DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

I. INTRODUCTION

Q. Please state the names of the members of the Customer Experience Panel ("Panel").

A. Our names are Jeffery D. Doane, Brian J. Fuoco, Joseph J. Rocco, Michael R. Dooley, William A. Brandt, and Antonio X. Vazquez.

Q. Mr. Doane, please state your current employer and business address.

A. I am employed by Central Hudson Gas & Electric Corporation ("Central Hudson" or the "Company") and my business address is 284 South Avenue, Poughkeepsie, New York 12601.

Q. Mr. Doane, in what capacity are you employed by Central Hudson and what is your scope of responsibilities?

A. I am employed by Central Hudson as Manager of Customer Experience. In that capacity, I am responsible for customer operations including meter to cash field operations and customer-facing operations in our Contact Center. I also have oversight of Customer Billing and Digital Customer Experience and Analytics.

Q. Mr. Doane, what is your educational background and professional experience?

A. I received a Bachelor of Science degree in Mechanical Engineering from Clarkson University in 2006 and received my Master of Business Administration also from Clarkson University in 2007. I joined Central Hudson in 2007 and during that time, I have held positions in Engineering, Business Development, and Customer Service.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Q. Mr. Doane, have you previously testified before the New York State Public
2 Service Commission ("PSC" or the "Commission")?

3 A. No, I have not.

4 Q. Mr. Fuoco, please state your current employer and business address.

5 A. I am employed by Central Hudson and my business address is 284 South
6 Avenue, Poughkeepsie, New York 12601.

7 Q. Mr. Fuoco, in what capacity are you employed by Central Hudson and
8 what is your scope of responsibilities?

9 A. I am employed by Central Hudson as Senior Director of Customer
10 Contact. In that capacity, my responsibilities include managing the
11 Contact Center inclusive of Front and Back-office customer facing
12 operations.

13 Q. Mr. Fuoco, what is your educational background and professional
14 experience?

15 A. I received a Bachelor of Science degree in Business Management –
16 Economics from Niagara University in 1988 and received my Master of
17 Business Administration – Technology Management in 2003 from
18 University of Phoenix. I have been continuously employed by Central
19 Hudson since 1992 that in a variety of positions within the Customer
20 Service Group, Electric T&D, and Customer Account Services. My prior
21 responsibilities included Director Estimating & Real Property,
22 Superintendent Estimating Electric T&D, Supervisor New Business,

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 System Supervisor Meter Reading, and Project Manager Meter Reading
2 Optimization, Commercial Gas Marketing.

3 Q. Mr. Fuoco, have you previously testified before the Commission?

4 A. No, I have not.

5 Q. Mr. Rocco, please state your current employer and business address.

6 A. I am employed by Central Hudson and my business address is 284 South
7 Avenue, Poughkeepsie, New York 12601.

8 Q. Mr. Rocco, in what capacity are you employed by Central Hudson and
9 what is your scope of responsibilities?

10 A. I am employed by Central Hudson as Director, Credit and Collections. In
11 that capacity, my responsibilities include managing the Contact Center
12 collections operation and overseeing back-office customer support. I am
13 responsible for ensuring that Central Hudson's business policies and
14 procedures are in compliance with all Home Energy Fair Practices Act
15 ("HEFPA") regulations. It is also my responsibility to ensure that exception
16 work generated within our billing system is completed in a manner that
17 minimizes the impact to our customers.

18 Q. Mr. Rocco, what is your educational background and professional
19 experience?

20 A. I received a Bachelor of Science degree in Business Administration from
21 Marist College in 2017 and received my Master of Business Administration
22 from Syracuse University in 2022. Since 2014, I have been continuously
23 employed by Central Hudson in various positions within Customer

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Account Services. My prior responsibilities included Customer Account
2 Services Supervisor and Service Supervisor. Prior to my employment with
3 Central Hudson, I had more than ten years of Contact Center
4 management experience.

5 Q. Mr. Rocco, have you previously testified before the Commission?

6 A. Yes. I have testified before the Commission in Cases 20-E-0428 and 20-
7 G-0429.

8 Q. Mr. Dooley, please state your current employer and business address.

9 A. I am employed by Central Hudson and my business address is 284 South
10 Avenue, Poughkeepsie, New York 12601.

11 Q. Mr. Dooley, in what capacity are you employed by Central Hudson and
12 what is your scope of responsibilities?

13 A. I am employed by Central Hudson as Senior Director of Customer Billing.
14 In that capacity, I am responsible for oversight of the customer billing
15 team. This team is tasked with billing exception management, responding
16 to customer inquiries related to billing, and testing system changes related
17 to billing.

18 Q. Mr. Dooley, what is your educational background and professional
19 experience?

20 A. I received a Bachelor of Science degree in Business from Marist College
21 in 2008 and received my Master of Business Administration also from
22 Marist College in 2014. I started with Central Hudson in 2011 and joined
23 the Customer Billing team in August 2022. During my time with Central

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Hudson, I have held positions in Treasury, Business Development, Fleet,
2 Supply Chain and Customer Service. Prior to joining Central Hudson, I
3 held positions in Finance and Construction Management.

4 Q. Mr. Dooley, have you previously testified before the Commission?

5 A. No, I have not.

6 Q. Mr. Brandt, please state your current employer and business address.

7 A. I am employed by Central Hudson and my business address is 284 South
8 Avenue, Poughkeepsie, New York 12601.

9 Q. Mr. Brandt, in what capacity are you employed by Central Hudson and
10 what is your scope of responsibilities?

11 A. I am employed by Central Hudson as Senior Director of Customer Field
12 Services. In that capacity, my responsibilities include managing Customer
13 Field Services which includes the Commercial Department, Meter Reading
14 Department, and Customer Field Services Contractor Operations. I
15 provide oversight daily to a combined force of approximately 100
16 Company employees and contractors. I am responsible for ensuring all
17 customer requested service work at their homes and businesses is
18 completed safely, professionally, and efficiently. This includes items such
19 as Gas and Electric Emergency Response, Scheduled Customer
20 Appointments, Service orders, Dispatch orders, New Business Requests,
21 and System Maintenance repairs and inspections as required as well as
22 many other field operations. I am also responsible for the Meter Reading
23 System Operations which include management of Meter Reading

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Supervision and Field Supervisors and Contractor Meter Reading
2 oversight. Also, I am responsible for Contractor Meter Mechanics who
3 work our Distribution Improvement projects and New York State-required
4 Indoor Corrosion and Leak Survey Corrosion Inspectors.

