                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 8    Niagara Mohawk Power Corporation d'b'a National Grid IS Capital Investment Cost Incentive For the Rate Years Ending March 31, 2019, March 31, 2020

			Allocation	Allocation to	Full Sanction	_	0% Threshold Assumed Actuals upon	Difference from	Gas Portion to be
Investment Name	INVP	Work Order	Code	NMPC-G	Estimate*		Project Closure*	Sanctioned Amount	Shared
Green Button Connect	4704C	N/A	C113	27%	\$3,072,759	\$2,765,483	S	\$ (572,759) \$	
					\$3,072,759	\$2,765,483	\$2,500,000	(\$572,759)	(\$155,160)
Total Gas CAPEX savings reflected in rent expense	\$ 155,160								
20% of CAPEX savings recorded as a regulatory asset	\$ 31,032								

\*The Company will share in any efficiency savings on capital costs to the extent actual capital costs upon project closure, as reflected in the stanction paper for project closure, are less than the full sanction paper. Por project closure, are less than the full sanction paper containing the actual capital costs is identified as "Closure" in the "Sanction Type" field of the sanction paper. The full sanction paper containing the full sanction paper containing the full sanction estimate for the project is identified as "Sancion" in the "Sanction Type" field on the sanction paper. The full will "Partial" or "Re-Sancion") in the "Sanction Type" field on the sanction paper. To purposes of the Green Button Connect project, the incentive is based on the forecast of capital costs reflected in Niagara Mohawk's revenue requirement.

#### Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239 Deferral of Gas Efficiency Transition Implementation Plan ("ETIP") (\$000's)

#### GAS EXAMPLE 1

		Rate	Gas Year One	Rate	Gas Year Two	Rate	Gas Year Three
1	Actual Expense	\$	10,000	\$	10,200	\$	10,700
2	Rate Allowance	\$	10,549	\$	10,549	\$	10,549
3	Difference	\$	549	\$	349	\$	(151)
4	3 Year Cumulative Actuals	\$	30,900				
5	3 Year Cumulative Rate Allowance	\$	31,648				
6	Difference - underspend / (overspend)	\$	748				
7	Deferral - Due to Customers	\$	748				

#### GAS EXAMPLE 2

0.10		Rate	Gas Year One	Rate	Gas Year Two	Rate	Gas Year Three
1	Actual Expense	\$	10,700	\$	10,350	\$	10,900
2	Rate Allowance	\$	10,549	\$	10,549	\$	10,549
3	Difference	\$	(151)	\$	199	\$	(351)
4	3 Year Cumulative Actuals	\$	31,950				
5	3 Year Cumulative Rate Allowance	\$	31,648				
6	Difference - underspend / (overspend)	\$	(302)				
7	Deferral	\$	-				

The Company will continue to be afforded the flexibility to shift funds within the respective electric and gas ETIP portfolio of programs.

#### Notes (by line number)

- 1 Input Actual Costs
- 2 Per Case No. 15-M-0252; See Joint Proposal Section 13.2.1
- 3 Line 2 less Line 1
- 4 Sum Line 1 for Rate Years 1-3
- 5 Sum Line 2 for Rate Years 1-3
- 6 Line 5 less Line 4
- 7 If cumulative actual costs for Rate Years 1-3 are less than cumulative rate allowances for same period, then Deferral Credit to Customer will be equal to the cumulative amount underspent. If actual costs exceed the cumulative rate allowance for Rate Years 1-3, there will be no Deferral.

# APPENDIX 7

#### **APPENDIX 7: EARNINGS ADJUSTMENT MECHANISMS**

Niagara Mohawk will adopt Earnings Adjustment Mechanisms ("EAMs") as of January 1, 2018 for its electric and gas businesses. The EAMs will be measured on a calendar year ("CY") basis. There are four EAMs for electric, comprised of a total of eight metrics, and one EAM for gas, comprised of one metric. Each EAM metric contains targets that are set at minimum, midpoint, and maximum performance levels. If any of these performance levels are achieved in a calendar year, Niagara Mohawk can earn an annual pre-tax positive revenue adjustment. At the maximum level, Niagara Mohawk has the potential to earn positive revenue adjustments of \$19.49 million in CY 2018, \$22.22 million in CY 2019, and \$23.59 million in CY 2020 for its electric business. With respect to the gas business, Niagara Mohawk has the potential to earn positive revenue adjustments of \$0.80 million in CY 2018, \$0.86 million in CY 2019, and \$0.93 million in CY 2020 at the maximum performance level. The EAMs, targets, and positive revenue adjustments are described in the sections that follow.

# 1.0 ELECTRIC EAMS

#### 1.1 System Efficiency

The System Efficiency EAM is composed of two metrics: Peak Reduction and Distributed Energy Resources ("DER") Utilization.

### 1) Peak Reduction

The Peak Reduction EAM metric incentivizes Niagara Mohawk to reduce its New York Control Area ("NYCA") coincident peak. This metric will be calculated as the sum of:

- a. The weather-normalized demand on Niagara Mohawk's system during the NYCA peak hour, plus
- b. Any amounts actually curtailed from contracted resources enrolled in the New York Independent System Operator's ("NYISO") Installed Capacity Special Case Resource program during the NYCA peak hour.

#### 2) DER Utilization

The DER Utilization EAM metric incentivizes Niagara Mohawk to work with third parties to expand the use of DER resources in the Company's service territory. This metric will measure the sum of the annualized megawatt hours ("MWh") from incremental DER in Niagara Mohawk's service territory, including solar, combined heat and power, standalone storage resources, and fuel cells. The metric will not include demand response, electric vehicles, or heat pumps.

<sup>&</sup>lt;sup>1</sup> Demand response curtailments from Niagara Mohawk customers who are enrolled in the NYISO's Special Case Resource program will be added back to the Company's weather-normalized metered load to be consistent with the NYISO's process to determine installed capacity requirements.

The DER Utilization metric will be calculated as follows:

DER Utilization (MWh) =

Community and Rooftop Solar PV MWh annualized production

- + Combined heat and power ("CHP") MWh annualized production
- + Fuel cell MWh annualized production
- + Battery storage MWh annualized discharge
- + Battery storage MWh annualized charging

Annualized production will be calculated as follows:

Technology	Annualized MWh Calculation
Solar production	= MW installed * 13.4% capacity factor * hours/yr
CHP production	= MW installed * 85% capacity factor * hours/yr
Fuel cell production	= MW installed * 91% capacity factor * hours/yr
Battery Storage discharge (production)	= [Daily battery inverter discharge rating (MWh)] * [365 days per year]
Battery Storage charging (consumption)	[Daily battery inverter discharge rating (MWh)] * [365 days per year] / [83% round trip efficiency]

#### 1.2 Energy Efficiency

The Energy Efficiency EAM is composed of four metrics: Incremental Energy Efficiency, LED Street Light Conversions, Residential Energy Intensity, and Commercial Energy Intensity.

#### 1) Incremental Energy Efficiency

The Incremental Energy Efficiency EAM metric incentivizes Niagara Mohawk to achieve energy efficiency savings above its annual savings target of 263,877 MWh for calendar years 2018-2020, as set forth in the Company's Energy Efficiency Transition Implementation Plan ("ETIP") filed June 1, 2017 in Case 15-M-0252 ("June ETIP"). This metric will be measured as the annual sum of MWh savings from all of Niagara Mohawk's administered energy efficiency programs, including the ETIP² and E-Commerce Platform. As a precondition to earning this incentive, the Estimated Useful Life ("EUL")³ of the Company's ETIP portfolio must be at least 90 percent of its current EUL of 6.7 years. The Company must achieve its current EUL of 6.7

<sup>&</sup>lt;sup>2</sup> ETIP savings will be calculated consistent with the current standard practices described in the Company's June ETIP, with flexibility to commit savings in the sales pipeline.

<sup>&</sup>lt;sup>3</sup> The portfolio EUL will be calculated as the lifecycle MWh divided by the first-year MWh of energy efficiency measures implemented in the ETIP program within a given year.

years to earn the full incentive and will earn a prorated share of the incentive between 90 percent of 100 percent of the current EUL. In the event that the Commission requires changes to the energy efficiency programs contained in the Company's June ETIP, the Company will file a petition within 90 days of Commission approval of the changes to adjust the Incremental Energy Efficiency EAM metric performance levels and EUL threshold, as appropriate.

#### 2) LED Street Light Conversions

The LED Street Light Conversions EAM metric incentivizes Niagara Mohawk to increase the conversion of street lights to LED lighting. This metric will be calculated on the MWh saved as generally established using a percentage of street light conversions each year.

# 3) <u>Residential Energy Intensity</u>

The Residential Energy Intensity EAM metric incentivizes Niagara Mohawk to help reduce residential customers' total usage on a per customer basis. This metric will be measured as the year-over-year percentage change in kilowatt hours ("kWh") per customer for the residential customer class. The kWh per customer will be calculated as the weather-normalized annual kwh usage for the residential customer class divided by the 12-month average number of residential customers, adjusted to exclude the impacts of beneficial electrification such as new load from heat pumps and electric vehicles.

# 4) <u>Commercial Energy Intensity</u>

The Commercial Energy Intensity EAM metric incentivizes Niagara Mohawk to reduce commercial customers' total usage on a per customer basis. This metric will be measured on the year-over-year percentage change in MWh per customer for the commercial customer class. The MWh per customer will be calculated as the weather-normalized annual MWh usage for the commercial customer class divided by the 12-month average number of commercial customers, adjusted to exclude the impacts of beneficial electrification such as new load from heat pumps and electric vehicles.

#### 1.3 Interconnections

The Interconnections EAM is composed of one metric: Developer Satisfaction. The Developer Satisfaction EAM metric incentivizes Niagara Mohawk to improve the Distributed Generation ("DG") interconnection process and increase the satisfaction of developers who seek to interconnect DG projects above 50 kilowatts ("Kw") and up to 5 MW that have begun the DG interconnection process under the Commission's *Standardized Interconnection Requirements* ("SIR"). Targets for this metric will be developed in Case 16-M-0429.

<sup>&</sup>lt;sup>4</sup> For example, if the Company achieves its midpoint target and the EUL of the ETIP portfolio is 6.4 years, or 95 percent of the current EUL of 6.7 years, then the Company will earn 95 percent of the midpoint incentive level.

### 1.4 Environmentally Beneficial Electrification

The Environmentally Beneficial Electrification EAM metric incentivizes the Company to reduce carbon emissions by facilitating the penetration of electric vehicles and heat pumps in Niagara Mohawk's service territory. This metric will be measured as the lifetime metric tons of avoided carbon dioxide from incremental electric vehicles and heat pumps, as more fully described in Attachment A. The electric vehicles metric will measure incremental battery electric vehicles and plug-in hybrid electric vehicles registered in Niagara Mohawk's service territory as compared to those registered in a peer group of other utilities' service territories, as more fully described in Attachment A.<sup>5</sup> Incremental heat pumps will be measured by the number of rebates provided by the Company for air-source and ground source (geothermal) heat pumps.

#### 1.5 EAM Targets and Positive Revenue Adjustments

The annual electric EAM minimum, midpoint, and maximum targets and associated positive revenue adjustments are as follows:

Electric 1	FAMe		Incentive (\$m)			Target	
Metric (Unit)	LAIVIS	2018	2019	2020	2018	2019	2020
	Minimum	\$1.4	\$1.5	\$1.5	6801	6767	6734
Peak Reduction (MW)	Midpoint	\$2.1	\$2.2	\$2.3	6747	6671	6604
	Maximum	\$4.1	\$4.4	\$4.6	6712	6614	6524
DED Will	Minimum	\$0.5	\$0.5	\$0.6	191,416	210,929	238,290
DER Utilization (MWh)	Midpoint	\$1.0	\$1.1	\$1.2	250,104	277,823	322,096
(=== //	Maximum	\$2.1	\$2.2	\$2.3	283,302	314,300	365,079
In anomantal EE	Minimum	\$0.9	\$0.9	\$1.0	278,321	278,321	278,321
Incremental EE (MWh)	Midpoint	\$1.7	\$1.8	\$1.9	312,042	312,042	312,042
	Maximum	\$3.4	\$3.6	\$3.9	355,324	355,324	355,324
LED Street	Minimum	\$0.0	\$0.0	\$0.0	9,124	9,124	9,124
Lighting (MWh)	Midpoint	\$0.9	\$0.9	\$1.0	13,686	13,686	13,686
	Maximum	\$1.7	\$1.8	\$1.9	18,248	18,248	18,248
Energy Intensity	Minimum	\$0.3	\$0.4	\$0.4	0.80%	0.80%	0.80%
- Residential (%	Midpoint	\$1.0	\$1.1	\$1.2	1.00%	1.00%	1.00%
Δ in MWh/customer)	Maximum	\$2.4	\$2.9	\$3.1	1.22%	1.22%	1.22%

<sup>&</sup>lt;sup>5</sup> The peer group is comprised of non-National Grid zip codes in New York and Massachusetts within three standard deviations of Niagara Mohawk's average population and household income.

