

Electronic Data Exchange Standards for Energy Deregulation in New York

814 Enrollment Request & Response

~~EDI 814~~ Data Dictionary ~~Request and Response~~

~~May 17, 2006~~ October 23, 2014
Version 2.01

	Summary of Changes
July 20, 2001	Initial Release
August 7, 2002	Version 1.1 Issued
	<p>Added REF*AJ (Utility Account Number for ESCO/Marketer) segment.</p> <p>Renumbered lines and corrected line references as necessary.</p> <p>Corrected use attribute for the N302 element in the N1*8R and N1*BT loops from 'Required' to 'Conditional' per the October 2, 2001 clarification. This element is only sent in an Enrollment Accept Response transaction when the street address exceeds 55 characters.</p> <p>Modified the Comment for the REF*65 (Meter Cycle Code) and REF*BF (Bill Cycle Code) to clarify that these segments are only required on an enrollment accept response. Corrected use attribute for the REF03 element in the REF*65 (Meter Cycle Code) and REF*BF (Bill Cycle Code) from 'Optional' to 'Conditional' per the October 2, 2001 clarification.</p> <p>Corrected use attribute for the REF03 element in the REF*TU (Use Time of Day) segment from 'Conditional' to 'Required' per the October 2, 2001 clarification.</p> <p>Corrected use attribute for the N3 and N4 segments in the N1*BT (Mailing Address) segment from 'Required' to 'Conditional'. Mailing address information is only sent in an Enrollment Accept Response when the E/M is the bill presenter AND the customers mailing address differs from service address.</p> <p>Corrected the Comment for the REF03 element in the REF*1P (Response Information or Warnings) segment to refer to details regarding an accept enrollment response.</p> <p>Modified the Comment for the REF*93 (Fee Approved/Fee Applied) segment -to clarify that this segment is applicable to an accept response to a request for consumption history.</p> <p>Modified the Comment for the following segments to clarify that "accept response" pertains to an enrollment request (versus a secondary request for consumption history): REF*BLT, REF*PC, REF*NR, REF*SU, REF*GC, REF*GS, REF*RP, DTM*150, and all segments in the NM1 loop.</p>

November 26, 2002	Version 1.2 Issued
	Added a new AMT segment (AMT*FW) to enable ESCO/Marketers to send fixed charge information when the bill option is Utility Rate Ready consolidated billing.
March 17, 2004	Version 1.3 Issued
	<p>Added code values to the 02 element in the REF*TU segment to enable Orange & Rockland Utilities, Inc. and Consolidated Edison of New York, Inc. (or other utilities at their option) to describe in more detail in an Accept Response transaction, the type of electric usage data ESCOs can expect to receive in either an 867HU or 867MU transaction.</p> <p>Added AMT*9M and AMT*9N to enable ESCOs to transmit customer's tax rate information when the bill option requested is Utility Rate Ready consolidated billing and the Utility requires ESCOs to provide this data in an Enrollment transaction. When different tax rates are applicable to portions of the customers service it will be necessary to send both the AMT*9M (residential tax rate applicable to a portion of the service) and the AMT*9N segment (commercial tax rate applicable) when a REF*RP segment is present in a Request transaction.</p> <p>Corrected coding and notes associated with the REF*GC (Gas Capacity Assignment/Obligation) segment.</p>
May 17, 2006	Version 2.0 Issued
	<p>All references to Niagara Mohawk or NMPC are revised to reflect the distribution utility's new name (National Grid).</p> <p>References to RG&E's use of the Single Retailer Model have been deleted. This model is no longer offered in Rochester's service territory.</p> <p>The BGN06 (Reference Identification in the Beginning Segment) element notes are revised to allow for transmitting the text 'MANUAL' in an Enrollment Accept Response transaction initiated by the utility does not have a corresponding Request transaction, for example, an ESCO Referral Program enrollment.</p> <p>An N106 element is added to the N1*8R (Customer) segment to be used in an Enrollment Accept Response transaction to indicate that the customer enrolled is an ESCO Referral Program participant.</p> <p>A PER segment is added to the N1 (Customer) Loop to enable utilities to transmit the customer's telephone number in an Accept Response transaction when the customer was enrolled with the E/M through participation in a utility sponsored ESCO Referral Program.</p>

