- (1) The SC-3 facility revenue is from a single SC-3 contract customer.
- (2) The SC-4 basic service charges are included in "facility revenue" above and elsewhere, for convenience of Rate Year 2ation.
- (3) The total current revenue reflects the proper T&D contract rates, as compared to Appendix 2, Schedule 1.

### The Group Method for Allocation of NYISO Weather Normalization as Applied to ICAP Tag Development

The System Peak Factor reconciles the sum of calculated class coincident peaks to the NYISO forecast peak for the capability period. The System Peak Factor is one component of the ICAP tag development that the Company performs annually. Components of the System Peak Factor include load growth, losses, and weather normalization.

Weather normalization is currently allocated by the Company to all service classes in equal proportions based on their coincident peak load. To address the concern that all service classes are not equally weather sensitive and, therefore, should not receive an equal share of the weather normalization quantity as happens in the current process, the Company will revise the methodology to calculate the System Peak Factor and use the Group Method.

The Group Method assigns the service classes into one of three groups depending upon their level of weather sensitivity as a class. The groups for this purpose were determined by weather sensitivity analyses of historical class peak loads and are defined as follows:

Group 1	Most weather sensitive	SC-1
		SC-1C
		SC-2 non-demand
		SC-2 Demand
		SC3A secondary
Group 2	Moderate weather sensitive	SC-3 secondary
		SC-3 primary
		SC-3 MHP secondary
		SC-3 MHP primary
		SC-3 MHP sub-transmission
Group 3	Least weather sensitive	SC-3 sub-transmission
		SC-3 transmission
		SC-3 MHP transmission
		SC-3A primary
		SC-3A sub-transmission
		SC-3A transmission

MHP indicates customers billed hourly for commodity, whether mandatory or voluntary hourly priced customer. All SC-3A customers are also hourly priced customers.

In the Group Method, allocation of the weather normalization quantities will vary among the Groups. Weather normalization quantities up to an amount equal to 1% of Corporate Load in

Case 17-E-0238 Appendix 2 Schedule 13 Page 2 of 2

the coincident NYISO annual peak hour will be allocated proportionally among all rate classes (Groups 1, 2 and 3). Normalization quantities between 1-3% of Corporate Load in the NYISO Annual Peak hour will be proportionally allocated to Groups 1 & 2. Normalization quantities above 3% of Corporate Load in the coincident NYISO annual peak hour will be shared proportionally only among Group 1.

The Group Method will be deployed for the development of ICAP tags effective with the May 1, 2018 capability period. The Group Method defined above will continue to be used until such time that a service class's weather sensitivity is demonstrably different from the historic period analyzed above.

### Niagara Mohawk Power Corporation d/b/a National Grid Merchant Function Charge

Illustrative Example - Calculation of Gas Supply Procurement Charge for September 2018 and Reconciliation Applicable to Customers taking Sales Service under Service Classification Nos. 1, 2, 3, 12 and 13

1) Set Gas Procurement and Commodity-Related Sales Promotion Expenses for:

September 1, 2018 - August 31, 2019

a) Allowed Expenses / 1 \$ 1,391,056 b) Forecasted SC 1, 2, 3, 12 and 13 Sales 561,905,472 Therms c) Unit Rate effective September 1, 2018 - August 31, 2019 = (1a/1b) 0.00248 \$/Therm

2) Perform Annual Reconciliation for September 1, 2018 - August 31, 2019 :

January 1, 2020 - December 31, 2020

a) Actual Recoveries 2,200,000 b) Allowed Expense 1,391,056 c) Resulting Over Recovery (-) / Under Recovery (+) = (2b - 2a) (\$808,944) d) Forecasted SC 1, 2, 3, 12 and 13 Sales 573,694,416 Therms e) Annual Reconciliation effective January 1, 2020 - December 31, 2020 = (2c / 2d) -0.00141 \$/Therm

(surcharges/credits shall include simple interest at the Commission's other customer capital rate)

1: Schedule 6.2, Page 2

Niagara Mohawk Power Corporation d/b/a National Grid Merchant Function Charge Illustrative Example - Calculation of Commodity Related Credit and Collection Charge for September 1, 2018 Applicable to Customers taking Sales Service under Service Classification Nos. 1, 2, 3, 12 and 13 and to ESCOs Participating in the POR Program that serve Customers taking Transportation Service under Service Classification Nos. 1MB, 2MB, 12 DB, 12MB, 13MB, 5, 7 and 8

			Rate Brea	akdown

<sup>\* -</sup> The accounts identified as "Discontinued" will be discontinued as of the Effective Date. The discontinuance of these accounts is not intended to preclude the Company from returning to or recovering from customers the balances as of March 31, 2018 plus any applicable carrying charges.