5 Q. Mr. Brandt, what is your educational background and professional
6 experience?

7 A. I received an Associate degree in Business Administration in 1987 from
8 Columbia-Greene Community College and a Bachelor of Science degree
9 in Business Economics from Oneonta State University in 1990. I have
10 been continuously employed by Central Hudson and CH Energy Group in
11 many positions over the past 30 years. My prior positions include multiple
12 Power Plant Operation positions, Gas Capital Construction Mechanic,
13 Energy Marketing Specialist, Energy Account Executive (Central Hudson
14 Enterprises-CH Energy Group), Service Supervisor, New Business
15 Counselor, Estimating Supervisor, Operating Supervisor-Commercial
16 Dept., and Director- Commercial and Contractor Operations. Prior to my
17 employment with Central Hudson, I worked for Osmose Utilities, GTE, and
18 Matrix Communications in various Technician, Foreman roles. I have also
19 served in various Committee Chairmanship positions for the AGA
20 (American Gas Association) and NGA (Northeast Gas Association) over
21 my career, as well as the NGA/PSC Advisory Committee, NYPERI, and
22 multiple NGA SME Committees over my career.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Q. Mr. Brandt, have you previously testified before the Commission?

2 A. Yes. I have testified before this Commission in Cases 20-E-0428 and 20-
3 G-0429.

4 Q. Mr. Vazquez, please state your current employer and business address.

5 A. I am employed by Central Hudson and my business address is 284 South
6 Avenue, Poughkeepsie, New York 12601.

7 Q. Mr. Vazquez, in what capacity are you employed by Central Hudson and
8 what is your scope of responsibilities?

9 A. I am employed by Central Hudson as Director of Digital Experience. In
10 that capacity, my responsibilities include customer experience
11 improvements to the website, mobile app and chatbot.

12 Q. Mr. Vazquez, what is your educational background and professional
13 experience?

14 A. I received a Bachelor of Science degree in Business Economics from
15 Oneonta State University in 1993. I started with Central Hudson in 2019.
16 Prior to joining Central Hudson, I held various operational and testing
17 positions in the Banking and Healthcare industries.

18 Q. Mr. Vazquez, have you previously testified before the Commission?

19 A. No, I have not.

20 **II. PURPOSE OF TESTIMONY**

21 Q. What is the purpose of the Panel's testimony in these proceedings?

22 A. The purpose of this testimony is to: 1) discuss the SAP Customer
23 Information System ("CIS") transition and the Company's performance

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 relative to its customer service performance indicators (“CSPIs”); 2)
2 discuss the Company’s initiatives to enhance customer service including a
3 transition to monthly meter reading, technology investments that improve
4 communication and interactions with customers while providing more self-
5 service options and increasing the ease of use for key existing self-service
6 options, consumer outreach improvements to our most vulnerable
7 customers, and improvements to the benchmarking of customer service
8 through JD Power; 3) discuss the Company’s proposed changes to the
9 Residential Customer Satisfaction Survey and the PSC Complaint rate in
10 order to more accurately and appropriately measure customer sentiment
11 and better align the Company’s metrics with statewide methodologies; 4)
12 discuss the need for additional resources to bolster the Company’s efforts
13 to manage the aftermath of the COVID pandemic and the resulting record
14 amount of customer arrears; and 5) discuss the continuation of the
15 deferral of debit and credit card fees in order to provide certainty around
16 customers’ ability to continue utilizing these payment methods.

17 Q. Is the Panel sponsoring any exhibits in support of its testimony?

18 A. Yes. This Panel is sponsoring the following exhibits that were prepared by
19 or under the direction of the Panel or one of its members:

20 Exhibit __ (CEP-1) contains the System Performance and Customer
21 Service Dashboard;

22 Exhibit __ (CEP-2) contains details related to the Digital Customer
23 Experience (“DCX”) Portfolio;

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

Exhibit __ (CEP-3) contains the proposed targets and associated revenue adjustments for the Residential Customer Satisfaction Survey to serve as the basis for the Customer Satisfaction Index calculation; and

Exhibit __ (CEP-4) contains the impact of collections efforts on the Customer Experience headcount forecast for the period of 2023–2028.

III. SAP TRANSITION AND CUSTOMER SERVICE PERFORMANCE

Q. Please discuss the SAP CIS transition.

A. On September 1, 2021, Central Hudson launched its new SAP-based CIS. Immediately after the launch, there were issues with its new SAP CIS that resulted in impacts to a portion of Central Hudson's customers, including through delayed and inaccurate invoices, confusion, and anxiety. Despite Central Hudson's best efforts to correct the issues, the issues continued, and Central Hudson experienced a rise in customer complaint levels, harsh criticism from politicians, and questions from the Commission and others seeking to understand the problems with the SAP CIS. Central Hudson redoubled its efforts with the help of its union and management employees, third-party experts, and contractors to correct all issues.

Q. Has Central Hudson tracked the impact to service levels associated with the launch of SAP CIS and associated events?

A. Yes, the Company developed a dashboard which outlines Central Hudson's progress along six key metrics. These metrics are % Current Bills, % Bills Requiring Adjustments, Actual Bills Replaced with Estimates,

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Call Service Level, % of Calls Abandoned, and Average Wait Time. As of
2 the date of this filing, the most recent version of this dashboard dated July
3 20, 2023, has been included as Exhibit __ (CEP-1).

