Our online calculator compares your supplier's cost of energy to our supply cost to help you make decisions about your energy supply. You can access the calculator if you're a customer of an energy services company (ESCO) other than NYSEG with energy supply charges included on your NYSEG delivery bill. Learn more by visiting nyseg.com, click on "My Account Login," "Energy Use," and then on "Compare Your Supply Costs."

eBill is the easiest way to view your bill when you need it. Wherever summer takes you, your eBill is available online at your convenience. Visit nyseg.com to enroll in our new and improved eBill service.

This month, when you enroll in Autopay, you could win a New York State Park pass. We're giving away seasonal passes to 5 Autopay customers. Enroll by June 10 for your chance to win! Visit nyseg.com to enroll.

The next time we're scheduled to read your meter - as noted on page 1 of this bill - please be sure we have safe and clear access to the meter. Actual readings allow you to better track your energy use, and notice any fluctuations in usage more quickly. Learn more including meter reading options at nyseg.com.

Subtotal Electricity Delivery						\$38.36
Total Electricity Cost						\$38.36
Total Energy Charges						\$38.36

**Terms and Definitions**

**Delivery charge:** what you pay NYSEG to transport energy to your home or business.

**Supply charge:** what you pay for the energy purchased for you by NYSEG or a supplier other than NYSEG.

**Payment & billing services charge:** the cost to produce and send you (electronically or paper) a bill and process payments. Customers who use an energy supplier (also known as an energy services company or ESCO) other than NYSEG will not be assessed this charge by NYSEG if their ESCO's supply charges appear on their NYSEG bill, however, their energy supplier may charge a similar fee.

**Competitive meter charge, Competitive meter service charge, and Competitive meter data service:** apply to customers billed under service classes 2, 3, and 7 whose metering services are provided by NYSEG. These meter services charges, previously included in the customer charge, are now broken out in the electricity section of the bill. Customers with a demand of 50 kilowatts or more for two consecutive months who use a meter service provider and a meter data service provider other than NYSEG are not assessed these charges.

**Basic service charge:** includes a portion of the cost of the meter, meter reading, billing and part of the cost for delivery service. Appears on your bill whether or not you use any electricity or natural gas during the billing period.

**Kilowatt-hours (kwh):** measure of electricity use.

**Residential consumer discount:** monthly payment received from the New York Power Authority (NYPA) to be used for the benefit of residential customers. It is included in the Transition Charge.

**ccf (hundreds of cubic feet):** measure of volume of natural gas used. You are charged based on therms, the energy (heat) content of natural gas.

**Merchant function charge:** reflects the administrative costs of obtaining electricity and natural gas supply. Customers with a supplier other than NYSEG are not charged by NYSEG for this service.

**New York State Assessment:** As required by state law, effective July 1, 2009, utilities must collect a special state assessment from customers for the state's general fund.

**Reliability support services (RSS) charge:** the cost incurred by NYSEG for third-party services to ensure local electric reliability needs are met.

**System Benefits Charge (SBC):** a state mandated charge for all electric and natural gas customers. The SBC is used to fund clean energy activities conducted by NYSERDA and energy efficiency programs administered by NYSEG.

**Revenue Decoupling Mechanism:** a charge or credit on your bill that reflects the difference between forecast and actual delivery service revenues by service classification to encourage the promotion of energy efficiency and renewable technologies.

**Weather adjustment:** moderates natural gas bills during any extreme weather between October 1 and May 31. If temperatures during the billing period are colder than normal, customers typically receive a credit; if temperatures are warmer than normal, customers receive a charge.

**Meter Mult (Meter Multiplier):** when the actual amount of energy you use is more than can be registered on the meter, the meter displays a fraction of your actual use. A multiplier is then applied to determine your actual energy use. When a multiplier is used, it will be shown in the "Meter Mult" box under the "NYSEG Detailed Account Activity" section of your bill.

**Transition charge/surcharge:** reflects the costs of making the electricity and/or natural gas industry more competitive; includes associated credits and/or charges.

**Prorated bills:** calculated by determining your average daily energy cost and multiplying it by the number of days in your billing period. Prorated bills are used only when your billing period is shorter or longer than usual.

**Pay your bill** by mail, at [nyseg.com](http://nyseg.com) or at any of NYSEG's authorized pay agents. If you pay in person, please bring your entire bill.

**Payment is due when you receive your bill.** Your payment must be postmarked by the "Late Fee After" date shown on page 1. If paying in person, payment must be made by the "Late Fee After" date. Payments received after the "Late Fee After" date will be subject to a 1.5% late payment charge per month.
