Galloo Island Wind LLC. Case No. 15-F-0327

Dear Secretary Burgess and Presiding Examiner Casutto:

In the responses to the Preliminary Scoping Statement prepared by Galloo Island Wind LLC (7-21-2016) there were over forty (40) references to documents in the SEQRA record for the Hounsfield wind project. A.L.J. Caruso asked whether the applicant intended to bring those documents into the record. Mr. Muscato replied that the entirety of the SEQRA record he thought may still be available for public review with the Department (NYSDEC). He further suggested the applicant did not intend to include those documents into the current record.

The Hounsfield SEQRA documents were available to the public on NYSDEC's website until spring 2015, just prior to announcement of a second Galloo Island wind project. Today I checked both the NYSDEC and the Galloo Wind LLC websites and the Hounsfield records are not posted or available on either website.

The fact the Hounsfield SEQRA record was frequently cited in the PSS is testimony to their importance as this proceeding moves forward. The Hounsfield record should be more easily accessed by parties to this process as well as the public.

In order to better inform the parties and the Siting Board I have attached the Hounsfield Findings Statement prepared by NYSDEC on March 3, 2010. I also suggest NYSDEC include the Hounsfield DEIS and FEIS as a part of this record, or to at least make them available once again to the public on the Department's website.

Sincerely yours,

Clifford P. Schneider