4 Q. Has performance associated with these metrics returned to pre-SAP CIS
5 launch levels?

6 A. All of the metrics are close to, at, or above performance levels associated
7 with the period prior to the SAP CIS launch. Additionally, significant
8 improvement can be seen in all of the metrics relative to the peak of the
9 SAP CIS issues.

10 Q. Please summarize the performance increases associated with the metrics
11 listed in Exhibit __ (CEP-1).

12 A. First it is important to note that progress towards resolving the SAP CIS
13 issues was significantly impacted by the Columbia Utilities default with the
14 New York Independent System Operator, which generated an unexpected
15 billing impact to over 25,000 customers. This can be seen in each key
16 performance indicator ("KPI") from July through September of 2022.

- 17 • % Of Current Bills has stabilized on or around 98%, from a low point of
18 90% in September of 2022.
- 19 • % Bills Requiring Adjustments is near 3% and has shown significant
20 improvement from its peak of approximately 10%.
- 21 • Actual Bills Replaced with Estimates has improved from a peak of
22 approximately 16% in December of 2022 to a level of 3%.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

- Call Service Level (percent of calls answered by a representative within 30 seconds), which is an existing CSPI, is approximately 75%, which is above the target established in the Commission's Order Adopting Terms of Joint Proposal and Establishing Electric and Gas Rate Plan issued on November 18, 2021 in Cases 20-E-0428 and 20-G-0429 ("2021 Rate Plan").
- % Of Calls Abandoned is slightly below the historic level of 7% associated with the Average Wait time of approximately three minutes.

It is important to note that the number of customer contacts and confusion have also been exacerbated by significant increases in commodity costs.

During this time, both electric and natural gas commodity prices have increased by over 100%.

Q. Does the Company expect to be at or above baseline (period prior to the SAP CIS launch) performance levels for these metrics prior to July 1, 2024?

A. Yes, the Company is working on all outstanding issues and expects to return to or exceed baseline performance levels for each of these metrics.

Q. Have any other metrics been impacted by the SAP CIS launch?

A. Yes, issues with the SAP CIS launch have also impacted the performance of the Company's CSPIs, which were established in the 2021 Rate Plan.

Q. Please list the Company's CSPIs.

A. The CSPIs consist of the following measures: (1) PSC Complaint Rate; (2) Residential Customer Satisfaction Survey; (3) Percent of Calls Answered

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 by a Representative within 30 Seconds; and (4) Appointments Kept. The
2 Residential Service Terminations/Uncollectible Target metric was paused
3 for the term of the rate plan. All metrics are measured on a calendar year
4 basis.

5 Q. To date, has the Company met all the CSPI targets established in the
6 2021 Rate Plan?

7 A. No, Central Hudson has not met all of its CSPI targets and as a result has
8 incurred negative revenue adjustments. The Company has met the
9 Percent of Call Answered by a Representative within 30 seconds with
10 67.84% in 2021 and 72.55% in 2022. The Company met the target of
11 PSC Complaint rate in 2021 with 0.92 but failed to meet the target in 2022
12 with a value of 11.34 complaints per 100,000 customers. The Company
13 did not achieve the target for the Residential Customer Satisfaction
14 Survey in either 2021 or 2022 with results of 85% and 66.7%, respectively.
15 There is no target associated with Appointments kept, but the Company in
16 both 2021 and 2022 kept over 99% of scheduled appointments in each
17 year. Of the few appointments missed, those customers were credited
18 \$20 as required.

19 **IV. CUSTOMER SERVICE IMPROVEMENT AND ENHANCEMENTS**

20 Q. Is Central Hudson proposing any changes that will improve or enhance
21 Customer Experience?

22 A. Central Hudson is proposing four initiatives to enhance and improve
23 customer experience. These initiatives include: 1) a transition to monthly

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

meter reading; 2) technology investments that improve communication and interactions with customers while increasing the number and ease of use of self-service options; 3) bolstering consumer outreach to our most vulnerable customers; and 4) utilizing JD Power to improve the benchmarking of customer service in order to measure Central Hudson's performance directly against other utilities and provide a basis for establishing performance improvement goals.

A. IMPLEMENTATION OF MONTHLY METER READING

Q. Please briefly describe the Company's proposed transition to monthly meter reading from the present bi-monthly structure.

A. Central Hudson has evaluated and developed a plan to adjust its billing practices and to conduct monthly meter reads, thereby eliminating alternate month bill estimates. This plan was filed on January 17, 2023, in Case 22-M-0645 and fully lays out the timeline and the incremental costs and resources required for the transition. On July 27, 2023, DPS Staff and the Company reached an interim agreement which prescribes an acceleration of the originally proposed timeline. The transition to monthly meter reading is aligned with residential customer sentiments that show a preference for monthly meter reads and dissatisfaction with bi-monthly billing estimates. Due to the timing of the interim agreement, this item is subject to update as stated in the testimony of the Revenue Requirements Panel.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Q. Why does the Monthly Meter Reading Plan propose a phased roll out?

2 A. A phased roll out of monthly meter reading is designed to protect
3 customers by limiting any programming defects discovered within the “real
4 world environment” to the smallest group of customers possible. The
5 intent of the phased roll-out would be to first implement the program for a
6 very specific subset of customers, then to expand the program to an initial
7 meter reading route, and next to each of the Company’s five districts, until
8 full scale implementation is achieved.

9 Q. Please describe the incremental annual costs and resources required to
10 implement monthly meter reading.

11 A. The incremental annual costs equate to approximately \$4.4 million. These
12 incremental costs are comprised of recurring and one-time operating and
13 maintenance (“O&M”) costs as well the return on and of approximately
14 \$1.8 million of capital expenditures.

