**RE: Mad River Wind Farm Impact Assessment Study Tug Hill Region of New York State – Prepared by State University of New York College of Environmental Science and Forestry April 2018. (White Paper)**

Dear Secretary Burgess:

Please accept the attached “white paper” report, referenced in our comments on the Mad River Wind Farm Public Scoping Statement. This report was recently made available to us, and we are submitting it now because we feel it is important information to support our comments.

The white paper was prepared by the New York College of Environmental Science and Forestry which outlines potential impacts from the wind energy facility proposed along the Mad River in southern Jefferson and northern Oswego counties.

Thank you for your attention to this matter.

Sincerely,

Linda M. Garrett  
Executive Director
