*Re: Request/or Intervenor Funding/or Case 15-F-0327, Application o/Galloo  
Island Wind LLC for a Certificate of Environmental Compatibility and Public  
Need Pursuant to Article 10 to Construct a Wind Energy Project*

We also have concerns that we would like to raise that involve the visual impacts that may be realized as a result of the Wind Farm Project. The Town and Village have consulted with Saratoga Associates and have retained them to act on behalf of the Town and in tum, the Village, in providing a visual assessment of the overall project and its potential adverse effects.

After reading the proposal there is no mention of a visual impact that needs to be reviewed from the view point of the property owner on Galloo Island or the view from the lighthouse or the easement from the Coast Guard Station all of which are in the Town of Hounsfield.

I believe that the proposal is defective unless the following is added.

The following views need to be added to the visual assessments.

1. A view of the wind farm taken from eye level across the Island from the Lighthouse property
2. A view of the wind farm taken from 65ft in the air or the view from the viewing cupola at the top of the lighthouse tower
3. A view of the wind farm taken from the Coast Guard Station and the approach from the water at Gill Harbor
4. These views to include any and all improvements required by the wind farm or distribution power lines and equipment.

Sincerely, Anthony Dibnah
