EDI Business/Technical Working Groups
810 Invoice URR Assistance Program Participant Credit Workpaper – 3/13/2015
Option 4 – 810 URR Transaction Modifications

Utility Rate Ready Model
Assistance Program Participant Credit (“APP Credit”) Options

Discussion: Of the options listed below, which approach is the best option, i.e. is it possible to have one standard means for URR utilities to accept APP Credits?

1. ESCO provides APP Credit to Utility via limited implementation of 810 UBR Transactions.
 - a. The utility would have to support an Inbound 810 Transaction.
2. ESCO provides APP Credit to Utility using 814 C / 810 URR Transactions.
3. Utility selection of 810UBR or 814C/810URR as specified in its Utility Maintained EDI Guide.

Implicit in any of the options is the ability of the Utility to utilize a web-based solution on an interim basis.