<sup>&</sup>lt;sup>1</sup>The program is closed to new customers and is gradually being phased out for existing customers. As set forth in Section 13.1 of the Joint Proposal, the Company will continue to defer costs associated with the Affordability program until existing customers complete, default, or voluntarily remove themselves from the program.

- Notes and Assumptions:

  1) Monthly cash flow percentages in Rate Allowance based on two year average of 2015 and 2016 percentages

  2) Allocate fiscal year total capex forecast based on monthly cash flow percentages

  3) Close monthly capital expenditures to plant based on project's associated closing rule utilized in rate allowance

  If displaced project was a transmission major project with a specific in service date utilized in rate allowance, use the specific in service dates on page 3

  4) Depreciation is based on the approved composite depreciation rate for the associated project type

  5) Utilizes pre-tax WACC by fiscal year per filing with a 9,00% ROE.

  6) The FY 2019 balances will be rolled forward to FY 2020 and FY 2021, calculating a return on the net plant investment and associated depreciation expense.

  7) The FY 2020 balances will be rolled forward to FY 2021, calculating a return on the net plant investment and associated depreciation expense.

## Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239 Deferral of Electric Major Storm Expense (\$000's)

### **ELECTRIC EXAMPLE**

		Electric Rate Year One		_	Electric Year Two	Electric Year Three
1	Actual Expense	\$	25,716	\$	25,000	\$ 21,000
2	Rate Allowance	\$	23,000	\$	23,000	\$ 23,000
3	Amount Deferred to (from) customers	\$	(2,716)	\$	(2,000)	\$ 2,000

- 1 Hypothetical storm costs (see Appendix 14, Attachment A)
- 2 Forecasted Rate Year expense. See Joint Proposal, Appendix 1, Schedule 1, Section 10.1.15 and Appendix 14
- 3 Line 2 less Line 1

## Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239 Deferral of Electric Site Investigation and Remediation (SIR) Expense (\$000's)

#### **ELECTRIC EXAMPLE**

		Electric Year One	Electric Year Two	Electric Year Three
1	Actual Expense	\$ 28,000	\$ 26,000	\$ 30,000
2	Rate Allowance	\$ 27,321	\$ 27,321	\$ 27,321
3	Amount Deferred to (from) customers	\$ (679)	\$ 1,321	\$ (2,679)

- 1 Hypothetical Actual Costs
- 2 Forecasted Rate Year expense. See Joint Proposal Section 10.1.6
- 3 Line 2 less Line 1

Case 17-E-0238 & 17-G-0239 Appendix 5 Schedule 11 Page 2 of 2

#### Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239 General Principles of the SIR Deferrral Mechanism

Established pursuant to the Financial Recovery Agreement (the "FRA"; Clause 16), approved by the Public Service Commission in Opinion No. 89-37(D); first applied in 1990 and continued to date applies to Site Investigation and Remediation (SIR) program sites, including:

- Former manufactured gas plant (MGP) sites
- Other Operating sites (previously designated by NM as "Industrial Waste Sites" and "Corrective Action Sites"; they include service centers, electric substations, and company properties)
- Potentially Responsible Party (PRP) sites (not owned by NM but pose alleged liabilities pursuant to Federal/State Superfund and other NYS Environmental Conservation Law-related regulations)

#### Allowable costs include:

- Consultant and contractor costs for site investigation and remediation efforts
- SIR activities that develop or implement remediation approaches to reduce the volume, mobility, or toxicity pre-existing contamination (caused or alleged to be caused by past practices or operations)
- Incremental external costs, including insurance premiums and legal costs, incurred to seek recovery from third parties or to otherwise seek to mitigate the cost or liability of the Company associated with the SIR program

#### Allowable costs shall be offset by:

- Net gains recognized from the sale or transfer to Non-utility Property of NM land and buildings included in rate base<sup>1</sup> or from the sale of stone, gravel, sand, or timber from such land, or
- Any net gains recognized from the leasing of such land or from the sale or lease of mining or drilling rights to such land, and
- Net insurance proceeds and net recoveries from third parties.

