Enrollment Request & Response

Ver/Rel 004010

NY 814 Enrollment Request	Summary of Changes					
July 20, 2001	Initial Release					
August 7, 2002	Version 1.1 Issued					
,	Added a REF*AJ segment (Utility Account Number for ESCO/Marketer) per June 21, 2002 order.					
	The Field Descriptions Page was replaced with an updated version.					
	The Front Matter Notes regarding 'Effective Date' were changed to reflect the business process rules regarding reinstatement adopted in an order issued on May 29, 2002. The list of documents provided under "Companion Documents' was also expanded to include the Reinstatement Implementation Guide and Business Process documents.					
	Modified the Front Matter Notes regarding 'Secondary Services' to remove an erroneous reference to a REF*TZ segment and to clarify the use of the NM1 detail loop for an accept response to a secondary request for consumption history/gas profile. An NM1 loop is required an in accept					
	response to an enrollment request (primary request) but is never sent in an accept response to a secondary request for consumption history/gas profile.					
	accept response to a secondary request for consumption history/gas profile.  Modified the segment notes for the following segments to distinguish between the use of each segment in the 814 transaction sent in response to an enrollment request versus the response to a secondary request for consumption history/gas profile data: N1*8R (Customer), N3/N4 (Service Address), N1*BT (Name for Mailing), N3/N4 (Mailing Address), REF*93 (Fee Approved/Fee Applied), REF*11 (E/M Customer Account Number), REF*45 (Previous Utility Account Number), REF*65 (Meter Cycle Code), REF*BF (Bill Cycle Code), REF*BLT (Bill Presenter), REF*PC (Bill Calculator), REF*NR (Current Budget Billing Status), REF*PGC (Partial Participation Portion), REF*SU (Customer on Life Support), REF*VI (Gas Pool ID), REF*GC (Gas Capacity Assignment/Obligation), REF*GS (Gas Supply Service Option), REF*ALC (Human Needs Indicator), REF*SPL (ISO Location Based Marginal Pricing Zones), REF*RP (Portion Taxed Residential), DTM*150 (Assigned Service Start Date), AMT*DP (Tax Exemption Percent), AMT*RJ (Commodity Price), AMT*KZ (Electric Capacity Assignment), and all segments contained in the NM1 Loop.					
	and REF*BF (Bill Cycle Code) segments to clarify that this element is required in an accept response to an enrollment request when the data sent in REF02 is insufficient to describe both when and how frequently meters are scheduled to be read and/or bills are scheduled to be rendered per the document issued October 2, 2001.					
	Clarified use of the REF03 element in the REF*TU (Use Time of Day) segment and element notes per document issued October 2, 2001.					

