- C. Schedule and Goals for PIP Events
- D. PIP Tracking Report through August 2015

1 Introduction

Bull Run Energy LLC (BRE) plans to submit an Application to construct a major electric generating facility under Article 10 of the Public Service Law (PSL). Pursuant to the rules of the New York State Board on Electric Generation Siting and the Environment (Siting Board), applicants proposing to submit an Application to construct a major electric generating facility under Article 10 must submit a Public Involvement Program plan (PIP). The PIP must be submitted to the Department of Public Service (DPS) for review at least 150 days prior to filing a Preliminary Scoping Statement (PSS). This document is the PIP plan for the Bull Run Wind Energy Center (the Project), a wind energy facility described in Section 2.

As required by 16 NYCRR § 1000.4, this PIP describes the steps BRE plans to take to inform, engage, and solicit input from the local community, general public, and other stakeholders.

2 Applicant and Project Description

2.1 Company Profile

Bull Run Energy LLC is an affiliate of Invenergy Wind North America LLC (Invenergy). Invenergy is a utility-scale power producer developing renewable energy projects in the New York State energy market. Invenergy-owned energy projects operate under the supervision and regulatory authority of the New York State Public Service Commission (PSC) and the Federal Energy Regulatory Commission (FERC). Invenergy and BRE management offices are located in Chicago, Illinois.

Invenergy has developed 59 wind farms in the United States, Canada, and Europe including the following three New York wind farms:

- High Sheldon Wind Farm, 75 turbines located in the Town of Sheldon, Wyoming County, NY.
- Orangeville Wind Farm, 58 turbines located in the Town of Orangeville, Wyoming County, NY.
- Marsh Hill Wind Farm, 10 turbines located in the Town of Jasper, Steuben County, NY.

Invenergy provides wholesale electricity to the public using clean, renewable sources such as wind. This furthers the federal government's policy as articulated in 42 U.S.C. 9201 to "hasten the widespread utilization of [wind energy] systems," as well as the State of New York's renewable energy policy, which requires 30% of the State's energy to come from renewable sources such as wind by the year 2015.

BRE intends to construct, own, operate, and maintain all components of the Project, except for the interconnection switchyard which will be constructed by BRE, and then transferred to the New York Power Authority (NYPA), who will own, operate, and maintain the switchyard.

2.2 Project Summary

BRE is planning the Project to have a maximum generating capability of 300 megawatts (MW) from an estimated 50 to 100 wind turbines located on land leased from owners of private property located in the Towns of Clinton, Ellenburg, Altona, and Mooers in Clinton County, New York (Figure 1).

Project facilities will include commercial-scale wind turbines, access roads, buried and overhead electric collection lines, a Project substation, meteorological towers, an operation and maintenance (O&M) building, and electrical interconnection facilities. BRE anticipates the interconnection facilities will include a 230-kV switchyard built adjacent to NYPA's Ryan-Plattsburgh 230-kV transmission line and an overhead 230-kV interconnection line approximately 4 miles long.

This transmission line would be subject to Public Service Law Article VII, rather than the Article 10 process. BRE plans to submit its Article VII and Article 10 applications concurrently and as part of its PIP outreach activities BRE will describe the transmission line and the wind energy facility.

BRE expects the Project will operate at an annual net capacity factor (nCF) of 35%. This means the Project, if built at the maximum expected generating capacity of 300 MW, would generate approximately 918,800 megawatt hours (MWh) of energy per year. This will be enough electricity to meet the average annual consumption of 85,167 or 127,750 households, based on average annual household electric consumption of 10.8 MWh for the U.S. and 7.2 MWh for New York State, respectively (EIA, 2014).

The Project would have positive socioeconomic impacts of permanent O&M jobs, temporary construction employment, lease payments to landowners, and a new source of revenue for schools, fire departments, county government, and town governments.

2.3 Project Area and Study Area

Figures 1-3 show the regional Project location, preliminary Study Area and preliminary Project Area for the Project. For purposes of this document, BRE is defining these areas as follows:

- Project Area is comprised of all tax parcels on which Project facilities are expected to be located, plus the area bounded by those tax parcels. As shown in Figure 3, the Project Area is approximately square and includes 42,500 acres of land. None of the Project Area is inside the Adirondack Park blue line.
- Study Area is all areas of the U.S. and Canada within 5 miles of the expected location of Project facilities.