	Version 2.0 Continued
	<p>Code 'FNA' (Fee Not Authorized) was deleted from the list of codes in the REF*7G- (Reject Response Reasons) segment. Under the Uniform Business Practices issued August 2, 2004 a utility may no longer impose a charge for providing a customer's consumption history (section 4.2.a.) or a gas profile (section 4.2.b.).</p> <p>The REF*93 (Fee Approved/Fee Applied) segment is deleted as unnecessary. Fees may no longer be assessed for the consumption history or gas profile data described in section 4.2. of the Uniform Business Practices.</p> <p>A REF03 element was added to the REF*12 segment (Utility Account Number) for use on Enrollment Requests sent to or received from Orange & Rockland Utilities when a request pertains to enrolling the un-metered portion of a customer's electric service when both metered and un-metered service are present on the same account.</p> <p>The usage attributes for the REF*PC (Bill Calculator) and REF*BLT (Bill Calculator) are revised. These segments are required in Enrollment Request and Enrollment Accept Response transactions. The segment notes are also revised to clarify the use of these segments in National Fuel's service territory where both Utility Rate Ready consolidated billing and Single Retailer is offered.</p> <p>The notes for codes in the REF02 element of the REF*BLT and REF*PC segments are revised to clarify which codes should be transmitted for the Single Retailer Model (National Fuel Gas only).</p> <p>The REF03 element note for the REF*BLT (Bill Presenter) segment is revised to omit reference to the UBP.</p> <p>A REF*LF (E/M Late Fees) segment was added at the account level to enable E/Ms to communicate in an Enrollment Request transaction whether National Fuel Gas should calculate and assess E/M late fees when the eustomerscustomer's bill option is Utility Rate Ready consolidated billing.</p> <p>The REF*ALC (Human Needs Customer) segment notes are revised to indicate that this segment is required by National Grid only on gas enrollment requests for non-residential customers.</p>

		Version 2.0 Continued
		<p>Two segments were added at the account level to enable E/Ms to communicate to National Fuel Gas in an Enrollment Request transaction a customer's budget plan installment and pre-existing budget plan balance. The AMT*BD (E/M Budget Plan Balance) and AMT*B5 (E/M Budget Plan Installment Amount) are sent when a REF*NR (Current Budget Billing Status) segment is present in a Request transaction and the bill option for the customer being enrolled is Utility Rate Ready consolidated billing.</p> <p>The AMT*RJ (Commodity Price), AMT*FW (E/M Fixed Charge) and REF*RB (ESCO Rate Code) segment notes are revised to accommodate Enrollment Accept Response transactions for ESCO Referral Program enrollments initiated by the utility. AMT*RJ and AMT*FW may contain zeros or dummy codes in these Response transactions because the utility may be unable to provide the discounted commodity price for the customer enrolled at the time the Accept Response transaction is sent.</p> <p>The usage attribute for the REF*RB segment in an Enrollment Accept Response transaction is changed from 'Not Used' to 'Conditional'; National Grid may send this segment in an Accept Response transaction for ESCO Referral Program enrollments to provide the E/M with the rate code applicable to Referral Program participants.</p> <p>The element note for the NM109 element is revised to add a reference pertaining to the handling of un-metered service on an electric account in Orange & Rockland's service territory.</p> <p>All line references in the Comments column are updated.</p>

October 23, 2014		Version 2.1
		<p><u>Utility specific notes are generalized, as appropriate, and designated for relocation to/reference within Utility Maintained EDI Guides, as necessary.</u></p> <p><u>Replaced references to Marketer and E/M with ESCO.</u></p> <p><u>Adding these new segments from Case - 12-M-0476:</u></p> <p><u>REF*IJ (Industrial Classification Code).</u></p>

