October 27,2016

Honorable Audrey Zibelman, Chair
New York Public Service Commission
Agency Building 3, Empire Plaza
Albany, New York 1223-1350

CASE 14-M-0196

Dear Chair Zibelman ,

Stop Smart Meters Woodstock New York and the 1,000 plus people who signed the Electromechanical Analog With No Fee Resolution aka The Peoples Resolution are patiently waiting for the NY Public Service Commission to decide on allowing re-manufactured original equipment electromechanical utility meters as an opt-out choice in New York State by utility customers.

I would like to respectfully remind the Commission that Hialeah Meter Company is a certified GE dealer and re-manufactures electromechanical analog electric meters which are only original equipment and does not use after market products. Accuracy has been carefully calibrated to within 1% surpassing the ANSI C12 Standard used by the Commission in approving electric utility meters for residential use in New York. Hialeah meters maintains traceability to NIST . Hialeah meters are used in California

and meets Type A certification which is an onsite test and the strictest test in the country. Hialeah Meter Company has been in business for 43 years and guarantees their meters.

In addition to Hialeah Meter Company's supply of analog meters Stop Smart Meters Woodstock has suggested that Central Hudson who still has 200,000 analog meters in use, that when removed, could be re-manufactured by Hialeah Meter Company in a mutually agreed arrangement thus supplying the predictably small opt-outs forecast by Industry.

As a designated party, Stop Smart Meters Woodstock NY respectfully petitions the Commission to render it's decision and allow residents of New York who have been suffering with the documented adverse effects of digital meters including the present opt-out choice, which is also a digital meter, to end their personal nightmares and move forward with the approval and installation of re-manufactured analog electric utility meters.

Thank you for your time and consideration

Steve Romine