15 • Annual O&M costs related to the transition to monthly meter reading
16 will be approximately \$4.0 million. The majority of this cost is
17 attributable to additional meter reading resources, with the small
18 remainder driven by maintenance costs of meter reading hardware
19 and maintenance and fuel costs for meter reading vehicles. Meter
20 reading resources are assumed to be fulfilled by both external

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 contractors and internal labor. Based on the timeline noted above,
2 these resources will be hired subsequent to the Rate Year.

- 3 • Capital Expenditures related to the transition to monthly meter reading
4 are estimated to be approximately \$1.8 million, largely driven by
5 vehicle purchases and technology investments such as meter reader
6 equipment, mobile radios, tough-pad tablets, and programming
7 modifications in the SAP CIS system. These costs are included within
8 the Company's capital forecast. Additionally, costs associated with
9 the return on and of associated capital investments are estimated to
10 be approximately \$0.4 million.

- 11 • In addition to the recurring costs noted above, one-time O&M expense
12 associated with a customer outreach campaign is estimated to cost
13 \$0.2 million.

14 Q. Does the Company have anything else to add regarding the transition to
15 monthly meter reading?

16 A. Given the timing of the interim agreement, the full costs associated with
17 the revised monthly meter reading plan included in the interim agreement
18 are not reflected in the Rate Year revenue requirements. As such, the
19 Company proposes that revenue requirements be updated at a later stage
20 in this proceeding for all impacted components of revenue requirements
21 pertaining to the monthly meter reading plan.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

B. **IMPROVEMENT OF CUSTOMER EXPERIENCE TECHNOLOGY**

Q. Please describe the Company's technology investments that will improve communications and interactions with customers while providing more self-service options and increasing the ease of use for key existing self-service options.

A. The Company seeks to implement a portfolio of projects in the Rate Year ending June 30, 2025, requiring \$5.3 million in capital expenditures. These projects are also reflected in Exhibit __ (CEP-2) and discussed in testimony of the Technology Capital and Operations Panel. The portfolio contains the following projects: 1) Interactive Voice Response ("IVR") Modernization, 2) Customer Web and Mobile Technology Improvements including a dedicated experience for commercial customers, and 3) a centralized notification system.

Q. What are the current limitations and challenges of the Company's current IVR system that require modernization?

A. A major limitation of the current IVR system is the ability to integrate with other channels. Many customers interact with the Company via a mobile phone to call, visit the website, or navigate the mobile application. However, the current IVR system was designed prior to increased customer demand for that customer journey and does not include integration with web or application-based service offerings. Additionally, the current IVR solution is limited in its ability to easily make efficiency changes to the routing and handling of calls during high-volume or storm

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 situations. Finally, the Company needs the ability to make changes
2 without relying on a vendor, which creates long lead-times, as is done
3 today.

4 Q. Please describe the Company's investment in IVR modernization.

5 A. Central Hudson will invest approximately \$1.7 million within the Rate Year
6 and \$3 million by the end of 2025 to replace the current on-premises IVR
7 system with a cloud-based IVR solution that will enable features such as
8 Voice Recognition, and VoiceBots that will augment contact center live
9 agent support by providing self-service voice capabilities for customers.
10 Additionally, features such as Visual IVR and predictive call routing will be
11 implemented, to match the call with the optimal Contact Center agents
12 that have been provided additional information and analytics on the
13 customer call. Finally, the new IVR will allow customers on digital
14 platforms to seamlessly transition between channels.

15 Q. What enhancements to Customer Web and Mobile Technology is the
16 Company proposing?

17 A. Central Hudson is proposing approximately \$3.6 million during the Rate
18 Year to enhance its customer-facing Web and Mobile Technology
19 interfaces. First, the Company will be evaluating all customer-facing
20 digital channels for alignment with the Americans with Disabilities Act
21 standards. This evaluation will identify gaps to allow future enhancements
22 to be in alignment with standards for customers with disabilities. Second,
23 the Company will be redesigning the MyAccount page on its website as

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 well as the mobile application. Approximately 60% of customers have an
2 active online account with Central Hudson. Efforts are being made to
3 capture additional customers through various outreach channels. These
4 customers access their accounts via their MyAccount page for information
5 about their bills, make payments, and enroll in a variety of programs.
6 Concurrently with bill design efforts, the MyAccount page will become
7 easier to use as customers will utilize a more familiar and modern
8 appearance with easy-to-understand information. In addition to this effort,
9 push notifications will be implemented through the mobile application.
10 Customer response rates to communication via a mobile phone, for
11 example through SMS texting, have proven to be an extremely effective
12 tool. Finally, the Company will implement new website features, like
13 "streetlight out" reporting and additional energy calculators.

14 C. **ENERGY AFFORDABILITY PROGRAM**

15 Q. How many customers were enrolled in the Company's Energy Affordability
16 Program ("EAP") as of March 2023?

17 A. As of March 2023, 19,854 customers were enrolled in the EAP.

18 Q. Does the Company expect enrollment in the EAP to continue to grow?

19 A. Yes. As further explained below, the Company expects enrollment to
20 continue to grow and the Company's Forecasting and Rates Panel
21 projected future participation for purposes of setting the discounts.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Q. How does the Company intend to continue their EAP enrollment growth?

2 A. Central Hudson will continue to provide recommendations about the data
3 fields that need to be captured on the Home Energy Assistance Program
4 (“HEAP”) application which can be used during the Office of Temporary
5 Disability Assistance file share with all utilities. In addition, Central
6 Hudson will continue its Outreach and Education efforts to notify eligible
7 customers of the EAP and how to qualify for benefits.

8 Q. Based on actual and forecasted participation, will the Company have an
9 under collection for the EAP under the 2021 Rate Plan?