	<u>REF*TX (Utility Tax Exempt Status).</u> <u>REF*TDT (Account Settlement Indicator).</u> <u>REF*YP (NYPA Discount Indicator).</u> <u>REF*SG (Utility Discount)</u> <u>DTM*AB4 (ICAP Effective Dates)</u> <u>Adding AMT03 field to the AMT*KZ segment to accommodate the</u> <u>ICAP Special Program Indicator Code.</u>
--	--

Row No	NY DD Field Name	Loop ID	Segment	Level	Position	Ref Desc	Name	Description	Code	Data Type	Request	Response	Comments
1	Transaction Set Header	None	ST	HDR	010	01	Transaction Set Identifier Code	Indicates Type of transaction	814	ID(3/3)	Required	Required	
2	Transaction Set Header	None	ST	HDR	010	02	Transaction Set Control Number	Number generated by senders system	ID#	AN(4/9)	Required	Required	
3	Beginning Segment	None	BGN	HDR	020	01	Transaction Set Purpose Code	Purpose of transaction	Request =13 Response =11	ID(2/2)	Required	Required	
4	Beginning Segment	None	BGN	HDR	020	02	Reference Identification	Unique and permanent ID for this transaction	ID#	AN(1/30)	Required	Required	
5	Beginning Segment	None	BGN	HDR	020	03	Date	Date transaction was created in senders system	CCYYMMDD	DT(8/8)	Required	Required	
6	Beginning Segment	None	BGN	HDR	020	06	Reference Identification	When BGN01=11, this element is the BGN02 from the original Request transaction or the text 'MANUAL' when a Response transaction does not have a corresponding Request transaction, for example in ESCO Referral Program enrollments.	ID# or MANUAL	AN(1/30)	Not Used	Required	When a Request transaction is sent by the E/MESCO the corresponding utility Response transaction should contain the BGN02 id from the Request transaction to enable the recipient to cross reference the response with the request transaction. This is particularly helpful when the Request transaction contains multiple requests in the LIN loop and the utility sends multiple responses in separate 814 Response transactions. When an Enrollment Accept Response transaction is initiated by the utility and there is no corresponding Request transaction, for example, in an ESCO Referral Program enrollment, the BGN06 element will contain the text 'MANUAL'.
7	Name (ESCO/Marker)	NI Loop	N1	HDR	040	01	Entity Identifier Code	Code identifying the E/MESCO in this transaction	SJ	ID(2/3)	Required	Required	
8	Name (ESCO/Marker)	NI Loop	N1	HDR	040	02	Name	literal name of the E/MESCO	free form text	AN(1/60)	Optional	Optional	E/MESCO name is not necessary but may be provided by mutual agreement of the trading partners.

