Level:	Detail
Usage:	Optional (Dependent)
Max Use:	1
Purpose:	To specify pertinent dates and times

Notes:	Utility Request: Conditional ESCO Response: Not Used ESCO Request: Conditional Utility Response: Conditional This segment is required on all Utility initiated Requests (except for changes to <u>ICAP Tags</u> , Assigned Service Start or Assigned Service End Date). This segment is also required on the Utility Response to an ESCO Request for a change in customer billing option. <u>When a DTM~007 segment is not sent and the date has not been provided in another DTM segment (DTM~105, DTM~AB2...), it can be presumed that the transaction date is the effective date of the change. In any case, the utility should clarify its use of this segment in its Utility Maintained EDI Guide.</u> This segment is required on ESCO initiated Requests reporting a change in the customer's mailing address when the Single Retailer Model is in effect. This segment may also be sent on ESCO initiated Requests to report a change in ESCO Commodity Price, Fixed Charge or Rate Code when the Utility is the Bill Presenter and Bill Calculator (Rate Ready Consolidated Billing) AND the Utility has agreed to process price or rate changes on a date other than the regularly scheduled bill cycle date. Clarifying Note for discussion:

- During the 11/6/2015 EDI Working Group meeting, use of DMT~007 was seen as not viewed as a necessary requirement for ICAP changes. The proposed solution is to modify the DTM Date/Time Reference (Effective Date of Change) segment to indicate optionality for the Utility sending the 814C. The utility should clarify its use of this segment in its Utility Maintained EDI Guide), particularly concerning the exception items.
