to persons with disabilities. Present transportation service providers, including mass transit providers, do not offer adequate demand-responsive service to disabled persons. The Commission has had a continuing dialogue with representatives of the transportation industry and the disabled community in an attempt to ensure that providers of for-hire vehicle services meet their respective responsibilities to the disabled community. Several proposals for the provision of limited service have been requested by and submitted to the TLC; however, prior to and since proposing these rules, no acceptable comprehensive plan to provide equivalent service to persons with disabilities has been submitted.

The Rules governing the operation of For-Hire Vehicle, Black Car and Luxury Limousine Bases are amended to provide that such bases either dispatch affiliated accessible vehicles to transport persons with disabilities, or enter into an arrangement with another licensed base for the dispatch of accessible vehicles. A base that does not provide its own accessible vehicles to persons with disabilities may contract with another provider of accessible transportation to provide service to its disabled clients for the same price charged its other clients. Whether a base owner dispatches its own accessible vehicles, or enters into an arrangement with another base for the provision of such vehicles to its clients, it must provide equivalent service to persons with disabilities. Equivalent service is defined as service to persons with disabilities provided by the base receiving the original request for service at the same rate of fare, response time, and hours of service availability, as provided for non-disabled passengers.

Regulations promulgated by the United States Department of Transportation (USDOT), implementing the Americans With Disabilities Act (ADA), provide that demand-responsive transportation providers, such as taxicab and for-hire vehicle services, are subject to the provisions of the ADA. However, providers of transportation services

utilizing vehicles with a seating capacity of fewer than eight (8) persons are not required to purchase accessible automobiles or provide "equivalent service" as the term is defined in the Regulations promulgated pursuant to the ADA. ADA regulations applicable to taxicabs and for-hire vehicles prohibit the charging of a surcharge or premium fare to transport passengers with disabilities, prohibit service providers from discriminating against the disabled with respect to the provision of service, or the transportation of service animals or mobility aids, and prohibit service providers from requiring disabled persons to travel with an attendant.

Although not required to do so by the ADA, a number of Cities in the United States, as well as other Cities abroad, have already either mandated the use of accessible for-hire vehicles or have provided for voluntary conversion to accessible vehicles by for-hire vehicle service providers.

With the adoption of these Rules, the TLC would establish accessibility requirements that exceed those presently mandated by the ADA and the Regulations promulgated thereunder, by requiring an accessible vehicle be provided to any disabled person, upon request.

Since for-hire vehicles, black cars and luxury limousines accept passengers exclusively on the basis of prearrangement, the provision of service to the disabled can be accomplished either through the purchase of accessible vehicles or through permitting the base to enter into a contractual arrangement with another licensed base that will provide substantially equivalent service to the disabled. The definition of service equivalency contained in the proposed Rule is adopted from the standard set forth in the USDOT regulations relating to demand-responsive service. The application of factors such as the fares charged, the response time for service, the hours of service operation and any restrictions on the provision of service determines whether there is service equivalency between persons with and without disabilities.

Taxicabs respond exclusively to street hails; accordingly it does not appear feasible for a taxicab owner to enter into a contractual arrangement for the provision of equivalent service since equivalent service is, by its very nature, prearranged. The rules promulgated herein do not mandate that taxicabs be made accessible at this time, since there does not presently exist on the market an accessible vehicle which has been proven satisfactory for operation as a double-shifted taxicab for twenty-four (24) hours a day, seven (7) days a week. Vehicles are now being tested in various pilot programs which, if successful, would demonstrate that there are accessible vehicles available for use as taxicabs.

These Rules contain a provision that would authorize the Chairperson to approve vehicles that do not meet the accessibility requirements set forth in the ADA. The purpose of this provision is to give the Chairperson the flexibility to approve experimental vehicles that meet the needs of the disabled community but which may not completely comply with all of the technical specifications set forth in the United States Department of Transportation Regulations regarding accessible vehicles. The Chairperson may also adopt vehicle specifications that are more stringent than existing or future ADA vehicle specifications.

A public hearing was held on June 29, 2000, with respect to this proposal. Representatives from the disabled community were generally supportive of these Rules. Some advocates requested that a base owner be required to purchase a certain number or percentage of accessible vehicles. This request was not incorporated into these rules, since the provision allowing a base to enter into an arrangement with another base for the provision of accessible vehicles ensures that disabled persons would have equivalent access to for-hire vehicles at the same price, and with the same hours of opration and reliability of service, as other clients. However, comments were also received concerning language in the proposed Rule that would have authorized the Chairperson to exempt bases from the requirements set forth herein. This provision has been deleted since the rule already provides alternative means by which a base may comply with these requirements without purchasing accessible vehicles.

The provisions of these Rules would become effective October 31, 2001, to provide an opportunity for manufacturers to meet the demand for accessible vehicles and for service providers to comply with the requirements set forth herein.

CASE AND ADMINISTRATIVE NOTES

¶ 1. The constitutionality of the statute has been upheld. The wheelchair accessibility rule creates an obligation to pay money, but does not constitute a protected property interest for purposes of the Takings Clause of the Fifth Amendment. The taxi owners retain their ability to continue to operate and have beneficial use of their for-hire livery base stations, since they can adjust their fees in order to recoup the cost of compliance with the new regulation. Promulgation of the wheelchair accessibility rule was proper as effectuating a substantial public purpose. **Transportation Unlimited v. New York City Taxi & Limousine Comm.,** 11 A.D.3d 384, 784 N.Y.S.2d 41 (1st Dept. 2004).

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 6 FOR HIRE VEHICLES

§6-08 Base Record-Keeping and Notice Requirements.

A base station owner, black car base owner and luxury limousine base owner shall be responsible for compliance with the following provisions and shall be liable for violations thereof:

(a) Any notice from the Commission shall be deemed sufficient if sent to the last mailing address furnished by such base owner.

(b) On a quarterly basis, a base owner shall send the Commission a list of all affiliated drivers and affiliated for-hire vehicles. In addition to the quarterly report, a base owner may notify the Commission at any other time when a vehicle is no longer affiliated with his/her base; such notification shall be deemed a defense to any liability attaching to such owner for damage to persons or property caused by such vehicle subsequent to such notification.

(c) A base owner shall be responsible for filing with the Chairperson in a form and format prescribed by the Chairperson, the schedule of the rates of fare charged by such base, including any surcharges such as credit card fees. Such a schedule shall be filed whenever rates are changed and also annually, no later than the anniversary date of the license and, in any year in which the license expires, such schedule must be filed with the renewal application. A schedule must also be filed with any application to change the ownership or location of the base. Failure to file such schedule with a renewal application or an application to change ownership or location will result in denial of the application by the Chairperson.

(d) A base owner shall comply with all record-keeping procedures established and required by the Commission. The operational information required to be maintained, which is set forth in §6-08(e) below, shall be safeguarded and

maintained at the base for a period of six (6) months, except inspection records which are to be kept for twelve (12) months. All such records may be inspected by Commission representatives during regular business hours.

(e) A base owner shall be responsible for ensuring that the following records are kept for all dispatched calls:

(1) the date, the time, and location of the passenger to be picked up, the driver's for-hire operator's permit, and the permit number of the for-hire vehicle; and

(2) a list of all current affiliated vehicles, which includes information regarding the owner of the vehicle, including, but not limited to the owner's name, mailing address, and home telephone number, the vehicle's registration number, the vehicle's Commission permit number, the license plate number of the vehicle, the name of the vehicle's insurance carrier and the policy number, and the dates of inspection of the vehicle and the outcome of each said inspection.

(f) A base owner shall be responsible for maintaining paper or electronic records of all vehicles that are or have been affiliated with or dispatched by the base during the preceding 12 months, including dates of affiliation, vehicle identification numbers, Department of Motor Vehicles (or equivalent) registration numbers, for-hire vehicle permit numbers, and inspection records, together with the drivers of such vehicles including dates of operation, Department of Motor Vehicles license numbers, for-hire vehicle driver's license numbers and copies of forms affiliating and dis-affiliating vehicles.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 6 FOR HIRE VEHICLES

§6-09 Black Car Vehicle Specifications.

