1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 (On record 9:01 a.m.)

3 A.L.J. COSTELLO: We're here on the
4 7th day of evidentiary hearings in cases 19-G-0309
5 and 19-G-0310. We'll begin with appearances and
6 we'll start with the companies.

7 MR. MALONEY: Good morning, Your
8 Honors, on behalf of the companies. My name is
9 Kenneth Maloney of the law firm of Cullen and Dykman.
10 Also appearing with me today are Phillip Decicco,
11 Patrick O'Brien and Jeremy Euto for the companies.

12 A.L.J. COSTELLO: Department of Public
13 Service Staff.

14 MR. FORST: For the Department of
15 Public Service Staff, you have Nicholas Forst,
16 Brandon Goodrich and Raquel Parks.

17 A.L.J. COSTELLO: Utility Intervention
18 Unit.

19 MS. KASOW: For the Department of
20 State Utility Intervention Unit, Jillian Kasow and
21 Katie O'Hare.

22 A.L.J. COSTELLO: Good morning.
23 Public Utility Law Project.

24 MS. WHEELLOCK: For PULP we have Laurie
25 Wheelock and Richard Berkley.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. COSTELLO: Good morning. City
3 of New York.

4 MR. CONWAY: For the City of New York
5 you have from the law firm of Couch White, LLP, Adam
6 Conway, Russell King and this afternoon Justin Fung.

7 A.L.J. COSTELLO: Okay. Thank you.
8 And is there anyone here who is making an appearance
9 who I didn't call? No. Okay. Not hearing anything,
10 I guess, we'll begin with the D.P.S. Staff Finance
11 Panel. Okay.

12 And what I'm going to ask you to do is
13 starting from the gentleman to my -- the furthest
14 from me, just state your name and business address
15 for the record.

16 MR. DUAH: My name is Kwaku Duah, K-W-
17 A-K-U D-U-A-H., Principal Utility Financial Analyst.
18 My address is 3 Empire State Plaza, Albany, New York
19 12223.

20 A.L.J. LEARY: Is your microphone on?

21 MR. DUAH: It's on.

22 A.L.J. LEARY: Okay. It needs to be
23 closer to all the witnesses.

24 MR. QADIR: Abdul Qadir, 3 Empire
25 State Plaza, Albany, New York.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. BULLOCK: Kenneth Bullock, Senior
3 Utility Financial Analyst, 3 Empire State Plaza,
4 Albany, New York.

5 A.L.J. COSTELLO: Okay. Please stand
6 and raise your right hand. Do you swear or affirm
7 that the testimony you will provide is the truth?

8 MR. DUAH: I do.

9 MR. QADIR: I do.

10 MR. BULLOCK: I do.

11 Kwaku Duah; Sworn

12 Abdul Qadir; Sworn

13 Kenneth Bullock; Sworn

14 A.L.J. COSTELLO: You have to say it
15 out loud. Okay. Thank you. You may be seated.
16 Counsel.

17 DIRECT EXAMINATION

18 BY MR. FORST:

19 Q. Panel members before you is a
20 document entitled prepared corrected testimony of
21 Staff Finance Panel consisting of a cover page and
22 134 pages of question and answers dated January 2020
23 and six exhibits submitted with your testimony
24 labeled S.F.P.-1 through S.F.P.-6. Is that correct?

25 A. (Mr. Duah) Yes.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. These exhibits have been pre-
3 marked as Exhibits 424 through 429. Panel members,
4 do you also have before you one exhibit labeled
5 S.F.P.-7 marked as Hearing Exhibit 430 and one
6 exhibit labeled corrected S.F.P.-7 marked as Hearing
7 Exhibit 530 dated January 2020. Is that correct?

8 A. Yes.

9 Q. Panel, did you also submit with
10 your testimony 32 additional exhibits labeled S.F.P.-
11 8 through S.F.P.-39?

12 A. Yes.

13 Q. These exhibits have been pre-
14 marked as Exhibits 431 through 462. Was this set of
15 testimony and exhibits prepared by you are under your
16 direct supervision?

17 A. Yes.

18 Q. Do you have any changes or
19 corrections to make to that testimony?

20 A. No.

21 Q. If you are asked the same
22 questions today under oath, would you answer them the
23 same way?

24 A. Yes.

Q. And do you affirm the information contained in your testimony and exhibits are true to the best of your knowledge, information and belief?

A. Yes.

MR. FORST: Your Honors, I would like to move the pre-filed corrected testimony of the Staff Finance Panel to be entered into the record as if given orally during the proceedings here today.

A.L.J. COSTELLO: The motion is granted and at this point the court reporter should insert the following file DPS Staff Finance Panel Corrected Direct testimony. #

BEFORE THE
STATE OF NEW YORK
PUBLIC SERVICE COMMISSION

In the Matter of

Brooklyn Union Gas Company d/b/a National Grid NY and
KeySpan Gas East Corporation d/b/a National Grid

Cases 19-G-0309 & 19-G-0310

JANUARY 2020

Prepared Corrected Testimony of:

Staff Finance Panel

Kwaku Duah
Principal Utility Financial
Analyst

Abdul Qadir
Associate Utility Financial
Analyst

Kenneth Bullock
Senior Utility Financial Analyst

Office of Accounting, Audits and
Finance
State of New York
Department of Public Service
Three Empire State Plaza
Albany, New York 12223-1350

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Q. Members of the Staff Finance Panel (SFP), please
2 state your names, current employer and business
3 address.

4 A. Our names are Kwaku Duah, Abdul Qadir, and
5 Kenneth Bullock. We are employed by the New York
6 State Department of Public Service (Department).
7 Our business address is Three Empire State Plaza,
8 Albany, New York 12223.

9 Q. Mr. Duah, what is your position at the
10 Department?

11 A. I am a Principal Utility Financial Analyst in the
12 Office of Accounting, Audits and Finance.

13 Q. Please describe your educational background and
14 professional experience.

15 A. I received my Master's degree in Business
16 Administration with a concentration in Finance
17 and Accounting from State University of New York
18 Institute of Technology, now known as SUNY
19 Polytechnic Institute, in 2005.

20 Q. Please briefly describe your current
21 responsibilities with the Department.

22 A. As a Principal Utility Financial Analyst, my
23 assignments involve analyzing the financial
24 condition, financing mechanisms, risk, costs of

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 debt and equity, diversification, and the
2 relative competitive position of utilities and
3 their holding company parent(s). My assignments
4 generally involve testifying in rate cases on
5 financial issues, analyzing financing proposals
6 and special projects that usually involve risk
7 and return analyses.

8 Q. Have you previously testified in a regulatory
9 proceeding before the New York State Public
10 Service Commission (Commission)?

11 A. Yes, I have presented testimony before the
12 Commission in rate cases concerning NYSEG/RG&E in
13 Cases 09-E-0715, 09-G-0716, 09-E-0717, and 09-G-
14 0718; Niagara Mohawk in Cases 08-G-0609, 10-E-
15 0500, 12-G-0202 and 12-E-0201; Long Island Water
16 Corporation in Case 11-W-0020; United Water New
17 Rochelle and United Water Westchester in Cases
18 13-W-0539, 13-W-0564 and 14-W-0006; Central
19 Hudson Gas and Electric in Cases 14-E-0318 and
20 14-G-0319; Central Hudson Gas and Electric in
21 Cases 17-E-0459 and 17-G-00460; Suez Water New
22 York in Cases 16-W-0130, 19-W-0168, 19-W-0269;
23 and New York American Water Company, Inc. in Case
24 16-W-0259.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Q. Mr. Qadir, what is your position at the
2 Department?

3 A. I am an Associate Utility Financial Analyst in
4 the Office of Accounting, Audits and Finance.

5 Q. Please describe your educational background and
6 professional experience.

7 A. I graduated from the University at Albany in 2004
8 and received a Bachelor of Science degree with
9 honors in Marketing and Finance. In 2007, I
10 earned a Master's degree in Economics with a
11 concentration in Finance and International Trade
12 from the University at Albany. Prior to joining
13 the Department, I worked in the banking industry,
14 primarily as a loan officer. I joined the
15 Department in March 2012.

16 Q. Please briefly describe your responsibilities
17 with the Department.

18 A. My responsibilities as an Associate Utility
19 Financial Analyst include analyzing a company's
20 financial condition, capital structures,
21 financing mechanisms, risks, costs of debt and
22 equity, diversification, and the competitive
23 position of utilities operating in New York
24 State. My responsibilities also include

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 analyzing financial petitions, performing rate of
2 return analysis and other special projects.

3 Q. Have you previously testified before the
4 Commission?

5 Yes. I have testified in the United Water New
6 York Inc. rate case, Case 13-W-0295; NYSEG and
7 RG&E rate cases, Cases 15-E-0283, 15-G-0284, 15-
8 E-0285 and 15-G-0286; Keyspan Gas East
9 Corporation d/b/a National Grid (KEDLI) and The
10 Brooklyn Union Gas Company d/b/a National Grid NY
11 (KEDNY) rate cases, Cases 16-G-0058 and 16-G-
12 0059; Corning Natural Gas Corporation (Corning)
13 rate case, Case 16-G-0369; and Central Hudson Gas
14 and Electric in Cases 17-E-0459 and 17-G-00460.

15 Q. Mr. Bullock, what is your position at the
16 Department?

17 A. I am employed as a Senior Utility Financial
18 Analyst in the Office of Accounting, Audits and
19 Finance.

20 Q. Please describe your educational background and
21 professional experience.

22 A. I received a Master of Business Administration
23 from the College of Saint Rose with an emphasis
24 in entrepreneurship. Prior to joining the

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Department, I worked in the telecommunications
2 industry. My responsibilities in that industry
3 included the construction and maintenance of
4 plant, remote monitoring and diagnostics of
5 various switching systems along with the
6 outsourcing, design and costing of information
7 technology networks for multi-national
8 corporations. I joined the Department in July
9 2013.

10 Q. Please briefly describe your current
11 responsibilities with the Department.

12 A. My responsibilities as a Senior Utility Financial
13 Analyst include analyzing a company's financial
14 condition, capital structures, financing
15 mechanisms, risks, costs of debt and equity,
16 diversification, and the competitive position of
17 utilities operating in New York State.

18 Q. Have you previously provided testimony before the
19 Commission?

20 A. Yes, I provided testimony before the Commission
21 as a cost of capital witness in Cases 13-W-0539
22 and 13-W-0564, rate cases involving United Water
23 New Rochelle and United Water Westchester; in
24 Cases 15-E-0283, 15-G-0284, 15-E-0285 and 15-G-

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 0286 rate cases involving New York State Electric
2 & Gas Corporation and Rochester Gas and Electric
3 Corporation; Case 16-W-0130 involving Suez Water
4 New York; and in Case 18-G-0133 involving St.
5 Lawrence Gas Company, Inc.

6

7

Purpose of Testimony

8 Q. What is the purpose of your testimony in this
9 proceeding?

10 A. The purpose of our testimony is to recommend the
11 fair rate of return to be used by the Staff
12 Accounting Panel to determine the revenue
13 requirement for The Brooklyn Union Gas Company
14 d/b/a National Grid NY (KEDNY) and Keyspan Gas
15 East Corporation d/b/a National Grid (KEDLI)
16 (collectively the Companies). Our testimony will
17 concentrate on the appropriate ratemaking capital
18 structure and the cost of the various capital
19 components in the capital structure for the rate
20 year ending March 31, 2021. We will also respond
21 to issues raised in the direct testimonies of the
22 Companies' capital structure witness, Mr.
23 Jonathan Cohen and cost of equity witness, Ms.
24 Ann E. Bulkley.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Q. Does your testimony rely on interrogatory
2 responses (IRs) provided by the Companies?

3 A. Yes. These IR responses are included as
4 Exhibit___(SFP-1).

5 Q. Are you sponsoring any exhibits?

6 A. Yes. We are sponsoring 39 exhibits as labeled
7 below.

1 **Rate of Return**

2 **Summary**

3 Q. Please summarize your overall rate of return
4 recommendation for KEDNY and how it varies from
5 the Company's request.

6 A. We are recommending an overall after-tax rate of
7 return of 6.08% for KEDNY, as opposed to KEDNY's
8 request of 6.76%. On a pre-tax basis, our
9 recommended overall rate of return is 7.58%
10 compared to KEDNY's request of 8.53%. The
11 difference between our recommended rate of return
12 and KEDNY's is mainly attributable to a reduction
13 in the cost of equity from 9.65% to 8.20%.

14 Q. Please summarize your overall rate of return
15 recommendation for KEDLI and how it varies from
16 the Company's request.

17 A. We are recommending an overall after-tax rate of
18 return of 6.04% for KEDLI, as opposed to the
19 Company's request of 6.74%. On a pre-tax basis,
20 our recommended overall rate of return is 7.54%
21 compared to KEDLI's request of 8.51%. The
22 difference between our recommended rate of return
23 and KEDLI's is attributable to a reduction in the
24 cost of equity from 9.65% to 8.20%.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Q. Please explain the revenue requirement impacts of
2 your adjustments to the Companies' requested
3 rates of return?

4 A. In terms of revenue requirement, the difference
5 between Staff's and KEDNY's pre-tax rate of
6 return (PTROR) and after-tax rate of return
7 (ATROR) account for approximately \$49.0 million
8 and \$34.0 million, respectively. Similarly, the
9 difference between Staff's and KEDLI's PTROR and
10 ATROR account for approximately \$31.4 million and
11 \$22.8 million, respectively. For KEDNY, 10 basis
12 point in ROE is worth nearly \$3.3 million and 100
13 basis points in equity ratio is worth about \$5.0
14 million. For KEDLI, 10 basis point in ROE is
15 worth approximately \$2.1 million and 100 basis
16 points in equity ratio is worth about \$3.1
17 million. Our recommended rates of return for
18 both Companies are summarized in Exhibit___ (SFP-
19 2).

20

21 **Fair Rate of Return**

22 Q. Please elaborate as to what is meant by a fair
23 rate of return.

24 A. A fair rate of return for a regulated utility is

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 the overall rate of return that enables the
2 company to provide safe and adequate service to
3 its customers, while at the same time assuring
4 the utility continuing support in the capital
5 markets for both its long-term debt and common
6 equity securities at terms that are reasonable
7 given the Company's risk. The overall rate of
8 return is alternatively referred to as a weighted
9 cost of capital.

10 Q. How is the rate of return typically calculated?

11 A. The rate of return for a utility company is
12 calculated through a weighted average of the
13 individual cost components of its expected
14 capitalization during the rate year. Typically,
15 there are three sources of capital. The two
16 primary sources are long-term debt and common
17 equity. Customer deposits, while a very small
18 component, is generally reflected in a company's
19 capitalization because it is a relatively
20 permanent and stable source of capital employed
21 by utilities. Investors in debt securities enter
22 into contractual obligations with the utility and
23 receive relatively fixed income streams. Common
24 equity investment is non-contractual. Common

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 equity investors may share in, but are not
2 guaranteed, a portion of the utility's residual
3 earnings. A fair rate of return allows the
4 utility company to recover its incurred cost of
5 long-term debt while providing its common equity
6 investors the opportunity to earn a return that
7 is comparable to the return available with
8 investments of similar risk.

9 Q. How are the cost rates of the components of the
10 capital structure typically calculated?

11 A. The cost rates associated with the company's
12 long-term debt and customer deposits are
13 relatively simple to determine. The costs of
14 existing long-term debt can be readily calculated
15 by examining their contractual terms; i.e., the
16 interest payment on the long-term debt and the
17 amortization of issuance costs. The costs of any
18 new long-term debt instruments, however, require
19 estimation. The cost rate for customer deposits
20 is simply a matter of applying the interest rate
21 that is currently prescribed by the Commission.