	Summary of Changes (Continued)				
November 26, 2002	Version 1.2 Issued				
, , , , , , , , , , , , , , , , , , , ,	Added a new AMT segment (AMT*FW) to permit ESCO/Marketer				
	send fixed charge information as well as rates or rate codes when the				
	bill option requested is Utility Rate Ready consolidated billing.				
March 17, 2004	Version 1.3 Issued				
Wiaitii 17, 2004	Added code values to the 02 element in the REF*TU segment to enable				
	Orange & Rockland Utilities, Inc. and Consolidated Edison of New				
	York, Inc. (or other utilities at their option) to describe in more detail in				
	an Accept Response transaction, the type of electric usage data ESCOs				
	<ul> <li>can expect to receive in either an 867HU or 867MU transaction.</li> <li>Added AMT*9M and AMT*9N to enable ESCOs to transmit customer's</li> </ul>				
	tax rate information when the bill option requested is Utility Rate Ready				
	consolidated billing and the Utility requires ESCOs to provide this data				
	in an Enrollment transaction. When different tax rates are applicable to				
	portions of the customer's service i.e. when a REF*RP segment is				
	present in a Request transaction, it will be necessary to send both the 9M				
	(residential tax rate applicable to a portion of the service) and the 9N segment (commercial tax rate applicable).				
	<ul> <li>Notes regarding the attributes of "R" elements were added to the Front</li> </ul>				
	Matter notes.				
M. 17 2006	The state of the s				
May 17, 2006	<ul> <li>Version 2.0 Issued</li> <li>The "All meters per Account" section of the Front Matter Notes is</li> </ul>				
	revised to indicate that an ESCO/Marketer may separately enroll the un-				
	metered electric service for accounts in Orange & Rockland's service				
	territory where both metered and un-metered electric service are present				
	on the account. To separately enroll the un-metered service the REF03				
	element must be present in the REF*12 (Utility Account Number) segment.				
	<ul> <li>The "Cross Referencing Request and Response Transactions" section of</li> </ul>				
	the Front Matter Notes is revised to clarify the use of various				
	segments/elements in an Enrollment Accept Response transaction when				
	this transaction is not preceded by an Enrollment Request transaction				
	sent by the E/M.  • The "Fees" section of the Front Matter Notes is deleted. Prior to				
	November 21, 2003 fees could be assessed for requests for history data				
	under specific conditions. To accommodate fees, a REF*93 (Fee				
	Approved/Fee Applied) segment was required to be sent in the LIN				
	loop containing requests for historic usage (HU) or a gas profile (GP)				
	to indicate whether the E/M was willing to pay a fee for the data if one was applicable. Under the current Uniform Business Practices fees				
	may no longer be assessed for satisfying EDI requests for consumption				
	history.				
	References to Niagara Mohawk or NMPC throughout the document				
	were revised to refer to National Grid.				

NY 814 Enrollment Request &	Summary of Changes (Continued)
	• The element notes for BGN06 in the BGN Segment are revised to indicate that this element may be populated with the text 'MANUAL' in an Enrollment Accept Response transaction when there is no corresponding Request transaction, for example, when a customer participating in an ESCO Referral Program is enrolled by the utility and the Response is being sent to provide the assigned ESCO with the customer's account details. An additional example was also added to the BGN segment notes.
	<ul> <li>An N106 element is added to the N1*8R (Customer) segment to for use by utilities in Enrollment Accept Response transactions to identify the enrollment as an ESCO Referral Program enrollment.</li> </ul>
	• A PER segment is added to the N1 (Customer) Loop to enable utilities that enroll customer's participating in ESCO Referral Programs with an ESCO to transmit the customer's telephone number in an Accept Response transaction.
	• The FNA code (Fee Not Authorized) is deleted from the list of possible reject reason codes in the REF*7G segment (Reject Response Reasons) and the REF*93 (Fee Approved/Fee Applied) segment is deleted from the standard. Fees are no longer being assessed for consumption history provided via EDI.
	<ul> <li>A REF03 element is added to the REF*12 segment (Utility Account Number) for use on Enrollment Requests sent to, or received from, Orange &amp; Rockland Utilities when the transaction pertains to enrolling the un-metered portion of a customer's electric service when both metered and un-metered service are present on the same account.</li> </ul>
	• The segment notes for the REF*BLT (Bill Presenter) and REF*PC (Bill Calculator) were revised to clarify the content of these segments for the Single Retailer Model in National Fuel Gas' service territory and to omit references to RG&E since Single Retailer is no longer offered in that service territory.
	The notes for the REF*NR (Current Budget Billing Status) segment is also revised to omit reference to Rochester Gas & Electric's use of the Single Retailer model.
	• A REF*LF (E/M Late Fees) segment is added at the account level to enable E/Ms to communicate in Enrollment Request transactions sent to National Fuel Gas whether the utility should calculate and assess late fees on E/M charges for the account being enrolled. This segment pertains to the Utility Rate Ready bill option only.
	The notes for the REF*SU (Customer on Life Support) segment is revised to omit reference to Rochester Gas & Electric's use of the Single Retailer model.
	<ul> <li>The REF*ALC segment (Human Needs Customer) notes are revised to indicate that this segment is required by National Grid only on gas enrollment requests for non-residential customers.</li> </ul>