(a) Beginning on January 1, 2010, no vehicle that is the subject of a new application for a for-hire vehicle permit shall be affiliated with a black car base unless the for-hire vehicle meets either the requirements of an accessible vehicle pursuant to §6-07(f) of this chapter or §3-03.2 of this title, or has a minimum city rating of twenty-five (25) miles per gallon as labeled pursuant to title 49, section 32908 of the United States Code and regulations promulgated pursuant thereto. For purposes of this subdivision, an application for a for-hire vehicle permit after a previous permit has expired will be considered a new application. For-hire vehicles that are affiliated with luxury limousine or livery bases are not subject to the requirements of this subdivision.

(b) Beginning on January 1, 2011, no vehicle that is the subject of a new application for a for-hire vehicle permit shall be affiliated with a black car base unless the for-hire vehicle meets either the requirements of an accessible vehicle pursuant to §6-07(f) of this chapter or §3-03.2 of this title, or has a minimum city rating of thirty (30) miles per gallon as labeled pursuant to title 49, section 32908 of the United States Code and regulations promulgated pursuant thereto. For purposes of this subdivision, an application for a for-hire vehicle permit after a previous permit has expired will be considered a new application. For-hire vehicles that are affiliated with luxury limousine or livery bases are not subject to the requirements of this subdivision.

(c) Only black car bases may dispatch vehicles to do line work and only for-hire vehicles that are affiliated with black car bases may perform line work.

Subd. (b) amended City Record Feb. 18, 2009 §1, eff. Mar. 20, 2009. [See Note 2]

NOTE

1. Statement of Basis and Purpose in City Record May 23, 2008:

In December 2007, the Taxi and Limousine Commission (TLC) unanimously passed rules requiring new taxicabs to achieve a city mileage rating of 25 miles per gallon in October 2008, except for wheelchair accessible taxicabs. In October 2009, the standard will rise to 30 mpg. Almost 380 hybrid taxicabs were on the road when the taxicab proposal was announced last May. Now, as taxicab owners convert ahead of schedule, there are more than 975. They have proven their reliability during the three annual inspections, and the first 18 in the fleet have already logged over 200,000 miles as well as higher inspection passage rates than other vehicles. The TLC estimates that the rules will save a taxicab owner $11,000 per year in gas costs, for industry-wide savings of roughly $140 million per year. By 2013, virtually the entire taxicab fleet will be converted to higher mileage standards.

In February, the Mayor asked the TLC to require new black cars to meet fuel efficiency standards of 25 mpg in 2009 and 30 mpg in 2010. The promulgated rules considered today will also mandate vehicle retirement and provide protection for black car operators against competitors who operate less gasoline-efficient vehicles. To help drivers, the City has worked with the financial sector, auto dealers, and black car fleets to develop solutions that will finance the higher down payment. Pursuant to these rules, by 2013, nearly all black cars will meet the new standards. Mayor Bloomberg indicated the City's intention to complete the PlaNYC for-hire transportation initiative by working with the livery industry, again taking into account the unique aspects of that industry. The TLC's next course of action will be to develop a concrete plan to introduce similar standards for livery vehicles.

Responding to the Mayor's request, and to requests from users of black car services for rules requiring a better performing black car fleet and imposing a maximum age on black cars, the TLC promulgated rules that will amend existing TLC rules relating to black cars and black car service in three respects.

First, to create a better performing fleet, the promulgated rules provide that, beginning on January 1, 2009, applications for new TLC for-hire vehicle (FHV) permits for vehicles to be affiliated with black car bases must be for vehicles with city ratings of at least 25 miles per gallon. Beginning on January 1, 2010, such vehicles must have minimum city ratings of 30 miles per gallon.

The city mileage rating of a vehicle is to be determined pursuant to chapter 329 of title 49 of the United States Code and regulations promulgated pursuant thereto. Ratings for 2008 model vehicles are available at **http://www.fueleconomy.gov/feg/FEG2008.pdf**, and it is anticipated that the 2009 ratings will be available at a similar Web site.

Second, the promulgated rules set a maximum age of six model years for FHVs affiliated with black car bases. For vehicles currently in use as black cars, the rules provide a phase-in period that starts with the expiration of a vehicle's permit beginning January 1, 2009 (for vehicles of model years 2001 or earlier), and ends with the expiration of a vehicle's permit beginning January 1, 2013 for all for-hire vehicles in black car service.

For-hire vehicles solely affiliated with luxury and livery bases will not be subject to these minimum mileage requirements and vehicle retirement requirements. Vehicles that were formerly affiliated with black car bases may continue to be eligible for affiliation with livery and luxury limousine bases.

Third, to facilitate orderly dispatching, the promulgated rules provide that only FHVs affiliated with black car

bases are permitted to perform line work and only black car bases are able to dispatch vehicles to do line work. Line work is defined as a type of pre-arranged service provided pursuant to a contract with a black car base in which the dispatch and passenger assignment are completed at the point of pick up by an employee or contractor of either the black car base or the contracting party. Line work involves the pre-arranged dispatch of a number of vehicles to a specified location, where typically the vehicle and driver wait in a line to be assigned to a particular passenger or passengers. The TLC finds that line work is uniquely important to black car service and therefore should be reserved to black cars.

When fully phased in, the promulgated rules will yield a savings of more than $5,000 in gasoline costs per vehicle per year. Therefore, the promulgated rule will yield industry-wide savings from using less gasoline of approximately $50,000,000 per year. This better performance will increase the economic health of the industry by decreasing black car vehicle owner and driver costs and will further benefit black car users by reducing upward pressure on black car fares.

Following addresses concerns that were raised during the comment period on the proposed rules:

First, because the promulgated rules require a minimum mileage rating for black cars, a question was raised whether the rules are intended to preclude black cars with non-gasoline fueled engines. The answer is no. As technological advances continue, the TLC will continue to test and approve vehicle technologies such as hydrogen fuel-cell, clean diesel, compressed natural gas, electric battery cars, and other alternative fuel sources and technologies.

Second, a concern was expressed that black car owners may seek to avoid the obligation to convert to hybrid vehicles by re-licensing them as luxury limousines. Vehicle owners should be aware that TLC rules require that luxury limousines maintain:

· $200,000 in personal injury protection (PIP) insurance;

· Liability insurance of $500,000 per person; and

· Liability insurance of $1 million per accident for a limousine that seats fewer than nine passengers, $1.5 million per accident for a limousine that seats from nine to 15 passengers, and $5 million per accident for a limousine that seats more than 15 passengers.

TLC staff will vigilantly enforce the luxury limousine insurance requirements as a means to prevent any attempt by black car owners to pose as luxury limousines.

Third, a concern was expressed about the applicability of the promulgated rules to black cars affiliated with TLC-licensed black car bases that are located outside New York City, but which conduct point-to-point activity within the city. To clarify, these promulgated rules apply to all black car bases that are licensed by TLC, regardless of location. Likewise, luxury limousines affiliated with bases located outside New York City that pick-up and drop-off passengers within New York City are required to comply with the higher insurance requirements for luxury limousines, listed above.

Fourth, as when the Commission adopted minimum miles per gallon rules for taxicabs last year, a concern was expressed about the availability of vehicles that meet the 30 miles per gallon requirement that will come into play for black cars in January 2010, as well as the availability of adequate vehicle financing to fund the purchase of new vehicles. The TLC and the Mayor's office, in conjunction with the New York City Investment Fund and other private partners, have arranged for financing approaches to be available. Therefore, although the TLC fully expects that vehicle availability and affordable financing will not be an issue, TLC staff will closely monitor the situation and, if changes in today's rule become necessary, will recommend appropriate amendments.

Finally, a concern was expressed that section 6-09(a) and (b) might be misconstrued to mean that renewal of a black car vehicle permit constitutes a "new application" such that the vehicle must be retired. However, §6-09(a) and (b)

provide that submission of a black car vehicle permit application **after** expiration of the previous black car vehicle permit will not constitute a timely renewal application, and therefore will constitute a new application for purposes of determining the vehicle's retirement date. A timely renewal application-meaning a renewal application submitted before the expiration of the previous permit-will not constitute a "new application."