Energy Intensity	Minimum	\$0.3	\$0.4	\$0.4	0.86%	0.86%	0.86%
- Commercial (% Δ in	Midpoint	\$1.0	\$1.1	\$1.2	1.10%	1.10%	1.10%
MWh/customer)	Maximum	\$2.4	\$2.9	\$3.1	1.34%	1.34%	1.34%
Description	Minimum	\$0.3	\$0.4	\$0.4

CO2)	Maximum	\$1.7	\$2.5	\$2.7	41,546	45,861	52,044
Total Electric EAM Incentive							
	Minimum	\$4.1	\$4.6	\$4.8			
Total	Midpoint	\$9.4	\$10.2	\$10.8			
	Maximum	\$19.5	\$22.2	\$23.6			

#### 2.0 GAS EAMS

#### 2.1 Incremental Energy Efficiency

The Incremental Energy Efficiency EAM incentivizes Niagara Mohawk to achieve energy efficiency savings above its annual savings target of 551,565 Dth for calendar years 2018-2020, as set forth in the Company's June ETIP. This EAM metric will be measured as the annual sum of Dth savings from all of Niagara Mohawk's administered energy efficiency programs, including the ETIP<sup>6</sup> and E-Commerce Platform. In the event that the Commission requires changes to the energy efficiency programs contained in the June ETIP, the Company will file a petition within 90 days of Commission approval of the changes to adjust the Incremental Energy Efficiency EAM performance levels and EUL threshold, as appropriate.

#### 2.2 EAM Targets and Positive Revenue Adjustments

The annual gas EAM minimum, midpoint, and maximum targets and associated positive revenue adjustments are as follows:

<sup>&</sup>lt;sup>6</sup> ETIP savings will be calculated consistent with the current standard practices described in the Company's June ETIP, with flexibility to commit savings in the sales pipeline.

Gas EAM			Incentive (\$m)			Target	
Metric (Unit)		2018	2019	2020	2018	2019	2020
Gas Energy Efficiency (dth)	Minimum	\$0.2	\$0.2	\$0.2	783,718	783,718	783,718
	Midpoint	\$0.4	\$0.4	\$0.5	943,934	943,934	943,934
	Maximum	\$0.8	\$0.9	\$0.9	1,195,900	1,195,900	1,195,900

# 3.0 EAM REPORTING REQUIREMENTS

The Company will file annual EAM reports with the Secretary no later than March 1 of each year setting forth the Company's performance relative to each EAM metric target, savings and benefits achieved, and calculations for incentives earned, including proration of any incentives related to metric achievement between the minimum, midpoint, and the maximum target levels, and explanations for any targets not achieved. The Company will also file with the Secretary quarterly reports no later than sixty days after the end of each calendar quarter to describe the Company's progress toward each EAM's metric target, the actions taken by the Company to achieve target performance, and a forecast of whether the Company expects to meets its annual EAM targets.

The Company will also file with the Secretary a mid-point review of its EAMs not later than March 1, 2019 in these proceedings. In its mid-point review filing, the Company will evaluate capacity factors of solar and combined heat and power, and, if necessary, propose to revise targets and calculations going forward. Any proposed revisions to targets are subject to Commission approval.

#### 4.0 RECOVERY OF EAM POSITIVE REVENUE ADJUSTMENTS

The Company will be permitted to recover earned EAM positive revenue adjustments through electric and gas surcharges beginning April 1, 2019, as set forth in Section 3.8 and Section 4.10 of the Joint Proposal.

### Environmentally Beneficial Electrification EAM

The Environmentally Beneficial Electrification EAM metric will be measured as the lifetime metric tons ("MT") of avoided carbon dioxide ("CO2") from incremental electric vehicles ("EVs") and heat pumps. Lifetime MT of CO2 will be calculated as the number of incremental units multiplied by the assumed avoided MT CO2 multiplied by the average technology life as agreed to below.

Electric vehicles: *Incremental EVs* \* 3.85 *MT CO2* \* 10 years
Air-source heat pumps ("ASHP): *Incremental ASHP* \* 3.5 *MT CO2* \* 15 years
Ground-source heat pumps ("GSHP"): *Incremental GSHP* \* 5 *MT CO2* \* 25 years

#### **EV Peer Group**

The EV component of the Environmentally Beneficial Electrification metric will be measured as the lifetime MT of avoided carbon dioxide from incremental electric vehicles registered in Niagara Mohawk's service territory as compared to those registered in the peer group described below. Electric vehicles are defined as battery electric vehicles ("BEVs)<sup>1</sup> and plug-in hybrid vehicles ("PHEVs"). Data will be obtained from the R.L. Polk Vehicles in Operation data source<sup>2</sup>.

Table 1: Cumulative EVs Registered in NMPC and Peer Group

Cumulative EVs registered	2010	2011	2012	2013	2014	2015	2016	2017 YTD
NMPC Actual	27	122	762	1,248	2,548	2,978	3,360	4,620
Peer Geography Actual	106	183	999	1,691	3,855	4,883	6,162	8,245

The peer group is comprised of non-National Grid zip codes in New York and Massachusetts that have customer bases that are within three standard deviations of Niagara Mohawk's average population and household income. EV adoption in Niagara Mohawk as a function of EV adoption in the peer group shows that, on average, electric vehicle adoption in Niagara Mohawk zip codes is approximately 55.7% of adoption in the peer group zip codes.

$$NMPC EVs = .557 PeerGroup EVs + 8.8$$

where NMPC EVs represents the annual incremental BEVs and PHEVs registered in Niagara Mohawk zip codes and PeerGroup EVs represents the annual incremental BEVs and PHEVs registered in peer group zip codes

Performance against the peer group will be measured as:

$$[NMPC\ EVs] - [Peer\ group\ EVs*55.7\%]$$

<sup>&</sup>lt;sup>1</sup> Excluding low speed vehicles such as golf carts

<sup>&</sup>lt;sup>2</sup> Or a comparable data source consistent with the data provided in Table 1 in the event that Polk is acquired or no longer produces EV registration data

# APPENDIX 9

### **Electric and Gas Pension and OPEB Expense Provisions**

- 1. Niagara Mohawk will determine the percentage of pension and OPEB costs that will be capitalized, and the corresponding entries into the pension and OPEB deferral accounts, using the methodology set forth herein. For both the electric and gas segments, the percentage of pension and OPEB costs to be capitalized will be determined as follows:
  - a. The Company will calculate a capitalization rate at the beginning of each fiscal year using the actuarial estimates of pension and OPEB expenses for the year, along with all other fringe benefit costs subject to capitalization, and will adjust this rate for updated actuarial and other estimates provided in September of each year. The rate may also be adjusted at other times throughout the year if there is a fluctuation in the rate of greater than +/- 20 percent.
  - b. After the close of each fiscal year, the Company will compare the amount of fringe benefits (including pension and OPEB costs), payroll taxes, and workers compensation actually capitalized on the books using actual fiscal year results to the amount that would be capitalized if the calculation used to determine the pension and OPEBs expense in these proceedings were applied. The Company will adjust the amount capitalized associated with fringe benefits (which includes, but is not limited to pension and OPEBs) for any differences resulting from this reconciliation. In addition, the Company will adjust the applicable pension and OPEB deferral accounts to reflect the capitalized pension and OPEB costs determined pursuant to the above methodology.

### Journal Entry Details Monthly Deferral

- c. Actual pension and OPEB expense comprise the following three elements:
  - Expense booked directly by the Company pursuant to FAS 87 or FAS 106, derived from actuarial reports.
  - Pension/OPEB expense allocated from National Grid USA Service Company, Inc. and National Grid Engineering & Survey, Inc. (collectively, "Service Company"). The amount allocated from the Service Company is reduced by any Supplemental Executive Retirement Programs ("SERP") related amounts as directed in Attachment A hereto. A reduction to pension/OPEB expense for the amounts capitalized will represent and include credits for the normal capitalization of payroll, intercompany billing revenues, and credits for third party billing revenue. The amount of capitalization of payroll (covering all three of these types of credits) will be determined based upon the process described above.
  - Monthly, the sum of the two elements noted above are compared against the preestablished level of pension/OPEB expense reflected in rates (see Section 10.1.1 of the Joint Proposal). This pre-established level takes the annual amounts

reflected in rates and divides them by twelve to perform a monthly reconciliation. The amount above or below the threshold is the amount deferred monthly. Separate entries are recorded for the pension and OPEB deferrals.

### **Annual Reconciliation Adjustment**

- d. An adjusting entry will be made annually, but no later than May of the subsequent fiscal year, for the reconciliation of fringe benefits capitalized in accordance with Section 1b above.
- 2. Deferred pension and OPEB costs will be credited with the costs associated with employees covered by the Niagara Mohawk pension and OPEB plans that are transferred to and from the Service Company between valuations for each fiscal year to eliminate double-counting. The method for determining the credit is as follows:
  - a. After the close of each fiscal year, the Company will: (1) identify all employees who transferred from Niagara Mohawk to the Service Company or from the Service Company to Niagara Mohawk during the fiscal year; and (2) making the hypothetical assumption that all employee transfers occurred on January 1 of the fiscal year, calculate the difference in pension and OPEB expense allocated between Niagara Mohawk and the Service Company for (a) the capitalized portion of pension and OPEB expense; and (b) the Company's share of the monthly Service Company allocation. This adjustment for (b), above, will be subject to Niagara Mohawk's ability to provide support to Staff that the annual pension and OPEB costs for Service Company are derived from actuarial estimates of Service Company pension and OPEB expenses for the year. The revised valuations as of January 1 will be provided by the Company's actuaries. The credit determination, if any, resulting from this Section 2 will follow the determination set forth in Section 1 above. An example calculation of the adjustment described above will be applicable from April 2006 forward and is presented in Table 1 of Attachment B hereto.
  - b. The Company further agrees that the amount of pension and OPEB costs allocated to Service Company, net of pension and OPEB costs allocated back from Service Company and otherwise included in pension and OPEB cost deferrals, will be funded on an as-incurred basis.
- 3. The Signatory Parties agree the funding for pensions and OPEBs should be done in a tax effective manner. Accordingly, Niagara Mohawk will have the discretion to allocate the funding requirements contained in the Commission's *Statement of Policy on Pensions and Post-Retirement Benefits Other than Pensions* in Case 91-M-0890 ("Statement of Policy") to efficiently use available tax benefits, manage the pension and OPEB obligations of the Company, and to meet other financial requirements associated with the funding. For purposes of the Statement of Policy, the funding requirements of both OPEB and pensions will be evaluated on the sum of the OPEB and pension plans, and excess funding for pensions or OPEBs will be offset against deficiencies, if any, in Niagara Mohawk's other pension or OPEB funding obligations under the Statement of Policy. This will be accomplished by providing a return

calculated in the manner set forth in the Statement of Policy on the debit balance of the internal reserve for a plan to the extent that such debit balance is less than or equal to a credit balance of the internal reserve for another Niagara Mohawk plan caused by the limitations on tax benefits. However, except as set forth below, no return will be allowed for any plan having a debit balance in its internal reserve for the amount by which the plan assets exceed the plan obligations. To earn a return on a portion of the debit balance of the internal reserve attributable to plan assets that exceed plan obligations, Niagara Mohawk must request such authority from the Commission and demonstrate that such funding in excess of the rate allowance is necessary and in the interest of customers even though the plan is fully funded.

### 4. Statement of Policy

In general, Niagara Mohawk will adhere to the Commission's Statement of Policy. Under the Statement of Policy, Niagara Mohawk reconciles its pension and benefit expense with the allowance in its rates and will realize no profit or loss from changes to retiree benefits under its pension and benefit plans. However, Niagara Mohawk and National Grid will be granted waiver from the requirements of the Statement of Policy in the following limited respects:

- a. Although Niagara Mohawk and National Grid will not merge their pension funds without prior approval of the Commission following notice to Staff, they may establish a single master trust, with separate segregated sub-trusts for its New York and New England retirees, as long as a complete separate accounting of the assets, liabilities and annual expense levels can be made for the Niagara Mohawk sub-trust.
- b. Service Company will be permitted to manage the pension/OPEB plans subject to Commission staff review as long as a separate, non-affiliated entity is handling the investment decisions pertaining to the plans.