Department of Public Service Staff reserves the right to review for ultimate Commission determination the reasonableness of the actual deferred costs, which shall depend, inter alia, on the adequacy of the Company's efforts to seek contribution for those costs from other responsible parties.

<sup>&</sup>lt;sup>1</sup> For land and buildings which have been removed from rate base prior to date that this policy became effective, Niagara Mohawk shall propose the appropriate sharing of net gains in a filing that is subject to the approval of the Commission.

### Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239 Deferral of Electric Property Tax Expense (\$000's)

#### ELECTRIC EXAMPLE

		Electric e Year One	Electric e Year Two	Electric Year Three
1	Actual Expense	\$ 180,000	\$ 190,000	\$ 200,000
2	Rate Allowance	\$ 183,024	\$ 189,211	\$ 195,164
3	Under (over) spending	\$ 3,024	\$ (789)	\$ (4,836)
4	Customer share of under (over) spending	 80%	 80%	 80%
5	Amount Deferred to (from) Customers	\$ 2,419	\$ (631)	\$ (3,869)

- 1 Input Actual Costs
- 2 Forecasted Rate Year expense. See Joint Proposal Section 10.1.7
- 3 Line 2 less Line 1 (Difference between actual expense and rate allowance)
- 4 Deferral for under (over) spending will be based on 80% customer and 20% company basis
- 5 Line 3 times Line 4

#### Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239 Deferral of Electric Variable Pay Expense (\$000's)

#### ELECTRIC EXAMPLE

		Electric Year One	Electric Year Two	Electric Rate Year Three		
1	Actual Expense	\$ 18,000	\$ 16,000	\$	19,000	
2	Rate Allowance	\$ 17,848	\$ 18,390	\$	18,910	
3	Amount Deferred to Customers	\$ 	\$ 2,390	\$		

If the actual expense is greater than the rate allowance, there is no additional recovery from customers. This is a downward only reconciliation.

- 1 Input Actual costs Under the Company's variable pay program (APP) the evaluation period is on a fiscal year basis ending March Variable pay expense is accrued monthly, with the final accrual in March reconciling the annual variable pay total to the expecte pay out in June.
- 2 Forecasted Rate Year expense. See Joint Proposal Section 10.1.12
- 3 Line 2 less Line 1

## Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239 Deferral of Transmission Revenue Adjustment Clause (\$000's)

## ELECTRIC EXAMPLE

		Electric e Year One	Electric e Year Two	Electric Year Three
1	Actual Expense	\$ 186,000	\$ 182,000	\$ 189,000
2	Rate Allowance	\$ 185,696	\$ 185,696	\$ 185,696
3	Amount Deferred to (from) customers	\$ (304)	\$ 3,696	\$ (3,304)

- 1 Input Actual Costs
- 2 Forecasted Rate Year expense. See Joint Proposal Section 10.1.19
  - Year 1 See Page 2 of 4, Line 12
  - Year 2 See Page 3 of 4, Line 12
  - Year 3 See Page 4 of 4, Line 12
- 3 Line 2 less Line 1

- Notes and Assumptions:

  1) LED capital expenditures in base rates total \$7.745 million annually in FY 2019 FY 2021.
  Revenue requirement assumes capital expenditures are placed in-service in the month spent.
  2) Depreciation is based on the approved composite depreciation rate for LED luminaires.
  3) Utilizes pre-tax WACC by fiscal year per filing with a 9.00% ROE.
  4) The FY 2019 balances will be rolled forward to FY 2021, calculating a return on the net plant investment and associated depreciation expense.
  5) The FY 2020 balances will be rolled forward to FY 2021, calculating a return on the net plant investment and associated depreciation expense.
  6) Tracker is capped at an annual 20 percent LED conversion rate.