2. Statement of Basis and Purpose in City Record Feb. 18, 2009: In April 2008, the Taxi and Limousine Commission (TLC) promulgated rules requiring new black cars, except for wheelchair accessible vehicles, to achieve fuel efficiency standards of 25 mpg city rating in 2009 and 30 mpg city rating in 2010. To help drivers, the City worked with the financial sector, auto dealers, and black car fleets to develop solutions that would finance the higher down payment. After promulgation of those rules, the economic downturn hit this nation's economy and struck a major blow to financial and insurance firms who are among the primary customers of the black car industry and who would have provided the financing that TLC contemplated in promulgating those rules. As a result, providers of black car services were severely impacted. For these reasons, the TLC promulgated rules to delay by one year the mandate for 25 and 30 mpg black car vehicles and the black car retirement rules passed in April 2008. For-hire vehicles solely affiliated with luxury and livery bases are not subject to these minimum mileage requirements and vehicle retirement requirements. Vehicles that were formerly affiliated with black car bases may continue to be eligible for affiliation with livery and luxury limousine bases.

CHAPTER 6 FOR HIRE VEHICLES

§6-10 Affiliation with Black Car Bases.

(a) All for-hire vehicles affiliated with black car bases that are model year 2001 or earlier must be retired from black car service no later than the expiration dates of their for-hire vehicle permits on and after January 1, 2010.

(b) All for-hire vehicles affiliated with black car bases that are model year 2003 or earlier must be retired from black car service no later than the expiration dates of their for-hire vehicle permits on and after January 1, 2011.

(c) All for-hire vehicles affiliated with black car bases that are model year 2005 or earlier must be retired from black car service no later than the expiration dates of their for-hire vehicle permits on and after January 1, 2012.

(d) All for-hire vehicles affiliated with black car bases that are model year 2006 or earlier must be retired from black car service no later than the expiration dates of their for-hire vehicle permits on and after January 1, 2013; provided, however, a for-hire vehicle that is five model years old upon its permit expiration on and after January 1, 2013, shall not be affiliated with a black car base after one year following such renewal.

(e) All for-hire vehicles affiliated with black car bases that are seven 7 model years old or older and are not specified in subdivisions (a), (b), (c) or (d) of this section must be retired from black car service no later than the expiration dates of their for-hire vehicle permits on and after January 1, 2014 and every year thereafter; provided that a for-hire vehicle that is six model years old upon its permit renewal on or after January 1, 2014 shall not be affiliated with a black car base after one year following such renewal.

(f) A for-hire vehicle affiliated with a black car base which has reached its retirement date must be retired from

black car service, regardless of whether it passes the New York State Department of Motor Vehicle inspection.

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 6 FOR HIRE VEHICLES

§6-11 For-Hire Vehicle Owner Licensing.

(a) A for-hire vehicle owner shall be responsible for having said for-hire vehicle licensed by the Commission. The Commission shall post on its Web site a list of vehicles holding current, valid permits. A for-hire vehicle owner shall not allow a vehicle to be dispatched unless the owner holds a current, valid for-hire vehicle permit for such vehicle which permit is not expired, suspended or revoked.

(b) A for-hire vehicle license shall be valid only while the registration of the vehicle remains valid. Operation of a vehicle without a valid registration is operation without a TLC license in violation of §19-506 of the Administrative Code, regardless of whether a TLC license had previously been obtained while a registration was valid. A for-hire vehicle owner shall immediately surrender his for-hire vehicle license to the Commission upon the expiration, restriction, suspension or revocation of his vehicle registration card.

(c) An owner of a for-hire vehicle shall not dispatch or permit another person to dispatch such vehicle unless it is affiliated with a licensed base and such dispatch is made from the base with which the vehicle is affiliated, except when a dispatch is made pursuant to section 6-07(f) of this chapter. Dispatch of a vehicle which is not affiliated with a licensed base and dispatch of a vehicle from a base with which the vehicle is not affiliated shall constitute unlicensed operation and subject the owner to any applicable penalties for unlicensed operation unless the dispatch is made as authorized by section 6-07(j) of this chapter.

(d) (1) A for-hire vehicle owner shall comply with the New York State Vehicle and Traffic Law and the New York State Insurance Law regarding coverage by bond or policy of liability insurance and all other forms of insurance required by law.

(2) A for-hire vehicle owner, which has received notice that its liability insurance is to be terminated, shall surrender its for-hire vehicle permit and decal(s) to the Commission on or before the termination date of the insurance, unless the vehicle owner submits proof of new insurance effective on the date of termination of the old policy before the termination of the policy.

(3) Within seven (7) days, exclusive of holidays and weekends, a for-hire vehicle owner shall notify the Commission in writing of any change in insurance carrier or coverage, specifying the name and address of the insurance carrier, new and former, and the number of the policy for each affiliated vehicle and submit proof of such coverage.

(4) **(a)** Notwithstanding any inconsistent provision of paragraph (d)(1) of this rule, each for-hire vehicle owner, other than the owner of a for-hire vehicle with a seating capacity of nine or more passengers, shall, for each vehicle owned, maintain for purposes of insurance or other financial security, coverage in an amount of not less than $200,000 per person, payable for those expenses specified in paragraphs 1, 2 and 3 of subdivision a of section 5102 of the New York State Insurance Law, and coverage in an amount of not less than $100,000 minimum liability, and of not less than $300,000 maximum liability for bodily injury and death, as said terms are described and defined in section 370(1) of the Vehicle and Traffic Law.

(b) Each owner of a vehicle for hire with a seating capacity of at least nine but not more than fifteen passengers shall, for each vehicle owned, maintain for purposes of insurance or other financial security, coverage in an amount of not less than $200,000 per person, payable for those expenses specified in paragraphs 1, 2 and 3 of subdivision a of section 5102 of the New York State Insurance Law, and coverage in an amount of not less than $1,500,000 minimum liability for bodily injury and death, as said terms are described and defined in section 370(1) of the Vehicle and Traffic Law.

(c) Each owner of a vehicle with a seating capacity of at least sixteen passengers shall, for each vehicle owned, maintain for purposes of insurance or other financial security, coverage in an amount of not less than $200,000 per person, payable for those expenses specified in paragraphs 1, 2 and 3 of subdivision a of section 5102 of the New York State Insurance Law, and coverage in an amount of not less than $5,000,000 minimum liability for bodily injury and death, as said terms are described and defined in section 370(1) of the Vehicle and Traffic Law.

(5) A for-hire vehicle owner shall immediately report to his/her insurance carrier, in writing all accidents involving his/her for-hire vehicle which are required to be reported to the insurance carrier.

(6) A for-hire vehicle owner shall immediately report to the Commission, in writing, all accidents involving his or her vehicle which are required to be reported to the Department of Motor Vehicles pursuant to §605 of the Vehicle and Traffic Law. A copy of any report furnished to the Department of Motor Vehicles pursuant to law shall be furnished to the Commission within ten (10) days of the date by which the owner is required to file such report with the Commissioner of Motor Vehicles.

(e) (1) No unauthorized entry shall be made on the for-hire vehicle permit or decal(s), nor shall any entry on the for-hire vehicle permit or decal(s) be changed or defaced.

(2) An unreadable for-hire vehicle permit or decal(s) shall immediately be surrendered to the Commission for replacement.

(3) A for-hire vehicle owner shall immediately notify the Commission of the theft, loss or destruction of a for-hire vehicle permit or decal(s) of said vehicle, furnish the Commission with an affidavit or information as may be required, and shall replace same.

(f) A for-hire vehicle owner shall be responsible for ensuring that the replacement of any lost or stolen New York State license plates is reported in writing to the Commission, within forty-eight (48) hours, exclusive of weekends and holidays, after obtaining such plates.

(g) A for-hire vehicle owner shall designate each and every driver who operates said vehicle as his agent for accepting service by Commission personnel of summonses or notices to correct defects in the vehicle. Delivery of such summons or notice to a driver shall be deemed proper service of the summons or notice on the vehicle owner. The Commission shall send a photocopy of any summons or notice to correct to the vehicle owner and the base owner of record. An applicant for a for-hire vehicle permit shall designate the vehicle operator or driver as agent for service of any and all legal process from the Taxi and Limousine Commission which may be issued against the title owner, registered owner, or lessee.

(h) A for-hire vehicle owner shall notify the Commission in person or by first class mail, within seven (7) days, exclusive of holidays and weekends, of any change of mailing address. Any notice from the Commission shall be deemed sufficient if sent to the last mailing address furnished by the for-hire vehicle owner.