### **Attachment A**

- 1. Reconciliation of Pension and OPEB Expense. Niagara Mohawk will reconcile its actual Pension and OPEB expense recorded under FAS 87 and FAS 106, and its allocated share of Pension and OPEB expense from Service Company, but excluding Pension and OPEB expense associated with SERP or other executive plans, programs, or arrangements that would otherwise factor into FAS 87, FAS 88, or FAS 106, and unregulated operations, to the amounts reflected in rates (as shown in Section 10.1.1 of the Joint Proposal). Capitalized FAS 87 and FAS 106 costs will be excluded from actual FAS 87 and FAS 106 costs in the reconciliation.
- 2. Termination Benefits, Settlements, and Curtailments Associated with Transfers to Service Company and National Grid Other Affiliates. The Signatory Parties recognize that the movement of employees between Niagara Mohawk and Service Company or National Grid Other Affiliates (as defined in the Company's Corporate Structure and Affiliate Rules (Appendix 16 to the Joint Proposal), could result in the inequitable shifting of FAS 87 and FAS 106 expense between Niagara Mohawk and Service Company or National Grid Other Affiliates. Consequently, Niagara Mohawk will implement mechanisms to prevent such inequitable shifting of FAS 87 and FAS 106 expense during the term of the Rate Plan, including the prevention of any effects associated with such transfers on any termination benefits, settlements, or curtailments. The objective will be, for example, to assure that a Niagara Mohawk employee who is transferred to Service Company and bills all or a portion of the employee's time to Niagara Mohawk does not unfairly increase or decrease Niagara Mohawk's recoverable FAS 87 and FAS 106 expense, or that an employee of Service Company who was billing all or a portion of the employees time to Niagara Mohawk and then is transferred to Niagara Mohawk does not unfairly increase or decrease Niagara Mohawk's recoverable FAS 87 and FAS 106 expense.
- 3. <u>All Other Termination Benefits, Settlements, and Curtailments</u>. Niagara Mohawk is required to follow the procedures set forth in the Commission's Statement of Policy, as it may be revised from time to time.

Pension/OPEB expense originally allocated to NGUSA Service Company, excluding employees transferred during the year (based on revised actuarial О

valuations)

Revised pension/OPEB expense originally allocated to NGUSA Service Company, including employees transferred during the year (based on revised

Column (D) – Column (E) actuarial valuations)

Percentage of pension/OPEB expense capitalized (per method described in PSC-276, and as reconciled to under section 3.8.1 of the stipulation) FMLHGL

Decrease for amount capitalized (F x G)

Adjustment w/out service company allocation adjustment (F-H)

Percentage of pension/OPEB expense originally allocated from NGUSA Service Company to NM

Column (F) x Column (J) Column (I) – Column (K)

Note: The final pension and OPEB adjustment (Column L), must be further allocated between electric and gas departments to determine the amount to be posted to electric and gas pension and OPEB deferrals.

# APPENDIX 10

### **GBE Program Scope**

High-Level GBE Program Scope by Workstream

**Asset Management** –an enterprise asset management platform that will provide a single view of all assets and system of record

- o Implement an enterprise-wide Geographic Information System ("GIS"), investment planning, integrity management, and design systems /tools integrated with the work management system
- O Develop enterprise-wide investment planning / risk management capabilities **Work Management** a work management system with an integrated field mobile application allowing a single view of all work with the ability to prioritize work
  - o Implement an enterprise-wide work management system, including scheduling and mobility platforms with ability to optimize routes
  - Develop planning and prioritization capabilities to ensure commitments are met, mandated work is completed and capital work is delivered
  - Deploy enterprise-wide standardized processes and roles

**Customer Engagement** - enable easier customer interactions through greater visibility to planned activities and scheduling of upcoming work

- Implement an interaction platform with multi-channel, customer self-service options
- o Provide access to real-time customer information and history

### **Regulatory & Compliance**

- Incorporate pipeline safety and compliance standards into all elements of the design
- Develop robust technical training capability
- o Simplify and align policies, procedures, work methods and training
- Incorporate elements of API 1173 Pipeline Safety Management System (process safety)

### Detailed Backbone Capabilities

- Enterprise Asset Management platform integration with SAP
- Enterprise Work Management system integrated with a field mobile application and back office systems (*i.e.*, Powerplan and SAP)
- Scheduling and dispatch
  - Optimized routing
- Field mobility solutions
  - o electronic data capture
  - visibility to customer payment history

- Spatial crew visibility
- acceptance of credit card payments
- o print capability

Case 17-E-0238 & 17-G-0239 Appendix 10 Schedule 1 Page 2 of 2

- o electronic work packages
- o field access to maps

- field asset correction and geolocation
- GIS Consolidation, GIS Data Remediation, Landbase Conflation
- Enterprise GIS/Enterprise Asset Management Platform Integration
- Data management, archiving, record-keeping
- Customer collections status visibility
- Standardized compatible unit library
- Customer appointment booking
- Contractor mobility solution
- Mobile time entry and tracking
- Material traceability
- Work forecasting and planning solution
- Asset investment planning and management tool
- Integrity management application
- Mobility tool for customer meter services work, inspection and maintenance work, preventative maintenance activities, construction work, leak inspection and leak repair
- Gas safety instructor-led, video-based, and mobile technical training

### Detailed Enhanced Capabilities

- Asset investment scenario planning
- Graphical Work Design and CU estimating
- Customer contact center front end application integrated with customer information systems and field mobility solution providing 360° view of the customer
- Field crew customer interaction portal
- Customer self-service portal
- Employee support interaction portal
- Projects and program management platform
- Complex design tools
- Auto work notifications
- Supervisor mobile platform

- Field mobile redlining and GIS mapping
- Project Management Platform integration with GIS, Enterprise Asset Management and asset accounting
- Spatial asset risk visibility
- Large commercial and landlord interaction portal

GBE Program Niagara Mohawk ("Company") KPI Descriptions and Calculations

Data Source	Jobs Data and HRIS system		M&C Workplan
Algorithm	The quotient of (i) the total number of Jobs completed by CMS FTEs during the fiscal year, <i>divided by</i> (ii) the total number of gas CMS FTEs during the fiscal year, with the result divided by the number of working days (240) and expressed to two decimal places.	"FTEs" includes Company gas employees and excludes contractors "Jobs" means all Company CMS planned and collections jobs completed by CMS FTEs	The product of (i) the total number miles of gas "Distribution Main" installed by Company gas M&C FTEs in the Company's gas service territory in the fiscal year multiplied by (ii) the number of feet in a mile, <u>divided by</u> (iii) number of Company gas M&C FTEs (based on average crew size during the fiscal year), with the result divided by the number of working days (240) and expressed to two decimal places.
Metric Description	Measures the average number of gas jobs completed per day by each working CMS FTE		Measures the average feet of gas distribution main installed per day by each working gas M&C FTE
KPI	Avg. # of completed gas Jobs per CMS FTE (jobs/day)		Avg. ft. of gas distribution main installed or replaced per M&C FTE (ft/day)
Measurement Area	Work Management- Customer Meter Services ("CMS")		Work Management- Maintenance & Construction ("M&C")

Case 17-E-0238 & 17-G-0239
Appendix 10
Schedule 2
Page 2 of 4

	STORMS Data R850 completion Clerical information (HRIS) and filtered for those responsible for processing work orders	Move Call Benefits – call center query for fiscal year  Non Move Call Benefits – call center query for fiscal year  Move and Non-move Calls
"Distribution Main" means the following types of gas distribution main: new main, proactive and reactive replacements, reliability and reinforcements, and city state construction replacements "Miles" means miles of gas distribution main installed "Feet" means feet of gas distribution main installed "FTEs" includes Company gas employees and excludes contractors	The quotient of (i) Company total Work Orders in STORMS during the fiscal year divided by (ii) average number of Clerks active during the fiscal year.  "Work Orders" means work orders marked as closed in STORMS  "Clerks" means those Company and Service Company employee and contractor roles responsible for processing Work Orders.	The sum of (i) the total number of Move Calls received by the call centers from Company's customers during the fiscal year <i>plus</i> (ii) the total number of field-related Non-move Calls received by the call centers from Company's customers
	Measures the average number of Work Orders processed per year in the back office by each engineering clerical employee	Measures the total volume of move and non-move telephone calls received by the Company's call centers from customers
	Work Orders Processed/ Back Office FTEs (WOs/yr)	Total Call Volume (Calls/year)
	Engineering and Back Office	Customer

Enterprise Enhanced Capability Investment Dollars weighted to KPI	\$20.4 M	\$20.4 M	\$20.4 M	\$29.6 M	\$29.6 M	\$64.8 M	\$185.0 M
NMPC Enhanced Capability Investment Dollars = Line 5 * 16.89%	\$3.44 M	\$3.44 M	\$3.44 M	\$5.00 M	\$5.00 M	\$10.94 M	\$31.2 M
Calculated NMPC Value of Meeting the FY23 Target	\$486,847	\$861,064	\$310,265	\$297,136	\$1,283,066	000'006'2\$	\$11,138,378
Annual Dollar Value of a unit of improvement = Line 7 / (Line 3 - Line 2)	\$6,085,588	\$2,391,844	\$1,633	<b>7</b> \$-	\$270,689	-\$19,849	
Illustrative FY23 KPI Value	2.75	12.22	092	1,075,000	02'99	120	
Percentage Metric performance to FY23 Target = (Line 2 - Line 9)/(Line 2 - Line 3)	62.5%	52.8%	%8'96	93.0%	-21.1%	%8'69	
Calculated value of performance = (Line 9 - Line 8	\$304,279	\$454,450	\$298,834	\$276,315	-\$270,689	\$5,518,090	\$6,581,281
Value of any individual KPI underperformance = (Line 9 - Line 4) / Line 8, if underperforming	\$182,568	\$406,614	\$11,431	\$20,821	\$1,553,755	\$2,381,910	\$4,557,097
Value of any individual KPI over performance = (Line 9 - Line 4) / Line 8, if target exceeded	0\$	0\$	0\$	0\$	0\$	0\$	0\$
Maximum potential reallocation from any over performing KPIs = 50% * Line 7	\$243,424	\$430,532	\$155,133	\$148,568	\$641,533	\$3,950,000	
Re-allocation of any over-performance to any underperforming KPIs = the lower of ((Line 12 / Total Column of Line 13) * Total Column of Line 13) or (Line 14)	0\$	0\$	0\$	0\$	0\$	0\$	0\$
Re-allocated value = Line 16 11 + Line 15 for underperforming KPIs or Line 7 for outperforming KPIs	\$304,279	\$454,450	\$298,834	\$276,315	-\$270,689	\$5,518,090	\$6,581,281
Reallocated Metric performance to FV23 Target = Maximum of Line 16 / Line 7 or 0%	%89	23%	%96	83%	%0	%02	
Total Value to be deferred back to customers for 18 underperformance = (1 - line 17) * Line 6	\$1.29 M	\$1.62 M	\$0.13 M	\$0.35 M	\$5.00 M	\$3.30 M	\$11.69 M

If any KPI outperforms its target, demonstrating more value was delivered than anticipated, then the incremental value delivered can be reallocated to support any underperforming KPIs based on the following principles:

<sup>1.</sup> Re-allocation is based on the calculated dollar value of the KPI outperformance, not purely on a percentage basis

<sup>2.</sup> Any reallocation to an underperforming KPI is capped at 50% of its value (e.g. if performance was at 25% of the target, the maximum performance it could be enhanced to through reallocation is 75% of the target if there was available outperformance)

<sup>3.</sup> Through the reallocation process, the total dollar value demonstrated from the KPIs cannot increase (i.e. performance cannot exceed 100% of KPI value)

<sup>3.</sup> Through the reallocation process, the total dollar value demonstrated from the KPIs cannot increase (i.e. performance cannot exceed 100% of KPI value)

# APPENDIX 11

### **TGP Nomination Procedure**

- Overview: Beginning in November 2018, all East Gate Daily Balanced gas
  transportation customers and all Monthly Balanced/Customer Choice customers
  will be required, by a standing nomination procedure, to deliver some portion of
  their supply on TGP when temperatures are forecast to fall below a designated
  temperature threshold.
- <u>Program Parameters</u>: The temperature triggers, delivery percentages, and nomination procedures will be reviewed and updated prior to each winter season. The Company will amend its GTOP to include a communications protocol for affected customers, which will include, at a minimum, a procedure for communicating these criteria and procedures in an annual pre-winter mailing. The Company will also notify Department of Public Service Staff in advance of any changes to the program parameters.

The Company preliminarily estimates the following parameters:

- o Temperature trigger: Forecast average daily temperature of 15 degrees
- o TPG delivery percentage: 8 12%
- Monthly Balanced Transportation Customers: the Company will release its TGP capacity to all ESCOs participating in the mandatory capacity/Customer Choice program.
- <u>East Gate Daily Balanced Transportation Customers</u>: a certain percentage of their requirements will be required to be delivered on TGP when the Temperature Trigger is forecast to be reached.
- <u>Cashouts and Penalties</u>: The Company will amend its GTOP/Tariff to incorporate TGP pricing in its Cashout Index, as well as penalty provisions for failing to deliver in accordance with these provisions.