(\$207,112) \$0

(\$104,056)

Net Plant Tracker Regulatory Liability (excluding LED)

Total Net Plant/Depreciation and LED Net Plant/Depreciation Tracker Combined Results in Net Regulatory Asset/(Liability)

LED Regulatory Liability

Appendix 5 Schedule 15 Page 2 of 7 Case 17-E-0238 & 17-G-0239

> Example of LED Tracker and Net Utility Plant Reconciliation Mechanism Assumes a Two Way LED Net Utility Plant/Depreciation Tracker Mechanism Assumes a One Way Downward Net Utility Plant/Depreciation Tracker Mechanism Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239

Example 1 Net Plant/Depreciation Tracker

Under Under LED Net Plant/Depreciation Tracker

1) No Net Utility Plant Regulatory Liability Required - 100% Related to LED 2) Record LED Revenue Requirement Net Plant Underage as a Regulatory Liability

Example 4 Net Plant/Depreciation Tracker

Under LED Net Plant/Depreciation Tracker

1) Do Not Record Net Utility Plant Regulatory Asset, since total Net Utility Plant is Under, but non-LED is Over Rate Allowance 2) Record LED Revenue Requirement Net Plant Underage as a Regulatory Liability

1) Assume all other components of net plant forecast results are higher than what's allowed in rates, and LED actual costs being lower than forecast in excess of total plant underage. Regulatory liability is generated from the LED tracker only:

Total Net Utility Plant/ Depreciation including LED Average Net Plant Pre-Tax Return % Return on Ratebase Depreciation Total Net Plant/Depreciation Revenue Requirement	Forecast Allowed in Rates  FY2019 FY2020 FY2021  \$6,969,686,893 \$7,347,161,806 \$7,729,004,989  \$0.7% 8.02% 7.99%  \$562,145,939 \$588,917,914 \$617,206,173  \$231,655,210 \$542,952,026 \$254,022,222  \$793,801,150 \$831,869,941 \$871,228,425	Assumed Actual Results  FY2019	Difference - Regulatory Asset/(Liability)  FY2019 FY2020 FY2021  (\$1,000,000) (\$2,000,000) (\$3,000,000)  8,07% 8,02% 7,99%  (\$80,650) (\$160,312) (\$239,568)  (\$23,400) (\$46,800) (\$70,200)  (\$104,056) (\$207,112) (\$309,768)
2) LED net plant/depreciation will be booked as a regulatory liability:

Niagara Mohawk Power Corporation d'bb'a National Grid IS Capital Investment Cost Incentive For the Rate Years Ending March 31, 2019, March 31, 2020, and March 31, 2021

			Allocation	Allocation to	Full Sanction	10% Threshold	Assumed Actuals	Difference from	Electric Portion to be
Investment Name	INVP	Work Order	Code	NMPC-E	Estimate*	for Incentive	upon Project Closure*	Sanctioned Amount	Shared
Green Button Connect	4704C	N/A	C113	73%	\$3,072,759	\$2,765,483	\$ 2,500,000	\$ (572,759)	\$ (417,599)
					\$3,072,759	\$2,765,483	\$2,500,000	(\$572,759)	(\$417,599)

417,599 83,520

**∻ ∻** 

Total Electric CAPEX savings reflected in rent expense 20% of CAPEX savings recorded as a regulatory asset

"The Company will share in any efficiency savings on capital costs to the extent actual capital costs upon project closure, are less than the full sanction expert to project closure, are less than the full sanction extra containing the actual capital costs is identified as "Closure" in the "Sanction Project closure sanction paper containing the actual capital costs is identified as "Closure" in the "Sanction Type" field of the sanction paper. The full sanction paper containing the full sanction estimate for the project is identified as "Sanction" ("atthet than "Partal" or "Re-Sanction") in the "Sanction Type" field on the sanction paper. For purpose of the Green Button Connect project, the incentive is based on the forecast of capital costs reflected in Niagara Mohawk's revenue requirement.

# Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239 Deferral of LED EE Conversion Program (\$000's)

# **EXAMPLE**

		lectric Year One	lectric Year Two	lectric Year Three
1	Actual Expense	\$ 3,500	\$ 3,200	\$ 1,400
2	Percentage of LEDs Converted	 20%	 11%	 9%
3	Amount Deferred	\$ 1,600	\$ 291	\$ 

Note: The LED EE Conversion Program upward deferral is capped at \$1.6 million in each rate year.