22 The cost of common equity, however, is neither
23 contractual nor generically prescribed by the
24 Commission. Its calculation is further

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 complicated by the fact that all variables
2 affecting a company's cost of equity cannot be
3 directly observed, and instead, some must be
4 estimated.

5 Q. Is the cost of common equity typically more
6 expensive than the cost of debt for a utility?

7 A. Yes. Even though both lenders and investors
8 supply the utility with the funds it needs to
9 build and operate its systems, the equity
10 investors only earn a return after the payment of all
11 other expenses. Because equity investors run the
12 risk that a company's achieved returns will not
13 equal their expectations, the return required by
14 equity investors is usually higher than that of
15 the utility's debt holders. Importantly, equity
16 returns are profits and in a company's revenue
17 requirement profits are taxed at the corporate
18 level, which is an added cost to ratepayers that
19 adds to the expense of the equity return.

20 Q. How can a utility's cost of common equity be
21 measured?

22 A. The return requirements of a utility's common
23 equity investors can be estimated through a cost
24 of equity analysis. Historically, the Commission

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 has favored market-based methodologies such as
2 the Discounted Cash Flow (DCF) and the Capital
3 Asset Pricing Model (CAPM) to estimate the return
4 required by equity investors.

5

6 **Capital Structure**

7 Q. Please discuss the corporate structure of KEDNY
8 and KEDLI.

9 A. KEDNY and KEDLI are both direct subsidiaries of
10 National Grid USA, which is an indirect
11 subsidiary of the ultimate parent, National Grid
12 Plc. (National Grid), a United Kingdom-based
13 utility holding company. As illustrated in
14 Exhibit___(SFP-3), there are two subsidiary tiers
15 between KEDNY and KEDLI and National Grid.

16 Q. Do the Companies propose that their rates be set
17 using their stand-alone capitalizations or the
18 capitalizations of either National Grid Plc. or
19 National Grid USA?

20 A. The Companies propose to use their stand-alone
21 capital structures and propose capital structures
22 that reflect a 48.0% common equity ratio.

23 Q. Did the Companies provide any rationale for
24 proposing their stand-alone capital structure for

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 the rate year?

2 A. Yes. The Companies' capital structure witness,
3 Mr. Jonathan Cohen and cost of equity witness,
4 Ms. Ann E. Bulkley present two main reasons why
5 it is appropriate to use the Companies' stand-
6 alone capital structure for ratemaking purposes.
7 First, the companies believe that they
8 implemented strong ring-fencing measures that
9 have been recognized by the major rating
10 agencies. Secondly, the Companies believe that
11 utility operating subsidiaries of their proxy
12 group have for the last four years maintained
13 average common equity ratios more than 8.00
14 percentage points above the 48.0 percent equity
15 ratio that the Commission approved for KEDNY and
16 KEDLI in the Companies' last rate proceeding.

17 Q. What is your response to the Companies first
18 rationale that they have strong ring-fencing
19 measures that have been recognized by the major
20 rating agencies?

21 A. We agree with the Companies that they have
22 implemented adequate ring-fencing measures that
23 have been acknowledged by both Moody's and
24 Standard and Poor's.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Q. Could you please elaborate on the ring-fencing
2 measures implemented by the Companies?

3 A. Yes. As a condition of accepting the
4 Commission's approval of the merger between
5 National Grid and the Companies in 2006, both
6 KEDNY and KEDLI agreed to a series of ring-
7 fencing provisions. These provisions, as well as
8 those agreed to by other New York State
9 utilities, are contained in Exhibit___ (SFP-4).
10 We will discuss the specific provisions of the
11 ring-fencing measures later in our testimony.

12 Q. Please discuss Moody's recent opinion about the
13 strength of the Companies ring-fencing measures.

14 A. Contained in Exhibit___ (SFP-5) is Moody's April
15 8, 2019, Credit Opinion for KEDNY. The last
16 paragraph of the report states that "[w]hile
17 there is significant debt at KEDNY's parent
18 holding companies, the strong ring-fencing
19 provisions applicable to New York utilities
20 reduce the potential for debt to be pushed down
21 into KEDNY. In particular, we view the explicit
22 leverage restriction for KEDNY (to maintain a
23 debt to capitalization ratio of less than 56%) as
24 providing some credit support at the current

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 rating level. This provision compares favorably
2 against other New York utilities within the
3 National Grid group. Additional ring-fencing
4 provisions imposed by the NYSPC for KEDNY, which
5 we view as credit supportive, include a special
6 preferred share provision that reduces the
7 probability of bankruptcy in a distressed
8 situation, and the requirement for KEDNY to hold
9 an investment-grade rating." Moody's expressed
10 similar view about KEDLI's ring-fencing measures
11 by stating that "[while] there is considerable
12 debt at KEDLI's parent holding companies, the
13 strong ring-fencing provisions applicable to New
14 York utilities reduce the potential for debt to
15 be pushed down to KEDLI. In particular, we view
16 the explicit leverage restriction for KEDLI (to
17 maintain debt/capitalization at less than 58%) as
18 providing the greatest credit support.

19 Additional ring-fencing provisions imposed by the
20 NYSPC on KEDLI that we view as credit supportive
21 include: (1) the special preferred share
22 provision that reduces the probability of
23 bankruptcy in a distressed situation, and (2) the
24 requirement for KEDLI to hold an investment-grade

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 rating." This Moody's report published on April
2 8, 2019, is contained in Exhibit__ (SFP-6).

3 Q. Comparatively, to what extent has Standard and
4 Poor's recognized that the financial protections
5 adequately insulate the Companies from their
6 parent and affiliates?

7 A. In its latest credit opinions about KEDNY and
8 KEDLI issued separately on September 24, 2018,
9 S&P stated that "...we assess [The Brooklyn Union
10 Gas Co and KeySpan Gas East Corporation] as
11 insulated, with existing insulation measures
12 supporting a one-notch separation between the
13 subsidiary and its parent. Key insulating
14 measures include: a) Prohibition of dividend
15 distributions if the company does not maintain
16 investment-grade credit ratings with at least two
17 of the three major rating agencies, b)
18 Prohibition of dividend increases and payments if
19 the company's debt-to-capital ratio exceeds a
20 certain amount, 3) A golden share whose vote is
21 required to file the utility into a voluntary
22 bankruptcy, 4) Clear economic and strategic
23 incentive from the parent to maintain [The
24 Brooklyn Union Gas Company's] financial

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 strength.”

2 Q. What is your conclusion regarding the financial
3 independence of KEDNY and KEDLI?

4 A. As stated earlier, we believe that the rating
5 agencies still view KEDNY and KEDLI as adequately
6 ring-fenced and thus rate the Companies’ credit
7 quality substantially on a stand-alone basis,
8 apart from their holding Companies.

9 Q. Please elaborate on the Companies’ second
10 rationale that utility operating subsidiaries
11 with similar business risk characteristics to
12 KEDNY and KEDLI have for the last four years
13 maintained average common equity ratios more than
14 8.00 percentage points above the 48.0 percent
15 equity ratio that the Commission approved for
16 KEDNY and KEDLI in the Companies’ last rate
17 proceeding.

18 A. On page 98 of her direct testimony, Ms. Bulkley
19 stated that the average common equity ratio
20 (based on SNL Financial, a business unit of S&P
21 Global, data source) of the utility subsidiaries
22 for the years 2014-2017 was 56.65% for her
23 Combined Utility Group and 57.94% for her Natural
24 Gas Proxy Group.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Q. Do you have any comments about Ms. Bulkley's use
2 of the 56.65% and 57.94% historical common equity
3 ratios to support the reasonableness of the
4 Companies' 48% common equity ratio proposal?

5 A. Yes. First of all, Ms. Bulkley's use of
6 operating company equity ratios is inappropriate.
7 Investors in her proxy group companies base their
8 return requirements on the holding company's use
9 of leverage, along with its other risk
10 attributes, as they are unable to directly invest
11 in the subsidiaries. Secondly, the capital
12 structures for utility subsidiaries of holding
13 companies may not reflect either rational
14 capitalization policies, or actual common equity
15 employed, and therefore may not be suitable for
16 supporting an operating subsidiary's rate of
17 return. The subsidiary's common equity balance
18 may not, in fact, be financed by common equity at
19 the holding company level. Rather, some of the
20 utility common equity balance may instead be
21 proceeds from debt issued at the holding company
22 level and classified on the utility subsidiary's
23 books as common equity at the time the proceeds
24 were invested in the utility subsidiary.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Q. You stated that the relevant equity ratio to
2 investors is that of the utility holding
3 companies comprising Ms. Bulkley's proxy groups.
4 Have you performed any analysis to ascertain the
5 average common equity ratio of the Companies'
6 witness' proxy group?

7 A. Yes. According to S&P Capital IQ Financial data,
8 we found that the average common equity ratio of
9 Ms. Bulkley's Combined Utility Proxy Group and
10 Natural Gas Proxy Group for years 2014-2017 were
11 47.89% and 53.14%, respectively as shown in
12 Exhibit___(SFP-7). This is informative because
13 investors cannot invest in the equity of a
14 wholly-owned subsidiary company. As such, equity
15 investors look at, among other things, the
16 overall capital structure of the consolidated
17 parent company to determine their risk/reward
18 outlook and make investment decisions.

19 Q. What are the proportions of common equity that
20 the Companies project in the rate year and how
21 were they developed?

22 A. Per the Companies witness Cohen's Exhibit___ (JC-
23 1, Schedule 2), the rate year proportions of
24 common equity for KEDNY and KEDLI were forecasted

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 by starting with their respective 2018 year-end
2 capital structures and reflecting the impacts of
3 their forecasted sources and uses of funds from
4 the beginning of 2019 through the rate year
5 ending March 31, 2021. In developing KEDNY's
6 forecasted capital structure with a 51.3% common
7 equity ratio for the rate year, KEDNY indicated
8 that it plans to retain a portion of its earnings
9 and use those earnings to address a portion of
10 its funding needs, driven primarily by capital
11 expenditures of approximately \$866 million in the
12 rate year. Further, there is also a \$500 million
13 planned equity infusion from the ultimate parent,
14 National Grid during the bridge period. KEDNY
15 plans to issue \$1.0 billion of long-term debt
16 during the bridge period and another \$400 million
17 long-term debt near the end of the rate year.
18 For its customer deposits balance, KEDNY
19 forecasts an amount of \$21.055 million for the
20 rate year compared to \$23.413 million as of
21 December 2018.

22 Q. How did KEDLI develop its forecasted 48.9% common
23 equity ratio for the rate year.

24 A. In developing KEDLI's forecasted capital

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 structure with a 48.9% common equity ratio for
2 the rate year, the Company indicated that it
3 plans to maintain a majority of its projected
4 earnings and use them to address its funding
5 needs, which will be driven primarily by capital
6 expenditures of approximately \$586 million during
7 the rate year. Unlike KEDNY, KEDLI did not
8 forecast any equity infusion or long-term debt
9 issuance during the bridge period and the rate
10 year. For its customer deposits balance, KEDLI
11 forecasts an amount of \$20.581 million for the
12 rate year compared to \$14.962 million as of
13 December 2018.

14 Q. Are the Companies requesting their forecasted
15 common equity ratios be used for ratemaking
16 purposes?

17 A. No, in order to mitigate their rate requests, the
18 Companies propose to set rates based upon a
19 capitalization with a 48.0% common equity ratio;
20 the common equity ratio upon which their rates
21 are currently set.

22 Q. What is the Commission's policy on the
23 appropriate capital structure to be used in
24 ratemaking when a utility resides in a holding

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 company?

2 Q. The Commission has expressed a preference for
3 using the capital structure of the utility's
4 parent. The Commission elaborated its position
5 in Case 05-E-1222, stating:

6 "The established regulatory practice in New York
7 in fully litigated rate proceedings, like this
8 one, is to use the consolidated capital structure
9 of the holding parent company for ratemaking
10 purposes. This practice has typically been
11 applied to utility holding company structures in
12 other regulated industries. Holding companies
13 owning electric utilities have only recently
14 appeared in New York and we must now consider
15 whether the conventional approach should apply to
16 the electric industry. We find no valid basis
17 for excluding electric utility holding company
18 structures from the time-honored and well-
19 established regulatory practice. There is no
20 rational basis for us to depart from the approach
21 developed and used for consolidated
22 telecommunication, natural gas and water
23 companies when addressing the substantially
24 similar issues pertaining to consolidated

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 electric company operations.”

2 Q. Are there circumstances under which the
3 Commission would allow the use of a stand-alone
4 capitalization?

5 A. Yes. The Commission has indicated that it will
6 consider using a stand-alone capitalization if a
7 utility can demonstrate that it has adequately
8 isolated itself from the risks of its affiliates.

9 Q. How can a utility demonstrate that it has
10 isolated itself from the risk of its affiliates?

11 A. In its Abbreviated Order Authorizing Acquisition,
12 issued September 9, 2008, and its Order
13 Authorizing Acquisition Subject to Conditions,
14 issued January 6, 2009 in Case 07-M-0906 where
15 the Commission approved Iberdrola’s acquisition
16 of Energy East, the Commission stated it would
17 consider using a stand-alone equity ratio upon a
18 showing that the rating agencies consider the
19 utility operating subsidiary in question
20 adequately insulated from the risks of the parent
21 company’s other operations. A company can
22 establish such insulation by demonstrating the
23 presence of significant ring-fencing measures.

24 Q. Can you briefly explain the concept of ring-

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 fencing in this context?

2 A. Yes. Ring-fencing, with respect to a regulated
3 public utility subsidiary, occurs when a
4 subsidiary financially separates itself from its
5 holding company/parent company to protect the
6 subsidiary from financial instability or the
7 bankruptcy of the parent. The intent of the
8 ring-fencing measures is to insulate assets in
9 the subsidiary from the risks of the holding
10 company/parent and from the other subsidiaries in
11 the holding company. In theory, if a subsidiary
12 is ring-fenced, and the holding company or
13 another subsidiary goes bankrupt, creditors would
14 not be able to attach their claims to the assets
15 of the ring-fenced subsidiary. In addition, a
16 fully ring-fenced company should be insulated
17 from its parent's influence regarding the
18 financial decisions of the subsidiary. In
19 theory, ring-fencing protects the assets of the
20 subsidiary in the event of a bankruptcy of a
21 parent or other affiliate. Moreover, ring-
22 fencing may allow a subsidiary to be rated higher
23 than the parent.

24 Q. Besides bankruptcy protection, what are the

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 advantages of ring-fencing a utility subsidiary?

2 A. If a utility subsidiary achieves a higher rating
3 than its parent, there is a benefit of a lower
4 cost of debt to the subsidiary and ultimately to
5 ratepayers.

6 Q. Does the existence of adequate ring-fencing
7 require the use of the subsidiaries' stand-alone
8 capital structures in establishing the ratemaking
9 capital structure?

10 A. No, it does not. While the presence of adequate
11 ring-fencing provides the opportunity to use the
12 utility's stand-alone capital structure, the
13 financial policies of the utility must still be
14 evaluated with an eye toward identifying whether
15 a suitable financing mix, resulting from
16 reasonable financing policies, is being deployed.
17 The idea is to find the approximate ratios of
18 debt and equity that lead to the lowest weighted
19 cost of capital.

20 Q. Please describe what constitutes reasonable
21 financial policies for a regulated utility.

22 A. A reasonable financial policy is one that
23 provides an optimal mix of debt and equity
24 financing. An optimal financing policy balances

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 the interests of both ratepayers and investors by
2 having the lowest cost of capital for an
3 acceptable level of risk. A regulated utility,
4 through its financial policies, should obtain a
5 balanced mix of capital sources that will result
6 in the most economical financing of its assets
7 over the long run. For a utility company, a
8 balanced capital structure will contain a
9 sufficient proportion of common equity that will
10 enable the utility to raise capital most
11 economically. While common equity is costlier
12 than debt, it should still be employed in
13 sufficient amounts that will provide an
14 economically efficient credit rating.