# APPENDIX 12

### **SC-8 Standby Sales**

### **D1 Election Rate**

To discourage the purchase of standby gas supplies when not required to meet the gas supply requirements of D1 customers, the Company will establish a set of D1 election rules. While the Company recognizes that D1 elections are typically made for purposes of serving SC-8 customers' gas requirements, there are other times when the D1 program appears to be used solely for the benefit of the SC-8 customer supplier. Therefore, the following rules will apply to D1 elections:

- The Company will monitor D1 elections to identify potential abuses and eliminate arbitrage opportunities (*e.g.*, elections not attributable to customer requirements, weather variations, or pipeline curtailments). Examples include:
  - o D1 elections that are resold in the market
  - Material amounts of D1 elections not utilized by customer (*i.e.*, customer usage is materially less than D1 election) on days when on-system TGP Operational Flow Orders are issued.
- The Company will investigate potential violations of D1 election rules. SC-8 customers will reasonably cooperate with the Company in any such investigation. The Company will work closely with D1 customers and/or their suppliers to determine the nature of the activities that resulted in the potential violation.
- D1 elections determined to have violated the D1 election rules will be billed at the Company's highest daily incremental cost of gas for the day the violation occurred.
- The D1 customers and/or their supplier will have the right to challenge any Company determination by making a complaint to the Commission.

# APPENDIX 13

### **NON-WIRES ALTERNATIVES ("NWA")**

### Overview

The Non-Wire Alternative Incentive Mechanism (NWA Incentive Mechanism) establishes separate but similar methodologies for determining incentives applicable to Large Projects<sup>1</sup> and Small Projects.<sup>2</sup> Through the NWA Incentive Mechanism, the Company may retain a share of the present value of net benefits identified by comparing an NWA project to the traditional infrastructure project it would defer or replace based on a benefit cost analysis (BCA).<sup>3</sup> The incentive amount available to the Company will be adjusted based on the difference between the forecast cost of achieving deferral and the actual costs of such. In the event the number of megawatts (MWs) required to defer the traditional project increases or decreases, the incentive amount would be a further adjusted. The NWA Incentive Mechanism provides an incentive floor of \$0 and a cap of 50% of the initially-identified net benefits.

NWA Project Costs will be deferred with carrying costs.<sup>4</sup> Recovery of such costs will be amortized over a ten-year period, with offsetting credits to the extent that an NWA Project defers the need for a traditional infrastructure project included in the Company's Average Electric Plant in Service Balance.

The Company also may petition the Commission to modify the general NWA Incentive Mechanism described below if doing so is in the public interest.

### **BCA**

For Large Projects, the Company will use a full-scale BCA to compare the present value of the net costs and benefits of an NWA project versus the present value of the net costs and benefits of a traditional infrastructure project. The BCA will consider all of the benefit and cost categories in the Commission's January 21, 2016 *Order Establishing Benefit Cost Analysis Framework* ("BCA Order") and use the Company's BCA Handbook. For Small Projects, the Company will use a "streamlined" BCA, which will include the major categories of costs and benefits outlined in the BCA Order, but will not include non-energy benefits, other than carbon dioxide reductions, or any benefits which might otherwise be realized by implementing a traditional infrastructure solution.

A Large Project for NWA consideration is one where the estimated capital cost of the traditional infrastructure investment to be deferred is greater than or equal to \$1 million. Large Projects generally require a larger number of MWs and have a longer lead time.

A Small Project for NWA consideration is one where the estimated capital cost of the traditional infrastructure investment to be deferred is greater than \$500,000 but less than \$1 million. The need for Small Projects tends to develop more rapidly, and therefore they require a streamlined process for rapid response.

The Company may pursue multiple NWA Projects to defer separate traditional infrastructure projects in the same area.

<sup>&</sup>lt;sup>4</sup> Carrying costs shall be at the pre-tax weighted average cost of capital.

### NWA Incentive Mechanism Applicable to Large Projects

The Company will establish an "Initial Incentive" equal to 30 percent of the present value of net benefits (Initial Net Benefits), *i.e.*, the present value of net benefits projected at the time the Company has either entered into contracts with distributed energy resource ("DER") providers for the entire NWA project portfolio, or when there is reasonable certainty on the price of the NWA project portfolio. To establish the Initial Incentive, the Company shall make a compliance filing in Case 17-E-0238. Prior to making its compliance filing to set the Initial Incentive, the Company shall seek input from Department of Public Service Staff. Once the NWA Project has been fully implemented, the Company will calculate the Difference in NWA Project Cost, which will be equal to the initially-forecast cost of the NWA Project, less the actual cost of the NWA Project. The Final Incentive will equal the sum of the Initial Incentive and 50 percent of Difference in NWA Project Cost. The Final Incentive is subject to a floor of \$0 and a cap of 50% of the Initial Net Benefits.

Should additional MWs be needed to achieve the initially proposed deferral of a traditional infrastructure project, or to increase the duration of the deferral, the Company will make a compliance filing in Case 17-E-0238 and seek incremental MW procurements accordingly. So long as it is feasible and remains cost-beneficial to procure the additional MWs to continue deferral, the Company will be authorized to receive cost recovery of the expenditures incurred in obtaining the additional MWs, including carrying charges. However, the Company's Final Incentive would not reflect either the costs<sup>5</sup> or the benefits associated with the additional MWs. In the event the Company determines that acquiring additional MWs is technically or operationally infeasible, it will plan to implement a traditional infrastructure solution. Recovery of any incentives related to that project will be halted without requiring a refund of the amounts already collected at that time.

In the event fewer MWs are needed to achieve the intended deferral of traditional infrastructure, the Company will only reduce the number of MWs it plans to procure if both the need for reduced MWs is shown to be a sustained downward trend over a three-year period, and the Company needs only 70 percent or fewer of the initially-forecast MWs to achieve the intended deferral. The Company will true-up the incentive by converting the Initial Incentive to an Initial Unit Incentive by dividing its 30 percent share of Initial Net Benefits by the initial number of MWs it forecasted. Similarly, the Difference in NWA Project Cost to achieve deferral will be calculated on a per-MW basis, the Unit Difference in NWA Project Cost, by dividing the actual NWA Project Cost by the number of MWs required. The Final Incentive will be calculated as the sum of the Initial Unit Incentive plus or minus the Unit Difference in NWA Project Cost, multiplied by the reduced amount of MWs determined to be necessary, subject to the same 50 percent share of Initial Net Benefits incentive cap and \$0 incentive floor provisions.

The expenditures related to acquiring such additional MWs will not be considered in the Difference in NWA Project Cost used to calculate the Final Incentive.

### NWA Incentive Mechanism Applicable to Small Projects

Similar to Large Projects, the Initial Incentive related to Small Projects will be based on a 30 percent share of the present value of net benefits (Initial Net Benefits), *i.e.*, the present value of net benefits projected at the time the Company has either entered into contracts with DER providers for the entire NWA project portfolio, or when there is reasonable certainty on the price of the NWA project portfolio. For Small Projects, however, the initial incentive will be set on a per MW basis. This Initial Unit Incentive is calculated by dividing the 30 percent share of Initial Net Benefits by the number of MWs to be procured for the NWA project. To establish the Initial Unit Incentive, the Company shall make a compliance filing in Case 17-E-0238. Prior to making its compliance filing to set the Initial Unit Incentive, the Company shall seek input from Department of Public Service Staff. Once the NWA Project has been fully implemented, the Company will calculate the Unit Difference in NWA Project Cost, equal to the initially-forecast cost of the NWA Project minus the actual cost of the NWA Project, divided by the number of MWs required. The Final Incentive will be determined by adding the Unit Difference in NWA Project Cost to the Initial Unit Incentive, multiplied by the MWs required.

For Small Projects, the Company will consider its need for more or fewer MWs using an annual analysis. Should additional MWs be needed to achieve the initially proposed deferral of a traditional infrastructure project, or to increase the duration of the deferral, the Company will make a compliance filing in Case 17-E-0238 and seek incremental MW procurements accordingly. So long as it is feasible and remains cost-beneficial to procure the additional MWs to continue deferral, the Company will be authorized to receive cost recovery of the expenditures incurred in obtaining the additional MWs, including carrying charges. However, the Company's Final Incentive would not reflect either the costs<sup>6</sup> or the benefits associated with the additional MWs. In the event the Company determines that acquiring additional MWs is technically or operationally infeasible, it will plan to implement a traditional infrastructure solution. Recovery of any incentives related to that project will be halted without requiring a refund of the amounts already collected at that time.

If the annual needs assessment determines that fewer MWs are required to achieve the intended deferral of traditional infrastructure, the Company will only seek to decrease its procurements if it determines that it needs only 70 percent or fewer of the initially-forecast MWs to achieve the intended deferral. In the event of a reduction in the number of MWs required, the Unit Difference in NWA Project Cost will be calculated, as if the MW reduction did not occur. The Final Incentive, however, will be calculated as the sum of the Initial Unit Incentive and the Unit Difference in NWA Project Cost, multiplied by the reduced amount of MWs determined to

The expenditures related to acquiring such additional MWs will not be considered in the Difference in NWA Project Cost used to calculate the Final Incentive.

be necessary, subject to the same 50 percent share of Initial Net Benefits incentive cap and \$0 incentive floor provisions.

### NWA Cost and Incentive Recovery

Consistent with the Track Two Order, the Company's Capital Investment Reconciliation Mechanism is revised to remove the financial disincentive utilities face when engaging in NWA projects. To the extent an NWA project results in the Company displacing a capital project that is reflected in the Average Electric Plant in Service Balances, the balance(s) will be reduced to exclude the forecasted net plant associated with the displaced project. The carrying charge associated with the displaced project will be applied as a credit against the recovery of the associated NWA project cost to be recovered from customers. In the event the carrying charge on the net plant of any displaced project is higher than the recovery of the associated NWA project costs, the difference will be deferred for the benefit of customers.

NWA project costs and the Final Incentive under the NWA Incentive Mechanism will be allocated to each Service Class (SC) based on the following allocators: (1) 1CP for the transmission portion (if any) of the deferred traditional project; and (2) non-coincident demand allocator for the sub-transmission and distribution portions of the deferred traditional project. For example, the costs and incentives related to an NWA project which defers the need for sub-transmission infrastructure would be allocated to SCs based on their non-coincident sub-transmission demand allocator. Similarly, the costs and incentives related to an NWA project which defers the need for primary-voltage distribution infrastructure would be allocated to SCs based on their non-coincident primary demand allocator. If an NWA project will benefit only certain classes of customers, the cost allocation will be limited to the benefitted classes.

Once allocated to each SC, these costs would be recovered through an electric rate statement, which will be filed with the Commission and posted to the Company's website, that indicates the NWA surcharge rate to be included in the delivery charge, and to roll the NWA surcharge into the delivery charge line item on customers' bills, either the per kW or per kWh rate, on a demand-basis where available and on an energy-basis where necessary.

### Amortization of NWA Project Costs and Incentives

The Company will recover its NWA project costs over a ten-year period. The ten-year recovery period will begin when the NWA project costs are realized. Any unamortized costs plus carrying charges, will be incorporated into base rates when electric base rates are reset.

For Large Projects, the Company will be awarded and begin collecting the Final Incentive from customers once 70 percent of the MWs it procured for the NWA project have become operational and have been verified through the Company's measurement and verification procedures. For Small Projects requiring more than one MW of DER, the Company will be awarded and begin collecting an amount equal to the Initial Unit Incentive as each MW

of the NWA portfolio becomes operational. For Small Projects less than one MW of DER, the Company will be awarded and begin collecting the Final Incentive once the entire NWA portfolio is operational. For both Large and Small Projects, once awarded, the Company will amortize the Final Incentive of an NWA project over the remaining deferral period for the traditional infrastructure project, inclusive of carrying costs on the unamortized balance of the Final Incentive.

### **Reporting Requirements**

The Company will submit a detailed implementation plan and BCA for each NWA project once there is reasonable certainty as to the costs of the NWA project portfolio. The implementation plan for each NWA will include, at a minimum: (1) detailed measurement and verification procedures; (2) the portfolio of component load reductions or DER to be implemented; (3) the anticipated costs of the NWA; (4) a demonstration of whether the costs of the NWA projects are incremental to the Company's revenue requirement or will be displacing a project subject to the Capital Investment Reconciliation Mechanism; (5) a customer and community outreach plan; and (6) the BCA results when available. The implementation plan for each project will be updated at least annually; however, the Company will also update relevant plans promptly, if it determines it needs to increase or decrease the number of MWs required to effectuate an NWA project, or if the length of the deferral period for the traditional infrastructure solution associated with the NWA is modified. Annual implementation plans will be filed by January 31 of each year. If the number of MWs or length of deferral is modified, the Company shall also file an updated BCA, as appropriate.

In addition, the Company also will file quarterly reports showing: (1) NWA project expenditures and all relevant details with respect to project costs; (2) a description of the NWA project activities; (3) anticipated project in-service dates; (4) NWA cost and incentive recoveries; and (5) identification of operational savings or other benefits. The quarterly reports shall be filed in Case 17-E-0238 60 days after the close of each calendar year quarter.

# APPENDIX 14

### **Major Storm Expense Provisions**

The Company's annual electric revenue requirements provide funding for Major Storm Incremental Costs (as defined below) of \$23 million in each of the Rate Years. The Company will defer the difference between the base rate allowance and actual Major Storm Incremental Costs for future refund to or recovery from customers.

