SYR. AFTERNOON PSH

10 January 2013
Public Service Commission
Three Empire State Plaza
Albany, NY 12223

To the Commissioners,

Find attached 929 signatures of people in the Central New York community that endorse the demands of the Central New York Workers Benefit Council to lower utility rates, enact a moratorium of utility shut offs of those whose income is at or below 250% of the poverty level, create a debt forgiveness program to forgive 100% of the debt of those at or below 250% of the poverty level, and reconnect service to all those whose service was terminated due to economic inability to pay without down payments, penalties or fees.

The members of the Central New York Workers Benefit Council are asking you to consider and respond to these demands as they are consistent with your broad mandate to ensure access to reliable energy services at affordable rates to the rate payers in New York State.

Please address all correspondence to:

CNY Workers Benefit Council
c/o 304 Court St. Apt. 112
Syracuse, NY 13208

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services**."

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services**."

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services**."

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services**."

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services**."

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services**."

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**

PETITION TO THE NEW YORK STATE PUBLIC SERVICE COMMISSION (PSC) : PROTECT RATEPAYERS FROM UTILITY PROFITEERING

The legal mandate of the PSC is "to protect utility consumers from potential abuse of monopoly power" as well as "to protect the rights of New Yorkers while **ensuring** access to reliable and **low-cost utility services.**"

In 2010, National Grid posted profits of $4.99 billion, while it issued 100,000 shut-off notices, and disconnected 10,000 customers. New York residents pay the third highest utility rates in the U.S. From 2000-2010, Syracuse's poverty rate increased from 27.3% to 34%.

The PSC approved a "revenue decoupling mechanism" in 2007, allowing utilities to increase rates in response to falling revenue, and thus guarantee profits -- an abuse of monopoly power.

We, the undersigned, endorse the just demands of the Central New York Workers Benefit Council, calling on the PSC to carry out the following actions consistent with their legal mandate:

1. **Deny National Grid's latest request for a 7% rate hike in natural gas and electric delivery rates.** (12-G-0202 & 12-E-0201)
2. **Implement a year-round moratorium on all utility shutoffs** for those at or below 250% of the federal poverty guideline.
3. **Allow for reconnection and renegotiation of payment plans without penalty, fees or downpayments,** for those whose service has been terminated due to economic inability to pay.
4. **Cancel all utility debts** for those at or below 250% of the federal poverty guideline.
5. **Repeal decoupling.**