10 A. Yes, the Company anticipates having a regulatory asset for both electric
11 and gas for this program at June 30, 2024. The August 12, 2021 Order
12 Adopting Energy Affordability Policy Modifications and Directing Utility
13 Filings (“EAP Order”) in Case 14-M-0565, established new bill discounts
14 that, based on timing, were not incorporated into the revenue
15 requirements established in Cases 20-E-0428 and 20-G-0429 thereby
16 resulting in an under collection of EAP expense.

17 Q. What is the Company’s projected cost for the EAP in the Rate Year?

18 A. The August 2021 EAP Order requires an annual review of monthly bill
19 discounts to ensure that the discounts keep customer’s monthly energy
20 burden at 6% or less of their average annual household income, while at
21 the same time limiting the total program cost to 2% of annual revenues for
22 gas and electric. As further discussed in the testimonies of the
23 Forecasting and Rates and Revenue Requirements Panels, based on

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 review of annual revenues and the quantification of the expected 6%
2 energy burden in accordance with the EAP Order's prescribed
3 methodology, as well as the proposed updates to the monthly low income
4 bill discounts, is the Company anticipates that these programs will reach
5 the 2% cap for total program cost in the Rate Year. Reaching the cap
6 equates to a program budget and rate allowance of \$20.2 million for
7 electric and \$5.3 million for gas.

8 Q. Is the Company proposing any changes to the symmetrical deferral
9 mechanism for either component of the Company's EAP?

10 A. No.

11 D. **TARGETED CUSTOMER OUTREACH**

12 Q. What other actions is the Company taking to improve their Outreach and
13 Education in the community?

14 A. The Consumer Outreach organization is increasing the number of
15 representatives to have more visibility in the communities we service with
16 a goal to meet customers where they are more comfortable. The
17 increased staffing will enable the organization and the Company to
18 strengthen its engagement with customers. It will also increase the
19 Company's presence and education regarding the programs and payment
20 assistance opportunities available to customers at county/state agency
21 offices, libraries, senior housing communities and other community
22 events.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Q. Please describe the role of Central Hudson's Consumer Outreach
2 organization.

3 A. Central Hudson's Consumer Outreach organization has a few key
4 functions, including:

- 5 • Conducting community outreach with an emphasis on low income and
6 disadvantaged populations. This outreach includes sharing
7 information about NY State and Central Hudson's programs for low-
8 income customers, seniors, veterans, elderly, blind, disabled, and
9 other.
- 10 • Maintaining compliance with HEFPA.
- 11 • Responding to customers who file complaints with the Commission.
12 This includes analyzing and investigating complaints, responding to the
13 customer, and tracking and closing the complaints in the PSC Portal.
- 14 • Responding to customers whose complaints arrive via other channels,
15 including state elected officials (Attorney General, state legislative),
16 county executives, members of Congress, and others.
- 17 • Compiling accurate and complete filing data and credits relative to NY
18 State and Central Hudson low income programs, such as HEAP, the
19 Good Neighbor Fund, and any other emergency measures that may be
20 developed such as the Arrears Management Program or Emergency
21 Rental Assistance Program.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

- 1 Q. How many employees currently exist within the Consumer Outreach
2 organization?
- 3 A. For much of 2022, Consumer Outreach fluctuated between three to five
4 members. This included between two to four Consumer Outreach
5 Representatives and a Consumer Outreach Director. Due to an inability to
6 keep pace with the increased rate of incoming PSC complaints, beginning
7 in July 2022, the organization was supplemented by Central Hudson
8 employees from other departments. Also beginning in July, the
9 organization was supplemented by contract resources to assist with
10 analysis associated with PSC complaints. In 2023, a decision was made
11 to increase the employee headcount within the organization so that PSC
12 complaints could be handled in a more sustainable manner and so that
13 the Company could more effectively engage with and assist employees in
14 the community at events and meetings. The organization added three
15 additional Consumer Outreach Representatives, bringing its total
16 population of employees to seven. By July 1, 2024 five additional
17 employees will be hired including three additional Consumer Outreach
18 Representatives, one Consumer Outreach Director, and one Consumer
19 Outreach Supervisor. The Consumer Outreach department will continue
20 to rely in part on contract support to fulfill its mission, including using those
21 resources to assist with investigating and closing PSC and elected official
22 complaints.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Q. Why is Central Hudson adding positions to this organization?

2 A. PSC Complaints received by Central Hudson remain elevated with no
3 expectation that they will significantly diminish. Complaints from all
4 channels, including from elected officials, the Public Utility Law Project,
5 and the Better Business Bureau, continue to arrive at elevated levels
6 compared to historic norms. Historically, Central Hudson would receive a
7 few hundred complaints each year. In 2022, the Company received more
8 than 3,000 complaints. The Company is on track for a similar total in
9 2023. In addition to PSC Complaints, the Company receives around an
10 additional 75 to 150 complaints each month from elected officials and
11 other channels. On average it takes approximately 2.5 hours to handle
12 each complaint including time to review, process, analyze, communicate
13 with the customer, and close the complaint. The increase in Consumer
14 Outreach staff and their work is aimed not only at resolving PSC
15 complaints, but also at conducting important outreach activities in the
16 communities we serve in order to answer questions before they become
17 complaints. The organization ramped up outreach this year to visit senior
18 centers, conduct open house events, partner with elected officials to meet
19 directly with customers, attend community events to meet customers in
20 disadvantaged communities and more. Consumer Outreach also plays a
21 key role in assisting customers who have greater challenges. This
22 includes work to manage or assist with the Company's EAP, enrolling
23 customers in Deferred Payment Agreements ("DPAs"), facilitating the

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 donations of gift certificates, administering the Company's Good Neighbor
2 Fund, managing the Company's HEAP program and Life Support
3 Equipment program, and assisting our elderly, blind and disabled
4 customers, among other helpful activities.