(i) No for-hire vehicle shall be a two door vehicle.

(j) A for-hire vehicle owner shall comply with all Commission notices and directives to correct defects in said vehicle.

(k) A for-hire vehicle owner shall not permit said for-hire vehicle to be operated without daily personal inspection and reasonable determination that all equipment, including but not limited to, brakes, lights, signals and passenger seat belts and shoulder belts are in good working order and meet all the requirements of the New York State Vehicle and Traffic Law and these Rules.

(l)(1) A for-hire vehicle owner shall maintain on file with the Commission a current telephone number (which must be connected to an answering machine or recording device), pager number, answering service telephone number or similar means of telephone contact, so that the owner may be reached by the Commission on a twenty-four hour basis.

(2) An owner must respond to any telephone or pager contact from the Commission within forty-eight hours, seven days a week.

(m) The holder of a for-hire vehicle permit issued under this chapter shall satisfy any outstanding judgment and pay any civil penalty owed for a violation relating to traffic in a qualified jurisdiction or a violation of the regulations of a qualified jurisdiction.

(n) There shall not be more than one for-hire vehicle permit issued and in effect for any vehicle, as indicated by the vehicle identification number, at any one time.

(o) If the Commission receives a for-hire vehicle permit application for a vehicle, as indicated by the vehicle identification number, for which Commission records indicate that a previously issued for-hire vehicle permit is in effect and not expired, the holder of such previously issued permit shall be scheduled for a hearing to determine the fitness of such holder to hold such permit under section 8-15 of this title and the previously issued permit shall be revoked unless the holder demonstrates that the holder has transferred the permit to a new vehicle.

(p) The holder of a for-hire vehicle permit who wishes to transfer the permit to a new vehicle must file an application to transfer the permit within fifteen days after registering the new vehicle with the New York State Department of Motor Vehicles, or comparable agency of the state of registration. No such application will be approved until the permit holder presents the vehicle for inspection at the Commission's inspection facility.

(q) No for-hire vehicle permit shall be issued to any applicant if a previous for-hire vehicle permit held by the applicant was revoked by the Commission, until the applicant for such new permit has been determined fit to hold such permit following a determination of such applicant's fitness to hold a permit under section 8-15 of this title. For purposes of this subdivision and the review of fitness required for applicants under this paragraph, a previous permit

which has been revoked shall include any permit held by any partner, officer or shareholder of applicant, or by any entity in which any partner, officer, or shareholder of applicant was a partner, officer, or shareholder

(r) A for-hire vehicle permit shall be revoked for non-use pursuant to section 19-504(g) of the Administrative Code of the City of New York if:

(1) the permit holder fails to maintain a base affiliation as required by section 6-11(c) of this chapter for 60 days;

(2) the permit holder fails to maintain insurance coverage as required by section 6-11(d) of this chapter for 60 days; or

(3) the permit holder fails to comply with the inspection requirements as required by section 6-12(c) of this chapter for 60 days.

(s) Any owner of a for-hire vehicle the for-hire vehicle permit for which has been revoked by the Commission, has expired, or has been denied renewal, must surrender the permit to the Commission, and, if the vehicle is registered in New York State, must surrender the T&LC license plates to the New York State Department of Motor Vehicles, each within 10 days after such revocation, expiration, or denial.

(t) A for-hire vehicle may be affiliated with only one base at any time.

NOTE

1. Statement of Basis and Purpose in City Record July 5, 2002:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, permitting the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the city; under §2303(b) of such Charter, authorizing the TLC to promulgate rules and regulations reasonably designed to carry out its purposes; and under §19-502(g) of the Administrative Code of the City of New York, authorizing the TLC to license and regulate for-hire vehicles with a seating capacity of up to twenty passengers, under §19-503 of said Code, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter; and under Section 19-503.1 of said Code, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the Charter to license and regulate vehicles for hire.

These rules amend the for-hire vehicle rules relating to the licensing and operation of vehicles for hire with a seating capacity of up to twenty passengers, excluding the driver. In December 2001, the City Council amended §19-502(g) of the Administrative Code to confer upon the TLC jurisdiction over the licensing and regulation of such vehicles. Prior to that date, the Commission was authorized to license and regulate for-hire vehicles, other than commuter vans, with a seating capacity of less than nine passengers.

These rules enact licensing requirements for these vehicles which have now been placed under TLC jurisdiction. Each vehicle must be licensed by the Commission and affiliated with a licensed base before it is permitted to accept passengers, by prearrangement, within the City of New York. Only a driver licensed by the Commission shall be authorized to transport passengers for hire in these vehicles. Some additional requirements have been promulgated with respect to these vehicles, including higher insurance requirements which reflect the additional number of passengers these vehicles may carry. These requirements are identical to the insurance requirements applicable to such vehicles engaging in interstate commerce. In addition, because such vehicles are often modified by after-market coachbuilders after manufacture, a requirement is contained in the rules providing that the vehicle length, width, weight or seating capacity may not be modified after manufacture unless the alteration is completed pursuant to a manufacturer-approved program. Presently, both General Motors and Ford Motor Company have approved after-market vehicle modification programs, and have designated coachbuilders approved to perform after-market modifications in accordance with these programs.

This rulemaking is a part of the TLC Regulatory Agenda for Fiscal Year 2003 published in the **City Record** on April 30, 2002.

Rules of the City of New York

***** Current through December 2009 ****

35 RCNY 6-12

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 6 FOR HIRE VEHICLES

§6-12 Conditions of Operation Relating to For-Hire Vehicles.

A base owner and a for-hire vehicle owner shall each be separately and independently responsible for compliance with the following provisions and liable for penalties for violation thereof. No for-hire vehicle permit shall be issued or renewed unless the for-hire vehicle is in compliance with the requirements of this section at the time of issuance or renewal. Each for-hire vehicle must be in compliance with the following at all times during which such vehicle has a for-hire vehicle permit:

(a)(1) A current, valid Commission license decal or decals, which are not expired, suspended or revoked, are affixed to the front right side of the windshield of the vehicle so as to be plainly visible.

(2)(i) Beginning on September 1, 2009, each vehicle must have three (3) current, valid and unexpired Commission license decals issued by the Commission.

(ii) One of these decals must be on the front lower right side of the windshield of the vehicle and one on the lower rear corner of each of the two rear quarter windows, or, if there are no rear quarter windows, on the lower rear window just above the rear door.

(iii) Each decal must be plainly visible.

(iv) Each decal must contain all information that may be required by the Chairperson, and must be completed correctly and legibly.

(3)(i) For any vehicle for which a new application or a renewal application is made, or which is a replacement vehicle, or which is changing its base affiliation, or which is changing its license plates, beginning on September 1, 2009, the vehicle must have three (3) current, valid and unexpired Commission license decals.

(ii) One of these decals must be on the front lower right side of the windshield of the vehicle and one on the lower rear corner of each of the two rear quarter windows, or, if there are no rear quarter windows, on the lower rear window just above the rear door.

(iii) Each decal must be plainly visible.

(iv) The decals must be affixed by Commission staff.

(v) When the for-hire vehicle is replaced or changes affiliation to a different base, or changes its license plates, such vehicle must be brought to the Commission's Safety and Emissions Division to have new decals placed on the vehicle by Commission staff.

(4) Single decal exception applicable only to luxury limousines. Any for-hire vehicle that is a luxury limousine must comply with all the provisions of this subdivision (a) except that such vehicle will only be required to have a single Commission decal affixed to the front lower right side of the windshield of the vehicle.

(b) A current, valid and unexpired registration sticker from an authorized state motor vehicle department is affixed to the left front windshield so as to be plainly visible.

(c) (1) A current, valid and unexpired New York State Department of Motor Vehicles inspection sticker, which is no fewer than eight (8) months from the month of expiration on the sticker, is affixed to the front left side of the windshield so as to be plainly visible.

(2) For-hire vehicles shall be inspected three times a year and at least once every four months.