15 Q. How is an economically efficient credit rating
16 determined?

17 A. An economically efficient credit rating is one
18 that provides the lowest long-run cost of
19 capital. The Recommended Decision in Case 91-M-
20 0509 regarding Generic Financing generally
21 determined that the overall cost to ratepayers,
22 as measured by the pre-tax rate of return, was
23 minimized at either a "BBB" or "A" bond rating.
24 When practical, the Commission has generally

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 supported rate levels that provide utilities the
2 opportunity to achieve and maintain a bond rating
3 within the "A" range.

4 Q. What credit ratings are assigned to KEDNY and
5 KEDLI by Moody's and S&P?

6 A. As indicated in our previously referenced
7 Exhibit___(SFP-5) and Exhibit___(SFP-6) as well
8 as Exhibit___(SFP-8) and Exhibit___(SFP-9),
9 Moody's assigns a credit rating of "A3" to KEDNY
10 and KEDLI. S&P assigns a rating of "A-" to both
11 Companies.

12 Q. Have their "A3/A-" credit ratings provided the
13 Companies ready access to the capital markets at
14 reasonable rates?

15 A. Yes. KEDNY's access to the capital market is
16 evidenced by its February 2019 issuance of \$550
17 million of 10-year fixed rate senior unsecured
18 securities and \$450 million of 30-year fixed rate
19 senior unsecured securities at very favorable
20 rates of 3.865% and 4.487% respectively. KEDLI
21 has not issued any long-term debt securities
22 since 2016. As previously discussed, KEDLI has
23 the same "A3/A-" rating as KEDNY and is viewed as
24 possessing very similar credit risk attributes,

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 and thus, should have similarly strong access to
2 the credit markets.

3 Q. What capital structure do you propose for the
4 Companies?

5 A. We accept the same 48% common equity ratio
6 proposed by the Companies.

7 Q. How did you determine the proportions of the
8 respective capital components of the capital
9 structure for KEDNY?

10 A. We based the capital components on Staff's
11 determination of Staff's adjusted earnings base
12 for KEDNY. To Staff's adjusted earnings base of
13 \$4,834,497,000, we applied the 48% common equity
14 ratio to determine a common equity component of \$
15 2,320,559,000 ($\$4,834,497,000 \times 48\%$) in our
16 recommended capital structure. We included in
17 our recommended capital structure KEDNY's
18 projected customer deposits balance of
19 \$21,055,000 for the rate year. After determining
20 the common equity and customer deposits
21 components, the residual of \$2,501,430,000, or
22 approximately 51.56% of Staff's adjusted earnings
23 base, represents the projected long-term debt
24 component for KEDNY.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Q. How did you determine the proportions of the
2 respective capital components of the capital
3 structure for KEDLI?

4 A. We based the capital components on Staff's
5 determination of Staff's adjusted earnings base
6 for KEDLI. To Staff's adjusted earnings base of
7 \$3,269,060,000 we applied the 48% common equity
8 ratio to determine a common equity component of
9 \$1,569,149,000 ($\$3,269,060,000 \times 48\%$) in our
10 recommended capital structure. We included in
11 our recommended capital structure KEDLI's
12 projected customer deposits balance of
13 \$20,581,000 for the rate year. After determining
14 the common equity and customer deposits
15 components, the residual of \$1,679,330,000, or
16 approximately 51.37% of Staff's adjusted earnings
17 base, represents the projected long-term debt
18 component for KEDLI.

19 Q. Do you believe that your capital structure
20 recommendation will be supportive of the
21 Companies' financial integrity?

22 A. Yes, we believe that our capital structure
23 recommendation will be supportive of the
24 Companies' financial integrity.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Q. Have you performed any analyses to substantiate
2 your assertion that your recommended capital
3 structure with a 48% common equity ratio,
4 together with your recommended return on common
5 equity (ROE) will be supportive of the Companies'
6 financial integrity?

7 A. Yes, our recommended common equity ratio and
8 return on equity recommendation when combined
9 with other quantitative metrics and qualitative
10 factors produce credit metrics that are generally
11 consistent with the performance required by
12 Moody's and S&P to maintain the Companies'
13 current ratings of "A3" and "A-" respectively, as
14 shown in Exhibit___ (SFP-10).

15 Q. Please discuss how you determined that the
16 Companies' credit metrics are consistent with
17 those ratings.

18 A. We based our analysis on the overall credit
19 metrics used by Moody's and S&P in evaluating
20 both the financial and business risks of
21 regulated electric and gas utilities. We note
22 that only S&P provides specific categories of
23 financial and business risks.

24 Q. Please discuss the concept of financial risk.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 A. Financial risk is the additional risk a
2 shareholder bears when a company uses debt in
3 addition to equity financing. Companies that
4 employ greater leverage would have higher
5 financial risk than companies financed mostly or
6 entirely by equity. S&P financial risk profile
7 categories include "Minimal", "Modest",
8 "Intermediate", "Significant", "Aggressive", and
9 "Highly Leveraged" based on seven different
10 financial metric ratios. Reflected in
11 Exhibit___(SFP-11) is the S&P Corporate Rating
12 Methodology report originally published on
13 November 19, 2013, and most recently updated on
14 April 1, 2019. As illustrated on pages 33 and 34
15 of the report, S&P calculates two core coverage
16 ratios and six supplementary coverage ratios.
17 Specifically, S&P examines the following
18 financial risk ratios in assessing a firm's
19 credit risk: a. Funds from Operations(FFO)/debt
20 (core metric); b. Debt/EBITDA (core metric,); c.
21 Cash Flow from Operations (CFO)/debt; d. Free
22 Operating Cash Flow (FOCF)/debt; e. Discretionary
23 Cash Flow (DCF)/debt; f. (FFO + interest)/cash
24 interest (FFO cash interest cover); and g.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 EBITDA/interest.

2 Moreover, based on the methodology guidelines for
3 the above metrics, we used S&P's medial
4 volatility financial benchmark table reflecting
5 the Companies lower-risk, rate-regulated
6 distribution operations.

7 Q. In addition to the financial risk metrics, did
8 you consider other qualitative factors considered
9 by S&P in its business risk analysis of the
10 Companies?

11 A. Yes, we did. S&P's business risk profile
12 analysis incorporates such factors as country
13 risk, industry risk, regulatory environment,
14 company competitive position, business and
15 geographic diversification, and management
16 strategy. S&P's business risk profile categories
17 include "Excellent", "Strong", "Satisfactory,"
18 "Fair", "Weak", and "Vulnerable". In determining
19 the "A-" rating, S&P has assigned a business risk
20 profile of "Excellent" to the Companies.
21 Therefore, we used an "Excellent" business risk
22 profile in analyzing the credit metrics of the
23 Companies.

24 Q. Please discuss S&P's rationale for assigning an

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 "Excellent" business risk profile to KEDNY?

2 A. As illustrated in previously referenced
3 Exhibit___(SFP-8), S&P credits the low operating
4 risk of KEDNY's regulated gas distribution
5 operations to its predominantly residential and
6 commercial customer base, economically robust
7 service territory and generally constructive
8 regulatory environment as the primary drivers of
9 the "Excellent" business risk evaluation.

10 Q. What is S&P's rationale for assigning an
11 "Excellent" business risk profile to KEDLI?

12 A. As shown in our Exhibit___(SFP-9) referenced
13 earlier, S&P's "Excellent" business risk
14 assessment for KEDLI is based upon the Company's
15 low operating risk regulated distribution
16 operations, its somewhat small service territory
17 that lacks geographic and operating diversity, a
18 predominately residential and commercial customer
19 base, and a generally constructive regulatory
20 framework.

21 Q. Please continue with your credit metrics analysis
22 based on Moody's rating guidelines.

23 A. Our Exhibit_____(SFP-12) contains the June 23,
24 2017, Moody's ratings methodology for regulated

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 electric and gas utilities. Page 4 of the
2 Moody's report contains the following financial
3 strength metrics examined by Moody's: a) Cash
4 Flow from Operation (CFO), pre-Working Capital
5 (WC) + Interest/Interest, with Moody's assigned
6 weight of 7.5%; b) CFO pre-WC/Debt, with Moody's
7 assigned weight of 15%; c) CFO pre-WC-
8 Dividends/Debt, with Moody's assigned weight of
9 10%; and d) Debt/Total Capital, with Moody's
10 assigned weight of 7.5%.

11 Q. Did you consider the Companies' business
12 profile/qualitative factors (business risk
13 profile) based on Moody's rating guidelines?

14 A. Yes, we did consider the business risk profile of
15 the Companies based on Moody's rating guidelines
16 for regulated electric and gas utilities as shown
17 in our Exhibit___(SFP-12) referenced earlier.
18 Moody's business risk profile analysis, which
19 accounts for 60% of their overall indicative grid
20 rating incorporates such factors as: 1)
21 Legislative and Judicial Underpinnings of the
22 Regulatory Framework; 2) Timeliness of Recovery
23 of Operating and Capital Costs; 3) Consistency
24 and Predictability of Regulation; 4) Sufficiency

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 of Rates and Returns; 5) Market Position; and 6)
2 Generation and Fuel Diversity. Each of the six
3 business risk factors is ranked as "Aaa", "Aa",
4 "A", "Baa", "Ba", "B", and "Caa". Given that the
5 Companies are rated by Moody's, we used Moody's
6 qualitative scores for the Companies averaging
7 close to "A3".

8 Q. How did you apply the 11 credit metrics
9 consisting of Moody's four financial metrics and
10 seven S&P financial benchmarks?

11 A. In our previously referenced Exhibit___ (SFP-10),
12 we applied the 11 credit metrics using Companies
13 financial results based upon our capital
14 structure, cost of debt, and cost of common
15 equity recommendations. As the exhibit
16 illustrates, the overall financial metrics when
17 combined with the "Excellent" business risk
18 profile of the Companies, produce credit metrics
19 consistent with the rating guidelines of S&P
20 rating of close to "A-" and Moody's rating of
21 "A3".

22 Q. For comparison purposes, did Mr. Cohen provide a
23 projection of the Companies' financial metrics
24 based on the Companies' requested capital

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 structure and cost rates?

2 A. Yes, the Companies' response to IR DPS-590
3 provided the rate year credit metric projections.
4 According to the Company's projections, KEDNY's
5 forecasted core and supplementary credit metrics
6 are generally similar to what KEDNY has
7 historically maintained over the past three
8 years. With the exception of CFO pre-WC-
9 Dividends/Debt, KEDLI's other forecasted metrics
10 will result in higher core and supplementary
11 metrics than it has historically exhibited. As
12 explained earlier, these credit metrics are based
13 on the medial volatility/low-risk grid table of
14 S&P/Moody's reflecting the low business risk
15 profile of the Companies.

16 Q. Do you have any observations about the Companies
17 response to IR DPS-590?

18 A. Yes. We noted that some of the inputs for the
19 credit metrics contained in the IR DPS-590 are
20 not consistent with the Companies filing. For
21 instance, the common equity ratios in IR DPS-590
22 for KEDNY and KEDLI are approximately 63% and
23 62%, respectively compared to the 48% in their
24 rate year request. Also, the Net Pension & Other

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Postemployment benefits (OPEBs) accrual &
2 deferral for KEDNY and KEDLI are negative \$1.64
3 million and negative \$4.76 million respectively,
4 compared to positive \$47.47 million and negative
5 \$36.39 million in the rate filing. Due to such
6 inconsistencies, we recalculated the Companies
7 credit metrics based on their filing and rating
8 agencies adjustments provided by the Companies in
9 their response to IR DPS-590 as shown in our
10 previously referenced Exhibit___(SFP-10).

11 Q. How do your financial metrics and implied credit
12 ratings compare with the recalculated financial
13 metrics and ratings in the Companies' filing?

14 A. For KEDNY, our previously referenced
15 Exhibit___(SFP-10) shows coverage ratios and
16 implied "A2"/"close to A-" Moody's/Standard &
17 Poor's credit ratings compared to "A2"/"A-"
18 implied by the Company's filing. Similarly, for
19 KEDLI, our implied Moody's/Standard & Poor's
20 credit rating is "A3"/"close to A-" compared to
21 "A3"/"close to A-" in the Company's filing.
22 One core coverage ratio used by S&P to assess the
23 relative financial risk of regulated electric and
24 gas utility companies is leverage ratio (Debt to

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 EBITDA—Earnings Before Interest, Taxes,
2 Depreciation and Amortization). The ratio
3 indicates a company's ability to cover its fixed
4 debt service (interest plus principal)
5 obligations as well as the variability of its
6 earnings net of interest payments. The lower the
7 leverage ratio the better. As the exhibit
8 illustrates, our fallout Debt to EBITDA coverage
9 ratio is 5.13x and 4.99x for KEDNY and KEDLI,
10 respectively compared with the implied 4.86x and
11 4.53x for KEDNY and KEDLI, respectively, as
12 calculated from the Companies' filings. Per
13 S&P's rating guidelines for regulated utilities,
14 the appropriate benchmark for a regulated
15 electric and gas utility in the single "A" range
16 with an excellent business risk profile is
17 between 2.5x-4.5x. Another core metric used by
18 S&P to assess the financial health of regulated
19 electric and gas utilities is Funds from
20 Operation to Debt (FFO/debt). The higher the
21 FFO/Debt ratio the better. Under this metric,
22 our capital structure recommendation along with
23 Staff's other adjustments produces FFO/Debt ratio
24 of 19.4% and 14.1% for KEDNY and KEDLI,

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 respectively compared with 21.9% and 16.4% for
2 KEDNY and KEDLI, respectively in the Companies'
3 filings. The acceptable FFO/Debt benchmarks
4 reasonably expected from a regulated electric and
5 gas utility in the single "A" range with an
6 excellent business risk profile is between 13-35%
7 per S&P rating guidelines.

8 Q. Please continue with your core metric analysis
9 relating to Moody's guidelines.

10 A. The core coverage ratio used by Moody's to assess
11 the financial health of regulated electric and
12 gas utility companies is Cash flow from Operation
13 Pre-Working Capital to debt (CFO pre-WC/Debt).
14 The ratio indicates a company's ability to cover
15 its fixed debt service (interest plus principal)
16 obligations as well as the variability of its
17 earnings net of interest payments. The higher
18 the coverage metric the better. As our
19 previously referenced Exhibit___(SFP-10)
20 illustrates, our fallout (CFO pre-WC/Debt) metric
21 is 19.2% and 13.6% for KEDNY and KEDLI,
22 respectively compared with the implied 21.7% and
23 15.9% for KEDNY and KEDLI, respectively, as
24 calculated from the Companies' filings. Per

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Moody's rating guidelines for regulated
2 utilities, the appropriate benchmark for a
3 regulated electric and gas utility in the single
4 "A" range with a low business risk profile is
5 between 19%-27%. While KEDLI's underperformance
6 on this metric is of potential concern, we note
7 that Moody's will often discount performance in
8 the short run particularly if it is related to
9 cash flow impacts that may not be durable. For
10 instance, during fiscal years 2016 through 2018,
11 KEDNY's CFO pre-WC/Debt was below the 13.7%
12 figure forecast for KEDLI during the rate year.
13 Due to higher than anticipated environmental
14 remediation costs KEDNY only achieved successive
15 CFO pre-WC/Debt ratios of 7.9%, 13.3% and 9.8%
16 during this timeframe and was able to maintain an
17 "A2" rating. In the unlikely event that Moody's
18 downgrades KEDLI, there would be no immediate
19 rate impact because the Company has no plans to
20 issue new debt until after the end of the rate
21 year.