5 Q. Why is it important to bolster customer assistance activities, outreach and
6 participating in community events?

7 A. As Central Hudson resumes collection activities it will be important to
8 guide customers that require assistance to resources such as HEAP, the
9 EAP, and the Good Neighbor fund. To increase the number of eligible
10 customers that are aware of these programs, the Company will need to
11 participate in community events, increase its presence at Social Service
12 agencies, hold open houses, and find other ways to communicate with
13 and assist customers.

14 E. **J.D. POWER BENCHMARKING STRATEGY**

15 Q. Did the Management Audit conducted in Case 21-M-0541 include a
16 recommendation related to benchmarking of customer service operations?

17 A. Yes. The Management Audit included Recommendation 8.1, which
18 recommends that the Company implement performance benchmarking for
19 customer service operations in the Contact Center, Meter Reading,
20 Customer Field Services and for customer satisfaction, using JD Power or
21 another benchmarking data source.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Q. What investments in benchmarking is the Company proposing?

2 A. The Company's Management Audit Implementation Plan responded to
3 recommendation 8.1 with a plan to partner with J.D. Power to participate
4 in a subset of the following offerings: Electric Residential Study, Electric
5 Business Study, Utility Digital Study, and a Customer Service Excellence
6 Study. The Company investment to participate in these studies is
7 approximately \$164,000 during the Rate Year.

8 Q. Why does the Company believe this benchmarking is necessary to
9 improve the customer experience?

10 A. Benchmarking will allow Central Hudson to measure its performance
11 directly against other utilities and provide a basis for establishing
12 performance improvement goals.

13 Q. What information will be provided through these studies?

14 A. The Electric Residential and Electric Business studies provide similar
15 information relating to each of the respective customer sectors. The
16 Company will have access to competitive industry data that provides a
17 comparison between utility peers, the industry, and the highest performers
18 across six key factors at both the national and regional levels. These
19 factors are Power Quality & Reliability, Customer Care, Price,
20 Communications, Billing & Payment, and Corporate Citizenship. Special
21 Survey categories include Net Promoter Score, Move-In/Transfer Service,
22 Brand Strength, Products & Services, and Electric Vehicles.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Q. What does the Utility Digital Study provide?

2 A. This study evaluates digital channels across the Company and how
3 customers interact with them. Customers are asked to rate the usage for
4 tools like setting up an online account, account log in, making a payment,
5 viewing consumption history, report outages, among others. The
6 information provided from customers will give insight into ease of
7 navigation, appearance, clarity of the information, speed of loading pages,
8 and range of services.

9 Q. What is the Customer Service Excellence Study?

10 A. This is a benchmarking study to understand how the Company compares
11 to peers in delivering best in class customer service. This includes access
12 to best practices, customer experience and operational data, identification
13 of performance gaps, and expert guidance on improvements.

14 **V. CSPI MEASUREMENT AND ALIGNMENT**

15 Q. Is Central Hudson proposing any changes to its current CSPIs?

16 A. Yes, the Company is proposing to adjust (1) the calculation of the PSC
17 Complaint Rate; and (2) the survey method and calculation of the
18 Residential Customer Satisfaction Survey Metric. The Company is not
19 proposing any changes to the Percent of Calls Answered by a
20 Representative within 30 Seconds or the Appointments Kept metric or
21 targets. Proposed targets and associated revenue adjustments for the
22 Residential Customer Satisfaction Survey Metric are shown in Exhibit ____
23 (CEP-3).

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Q. What changes is the Company proposing associated with the PSC
2 Complaint Rate?

3 A. The Company proposes excluding the complaints associated with
4 commodity prices that are outside of the Company's control.

5 Q. Why does the Company believe this exclusion is appropriate?

6 A. Complaints around this topic are outside of the Company's control.
7 Therefore, complaints resulting from the price of electric and/or gas
8 energy and/or capacity or the operation of the Company's Energy Cost
9 Adjustment Mechanism ("ECAM") and/or Gas Supply Charge ("GSC") do
10 not present a just cause for charging a complaint against the Company
11 and do not show or point to any deficiency in the Company's service to
12 customers. Additionally, this exclusion would increase alignment across
13 the state, as this exclusion was included in Con Edison's Joint Proposal
14 recently approved by the Commission.

15 Q. Is the Company proposing a change to the target associated with the PSC
16 Complaint Rate metric?

17 A. No, the Company believes that, with the proposed adjustment to the
18 calculation of the metric, no change to the target is needed at this time.

19 Q. Please describe the changes the Company is proposing associated with
20 the Residential Customer Satisfaction Survey.

21 A. Central Hudson proposes to replace the Residential Customer Satisfaction
22 Survey instrument with the statewide customer satisfaction survey
23 designed by the utilities and DPS Staff and implemented on a pilot basis

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

per the October 18, 2018, Order in Case 15-M-0566 (“Survey Order”).

The Customer Satisfaction Index will be calculated from one question, with a five-point scale for customer satisfaction. The question is “Thinking about your most recent transaction with Central Hudson, how satisfied are you?” The responses are scored as follows: (1) Very Dissatisfied, (2), Dissatisfied, (3) Neither Satisfied or Dissatisfied, (4) Satisfied, (5) Very Satisfied. Finally, Central Hudson proposes that the Residential Customer Satisfaction Survey metric be split into two survey groups (High Priority interactions and General Account & Billing interactions). These changes will more accurately and appropriately measure customer sentiment and better align the Company’s metrics with statewide methodologies.

Q. Please describe why the statewide survey is more appropriate than the current Residential Customer Satisfaction Survey.

A. The statewide survey method is a better representation of customer satisfaction than the current survey for the following reasons: 1) the survey was designed to align with current customer preferences to encourage participation through ease of use instead of filling out a cumbersome paper-based survey; 2) the survey will include customers who interact with the Company through multiple channels including phone, text, web & mobile app self-service channels, and also field visits; 3) the survey is a consistent measurement that all New York State Utilities utilize and was recommended for permanent use by the DPS.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Q. Has Central Hudson implemented this survey and, if so, how much data
2 has the Company collected via this survey over time?