(3)(i) **New Applications for For-Hire Vehicles That Are Model Year 1996 or Later.**

Beginning on September 1, 2009, and during such time as the Commission's Safety and Emissions Division is a Department of Motor Vehicles (DMV) certified inspection station, as a condition for issuance of a new for-hire vehicle permit or approval as a replacement vehicle, vehicles that are model year 1996 or later must be inspected at the Commission's Safety and Emissions Division within ten (10) days after the issuance of T&LC plates by DMV, or after the Commission's acceptance of the application for vehicles registered outside New York State, and, in either case, must pass such inspection within sixty (60) days after the date of the first scheduled inspection of such vehicle and before issuance of a new for-hire vehicle permit. The maximum number of inspections allowed in such sixty-day period is four (4) inspections. The maximum limit of 4 inspections which must occur within 60 days applies not only to the vehicle originally submitted for licensure but also to any replacement vehicle submitted. Failure of the vehicle originally submitted for licensure and of all replacement vehicles to pass an inspection four times within 60 days will result in denial of the application. Such inspection(s) shall comply with the vehicle inspection requirements set forth in section 301 of the Vehicle and Traffic Law and shall further inspect for compliance with the owner and vehicle requirements set forth in this chapter, and shall constitute one of the inspections required by section 19-504(f) of the Administrative Code and by paragraph (2) of this subdivision, unless the vehicle has accumulated fewer than 500 miles traveled at the time the vehicle arrives at the Commission's facility for inspection in which case the inspection will be only a visual inspection. The fee for such TLC inspections shall be the fee prescribed by regulation of the DMV for inspections pursuant to section 305 of the Vehicle and Traffic Law.

(ii) **New Applications for For-Hire Vehicles That Are Model Year 1995 or Earlier.**

Beginning on September 1, 2009, and during such time as the Commission's Safety and Emissions Division is a

DMV certified inspection station, as a condition for issuance of a new for-hire vehicle permit or approval as a replacement vehicle, vehicles that are model year 1995 and earlier must be inspected at the Commission's Safety and Emissions Division within ten (10) days after the issuance of T&LC plates by DMV, or after the Commission's acceptance of the application for vehicles registered outside New York State, and, in either case, must pass such inspection within sixty (60) days after the date of the first scheduled inspection of such vehicle and before issuance of a new for-hire vehicle permit. The maximum number of inspections allowed in such sixty-day period is four (4) inspections. The maximum limit of 4 inspections which must occur within 60 days applies not only to the vehicle originally submitted for licensure but also to any replacement vehicle submitted. Failure of the vehicle originally submitted for licensure and of all replacement vehicles to pass an inspection four times within 60 days will result in denial of the application. Such inspection(s) shall comply with the vehicle inspection requirements set forth in section 301 of the Vehicle and Traffic Law and shall further inspect for compliance with the owner and vehicle requirements set forth in this chapter, except that such inspections shall not include emissions testing and shall not constitute one of the inspections required by section 19-504(f) of the Administrative Code and by paragraph (2) of this subdivision. The fee for such TLC inspections shall be the safety inspection fee prescribed by regulation of the DMV for inspections pursuant to section 305 of the Vehicle and Traffic Law.

(4)(i) **Renewals for For-Hire Vehicles That Are Model Year 1996 or Later.**

Beginning on February 1, 2010, and during such time as the Commission's Safety and Emissions Division is a DMV certified inspection station, as a condition for renewal of a for-hire vehicle permit, vehicles that are model year 1996 or later must have been inspected at the Commission's Safety and Emissions Division and pass such inspection within thirty (30) days after the date of the first scheduled inspection of such vehicle and before a renewal permit will be issued. The maximum number of inspections allowed in such thirty-day period is four (4) inspections. The maximum limit of 4 inspections which must occur within 30 days applies not only to the vehicle originally submitted for licensure but also to any replacement vehicle submitted. Failure of the vehicle originally submitted for licensure and of all replacement vehicles to pass an inspection four times within 30 days will result in denial of the application. If a vehicle has not passed inspection by the permit expiration date, the vehicle shall not operate until it passes inspection. If a vehicle does not pass inspection within the thirty-day period, the vehicle shall not operate and the application shall be denied. Such inspection(s) shall comply with the vehicle inspection requirements set forth in section 301 of the Vehicle and Traffic Law and shall further inspect for compliance with the vehicle owner and for-hire vehicle requirements set forth in this chapter and shall constitute one of the inspections required by section 19-504(f) of the Administrative Code and by paragraph (2) of this subdivision. The fee for such TLC inspections shall be the fee prescribed by regulation of the DMV as set forth in paragraph (3)(i) of this subdivision.

(ii) **Renewals for For-Hire Vehicles That Are Model Year 1995 or Earlier.**

Beginning on February 1, 2010, and during such time as the Commission's Safety and Emissions Division is a DMV certified inspection station, as a condition for renewal of a for-hire vehicle permit, vehicles that are model year 1995 and earlier must have been inspected at the Commission's Safety and Emissions Division and pass such inspection within thirty (30) days after the date of the first scheduled inspection of such vehicle and before a renewal permit will be issued. The maximum number of inspections allowed in such thirty-day period is four (4) inspections. The maximum limit of 4 inspections which must occur within 30 days applies not only to the vehicle originally submitted for licensure but also to any replacement vehicle submitted. Failure of the vehicle originally submitted for inspection and of all replacement vehicles to pass an inspection four times within 30 days will result in denial of the application. If a vehicle has not passed inspection by the permit expiration date, the vehicle shall not operate until it passes inspection. If a vehicle does not pass inspection within the thirty-day period, the vehicle shall not operate and the application shall be denied. Such inspection(s) shall comply with the vehicle inspection requirements set forth in section 301 of the Vehicle and Traffic Law and shall further inspect for compliance with the vehicle owner and for-hire vehicle requirements set forth in this chapter, except that such inspections shall not include emissions testing and shall not constitute one of the inspections required by section 19-504(f) of the Administrative Code and by paragraph (2) of this subdivision. The fee for such TLC inspections shall be the safety inspection fee prescribed by regulation of the DMV as set forth in

paragraph (3)(ii) of this subdivision.

(d) For vehicles registered with the Department of Motor Vehicles prior to April 30, 1999, a current, valid and unexpired New York City commercial use motor vehicle tax stamp is affixed to the front right side of the windshield of the vehicle so as to be plainly visible. For vehicles registered after April 30, 1999, proof that the required commercial use motor vehicle tax for the current tax period has been paid.

(e)(1) The license plate number on said motor vehicle tax stamp, state registration and Commission decals each match, and match the license plates affixed to the vehicle.

(2) The last six digits of the vehicle identification number (VIN) on the Commission decals shall match the last six digits of the VIN on the state registration and match the VIN of the vehicle.

(3) A for-hire vehicle that is registered in New York State must have New York State license plates affixed to the vehicle that are embossed with the legend "T & LC."

(4) A base and/or a base owner shall not dispatch, and a for-hire vehicle owner shall not allow a vehicle to be dispatched:

(A) unless the vehicle is registered in New York State and has license plates embossed with the legend "T & LC", or unless the vehicle is registered in another state and complies with any applicable license plate requirements.

(B) unless the vehicle has a current, valid for-hire vehicle permit which has not expired, been suspended, or been revoked.

(f)(1) The marking requirements of the Commission:

(i) **Exterior Markings.** Beginning on July 1, 2009, the exterior markings of a for-hire vehicle must include: the name of the base station with which the vehicle is affiliated, the base station license number, and the base station telephone number, either (1) all in letters and numerals not less than one-and-one-half inches in height, on the exterior of a door or doors on both sides of the affiliated vehicle, below the windows and not less than six inches above the bottom of the door(s); (2) all in letters and numerals not less than one inch in height in one location on the rear of the affiliated vehicle below the rear window, and not less than six inches above the bottom of the rear of the vehicle, or (3) both on the doors and rear of the vehicle. The letters and numerals must be of a color contrasting with the color of the body of the vehicle to provide easy legibility. Lettering and numbering shall be spaced to provide easy legibility and, if placed on doors on both sides of the vehicle shall be identical on both sides of the livery. All decals shall have semi-permanent adhesive. Luxury limousines and black cars shall be exempt from the requirements of this subdivision (f)(1)(i).

(2) A vehicle owner may not display any advertising, either on the exterior or the interior of a for-hire vehicle, unless such advertising has been authorized by the Commission, and a permit has been issued to the owner in accordance with the provisions of the Administrative Code. The Commission shall not approve any advertising for the exterior of a for-hire vehicle that consists, in whole or in part, of roof top advertising.