NY 814 Enrollment Reque	Summary of Changes (Continued)
	An AMT*BD (E/M Budget Plan Balance) and an AMT*B5 (E/M Budget Plan Installment Amount) segments are added for use in Enrollment Request transactions sent to National Fuel Gas to communicate a customer's budget plan installment and pre-existing budget plan balance when the customer's bill option is Utility Rate Ready billing and a REF*NR segment is present in the Request transaction.
	The AMT*RJ (Commodity Price), AMT*FW (E/M Fixed Charge) and the REF*RB segment notes are revised to accommodate Enrollment Accept Response transactions associated with ESCO Referral Program enrollments initiated by the utility. The AMT*RJ and AMT*FW segments may contain zeros or dummy codes in Response transactions. The usage attribute for the REF*RB (ESCO Rate Code) segment in an Enrollment Accept Response transaction is changed from 'Not Used' to 'Conditional' so that National Grid may send this segment in an Enrollment Accept Response transaction for ESCO Referral Program enrollments.
October 23, 2014	Version 2.1 Issued
April 7, 2015	<ul> <li>Adding these new segments from Case - 12-M-0476.         <ul> <li>REF*IJ (Industrial Classification Code),</li> <li>REF*TX (Utility Tax Exempt Status),</li> <li>REF*TDT (Account Settlement Indicator),</li> <li>REF*YP (NYPA Discount Indicator),</li> <li>REF*SG (Utility Discount)</li> <li>DTM*AB2 (ICAP Effective Dates)</li> <li>AMT*8B (Future ICAP Tag)</li> <li>DTM*AB4 (Future ICAP Tag Effective Dates)</li> <li>Utility specific notes are generalized, as appropriate, and designated for relocation to/reference within Utility Maintained EDI Guides, as necessary.</li> <li>Removed references to ESCO Referral Program</li> <li>Replaced references to Marketer and E/M with ESCO.</li> <li>Version 2.2 Issued</li> <li>Added code SP to N1 Name (Customer) to enable Service Portability.</li> </ul> </li> </ul>
	<ul> <li>Clarifying revisions to ESCO Service Tax Rate related segments.</li> <li>Correct the note for the AMT Monetary Amount (ICAP) segment to remove an 814 Change oriented phrase.</li> </ul>
July 24, 2015	Version 2.3 Issued
	<ul> <li>Added code HUL to the REF Reference Identification (Response Information or Warnings) segment to notify the ESCO that no usage data to be reported or exchanged the PTD*FG loop in the 867HU transaction.</li> <li>Added codes EM and FX to the PER Administrative Communications Contact (Customer Phone Number) segment to support utility optional exchange of Customer email addresses and facsimile numbers with ESCOs.</li> </ul>