As of the Effective Date, Niagara Mohawk will credit the deferral account with a monthly amount of \$1.916 million, which equals  $1/12^{th}$  of the \$23 million included in base rates. An illustrative example of the Major Storm Incremental Costs reconciliation is provided in Attachment A hereto.

### 1.0 <u>Definitions</u>

- 1.1 <u>Major Storm</u> only for purposes of the deferral of costs, a period of adverse weather will be considered a Major Storm if:
  - a. service interruptions affect at least 10 percent of the customers in an operating area; and/or
  - b. service interruptions result in at least one percent of the customers in an operating area being without electric service for durations of at least 24 hours. Niagara Mohawk will provide data showing that a period of adverse weather qualifies as a Major Storm by affected operating area as part of its backup support for the deferral of Incremental Costs.
- 1.2 <u>Incremental Costs</u> Incremental Costs include overtime and payroll taxes paid to employees to restore service following a Major Storm, rest time wages incurred as the result of a Major Storm as specified in Niagara Mohawk's union contracts, outside vendor costs (including the costs of crews from affiliate companies), lodging and meal charges, and material and supply charges that Niagara Mohawk would not have incurred, except for the Major Storm. Any capitalized costs will be excluded from Incremental Costs, and proceeds from insurance, the Federal Emergency Management Agency, New York State or any other reimbursement or proceeds received to cover such costs will be deducted from Incremental Costs. Niagara Mohawk will open a work order for each Major Storm, and the Incremental Costs charged as a result of any Major Storm will be subject to audit by DPS Staff.
- 1.3 <u>Ten Days Following Restoration</u> For deferral purposes only, a Major Storm will include the ten days following restoration of all customers. Except as provided below, Niagara Mohawk will not defer costs incurred after this period. The Company, however, will have the right to petition the Commission for authorization to defer qualifying Incremental Costs (as defined below) incurred more than ten days following restoration of all customers that are associated with extraordinary Major Storms such as the December 2008 Albany or October 2006 Buffalo

For operational purposes, the criteria for determining whether a storm is classified as a Major Storm remains unchanged, as set forth in 16 NYCRR Part 97.

storms. In the petition, Niagara Mohawk must demonstrate that the costs are qualifying Incremental Costs (*i.e.*, that the Incremental Costs qualify for deferral under the provisions set forth in this Appendix); however, the Company is not required to demonstrate that the Incremental Costs are material or that the Company is not earning above its allowed return on equity.

### 2.0 Per Storm Deferral Threshold; Deductible

To qualify for deferral, Incremental Costs of an individual Major Storm must be equal to or greater than \$0.400 million; however, if the Company reaches a cumulative total of \$0.800 million in Major Storms costing less than \$0.400 million, any incremental costs above the \$0.800 million will be eligible for deferral and any subsequent Major Storm will qualify for deferral without regard to an individual event threshold. If the Incremental Costs of an individual Major Storm are equal to or greater than \$0.400 million, all Incremental Costs associated with that event qualify for deferral (not just the amount that exceeds \$0.400 million).

Subject to the foregoing threshold provisions, all Incremental Costs incurred within 10 days of restoration of the last customer are subject to deferral with no per storm deductible. A per storm deductible of \$0.750 million applies only for Major Storms that require post-restoration efforts more than 10 days beyond restoration of the last customer, and only to the extent the Company seeks to defer any Incremental Costs incurred more than 10 days beyond the restoration of the last customer. In the event the Company does seek to defer Incremental Costs incurred more than 10 days beyond the restoration of the last customer, the Company also will perform an analysis of such costs to gather information for deductible levels in future rate proceedings.

### 3.0 Contractor Disallowance

The portion of Niagara Mohawk's costs of contractors that qualify for deferral as Incremental Costs will be determined in accordance with the Contractor Disallowance rule. The Contractor Disallowance rule provides that straight-time costs for contractors replacing employees with certain job titles who perform storm restoration work and who have left the Company cannot be considered Incremental Costs where the headcount in those job titles is below the level assumed in base rates. The Contractor Disallowance pertains to only the following job titles: (i) Chief Line Mechanic B Hotstick; (ii) Chief Line Mechanic A Hotstick; (iii) Line Mechanic Hotstick; (iv) Line Mechanic C; (v) Line Mechanic B; (vi) Line Mechanic A; (vii) Line Mechanic Helper; (viii) One Person Line/Trouble Mechanic; (ix) Trouble Mechanic C Hotstick; (x) Trouble Mechanic D Hotstick; (xi) Cable Splicer A; (xii) Cable Splicer B; (xiii) Cable Splicer C; (xiv) Cable Splicer Helper; (xv) Chief Cable Splicer; (xvi) Transmission Chief Live Line Bare Hand Specialist; (xvii) Transmission Line Worker A 3/C; (xviii) Transmission Line Worker C 1/C; (xix) Transmission Line Worker Hot Stick; (xx) Transmission Live Line Bare Hand Specialist; and (xxi) Transmission Line Worker Helper. An example of the Contractor Disallowance calculation is set forth in Attachment B hereto.

### 4.0 Additional Provisions

- 4.1 In its summary of Incremental Costs to be deferred with respect to any Major Storm, Niagara Mohawk will identify the portion of such Incremental Costs that represents payments to any affiliated company or companies separately from the portion of Incremental Costs that represents internal costs and costs paid to unaffiliated third-parties. Affiliated company costs will be broken down into the same cost components as used for internal Company costs.
- 4.2 Niagara Mohawk will not defer storm-related claims costs; stores handling costs originating from Niagara Mohawk; transportation costs originating from Niagara Mohawk; pension and OPEB costs; equipment rental costs unless the Company demonstrates that such costs are Incremental Costs; base labor costs associated with the contractor Pro Unlimited, its successor and or similar agencies with a majority of employees being former Company employees; and costs for cell phone usage.
- 4.3 Niagara Mohawk will defer 30 percent of base labor, associated overheads (other than pension and OPEBs), and transportation costs originating from the ServiceCo (as defined in Section 3.1 below) as Major Storm Incremental Costs.

Niagara Mohawk Power Corporation d/b/a National Grid Case 17-E-0238 Example Calculation of Deferrable Storm Costs Hypothetical Storm Events in Rate Year 2019 Attachment 2 of RPP Units (\$)

Qualifying Major Storm Event		05/01/18	07/01/18		12/1/2018 1	02/01/19		03/01/19	Total

March	(1,916,667)	286,000	2,716,000
Year Total	(23,000,000)	25,716,000	

Note 1: Company would need to petition for deferral of costs incurred 10 days after the last customer is restored

### **Attachment B**

### **Calculation of Contractor Disallowance Costs**

### **Principles**

- 1. The adjustment for contractor straight time is to be applied to line restoration.
- 2. The baseline and the month prior to the storm internal employee counts are defined using job titles, which are set forth in Table 2 below. The Signatory Parties agree that these job titles represent union employees with primary responsibility for line restoration activities and are the functions most likely to be supplemented with contractors during a storm response. If job titles are changed, the Company will provide a reconciliation of prior job titles to new job titles for purposes of applying the adjustment. The employee count shall pertain only to Niagara Mohawk.
- 3. The Company will provide a monthly report of internal staffing levels for the job titles defined in Table 2 below.
- 4. The Signatory Parties agree the baseline employee counts for line restoration in Rate Years One, Two, and Three are 926, 932, and 932, respectively.
- 5. The hourly billing rate applied to the contractor hours to determine the straight time is described in Line D below.
- 6. An example of how the calculation will be developed is presented in Table 1 below.
- 7. Other activities may be subject to a contractor disallowance and will be reviewed on a case by case basis.
- 8. Employees of Company affiliates will be treated as contractors.
- 9. In the event the Company employs more internal employees in the specified job titles than indicated in Principle 4, above, the Company may petition the Commission for an adjustment to the storm deferral to account for the incremental straight time of the additional employees.

### **Illustrative Example**

Table 1 is an example of the template agreed to for calculating the adjustment to deferrable contractor storm costs. The example reflects contractor and applicable employee storm response and restoration staffing and costs for several days after a hypothetical Major Storm. This

Case 17-E-0238 & 17-G-0239 Appendix 14 Attachment B Page 2 of 2

example is presented to illustrate the method and the sources of the data to be used, and is not intended to reflect the final or agreed upon deferrable cost of any storm.

### **Explanation of Lines on Table 1**

Line [A] – See Table 2 for the agreed upon list of qualifying job titles for Line Restoration and the column titled "Staffing Baseline in Rates" in that table for the associated employee counts. The counts represent all Niagara Mohawk employees within each job title. This data should not change during the Rate Plan.

Line [B] – See the column titled "Total Actual Staffing" in Table 2 for an example of a report reflecting the number of Niagara Mohawk employees in qualifying job titles, at the end of the month prior to the month in which a Major Storm occurs. The Company will provide by the 15th of every month, the number of line restoration employees by job title who were in qualifying positions per Table 2. If a listed job title is reclassified for operational reasons, the Company will notify on-site PSC Staff of the reclassification and include that job title on subsequent monthly reports. However, listed job titles cannot be commingled with other job titles not subject to this clause.

Line [C] – The level of non-deferrable contractors equal to the total baseline employee count Line [A] less total actual employee count Line [B].

Line [D] – The agreed upon Line Contractor hourly rates for the Rate Years are \$164.76, \$168.22 and \$171.75, respectively. Rates beyond the Rate Years will be equal to the Rate Year 2021 rate inflated using the Blue Chip Economic Indicators consensus forecast of the GDP Deflator at the start of the year in which the rates apply.

Line [E] – Eight hours of straight-time per day.

Line [F] – Daily straight-time adjustment prior to the expense/capital allocation as determined for each storm, which is the result of multiplying Lines [C], [D] and [E].

Line [G] – Expense ratio equal to the sum of listed employees' labor costs charged to expense plus contractors' labor costs charged to expense, divided by the sum of listed employees' total labor costs plus contractors' total labor costs. This ratio is calculated for and applicable to each storm.

# APPENDIX 15

### APPENDIX 15: SERVICE QUALITY ASSURANCE PROGRAM

There will be a Service Quality Assurance Program for the Rate Plan that includes Customer Service and Electric Reliability performance measures. These measures will involve potential negative revenue adjustments with a total annual pre-tax value of \$33.8 million if satisfactory levels of service are not delivered. All of the amounts reflected below are pre-tax dollars. The Service Quality Assurance Program will be measured on a calendar year basis, beginning January 1, 2018.

### 1.0 PROGRAM OBJECTIVE

The objective of the Service Quality Assurance Program is to encourage Niagara Mohawk to provide high levels of service quality in all areas of performance throughout the Rate Plan.

# 1.1 <u>Electric and Gas Customer Service</u>

The Customer Service performance measures set forth in Section 3.0, below, are designed to maintain and improve service quality in the following operations of the Company:

- 1) Call Center Operations
- 2) Billing and Collections
- 3) Field Services

### 1.2 Electric Reliability

The Electric Reliability performance measures set forth in Section 4.0, below, are designed to maintain reliability by establishing standards for the following:

- 1) Service Reliability (SAIFI and CAIDI)
- 2) Estimating
- 3) Inspection and Maintenance ("I&M") Program

### 2.0 OVERALL APPROACH

### 2.1 Allocation of Negative Revenue Adjustments

The Service Quality Assurance Program is designed to encourage quality performance by imposing negative revenue adjustments if performance is below acceptable levels in specific Customer Service and Electric Reliability performance measures. The negative revenue adjustments are divided into the two basic areas of Niagara Mohawk's electricity and gas delivery businesses. The broad allocations of the negative revenue adjustments are set forth below and then allocated among specific service quality measures in Sections 3.0 and 4.0:

1) Total pre-tax potential negative revenue adjustments of \$19.8 million can be assessed each year for Electric & Gas Customer Service. The Customer Service negative revenue adjustments will be allocated to the electric and gas businesses

based on the current ratio of 75 percent electric and 25 percent gas and will not be recalculated annually.

2) Total pre-tax potential negative revenue adjustments of \$14.0 million can be assessed each year for Electric Reliability.

### 2.2 Reporting

- 1) Niagara Mohawk will submit annual performance results, together with supporting data and reports, to the Secretary within three months after the conclusion of each full calendar year.
- 2) For Customer Service performance, the Company will also submit quarterly performance reports within thirty days of the conclusion of the first, second, and third quarter of each calendar year. The annual Customer Service performance report will include a description of the service quality measures, the method for calculating performance, the results for the period, supporting calculations of annual results in spreadsheet format, and a narrative overall assessment of customer service performance during that calendar year.
- 3) For Electric Reliability, the Company will submit quarterly reports thirty days after the conclusion of the first, second, and third quarters of each calendar year. The quarterly reports will include SAIFI, CAIDI, Estimating, and I&M Program targets and actual results. The fourth quarter or annual Electric Reliability performance report will include SAIFI, CAIDI, Estimating, and I&M Program targets, actual results, potential pretax negative revenue adjustments and pretax negative revenue adjustments incurred.