22 Q. Did you review the most recent Moody's and S&P
23 credit analyses to ascertain each rating agency's
24 view with respect to the Companies' ratings

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 outlook and the factors each indicate could lead
2 to a rating upgrade or downgrade?

3 A. Yes. As illustrated in our previously referenced
4 Exhibit___(SFP-10) and Exhibit___(SFP-11), in
5 September 2018, S&P's assessment indicated a
6 "Stable" outlook for KEDNY's and KEDLI's "A-"
7 rating. According to S&P, a rating outlook
8 assesses the potential direction of a long-term
9 credit rating over the intermediate-term
10 (typically six months to two years). Therefore,
11 it does not view KEDNY's and KEDLI's "A-" credit
12 rating as likely to change over the intermediate-
13 term.

14 Q. What is Moody's recent assessment of the
15 Companies' outlook?

16 A. In its April 2019 credit opinion report, as shown
17 in our previously referenced Exhibit___(SFP-5)
18 and Exhibit___(SFP-6), Moody's assessment
19 indicated a "Stable" outlook for the Companies'
20 "A3" rating. Therefore, Moody's does not view
21 KEDNY's and KEDLI's "A3" credit rating as likely
22 to change over the intermediate-term. Moody's
23 indicated that the Companies could be downgraded
24 if their respective CFO pre-WC/debt is

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 consistently below the high teens.

2 Q. The Companies' capital structure witness, Mr.
3 Cohen, indicated that there has been pressure on
4 both the Companies credit metrics and bond
5 ratings in recent years thereby putting
6 KEDNY/KEDLI's objective of maintaining an "A3"
7 bond/credit rating at risk. As a result, in
8 February 2019, Moody's downgraded the Companies
9 ratings by one notch to "A3" from "A2". Do you
10 have any comment?

11 A. Yes. First, Moody's downgraded both Companies
12 rating from an "A2" to "A3" in February 2019
13 largely because of the impact of the Federal Tax
14 Cuts and Jobs Act (Tax Act) of 2017, as well as
15 heightened capital investments, and in the case
16 of KEDNY also because of higher spending on
17 environmental remediation. The recent downgrade
18 of the Companies by Moody's was not unique, the
19 reduced cash flows resulting from the Tax Act led
20 Moody's to downgrade many utilities over the past
21 year and a half. As we have demonstrated, the
22 Companies could maintain their current "A3"
23 credit ratings with our implied credit metrics
24 and access the capital markets at reasonable

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 rates. Moreover, both rating agencies (Moody's
2 and S&P) have placed the Companies' current
3 ratings on a "Stable" outlook. Per these rating
4 agencies, a rating outlook assesses the potential
5 direction of a long-term credit rating over the
6 intermediate-term (typically six months to two
7 years). Therefore, KEDNY's and KEDLI's "Stable"
8 outlook suggests that the Companies' rating is
9 not likely to change over the intermediate-term.

10

11 **Cost of Long-Term Debt**

12 Q. What costs of debt are the Companies requesting
13 in this proceeding?

14 A. In its filing, KEDNY requested a rate year cost
15 of debt of 4.11%. We came across an error in the
16 calculation of KEDNY's long-term debt cost rate
17 which was acknowledged by the Company in response
18 to an IR number DPS-1002 dated August 21, 2019.
19 Therefore, the Company's corrected debt cost is
20 4.14%. KEDNY's 4.14% cost rate reflects the
21 weighted average cost of its outstanding long-
22 term debt as well as a projected 3.83% interest
23 rate for a planned \$400 million issuance of 10-
24 year senior unsecured debt obligations near the

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 end of the rate year. KEDLI is requesting a rate
2 year cost of debt of 4.06% reflecting its
3 embedded debt cost. KEDLI has no plans to issue
4 any new long-term debt during the link period and
5 the rate year.

6 Q. How did KEDNY determine the 3.83% interest rate
7 for the \$400 million planned debt issuances
8 during the rate year?

9 A. Per Mr. Cohen's Exhibit___(JC-1), page 2 of
10 Schedule 1, KEDNY determined the 3.83% interest
11 rate for the new debt security by adding a 117
12 basis point spread associated with KEDNY's recent
13 debt issuance in February 2019 to a 2.66% forward
14 rate of US 10-year Treasury for March 1, 2021.

15 Q. Are you proposing any adjustments to the
16 Companies' requested cost rates?

17 A. Yes. We are proposing one adjustment to KEDNY's
18 request and no adjustments to KEDLI's
19 calculation.

20 Q. Please discuss your adjustment to KEDNY's
21 requested rate year cost of debt.

22 A. Rather than using the 10-year Treasury forward
23 rate recommended by Mr. Cohen, we recommend using
24 the most recent (June 2019) 10-year Treasury

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 yield of 2.07% in combination with the Company's
2 117 basis points spread to estimate an interest
3 rate of 3.24% for KEDNY's proposed new debt
4 issuance as shown in our Exhibit___(SFP-13). The
5 interest rates should be updated based upon
6 interest rates and yield spreads in existence
7 just prior to the Commission's decision.

8 Q. Why did you use the most recent 10-year Treasury
9 yield to estimate the interest rate for KEDNY's
10 new debt issuance?

11 A. We used the most recent 10-year Treasury yield in
12 this rate proceeding because the Commission
13 considers current interest rates to be the best
14 predictor of where interest rates will be in a
15 given rate year going forward. Specifically, in
16 Case 10-E-0050, Proceeding on Motion of the
17 Commission as to the Rates, Charges, Rules and
18 Regulations of Niagara Mohawk Power Corporation
19 for Electric Service, the Commission stated that,
20 "[i]n as much as we are making a one-year rate
21 determination, the current interest rates are
22 reasonably representative for the immediate
23 future."

24 Q. Did you make changes to KEDNY's proposed 4.14%

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 long-term cost rate for the rate year?

2 A. No. Although we used a 3.24% interest rate for
3 KEDNY's projected new debt issuance, the fact
4 that those funds will be raised so late in the
5 rate year, there was only a di minimis impact on
6 the overall debt cost rate of 4.14% proposed by
7 KEDNY. As illustrated in Exhibit___ (SFP-13)
8 referenced earlier, we are accepting the 4.14%
9 cost of debt for the rate year ending March 31,
10 2021.

11

12 **Cost of Customer Deposits**

13 Q. What customer deposits rate are the Companies
14 proposing for the rate year ending March 31,
15 2021?

16 A. The Companies are proposing a 2.45% customer
17 deposits rate currently established by the
18 Commission for investor-owned utilities in Case
19 18-M-0611.

20 Q. Do you agree with the Companies' customer
21 deposits rate proposal?

22 A. Yes, we agree, however, prior to the Commission
23 decision in this case we also recommend that the
24 customer deposits rate be updated to reflect any

1 new rate established by the Commission.

2

3

Cost of Common Equity

4

Summary

5 Q. Please summarize your analysis in determining
6 your 8.20% cost of common equity.

7 A. Our common equity cost estimate is based on
8 applying a DCF analysis and CAPM analysis to a
9 proxy group of 28 electric utility holding
10 companies. The DCF applied to the proxy group
11 results in an average equity cost of 8.22%. We
12 averaged two different CAPM analyses to produce
13 an equity cost of 8.04%. Following the
14 Commission's practice, we apply weightings of
15 two-thirds to the DCF and one-third to the CAPM,
16 which resulted in a ROE of 8.16% which we rounded
17 up to 8.20%. A summary of these calculations can
18 be seen in Exhibit___ (SFP-14).

19 Q. Please discuss prior Commission precedent in
20 estimating the cost of equity.

21 A. The Commission has consistently used the
22 methodology of weighting the DCF result as two-
23 thirds of the total equity cost and the CAPM
24 result as one-third in estimating a utility's

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 cost of equity. For example, in Case 10-E-0362
2 involving Orange & Rockland Utilities, Inc. and
3 in Case 10-E-0050 involving Niagara Mohawk
4 electric rate case, the Commission authorized a
5 cost of equity based on two-thirds DCF and one-
6 third CAPM methodology. This methodology was
7 also used in Case 16-G-0257, a rate proceeding
8 for National Fuel Gas (NFG). Consistent with
9 Staff's approach and prior Commission precedent,
10 we applied the DCF and the CAPM approach to a
11 proxy group of companies that were selected based
12 on the criteria that we will discuss later.

13

14 **Staff Proxy Group**

15 Q. Why do you use a proxy group in your analyses to
16 estimate the Companies' cost of equity?

17 A. The use of a proxy group to determine
18 KEDNY/KEDLI's cost of equity is necessary because
19 the Companies' common stock is not publicly
20 traded, and thus, direct DCF and CAPM analyses of
21 the Companies are not possible. Equally
22 important is that the DCF analyses for individual
23 companies are reliant on equity analysts'
24 estimates of growth which are, by nature,

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 inaccurate and may also be biased. Similarly,
2 beta determinations used in the CAPM methodology
3 are based on historical observations, that due to
4 circumstances such as corporate restructurings or
5 industry transformations, may not represent the
6 level of earnings volatility expected in the
7 future. By employing a sufficiently large proxy
8 group of similarly situated companies, the
9 undesirable effects of biased (both upward and
10 downward), inaccurate growth estimates or beta
11 measures for any individual company is
12 diminished. While the objective is to choose a
13 group of companies whose risks closely match
14 those of the company being examined, it is
15 important that the group selected is also large
16 enough to provide confidence in its results. The
17 greater the number of suitable companies, the
18 less sensitive the overall cost of equity
19 estimate will be to the effect of any potential
20 inaccuracies in the data for any particular
21 company.

22 Q. Please describe how you developed your proxy
23 group.

24 A. Even though the Companies are local gas

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 distribution companies, their ultimate parent is
2 largely considered to be an electric utility by
3 investors. Accordingly, we believe that the most
4 suitable proxy group would be derived from a
5 universe of 37 holding companies deemed by Value
6 Line to be "electric utilities." The majority of
7 these companies have operating subsidiaries that
8 are combination electric and gas utilities and
9 thus our analysis with this group will reflect
10 the challenges and opportunities facing energy
11 utilities in general. We believe that the two
12 types of utilities are fundamentally very
13 similar. Both are regulated public utilities
14 that are subject to nearly identical ratemaking
15 treatment. In addition, both invest primarily in
16 capital-intensive physical networks that connect
17 the customer to the source of supply; and sell
18 their products and services at regulated rates to
19 customers.

20 Q. How does your approach compare with the approach
21 Staff uses to develop a proxy group for the
22 Companies sister company Niagara Mohawk Power
23 Corporation (Niagara Mohawk)?

24 A. Consistent with our approach in this proceeding,

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 and as Staff has done in all Niagara Mohawk rate
2 proceedings over the past twenty years, Staff in
3 Cases 17-E-0238 and 17-G-0239, employed a proxy
4 group using companies screened from Value Line's
5 electric utility companies.

6 Q. What criteria did you apply to the Value Line
7 electric utility group?

8 A. To be selected for our proxy group, a company had
9 to meet the following requirements: (1) an
10 investment grade rating from both Moody's and S&P
11 ("Baa3" and above by Moody's and "BBB-" and
12 above by S&P); (2) regulated revenues that
13 constituted at least 70% of that company's total
14 revenue, as determined by each company's 2018 SEC
15 annual report (10-K); (3) currently paying common
16 stock dividends; and (4) not currently involved
17 in any merger/acquisition (M&A) activity.

18 Q. Please describe how you selected your proxy
19 group.

20 A. As shown in Exhibit___(SFP-15), our proxy group
21 consists of 28 companies. Beginning with the 37
22 holding companies deemed by Value Line to be
23 "electric utilities", we eliminated Avangrid
24 Corporation because it has only been publicly-

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 traded since December 2015, which we believe is
2 an insufficient period or track record to
3 establish confidence in the financial forecasts
4 needed for calculating a company's cost of
5 equity. Specifically, Value Line usually
6 calculates its value of beta over a five-year
7 period, but Avangrid Corporation has only three
8 years of stock price data from which to calculate
9 beta. Similarly, we also eliminated Evergy, Inc.
10 because it has only been publicly-traded for
11 about a year, a time frame so short that Value
12 Line hasn't attempted to calculate a beta. As
13 for the remaining 35 companies, we eliminated
14 five companies whose regulated revenues
15 constitute less than 70% of total revenue. These
16 companies are CenterPoint Energy Inc., DTE Energy
17 Co., Exelon Corp., Otter Tail Corp and Public
18 Service Enterprise Group Inc. Regarding the
19 remaining 30 companies, we eliminated Fortis Inc.
20 because it is a Canadian-based company, which,
21 although traded on both the Toronto and New York
22 stock exchanges, has its financial reports and
23 Value Line projections based on Canadian currency
24 which would introduce the possibility that

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 exchange rate variations could affect the DCF
2 calculation. Finally, we eliminated El Paso
3 Electric because of a pending merger/acquisition
4 transaction. Therefore, we arrived at a proxy
5 group comprised of 28 electric utility holding
6 companies which met all four criteria stated
7 previously.

8

9 **Discounted Cash Flow Methodology**

10 Q. Please describe the DCF methodology.

11 A. The DCF methodology assumes that the principles
12 used to measure the cost of common equity are the
13 same as those used in measuring the yield
14 investors require on debt. However, while
15 interest payments are known with relative
16 certainty, future dividend payments are
17 uncertain. The foundation of the DCF is that
18 investors will price common stock to equal the
19 present value of future dividend payments.
20 Therefore, the valuation of a share of stock can
21 be represented by the following dividend growth
22 rate expression:

23

24

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

$$P_0 = \frac{D_1}{(1+k)^1} + \frac{D_2}{(1+k)^2} + \frac{D_3}{(1+k)^3} \dots \frac{D_n}{(1+k)^n}$$

Where:

P_0 = current stock price

D_n = dividend in period "n"

k = cost of equity.

7 Q. Please describe your DCF methodology and its
8 results.

9 A. As illustrated in Exhibit___ (SFP-16), the DCF
10 uses a three-month average stock price,
11 calculated by averaging the high and low monthly
12 prices for each company in the proxy group. Our
13 analysis covers the period from April 2019 to
14 June 2019. As shown in Exhibit___ (SFP-17), our
15 DCF methodology develops a stream of dividends
16 for each proxy company. Each dividend stream is
17 discounted at a rate which makes the discounted
18 value of its dividend stream equal to its
19 respective three-month average stock price. The
20 discount rate required to discount the stream of
21 expected dividend payments into the current stock
22 price is the estimated cost of equity for that
23 company. Our DCF methodology calculates an
24 average return on equity of 8.22% for the proxy

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 group.

2 Q. How did you develop your dividend projections?

3 A. We employed a two-stage DCF methodology. For the

4 first stage encompassing the 2019 through 2023

5 period, we used Value Line dividends per share

6 estimates. Beyond 2023, we calculated a

7 sustainable growth rate for each company in the

8 proxy group based primarily upon its expected

9 return on equity and projected retention ratio.

10 Also included in the sustainable growth rate

11 estimates is the external growth that can be

12 realized when a company issues new shares at

13 prices above book value.

14 Q. How did you calculate the short-term dividend

15 growth rates?

16 A. We calculated the short-term dividend growth rate

17 by solving for the compound annual growth rate

18 between the base year value of our dividend

19 stream of 2019 and the ending year value of our

20 dividend stream in 2023. The median and average

21 short-term growth rates for our proxy group are

22 5.51% and 5.06%, respectively.

23 Q. How did you derive the long-term sustainable

24 dividend growth rates used in the DCF?

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 A. Sustainable dividend growth rates depend on a
2 firm's expected internal and external growth
3 rates. Long-term internal growth will be
4 achieved based upon a company's earned return on
5 common equity and on the portion of earnings
6 retained within the business. That is, internal
7 growth, also known as retention growth, is
8 achieved based upon the growth in a company's
9 retained earnings. In formulaic form, retention
10 growth is measured by the following formula:

11 Retention growth = $b \cdot r$

12 Where:

13 "b" = the fraction of earnings retained in the
14 company

15 "r" = the expected rate of return on common
16 equity.