3 A. Yes. Consistent with the Survey Order, Central Hudson has administered
4 the survey through email since January 2019. The responses from the
5 survey have been reported within the monthly Performance Indicator
6 Report ("PIR") on a quarterly basis in Case 15-M-0566.

7 Q. Will Central Hudson include survey channels other than e-mail?

8 A. Yes, although Central Hudson has e-mail addresses for approximately
9 60% of its residential customers it is important to include the sentiments of
10 customers that prefer other communication channels. The Company
11 proposes that the survey will include multiple channels including phone,
12 text, web & mobile app self-service channels, and also field visits.
13 Additionally, phone interactions may result in a post call phone survey, an
14 email survey, or a text survey. A simple average weighting of the survey
15 responses gathered through these channels will be utilized.

16 Q. Are there any other changes to the residential customer survey?

17 A. Yes, the Company is proposing to sort all interactions into two categories:
18 1) High Priority and 2) General Accounts and Billing.

19 Q. Please discuss why the Residential Customer Satisfaction Survey should
20 be split into two metrics consisting of High Priority interactions and
21 General Account & Billing interactions.

22 A. High Priority interactions and General Account & Billing interactions
23 address very different customer issues and resolution expectations.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Satisfaction to the Company's response to these issues should be
2 measured separately and distinctly in order to allow accurate and precise
3 tracking of these issues and the respective customer satisfaction level with
4 the Company's response.

5 Q. Please describe how High Priority interactions will be categorized.

6 A. High Priority Interactions, which include interactions that are safety and
7 reliability related, will be defined as follows: Gas Odor calls, Electrical
8 Emergency reports, Customer reported Outages, and Reports of
9 streetlights out.

10 Q. Please describe how General Account & Billing interactions will be
11 categorized.

12 A. General Account & Billing interactions will be defined as follows:
13 Payments made, Budget Billing plan changes, ESCOs changes,
14 Notifications Preference changes, Installment Plans created, Energy
15 Efficiency program enrollments, Customer contact info updates, Meter
16 Read submissions, Start or Transfer of Service, Bill cancellations,
17 NYSERDA OBF, Energy Affordability Program Credit, HEAP commitment,
18 Debits/Credits, ERT Opt Out, Permit/Pressure Test, Meter changes, Rate
19 changes, Field Visits and Service Orders.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

Q. Has this type of proposal separating these two issues into separate Residential Customer Survey metrics, and targets been put forward previously?

A. Yes, separate metrics and targets for Customer Satisfaction were established within Con Edison's recently approved Joint Proposal based on the priority and urgency of the interaction.

Q. What targets does the Company propose for the Customer Satisfaction survey metrics?

A. As shown in Exhibit __ (CEP-4), the three-year average for High Priority interactions and General Account & Billing interactions was 3.58. The Company's proposed targets for High Priority Interactions and General Account & Billing Interactions are both 3.08 for calendar year 2025. These targets are shown in the table below.

Customer Satisfaction Index of General Account & Billing Interactions	
CSI Satisfaction Index	(NRA) BPs
≥3.08	None
<3.02	(2.5)
≤2.96	(5)
≤2.90	(7.5)
Customer Satisfaction Index of High Priority Interactions	
CSI Satisfaction Index	(NRA) BPs
≥3.08	None
<3.02	(2.5)
≤2.96	(5)
≤2.90	(7.5)

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

These targets are reasonable, especially given the future customer service challenges expected as a result of the historic levels of arrears following the COVID pandemic, which is discussed in more detail below.

VI. THE COVID PANDEMIC AFTERMATH AND CUSTOMER ARREARS

Q. Please describe the current state of customer arrears following the COVID-19 Pandemic?

A. Customer arrears balances have grown significantly since the Company suspended collections activity for all customers in March of 2020. The suspension of collection activities continued until very recently in light of the COVID Pandemic, the Parker-Mosley Act of 2020, the Parker-Richardson Act of 2021, and collection limitations included within the Arrears Relief Programs. From February 2020 through June 30, 2023, residential Arrears Balances greater than 60 days grew by 1,044% to \$96 million while non-residential arrears grew by 1,971% to \$29 million. Additionally, the number of residential customers with arrears greater than 60 days has grown by 224% to 66,000, while the number of non-residential customers with arrears has grown by 401% to 10,000. Additionally, residential arrears balances less than 60 days have also increased since the COVID-19 Pandemic to \$16 million while non-residential arrears grew to \$11 million, which are 106% and 308% increases, respectively. Additionally, although the Company has begun a very measured approach to restarting collections activities, it is expected that these balances will continue to grow prior to July 1, 2024.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Q. In light of these historic arrears balances how has the Company
2 forecasted uncollectible expense for inclusion in this rate filing?

3 A. The suspension and measured restart of collection activities has
4 significantly distorted the data that would be necessary to develop an
5 accurate forecast of uncollectible expense. At this point, the Company
6 cannot reasonably predict the level of net write-offs that will occur in the
7 Rate Year. While there was an uptick in net write-offs experienced in the
8 historic year, this was primarily attributable to writing off arrears balances
9 for shuttered businesses and residential customers that vacated their
10 residences. At this time, there is a significant level of uncertainty
11 surrounding the level of net write-offs that may be experienced, as well as
12 the timing. As a result of the uncertainty, the Company is proposing that it
13 (1) maintain the rate allowance for the delivery portion of uncollectibles
14 that was provided for in the 2021 Rate Plan for the rate year ended June
15 30, 2024; (2) assume the same uncollectible % for fuel and other
16 surcharge components of the bill as established in the 2021 Rate Plan;
17 and (3) continue with modification the uncollectible true-up mechanism
18 afforded under the 2021 Rate Plan.