### 2.3 Exclusions

The target levels established for the Customer Service measures listed in Section 3.0 and the Electric Reliability measures listed in Section 4.0 are based on performance under all operating conditions except:

- 1) "Major storms" that are defined as a period of adverse weather resulting in a service interruption affecting at least ten percent of the customers in an operating area or causing customers to be without electric service for at least 24 hours as stated in 16 NYCRR Part 97. Niagara Mohawk will exclude interruption data associated with major storms in a consistent manner with established procedures. The Company will request any major storm related exceptions or adjustments for the Customer Service measures detailed in Section 3.0 in its annual report to the Commission.
- 2) Abnormal operating conditions, including during any period of catastrophe, natural disaster or other unusual event not in the Company's control, affecting more than ten percent of the customers in an operating area. Niagara Mohawk

may petition for the exclusion of performance data associated with such an event. The petition should include justification for exclusion, as well as a detailed analysis of the Company's performance prior to and subsequent to the event.

3) Events that result from orders by the New York State Independent System Operator that are not a result of inappropriate actions by the Company. Niagara Mohawk may petition for the exclusion of performance data associated with such an event. The petition should include justification for exclusion as well as a detailed analysis of the Company's performance prior to and subsequent to the event.

# 3.0 <u>CUSTOMER SERVICE MEASURES</u>

A total pre-tax potential negative revenue adjustment of \$19.8 million per year associated with Electric and Gas Customer Service will be allocated across the following four measures, which are described in detail in the following subsections:

- 1) Annual PSC Complaint Rate
- 2) Residential Customer Transactions Satisfaction
- 3) Small to Medium C&I Customer Transaction Satisfaction
- 4) Percentage of Calls Answered in 30 Seconds

### 3.1 PSC Complaint Rate

A PSC Complaint is initiated with a dispute being filed by, or on the behalf of, a consumer with the Staff of the DPS Office of Consumer Services. The calculation of the metric will be based on the methodology and exclusion/downgrade process used in the Historic Test Year (the 12 months ended December 31, 2016). This statement does not prohibit DPS Staff from making changes to its internal processes provided that those changes do not materially alter performance results.

The issue of concern forming the basis for the complaint must be one within the utility's responsibility and control, including an action, practice, or conduct of the utility or its employees. Only "charged" complaints are included in the PSC Complaint Rate metric. A complaint will be considered charged when a customer, after first having contacted Niagara Mohawk to express dissatisfaction with an action, practice, or conduct of Niagara Mohawk, and having provided Niagara Mohawk a reasonable opportunity to address the matter, contacts the Commission to express dissatisfaction with such action, practice, or conduct. A complaint will not be charged if the contact with the Commission is for an opinion or inquiry. For the purposes of the PSC Complaint Rate metric, an "opinion" is an instance where a customer is contacting the Commission to voice a view on a particular issue or condition, such as a pending rate case, a change in rates or charges or the imposition of new rates or charges, or the level of executive compensation. Matters within the responsibility or control of an alternative service provider(s) will not be counted as a PSC Complaint against Niagara Mohawk under this measure.

#### The measure will be as follows:

Rate Interval	
(Complaints per 100,000	Negative Revenue Adjustment Linear
customers)	Within Ranges
<1.0	\$0
=1.0	\$1,117,500
>1.0 – 1.5	\$1,117,500 to \$7,830,000
>1.5	\$7,830,000

## 3.2 <u>Residential Transaction Satisfaction Index</u>

The Residential Transaction Satisfaction Index is calculated from monthly telephone survey results of a sample of residential customer transactions with the Company occurring in each month of the calendar year.

The survey population will include all customers of the Company in that month that had any one of the following transactions with the Company:

- 1) Connect
- 2) Disconnect
- 3) Electric Service Orders/Gas Service Orders
- 4) Service Orders
- 5) Budget
- 6) High Bill
- 7) Collections
- 8) Direct Debit

The parameters of the survey include the following criteria: a) only surveys where the respondent answered question No. 28 will be considered complete; and b) approximately 600 surveys must be completed each month.

Question No. 28 on the survey will be used to measure the Company's performance under this measure. The question asks "Overall, on a scale from 1 to 10, where 1 means dissatisfied and 10 means satisfied, how satisfied are you with the service provided by National Grid?" Satisfaction is measured by a score of 8 or higher on the question.

		• 11	1		C 11	
The	measure	XX/1	he	20	tall	UMG.

Residential Transaction	Negative Revenue Adjustment Linear
Satisfaction Index Interval	Within Ranges
>82.0	\$0
=82.0	\$577,500
<82.0 – 78.0	\$577,500 to \$3,990,000
<78.0	\$3,990,000

The Company agrees to provide Staff in advance with any proposed changes to the survey instrument (*e.g.*, additional questions/deleted questions/changes in questions) for Staff's review and comment, with a five business day turnaround for a response to the Company with any such comments or issues.

### 3.3 Small/Medium Commercial & Industrial (C&I) Transaction Satisfaction Index

The Small/Medium C&I Transaction Satisfaction Index is calculated from monthly telephone survey results of a sample of SC2 customer transactions with the Company occurring in each month of the calendar year.

The survey population will include all customers of the Company in that month that had any one of the following transactions with the Company:

- 1) Connect
- 2) Disconnect
- 3) Electric Service Orders/Gas Service Orders
- 4) Service Orders
- 5) Budget
- 6) High Bill
- 7) Collections
- 8) Direct Debit

The parameters of the survey include the following criteria: a) only surveys where the respondent answered question No. 28 will be considered complete; and b) approximately 120 surveys must be completed each month.

Question No. 28 on the survey will be used to measure the Company's performance under this measure. The question asks "Overall, on a scale from 1 to 10, where 1 means dissatisfied and 10 means satisfied, how satisfied are you with the service provided by National Grid?" Satisfaction is measured by a score of 8 or higher on the question.

Tl	:11	1	£_11	
The measure	: will	be as	1011	ows:

C&I Transaction Satisfaction	Negative Revenue Adjustment Linear
Index Interval	Within Ranges
>75.1	\$0
=75.1	\$577,500
<75.1 to 71.1	\$577,500 to \$3,990,000
<71.1	\$3,990,000

The Company agrees to provide Staff in advance with any proposed changes to the survey instrument (*e.g.*, additional questions/deleted questions/changes in questions) for Staff's review and comment, with a five business day turnaround for a response to the Company with any such comments or issues.

## 3.4 Percentage of Calls Answered within 30 Seconds

This measure is the percentage of all inbound Customer Service and Collection calls to Niagara Mohawk or its agents, regardless of location, that are answered within 30 seconds. The measure will exclude calls answered by any current or future Integrated Voice Response (IVR) applications, such as Niagara Mohawk's Customer Connection or OnCall applications. Monthly performance is reported in the quarterly reports submitted to Staff pursuant to Section 2.2.

Annual performance will be based on 12 months' data. For the year, the measure is the number of calls answered within 30 seconds as a percentage of the total calls answered during the year.

CY 2018 Cal	lls Answered Target		
% Calls Answered	Negative Revenue Adjustment Linear		
Within 30 Seconds	Within Ranges		
>78.0	\$0		
=78.0	\$577,500

=79.6	\$577,500				
<79.6 – 73.6	\$577,500 to \$3,990,000				
<73.6	\$3,990,000				

### 4.0 ELECTRIC RELIABILITY

A total pre-tax potential negative revenue adjustment of \$14 million per year associated with Electric Reliability shall be allocated across the following four measures, which are described in detail in the following subsections:

- 1) System Average Interruption Frequency Index
- 2) Customer Average Interruption Duration Index
- 3) Estimating
- 4) Inspection and Maintenance ("I&M") Program

### 4.1 System Average Interruption Frequency Index ("SAIFI")

The SAIFI metric will be based on data excluding major storms and other excludable events set forth under Section 2.3.

Beginning January 1, 2018, if the Company's SAIFI performance for the calendar year exceeds 1.08, the Company will incur a \$4 million negative revenue adjustment.

## 4.2 Customer Average Interruption Duration Index ("CAIDI")

The CAIDI metric will be based on data excluding major storms and other excludable events set forth under Section 2.3.

Beginning January 1, 2018, if the Company's CAIDI performance for the calendar year exceeds 2.10, the Company will incur a \$4 million negative revenue adjustment.

## 4.3 Estimating

For each calendar year beginning January 1, 2018, the Company will implement an estimating metric consisting of: (i) a project-specific metric and (ii) a portfolio-based metric.

### Project Metric

In each calendar year, for each individual distribution or sub-transmission capital project with an initial design estimate greater than \$100,000, the Company will compare

the final engineering estimate of each such project with the total actual costs for the project. The Company will be subject to up to a \$3 million negative revenue adjustment as indicated in the table below based on the percentage of individual projects whose actual costs are within plus or minus 25 percent of their respective final engineering estimates.

Percent of Projects with Final Costs within	Negative Revenue Adjustment
+/-25% of Final Engineering Estimate	
≥ 80%	\$0
$\geq$ 70% but < 80%	\$1 million
$\geq$ 60% but < 70%	\$2 million
<60%	\$3 million

### Portfolio Metric

In each calendar year, the Company will compare the sum of all final project actual costs against the sum of all associated final engineering estimates. If the sum of actual project costs differs from the sum of associated project final engineering estimates by more than plus or minus 15 percent, the Company will be subject to a \$1 million negative revenue adjustment.

Projects not subject to the Project Metric and not included in the Portfolio Metric include: (1) Distributed Generation ("DG"), (2) Underground Residential Development ("URD"), (3) Programs, and (4) Substations. For calculation purposes of both metrics, the Company may normalize overheads to calculate "effective rates" for overheads to be applied to the final engineering estimate of a project at the end of the project lifecycle for comparison to actual project costs. The Company also may request exceptions for discrete projects where there are scope changes or significant circumstances (e.g., external stakeholder driven changes (e.g., NYSDOT Project); in-ground conditions; et cetera).

### 4.4 I&M Program

The Company is subject to a negative revenue adjustment of \$1 million if it fails to repair at least 85 percent of Level II deficiencies (as defined in the Safety Orders in Case 04-M-0159 ("Safety Orders")) that have a repair due date within the respective calendar year within the time period allowed for such repairs under the Safety Orders (*i.e.*, one year).

The Company is subject to an additional negative revenue adjustment of \$1 million if it fails to repair at least 75 percent of Level III deficiencies (as defined in the Safety Orders) that have a repair due date within the respective calendar year within the time period allowed for such repairs under the Safety Orders (*i.e.*, three years). The Company will meet with Staff periodically to discuss I&M program repair performance.

### 5.0 ACCOUNTING MECHANISM

With the exception of negative revenue adjustments that are passed back to customers under the next paragraph, Niagara Mohawk will include in the deferral account any negative revenue adjustments associated with failure to meet the Service Quality performance targets set forth above.

Whenever the performance report filed under Section 2.2, above, shows that total negative revenue adjustments of \$7.5 million or more have accrued in the prior year, Niagara Mohawk will reflect the entire amount as a credit to the customer charge of each of its electric and gas customers using the following methodology. The portion of the credit associated with negative revenue adjustments relating to electric reliability will be determined by dividing the amount of electric reliability negative revenue adjustment accrued in the prior year by the number of Niagara Mohawk's total electric bills expected for the following July. The portion of the credit associated with negative revenue adjustments relating to customer service will be determined by dividing the amount of customer service negative revenue adjustment accrued in the prior year by the number of electric and gas bills expected for the following July. The credit will be implemented in July billings, will be accompanied by a bill insert explaining the credit, and will be fully reconciled through the deferral mechanism.

For deferral or refund purposes, the negative revenue adjustments will be accounted for as follows:

Electric Gas
See Attachment 1, Table 1
See Attachment 1, Table 2 (electric only)

2) Electric Reliability Measures

**Customer Service Measures** 

2) Electric Reliability Measures

# 6.0 <u>COMMISSION AUTHORITY</u>

1)

The Signatory Parties explicitly recognize that the Commission has the authority to modify the Service Quality Assurance Program for prospective application at any time, if, in its opinion, acceptable Service Quality is not maintained.

# Corporate Structure, Affiliate Rules, and Miscellaneous Corporate Provisions

### 1.0 Corporate Structure and Affiliate Rules

### 1.1 <u>Definitions used in this document</u>

UK HoldCo – the top-level holding company in the National Grid group. This is National Grid plc or its successor as the ultimate parent company.

US HoldCo – the immediate parent and holding company for National Grid's US Utility operations. This is National Grid USA or its successor.

As used in this Section 1.0, "HoldCo" refers to both UK HoldCo and US HoldCo. Where explicit reference to one of the HoldCos is required, the term "UK HoldCo" or "US HoldCo" will be used.

RegCo or Niagara Mohawk – means Niagara Mohawk Power Corporation or its successor. Niagara Mohawk Power Corporation is a wholly owned indirect subsidiary of US HoldCo and carries on regulated transmission and electric and gas distribution services.