NY 814 Enrollment Req	uest & Response
-----------------------	-----------------

NY 814 Enrollment Reques	st & Response			
	<ul> <li>Revised Notes for DTM (ICAP Effective Dates), DTM (Future ICAP Effective Dates), AMT (ICAP) Segments and AMT (Future ICAP) Segments.</li> </ul>			
	<ul> <li>Added PER Administrative Communications Contact (Customer Phone Number) Segment to N1*BT loop</li> <li>Removed obsolete Scenario 6 examples</li> <li>Errata - Corrected acronym for North American Industry Classification System</li> </ul>			
January 29, 2016	Version 2.4 Issued			
	<ul> <li>Modification to REF Reference Identification (Gas Capacity Assignment/Obligation) Segment to correspond to Orders issues in Case No. 07-G-0299.</li> <li>Addition of Ref. Des. AMT03 to AMT Monetary Amount (Future ICAP) Segment to indicate presence of Special Program Adjustment Indicator.</li> <li>Updated gas switching timeline reference to 10 business days.</li> <li>Errata         <ul> <li>Addressed incorrect segment name in Detail: section.</li> <li>Generalized identities in examples.</li> </ul> </li> </ul>			
June 30, 2016	Version 2.5 Issued			
,	• Update to conditionality of REF Reference Identification (Previous Utility Customer Account Number) segment.			
March 31, 2017	Version 2.6 Issued			
	<ul> <li>Update to conditionality of REF Reference Identification (Meter Cycle Code) segment.</li> <li>Modifications to support 867 MIU/HIU transactions.</li> <li>Addition of REF Reference Identification (Public Aggregator) segment.</li> </ul>			
October 31, 2017	Version 2.7 Issued			
	• Inclusion of changes to address errata since filing of Version 2.6 in REF*1P segment.			
<b>April 30, 2018</b>	Version 2.8 Issued			
	<ul> <li>Addition of REF Reference Identification (APP Status) to communicate Customer APP Status in the Enrollment Response.</li> <li>Elimination of references to NY Billing Agency model.</li> <li>References to Single Retailer Model changed to ESCO Consolidated Billing, where appropriate.</li> </ul>			
May 31, 2019	Version 2.9 Issued			
	<ul> <li>Modifications to REF~PC segment regarding ESCO Combined Billing.</li> <li>Optional REF*KY added to indicate whether the account has associated generation.</li> </ul>			

N1 814 Enronment Reques	Notes pertaining to the use of this document
Purpose	This 814 Enrollment Transaction Set will be used to enroll or switch a customer, and to request secondary services coincident with that customers' enrollment. These standards are based on the ASC X12 Ver/Rel 004010 standard and related UIG guidelines.
One account per 814	• Each transaction may contain only one account for one commodity (i.e. electric, gas, etc.). If a customer takes both electric and gas bundled service from the utility under a single account number, and the ESCO supplies both electric and gas, two 814 enrollment requests must be submitted – one for the switch of electric service and another for the switch of gas service.
All meters per account	<ul> <li>Except where a utility supports separate enrollment of the un-metered electric service for accounts, when a customer enrolls with an ESCO for their electric service, all electric meters (and/or un-metered electric service) on the customer's account will be enrolled with that supplier. Similarly, an enrollment with the same (or a different) supplier for gas service, will result in the enrollment of all gas meters with that supplier.</li> <li>Where a utility supports separate enrollment of the un-metered electric service for accounts, when both metered and un-metered electric service is present on an account, an ESCO may separately enroll (or drop) the un-metered service on that account by transmitting the REF03 element in the REF*12 (Utility Account Number) segment.</li> </ul>
Multiple requests per commodity per account	• This 814 Transaction Set can accommodate more than one action request per commodity per account. Each request should be in a separate LIN loop but the request for enrollment (LIN05 = CE) is considered the primary request and should be placed first in the transaction. Refer to the LIN segment in this document for a better understanding of primary and secondary services. The secondary requests reflected in this implementation guide are requests for actual history data for the customer being enrolled or a request for a gas profile for a customer being enrolled for gas service.

#### NY 814 Enrollment Request & Response

1 1 01+ Ellionnicht Reque	N1 814 Emonment Request & Response				
Cross referencing	•	In most instances, the id sent in the BGN02 element in the BGN segment			
Request and		in a request must be returned in the BGN06 element of the BGN			
Response		segment sent in a Response transaction. There must be one response			
transactions		LIN for each request LIN sent. It is possible, for example, to accept an			
		enrollment request (LIN05 = CE) but reject the secondary request for			
		history data (LIN05 = $HU$ ). The response to each LIN loop on the			
		request must be uniquely identified on the response with the same			
		identification sent in the request LIN01. Responses may be created and			
		sent at different times in different 814 transactions, but all LINs must be			
		responded to within the time limits set by the Commission in the			
		Uniform Business Practices.			
	•	In Enrollment Accept Response transactions for which there is no			
		corresponding Enrollment Request transaction, the BGN06 element in			
		the BGN segment will be populated with the word "MANUAL" in lieu			
		of the BGN02 id from a Request transaction.			
Validation Fields	•	Validation field is the customer's utility account number (with check			
		digit, if included).			

