Subject: In the Matter of Eligibility Criteria for Energy Service Companies.

CE1. For each, residential and small C&I customer service class, provide separate comparisons for electric and gas services for each of the below requests. For each month for the years 2014, 2015 and through the end of June 2016:

- a. Provide the number of customers participating in each alternate energy supplier (ESCO) program.
 - b. Provide the aggregate ESCO bills within each supplier program by service type - electric or gas, the aggregate of what the bills would have been, for the same number of customers and consumption, with the default incumbent utility services.
 - c. Provide the aggregate difference between the two aggregate bills utility vs ESCO (an example of this information can be seen in the attached spreadsheet that was previously provided by KEDLI in response to a similar request).
-