The Project Area and Study Area are based on preliminary estimates of where facilities could be located.

3 Public Involvement Program Plan Overview

3.1 PIP Goals

BRE developed this PIP to ensure comments of individuals and groups with a potential interest in the Project are objectively considered in the Project design and review. Specific PIP goals are to:

- Identify groups and individuals with a potential interest in the Project, i.e., "stakeholders;"
- Ensure stakeholders are aware of the Project;

- Ensure stakeholders can relatively conveniently access information on the Project and the Article 10 review process;
- Engage stakeholders to understand their interests related to the Project;
- Gather specific information from stakeholders that can be used to design objective and useful studies to be defined in the Preliminary Scoping Statement and included in a complete application for the Project.

3.2 PIP Schedule

BRE began conducting PIP activities during the pre-application phase in June 2015, and it will continue until the Project begins commercial operation. Specific PIP activities and their schedules are discussed in Section 5.

3.3 Stakeholder Involvement

Stakeholder Notifications

BRE will notify stakeholders of the important Project milestones listed below. Stakeholder notifications will be by US mail, except as discussed below for area residents and except for stakeholders that express a preference for email notification.

- Open Houses
- Preliminary Scoping Statement (PSS) Submittal
- Application Submittal
- Public Hearing
- Siting Board Decision
- Commencement of Construction
- Commercial Operations Date

Collection of Stakeholder Input

For stakeholder groups, BRE will contact the point of contact to introduce the Project and offer to meet with the stakeholder group or point of contact. At stakeholder meetings BRE will introduce BRE, the Project, and the Article 10 review process, and BRE will solicit specific feedback on issues that stakeholders want considered in the Project design or review. This feedback will be tracked in a comment log as discussed in Section 5.5.

Depending on the number of individual stakeholders, it may not be practical to contact each individually. Regardless, individual stakeholders will be notified of several opportunities to learn about the project and submit input, including on the project website or visiting the project local office. These opportunities are discussed in Section 5.

Distribution of PSS and Application Documents to Stakeholders

Stakeholders will be made aware of PSS and application availability at the Project website and at various document repositories. BRE does not intend to provide individual hard copies of these documents to Stakeholders.

4 Stakeholders

BRE has identified several categories of “stakeholders.” Overall, BRE relied on its experience developing other projects, review of PIPs filed for other projects, discussions with local officials, and the knowledge of its local representatives to identify potential stakeholders. Descriptions of stakeholder categories and the methods used to identify them follow. Appendix A contains the Project stakeholder list and the currently known contact information for each stakeholder.

Project outreach materials will contain instructions on how to be added to the stakeholder list. Individuals or organizations will be able to be added to the stakeholder list by calling a Project representative, calling a toll-free number, visiting the local office, or by sending an email that will be posted on the Project website.

4.1 Host Communities

Town boards and county boards representing any portion of the Project Area were identified by review of town and county boundary maps and are considered stakeholders. Points of contact will be the Town Supervisors and the County Administrator(s). Notices will be addressed to the full board, care of the point of contact, with the expectation that the point of contact will distribute the notices and information to the full board. BRE will meet with the points of contact prior to submittal of the PSS and will offer to meet with the full boards. As of the issuance of this second PIP version, BRE has given public presentations to all Town Boards that will be host communities.

4.2 County Agencies

County agencies, other than the county legislature, with areas of responsibility potentially affected by the Project were identified by review of the county website and consultation with the county planning department. Note that the County Emergency Response Coordinator and Sheriff are identified as stakeholders and are listed under the category of “Emergency Responders.”

4.3 State Agencies

Departments of New York State government were identified using BRE’s experience in developing wind projects in New York and by reviewing PIPs filed for other wind projects.

4.4 Federal Agencies

Agencies of the U.S. government were identified using BRE’s experience in developing wind projects in New York.

4.5 Legislative Representatives

Offices of the New York State Legislature, the U.S. Senate, and U.S. Congress representing the Study Area were identified by review of on-line district maps.

4.6 Highway Departments

County and town departments responsible for managing roads in the Study Area were identified by review of town and county boundary maps.

4.7 Schools

School districts serving parcels in the Project Area and school districts adjacent to these districts were identified by review of county tax maps.

4.8 Emergency Responders

Fire departments, emergency responders and police or sheriff departments serving parcels in the Study Area were identified by review of county tax maps.