19 Q. Why does the Company anticipate uncertainty of net write-offs in the Rate
20 Year?

21 A. The Company's measured approach to collection activities will provide
22 time for customers to acclimate to collection activities and for the
23 Company to learn how to best help the customers that require assistance

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 by determining eligibility for DPAs, the EAP, HEAP, etc. Reaching the
2 unprecedented number of customers in arrears will take time, and any
3 subsequently established DPAs will have a significant impact on timing of
4 when arrears may actually get written off.

5 Q. What are the proposed modifications to the existing true-up mechanism?

6 A. First, accompanying the uncertainty surrounding collections and bad debt
7 net write-offs is an uncertainty about future costs for collection agency
8 fees. As such, the Company proposes that the uncollectible true-up
9 mechanism should be extended to capture deferral for collection agency
10 fees over or under amounts included in rates. Second, currently the
11 Company's true-up mechanism requires that net write-offs compared to
12 bad debt billed exceed a threshold equivalent to ten basis points in order
13 for deferral to be allowed. For the reasons noted above regarding the
14 great uncertainty in the magnitude and timing of net write-offs, the
15 Company proposes that the ten basis point threshold be removed from the
16 operation of the true-up mechanism. With removal of the threshold,
17 customers and the Company will both be fully protected from future
18 uncertainty. It should also be noted that absent a true-up mechanism for
19 uncollectible expense, the rate allowances assumed in the development of
20 revenue requirements and the proposed uncollectible factors, which as
21 previously noted are all consistent with those established for the Rate
22 Year ended June 30, 2024, would have to be adjusted.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Q. In light of these historic arrears balances and uncertainty around net write-
2 offs, what treatment does the Company propose for the Residential
3 Service Terminations / Uncollectible Incentive Mechanism?

4 A. This metric was paused under the provisions of the 2021 Rate Plan. As
5 such, the Company proposes that this incentive mechanism continue to be
6 paused for the Rate Year.

7 Q. Is there a need for incremental personnel to implement the Company's
8 collection efforts?

9 A. Yes. The Company will require additional Collectors, Contact Center
10 personnel, and billing department personnel in order to carry out
11 collections efforts, address customer inquiries and concerns, match
12 customers with assistance programs and help customers through the
13 collection process.

14 Q. Please identify the rationale for the incremental Contact Center personnel
15 that will be required.

16 A. As shown in Exhibit __ (CEP-4) customer interactions associated with
17 collections activity is expected to grow significantly resulting in the need
18 for 33 incremental customer service full time equivalents ("FTEs"),
19 comprised of both full time and part-time employees. The number of
20 residential customers in arrears has increased from a pre-pandemic level
21 of approximately 21,000 to a current level of 66,000. During the pre-
22 pandemic period Central Hudson handled an annual average of 340,000
23 collection-related calls that correspond to the approximately 21,000

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 residential customers in arrears. Central Hudson is forecasting the level
2 of collection calls to increase at the same proportion as residential
3 customers in arrears resulting in approximately 1.1 million collection
4 related calls in 2024. In order to handle the expected significant influx of
5 collection calls while also meeting customer service expectations, the
6 Company will need to hire 33 incremental customer service FTEs and
7 continue an increased use of external call center personnel. Expense
8 associated with the external call center cost is estimated to be
9 approximately \$2.7 million in the Rate Year; this estimate was provided to
10 the Revenue Requirements Panel for inclusion in the development of
11 revenue requirements.

12 Q. Has the Company identified the need to create a group to focus directly on
13 difficult types of billing?

14 A. Yes. The Company recently created the Customer Billing Department.

15 Q. Please describe the purpose and role of the Customer Billing Department
16 that was created in August 2022.

17 A. The Customer Billing Department was assembled to handle three main
18 areas of billing: business process exception management ("BPEMs"),
19 customer contacts that require additional analysis, and facilitating accurate
20 and timely billing of complex billing accounts including: CDG, remote net
21 meter, net meter, time of use, demand, retail choice, budget bill, as well as
22 a combination of customer types therein.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

1 Q. Please identify the rationale for the incremental Customer Billing
2 personnel that will be required.

3 A. As shown in Exhibit __ (CEP-4), 11 incremental Customer Billing
4 personnel will be hired during the bridge period and are required in order
5 to investigate an estimated 10% of the collections calls in order to provide
6 customers with greater certainty regarding the accuracy of their arrears
7 balances. These customer interactions will be necessary in order to
8 provide a positive customer experience and facilitate a positive customer
9 action associated with their arrears balance.

10 Q. Are there other personnel needs that you have identified?

11 A. Yes. We will need ten additional field collectors and one additional
12 supervisor will also be hired in the bridge period.

13 Q. Why does Central Hudson require these additional field collectors?

14 A. Central Hudson's field collector staffing compliment has traditionally been
15 at 11 FTEs, however since the COVID-19 Pandemic and the subsequent
16 locking restrictions this compliment currently stands at six. As discussed
17 previously, residential arrears greater than 60 days have increased
18 significantly and the Company is increasing the field collector workforce in
19 order to facilitate an orderly and measured approach to collections
20 activities associated with the unprecedented level of customer arrears.

DIRECT TESTIMONY OF THE CUSTOMER EXPERIENCE PANEL

VII. CUSTOMER PAYMENT BY DEBIT & CREDIT CARD

Q. What is the Company's proposal regarding recovery of fees for customer payments by debit card, credit card, or at third party walk-in locations?

A. With the change in the arrears and uncollectible landscape, as previously discussed, there is significant uncertainty surrounding future customer payment behavior. As a result, similar to the Company's treatment of uncollectible expense, the Company is proposing that it maintain the rate allowance established by the 2021 Rate Plan for the rate year ended June 30, 2024 and to assume that any variation will be captured through the continued symmetrical deferral for this element of expense.

Q. Does this conclude your direct testimony at this time?

A. Yes, it does.