17 For example, if a firm retains 40% of its
18 earnings and earns 10% on equity, then its
19 retention growth rate will be 4.0% ($40\% \cdot 10\%$).

20 Thus, the growth rate is determined by the
21 increase in the equity retained in the business
22 and the expected return on that equity. Our
23 analysis calculates median and average retention
24 growth rates of 3.89% and 4.09%, respectively for

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 the proxy group.

2 Q. How is external growth measured in your DCF
3 methodology?

4 A. As discussed earlier, external growth can be
5 achieved if a company issues common equity above
6 its book value. This is commonly referred to as
7 the SV factor, where "S" is the increase in
8 common shares outstanding that have been sold and
9 "V" is the per share premium or discount to the
10 book value on the shares sold. Typically, Staff
11 evaluates the SV factor using the formula: $(\text{MBR}-$
12 $1) * \text{growth in common shares}$, where: (MBR) is the
13 market-to-book ratio. Thus, the formula for the
14 sustainable growth rate is given by $g = (b*r) +$
15 (SV) , where SV is also given by $(\text{MBR}-1)*\text{growth in}$
16 common stock. In our analysis, the median and
17 average external growth rates for the proxy group
18 are 0.57% and 0.77%, respectively.

19 Q. What is your sustainable dividend growth rate for
20 the proxy group?

21 A. The aggregation of our retention growth and
22 external growth produces median and average
23 sustainable growth rates of 4.64% and 4.86%,
24 respectively.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Q. How did you check the reasonableness of your
2 sustainable growth rate?

3 A. We compared it with the projected overall growth
4 rate of the economy. Rational utility investors
5 expect growth to generally track the changes in
6 output, or growth in the overall economy, as
7 measured by growth in the nominal Gross Domestic
8 Product (GDP). As reported in the March 10, 2019
9 edition of Blue Chip Economic Indicators shown in
10 Exhibit___(SFP-18), the consensus long-range
11 estimate of nominal GDP growth, going out to
12 2026-2030, is 4.0%, which is modestly lower than
13 our median sustainable growth rate of 4.64%.
14 Thus, if anything, our sustainable growth rate is
15 more optimistic on utility growth prospects. It
16 should be noted that the 4.0% nominal GDP growth
17 rate estimate is comprised of two components:
18 real GDP growth of 1.9% and an inflation rate of
19 2.1%. The long-run projections generally show
20 annual real GDP modestly increasing from a rate
21 of 1.7% in 2021 to a rate of 2.0% in 2025, while
22 inflation is forecasted to hold between 2.1%-2.2%
23 from 2021 and beyond into the long-run.
24 This comparison is appropriate because the

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 nominal GDP rate reflects assumptions about
2 future inflation, in addition to the real growth
3 expected in the economy as a result of
4 productivity gains. Therefore, it would not be
5 unreasonable for investors in the market, to
6 expect their future dividends to generally keep
7 pace with overall inflation, as well as reflect
8 productivity gains similar to those expected for
9 the economy as a whole. Likewise, for investors
10 in a mature sector of the economy, such as the
11 utility industry with perhaps slower-than-average
12 growth prospects, it is not unreasonable to
13 expect future dividend growth to be roughly
14 equivalent to that of the overall economy.

15 Q. What was the result of your DCF analysis?

16 A. Based on the inputs that we have just described,
17 the DCF average cost of equity for our proxy
18 group is 8.22%, while the median result is 8.11%.

19

20 **Capital Asset Pricing Model**

21 Q. Please explain the concept underlying the Capital
22 Asset Pricing Model.

23 A. The basic concept underlying the CAPM is that
24 risk-averse investors demand higher returns for

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 assuming additional risk. In other words,
2 higher-risk securities are priced to yield higher
3 returns than lower-risk securities.

4 Q. How does the CAPM measure risk?

5 A. The CAPM quantifies the additional return, or
6 risk premium, required for bearing incremental
7 risk above the risk-free rate of return. The
8 model calculates a cost of equity based upon the
9 premise that an investor who diversifies his
10 security portfolio is only exposed to systematic
11 risk (i.e. market risk). The systematic risk
12 represents the risk of investment within a well-
13 diversified portfolio. The remaining risks are
14 not assumed by a rational investor since these
15 risks can be eliminated through diversification.
16 Hence, investors do not require compensation for
17 diversifiable risks. In the CAPM, the beta of a
18 stock measures the volatility of that stock in
19 relation to the volatility of the stock market as
20 a whole. It is produced by a regression analysis
21 and represents the covariance of a stock with the
22 market. A beta above 1 means the stock has
23 greater risk than the market; a beta below 1
24 means that a stock has less risk than the market.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 A beta of 1 means the risk of the stock is
2 equivalent to the risk of the market.

3 Q. What inputs are used in your CAPM models and how
4 did you derive them?

5 A. There are three inputs in the CAPM equation: the
6 risk-free rate, the beta of a stock, and the
7 market risk premium. We employed the monthly
8 average of 10-year and 30-year Treasury bond
9 yields over a three-month period from April 2019
10 to June 2019, as the risk-free rate. The
11 resulting risk-free rate is 2.55%.
12 The beta that we employed is the average of the
13 latest Value Line published betas for the 28
14 utilities in our proxy group. As shown on page 1
15 of the previously referenced Exhibit___ (SFP-17),
16 we have calculated the average Value Line beta
17 for our proxy group to be 0.61.

18 Q. Why did you use the mean beta rather than the
19 median beta of the proxy group?

20 A. As a practical matter, there is only a minor
21 difference, as the median beta of the proxy group
22 is 0.60. Employing the median beta rather than
23 the mean beta in this case would not materially
24 change our overall ROE calculation of 8.16%. Our

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 model produces an 8.16%, however, if we used the
2 0.60 median beta, the overall ROE falls by about
3 two basis points to 8.14%. Nonetheless, we note
4 that we have previously recommended the use of
5 the median beta because it diminishes the undue
6 influence of any outlying value of beta. In
7 addition, Value Line reports its beta
8 determinations in increments of 0.05, therefore,
9 to be consistent, changes from month to month in
10 the median value should only change in increments
11 of 0.05 as well. Changes in the CAPM results
12 based on the median beta are not as smooth as
13 those based on the mean, because this attribute
14 has the potential to introduce unintended
15 volatility in the determination of the proxy
16 group's beta, therefore, we have employed the
17 mean beta as the appropriate input to the CAPM.

18 Q. How did you arrive at your 8.33% estimate of the
19 market risk premium?

20 A. Our estimate of an 8.33% market premium was based
21 on the market return estimates contained in
22 Merrill Lynch's Quantitative Profiles reports
23 less the 2.55% risk-free rate discussed earlier.
24 Specifically, we used the May, June and July 2019

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 editions of Merrill Lynch's Quantitative Profiles
2 and averaged the required and implied market
3 returns of each of the three point-in-time
4 estimates to arrive at an average required return
5 for the market of 10.88%. Then we subtracted the
6 2.55% average risk-free rate to arrive at the
7 8.33% market premium. The Merrill Lynch
8 Quantitative Profiles are attached as
9 Exhibit___ (SFP-19).

10 Q. Why did you use Merrill Lynch data for
11 calculating market risk premiums?

12 A. Our market risk premium is calculated by
13 subtracting the risk-free rate from Merrill
14 Lynch's cost of equity for the market. The
15 Merrill Lynch data provides two forward-looking
16 returns on the market: a required return and an
17 implied return. Merrill Lynch is a respected
18 independent firm with many resources available to
19 make the calculations. This market risk premium
20 estimation methodology has been used by the
21 Commission since 1996, in Case 95-G-1034, Central
22 Hudson Gas & Electric Corporation - Rates, Order
23 and Opinion No. 96-28 issued October 3, 1996, on
24 page 14, where the Commission approved the use of

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 the Merrill Lynch estimate. In its Opinion, the
2 Commission stated, "...the Judge's market return
3 calculation based on Merrill Lynch data is a
4 reasonable method of deriving a risk premium."

5 Q Why did you employ 10-year and 30-year Treasury
6 bond yields as the risk-free rate in your
7 analysis?

8 A. While there are not any true risk-free rate
9 securities, Treasury securities backed by the
10 full faith and credit of the United States
11 government are very low-risk investments. As
12 such, they serve as an excellent surrogate for
13 the risk-free rate. Additionally, the blending
14 of the yields on Treasury securities with a 10-
15 year and 30-year maturity is reasonable because
16 it approximates most investors' time horizon.

17 Q. Why did you use Value Line betas in your
18 analysis?

19 A. Value Line is a well-known publication and its
20 beta calculations are widely available to
21 investors. In addition, the Commission
22 historically uses the Value Line betas in
23 estimating the CAPM cost estimates because Value
24 Line calculates its betas over a five-year

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 period, thereby mitigating the inherent
2 volatility of using beta estimates calculated
3 over shorter time periods.

4 Q. Please describe the calculation of the
5 traditional CAPM.

6 A. The traditional CAPM expression takes the form:

7
$$K = R_f + \beta * (R_m - R_f)$$

8 Where:

9 K = investor's required return or
10 equity cost of capital

11 R_f = risk-free rate of return

12 β = beta, measure of both business and
13 financial risk (systematic risk)

14 R_m = market rate of return

15 $R_m - R_f$ = market risk premium

16 The traditional CAPM determines the return on
17 common equity by adding a company's non-
18 diversifiable risk premium to the risk-free rate.
19 The non-diversifiable risk premium is measured by
20 multiplying the proxy group's beta by the market
21 risk premium.

22 Q. What is the result of your traditional CAPM
23 analysis?

24 A. As calculated below, our traditional CAPM cost of

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 equity is 7.63%:

2 Required return = $(10.88\% - (2.55\%) * 0.61) + 2.55\%$

3 Q. Please describe the zero-beta CAPM.

4 A. The zero-beta CAPM is a two-factor version of the
 5 standard CAPM. The zero-beta CAPM determines the
 6 return on equity by adding two factors to the
 7 risk-free rate: first, a factor of 0.75%,
 8 multiplied by the average beta of the proxy group
 9 and the S&P 500 market risk premium; and second,
 10 a factor of 25% multiplied by the S&P 500 market
 11 risk premium. The zero-beta CAPM expression
 12 takes the form: $K = R_f + 0.75 * \beta * (R_m - R_f) +$
 13 $0.25 * (R_m - R_f)$, where all the variables are the
 14 same as used in the standard CAPM. The zero-beta
 15 CAPM was developed to address the alleged
 16 infirmity that the traditional CAPM understated
 17 the required return of stocks with a beta below
 18 1.

19 Q. What is the result of your zero-beta CAPM
 20 methodology?

21 A. As the following calculation illustrates, our
 22 zero-beta CAPM produces an 8.44% cost of equity.
 23 Cost of equity = $2.55\% + ((0.75 * 0.61 * (10.88\% -$
 24 $2.55\%)) + ((0.25 * (10.88\% - 2.55\%)))$.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Q. What CAPM result did you use in the calculation
2 of the proxy group cost of equity?

3 A. Consistent with Commission's precedent in prior
4 rate proceedings, including its most recent
5 decisions and orders in fully litigated cases,
6 such as the recent NFG Rate Case, Case 16-G-0257,
7 we have averaged the results of the traditional
8 and zero-beta CAPM analyses to arrive at a CAPM
9 result of 8.04%. The CAPM calculation is shown
10 in Exhibit___(SFP-20).

11 Q. What role should the CAPM play in the cost of
12 equity analysis?

13 A. In prior rate proceedings, like those to which we
14 have previously referred to, the Commission has
15 recognized that the CAPM presents a conceptual
16 framework for calculating a reasonable estimate
17 of a firm's cost of equity, however, because of
18 the relative weaknesses of the CAPM in comparison
19 with the DCF methodology, it is given a lesser
20 weight than the DCF. The Commission has adopted
21 a 33% weighting for the CAPM, compared to a 67%
22 weighting of the DCF in the overall cost of
23 equity analysis.

24 Q. What are some of the weaknesses of the CAPM

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 methodology?

2 A. The first shortcoming of the CAPM is its reliance
3 on historical betas as a surrogate for forward-
4 looking betas of companies. Historical estimates
5 only reflect the past riskiness of an equity
6 security that may not be representative of the
7 future riskiness that is relevant to equity
8 investors. The second weakness is that recent
9 history has shown that volatility in betas can be
10 dramatic. This may lead to estimating errors in
11 the cost of equity. Finally, the traditional
12 model may not adequately explain the variation in
13 stock returns. To underscore the fact that the
14 CAPM does not appear to adequately explain the
15 variations in stock returns, Ambika Prasad Dash
16 explained in his book entitled Security Analysis
17 and Portfolio Management that "...empirical studies
18 show that low beta stocks may offer higher
19 returns than the model would predict." This
20 excerpt is attached as Exhibit___ (SFP-21).

21 Q. What cost of common equity did you calculate for
22 your proxy group?

23 A. Using a 2/3 DCF and 1/3 CAPM weighting, the
24 estimated cost of common equity is 8.16% rounded

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 up to 8.20%.

2 Q. How does the Panel's 8.20% recommendation compare
3 to the Companies' currently authorized ROEs?

4 A. The Companies' are currently authorized an ROE of
5 9.0% dating back to the multi-year rate plans
6 approved by the Commission in Cases 16-G-0058 and
7 16-G-0059 in December 2016. It is important to
8 note, however, that when the Commission evaluates
9 the reasonableness of a multi-year rate plan's
10 ROE, it recognizes the necessity of a premium
11 above the ROE produced using Staff's methodology
12 in recognition of the increased financial and
13 business risks that are inherent when a company
14 is operating within the parameters of a multi-
15 year rate plan. By agreeing not to file for new
16 rates for three years, the Companies reduced
17 their ability to adjust rates in response to
18 changing conditions. Accordingly, locking in
19 rates for an extended period somewhat diminished
20 the Companies' flexibility and thereby increased
21 their level of risk. Additionally, the forecasts
22 of expense items in years two and three of a
23 multi-year rate plan are inherently more
24 inaccurate and thus expose a company to

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 additional operating risk. Finally, it is also
2 worth noting that the interest rate environment
3 when the Commission approved the current rate
4 plans' 9.0% ROEs was modestly higher compared
5 with today.

6 Q. Is there any reason a rational investor would
7 expect the Commission to authorize an ROE in
8 these proceedings anywhere close to the
9 Companies' 9.65% requested ROE?

10 A. No. Rational investors are well aware of the
11 Commission's preference for a formulaic approach
12 to the cost of common equity and are also aware
13 of the Commission's preference for establishing
14 rates over a multi-year period. Accordingly,
15 they likely expect that rates in this proceeding
16 will be set over a multi-year period, and that
17 the ROE, after accounting for the additional
18 financial and business risk, would likely be
19 similar to the 8.8% to 9.0% range of recent Joint
20 Proposals approved by the Commission.

21 Q. What are the Joint Proposals that the Panel is
22 referring to?

23 A. We are referring to the three most recent Joint
24 Proposals approved by the Commission. The Joint

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Proposal for Orange and Rockland, approved in
2 March 2019, adopted an ROE of 9.0%. Further, the
3 Joint Proposal for Central Hudson, approved in
4 June 2018, adopted an ROE of 8.8%. Finally, the
5 Joint Proposal for Niagara Mohawk, approved in
6 March 2018, adopted an ROE of 9.0%.

7 Q. In the event that a Joint Proposal is not
8 reached, and the Commission will be setting rates
9 solely for the rate year, are there additional
10 factors that it may want to consider with respect
11 to the level of the Companies ROE?