(3) Any accessible vehicle licensed by the Commission shall display insignia, the design of which shall be provided by the Commission on its Web site or through means it deems appropriate as set forth on its Web site, that identify such vehicle as an accessible vehicle. Such insignia shall be located on the exterior of the C-pillars of a sedan or an SUV or on the exterior of the D-pillars of a minivan, on both sides of such vehicle, and shall be visible to passengers entering the accessible vehicle.

(4) Any clean air for-hire vehicle licensed by the Commission shall display insignia, the design of which shall be provided by the Commission on its Web site or through other means it deems appropriate as set forth on its Web site,

that identify such vehicle as a clean air vehicle. Such insignia shall be located on the exterior of the C-pillars of a sedan or an SUV or on the exterior of the D-pillars of a minivan, on both sides of such vehicle, and shall be visible to passengers entering the clean air for-hire vehicle.

(g) A for-hire vehicle shall not be equipped with a rooflight, except for a vehicle that operates primarily in Staten Island and is affiliated with a base located in Staten Island. A rooflight on such a Staten Island vehicle must meet the specifications set forth in the definition of "rooflight" in these rules.

(h) No for-hire vehicle shall be, in whole or in part, any shade of taxicab yellow.

(i) No for-hire vehicle shall be equipped with a meter, except a wheelchair accessible livery which is participating in the dispatch program as set forth in chapter 16 of this title.

(j) The provisions of this subdivision (j) apply to the base owner and the owner of the for-hire vehicle; the driver's responsibilities are set forth separately in subdivision 6-16(e) of this chapter.

(1) Before July 1, 2009 each for-hire vehicle must contain the following items in the right visor or on top of the right side of the dashboard or in the glove compartment:

(A) the certificate of registration or legible photostat thereof;

(B) the for-hire vehicle permit or legible photostat thereof; and

(C) the insurance card or legible photostat thereof.

(2) Beginning on July 1, 2009, each for-hire vehicle must contain the following items:

(A) in the right visor or on top of the right side of the dashboard or in the glove compartment:

(i) the certificate of registration or legible photostat thereof;

(ii) the insurance card or legible photostat thereof; and

(iii) the for-hire vehicle permit or legible photostat thereof.

(B) in a protective holder mounted behind the driver's seat in the vehicle (except as provided in subdivision (j)(4)):

(i) the for-hire vehicle driver's license of the driver.

(3) Beginning on September 1, 2009, each for-hire vehicle must contain the following items:

(A) in the right visor or on top of the right side of the dashboard or in the glove compartment:

(i) the certificate of registration or legible photostat thereof; and

(ii) the insurance card or legible photostat thereof.

(B) in a protective holder mounted behind the driver's seat in the vehicle (except as provided in subdivision (j)(4)):

(i) the for-hire vehicle driver's license of the driver; and

(ii) the for-hire vehicle permit.

(4) Exception regarding license and permit postings applicable only to Black Cars and Luxury Limousines. Any

for-hire vehicle which is either a black car or a luxury limousine must comply with all requirements of this subdivision (j) and display all items required to be displayed as of the dates specified, except that such vehicles will not be required to display the for-hire vehicle driver's license and the for-hire vehicle permit in a protective holder mounted behind the driver's seat in the vehicle provided that those items are displayed in the vehicle in a way so as to be clearly visible from the passenger seat and available for inspection by the passenger upon request.

(k) Livery Bill of Rights. Beginning on June 26, 2009 every livery owner must post a Livery Passengers' Bill of Rights in a form and format prescribed by the Commission, which shall be posted by the Commission on its Web site or through means it deems appropriate as set forth on its Web site. The Livery Passengers' Bill of Rights must be placed in a protective holder mounted behind the front passenger's seat of the vehicle.

NOTE

1. Statement of Basis and Purpose in City Record Sept. 20, 1999:

The regulations promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the City, under §2303(b) of such Charter, authorizing the TLC to promulgate rules and regulations relating to standards and conditions of service which are reasonably designed to carry out its purposes; under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules and regulations necessary to exercise authority conferred upon it by the

Charter; and under §19-525 of said Code, authorizing the Commission to issue advertising permits to licensed vehicles and promulgate rules and regulations with respect to such permits.

The regulations prohibit a for-hire vehicle from displaying any advertising on or in a licensed vehicle unless the owner has obtained an advertising permit issued by the Commission pursuant to §19-525 of the Administrative Code.

Section 19-525(a) of the Administrative Code authorizes the Commission to issue advertising permits to any vehicle licensed by the Commission. Currently, such permits are only issued to licensed medallion taxicabs. Existing rules of the Commission prohibit a taxicab from displaying any interior or exterior advertising without a permit, but are silent with respect to authorized advertising on for-hire vehicles. The rule set forth herein promotes consistency with respect to the regulation of advertising on both taxicabs and for-hire vehicles by allowing for-hire vehicles to display appropriate advertising after the owner has obtained a for-hire vehicle advertising permit from the Commission.

The rules of the Commission relating to advertising do not prohibit the indication of a base name or telephone number on the exterior of a vehicle, since such information is required to be displayed by the Commission pursuant to Rule 6-12(f), now redesignated as 6-12(f)(1). After public comment, the regulation was amended to prohibit the display of roof top advertising on for-hire vehicles. This change was made to the rule to maintain the clear physical distinctions between for-hire vehicles and taxicabs and to prevent confusion by the public between these two types of vehicles.

2. Statement of Basis and Purpose in City Record July 15, 1999: The rules promulgated herein by the New York City Taxi and Limousine Commission ("TLC") are authorized under §2303(a) of the Charter of the City of New York, which empowers the TLC to regulate and supervise the business and industry of transportation of persons by licensed vehicles for-hire in the city; under §2303(b) of such Charter, authorizing the TLC to promulgate rules relating to standards and conditions of service which are reasonably designed to carry out its purposes and under §19-503 of the Administrative Code of the City of New York, authorizing the TLC to promulgate rules necessary to exercise authority conferred upon it by the Charter. The rule amendment eliminates the requirement that a for-hire vehicle display a commercial use motor vehicle tax stamp on the windshield. The proposed rule would provide that a for-hire vehicle could not be used for hire unless the required commercial use motor vehicle tax has been paid. Effective as of April 30, 1999, for-hire vehicle owners will no longer receive a commercial motor vehicle tax stamp from the New York City Department of Finance. Commencing on June 1, 1999 the tax will be collected directly by the New York State Department of Motor Vehicles upon the new or renewal registration of the vehicle. A current, valid registration will thereafter constitute proof of payment of the tax. Since most for-hire vehicles are registered in March, the commercial motor vehicle tax for the period ended May 31, 2000 will be paid directly to the Department of Finance. A tax stamp displayed upon the windshield will continue to be proof of payment of the commercial use motor vehicle tax for these vehicles. Accordingly, for this year, some For-Hire Vehicles ("FHVs") will continue to be required to display tax stamps on the windshield. For FHVs registered after June 1, 1999, a current, valid registration will constitute proof of payment of the tax. Since the Department of Finance will continue to collect the tax and issue tax stamps for medallion taxicabs, no change in the taxicab owners rules, with respect to the tax stamp requirement, has been promulgated.

3. Statement of Basis and Purpose in City Record Apr. 13, 2006: Section 6-12(e)(3) requires that licensed for-hire vehicles (liveries, black cars and luxury limousines) that are registered in New York State must have New York State license plates that are embossed with the legend "T&LC" below the license plate number, signifying licensure by TLC as for-hire vehicles. The requirement will apply to for-hire vehicles that are issued new or renewal for-hire vehicle licenses on or after May 10, 2006. Without this rule, for-hire vehicles registered at New York State addresses outside of New York City are able to obtain license plates that are embossed with the legend "livery" from New York State's Department of Motor Vehicles ("DMV"). DMV has indicated to TLC staff that it will honor the requirement in the rule that TLC-licensed for-hire vehicles must have the "T&LC" legend. Requiring all TLC-licensed for-hire vehicles to have "T&LC" embossed license plates would facilitate recognition of such vehicles by the public, TLC staff, insurance providers, and others. In particular, TLC staff research indicates that insurers recognize the "T&LC" license plate as an indication that the vehicle is TLC-licensed, and is therefore subject to the mandatory minimum insurance coverage requirements set forth in §6-11(d)(4) of TLC's rules. Such research further indicates that a for-hire vehicle with "livery"

license plates is not recognized by insurers as TLC-licensed, and therefore in some cases owners of such vehicles are able to purchase insurance coverage less than that mandated by TLC rules. Similarly, mandatory "T&LC" license plates will facilitate the collection of the applicable annual $400 commercial New York City motor vehicle tax, which in some cases has been evaded by owners of for-hire vehicles with "livery" license plates.