ServiceCo – means National Grid USA Service Company, Inc. and National Grid Engineering & Survey Inc., or any successor(s) thereto, which provide a variety of traditional corporate and administrative services.

Unregulated Competitive Energy Affiliate(s) – means any of US HoldCo's current or future unregulated affiliates engaged in competitive energy markets in New York State, including but not limited to exploration and/or production, generation, distributed energy resources ("DER"), retail energy services, or HVAC services.

Unregulated Affiliate(s) – means any of US HoldCo's current or future affiliates engaged in competitive retail services that Niagara Mohawk contracts for or provides.

National Grid Other Affiliates – means affiliates of HoldCo, including affiliates of Niagara Mohawk, but excluding Unregulated Competitive Energy Affiliates and Unregulated Affiliates.

### 1.2 Rules Governing Affiliate Transactions

### 1.2.1 Separation and Location

RegCo, HoldCo, Unregulated Competitive Energy Affiliates, Unregulated Affiliates, and National Grid Other Affiliates will each be operated as separate entities and will maintain separate books and records of account. RegCo, HoldCo, ServiceCo, and National Grid Other Affiliates may occupy the same building. RegCo may also share premises with National Grid's affiliates engaged in regulated gas and/or electric transmission and/or distribution operations if

such sharing provides for efficiencies in occupancy and use of resources. RegCo may not share a building with any Unregulated Competitive Energy Affiliates or Unregulated Affiliates.

### 1.2.2 <u>Board of Directors</u>

A majority of the RegCo Board of Directors will be Eligible Directors. An Eligible Director is any individual who is not (i) an officer or director of HoldCo or (ii) an officer or director of any Unregulated Competitive Energy Affiliate or Unregulated Affiliate. No member of the RegCo Board of Directors will also be an employee, officer, or director of any Unregulated Competitive Energy Affiliate or Unregulated Affiliate. No member of the RegCo Board of Directors will also be an employee, officer, or director of any unaffiliated competitive energy firm engaged in exploration and/or production, generation, retail energy services or HVAC services in RegCo's service territory. No member of the RegCo Board of Directors will also be an employee, officer, or director of any unaffiliated firm engaged in competitive retail services that Niagara Mohawk contracts for or provides.

# 1.2.3 <u>Accounting Issues and Dividend Limitations</u>

### **1.2.3.1** Dividend Payments

Provided that the Dividend Restrictions set forth in Section 2 of the Financial Protections adopted in the Commission's March 28, 2008 Order in Cases 01-M-0075 and 06-M-0878 do not apply and subject to compliance with Section 1.2.3.2 below, Niagara Mohawk will be permitted to pay dividends in any year up to any amount permitted under applicable law.

### **1.2.3.2** Debt Limit

For purposes of this Section 1.2.3.2, "Average Total Debt" is defined as an amount equal to (i) long-term debt, plus (ii) notes payable (including current maturities of long-term debt) appearing on Niagara Mohawk's consolidated balance sheet. "Average Total Capital" is defined as the sum of (i) Average Total Debt, (ii) common shareholder equity (excluding goodwill), and (iii) preferred stock. It is expected that, for any six month period ending at the end of a quarter, Niagara Mohawk's Average Total Debt ratio will not exceed 55 percent of its Average Total Capital, excluding goodwill.

If the Company's Average Total Debt ratio does not exceed 55 percent for the most recent six or three month period ending at the end of a quarter, there will be no dividend restrictions. If the Company's Average Total Debt ratio exceeds 55 percent for both the most recent three and six month periods, but does not exceed 57 percent in the most recent three or six month period, then Niagara Mohawk will be permitted to pay dividends up to an amount equal to but no greater than 50 percent of its net income for the previous twelve months ending at the end of a quarter until its Average Total Debt ratio for the most recent six month period ending at the end of a quarter is less than or equal to 55 percent. In addition, absent a Commission order to the contrary, if during both the most recent six and three month period ending at the end of a quarter, Niagara Mohawk's Average Total Debt ratio exceeds 57 percent, then the Company will not pay further

dividends until the Average Total Debt ratio is reduced to 55 percent or less over the most recent six months ending at the end of a quarter.

### 1.2.3.3 Bond Ratings and the Cost of Debt

If the bond rating of Niagara Mohawk falls below BBB- (Standard & Poor's) or Baa3 (Moody's), then the price of any long-term debt issued by Niagara Mohawk during the period of such reduced credit rating will be deemed, for the purpose of establishing revised electric or gas base delivery rates, to be the market price Niagara Mohawk would have incurred for issuance of the debt had the debt been issued by a BBB- (Standard & Poor's) or Baa3 (Moody's) utility at the same issue date, and any resulting difference in interest expense will be disallowed for ratemaking purposes. Niagara Mohawk's earnings sharing reports will reflect the actual debt rates outstanding for Niagara Mohawk. This provision completely supersedes Section 3 of the Financial Protections adopted in the Commission's March 28, 2008 Order in Cases 01-M-0075 and 06-M-0878.

# 1.2.3.4 <u>Debt and Equity Components Used for Ratemaking Purposes</u>

The debt and equity components used to establish Niagara Mohawk's rates will be established in individual rate proceedings.

### **1.2.3.5** Additional Financial Protections

Except for those noted as superseded herein, the Commission's financial protections in the terms and conditions of its (i) May 15, 2009 and July 29, 2009 Orders in Case 08-M-1352 and (ii) March 28, 2008 and May 29, 2008 Orders in Cases 01-M-0075 and 06-M-0878 continue in full force and effect.

### 1.2.4 Cost Allocation and Audit

**1.2.4.1** Appropriate cost allocation procedures will be followed by HoldCo and its affiliates to assure the proper allocation on a fully distributed basis, to HoldCo, RegCo, or other affiliates of the costs of any HoldCo personnel, property or services used by RegCo or other affiliates of HoldCo.

**1.2.4.2** Any future revisions to cost allocation methodologies of ServiceCo will be filed with the Secretary of the Commission.

1.2.4.3 The FERC carries out regular audits of ServiceCo. Such audits include examination of authorized cost allocation calculations and a review of internal audit policies, procedures and reports. DPS Staff will be invited to participate in such audits, in order to receive assurance that applicable transactions and/or allocations are being carried out in a compliant fashion. DPS Staff will also receive copies of all reports issued to the Company by the SEC or FERC as a result of such audits.

**1.2.4.4** The Company will meet annually with DPS Staff to review all aspects of cost allocations and their application.

1.2.4.5 If at any time the Company becomes aware of events likely to cause a reconsideration of or material change to cost allocations, it will advise Staff and arrange a meeting in order to consider those issues at that time.

## 1.2.5 Transfer of Assets from or to RegCo

Transfers of assets (or rights to use such assets) from RegCo to Unregulated Competitive Energy Affiliate(s) and Unregulated Affiliate(s) will be priced at the higher of book value or fair market value and will be subject to Commission approval, except as otherwise provided in Mutual Assistance Agreements. Transfer of assets (or rights to use such assets) from Unregulated Competitive Energy Affiliate(s) and Unregulated Affiliate(s) to RegCo will be priced at the lower of cost or fair market value.

### 1.2.6 Transfer of Services

The provision of corporate services will be subject to written contracts that, as applicable, identify the personnel, assets, and services that will be provided. The services will be provided on a fully loaded cost basis. The RegCo, HoldCo, ServiceCo, Unregulated Competitive Energy Affiliates, Unregulated Affiliates and National Grid Other Affiliates may be covered by common property/casualty and other business insurance policies. The costs of such policies will be allocated among the RegCo, HoldCo, ServiceCo, Unregulated Competitive Affiliates, Unregulated Affiliates and National Grid Other Affiliates in an equitable manner.

### 1.3 Human Resources

### 1.3.1 Separation of Employees and Officers

RegCo will have separate employees from Unregulated Affiliates and Unregulated Competitive Energy Affiliates. Operating officers (*i.e.*, those officers providing other than corporate services) of RegCo will not be operating officers of any of the Unregulated Affiliates and Unregulated Competitive Energy Affiliates. An officer of HoldCo may not be an officer of both RegCo and an Unregulated Affiliate or Unregulated Competitive Energy Affiliate. No RegCo employee or officer will also be an employee, officer or director of any unaffiliated competitive energy firm engaged in the exploration or production, generation, retail energy services or HVAC services in RegCo's service territory. No RegCo employee or officer will also be an employee, officer or director of any unaffiliated firm engaged in competitive retail services that Niagara Mohawk contracts for or provides.

### 1.3.2 Employee Transfers

**1.3.2.1** If a RegCo employee accepts a position with an Unregulated Affiliate or Unregulated Competitive Energy Affiliate, he or she will be required to resign from RegCo unless there is a conflict with the collective bargaining agreement in which

case the collective bargaining agreement would control. Any such employee will be prohibited from copying or taking any non-public customer or competitively sensitive market information from RegCo.

1.3.2.2 Employees may be transferred from RegCo to an Unregulated Affiliate or Unregulated Competitive Energy Affiliate. Transferred employees may not be reemployed by RegCo for a minimum of one year after transfer. Employees returning to RegCo may not be transferred again to an Unregulated Affiliate or Unregulated Competitive Energy Affiliate for a minimum of one year. RegCo will file annual reports to the Commission showing transfers between RegCo and Unregulated Affiliates or Unregulated Competitive Energy Affiliates by employee name, former company, former position, new company, new position, and salary or annualized base compensation. There will not be any temporary employee transfers between RegCo or US HoldCo and any Unregulated Affiliates.

**1.3.2.3** Except as provided in this Section 1.3.2, employees also may be transferred from RegCo to HoldCo or any National Grid Other Affiliate (and viceversa) without restriction.

### 1.3.3 Employee Loans in an Emergency

The foregoing provisions in no way restrict any affiliate from loaning employees to RegCo to respond to an emergency that threatens the safety or reliability of service to customers.

# 1.3.4 <u>Compensation for Transfers to Other than a Transmission or Distribution Company</u>

A one time employee transfer credit equal to 25 percent of the employee's annual salary will be applied to the deferral account for each transfer from RegCo to any Unregulated Competitive Energy Affiliate.

### 1.3.5 <u>Employee Compensation and Benefits</u>

The compensation of RegCo employees and officers may not be tied to the financial and/or stock performance of any Unregulated Competitive Energy Affiliate or National Grid Other Affiliate, but may be tied to the financial performance of HoldCo and stock performance of UK HoldCo.

Employees of HoldCo, RegCo, Unregulated Affiliates, Unregulated Competitive Energy Affiliates and National Grid Other Affiliates may participate in common pension and benefit plans.

### 1.3.6 <u>Legal Representation</u>

RegCo will have its own senior counsel, who shall not be shared with any Unregulated Affiliate or Unregulated Competitive Energy Affiliate and whose primary responsibility is RegCo. The same law firm may represent RegCo and any affiliate on any matter other than transactions between RegCo and that affiliate. On any matter not involving such an intracorporate

transaction in which the interests of RegCo may be adverse to the interests of an affiliate, RegCo will take appropriate steps to ensure that RegCo's interests are vigorously and independently protected (such steps, by way of example and not limitation, could include having separate attorneys if a single law firm is used and creating an ethical wall as an information barrier between such attorneys to avoid any potential conflict of interest). With respect to all matters handled by outside counsel, HoldCo and its affiliates will instruct outside counsel to take all reasonable steps to ensure that non-public customer and competitively sensitive information in the possession of RegCo is not communicated to an affiliate.

### 1.4 Access to Books, Records and Reports

DPS Staff will have full access, on reasonable notice, and subject to resolution of confidentiality and privilege (e.g., attorney client, attorney work product, self critical) issues, to: 1) the books and records of UK HoldCo and of the US HoldCo and its majority owned subsidiaries; and 2) the books and records of all other HoldCo subsidiaries or affiliates, in English, to the extent necessary to audit and monitor any transactions that have occurred between the RegCo and such subsidiaries or affiliates. Such access to books and records will be provided at the Company's Syracuse headquarters, provided however, that if such access is not practicable, access will be provided at whatever reasonable location the Company deems appropriate at the Company's expense.

DPS Staff currently receive copies of a number of internal utility documents. It is the Company's intention in the future to continue to provide information with a similar scope and content to that currently provided. However, the Company may wish to modify the form and/or content of its internal documents from time to time. In such cases the Company will discuss and agree with Staff the ongoing information requirements and the most appropriate way for them to be met in the future.

### 1.5 Reporting

Annually, RegCo will file reports on: transfers of assets, cost allocations, employee transfers and employees in common benefit plans. Quarterly, US HoldCo will file a list of all National Grid's SEC filings with the Commission.

### 1.6 Standards of Competitive Conduct

The following standards of competitive conduct shall govern RegCo's relationship with any Unregulated Competitive Energy Affiliates, Unregulated Affiliates, or National Grid Other Affiliates, in addition to any already covered by the Commission's rules governing Uniform Business Practices.

