

**Utility Rate Ready Model – Assistance Program Participant Credit (“APP Credit”)**

**Options:**

1. ESCO provides APP Credit to Utility via limited implementation of 810 UBR Transactions.
  - a. The utility would have to support an Inbound 810 Transaction.
2. ESCO provides APP Credit to Utility via web page/portal on a per customer basis.
3. The utility could calculate the APP Credit for the ESCO.
  - a. The ESCO would have to notify the utility which customers and applicable timeframe.
4. Use of 814 C / 810 URR Transactions.
  - ESCO sends 814 Change with new segment AMT\*7 (Assistance Program Participation Credit) and Reason for Change AMT7.
    - Example: AMT\*7\*2.15 indicates that the utility needs to provide a credit of \$2.15.
  - Utility applies the credit to the next customer's bill and notes the amount in the 810 Rate Ready with SAC04 = CRE030.
    - Example: SAC~C~~EU~CRE030~215~~2.15~EA~1~~~~Assistance Program Participation Credit
  - In the event that the 814 Change is not sent in time (i.e., the customer is inactive with that ESCO or the 814 is not received in time to place the charge on the last bill), the Utility would send the 814 Change Reject Response with new code 008 - Account Inactive or Pending Inactive. The ESCO would be responsible for reimbursing the customer directly.

**Under each of the above scenarios, are there new transactions that would support ESCO APP Credit calculations?**

 Option 4 – 814 Change Transaction Modifications

**Segment:** **AMT** Monetary Amount (Assistance Program Participation Credit)  
**Position:** 060  
**Loop:** LIN Optional (Must Use)  
**Level:** Detail  
**Usage:** Optional (Dependent)  
**Max Use:** 1  
**Purpose:** To indicate the total monetary amount  
**Syntax Notes:**  
**Semantic Notes:**  
**Notes:**

ESCO Request: Conditional  
 Utility Request: Not Used  
 Responses: Not Used

The Order Granting and Denying Petitions for rehearing in Part (issued and effective 2/6/2015) states, “ESCOs have no obligation to serve any customer, however, when an ESCO serves an Assistance Program Participant, the ESCO must satisfy at least one of two conditions. The ESCO must guarantee that the customer will pay no more, on an annual basis, than the customer would have paid as a full service customer of the utility, or the ESCO must provide Assistance Program Participants with energy-related value-added products or services.”

This segment must be sent by the ESCO when a credit is necessary to be included on a Rate Ready Consolidated customer bill. This segment would only be sent when the ESCO has charged the customer more than what the utility would have and the ESCO is required to provide a credit to the customer.

The utility will use this segment to apply a one-time credit to the customer’s bill. This credit will be reflected in the 810 that is sent to the ESCO for the period where the credit was applied.

The 814 Change must be sent to the utility at least 4 business days prior to the scheduled meter read date in order to be included in the rate ready calculation for that bill period. In the event the 814 Change is not sent in time, and the customer is inactive or pending inactive for that ESCO, the Utility will reject the 814 Change and the ESCO is responsible for directly reimbursing the customer.

AMT~7~2.15