- 1 Input Actual Costs
- 2 Percentage of LED conversions supported by EE program funding
- 3 Minimum of Line 1 divided by Line 2 times (Line 2 less 10%) or Line 1 less \$1.6 million; upward-only deferral, capped at \$1.6M

#### Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239 Deferral of Electric Efficiency Transition Implementation Plan ("ETIP") (\$000's)

ELE	CTRIC EXAMPLE 1					
			Electric e Year One		Electric Year Two	Electric Year Three
		-	o rear one	ruic	Tour Two	Tear Times
1	Actual Expense	\$	50,000	\$	52,000	\$ 51,700
2	Rate Allowance	\$	53,058	\$	53,058	\$ 53,058
3	Difference	\$	3,058	\$	1,058	\$ 1,358
4	3 Year Cumulative Actuals	\$	153,700			
5	3 Year Cumulative Rate Allowance	\$	159,174			
6	Difference - underspend / (overspend)	\$	5,474			
7	Deferral - Due to Customers	\$	5,474			
ELE	CTRIC EXAMPLE 2					
			Electric e Year One		Electric Year Two	Electric Year Three
1	Actual Expense	\$	53,000	\$	54,000	\$ 53,050
2	Rate Allowance	\$	53,058	\$	53,058	\$ 53,058
3	Difference	\$	58	\$	(942)	\$ 8
4	3 Year Cumulative Actuals	\$	160,050			
5	3 Year Cumulative Rate Allowance	\$	159,174			
6	Difference - underspend / (overspend)	\$	(876)			

\$

The Company will continue to be afforded the flexibility to shift funds within the respective electric and gas ETIP portfolio of programs. St Lighting LED EE of \$1.6M is included in the ETIP rate allowance above

#### Notes (by line number)

Deferral

7

- 1 Input Actual Costs
- Per Case No. 15-M-0252; See Joint Proposal Section 13.2.3
- 3 Line 2 less Line 1
- 4 Sum Line 1 for Rate Years 1-3
- 5 Sum Line 2 for Rate Years 1-3
- 6 Line 5 less Line 4
- 7 If cumulative actual costs for Rate Years 1-3 are less than cumulative rate allowances for same period, then Deferral Credit to Customer will be equal to the cumulative amount underspent. If actual costs exceed the cumulative rate allowance for Rate Years 1-3, there will be no Deferral.

<sup>\* -</sup> The accounts identified as "Discontinued" will be discontinued as of the Effective Date. The discontinuance of these accounts is not intended to preclude the Company from returning to or recovering from customers the balances as of March 31, 2018 plus any applicable carrying charges.

The program is closed to new customers and is gradually being phased out for existing customers. As set forth in Section 13.1 of the Joint Proposal, the Company will continue to defer costs associated with the Affordability program until existing customers complete, default, or voluntarily remove themselves from the program.

Case 17-E-0238 & 17-G-0239

Appendix 6

Schedule 10

Page 2 of 2

# Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239 General Principles of the SIR Deferrral Mechanism

Established pursuant to the Financial Recovery Agreement (the "FRA"; Clause 16), approved by the Public Service Commission in Opinion No. 89-37(D); first applied in 1990 and continued to date applies to Site Investigation and Remediation (SIR) program sites, including:

- Former manufactured gas plant (MGP) sites
- Other Operating sites (previously designated by NM as "Industrial Waste Sites" and "Corrective Action Sites"; they include service centers, electric substations, and company properties)
- Potentially Responsible Party (PRP) sites (not owned by NM but pose alleged liabilities pursuant to Federal/State Superfund and other NYS Environmental Conservation Law-related regulations)

#### Allowable costs include:

- Consultant and contractor costs for site investigation and remediation efforts
- SIR activities that develop or implement remediation approaches to reduce the volume, mobility, or toxicity pre-existing contamination (caused or alleged to be caused by past practices or operations)
- Incremental external costs, including insurance premiums and legal costs, incurred to seek recovery from third parties or to otherwise seek to mitigate the cost or liability of the Company associated with the SIR program

#### Allowable costs shall be offset by:

- Net gains recognized from the sale or transfer to Non-utility Property of NM land and buildings included in rate base<sup>1</sup> or from the sale of stone, gravel, sand, or timber from such land, or
- Any net gains recognized from the leasing of such land or from the sale or lease of mining or drilling rights to such land, and
- Net insurance proceeds and net recoveries from third parties.

Department of Public Service Staff reserves the right to review for ultimate Commission determination the reasonableness of the actual deferred costs, which shall depend, inter alia, on the adequacy of the Company's efforts to seek contribution for those costs from other responsible parties.