4.9 Adjacent Municipalities

Towns, villages, or other municipalities, whether in the U.S. or Canada, that are not host communities but are in the Study Area were identified by review of municipal boundary maps.

Note that all U.S. municipalities in the Study Area are host communities. The Town of Chateaugay and Franklin County abuts the Study Area boundary but do not extend into it, but are included as stakeholders.

4.10 Utilities

Companies that own gas, electric, or communications infrastructure in the Project Area were identified by consultation with the County Planning Department.

4.11 Public Interest Groups

Organizations that serve interests of the public in the Study Area were identified from discussions with the County Planning Department and from the 2015 list of county officials that includes county and town historians. This category includes business organizations, county and town historians, conservation or environmental organizations, and organized groups focused on use of the Project Area for outdoor recreation.

4.12 Airports and Heliports

Organizations operating FAA-registered airfields within 12 miles of the Project Area were identified by searching the FAA's database on licensed airports and heliports. The nearest airport identified has a runway that is 19 miles from the nearest part of the Project Area. This airport is included as a potential stakeholder.

4.13 Participating Landowners

Property owners that have entered into lease, easement, purchase option, or setback agreements with BRE that will allow construction of Project facilities on or near their property are considered “participating landowners.”

Participating landowners are included in the stakeholder list as one group, but not individually. BRE’s private contracts with these landowners contains provisions for BRE and landowners to work together on Project plans. These consultations are private discussions outside the scope of this PIP. In addition to private communications with BRE, participating landowners living in the Project Area will be notified of Project milestones and events in the same manner as all residents of the Project Area.

4.14 Adjacent Landowners

Owners of property that abut parcels where Project facilities are planned, but who are not participating landowners, are considered “adjacent landowners.” When a Project layout is developed, BRE will identify these owners by review of tax records and will add the adjacent owners individually to the stakeholder list. These owners will receive mailings notifying them of Project milestones and events.

4.15 Area Residents

Residents of the Study Area that are not participating landowners or adjacent owners are included in the stakeholder list as one group. BRE plans to notify these residents of the Project individually by mailing post cards announcing the open house to all unique addresses in the voting rolls for the Study Area. At the open house, attendees will be encouraged to join the stakeholder list if they wish to continue to receive notice of future Project milestones (e.g., availability of the PSS, public hearing, etc.). After the open house, BRE does not plan broad mailings to area residents that do not register as stakeholders. But these residents would still likely hear more of the Project through public outreach activities and notices in area newspapers.

5 Public Involvement Program Elements

5.1 PIP Activities, Schedule, and Goals

Appendix C lists the PIP activities BRE plans to conduct and the tentative schedule and goals for each activity.

5.1.1 Stakeholders Consultations

Stakeholder consultations will be arranged as described in Section 3. BRE anticipates almost all stakeholders will be interested in a meeting or conference call. For any such stakeholder meetings or conference calls, BRE will be represented by one or more of the representatives identified in Section 5.2.

Topics covered during stakeholder consultations will vary depending on the stakeholder’s role and potential impact. Examples of possible topics are payment in lieu of tax agreements, highway agreements, local laws, emergency response requirements, and environmental impacts. Conduct of stakeholder consultation meetings will be documented in the PIP Tracking Report and comments received will be recorded as discussed in Section 5.5.

As appropriate, BRE will conduct subsequent meetings to answer specific questions, and to discuss studies, mitigation, or other strategies that could address stakeholder concerns.

A tentative schedule of initial consultations is provided in Appendix B.

5.1.2 Town Board Meetings

In July and August 2015, BRE presented at regularly-scheduled monthly board meetings of the Clinton Wind Board, the Ellenburg Town Board, the Altona Town Board, and the Mooers Town Board. Specific dates of these meetings were:

- July 1, 2015, Clinton Wind Board Meeting
- July 21, 2015, Ellenburg Town Board Meeting
- Aug 10, 2015, Altona Town Board Meeting
- Aug 11, 2015, Mooers Town Board Meeting

As part of the presentation given at each meeting, BRE introduced Invenergy, the Project, and the Article 10 process, and it responded to questions from the board and members of the public.

BRE representatives will be available to attend future town board meetings as requested by the boards.

BRE plans to give a brief Project update at each of the town board meetings shortly after the PSS is filed.

The above meetings and any future presentations at town board meetings will be documented in the PIP tracking report.

