## MANAGEMENT SUMMARY

SHPO Project Review Number: 15PR02730

Involved State and Federal Agencies: New York State Department of Public Service (DPS), New York State Department of Environmental Conservation (NYSDEC), New York State Office of Parks, Recreation and Historic Preservation (NYSOPRHP), (Article 10 of the Public Service Law)  
NYSOPRHP (Section 14.09 of the New York State Parks, Recreation and Historic Preservation Law)  
United States Army Corps of Engineers (USACE) (Section 106 of the National Historic Preservation Act)

Phase of Survey: Cultural Resources Mitigation Plan

Location Information: Towns of Arkwright, Charlotte, Cherry Creek, and Stockton  
Chautauqua County

Report Authors: Grant Johnson; Patrick Heaton, RPA

Date of Report: March 2017

## **1.0 INTRODUCTION**

### **1.1 Summary of Cultural Resources Surveys**

On behalf of Cassadaga Wind, LLC, Environmental Design & Research, Landscape Architecture, Engineering, & Environmental Services, D.P.C. (EDR) prepared cultural resources surveys for the proposed Cassadaga Wind Project (or the Project), located in the Towns of Charlotte, Cherry Creek, Arkwright and Stockton, Chautauqua County, New York. The cultural resources surveys were prepared as part of review of the Project under Article 10 (Certification of Major Electrical Generating Facilities) of the New York State Public Service Law.

The information and recommendations included in this report are intended to assist the New York State Department of Public Service (NYSDPS), the New York State Office of Parks, Recreation and Historic Preservation (NYSOPRHP), the U.S. Army Corps of Engineers (USACE), and other New York state and/or federal agencies in their review of the Project under Article 10 of the New York State Public Service Law, Section 14.09 of the New York State Parks, Recreation, and Historic Preservation Law, and/or Section 106 of the National Historic Preservation Act, as applicable.

All cultural resources studies undertaken by EDR in association with the Project have been conducted by professionals who satisfy the qualifications criteria per the Secretary of the Interior's Standards for Historic Preservation (36 CFR 61). The historic architectural resources survey (EDR, 2016a) and the Phase 1B archaeological survey report (EDR, 2016b) were prepared in accordance with the *New York State Historic Preservation Office Guidelines for Wind Farm Development Cultural Resources Survey Work* (the *SHPO Wind Guidelines*; NYSOPRHP, 2006) and applicable portions of NYSOPRHP's *Phase 1 Archeological Report Format Requirements* (NYSOPRHP, 2005).

### **1.2 NYSOPRHP Consultation**

EDR previously prepared a historic architectural resources survey report for the Cassadaga Wind Project (EDR, 2016a). In review correspondence dated June 15, 2016, the New York State Office of Parks, Recreation and Historic Preservation (NYSOPRHP)/State Historic Preservation Office (SHPO) (Bonafide, 2016), the NYSOPRHP/SHPO indicated that mitigation would be necessary to offset potential visual impacts to historic properties. The June 15, 2016 correspondence also indicated NYSOPRHP/SHPO concurrence with the recommendations of the Phase 1B archaeological survey report. No further mitigation was proposed or requested related to archaeological resources; therefore, all mitigation projects discussed herein are related to historic architectural resources only.

Mitigation options (relative to historic properties) for wind projects are limited, given the nature of the Facility and its siting criteria (very tall structures generally located at the highest locally available elevations). Thus, for previous wind energy projects in New York, the NYSOPRHP has approved mitigation plans for impacts to historic properties

consisting of “off-set” projects that provide benefits to the overall community’s cultural resources and/or historic properties and/or the public’s appreciation of historic resources. The purpose of these offset mitigation projects is to offset potential visual impacts to historic properties resulting from the introduction of wind turbines and related components into their visual setting.

## 2.0 CULTURAL RESOURCES MITIGATION

### 2.1 Off-set Funding

The total amount of off-set funding for cultural mitigation projects is usually proposed on a per-turbine basis by the Applicant based on consultations with the host community, NYSOPRHP and/or other applicable agencies. In the past, these discussions and the commitments for off-set funding and mitigation projects have been formalized in a Memorandum of Agreement. The per-turbine amount reflects the degree of adverse effect on the historic resources within the APE. Cassadaga Wind is proposing that off-set funding for the Cassadaga Wind Project be up to \$108,000.00 based on the amount of \$2,000.00 per wind turbine. This amount is consistent with cultural resources off-set funding for recent wind projects located in New York State.

