Re: Entergy Entities First Set of Information Requests

Question:

Please state the earliest date on which RG&E determined that construction and operation of the GRTA could address the identified reliability need associated with the Ginna retirement.

Response:

RG&E objects to this interrogatory because it requests information that is irrelevant and outside the scope of the current phase of this proceeding (i.e., the interrogatory seeks information that does not “involv[e] the request of RG&E for Commission acceptance of a Reliability Support Services Agreement between RG&E and R.E. Ginna Nuclear Power Plant, LLC, and for approval of the allocation and recovery of the costs of that agreement.”)

Subject to and without waiving these objections, RG&E provides the following response.

RG&E began developing the GRTA through system planning “solutions studies” on or about June 2014.