2322	Administrative Communications Contact (Customer Phone Number)	N1 Loop	PER	HDR	080	01	Contact Function Code	Code indicating that PER02 and Per03 contain contact information.	IC	ID 2/2	Not Used	Conditional	This segment will be sent by Central Hudson in an Enrollment Accept Response transaction to provide the telephone number for the customer enrolled by Central Hudson in an ESCO Referral Program. This segment may be sent by other utilities at their discretion.
2423	Administrative Communications Contact (Customer Phone Number)	N1 Loop	PER	HDR	080	02	Communication Number Qualifier	Code indicating the information in PER03 is a telephone contact.	TE				
2524	Administrative Communications Contact (Customer Phone Number)	N1 Loop	PER	HDR	080	03	Communication Number	Customer's phone number.	Phone number in the format xxxyyyzzzz or NOT AVAIL				Where there is no telephone number of record this element will contain the text 'NOT AVAIL'.
2625	Name (Name for Mailing)	N1 Loop	N1	HDR	040	01	Entity Identifier Code	Code identifying that REF02 contains the name associated with the mailing address on the account.	BT	ID(2/3)	Not Used	Conditional	When an enrollment request is accepted, the customer's mailing address must be returned on the response when the E/AMESCO is the bill presenter and the mailing address is different than the service address. The address information in the N3/N4 segments must be accompanied by "name" information in an N1 segment to comply with X12 requirements. If both service and mailing address are being returned in a Response transaction, two N1 segments must be sent. See examples.
2726	Address Information (Mailing Address)	N1 Loop	N1	HDR	040	02	Name	Name associated with the mailing address	Text or the literal "NAME"	AN(1/60)	Not Used	Required	When mailing address is being returned, this element is required. See Comment on Line 26.
2827	Address Information (Mailing Address)	N1 Loop	N3	HDR	060	01	Address Information	Mailing Address - Street	Text	AN(1/55)	Not Used	Conditional	When mailing address is being returned, the N3 segment is required. See Comment on Line 26.
2928	Address Information (Mailing Address)	N1 Loop	N3	HDR	060	02	Address Information	If N301 exceeds 55 characters, the overflow is sent in N302	Text	AN(1/55)	Not Used	Conditional	When mailing address is being returned, this element is only used for the overflow when the street address exceeds 55 characters. See Comment on Line 26.
3029	Geographic Location (Mailing Address)	N1 Loop	N4	HDR	070	01	City Name	Mailing Address - City	Text	AN(2/30)	Not Used	Conditional	When mailing address is being returned, the N4 segment is required. See Comment on Line 26.
3130	Geographic Location (Mailing Address)	N1 Loop	N4	HDR	070	02	State or Province Code	Mailing Address - State/Province	Text	ID(2/2)	Not Used	Required	When mailing address is being returned, this element is required. See Comment on Line 26.

Row No	NY DD Field Name	Loop ID	Segment	Level	Position	Ref Desc	Name	Description	Code	Data Type	Request	Response	Comments
3231	Geographic Location (Mailing Address)	NI Loop	N4	HDR	070	03	Postal Code	Mailing Address- zipcode	Text	ID(3/15)	Not Used	Required	When mailing address is being returned, this element is required. See Comment on Line 26.
3332	Geographic Location (Mailing Address)	NI Loop	N4	HDR	070	04	Country Code	Mailing Address- Country Code	Text	ID(2/3)	Not Used	Conditional	See Comment on Line 26. This element is not used for domestic mailing addresses.
3433	Item Identification	LIN Loop	LIN	DTL	010	01	Assigned Identification	Unique identifier assigned to this LIN request	Unique ID for each LIN request generated by the sender	AN(1/20)	Required	Required	This identifier by itself, or in conjunction with the BGN 02 identifier on a request must uniquely identify each LIN request item over time. The LIN01 identifier in the request must be returned in the LIN01 in the response to that request. See examples.
3534	Item Identification	LIN Loop	LIN	DTL	010	02	Product/Service ID Qualifier	Indicates a service is being requested	SH	ID(2/2)	Required	Required	
3635	Item Identification	LIN Loop	LIN	DTL	010	03	Product/Service ID	Commodity Type	EL or GAS	AN(1/48)	Required	Required	Only one commodity type per 814 transaction (either request or response).
3736	Item Identification	LIN Loop	LIN	DTL	010	04	Product/Service ID Qualifier	Indicates a service is being requested	SH	ID(2/2)	Required	Required	
3837	Item Identification	LIN Loop	LIN	DTL	010	05	Product/Service ID	Type of Request	CE=Enrollment GP=Gas Profile HU=Historic Usage	AN(1/48)	At least one on every request	At least one on every response	CE is the primary request; all others are secondary requests. If the primary request is rejected the secondary request will also be rejected. The request for history (EITHER HU OR GP) is the only secondary request. GP requests are only supported by Keyspan and Con Edison utilities that provide gas profiles.
3938	Action or Status Indicator	LIN Loop	ASI	DTL	020	01	Action Code	Indicator of the action or status of the LIN request	7=Request AC=Acknowledge U=Reject WQ=Accept	ID(1/2)	Required	Required	ASI01 must be "7" for all requests. AC, U, WQ codes are used for responses. A REF1P (see line 65) may be used to provide additional clarification when "AC" is used on the response.
4039	Action or Status Indicator	LIN Loop	ASI	DTL	020	02	Maintenance Type Code	Used to differentiate between inquiries and other actions.	021=CE 029=GP or HU	ID(3/3)	Required	Required	
4140	Reference Identification (Reject Response Reasons)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that REF02 contains a reason for rejecting the LIN request.	7G	ID(2/3)	Not Used	Conditional	This segment is required on reject responses. Not all reject codes pertain to all LIN requests. The response may contain more than one reject reason per LIN request.
4241	Reference Identification (Reject Response Reasons)	LIN Loop	REF	DTL	030	02	Reference Identification		refer to codes listed in 814e IG	AN(1/30)	Not Used	Required	When a REF*7G is being sent this element is required. A13 should only be used infrequently, i.e. when none of the other codes are sufficient.

