Re: Case 15-M-0127 - In the Matter of Eligibility Criteria for
Energy Service Companies

Case 12-M-0476 - Proceeding on Motion of the Commission to
Assess Certain Aspects of the Residential and Small Non-
residential Retail Energy Markets in New York State

Case 98-M-1343 – In the Matter of Retail Access Business Rules

Dear Secretary Phillips:

Consolidated Edison Company of New York, Inc. (“Con Edison” or the “Company”) submits the attached revised pricing information required by Ordering Clause 7 of the Commission’s *Order Adopting Changes to the Retail Access Energy Market and Establishing Further Process* (“Order”), issued December 12, 2019 in the above-referenced proceedings. Some of the electric and gas 12-month trailing average prices are being revised as a result of an inadvertent computational error.

As a reminder, the 12-month trailing average utility supply rates (January 1, 2019-December 31, 2019) in the attached are provided for each mass-market service class and for each mass-market customer grouping that receives different supply rates based on the Company’s Electric and Gas Tariffs.

The electric 12-month trailing average supply pricing includes the calendar month Market Supply Charge, the Merchant Function Charge, the Clean Energy Standard Supply Surcharge, and MSC I and MSC II adjustment factors for each mass market service classification rate, by region. These charges are described in the Company’s Electric Tariff and can be found on the statements and summaries filed with the Commission that are also posted in the Rates and Tariffs section of the Company’s

website.¹ Prices are weighted based on Con Edison's service class load profiles, and do not include sales tax or gross receipts tax.

The gas 12-month trailing average supply pricing includes the monthly Gas Supply Rate, the Merchant Function Charge, and the Monthly Rate Adjustment differential between firm and transportation customers for each mass market service classification rate.² These charges are described in the Company's Gas Tariff and can be found on the statements filed with the Commission, the current statement which is posted in the Rates and Tariffs section of the Company's website.³ The prices are weighted based on weather normalized average customer gas usage by service class and rate, and do not include sales tax or gross receipts tax.

In addition to filing the attached revision, the Company is posting the revised pricing information on its website, which can be accessed through the following link:

<https://www.coned.com/en/business-partners/become-a-supply-partner/energy-service-company-news>

Finally, as a matter of convenience, the Company will also be posting to the same website page above, revised sample worksheet calculation examples for the pricing during this reporting period. This worksheet provides pricing including the charges and adjustment factors identified above, along with links to the website pages where the various statements for the charges can be found in the Company's Tariffs.

If you have any questions, please contact me.

Very truly yours,

/s/

Kerri Kirschbaum
Associate Counsel

¹ The statements can also be found in the utility tariff section of the Commission's website.

² For Service Classification 2, General Firm Sales, the prices and average customer gas usage is based on the total service classification, and not customers with annual usage less than 750 dekatherms.

³ Historical statements can be found in the utility tariff section of the Commission's website.

Con Edison's Trailing 12 Month Average Electric Supply Price - January 2019 to December 2019 - Revised