## Effective Date

- The effective enrollment date for a customer should not be sent in 814 Enrollment Requests. The effective enrollment date for an account is determined by the Utility and will be returned in an Enrollment Accept Response transaction. Customers will be enrolled with a supplier coincident with the date of the customer's next regularly scheduled meter read date or the first of the month for gas, provided that the suppliers request has been received and processed by the Utility at least 5 business days (10 business days for gas) in advance of this date and the customer has not rescinded the pending enrollment.
- Valid enrollment requests that do not comply with the 5 business (10 business days for gas) requirement may not be rejected; the customer may be enrolled on the next succeeding meter read date for that customer or the first of following month for gas (if a special read has NOT been requested) provided that the customer has not rescinded the pending enrollment request. The Reinstatement Business Process document should also be reviewed for a description of factors that may affect the determination of the effective date for an enrollment.
- A customer may be enrolled with an ESCO on an off cycle date but these requests are not currently being processed via EDI. Arrangements for an off cycle enrollment date should be made directly with the Utility and will only be granted subject to the requirements of that Utility's tariffs.

#### **Secondary Services**

- The secondary requests reflected in this implementation guide are a request for history data (LIN05 = HU) or a request for a gas profile (LIN05=GP).
- When the enrollment request (LIN = CE) is rejected, all secondary services requested coincident with that enrollment will also be rejected.
- LIN05 = GP is a secondary service request for a gas profile for the customer being enrolled. A gas profile is a weather-normalized forecast for a twelve-month period for the customer being enrolled. Gas profiles are not supported by all Utilities (see Conditional Data Segments below). When this request is accepted, the ESCO will receive an 814 Accept Response transaction and the gas profile data will be provided in an 867HU transaction.
- LIN05 = HU is a secondary service request for history data for the customer being enrolled. When this request is accepted, the ESCO will receive an 814 'accept' response transaction and summarized data on usage for the most recent 12 month period (or the life of the account, if shorter) for the customer being enrolled in an 867 HU transaction.
- The REF\*MT (Measurement Type and Reporting Interval) and REF\*TU (Use Time of Day) segments in the NM1 loop may be used to describe the type(s) of usage a meter is capable of measuring. An NM1 loop will only be returned in an 814 response transaction accepting the enrollment request.
- The REF\*TU segment would not be used in a response to a gas enrollment request and would only be sent in a response to an electric enrollment request when either the REF03 element in the REF\*MT segment is "COMBO" or electric usage is being measured for multiple time periods in a day on the account being enrolled.