Row No	NY DD Field Name	Loop ID	Segment	Level	Position	Ref Desc	Name	Description	Code	Data Type	Request	Response	Comments
4342	Reference Identification (Reject Response Reasons)	LIN Loop	REF	DTL	030	03	Description	Used to qualify an A13 or other codes sent in REF02	text	AN(1/80)	Not Used	Conditional	When REF02=A13, this element must be sent to clarify the reject reason. REF03 may also be used to provide further clarification of the reject reason when REF02 contains other codes.
4443	Reference Identification (Response Information or Warnings)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that REF02 contains information associated with an accepted LIN request.	1P	ID(2/3)	Not Used	Optional	This segment may be sent to assist in clarifying an Accept Response.
4544	Reference Identification (Response Information or Warnings)	LIN Loop	REF	DTL	030	02	Reference Identification		A13, API, FRB, HUL , 101, 102	AN(1/30)	Not Used	Optional	
4645	Reference Identification (Response Information or Warnings)	LIN Loop	REF	DTL	030	03	Description	Used to qualify an A13 in REF02	text	AN(1/80)	Not Used	Conditional	This element must be sent when REF02 in this segment = A13 or API to clarify the details of the accept response. When REF02 contains FRB, 101 or 102, a REF03 may be sent to provide further clarification.
4746	Reference Identification (E/MESCO Customer Account Number)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that the REF02 element contains the E/MESCO assigned account number for the customer	11	ID(2/3)	Conditional	Optional	Required on a request for enrollment when the Utility will be the bill presenter. May be returned on an Accept Response at the discretion of the parties.
4847	Reference Identification (E/MESCO Customer Account Number)	LIN Loop	REF	DTL	030	02	Reference Identification	Customer's account number	Account #	AN(1/30)	Required	Optional	When a REF*11 is sent, this element is required. See Comment on Line 47.
4948	Reference Identification (Utility Account Number)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that the REF02 element contains the Utility assigned account account number for the customer	12	ID(2/3)	Required	Required	The customer's utility number is used for validation and must be present in all transactions.
5049	Reference Identification (Utility Account Number)	LIN Loop	REF	DTL	030	02	Reference Identification	Customer's account number	Account #	AN(1/30)	Required	Required	When a REF*12 is sent, this element is required.
51	Reference Identification (Utility Account Number)	LIN Loop	REF	DTL	030	03	Description	Un-metered service designator (electric accounts only)	U	AN(1/80)	Conditional	Conditional	This element is only sent in Requests to, or provided in Responses from, O&R when the E/M is enrolling only the un-metered service on an electric account that includes both metered and un-metered service. When the Request pertains to all service on an electric account this element is not used. The O&R Response

													transaction will contain this element if present in the Request transaction.