### 2.2 Mitigation Projects

Mitigation projects that have been proposed for other wind energy projects in New York State have included activities such as additional historic resources surveys, National Register of Historic Places (NRHP) nominations, monetary contributions to historic property restoration causes, development of heritage tourism promotional materials, development of educational materials and lesson plans, and development of public history materials, such as roadside markers. As part of the Article 10 review process, the Applicant has consulted with local stakeholders to determine what are the most appropriate and realistic projects to undertake within the Towns of Charlotte and Cherry Creek<sup>1</sup>:

#### *Town of Charlotte*

- Valley Historical Society museum: The Valley Historical Society museum is a two-story, former commercial building located at 36 Main Street in the Village of Sinclairville (see Inset 1). It was constructed circa 1845, and has been determined by NYSOPRHP to be eligible for the NRHP. The Valley Historical Society formed in 1977 and has owned the museum building for over two decades, and during that time have invested more than \$40,000 in various repairs and restoration projects to the building. The historical society have also hosted the Sinclairville History Fair since 1998, which celebrates the history of the village and includes a tour of the NRHP-eligible Evergreen Cemetery and other events related to the promotion of local history.

---

<sup>1</sup> The majority of Facility infrastructure is located in these two towns (the Town of Arkwright will host one wind turbine), and therefore, it is believed cultural resources mitigation efforts should be focused there.

**Inset 1. Valley Historical Society museum (constructed circa 1845), 36 Main Street, Village of Sinclairville, NY (EDR, 2015).**

The Valley Historical Society president has indicated that the foundation of the museum building has recently begun to show signs of deterioration, and has obtained an estimate for stabilization totaling \$11,400. The Valley Historical Society also indicated that the museum building will also require a new roof, and painting in the near future, which is estimated to cost up to an additional \$10,000. In addition, the total costs of the annual history fair are estimated to be approximately \$8,000 to \$9,000.

It is proposed that the Applicant will contribute \$30,000 to the Valley Historical Society to fund the stabilization of the museum building foundation, replacement of the roof, painting to the rear wing, and assist with funding of the Sinclairville History Fair for at least one year. If the Valley Historical Society is able to provide a more accurate estimate for the replacement of the roof and painting, it may be necessary to revise the proposed off-set funding total for the Valley Historical Society.

#### *Town of Cherry Creek*

- The Amish Trail: The New York Amish Trail is a major tourist attraction in southwestern New York. Although it is primarily located in Cattaraugus County, approximately 5.5 of its 38 miles pass through the Town and Village of Cherry Creek in Chautauqua County (see Inset 2).

**Inset 2. Map indicating the route of the Amish Trail (indicated by the red line) through the Town and Village of Cherry Creek, as well as the five-mile study area for the Facility (EDR, 2016).**

- The trail exists to highlight the businesses and landscape created by the Old Order Amish families who first began to settle in this corner of the state beginning in the 1950s, having emigrated from Ohio. Improving the signage and promotion of the trail could draw additional visitors and tourism dollars to Cherry Creek and its Amish population. The Amish Trail is administered by the Cattaraugus County Tourism Office.

The director of the Amish Trail has indicated that plans have been made for the construction and installation of informational kiosks along the Amish Trail to provide brochures and other information related to Amish-owned businesses along the trail, as well as information on towns located along the trail. In addition, Amish Trail staff have indicated that Amish contractors could be employed to construct the kiosks, and that Amish-made products (e.g. buggies or carpentry) could be on display as opportunities for photography since photography of the Amish themselves is discouraged.

It is proposed that the Amish Trail receive up to \$40,000.00 to fund the construction of two informational kiosks along the Amish Trail within the Town of Cherry Creek. It is anticipated that further discussion with the administrators of the Amish Trail will lead to more accurate assessments of construction costs for the kiosks, it may be necessary to revise the proposed mitigation funding total for the Amish Trail.

In addition, the proposed Facility is sited within the areas served by the Cassadaga Valley Central and Pine Valley Central School Districts. Funding the development of local history curriculum and/or exhibits/educational materials has been proposed for numerous previous wind energy projects in New York. This type of project may be appealing to NYSOPRHP and local stakeholders because it benefits a larger population as opposed to singular historic properties. The Applicant has reached out to both school districts to determine their interest in developing local history curriculum materials and has not received any response. The Applicant will continue to explore these potential projects but anticipates dedicating off-set funding in the amount of up to \$15,000.00) for these efforts.

Funding of cemetery repairs and stabilization has also been proposed for numerous previous wind energy projects in New York. Establishment of a cemetery stabilization fund for repairs to fences and damaged gravestones, or development of identifying signage for rural cemeteries that are either unmarked or difficult to locate in the Towns of Charlotte and Cherry Creek. Several cemeteries identified in the historic architectural survey conducted by EDR were determined by NYSOPRHP to be NRHP-eligible, including active and inactive cemeteries whose repair and stabilization could help promote the heritage of the Towns of Charlotte and Cherry Creek. Additional conversations with the Towns of Charlotte and Cherry Creek would be necessary to determine the ability of the municipalities to undertake the cemetery stabilization using historically appropriate methods. The Applicant will continue to explore these potential projects and propose that the remainder of cultural mitigation funding (approximately \$23,000.00) be used for fund these potential projects.