12 A. Yes. We believe that there are two recent
13 developments that could modestly and negatively
14 impact investors return requirements.
15 Specifically, once it has had sufficient time to
16 analyze the issue, we believe the Commission
17 should consider the impact of the Companies'
18 moratorium on processing new natural gas service
19 applicants in their respective service
20 territories until the Northeast Supply
21 Enhancement (NESE) gas pipeline receives its
22 necessary permits. This development implies that
23 the Companies will be potentially foregoing
24 growth opportunities in the future. However, the

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Commission's ROE authorization should also
2 incorporate the impact of the likelihood that the
3 Companies Revenue Decoupling Mechanism (RDM) will
4 also be changed to a revenue per class
5 reconciliation from the current revenue per
6 customer model. In light of the curtailing of
7 natural gas expansion in the Companies' service
8 territories, the switch to a revenue per class
9 RDM would offer the Companies' greater protection
10 from a decline in sales.

11

12 **Discussion of Companies' Witness Bulkley's ROE**

13

Approach

14 Q.

Please summarize the approach followed by the
15 Companies' witness Ms. Bulkley?

16 A.

Ms. Bulkley began her analysis by applying her
17 cost of equity models to two separate proxy
18 groups. The first consisting of both electric
19 utility holding companies and natural gas
20 distribution holding companies, which she
21 referred to as her "Combined Utility Proxy
22 Group," and the second proxy group was derived
23 solely from natural gas distribution holding
24 companies, to which she referred to the "Natural

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Gas Proxy Group". Ms. Bulkley developed three
2 multi-stage DCF models utilizing the low, mean,
3 and high earnings growth rate estimates published
4 by Yahoo Finance, Zack's, and Value Line as shown
5 in her Exhibit___(AEB-1). These DCF calculations
6 resulted in a low, mean, and high ROE estimate
7 for each company in her proxy group. Ms. Bulkley
8 utilized both the traditional form of the CAPM
9 and the zero-beta CAPM applied to both Bloomberg
10 and Value Line betas that resulted in two sets of
11 12 ROEs for both her Combined Utility Proxy Group
12 and Natural Gas Proxy Group. Ms. Bulkley then
13 concluded that an appropriate ROE for the
14 Companies ranges between 9.65% and 10.55%. In
15 this proceeding, the Companies are seeking a
16 9.65% ROE for the rate year.

17 Q. What are your principal points of contention with
18 Ms. Bulkley's analyses?

19 A. Overall, we are concerned with three primary
20 aspects of her analysis: 1) the composition of
21 both of the Companies' proxy groups, 2) the use
22 of excessive growth rates in the Companies' DCF
23 analyses, and 3) the use of several flawed key
24 inputs employed in her CAPM analyses;

1 particularly Ms. Bulkley's market return
2 estimate, and to a lesser extent the risk-free
3 rate. Finally, we strongly disagree with Ms.
4 Bulkley's premise that current market conditions
5 warrant that the CAPM be accorded equal weighting
6 with the DCF.

7

8 **Criticism of The Proxy Groups Employed By Ms. Bulkley**

9 Q. Please describe Ms. Bulkley's proxy groups.

10 A. Ms. Bulkley developed two proxy groups: one which
11 she referred to as a Combined Utility Proxy
12 Group, and the other which she referred to as a
13 Natural Gas Proxy Group. The Natural Gas Proxy
14 Group consists solely of the seven gas
15 distribution companies that are also included in
16 her Combined Utility Proxy Group. The Combined
17 Utility Proxy Group consists of those seven gas
18 companies and 13 additional electric distribution
19 companies.

20 Q. How did Ms. Bulkley develop her Natural Gas Proxy
21 Group?

22 A. Beginning with 10 companies classified as natural
23 gas distribution companies by Value Line, she
24 applied the following screening criteria: 1)

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 eliminated companies that are not covered by at
2 least two utility industry equity analysts; 2)
3 eliminated companies that do not have investment
4 grade corporate credit ratings and/or senior
5 unsecured bond ratings according to S&P and
6 Moody's; 3) eliminated companies that have not
7 paid regular dividends or do not have positive
8 earnings growth projections from at least one
9 source; 4) eliminated companies with less than 70
10 percent of total operating income derived from
11 regulated utility operations; 5) eliminated
12 companies that derive less than 50 percent of
13 total operating income from regulated natural gas
14 distribution operations; 6) eliminated companies
15 known to be party to a merger, acquisition, or
16 other transformational transaction; and 7)
17 eliminated companies that have owned generation
18 comprising greater than 60 percent of the
19 company's MWh.

20 Q. Do you believe that Ms. Bulkley's use of a
21 Natural Gas Proxy Group is appropriate?

22 A. No, the primary reason Ms. Bulkley's use of a
23 Natural Gas Proxy Group is inappropriate because
24 National Grid is viewed principally as an

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 electric utility holding company by investors.
2 Also, even in instances where it is appropriate
3 to look at the gas utility industry such as with
4 companies like NFG, Corning and St. Lawrence Gas,
5 a Natural Gas Proxy Group, when constructed using
6 Staff's long-running selection criteria, would
7 only produce a five company proxy group, and a
8 proxy group consisting of only five companies
9 does not provide an adequate sample size to
10 produce reliable results. An inadequate sample
11 size introduces the possibility of a single
12 analyst error or the presence of an outlier to
13 influence the cost of equity results as evidence
14 in Ms. Bulkley's use of Northwest Natural Gas
15 Company's growth rate shown on page 6 of her
16 Exhibit__ (AEB-1).

17 Q. Can you provide any research indicating what a
18 reasonable size of a proxy group should be?

19 A. Yes. In the book "New Regulatory Finance" by Dr.
20 Roger Morin, he suggests that a proxy group size
21 of between 15 and 30 is reasonable to support a
22 reliable cost of equity estimate.

23 Q. Can you provide an excerpt from the book to
24 support your assertion that a proxy group size of

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 between 15 and 30 is reasonable?

2 A. Yes. In discussing cluster analysis to select a
3 proxy group from a universe of pure-play utility
4 companies, Dr. Morin states on pages 225 and 226
5 of his book that, "With cluster analysis,
6 comparable companies are selected on the basis of
7 'closeness' to the targeted entity in terms of
8 such predetermined risk variables such as credit
9 ratings, after-tax interest coverage, equity
10 ratio, total capital, and variability of
11 operating income... A cluster size of 15 to 30
12 firms is reasonable. Once a cluster of
13 comparable companies is identified for each firm
14 or division, the average DCF and CAPM/ECAPM
15 (Empirical Capital Asset Pricing Model) cost of
16 equity estimates for the publicly traded
17 companies are used as estimates of equity costs
18 for the divisions." This excerpt is shown in
19 Exhibit___(SFP-22). Even though the above-
20 mentioned quote by Dr. Roger A. Morin is relative
21 to cluster analysis, the principle is equally
22 applicable to any proxy group selection
23 irrespective of the selection criteria and
24 methodology employed because unreasonable sample

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 size produces unreliable results.

2 Q. What were the selection criteria for Ms.
3 Bulkley's second proxy group, the Combined
4 Utility Proxy Group?

5 A. Ms. Bulkley began by selecting companies
6 classified as electric utilities by Value Line,
7 and then applied the following screening
8 criteria: 1) eliminated companies that are not
9 covered by at least two utility industry equity
10 analysts; 2) eliminated companies that do not
11 have investment grade corporate credit ratings
12 and/or senior unsecured bond ratings according to
13 S&P and Moody's; 3) eliminated companies that
14 have not paid regular dividends or do not have
15 positive earnings growth projections from at
16 least one source; 4) eliminated companies that
17 have owned generation comprising greater than 60
18 percent of the Company's MWh sales to ultimate
19 customers; 5) eliminated companies with less than
20 70 percent of total operating income derived from
21 regulated utility operations and 6) eliminated
22 companies known to be party to a merger,
23 acquisition, or other transformational
24 transaction.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Q. What is the impact of Ms. Bulkley's selection
2 criteria?

3 A. In the Companies' response to IR DPS-249, Ms.
4 Bulkley indicated that, based on her six
5 selection criteria, she eliminated 29 companies
6 from the universe of 49 Electric and Natural Gas
7 companies in constructing her Combined Utility
8 Proxy Group.

9 Q. Do you have any concern with any of Ms. Bulkley's
10 selection criteria?

11 A. Yes. We have three concerns regarding her
12 selection criteria: 1) relating to net operating
13 income, 2) analyst coverage, and 3) generation
14 MWH sales.

15 Q. Please explain.

16 A. First, we find Ms. Bulkley's requirement that a
17 company must have 70% of its net operating income
18 from 'regulated utility operations' to be too
19 restrictive. Operating income is the amount of
20 revenue left over after accounting for all the
21 expenses necessary to keep the business running.
22 Her methodology would result in the elimination
23 of companies whose risk characteristics are
24 closely comparable to KEDNY/KEDLI for example,

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 NextEra Energy, Inc. was eliminated from her
2 proxy group using the 70% operating income
3 criteria. Moreover, using operating earnings
4 instead of a revenue criterion for establishing
5 the proxy group may allow companies into the
6 group that contain substantially greater risk
7 than a typical regulated utility. Revenues more
8 accurately reflect the exposure to riskier
9 competitive operations, because it is not
10 uncommon for competitive ventures to be
11 unprofitable at times. Accordingly, it is quite
12 possible that using the 70% of operating income
13 criteria could introduce companies into the proxy
14 group that have a higher inherent risk profile
15 than is proper for a regulated utility proxy
16 group.

17 Q. Is there any other reason why it is inappropriate
18 to use operating income as a selection criterion?

19 A. As illustrated in Exhibit___ (SFP-23), the
20 difference in accounting policy choices such as a
21 difference in inventory valuation policy options
22 and a difference in depreciation choices across
23 companies could have a significant impact on
24 reported operating income than on reported

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 revenues. For these reasons, revenue remains a
2 superior criterion for ensuring that a utility
3 proxy group properly reflects the amount of
4 regulated business that most closely approximates
5 the risk of the regulated utility being analyzed,
6 and we recommend that Ms. Bulkley's use of
7 operating income as a criterion should be
8 rejected, and instead our 70% regulated revenue
9 criterion be adopted.

10 Q. Please explain your second concern regarding her
11 selection criteria?

12 A. Our second concern relates to the elimination of
13 companies that are not covered by at least two
14 utility industry equity analysts. Based upon her
15 application of this criterion, Ms. Bulkley
16 eliminated three companies: Otter Tail, MGE
17 Energy, Inc. and El Paso Electric. It appears to
18 us, however, that either Ms. Bulkley is not
19 appropriately applying her own selection
20 criterion, or she is unaware that these three
21 companies are followed by more than one equity
22 analyst. Specifically, Otter Tail is covered by
23 Value Line Investment, Williams Capital Group,
24 L.P, and Maxim Group, while El Paso Electric is

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 covered by Merrill Lynch, Mizuho Securities and
2 Williams Capital Group as shown in our
3 Exhibit___(SFP-24). Moreover, MGE Energy is
4 covered by more than one equity analyst including
5 CFRA Equity Research, Ford Equity Research
6 Jefferson Research & Management with their latest
7 reports published on July 19, 2019, August
8 9,2019, and August 9, 2019, respectively.
9 Therefore, there is no reason to exclude Otter
10 Tail, El Paso Electric, and MGE Energy from her
11 proxy group on the basis of number of equity
12 analysts.

13 Q. Please explain your final concern regarding her
14 selection criteria?

15 A. We find Ms. Bulkley's limiting her proxy group to
16 primarily transmission and distribution utilities
17 (T&D) by excluding those having owned generation
18 comprising greater than 60% of MWH sales to
19 ultimate customers to be unreasonably
20 restrictive. This restriction resulted in the
21 elimination of eleven companies, that are all
22 comparable in risk and thus suitable surrogates
23 for the Companies. By drastically reducing the
24 size of her proxy group, Ms. Bulkley has

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 undermined the reliability of her results. Thee
2 eleven eliminated companies, which are all in our
3 proxy group are: Ameren Corp., American Electric
4 Power Co., Duke Energy, Entergy Corp., IDACORP,
5 MGE Energy, NextEra Energy, OGE Energy, Pinnacle
6 West Capital Corp., PNM Resources Inc. and Xcel
7 Energy.

8

9 **Criticism of Ms. Bulkley's DCF Methodology**

10 Q. Please describe Ms. Bulkley's DCF methodology.

11 A. Ms. Bulkley uses a multi-stage DCF analysis based
12 on a three-month average stock price and a range
13 of near-term growth rate assumptions that
14 produces a mean ROE of 9.20% for her Combined
15 Utility Proxy Group and 9.04% for her Natural Gas
16 Proxy Group. Specifically, she uses a three-
17 stage DCF analysis that relied on equity
18 analysts' earnings growth forecasts published by
19 Value Line, Zacks and Yahoo Finance.

20 Q. Do you have any concerns with Ms. Bulkley's DCF
21 analysis?

22 A. We have several concerns. Foremost among them,
23 we find her third stage growth rate to be
24 excessive and believe that she applies an

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 inappropriate internal rate of return (IRR) tool
2 for calculating her ROE estimate. As we will
3 explain shortly, we also find her first-stage
4 growth rates to be inferior to ours. Ms.
5 Bulkley's use of an excessive third stage growth
6 rate is the principal reason that her 9.20% DCF-
7 based ROE recommendation is flawed. While the
8 use of a three-stage DCF growth model is not
9 necessarily problematic, our primary concern lies
10 with her use of an excessive growth rate in her
11 long run or third-stage growth rate, and to a
12 lesser extent, some of the excessive growth rates
13 she uses in the first stage of her analysis.

14 Q. Please elaborate why you believe that her first-
15 stage growth rates are problematic.

16 A. Ms. Bulkley's model uses earnings growth rate
17 estimates to determine short-term dividend growth
18 rates, ignoring available dividend growth rates
19 or forecasts. This is in direct contrast to the
20 basic premise of the DCF which measures the
21 present value of future dividends. In using
22 earnings growth, Ms. Bulkley has simply assumed
23 that dividend growth will match earnings growth
24 but has presented no evidence why this

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 expectation is valid. Of greater concern is her
2 use of a 25.5% earnings per share (EPS) growth
3 rate for Northwest Natural Gas Company. We
4 believe that a growth estimate of that magnitude
5 is unreasonable and that she should have excluded
6 it from her analysis. The impact of eliminating
7 this 25.5% EPS growth rate would have reduced Ms.
8 Bulkley's DCF results by nine basis points from
9 9.20% to 9.11%.

10 Q. Do you have any other concerns?

11 A. Yes. We also have a concern about her use of a
12 historically derived real gross domestic product
13 (GDP) rate, together with a forecasted inflation
14 rate as the long-term growth rate of her proxy
15 group. We will discuss this in detail later.

16 Q. Please describe how Ms. Bulkley derives her
17 short-term dividend growth rates.

18 A. In the first stage of the three-stage DCF model,
19 Ms. Bulkley takes the current annualized dividend
20 for each company in her proxy group and escalates
21 the dividend for a period of five years based on
22 the average of the three-to-five-year earnings
23 growth estimates reported by Yahoo Finance, Zacks
24 and Value Line.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Q. Why is this approach problematic?

2 A. It is highly unlikely that investors would rely
3 exclusively on the earnings per share growth rate
4 forecasts of Wall Street analysts in determining
5 short-term dividend projections. The 25-year old
6 Harris study on page 59 of Ms. Bulkley's
7 testimony purports that a "growing body of
8 knowledge" shows that analyst earnings forecasts
9 are indeed reflected in stock prices. While we
10 agree that all relevant information is
11 incorporated into a company's stock price, the
12 linear relationship of earnings to dividend
13 growth that she assumes is unlikely. That is,
14 payout ratios will change based upon many factors
15 including individual company cash flow
16 requirements, future market conditions as well as
17 other factors. Investors will not just look at
18 expected earnings but also factor in all relevant
19 information when estimating their required
20 return.