### 1.6.1 Use of Corporate Name and Royalties

There are no restrictions on any affiliate using the same name, trade names, trademarks, service names, service marks or a derivative of a name of the HoldCo or RegCo, or in identifying itself as being affiliated with the HoldCo or RegCo. However, no non-National Grid company will be

allowed to use the same name, trade names, trademarks, service names, service marks, or a derivative of a name of RegCo in any manner. Further, no non-National Grid company will be allowed to use the same name, trade names, trademarks, service names, service marks, or a derivative of a name of HoldCo in New York State for a period exceeding six months, provided that such use will be limited to the situation where National Grid has sold the relevant business (or the assets of the business) and restricted to (i) use of the National Grid logo during the pendency of the transition to new ownership (e.g., vehicle and facility signage) and (ii) educating customers about the sales transaction and the impacts on customers. During that six month period, DPS Staff will be given the opportunity to preview any communication using National Grid's name or logo that is to be sent from a non-National Grid company to National Grid's utility customers in New York. DPS Staff may, in the exercise of reasonable discretion, reject any customer communication it deems not in compliance with this section by providing National Grid with written notice of its specific objections. A communication will be deemed acceptable unless DPS Staff objects in a writing received by the Company within five business days of Staff's receipt of such communication from National Grid. DPS Staff and the Company will work collaboratively to resolve any disagreement as to the content of the communication.

### 1.6.2 Sales Leads

RegCo will not provide sales leads involving customers in its service territory to any affiliate or non-affiliated companies without the advanced permission of the Commission.

### 1.6.3 <u>Customer Inquiries</u>

If a customer requests information about securing any service or product offered by energy services companies ("ESCos"), the RegCo may provide a list of all known ESCos operating in the area, which may include its Unregulated Competitive Energy Affiliate(s).

### 1.6.4 Customer Information

Except for purposes of complying with applicable statutes, regulations, and orders, RegCo will not disclose to any Unregulated Competitive Energy Affiliate(s), Unregulated Affiliate(s), or nonaffiliates any customer information about its electric and gas businesses that may provide a competitive advantage in the electric or gas markets. Customer information includes, but is not limited to, confidential information that RegCo receives from a customer, prospective customer, or marketer that is not available from sources other than RegCo, unless RegCo makes such information available to all competitors on an equal basis.

RegCo will restrict access to customer information to only those employees of RegCo, or affiliates or non-affiliates whose functions require that they have access to such information. Such employees will be instructed to maintain the confidentiality of such information.

### 1.6.5 No Advantage Gained by Dealing with Affiliate

**1.6.5.1** RegCo will refrain from giving any appearance that RegCo speaks on behalf of an affiliate or that an affiliate, other than ServiceCo, speaks on behalf

of the RegCo. RegCo will not participate in any joint promotion or marketing with its Unregulated Competitive Energy Affiliates or Unregulated Affiliates.

- 1.6.5.2 RegCo will not represent to any customer, supplier, or third party that an advantage may accrue to such customer, supplier, or third party in the use of the RegCos services as a result of that customer, supplier, or third party dealing with any affiliate.
- 1.6.5.3 RegCo's affiliates will not represent to any customer, supplier, or third party that an advantage may accrue to such customer, supplier, or third party in the use of the RegCo's services as a result of that customer, supplier, or third party dealing with that affiliate.
- **1.6.5.4** RegCo will not cross-subsidize any Unregulated Competitive Energy Affiliate(s) or Unregulated Affiliate(s).
- 1.6.5.5 Release of proprietary customer information relating to customers within the RegCo's service territory will be subject to prior authorization by the customer and subject to the customer's direction regarding the person(s) to whom such information may be released. If a customer authorizes the release of information to a RegCo affiliate and one or more of the affiliate's competitors, RegCo will make that information available to the affiliate and such competitors on an equal basis.
- 1.6.5.6 RegCo will not disclose to its affiliates any customer or marketer information relative to its service territory that it receives from a marketer, customer, or potential customer that is not available from sources other than RegCo, unless it discloses such information to its affiliates' competitors contemporaneously on an equal basis to the extent practicable.
- 1.6.5.7 RegCo will use competitive bidding practices or standard offers to purchase DER until such time as the Commission determines otherwise. If a RegCo affiliate participates in a competitive bidding process for DER procurement, RegCo will engage an independent party to monitor the DER procurement selection process.
- **1.6.5.8** These provisions do not restrict the use of the name of HoldCo or RegCo as set forth in Section 1.6.1.

# 1.6.6 No Rate Discrimination

All similarly situated customers, including ESCos and customers of ESCos, whether affiliated or unaffiliated, will pay the same rates for the RegCo's utility services, including those applicable to interconnections and dispatch. If there is discretion in the application of any tariff provision, RegCo must not offer its affiliate more favorable terms and conditions than it has offered to all similarly situated competitors of the affiliate. Should RegCo provide to an ESCo or a customer of an ESCo, whether affiliated or unaffiliated, a delivery, billing, metering, or other service set forth in its tariff or associated operating procedure, at a discounted or negotiated rate or pursuant

to a special arrangement, RegCo will expeditiously post on its website the information that the Commission requires a utility to file in association with providing a discounted or negotiated rate or special arrangement, subject to the Commission's trade secret rules, if applicable, in the same manner and within the same time period for affiliates and non-affiliates.

### 1.7 <u>Annual Meeting</u>

Senior management of RegCo and US HoldCo will meet annually with senior Commission Staff to discuss the Company's plans related to capital attraction and financial performance.

### 1.8 Training and Certification/Adherence to Standards

- **1.8.1** US HoldCo and RegCo will conduct training on these principles for officers, directors, and senior managers. On an annual basis, designated officers should provide certification to the Commission of the Company's adherence to these standards.
- **1.8.2** Additionally, all RegCo employees will receive annual training on Section 1.6, Standards of Competitive Conduct, to include the types of information that may or may not be shared and RegCo policies and procedures restricting information sharing, with verification that such training has been completed.
- **1.8.3** If the Commission at any time makes a finding that it believes that compliance with these provisions has been lacking the Commission can order RegCo to pay for an independent auditor review of all applicable transactions and/or allocations.

# 1.9 <u>Commercialization of Products and Technologies Developed as a</u> Result of Research and Development

The Company's affiliates may invest in commercialization of R&D products and technologies developed by RegCo consistent with its affiliate rules. If an affiliate elects to invest, it will fairly compensate RegCo, assume the business risk(s) and will be entitled to the benefits associated with that investment.

### 1.10 Dispute Resolution

If any competitor, whether an affiliated or non-affiliated company, or customer of RegCo, believes that RegCo has acted in violation of Section 1.2, Rules Governing Affiliate Transactions, and/or Section 1.6, Standards of Competitive Conduct, such competitor or customer may provide RegCo with a written notice of the complaint. RegCo will respond to any such complaint within twenty (20) business days after receipt of the complaint. Within fifteen (15) business days after responding to such complaint, the parties will meet in an attempt to resolve the matter informally. If the parties do not meet or are not successful in resolving the matter informally, then the complainant may refer the matter to the Commission for disposition within fifteen (15) business days of filing such response, or in the event the parties meet, within fifteen (15) business days of such meeting. The Commission will maintain continuing jurisdiction over Section 1.2, Rules Governing Affiliate Transactions, and Section 1.6, Standards

of Competitive Conduct. This dispute resolution process will also be posted on RegCo's website.

### 2.0 <u>Miscellaneous Corporate Provisions</u>

### 2.1 <u>Monthly Deferral Submittal</u>

A monthly update of the deferral account balances for Niagara Mohawk's deferral accounts will be provided to on-site Staff in Syracuse, New York as close as possible to the 15th day of the following month, but in any event no later than the 21st day of the month following closing. The monthly updates will contain page referenced summaries, and will include adequate and legible backup support; the pages will be numbered, and the name and telephone number of the Company contact person responsible for each entry should be provided.

# 2.2 Reports

- **2.2.1** Niagara Mohawk will provide designated audit Staff with monthly general ledger reports, monthly financial report(s), and journal entries, as close as possible to the 15th day of the following month, but in any event no later than the 21st day of the month following closing.
- **2.2.2** Niagara Mohawk will provide designated audit Staff other reports on a timely basis. These reports include: Board of Director minutes, Commodity Adjustment Clause ("CAC") monthly filing, Transmission Revenue Adjustment Clause ("TRAC") monthly filing, PSC filings made by the Company, SEC filings, monthly budget variance reports, and financial performance reports. Supporting documentation for the filed CAC and TRAC amounts will also be provided. Niagara Mohawk and Staff will meet semiannually in May and November to review the population of reports being provided and to modify the reports in a manner that may be agreed upon. Niagara Mohawk agrees to provide a weekly IR status log to designated audit Staff.

# 2.3 PSC Annual Report

Niagara Mohawk is authorized to delay its filing of its PSC Annual Report to June 1 of each calendar year. <sup>1</sup>

### 2.4 Timely Correction of Errors and Adjustments

When the Company finds an error on the Company's books of account regulated by the Commission or agrees to an adjustment proposed by Staff, a journal entry correcting the error or making the adjustment (the "Correction") will be made. Where practicable, the journal entry will be made during the month of the determination that the Correction was required. To the extent that a journal entry cannot be made before the close of the month in which the Correction

<sup>&</sup>lt;sup>1</sup> To the extent available, the Company agrees to provide DPS Staff unaudited financial information after April 30.

was acknowledged and the Correction affects an entry in an account included in the Company's monthly deferral submittal, the Company will note the pending journal entry in that monthly submittal, together with a brief description of the Correction, the date the Company acknowledged the Correction and, if possible, the amount of the Correction. In any event, the Company will make a journal entry reflecting the Correction within three months.

## 2.5 Adjustments to Billing Loading Factors

Niagara Mohawk will adjust third-party job order billings loading factors no more than twice each year (in April and September), provided however, that, in addition, Niagara Mohawk may adjust such loading factors at any other time in the event there is a change in such loading factor (whether positive or negative) of greater than 20 percent. The April adjustment will also include any adjustment necessary to reconcile the loading factors used during the prior period to actual amounts. Further, the Company will follow the same method for capitalizing fringe benefits into its construction costs, subject to Section 1 of Appendix 9, Electric and Gas Pension and OPEB Expense Provisions.

# 2.6 <u>Internal Audits of Deferral Accounts</u>

For each fiscal year, Niagara Mohawk will conduct internal audits on at least two different deferral accounts until otherwise ordered by the Commission. When Niagara Mohawk develops its internal audit plan, it will advise on-site Staff which deferral accounts will be audited in the upcoming fiscal year. If Niagara Mohawk proposes to audit the same deferral account in two consecutive years, Niagara Mohawk will discuss this with Staff and advise Staff of the basis for the consecutive audits. Prior to conducting each internal audit of a deferral account, Niagara Mohawk's internal audit department will interview designated audit Staff to identify potential areas of concern with respect to the eligibility of costs or revenues in that account for deferral.

### 2.7 **Journal Entry Support**

Niagara Mohawk will include with each journal entry provided to designated audit Staff a summary explanation of the purpose of the journal entry and documentation supporting and, if needed, detailing the calculations of the amounts charged to the various accounts shown.

### 2.8 Goodwill Not Recovered in Jurisdictional Rates

Niagara Mohawk will not recover any portion of the \$1.215 billion in goodwill recorded in connection with the acquisition of Niagara Mohawk by National Grid, as shown in Attachment 8 of the Stipulation of the Parties dated March 27, 2007 in Case 01-M-0075 et al., in any rates regulated by the Commission during or after the period covered by the Merger Joint Proposal. In addition, no portion of such goodwill will be included in the equity component of Niagara Mohawk's capitalization for purposes of calculating Niagara Mohawk's return, future revenue requirements or any other component of such rates after the period covered by the Merger Joint Proposal.

### 2.9 Resolution of Nine Mile Sale Compliance (Case No. 01-E-0011)

With the exception of accounting resolved by Sections 7.1 - 7.4 of the Stipulation of the Parties, dated March 27, 2007 in Case 01-M-0075 *et al.*, nuclear-related costs or receipts that were unknown or unknowable at the time of the sale of the nuclear assets (for example, the results of sales tax audits, NEIL refunds, etc.) will be governed by precedent established in Case 01-E-0011 or Case No. 01-M-0075. Any adjustments resulting from any such historic or prospective costs or receipts shall be subject to audit by DPS Staff.

### 2.10 Operations in New York

Niagara Mohawk will notify the Commission prior to implementing any significant changes to the location(s) and/or means of delivery of services, including emergency response, associated with its customer service functions. Further, Niagara Mohawk's corporate headquarters will be maintained in Syracuse, New York. Niagara Mohawk also agrees that senior management responsible for day-to-day electric and gas operations in New York will maintain offices in New York State. To achieve customer service and reliability objectives, Niagara Mohawk agrees to maintain a level of workforce in New York that, in its view, is sufficient to achieve these objectives and to utilize all other necessary resources, including but not limited to, internal and external human resources, and investments in plant and technology.