4. Statement of Basis and Purpose in City Record June 2, 2009: This rule amends chapter 6 of the Taxi and Limousine Commission's rules to strengthen oversight of the for-hire vehicle industry, to enhance the ties among bases and for-hire vehicle owners and FHV drivers, and to better communicate the legal status of for-hire vehicles to the public. This rule will require greater accountability of bases and vehicle owners for the lawful conduct of the for-hire business. The rule will reward greater accountability by enhancing the value of a base license. In particular, the rule would: As to vehicles: · require that each for-hire vehicle be inspected at the TLC's inspection facility at upon first licensure and upon license renewal. For vehicles that are model year 1996 or later, the TLC inspection will qualify as one of the three DMV inspections required annually. Upon initial licensure of a vehicle that has been driven less than 500 miles, the inspection can be a visual inspection only, and will not count as a DMV inspection. · set time limits during the application or renewal process by which the TLC inspection must be passed and require that each vehicle must pass within four tries. · require that license decals be placed on the vehicle by the TLC only after the vehicle has passed the TLC inspection or at any time a vehicle is replaced or changes affiliation. · require that, starting in September, 2009, vehicles (except luxury limousines) must have three exterior TLC decals. · enhance requirements for exterior base identification markings for each vehicle. · require the summary suspension pursuant to section 8-17(b) of any for-hire vehicle permit and the return of the TLC decal(s) at any time a vehicle is found to be unfit or unsafe at its inspection. · require that renewal applications for for-hire vehicle permits must be filed at least 30 days prior to permit expiration. Renewing applicants may file a renewal application after that date only upon payment of a $25 late fee and in no event later than the expiration date. · provide explicitly that for-hire vehicle permit termination includes revocation or surrender of the permit. · provide explicitly that a for-hire vehicle may be affiliated with only one base at any time. · prohibit a base and a vehicle owner from dispatching a for-hire vehicle from a base other than the base with which the vehicle is affiliated, although bases may dispatch vehicles from other bases provided that the customer is notified. · specify that applicants for for-hire vehicle permits with a prior history of vehicle permit revocation will be subject to a fitness hearing before any new permit can be issued. · impose penalties for vehicle owners if drivers accept street hails. · impose fixed penalties and suspension until compliance with respect to the for-hire vehicle permits for failure to have a valid TLC license decal on a vehicle. · require that vehicle owners who fail for any 60-day period to maintain affiliations or insurance or to comply with the inspection requirements, be subject to revocation under section 19-504(g) of the Administrative Code. · provide for the non-renewal of any for-hire vehicle permit if the vehicle is not in compliance with the requirements of section 6-12 of the TLC's rules at the time of renewal. · require for-hire vehicles to have heating and air conditioning. As to bases: · impose new requirements for bases seeking to terminate vehicle affiliations to reduce the possibility that licensed vehicles lack affiliations. · require base stations to submit business plans meeting certain minimum standards with license applications, renewal applications or applications for ownership changes. · enhance requirements regarding base use of trade names and telephone numbers, Web sites and contact information. · strengthen base record keeping requirements. · extend the term of base licenses to three years. · require base license renewal applications be filed 60 days prior to license expiration. · enhance requirements for bases with respect to filing their rates of fare with the Commission. · require livery bases to provide a price quote to prospective riders. · require bases to provide bonds. · require base owners to maintain lists of vehicles which are affiliated with the base and their drivers. · impose penalties for base station owners which fail to maintain a bond and for those who have failed to pay fines and penalties resulting in a draw on the bond. · add a fine for base owners who fail to meet requirements to provide transportation service to persons with disabilities. · provide that base transfers can occur only upon appearance of the transferor and transferee at the TLC and clarify that all base license transfers require TLC approval. As to bases and vehicles: · require revocation of base licenses and for-hire vehicle permits upon repeated convictions for violations of certain rules, in particular rules regarding the dispatch of unlicensed drivers. · specify that bases, vehicle owners and drivers cannot require passengers to share rides. · clarify that base owners and vehicle owners are separately and independently responsible for the conditions of operation of for-hire vehicles. · specify that base owners, vehicles and drivers are responsible for obeying traffic laws and not creating a nuisance while visiting a base.

As to drivers: · require the driver of a for-hire vehicle to keep the vehicle clean during his or her work shift. · require the driver of a for-hire vehicle to comply with passenger requests regarding heat, air conditioning and audio equipment. Finally, the rule provides for the posting of a Livery Passengers' Bill of Rights, as required by section 19-537 of the Administrative Code of the City of New York, recently added by local law (effective June 26, 2009).

CASE AND ADMINISTRATIVE NOTES

¶ 1. City Charter Sec. 2303, which requires the Taxi and Limousine Commission to serve notices of violations in the same manner as a summons, applies only to violations by unlicensed operators. Where the agency seeks to serve a licensed operator with notice of violations in connection with overdue vehicle inspections, service can be made by ordinary mail. Humming Bird Car Service, Inc. v. New York City Taxi and Limousine Commission, 184 Misc.2d 146, 706 N.Y.S.2d 850 (Sup.Ct. New York Co. 2000).

¶ 2. For hire driver failed to affix a valid TLC license decal on the windshield of his licensed for-hire vehicle in violation of paragraph (a) of this section. **Taxi and Limousine Comm'n v. Dadon,**, OATH Index No. 2147/00 (June 29, 2000), **modified on penalty,** Comm'r Dec. (Dec. 11, 2000).

¶ 3. For a period of time ending in 2002, the Taxi & Limousine Commission (TLC) had a practice of assessing multiple fines for violations of 35 RCNY 6-12 and 6-13, collecting the full statutory fine from each of the base station owner, the vehicle owner, and the vehicle lessee. A challenge to the statute alleged that the collection of three fines, instead one, constituted an excessive fine under the Eighth Amendment. The court, however, held that in the absence of an allegation that any of the individual fines was excessive, the collection of fines from multiple parties did not violate the Eighth Amendment. New York State Federation of Taxi Drivers, Inc. v. City of New York, 270 F.Supp.2d 340 (E.D.N.Y. 2003).

35 RCNY 6-12.1

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 6 FOR HIRE VEHICLES

§6-12.1 Additional Conditions of Operation of For-Hire Vehicles and Bases.

A base owner and a for-hire vehicle owner shall each be separately and independently responsible for compliance with the following provisions and liable for penalties for violation thereof.

(a)(1) A base owner shall not dispatch or allow to operate, and a for-hire vehicle owner shall not allow to be dispatched or operated, a for-hire vehicle unless the driver's chauffeur's license is current and valid. For purposes of these rules, a valid chauffeur's license shall mean a license which is neither expired, suspended, revoked, conditional or restricted as to use by the New York State Department of Motor Vehicles or agency of another state which issued such license for violations of traffic laws or regulations. Each base owner and each for-hire vehicle owner is responsible for knowing the status of the state issued driver's license for any driver dispatched.

(2) A base owner shall not dispatch or allow to operate, and a for-hire vehicle owner shall not allow to be dispatched or operated, a vehicle unless the driver possesses a current for-hire vehicle driver's license issued by the Commission. For purposes of these rules, a current for-hire vehicle driver's license shall mean a license issued for the current time period which is neither suspended, revoked nor expired. The Commission shall post on its Web site a list of drivers and vehicles holding current, valid permits and licenses.

(3) A base owner and a for-hire vehicle owner shall not knowingly allow a for-hire vehicle to be operated by a driver who is under the influence of any drugs or alcohol or whose driving ability is in any way impaired.

(b)(1) No for-hire vehicle shall be driven when the Chairperson or the New York State Department of Motor Vehicles or a DMV inspection facility has determined that the vehicle is unsafe or unfit for use as a for-hire vehicle.