5.1.3 Open House

BRE will hold an open house style public meeting at the Adirondack Central School from 6-9 pm on a weekday evening prior to submittal of the PSS. At least three representatives of BRE's development team will be present at the meeting. The meeting will feature a PowerPoint presentation and poster displays on the Project, wind energy, and the Article 10 review process. A brief presentation by one of BRE representatives will start the meeting and then ample time will be allowed for review of displayed materials and one-on-one discussions with BRE representatives. As part of the presentation, BRE will emphasize the role of stakeholders and encourage interested area residents to join the stakeholder list.

The open house will be advertised at town board meetings, by mailings to stakeholders (including to all study area residents as described in Section 4.15), on the Project website, and in the newspapers listed in Section 5.2.

As part of its mailing to stakeholders on the open house, BRE will include instructions on how to contact BRE if a stakeholder is unable to attend the open house and would like to schedule a one-on-one meeting, a conference call, or another open house.

5.2 Communication Tools

5.2.1 Project Representatives

Invenergy has three representatives available to implement this PIP and answer questions from stakeholders:

Eric Miller
Project Developer
emiller@invenergylc.com
(301) 610-6413

Tom Hampston
Local Representative
thampston@yahoo.com
(518) 593-4874

Jon LaBarre
Local Representative
jonlab21@yahoo.com
(518) 420-4845

Phone numbers for Tom Hampton and Jon LaBarre are local calls from the Project Area.

Contact information for local representatives will be posted at the local office and the project specific website. Additionally, this information will be made available at stakeholder consultations, town board meetings and open houses.

5.2.2 Toll-Free Number

Invenergy also maintains a toll-free number (1-866-378-4580) connected to an automated voicemail that it will advertise on the Project website and monitor for questions on the Bull Run Project.

5.2.3 Local Office

BRE has rented space at one of the main intersections in the Project Area, in the hamlet of Ellenburg, at address 5591 State Rte. 11, Building #3, Ellenburg, NY. Mail may be addressed to Bull Run Energy Center, P.O. Box 56, Ellenburg, NY 12933. The Project office, shown below, is a convenient location for residents to pick up printed materials or review documents such as the PIP, project maps, PSS, and Project application.

BRE's local representatives manage the local office and are able to answer questions on the Project.

The office has posted regular hours on Tuesday and Thursday from 11:00 am to 1:00 pm, and the sign on the door provides a local phone number that can be used to set up special appointments. Hours will be adjusted to match community interest and any new hours will be posted on the door of the local office.

5.2.4 Website

BRE has established a user-friendly website (www.BullRunWind) dedicated to the Project and written in plain English. BRE will update the website as the Project develops and more information becomes available. When available, the following items will be posted on the website:

- Project description and location;
- Project benefits and need;
- Project layout maps;
- Project contact information, including an email address and a telephone number local to the Project Area;
- Summary of the Article 10 process;
- Summary of the intervenor funding process with instructions on how to apply;
- Addresses of local document repositories;
- Links to the Article 10 siting board webpage and to case-specific documents file for the Project;
- Notices for public outreach events, filings, and public hearings;
- PIP tracking report,
- Publications or educational materials presented at the open house(s) or distributed to stakeholders;
- Instructions on how to join the stakeholder list.

5.2.5 Document Repositories

BRE will maintain hard copies of the PIP, the PSS, and the application at the following locations:

- Bull Run Local Office, 5591 State Rte. 11, Building #3, Ellenburg, NY
- Clinton Town Hall, 23 Smith Street, Churubusco, NY
- Ellenburg Center Reading Center, Main Street, Ellenburg Center, NY
- Sarah A. Munsil Free Library, 5139 Route 11, Ellenburg Depot, NY
- Altona Reading Center, Altona Town Hall, 3124 Miner Farm Road, Altona, NY
- Mooers Free Library, 2430 Route 11, Mooers, NY

5.2.6 Notifications to the General Public

BRE will publish notices as required by the Article 10 regulations. Notices of PSS and application filings will be published on the Project website and in the following papers:

- *Press Republican*, a paid-subscription, daily newspaper with the largest circulation in Clinton County and the newspaper of record for host community towns. <http://www.pressrepublican.com/>.
- *Adirondack Pennysaver*, a free, weekly advertising paper available at local stores and widely read in the Study Area. <http://www.adkpennysaver.com/>.
- *The Malone Telegram*, a paid-subscription, daily newspaper serving Northern Franklin County and the newspaper of record for the adjacent community Town of Chateaugay.