NY 814 Enrollment Reques	st & Response
	<ul> <li>Although data sent in a REF*MT segment may indicate that a meter is capable of measuring usage in intervals, such as 15 or 30 minutes, no interval data will be returned in an 867HU transaction in response to an HU request. Requests for interval data on customer accounts must be sent in a separate 814-request transaction and not as a secondary request on an enrollment transaction. Arrangements for receipt of interval data, and usage data in excess of 12 months, must be made with the applicable utility since this data may not be returned on an 867 transaction.</li> <li>A request for consumption history that is not coincident with a request for enrollment is addressed in another implementation guide (see TS 814 Consumption History Request &amp; Response).</li> </ul>
Single Retailer Model	There are some significant differences in the required segments for an enrollment request (and related secondary services) and responses where the Single Retailer Model has been implemented for retail access. These differences have been noted in the notes and gray box text in the individual data segments in this implementation guide.
Data Element Attributes	• Data elements whose X12 attribute type is 'R' (see the AMT segments for examples) are treated as real numbers. Real numbers are assumed to be positive numbers and a minus (-) sign must precede the amount when a negative number is being sent. Real numbers do NOT provide for an implied decimal position; therefore a decimal point must be sent when decimal precision is required. Note that in transmitting real numbers it is acceptable, but not necessary, to transmit digits that have no significance i.e. leading or trailing zeros.
Conditional Data Segments  Definitions	<ul> <li>There are minor differences in the extent to which specific data elements are supported by each Utility and/or whether they are applicable to both electric and gas services. These differences have been noted, for the most part, in the data dictionary associated with this implementation guide.</li> <li>Where a utility provides gas profile data, if the LIN05 = GP and the Utility does not support gas profiles, the Utility will return the default history data, for the account being enrolled, on an 867 (i.e. up to 12 months of usage, or the life of the account).</li> <li>The term Utility or LDC (Local Distribution Company) is used in this document to refer to the local gas or electric distribution company.</li> </ul>
	document to refer to the local gas or electric distribution company, i.e. the entity providing regulated bundled commodity service. The term ESCO is used in this document to refer to either a gas or electric supplier. The principal parties involved in this Transaction Set 814 implementation guide are:  The end-use customer (Code 8R)  The Utility (LDC) (Code 8S)  The Supplier (ESCO or ESCO) (Code SJ).
Rejection vs. Acceptance with Status Reason code	A warning/informational code is different than a Rejection Reason code. The warning code is used to give additional information to the receiving party (an FYI). If an 814 Request does not contain a segment required by the recipient Utility and/or a segment contains incorrect data, some Utilities will reject the transaction while others may accept the transaction and send a warning in their 814 response. Refer to the

NY 814 Enrollment Request & Response

	data dictionary associated with this implementation guide for further clarification.			
Companion	All of the applicable business rules for New York are not necessarily			
Documents	documented in this implementation guide. Accordingly, the following			
	documents should be reviewed where further clarification is needed:			
	Enrollment Business Processes document			
	> TS 814 Enrollment Request and Response Data Dictionary			
	> TS 814 Reinstatement Request & Response Implementation Guide			
	Reinstatement Business Processes Document			
	> TS 814 Change (Account Maintenance) Implementation Guide			

#### **Implementation Guideline Field Descriptions**

Segment: REF Reference Identification (Utility Customer Account

**Position:** 050

Loop:

Level: Heading

**Usage:** Optional (Must Use)

Max Use: 1

**Purpose:** To specify identifying information

**Syntax Notes:** 1 At least one of REF02 or REF03 is required.

2 If either C04003 or C04004 is present, then the other is

3 If either C04005 or C04006 is present, then the other is leganea.

1 REF04 contains data relating to the value cited in REF02.

**Comments:** 

**Semantic Notes:** 

This section displays the NY Rules for implementation of this segment.

nt number assigned to the customer is

used for validation and must be present on all

One or more examples. ons.

### 814 Enrollment Request and Response

Functional Group ID=GE

#### **Introduction:**

This standard is for Trial Use contains the format and establishes the data contents of the General Request, Response or Confirmation Transaction Set (814) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to request actions to be performed, to respond to a request for actions to be performed or to confirm information related to actions performed.

#### **Notes:**

This guideline is limited to defining the required and optional information needed to satisfy a request for enrollment, a response accepting the enrollment request, a response rejecting the enrollment request, and the requests and responses for secondary services that may be requested in conjunction with the enrollment request.

#### **Semantic Notes:**

Notes: Request: Optional Enrollment Accept Response: Conditional

The Customer's Phone Number, Facsimile Number and/or Email Address may be sent in an Accept Response transaction, at the discretion of the Utility. If the Enrollment Accept Response does not provide an item, the ESCO should presume the utility has no information to provide.

The format for phone/facsimile numbers is area code + 7 digit number (xxxyyyzzzz). In its Utility Maintained EDI Guide, a utility will indicate if it accepts Enrollment Requests and/or sends Enrollment Responses containing the Customer's Telephone/Facsimile number and/or Email Address.