The for-hire vehicle permit shall be suspended pursuant to section 8-17(b) of this title upon such determination. In addition:

(2) If the Chairperson has determined that the vehicle is unsafe or unfit, the decals shall be confiscated by the Chairperson.

(3) If the New York State Department of Motor Vehicles or a DMV inspection facility other than the Commission has determined that the vehicle is unsafe or unfit, the vehicle owner must return the decals to the Chairperson within 72 hours of issuance of the determination.

(4) If the Chairperson has any reason to believe that any for-hire vehicle is unsafe or unfit for use, the Chairperson may order such vehicle to report to the Commission's inspection facility.

(c)(1) Each for-hire vehicle shall have all seat belts and shoulder belts clearly visible, accessible and in good working order.

(2) Each for-hire vehicle shall in addition to seat belts for each seating position and shoulder belts for both outside front seat positions be equipped with shoulder belts for both outside passenger rear seat positions.

(d) No for-hire vehicle shall be issued a permit or be used to transport passengers for hire in the City of New York if the vehicle has been altered after manufacture to increase its length, width, weight or seating capacity, or to modify its chassis and/or body design, unless the modification has been made in accordance with a program approved in advance by the original vehicle manufacturer, and the alteration has been performed by an entity approved and certified by the vehicle manufacturer to perform such alterations. An original, unaltered, approved vehicle modifier's certification sticker shall be affixed to the vehicle at a location to be determined by the Commission.

(e) Any officer or employee of the Commission designated by the Chairperson of the Commission, or any police officer, may conduct on-street inspections of vehicles providing transportation for hire and operating within New York City to assure compliance with all applicable laws and rules and may order the vehicle to report to the Commission's inspection facility.

(f) No for-hire vehicle owner shall permit his or her vehicle to transport passengers for hire other than through pre-arrangement with a base licensed by the Commission. A for-hire vehicle owner shall be liable for penalties for any violation of this section if the vehicle is used to transport passengers other than through pre-arrangement.

(g)(1) To be affiliated with a black car base, a vehicle owned or leased by a new applicant, beginning January 1, 2010, must meet the requirements set forth in section 6-09 and, beginning January 1, 2011, must meet the requirements set forth in section 6-10 of this chapter. For purposes of this paragraph (g)(1), a "new applicant" is the owner or lessee of a vehicle who does not hold a current for-hire vehicle permit for that vehicle.

(2) To be affiliated with a black car base, a vehicle owned or leased by a renewal applicant, beginning January 1, 2011, must meet the requirements set forth in section 6-10 of this chapter. For purposes of this paragraph (g)(2), a "renewal applicant" is the owner or lessee of a vehicle who holds a current for-hire vehicle permit for that vehicle and is affiliated with a black car base when the application is submitted.

(h) No base and no owner of a for-hire vehicle shall require that any prospective passenger must share a ride with another prospective passenger.

(i) The owner of a for-hire vehicle shall be responsible for ensuring that the driver and vehicle will obey all applicable traffic and parking regulations within the area set forth in section 6-07(b)(3) of this chapter.

(j) The owner of a for-hire vehicle shall be responsible for ensuring that the driver and the vehicle while stopped at

the base with which the vehicle is affiliated or by which the vehicle is dispatched will not create a nuisance such as by engaging in horn honking, littering, or the playing of loud audio material within the area set from in section 6-07(b)(3) of this chapter.

(k) The owner of a for-hire vehicle shall be responsible for ensuring that the vehicle is equipped with functioning heating and air conditioning equipment.

HISTORICAL NOTE

35 RCNY 6-13

RULES OF THE CITY OF NEW YORK

Title 35 Taxi and Limousine Commission

CHAPTER 6 FOR HIRE VEHICLES

§6-13 Partitions, Cameras and Emergency Lights.

A for-hire vehicle base and a for-hire vehicle owner shall be jointly and severally responsible for compliance with the following provisions and liable for violation thereof. No for-hire vehicle shall be used in the course of operations of a for-hire vehicle service unless the vehicle is in compliance with the following:

(a) A for-hire vehicle, except as provided in paragraphs two and three of this subdivision, shall be equipped with a partition which isolates the driver from the rear seat passengers or all passengers present in such vehicle, as set forth in paragraph one of this subdivision.

(1) The partition shall be made of polycarbonate material not less than 0.375 inches thick extending upward from the back of the front seat to the ceiling of the vehicle. There shall be a provision for communication with passengers and for a money slot while the partition is closed. Such partition may be able to be partially opened by the driver, as long as the driver can fully close the partition at any time. A for-hire vehicle owner shall also equip the vehicle with a 0.085 inch thick plate of ballistic steel or its equivalent, installed inside the back rest of the front seat. The plate shall cover the complete back rest area which is exposed to the rear seat compartment. Provided, however, that, notwithstanding any other provision of these rules, all for-hire vehicles, except those that are exempt pursuant to paragraphs two or three of this subdivision, when an existing partition is required to be replaced or when a partition is installed (including, but not limited to, at first licensing), shall be equipped with a partition, the transparent portion of which shall be constructed, at a minimum, of a mar-resistant polycarbonate and shall be not less than 0.375 inches thick, that will provide passengers and drivers with maximum visibility.

(A) For a flat partition and a partition for a for-hire vehicle with factory installed curtain airbags, the transparent

portion of the partition shall extend from the ceiling to join or overlap with the protective plate of the partition.

(B) For an L shaped partition, on the side that is behind the driver, the transparent portion of the partition shall extend from the ceiling to join or overlap with the protective plate and on the side that extends forward to back between the two front seats, the transparent portion of the partition shall extend from the ceiling to join or overlap with the protective plate of the partition on the right side of the center console between the two front seats.

(C) The protective plate shall join or be overlapped by the transparent portion of the partition and shall extend from the point that the protective plate joins, or if overlapped by the transparent portion of the partition, the point that would be the point of joiner with the transparent portion of the partition, downward to the floor of the for-hire vehicle. The protective plate shall be constructed of a 0.085 inch thick plate of ballistic steel or its equivalent installed in and covering the complete back rest area of the front seat which is exposed to the rear seat compartment and, for an L shaped partition, on the right side of the center console between the two front seats.

(D) No partition shall be installed unless it shall have the following features which do not compromise passenger or driver safety:

(i) a means for passengers and drivers to communicate with each other; and

(ii) the capacity for the passengers to pay fares, either by cash or by credit card if the for-hire vehicle is capable of accepting credit card payments, and for the passengers to receive receipts for payments and transactions, while the passenger is in the rear passenger compartment.

(2) A for-hire vehicle shall be exempt from the requirements of paragraph (1) if the vehicle is affiliated only with a black car base or a luxury limousine base.

(3) A for-hire vehicle shall be exempt from the requirements of paragraph (1) if the vehicle is equipped with at least the following two safety devices:

(i) A FCC-licensed commercial two-way radio with an emergency button that would notify the dispatcher that the driver is in trouble or a cellular telephone which has an emergency dialing feature, and

(ii) Some other device specifically approved by the Chairperson to satisfy this requirement, in addition to the trouble light required by subdivision (b) of this section; provided, however, that, when an existing in-vehicle camera system is required to be replaced or when such system is installed in compliance with this paragraph, it shall meet the requirements set forth in section 3-03(e)(3)(v) of this title. Such for-hire vehicle shall further be equipped with the trouble light required by subdivision (b) of this section.

(b) The vehicle shall be equipped with a help or distress signaling light system, unless the owner is exempt pursuant to paragraph (7) of this subdivision. The light system shall be in accordance with the following specifications:

(1) The help or distress signaling light system shall consist of two turn signal type "lollipop" lights.

(2) One light shall be mounted on the front center of the vehicle, either on top of the bumper or forward or behind the grill. A second light shall be mounted on top of the rear bumper, to the left of the license plate.

(3) Each light shall be three to four inches in diameter, have a total rated output of thirty-two candle power and shall be the color amber or have an amber colored lens that the light output of the device is the color amber at thirty-two candle power.

(4) The activator shall be installed within easy reach of the driver and shall be silent when operating.

(5) The lights shall flash between 60 and 120 times per minute.

(6) The wiring shall not affect or interfere directly otherwise with any wiring or circuitry used by a meter for measuring time and distance.

(7) A vehicle shall be exempt from the requirements of this subdivision if the vehicle is affiliated only with a black car base or a luxury limousine base.