## 3.0 SUMMARY

### 3.1 Summary of Proposed Cultural Resources Mitigation

On behalf of Cassadaga Wind, LLC, EDR prepared this summary of potential cultural resources mitigation projects that would be undertaken to offset the Cassadaga Wind Project's impacts on historic properties, which include the following:

- It is proposed that mitigation funding for the Cassadaga Wind Project be fixed in the amount of \$2,000 per wind turbine, for a total of \$108,000 in cultural resources mitigation funding.
- It is proposed that the Valley Historical Society receive up to \$30,000 to fund the stabilization of the museum building foundation, replacement of the roof, painting to the rear wing, and assist with funding of the Sinclarville History Fair for at least one year.
- It is proposed that the Amish Trail receive up to \$40,000 to fund the construction of two informational kiosks along the Amish Trail within the Town of Cherry Creek.
- It is anticipated that the remaining available funds will be used to fund local history curriculum development and/or historic cemetery stabilization projects, as described herein. Any cemetery restoration work conducted using cultural resources mitigation funding would need to be conducted in accordance with the Secretary of the Interior's Standards for Historic Preservation, as applicable.

In addition, the Applicant intends to continue outreach efforts to local school districts regarding the potential for development of local history curriculum and/or exhibits and educational materials for area students. The Applicant will also continue to engage with the Towns within the Facility area to discuss the feasibility of additional mitigation projects such as cemetery stabilization.

Re: Cassadaga Wind Farm/70 Turbines/126 MW  
Towns of Charlotte, Cherry Creek, Arkwright, and Stockton, Chautauqua County  
15PR02730

Dear Mr. Heaton:

Thank you for requesting the comments of the State Historic Preservation Office (SHPO). We have reviewed the project in accordance with Section 106 of the National Historic Preservation Act of 1966. These comments are those of the SHPO and relate only to Historic/Cultural resources. They do not include potential environmental impacts to New York State Parkland that may be involved in or near your project. Such impacts must be considered as part of the environmental review of the project pursuant to the National Environmental Policy Act and/or the State Environmental Quality Review Act (New York Environmental Conservation Law Article 8).

We have completed our review of the information provided in the document titled: Historic Architectural Resources Survey, Cassadaga Wind Project - Towns of Charlotte, Cherry Creek, Arkwright, and Stockton, Chautauqua County, New York.

This documentation identified a total 175 historic resources within the APE. Within this group EDF identified 21 properties as not meeting the National Register criteria. Our office does not concur with 2 of these determinations. We find that numbers 205 and 207 Pine Street in the Ewing Park Historic District (Village of South Dayton) are eligible and contribute to the district.

Our office also determined that 69 properties that were determined National Register eligible by the report do not meet the criteria as applied by this office. Overall, we found that 104 properties identified in this survey were eligible for inclusion in the National Register of Historic Places. A full list of our findings is appended to this letter as Attachment A.

The eligible resources identified in the survey report are diverse in both nature and their physical settings. Properties that will be in the view shed of the project include those in established village/hamlet settings as well as resources that occupy open rural agricultural settings. With few exceptions the scale of the building stock is limited to the height of single and two-story residential, commercial and agricultural buildings with few non-agricultural elements breaking the treetops in this sparsely populated area.

Please also be aware that our office previously provided comments on the archaeological survey aspect of this undertaking. As noted in our letter of April 24, 2016 we concurred with the recommendations outlined in the Phase 1B assessment.

---

**Division for Historic Preservation**

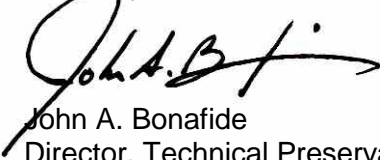

P.O Box 189, Waterford, New York 12188-0189 • (518) 237-8643 • [www.nysparks.com](http://www.nysparks.com)

Although the full extent of potential impacts from the proposed undertaking cannot be fully assessed, the NYSHPO believes that sufficient information does exist to determine that the undertaking will have an Adverse Effect on cultural resources. The introduction of the sleek, ultramodern, approximately 500 foot tall kinetic wind turbines (up to 58 proposed) throughout this scenic landscape forever alters and changes the rural setting, which itself is a significant element in much of the survey area and serves as the backdrop for the architectural, cultural and scenic tourism heritage of these communities. It should also be noted that this project is the latest of several wind generation projects to be constructed in this region and the cumulative effects of adding additional turbines to this area must be considered.

At this point in time we have concluded our preliminary evaluation of eligible resources and the potential impacts to those resources associated with this project. The next step in the Section 106 process is to wait until the involved federal agency initiates a formal consultation process under this statute. Once this process begins we can then finalize our review and provide the involved agency with our recommendations on affects and possible mitigation measures.

If I can be of any further assistance please do not hesitate to contact me at (518) 268-2166 or [john.bonafide@parks.ny.gov](mailto:john.bonafide@parks.ny.gov).

Sincerely,

A handwritten signature in black ink, appearing to read "John A. Bonafide", with a long horizontal flourish extending to the right.

John A. Bonafide  
Director, Technical Preservation Services Bureau  
Agency Preservation Officer