CE Customer Enrollment

Request to enroll this customer for Energy Services. A Request for enrollment is considered the primary

request when present.

GP Gas Profile

Request a 12 month forecasted gas delivery profile. Valid only when LIN03=GAS.

Gas Profiles are not supported by all utilities. If a Gas Profile request is sent to a Utility that does not support gas profiles, the Utility will return Historic Usage, if available, in the 867 sent in response to the Gas Profile request. When supported, a GP request may still be rejected if there is insufficient data to develop a gas profile for that customer.

HU Historic Usage

HI

HG

Request for Usage History

GAS note: Some utilities support a Gas Profile in lieu of actual history and will return a Gas Profile, if sufficient data exists, in the 867 sent in response to the request for Historic Usage.

Historic Interval Usage

Request for Interval Usage History at the account level.

Indicates an ESCO request to obtain historical interval usage information for this customer. If this customer account does not have interval meter, 867HU report will be provided without Interval Usage.

Historic Interval Usage

Request for Interval Usage History at the meter detail level.

Indicates an ESCO request to obtain historical interval usage information for this customer at the meter detail level. If this customer account does not have interval meter, 867HU report will be provided without Interval Usage.

Notes: Enrollment Request: Conditional Other Requests/Response: Not Used

Where required by the utility in its Utility Maintained EDI Guide, this segment must be present in Requests sent to the utility when the commodity is gas and the non-residential customer being enrolled meets the definition of a Human Needs Customer as found in the utility's tariff. Generally, Human Needs Customers are defined as accounts that rely solely on gas for heating that are residential in character such as facilities which house patients or residents on an overnight basis (hospitals or prisons) or critical care accounts (nursing or other acute care facilities).

This segment may be provided in Gas Enrollment Requests sent to other utilities with the mutual agreement of the trading partners.

The Utility Tax Exempt Status signifies the existence of exemptions and/or certifications, if any, held by the utility, that are used to bill the customer for utility services. The indicator is informational only; the utility's exemption is not transferable to the ESCO to bill the customer for ESCO services. The ESCO should not rely upon the utility's information for billing purposes and should contact the customer to obtain necessary information consistent with the requirements of the New York State Department of Taxation & Finance and any applicable laws.

Enrollment Requests: Conditional Enrollment Accept Responses: Conditional Other Requests/Responses: Not Used

Where supported by a utility, this segment may be sent in a Request when the bill option for the customer being enrolled is Utility Rate Ready consolidated billing and the utility requires the ESCO to provide the tax rate via EDI at the time of enrollment. This segment may be returned on an Accept Response if sent in the Request.

In its Utility Maintained EDI Guide, the utility will indicate:

- If it supports the AMT\*9M segment and if so, whether and how it is supported in conjunction with the AMT\*9N and/or REF\*RP segments;
- If the AMT\*9N and REF\*RP segments are both supported by the utility, a portion of the service is taxed at a residential rate (see REF\*RP segment), the residential tax rate should be provided in this AMT segment and the commercial tax rate applicable to the remaining portion of the service should be transmitted in the AMT\*9N segment.
- Whether in lieu of supporting the AMT\*9N and/or REF\*RP segments, the utility supports use of a composite tax rate to compute the applicable tax amount associated with the ESCO charges.

Where supported by a utility, this segment is sent in a Request to provide the commercial tax rate applicable to a portion of the customer's service when (1) the bill option for the customer being enrolled is Utility Rate Ready consolidated billing, and (2) the utility requires the ESCO to provide the tax rate via EDI at the time of enrollment. In its Utility Maintained EDI Guide, the utility will indicate:

- If it supports the AMT\*9N segment and if so, whether and how it is supported in conjunction with the AMT\*9M and/or REF\*RP segments;
- If the AMT\*9N and REF\*RP segments are both supported by the utility a residential tax rate applies to a portion of the customer's service (see REF\*RP) and the balance is taxed at a commercial rate;
- Whether in lieu of supporting the AMT\*9M and/or REF\*RP segments, the utility supports use of a composite tax rate to compute the applicable tax amount associated with the ESCO charges.