<sup>&</sup>lt;sup>1</sup> For land and buildings which have been removed from rate base prior to date that this policy became effective, Niagara Mohawk shall propose the appropriate sharing of net gains in a filing that is subject to the approval of the Commission.

# Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239 Deferral of Gas Property Tax Expense (\$000's)

#### **GAS EXAMPLE**

		Rate	Gas Year One	Rate	Gas Year Two	Gas Rate Year Three	
1	Actual Expense	\$	40,000	\$	45,000	\$	50,000
2	Rate Allowance	\$	43,072	\$	45,311	\$	47,730
3	Under (over) spending	\$	3,072	\$	311	\$	(2,270)
4	Customer share of under (over) spending		80%		80%		80%
5	Amount Deferred to (from) Customers	\$	2,457	\$	248	\$	(1,816)

- 1 Input Actual Costs
- 2 Forecasted Rate Year expense. See Joint Proposal Section 10.1.7
- 3 Line 2 less Line 1 (Difference between actual expense and rate allowance)
- 4 Deferral for under (over) spending will be based on 80% customer and 20% company basis
- 5 Line 3 times Line 4

#### Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239 Deferral of Gas Variable Pay Expense (\$000's)

#### GAS EXAMPLE

		Gas Rate Year One		Rate	Gas Year Two	Gas Rate Year Three	
1	Actual Expense	\$	5,000	\$	4,000	\$	5,000
2	Rate Allowance	\$	4,045	\$	4,203	\$	4,317
3	Amount Deferred to Customers	\$	<u>-</u>	\$	203	\$	

If the actual expense is greater than the rate allowance, there is no additional recovery from customers. This is a downward only reconciliation.

- 1 Input Actual costs Under the Company's variable pay program (APP) the evaluation period is on a fiscal year basis ending March Variable pay expense is accrued monthly, with the final accrual in March reconciling the annual variable pay total to the expecte pay out in June.
- 2 Forecasted Rate Year expense. See Joint Proposal Section 10.1.12
- 3 Line 2 less Line 1

#### Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239 Deferral of Oil Heat to Gas Conversion Program (\$000's)

# GAS EXAMPLE

		Gas Rate Year One		Gas Rate Year Two		Gas Rate Year Three	
1	Actual Expense	\$	1,250	\$	400	\$	950
2	Oil Heat Conversion Program Allowance	\$	764	\$	764	\$	764
3	Amount Deferred to customers / (due from customers)	\$	(236)	\$	364	\$	(186)

Note: The Oil Heat Conversion Program total spend is capped at \$1M in each rate year. The upward deferral is capped at \$236k in each rate year. There is no downward cap on the deferral.

- 1 Input Actual Costs
- 2 Costs included in Rate Allowance
- 3 Line 2 less Line 1; upward deferral capped at \$236k

## Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 17-E-0238 & 17-G-0239 Deferral of Gas Walk-In Payment Transaction Fees (\$000's)

# **GAS EXAMPLE**

		Gas Rate Year One		Gas Rate Year Two		Gas Rate Year Three	
1	Actual Expense	\$	250	\$	450	\$	500
2	Rate Allowance		414		414		414
3	Amount Deferred to (from) customers	\$	164	\$	(36)	\$	(86)

- Input Actual Costs
- 2 Forecasted Rate Year expense. See Joint Proposal Section 10.2.5

Notes and Assumptions:

1) LPP replacement capital expenditures in base rates total \$48.576 million (50 miles) in FY 2019, \$49.632 (50 miles) million in FY 2020 and \$50.688 million (50 miles) in FY 2021.

Revenue requirement assumes capital expenditures are placed in-service in the month spent.

Depreciation is based on the composite depreciation rate for mains and services based on 12/31/2016 plant balances.
 Utilizes pre-tax WACC by fiscal year per filing with a 9 00% ROE.
 The Unit osts are capped at the lessers of the average expaint replaceancy per mile of proactive LPP in the applicable rate year or 102% of the capital unit cost allowances for LPP replacement in the applicable rate year.
 The FY 2019 incremental mileage spend will be rolled forward to the FY 2021 aurcharge, calculating a return on the net plant investment and associated depreciation expense.
 The FY 2020 incremental mileage spend will be rolled forward to the FY 2021 surcharge, calculating a return on the net plant investment and associated depreciation expense.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Amontization
