

## ITWG Afternoon Session Outline

9/27/17

- **Energy Storage (ES)**
  - Overall Approach – Aggregating Nameplate Technical History in NY and Future Applicability to Solar + Storage
    - Solar and Storage Industry Presentation
    - DPS Update/Next Steps
  - Understanding the Role of Use Cases - Analysis and Exploration of Their Reduction to Few Study Components and Rules
    - Solar and Storage Industry Presentation
  - Solutions for Controlling System Export, Functionality & Operations
    - JU Presentation
    - Solar and Storage Industry Presentation
  - Solutions for Studying Systems as Load
  - Technical Requirements/Operating Guidelines Discussion
    - Defining Ramp Rates
    - Fit with Existing SIR Screens
    - Defining Application Requirements
- **SIR Updates/Changes**
  - Timing of next SIR update
  - Inclusion of what aspects of the above Energy Storage approach and Requirements/Guidelines are needed in the SIR update
  - Updated Technical SIR Screens
    - SIR Screens in Technical Guidance document?
  - NEM / VDER in SIR
  - Other modifications / updates to the SIR