106	Metered or Unmetered Service Point	NM1-Loop	NM1	DTL	080	01	Entity Identifier Code	Code indicating that this NM1-loop contains delivery point or meter related information.	MQ	ID(2/3)	Conditional	Conditional	An NM1-Loop is required in a Request transaction when the bill option is Utility Rate Ready consolidated billing and the E/M will communicate pricing information by sending a rate code rather than using the REF~RJ or REF~FW segments in the header. Where there are multiple service points on an account but the same rate code will not apply to each service point, then a separate NM1-Loop must be sent for each service point. When the same rate code applies to all service points on an account a single NM1-Loop may be sent where the NM109 would be populated with, for example, 'ALL'. In a Request transaction, the NM1-Loop may contain only the NM1~MQ and REF~RB segments. In an Enrollment Accept Response transaction, additional segments may be sent to describe in more detail the type of consumption for each service point.
107	Metered or Unmetered Service Points	NM1-Loop	NM1	DTL	080	02	Entity Type Qualifier	Required by X12	3	ID(1/1)	Required	Required	When an NM1~MQ segment is being sent, this element is required.
108	Metered or Unmetered Service Points	NM1-Loop	NM1	DTL	080	08	Identification Code Qualifier	Use 32 to indicate that NM109 contains a meter number. Use 93 to indicate that NM109 is not a meter number.	32 or 93	ID(1/2)	Required	Required	When an NM1~MQ segment is being sent, this element is required.
109	Metered or Unmetered Service Points	NM1-Loop	NM1	DTL	080	09	Identification Code	-	meter # or text ("ALL", or "UNMETERED")	AN(2/80)	Required	Required	When an NM1~MQ segment is being sent, this element is required. When NM108 = 32, NM109 must contain a meter number. When NM108 = 93, NM109 must contain either the literal "UNMETERED" for all unmetered service on the account OR the literal "ALL" for all service delivery points on the account. (See the Comments on Line 51 for the treatment of unmetered service on an electric account in Orange & Rockland's service territory.)
110	Reference Identification (Utility Rate Service Class)	NM1-Loop	REF	DTL	130	01	Reference Identification Qualifier	Code indicating that REF02 contains the utility rate class for the customer being enrolled.	NH	ID(2/3)	Not-Used	Conditional	This segment must be present in an Enrollment Accept Response. For NFG the payment processing option for utility consolidated billing may be either POR or Pay-As-You-Get Paid

													and may be determined by reference to the service class data provided in an Accept Enrollment Response transaction.
Row No	NY-DD Field Name	Loop ID	Segment	Level	Position	Ref Desc	Name	Description	Code	Data Type	Request	Response	Comments
111	Reference Identification (Utility Rate Service Class)	NM1-Loop	REF	DTL	130	02	Reference Identification	-	Text	AN(1/30)	Not-Used	Required	When a REF*NH segment is being sent, this element is required. See Comment on Line 110.
112	Reference Identification (Rate Sub Class)	NM1-Loop	REF	DTL	130	01	Reference Identification Qualifier	Code indicating that REF02 contains the utility rate subclass for the customer being enrolled.	PR	ID(2/3)	Not-Used	Conditional	This segment must be present in an Enrollment Accept Response when a rate subclass exists for the account being enrolled.
113	Reference Identification (Rate Sub Class)	NM1-Loop	REF	DTL	130	02	Reference Identification	-	Text	AN(1/30)	Not-Used	Required	When a REF*PR segment is being sent, this element is required. See Comment on Line 112.
114	Reference Identification (Utility Load Profile Group Code)	NM1-Loop	REF	DTL	130	01	Reference Identification Qualifier	Code indicating that REF02 contains the a utility assigned load profile code for the account being enrolled.	LO	ID(2/3)	Not-Used	Conditional	This segment must be present in an Enrollment Accept Response when the service is Electric. Load profile codes can be used to look up the load profile associated with the account being enrolled from data posted on the Utility's web site.
115	Reference Identification (Utility Load Profile Group Code)	NM1-Loop	REF	DTL	130	02	Reference Identification	-	Text	AN(1/30)	Not-Used	Required	When a REF*LO segment is being sent, this element is required. See Comment on Line 114.
116	Reference Identification (Measurement Type and Reporting Period)	NM1-Loop	REF	DTL	130	01	Reference Identification Qualifier	Code indicating that REF02 will identify the type of consumption measured by a meter or unmetered service points and the interval between measurements.	MT	ID(2/3)	Not-Used	Conditional	This segment must be present in an Enrollment Accept Response transaction to describe the measurement units applicable to each service point on the account being enrolled.
117	Reference Identification (Measurement Type and Reporting Period)	NM1-Loop	REF	DTL	130	02	Reference Identification		refer to codes listed in 814e IG	AN(1/30)	Not-Used	Required	When a REF*MT segment is being sent, this element is required. Use "COMBO" when a meter is capable of measuring more than one type of consumption OR consumption will be reported for more than one interval in a reporting period, such as a time of use meter. For all other meters, this element should contain a code in the first two fields that indicates the type of consumption and a second code in the last three fields that indicates the intervals that are measured. There should be no more than 5 characters in this element. When "COMBO" is sent in the REF*MT segment, the type of

