STATE OF NEW YORK
PUBLIC SERVICE COMMISSION

CASE 24-E-0621 - In the Matter of Modifications to the New York State Standardized Interconnection Requirements and Application Process for New Distributed Generators and/or Energy Storage Systems 5 MW or Less Connected in Parallel with Utility Distribution Systems.

NOTICE EXTENDING DEADLINE

(Issued June 1, 2026)

By letter dated May 29, 2026, the New York Solar Energy Industries Association (NYSEIA) requests an extension of the June 1, 2026 payment deadline for Group B.1 projects that have not received preliminary work plans from the interconnecting utility. NYSEIA asserts that the Commission's intent, reflected in its January 23, 2026 Order on Interconnection Queue Management in this proceeding (Order), was to give developers one month between receiving a preliminary utility work plan and making the required interconnection payment. It states that granting a 30-day extension to Group B.1 project developers will ensure fairness while avoiding unintended prejudice to developers that are impacted by utility delays.

PLEASE TAKE NOTICE that the payment deadline for Group B.1 projects is extended to 30 days after the Group B.1 developers receive a preliminary work plan from the interconnecting utility. This extension is granted to promote the fair, orderly, and efficient conduct of this proceeding. Please refer to the Order and Case 24-E-0621 for any additional information.