5.3 PIP Materials

For initial presentations given at town board meetings and at open house(s), BRE will use PowerPoint presentations to present information on BRE, the Project, and the Article 10 process. Presentations will contain maps, timelines, and other project specific material developed by BRE.

Residents of the Study Area are familiar with wind turbines, as the area hosts over 320 wind turbines, with approximately 250 of these installed during 2008-09 and another 70 being installed in 2012. As a result, BRE does not expect residents to require or benefit from materials covering wind energy basics. Instead, BRE materials will be focused on unique aspects of BRE and the Project, the Article 10 review process, and how the wind technology used in the Project will compare to the turbines already in the Area.

At the open house, BRE plans to have poster board displays topics such as:

- recent growth trends in the wind industry,
- environmental, emission offset, and fuel offset benefits of wind energy,
- expected changes in turbine dimensions and technology during the period where the Project will be in development,
- comparisons of sound emission specifications from turbines operating in the area and possible turbine models for the Project;
- Invenergy operations and maintenance (O&M) capabilities and plans for staffing a local O&M facility in the Project Area;
- Project schedule;
- Studies expected to be required for permitting of the Project;
- Economic benefits of the Project to the local economy;

For meetings following the open house, BRE anticipates the items of most interest will be maps showing proposed locations of project facilities. BRE will generate such maps in large format for display as part of its presentations after the open house.

BRE will develop materials on the above topics using information from its wind turbine suppliers, its knowledge of the Article 10 process; and industry sources such as the American Wind Energy Association. Versions of these materials will be available on the Project website.

5.4 PIP Tracking Report

BRE will maintain a log documenting PIP activities, meetings, and consultations. For each event, the log will document the event date, location, attendees, summary of topics discussed, and any follow-up steps.

The PIP tracking report documenting activities conducted through August 2015 is provided as Appendix D.

Every two months, BRE will file the PIP tracking report with the Secretary to the Commission and post it on the Project website.

5.5 Comment Tracking

BRE will maintain a log of comments or questions that are not simply answered or that may have interest to a broad audience. BRE will refer to this comment log in development of the PSS and application to ensure that comments are being adequately addressed.

6 **Environmental Justice Areas**

The New York State Department of Environmental Conservation (NYSDEC) provides map files of Potential Environmental Justice Areas it identifies as census block groups with populations that meet one or more of the following thresholds:

- 51.1% or more of the population in an urban area reported themselves to be members of minority groups; or
- 33.8% or more of the population in a rural area reported themselves to be members of minority groups; or
- 23.59% or more of the population in an urban or rural area had household incomes below the federal poverty level.

No Potential Environmental Justice Areas are in the Study Area, but the following two are within 10 miles of the Project Area:

- Census Block Group ID 360191004001 is located approximately 8 miles south of the Project Area. This area is in Clinton County in and near the Village of Dannemora. It's categorized as an urban area, and 2000 census statistics show 58% are minorities and 17.33% are below the federal poverty level.
- Census Block Group ID: 360191006002 is located approximately 12 miles southeast of the Project Area. This area is in Clinton County in the vicinity of Beekmantown. It's categorized as a rural area, and 2000 census statistics show 1.6% are minorities and 29.4% are below the federal poverty level.

Because the areas above are outside of the Study Area, the Project is not expected to negatively impact these or any other environmental justice areas.