21 Q. Does Ms. Bulkley have any concern with the use of
22 Value Line short-term dividend projections?

23 A. Yes. Ms. Bulkley, on page 61 of her testimony,
24 claims that since Value Line's projections of

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 short-term dividend growth do not explicitly
2 include growth in retained earnings, their use is
3 improper as inputs to the DCF analysis. What she
4 has failed to recognize is that, while in the
5 long-term, dividend growth is constrained to the
6 combination of retention growth and issuing stock
7 above/below book value, in the short run,
8 dividend policy can change and result in
9 dividends to grow above or below retention
10 growth. Consequently, her short-term dividend
11 projections are a direct product of the average
12 earnings growth estimates of three different
13 publications, without any consideration being
14 given to the growth rates effect on future
15 dividend payouts. Our use of Value Line dividend
16 growth projections recognizes the impact of
17 payout policy while her sole use of short-term
18 earnings forecasts does not.

19 Q. Does Ms. Bulkley have other criticisms of using
20 only Value Line dividend growth rates?

21 A. Yes. Ms. Bulkley claims Value Line's dividend
22 projections are the growth expectations of a
23 single analyst and attempts to discredit
24 utilization of Value Line by claiming the

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 publication is based on a single analyst's
2 viewpoint. While Value Line assigns a lead
3 analyst in the electric utility industry who is
4 then credited for each company's report, each
5 report that Value Line develops goes through a
6 continual evaluation and quality control process
7 where 'multiple analysts' review the reports
8 generated before they are ever posted. The Value
9 Line document describing this process is included
10 in Exhibit___(SFP-25).

11 Q. Is there another advantage to the continued use
12 of Value Line projections in your analysis?

13 A. Yes. Staff and the Commission have reasonably
14 relied on Value Line for many years. This
15 methodology is generally understood by the
16 investment community and lends a degree of
17 predictability to the rate setting process in New
18 York State. While this consistency does not help
19 to identify the return that equity investors
20 currently require, it is important in the sense
21 that it provides predictability in the earnings
22 level that investors in New York utilities can
23 expect. This is particularly important to the
24 major credit rating agencies, who view

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 unpredictability as an additional risk.

2 Q. You previously stated that Ms. Bulkley estimated
3 long-term dividend growth based upon expected GDP
4 growth. How did Ms. Bulkley calculate expected
5 GDP growth?

6 A. Rather than using estimates of future GDP growth,
7 Ms. Bulkley utilized a 3.22% historical average
8 growth rate in real GDP for the period 1929
9 through 2018 based on data from the Bureau of
10 Economic Analysis. Ms. Bulkley then calculated a
11 5.56% forecasted nominal GDP rate by taking this
12 historical average growth rate, together with her
13 expected average inflation rate of 2.27%. The
14 2.27% expected average inflation rate was
15 calculated based upon an average of 2.2% expected
16 inflation published by the Blue Chip Financial
17 Forecasts, and 2.31% and 2.29% she derived using
18 data from the Energy Information Administration
19 (EIA). The EIA expected inflation was based on
20 the compound annual Consumer Price Index (CPI)
21 growth rate and the compound annual growth rate
22 of the CPI for all urban consumers and the
23 compound annual GDP Price Index. The derivation
24 of her 5.56% long-term GDP growth rate is shown

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 on page 1 of her Exhibit__ (AEB-2).

2 Q. Do you agree with Ms. Bulkley's 5.56% long-term
3 growth rate estimate?

4 A. No. While we do not necessarily find it
5 unreasonable to assume that long-run growth for
6 utilities would approximate growth in the overall
7 economy, what is unreasonable is the
8 excessiveness of her estimate of long-term GDP
9 growth. Specifically, we do not think the use of
10 her historically-derived real GDP as the long-
11 term growth rate is appropriate for reasons
12 previously discussed, namely because historical
13 growth rates are necessarily measured over a
14 subjective time period, and in this instance, one
15 that incorporates far different circumstances
16 than exist today. Historical average growth
17 rates by their very nature completely, and
18 inappropriately ignore economic conditions today.
19 In addition, the calculation presented by Ms.
20 Bulkley does not accurately measure GDP growth.
21 This inaccuracy occurs since the 2.27% expected
22 inflation rate that she utilizes reflects
23 expected price changes in the Consumer Price
24 Index and in the CPI-Urban. The CPI measures

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 changes in the price level of a basket of
2 consumer goods and services and, unlike the GDP
3 deflator, does not measure inflation over the
4 entire economy. Additionally, Ms. Bulkley's use
5 of the real historical GDP growth rate from 1929
6 to 2018 is inappropriate because while historical
7 averages provide insight into how past factors
8 might have influenced past changes in GDP, they
9 are poor indicators of future economic activity.

10 Q. Are there estimates of long-run growth in the
11 economy that you believe provide a more
12 reasonable estimate of long-run growth?

13 A. Yes, we are aware of two reasonable estimates of
14 long-run growth. The first source is the Long-
15 Range Consensus U.S. Economic Projections
16 provided by Blue Chip Economic Indicators, which
17 we previously discussed, and employed in
18 ascertaining the reasonableness of our
19 sustainable growth rate. Not only does this
20 report project out into the future twice as far
21 as any other reputable source of economic data,
22 it also reflects the forward-looking consensus of
23 approximately 50 of the financial community's
24 most prominent economists. According to the

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 March 10, 2019 publication, which is the most
2 recent and is also shown in our previously
3 mentioned Exhibit___(SFP-18), the consensus long-
4 run nominal GDP growth rate for the most distant
5 period forecast, 2026-2030 is 4.0%, which
6 includes both 2.1% real GDP growth and 1.9%
7 expected inflation components. A reasonable
8 investor would expect a similar long-term growth
9 rate for an energy utility rather than the
10 excessive 5.56% growth rate used by Ms. Bulkley.

11 Q. Please continue with your second source.

12 A. The second source as shown in our Exhibit___(SFP-
13 SFP-26), is based on information and data from
14 U.S. Energy Information Administration (EIA). On
15 page 18 of its April 2019 Annual Energy Outlook,
16 the EIA states that "The Reference, High Economic
17 Growth, and Low Economic Growth cases illustrate
18 three possible paths for U.S. economic growth.
19 In the High Economic Growth case, average annual
20 growth in real GDP is 2.4% from 2018 to 2050,
21 compared with 1.9% in the Reference case. The
22 Low Economic Growth case assumes a lower rate of
23 annual growth in real GDP of 1.4%."

24 The EIA's optimistic long-run real GDP growth

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 rate of 2.4% suggests a high nominal GDP growth
2 rate of about 4.5% (2.4% plus 2.1% inflation).
3 Accordingly, in light of this information, Ms.
4 Bulkley's use of an excessively high long-term
5 growth rate of 5.56% totally undermines the
6 reliability of her DCF results.

7 Q. Earlier, you indicated that you have a concern
8 with Ms. Bulkley's use of the irregular internal
9 rate of return in her DCF analysis. Please
10 explain.

11 A. Our concern relates to Ms. Bulkley's
12 inappropriate use of the extended version of the
13 Internal Rate of Return (XIRR) in her DCF
14 analyses versus the Commission preferred use of
15 the regular IRR in our model. Her use of the
16 XIRR overstates her mean DCF result of 9.20% for
17 her Combined Utility Proxy group by approximately
18 15 bps and approximately 14 bps for her Natural
19 Gas Proxy Group's mean DCF result of 9.04%.

20 Q. Please explain the XIRR and the IRR?

21 A. The XIRR is a Microsoft Excel function, or tool,
22 used to calculate returns for a series of cash
23 flows that are not regular. The IRR is suitable
24 for regular cash flows that could be monthly,

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 quarterly, or annually. As an illustration, if
2 an individual had six series of cash flows
3 consisting of an initial investment of \$1,000
4 made on June 30, 2014, and four dollar returns
5 consisting of \$200, \$220, \$400, and \$300 on
6 2/28/2015, 1/28/2016, 2/15/2017 and 3/28/2018,
7 respectively, this individual's investment return
8 based on the irregular cash flow will be 5.0%
9 compared to 4.3% using the regular IRR. Since
10 dividend cash flow are typically paid on a
11 regular basis, we do not believe that the XIRR is
12 an appropriate tool for determining the DCF-based
13 ROE.

14 Q. At various sections of her direct testimony, Ms.
15 Bulkley, to some extent, cited the Recommended
16 Decision (RD) issued in the Generic Finance Case
17 (GFC) 91-M-0509 to support her assertion that the
18 cost of equity methodologies that she employed
19 are consistent with the goals of the Recommended
20 Decision issued in the Generic Finance
21 Proceeding. Did Ms. Bulkley provide any evidence
22 indicating that the Generic Finance Case (both
23 KEDNY and KEDLI were parties) either directly or
24 indirectly relied on the use of the XIRR?

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 A. No. In response to IR DPS-895, Ms. Bulkley
2 stated that she "...is unaware whether the Generic
3 Finance Case RD relied on the IRR or XIRR
4 formula."

5 Q. Panel, what is your opinion about whether the
6 Generic Finance Case RD relied on the IRR or XIRR
7 formula?

8 A. To understand whether the Generic Finance Case
9 Recommended Decision relied on the IRR or XIRR,
10 we reviewed and recast the DCF results for both
11 the 34-member electric and the 11-member gas
12 proxy groups in Appendix B of the GFC's "Return
13 on Equity Consensus Document" prepared by the
14 signatory members of the Electric and Gas
15 Industry to which both KEDNY and KEDLI were
16 signatory parties. For the 34-member electric
17 proxy group, the GFC results shows a median and
18 average DCF ROEs of 9.62% and 9.61%,
19 respectively. Our recast using the regular IRR
20 resulted in a 9.62% for both median and average
21 ROE compared to 9.9% for both median and average
22 ROE using the XIRR. For the 11-member gas proxy
23 group, our recast of the GFC results shows a
24 10.70% and 10.40% average and median ROE,

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 respectively. Our recast using the regular IRR
2 resulted in 10.71% and 10.40% average and median
3 ROE, respectively compared to 11.0% and 10.67%
4 average and median ROE using the XIRR. Our
5 recast is shown in Exhibit___(SFP-27).

6 Q. Panel, what is your conclusion?

7 A. Our conclusion is that even though there was no
8 specific discussion in the "Return on Equity
9 Consensus Document" of the GFC concerning whether
10 to use the regular IRR or XIRR, our analysis
11 shows that the Generic Finance Case RD relied on
12 the IRR rather than the XIRR for its DCF analysis
13 at that time.

14 A. Has the Commission ever granted a cost of equity
15 based upon a DCF analysis that discounted future
16 dividends using XIRR?

17 A. No. Instead, both Staff and the Commission have
18 relied on the regular IRR in DCF-based ROE
19 calculations in both litigated and negotiated
20 cases. Therefore, we recommend that the
21 Commission reject Ms. Bulkley's use of the
22 irregular internal rate of return and adopted
23 Staff's position.

24 Q. Beginning on page 14 of her direct testimony, Ms.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Bulkley argues that due to the current market
2 conditions, and in particular the Federal
3 Reserve's monetary policies, the DCF model
4 currently underestimates investors' required
5 returns due to low dividend yields and high
6 valuations on utility stocks, which she argues
7 are not sustainable in light of her contention of
8 investors' expectation of higher interest rates.
9 How does the Panel respond to this assertion?
10 A. To gain better insight about trends in utility
11 stock valuation and dividend yields, Staff
12 compiled dividend yields, MBR and price-to-
13 earning (P/E) ratio data from Merrill Lynch
14 Quantitative Profiles from January 2005 to June
15 2019 as shown in Exhibit___(SFP-28). As the
16 exhibit illustrates, the levels of utility
17 valuation and dividend yields in the three years
18 (2005-2007) preceding the 2008/09 credit and
19 financial crisis are similar to or in some cases
20 higher than the current levels. For instance,
21 from 2005 to 2007, the average P/E ratio, MBR and
22 dividend yields on annual basis were 16.49, 2.06
23 and 3.27%, respectively, compared to 16.23, 1.72,
24 and 3.71%, respectively, for the post-financial

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 crisis period (2011 to June 2019). This trend
2 suggests that low-interest rates as a result of
3 the Federal Reserve monetary policies are not
4 necessarily the only contributing factor to high
5 valuation and low dividend yields in utility
6 stocks. Therefore, Ms. Bulkley's belief that the
7 current higher equity valuations for utility
8 stocks have been driven by the Federal Reserve's
9 monetary policies resulting in the DCF
10 understating investors' required return is not
11 grounded in any statistical analysis but appears
12 to be based on a priori assumptions. What Ms.
13 Bulkley is calling abnormal is really not all
14 that different from the economic conditions that
15 prevailed over several years before the financial
16 crisis hit in 2008. Our interpretation is shared
17 by one article that was recently published in the
18 Wall Street Journal on July 8, 2019.

19 Q. Could you please cite the Wall Street Journal
20 article.

21 A. Yes. In the article entitled, "Can Low Rates
22 Explain High Stock Prices? Not So Fast", Mark
23 Hulbert stated that "[t]oday's low interest rates
24 justify above-average price/earnings ratios.

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 That's the theory, anyway. Unfortunately, that
2 theory doesn't hold up when you look at it
3 through the lens of history." This article is
4 provided as Exhibit___(SFP-29).

5 Q. Please continue with your response.

6 A. Ms. Bulkley's assertion goes against the crux of
7 the efficient market hypothesis (EMH) underlying
8 the DCF model that posits that stock prices
9 reflect collective judgment of all stock market
10 participants and therefore, reflect all known
11 factors influencing the price of a stock,
12 including the Federal Reserve's monetary
13 policies.

14 Q. Are you aware of any financial literature that
15 has come out subsequent to the Financial Crisis
16 that supports continuing adherence to the
17 efficient market hypothesis?

18 A. Yes. In discussing the importance and
19 interpretation of stock prices in his book
20 entitled, "The Cost of Equity - A Practitioner's
21 Guide (2010 Edition)", David C. Parcell,
22 specifically stated on page 88 of his book that
23 "[t]he market price of a firm's stock represents
24 the collective judgement of all stock market

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 participants as to the value of a firm at a
2 particular point in time. The stock price takes
3 into consideration the participants'
4 interpretation of all relevant factors, such as
5 past present and future earnings, the risk of
6 these earnings, dividend policy and other
7 factors." This article is shown as
8 Exhibit___(SFP-30).

9 Q. Is there any indication that the Federal Reserve
10 is likely to increase interest rates in the near
11 term as claimed by Ms. Bulkley?

12 A. We do not believe so because the market
13 expectation is that the Federal Reserve is likely
14 to cut or maintain the current level for the near
15 term as shared by one article that was recently
16 published in the Wall Street Journal on July 19,
17 2019, attached as Exhibit___(SFP-31). In
18 discussing recent signals from Federal Reserve
19 Chairman and other officials, the author, Nick
20 Timiraos stated that "Fed Chairman Jerome Powell
21 set the stage last week for the first interest
22 rate cut in over a decade during congressional
23 testimony, when he signaled concern about global
24 growth and the risk of a more prolonged shortfall

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 in inflation from the Fed's 2% target. Those
2 developments strengthened the case for a somewhat
3 easier policy stance." The author continued by
4 saying, "Federal Reserve officials signaled they
5 are ready to lower interest rates by a quarter-
6 percentage point later this month, while
7 indicating the potential for additional
8 reductions, despite the recent surge in market
9 expectations of a half-point cut. Officials
10 aren't prepared for bolder action now, according
11 to the officials' recent public statements and
12 interviews, as they weigh concerns about a
13 slowdown in global growth, an increase in trade-
14 policy uncertainty and a pullback in inflation."
15 Accordingly, the Federal Reserve cut the interest
16 rate on July 31, 2019, by 25 basis points, for
17 the first time since December 2008.