This segment may be returned on an Accept Response if sent in the Request.

**Semantic Notes:** 1 REF04 contains data relating to the value cited in REF02.

Notes: Enrollment Requests: Conditional. Enrollment Accept Responses: Required

Other Requests/Responses: Not Used.

This segment is sent to describe the measurement types and reporting intervals associated with the service delivery point(s) identified in the NM109 segment. It may be sent on an Enrollment Request when the bill option is Utility Rate Ready consolidated billing and the ESCO wants to associate different rate codes (see REF~RB) with different measurement types and/or reporting intervals. When an Enrollment Request is being accepted, this segment is used by the Utility to describe the type of consumption and reporting interval for each service delivery point(s) identified in the NM109 segment for the account being enrolled.

REF~MT~KHMON REF~MT~TDMON REF~MT~COMBO REF~MT~KH030 REF~MT~KHTOU

**Data Element Summary** 

Ref. Data

<u>Des. Element</u> Name

REF01 128 Reference Identification Qualifier

Attributes
M ID 2/3

April 30May 31, 20198

MT Meter Ticket Number

Meter type.

Used to identify the type of consumption measured by a meter and the interval between measurements or the type of consumption and reporting interval applicable to the un-metered service delivery points on the account.

#### Must Use REF02 127 **Reference Identification**

The type and reporting interval for consumption measurements are described in a five-character field. The first two characters are used to describe the type of consumption. The last three characters describe the reporting interval.

The literal "COMBO" is sent in the REF02 element of this segment when the service delivery point(s) identified in the NM109 are capable of providing different measurement types AND/OR measurements for more than one time period in a day.

When the REF~MT contains "COMBO" multiple REF~TU segments may be necessary to describe the types of consumption being measured for the service delivery point(s) identified in the NM109 element. A REF~TU segment must also be sent, even when there is only one type of consumption being measured, when multiple time periods are being measured during a day.

When only one measurement type is applicable to the metered or un-metered service points identified in the NM1 segment, the REF02 in this segment should contain one of the following codes as the first two characters to describe the type of consumption:

K1 Kilowatt Demand (kW)

K2 Kilovolt Amperes Reactive Demand (kVAR)

K3 Kilovolt Amperes Reactive Hour (kVARH)

K4 Kilovolt Amperes (kVA)

K5 Kilovolt Amperes Reactive (kVAR)

KH Kilowatt Hour (kWh)

HH Hundred Cubic Feet (CCF)

TZ Thousand Cubic Feet (MCF)

TD Therms

The following codes are sent as the last three characters of the REF02 element to document the interval capabilities of the metered or un-metered service delivery point(s) identified in the NM1 segment. If that capability is not known then the interval that should be reported is the scheduled meter reading interval.

BIM Bi-Monthly DAY Daily MON Monthly **QTR** Quarterly TOU Time of Use

001-999 - Reporting Intervals. (015 indicates 15 minute intervals, 060 indicates 60 minute intervals, etc.)

If either C04003 or C04004 is present, then the other is required.

If either C04005 or C04006 is present, then the other is required.

**Semantic Notes:** 1 REF04 contains data relating to the value cited in REF02.

Notes: Enrollment Accept Responses: Conditional Other Requests/Responses: Not Used

This segment is NOT applicable to gas enrollments but may be applicable to an electric enrollment when usage for the electric account being enrolled is measured for multiple consumption types and/or multiple periods in a day.

A REF~TU segment must be sent to describe the types of consumption being measured for the service delivery point(s) identified in the NM109 element, when the REF~MT segment contains "COMBO" OR when multiple consumption periods are being measured during a day (e.g. on peak, off peak, etc.).