7 **Language Access**

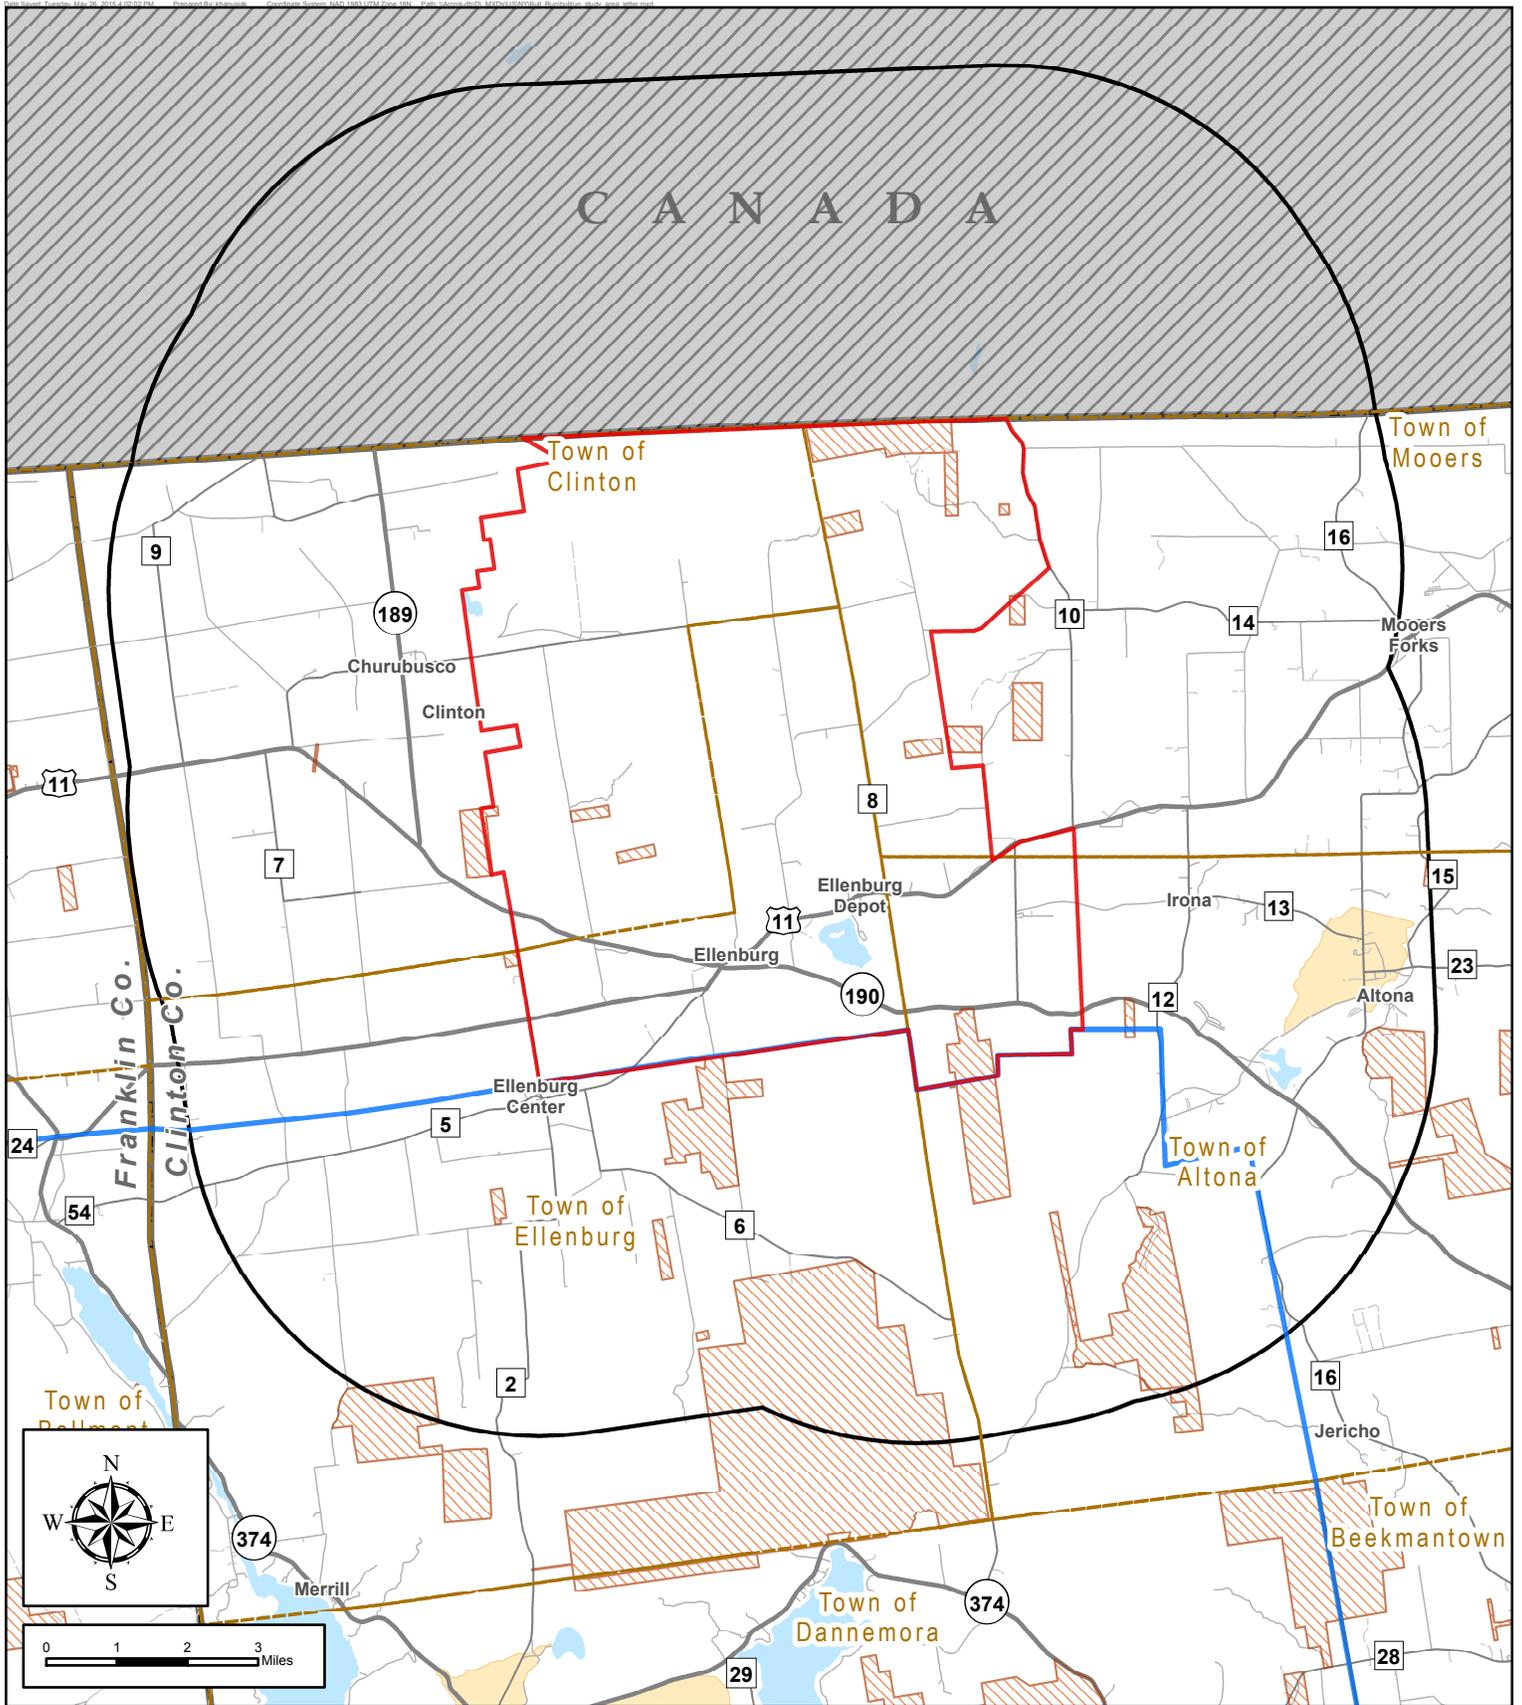

Article 10 regulations require the PIP to identify any language other than English spoken (1) by 5,000 or more persons, according to United States Census data, residing in any 5-digit zip code postal zone in which any portion of such zone is located within the Study Area; and (2) by a significant population of persons residing in close proximity to the proposed facility, alternative locations, or interconnections.

Table 1 lists the 5-digit zip codes extending into the Study Area and the most prevalent non-English languages spoken. As shown by Table 1, there are no zip codes touched by the Study Area where 5,000 or more people do not speak English.

Table 1. Number of Residents of Study Area Zip Codes by Primary Language Spoken at Home

Zip Code	Post Office Name	English	Non-English	Spanish	French
12910	Altona	2,045	180	132	37
12923	Churubusco	583	58	9	43
12933	Ellenburg	17	Na	Na	Na
12934	Ellenburg Center	1,084	58	20	23
12935	Ellenburg Depot	4,819	364	248	47
12955	Lyon Mountain	338	39	13	19
12959	Mooers Forks	1,419	18	5	13
Total		10,305	479	286	102