													measurement and/or reporting intervals for a period for that service point must be described in a REF* TU segment.
Row No	NY-DD Field Name	Loop ID	Segment	Level	Position	Ref Desc	Name	Description	Code	Data Type	Request	Response	Comments
118	Reference Identification (Use Time-of Day)	NM1-Loop	REF	DTL	130	01	Reference Identification Qualifier	Code indicating that REF02 will qualify the usage data to be sent on this meter in the 867.	TU	ID(2/3)	Not-Used	Conditional	This segment must be present in an Accept Response when the commodity type is electric and the REF*MT=COMBO. This segment is used to indicate that a measurement period for a service point is further disaggregated into time-of-day periods such as on-peak, off-peak, etc. This segment is also used to describe measurement types when multiple measurement types will be reported on 867 for a single service end-point such as a meter that is capable of measuring both demand and kilowatt hours.
119	Reference Identification (Use Time-of Day)	NM1-Loop	REF	DTL	130	02	Reference Identification Qualifier	-	41, 42, 43, 45, 49, 50, 51, 57, 58, 73, 74, 75, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, or 94	AN(1/30)	Not-Used	Required	When a REF* TU segment is being sent, this element is required. See Comment on Line 118.
120	Reference Identification (Use Time-of Day)	NM1-Loop	REF	DTL	130	03	Description	Use this element to describe a meter's capabilities when the MT segment is "COMBO" in the 02 element. Use the codes to describe the meter's capabilities in the 03 element of the TU segment.	Type: K1, K2, K3, K4, K5, or KH Interval: BIM, DAY, MON, QTR, or 001-999 for minutes.	AN(1/80)	Not-Used	Required	This element is required in a REF* TU segment to associate the time of day interval in the REF02 element with the unit of measurement.
121	Reference Identification (ESCO Rate Code)	NM1-Loop	REF	DTL	130	01	Reference Identification Qualifier	Code indicating that REF02 will contain the E/M rate code associated with the service point(s) identified in the NM1 segment.	RB	ID(2/3)	Conditional	Conditional	Required in an Enrollment Request when the bill option is Utility rate ready consolidated billing and the E/M charges will be calculated based on rate codes instead of commodity prices. Required in an Enrollment Accept Response when present on the Request. If this segment is required and is not sent, the enrollment request will be rejected. When an Enrollment Accept Response transaction, initiated by National Grid, does not have a corresponding Request transaction, this segment in an Accept Response transaction may contain a rate code specified by National Grid in its BSA.
122	Reference	NM1	REF	DTL	130	02	Reference	-	text	AN(1/30)	Required	Required	When a REF* RB segment is being

	Identification (ESCO Rate Code)	Loop					Identification Qualifier						sent, this element is required. See Comment on Line 121.