18 Q. Panel, what is your overall conclusion?

19 A. Our overall conclusion is that Ms. Bulkley's use
20 of historically-derived long-term growth rate,
21 25.5% earnings per share (EPS) growth rate for
22 Northwest Natural Gas Company, irregular IRR and
23 expectation of higher interest rate are
24 inappropriate and should therefore, be rejected

1 by the Commission.

2

3 **Criticism of Ms. Bulkley's CAPM Methodology**

4 Q. Would you please summarize Ms. Bulkley's CAPM
5 approaches?

6 A. Ms. Bulkley provided a total of 24 CAPM-derived
7 ROE estimates for her Combined Utility and
8 Natural Gas proxy groups using the same CAPM
9 methodologies that we employ. Ms. Bulkley
10 calculated 12 ROEs using the traditional CAPM
11 methodology and 12 ROEs using the zero-beta CAPM
12 methodology, using two different beta sources in
13 combination with three different risk-free rate
14 estimates for each version of the CAPM.

15 Q. Please explain how Ms. Bulkley derived each of
16 the three major inputs necessary for her CAPM
17 methodologies: the risk-free rate, beta and the
18 market risk premium.

19 A. As shown in her Exhibit__ (AEB-4), Ms. Bulkley's
20 traditional and zero-beta CAPM methodologies use
21 a risk-free rate based on the current three-month
22 average yield (December 2018 to February 2019
23 yields) on 30-year Treasury bonds (3.05%), the
24 near-term projected 30-year Treasury yield for

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 the five forward-looking quarters (2Q-2019
2 through Q2-2020) (3.28%), and the long-term
3 projected 30-year Treasury yield for the period
4 2020-2024 (3.90%). Similarly, Ms. Bulkley
5 developed a market risk premium based on an
6 estimated S&P 500 required market return of
7 13.77% and the subtraction of each of the three
8 risk-free rates we discussed above. Ms. Bulkley
9 utilized two different beta determinations within
10 each of her CAPM methodologies. For her Combined
11 Utility Proxy Group, Ms. Bulkley applied its
12 0.691 Bloomberg average beta and its 0.645 Value
13 Line average beta. For her Natural Gas Proxy
14 Group, she applied its 0.70 Bloomberg average
15 beta and its 0.686 Value Line average beta.
16 Given these respective inputs, Ms. Bulkley then
17 developed six traditional CAPM estimates of the
18 cost of common equity for KEDLI and KEDNY for
19 both proxy groups, ranging from 9.96% to 10.81%,
20 and six zero-beta estimates of the ROE for both
21 proxy groups ranging from 10.92% to 11.55%. By
22 essentially averaging all of these results, Ms.
23 Bulkley's CAPM methodology produced a mean ROE
24 estimate of 10.95% for her Natural Gas Proxy

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Group and 10.72% for her Combined Utility Proxy
2 Group.

3 Q. What concerns do you have with Ms. Bulkley's CAPM
4 analyses?

5 A. We have three principal concerns regarding Ms.
6 Bulkley's CAPM analysis: 1) relating to her
7 derivation of a 13.77% market return, 2) her beta
8 determinations, and 3) her risk-free rate listed
9 in order of magnitude of their impact.

10 Collectively, the impact of these infirmities is
11 an overstatement in her cost of equity estimate
12 of a little over 200 bps.

13 Q. Please explain your concern with the approach she
14 used to determine her 13.77% required market
15 return.

16 A. The primary flaw with her CAPM approach is that
17 it relies entirely upon a constant growth DCF
18 analysis of the S&P 500. Her use of an
19 excessively high 13.77% market return versus our
20 10.88% market return is the main reason for the
21 large differences in her CAPM results and ours.
22 Quite simply, the basic assumption of this
23 approach, that the Bloomberg earnings growth rate
24 estimates formulated for the next three-to-five

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 years will last into perpetuity, is not
2 reasonable. This is precisely why Staff relies
3 on the ex-ante estimate of the required return of
4 the S&P 500 provided by Merrill Lynch, in our
5 previously mentioned Exhibit___(SFP-19). Merrill
6 Lynch's multi-stage DCF-derived required return
7 does not make this unrealistic assumption, but
8 rather uses three specific stages with varying
9 durations depending on the facts and
10 circumstances of the company being examined. The
11 unreasonableness of using a constant growth DCF
12 calculation to estimate the required market
13 return is perhaps best illustrated by considering
14 the fact that 39 of the S&P 500 companies in Ms.
15 Bulkley's market return calculation have near-
16 term earnings growth estimates in excess of 20.0%
17 and range as high as 96.36% (Exhibit__(AEB-1)).
18 It is plainly unreasonable that investors would
19 assume that those companies would be able to
20 maintain those extraordinary growth rates
21 forever.

22 Q. At various sections of her direct testimony, Ms.
23 Bulkley endorses recent conclusions the FERC has
24 made with respect to ROE to support the

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 reasonableness of her approach to ROE. For
2 example, on page 69, line 6 to 8, she stated that
3 "...FERC now relies on analysts' estimates of
4 earnings growth in the short-term and a long-term
5 GDP growth rate as the measure of growth in the
6 second stage." Could Ms. Bulkley have also
7 equally considered the FERC's proportionate
8 weighting of short-term and long-term growth rate
9 to check the reasonableness of her 13.77% derived
10 market return?

11 A. Yes. Ms. Bulkley could have considered the
12 FERC's proportionate weighting of short-term and
13 long-term growth rate at two-thirds and one-
14 third, respectively to check the reasonableness
15 of her 13.77% derived market return.

16 Q. What would have been Ms. Bulkley's market return
17 if she had used the FERC's weighted growth rate
18 approach?

19 A. As shown in our Exhibit__ (SFP-32), Ms. Bulkley's
20 market return would have been 11.37%, which is
21 240 basis points lower than her 13.77% market
22 return.

23 Q. Does Ms. Bulkley's market return calculation have
24 any other flaws?

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

- 1 A. Yes. Many of the companies in the calculation of
2 her excessive 13.77% market return are not paying
3 any dividends. The DCF calculation is premised
4 upon the present value of future cash flows, in
5 this case dividends. If companies are not paying
6 dividends, then the whole DCF calculation is
7 flawed because a DCF cannot be performed and
8 therefore her 13.77% market return should be
9 rejected because of flaws in her calculation.
- 10 Q. What is the impact of her use of the excessive
11 13.77% market return?
- 12 A. For her Combined Utility Proxy Group, the impact
13 is an increase of about 166 basis points.
- 14 Q. Please explain your second concern regarding the
15 derivation of Ms. Bulkley's beta estimates.
- 16 A. The Commission has consistently utilized Value
17 Line betas, and one of the principal reasons for
18 doing so is Value Line's superiority over other
19 sources like Bloomberg.
- 20 Q. Are there any independent sources that indicate
21 that Value Line Beta is superior?
- 22 A. Yes. In their recent book entitled Capital
23 Structure and Corporate Financing Decisions:
24 Theory, Evidence, and Practice, H. Kent Baker and

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Gerald S. Martin also wrote about the superiority
2 of Value Line betas over Bloomberg betas. They
3 wrote that "Value Line's adjustments also appear
4 informed by more than the type of simple
5 smoothing done by Bloomberg, which uses the
6 following formula:

7 $\text{adjusted beta} = \text{historic beta} * (0.67) + 0.33.$ "

8 After plotting historic betas, Value Line
9 adjusted betas, and Bloomberg adjusted betas, the
10 authors concluded that "the [Exhibits] convey a
11 key message for analysts: be wary of blindly
12 using historic betas from individual company
13 data. The tails of the distribution for historic
14 betas contain significant measurement error. A
15 clear advantage of Value Line betas (or those
16 from other providers who do more than just
17 historic regression) is that they reflect
18 professional judgment and attention to detail."

19 This report is attached as Exhibit__ (SFP-33).

20 Q. Has the Value Line beta accuracy been tested?

21 A. Yes. In her empirical research work entitled
22 "Whose Beta is Best?", Ms. Diana Harrington
23 investigated the accuracy of Value Line betas and
24 those betas reported by Merrill Lynch, Wilshire

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 Associates, Rosenberg and Associates (now BARRA)
2 and others. For the period studied, Value Line
3 consistently outperformed all other services over
4 the forecast horizon of one to four years for
5 public utilities. The study also indicated that
6 increased data points increase the beta accuracy.
7 The report is attached as Exhibit__ (SFP-34). We
8 have not come across any empirical research work
9 that shows that Bloomberg beta estimates are
10 superior to Value Line betas.

11 Q. What is the impact of using the blended Value
12 Line and Bloomberg betas?

13 A. For her Combined Utility Proxy Group, the impact
14 is an overstatement of about 21 basis points.

15 Q. Please explain your third concern relating to Ms.
16 Bulkley's use of the 30-year Treasury and future
17 estimates of its rate as the appropriate risk-
18 free rate.

19 A. Ms. Bulkley argues that the sole use of the yield
20 on the 30-year Treasury is appropriate because,
21 in her view, utility companies represent long-
22 duration investments. However, it has long been
23 Commission policy to rely on the average of the
24 10-year and 30-year Treasury yields to arrive at

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 the risk-free rate as investors have a range of
2 investment horizons. Furthermore, as the
3 Commission has maintained for many years, current
4 rates are the best indicator of future rates as
5 they are based upon the latest available
6 information to investors. The rationale for this
7 approach is well-established and reflects the
8 reality that there are investors with
9 intermediate-term as well as long-term investment
10 horizons.

11 Q. Ms. Bulkley argues that the Commission's
12 preferred approach is flawed because it does not
13 address the expected lives of the Companies'
14 assets, the equity duration of the utility
15 industry, or what Morningstar suggests is "the
16 time horizon of the chosen Treasury security is
17 that it should match the time horizon of whatever
18 is being valued," as stated on page 72. Do you
19 agree with her arguments?

20 A. No, we do not. While Ms. Bulkley is correct that
21 utility plant assets have very long lives, and we
22 would agree that sound financing practices
23 generally dictate these long-lived assets be
24 financed with similarly long-lived securities,

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 her conclusion that all utility equity investors
2 have an investment horizon of 30 years is
3 unsubstantiated and erroneous. One needs to look
4 no further than the long-term debt obligations
5 supporting the Companies own rate bases to
6 understand that investors' have different time
7 horizons.

8 Q. Is Ms. Bulkley's use of Treasury yield
9 projections appropriate for use in the CAPM?

10 A. No. Her use of interest rate projections should
11 be rejected. As Staff and the Commission have
12 maintained for many years, and as mentioned
13 earlier, current rates are the best indicator of
14 future rates as they are based on the latest
15 available information to investors.

16 Q. What is the combined effect on Ms. Bulkley's CAPM
17 results if she had used a blended yield of 10-
18 year and 30-year Treasury yields similar to the
19 Commission's preferred approach instead of her
20 use of projected 30-year Treasury yields?

21 A. The impact is an increase of about 13 basis
22 points.

23 Q. Panel, what is your overall conclusion relating
24 to your concerns of Ms. Bulkley's excessive

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 13.77% market return, her beta determinations,
2 and risk-free rate derivation?

3 A. Our overall conclusion is the impact of these
4 infirmities is an overstatement in her cost of
5 equity estimate of a little over 200 bps.
6 Therefore, we recommend that the Commission
7 reject Ms. Bulkley's 13.77% market return, her
8 beta determinations, and risk-free rate
9 derivation and instead accept Staff's appropriate
10 CAPM inputs for the risk-free rate, market risk
11 premium and beta determination.

12

13 **Equal Weighting of DCF and CAPM Results**

14 Q. On page 79 of her direct testimony, Ms. Bulkley
15 argues that "...it is reasonable to apply equal
16 weighting to the DCF and CAPM methods when
17 determining the ROE for the Companies." Why does
18 Ms. Bulkley argue that the CAPM methodology
19 should be accorded an equal weighting with the
20 DCF methodology?

21 A. Ms. Bulkley's explanation to justify her equal
22 weighting is based on three main points: 1) the
23 effect of the Federal Reserve monetary policies
24 on market conditions and its corresponding impact

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 on utility stock valuations, 2) other utility
2 regulatory bodies' recent response to the alleged
3 impact of current capital market conditions on
4 the DCF model, and 3) market expectations of
5 higher interest rates. She then concluded that
6 the DCF method is producing ROE results that are
7 significantly lower than the results derived from
8 her CAPM calculations, and therefore, it is
9 reasonable to place less reliance on the DCF
10 results (page 79 lines 8-10).

11 Q. Please what is your response?

12 A. First, as we pointed out earlier, the MBRs and
13 P/E ratios over the past nine years or so, have
14 actually generally been lower than they were in
15 the three-year period preceding the financial
16 crisis. The significance of that timeframe is
17 that it was a time period well before the Federal
18 Reserve had begun its Quantitative Easing, and
19 yet we had MBRs even higher than they are today.
20 Therefore, Ms. Bulkley's whole contention that
21 utility stock prices are extraordinarily high
22 specifically because of the Federal Reserve's
23 monetary policies is misguided. Moreover, Ms.
24 Bulkley would have us believe that investors

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 believe these "anomalous" conditions will
2 significantly change in the not too distant
3 future. Conditions that have persisted for
4 nearly a decade should not be considered
5 anomalous instead they should be viewed as the
6 new normal. If the valuations for dividend-paying
7 stocks have increased, it simply means that
8 investors view dividend payments favorably and
9 perceive less risk in an investment in companies
10 with higher dividend payouts as compared to
11 companies paying lower or no dividends. As such,
12 lower risk should translate into lower return
13 requirements and should be reflected in required
14 ROE estimations. This would hold true in a DCF
15 or any analysis quantifying required returns.

16 Q. Please elaborate on her second argument that
17 other utility regulatory bodies have responded to
18 the impact of the current market conditions on
19 the DCF results.

20 A. Ms. Bulkley stated that other utility regulatory
21 bodies like the Illinois Commerce Commission, the
22 Pennsylvania Public Utility Commission, and the
23 Missouri Public Service Commission have all
24 "considered" the current market conditions impact

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 on DCF results. She also stated that the FERC,
2 in particular, has determined that current
3 capital market conditions have caused the DCF
4 model to understate equity costs for regulated
5 utilities at this time. She continued by saying
6 that the FERC recently proposed a methodology
7 that reflects the commission's current view that
8 investors rely on multiple ROE estimation models
9 and as a result the FERC proposed ROE methodology
10 that includes equal weighting of the DCF, CAPM,
11 Risk Premium and Expected Earnings.

12 Q. What is your response to her second argument?

13 A. Ms. Bulkley's characterization that other utility
14 regulatory bodies have recognized the
15 understatement of the DCF is misleading and shows
16 selection bias. In any case, the opinion of
17 another commission should have no bearing on a
18 New York State proceeding. Furthermore, Staff is
19 not compelled to abandon its approach, nor would
20 we recommend to the Commission to deviate from
21 its approved approach.

22 Q. Please respond to Ms. Bulkley's contention that
23 because her CAPM results are significantly higher
24 than the results of her DCF analyses, her DCF

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 results must be understated.

2 A. To begin with, we have already shown that her DCF
3 results are not understated. However, because
4 she has chosen to employ a methodology that
5 yields such an egregiously high market return in
6 her CAPM analysis, it is not surprising that her
7 DCF analysis yields a lower ROE determination.
8 However, such a finding would not be the case if
9 her CAPM analysis employed reasonable assumptions
10 as does ours. Under Staff's cost of equity
11 model, the 8.10% CAPM result is currently lower
12 than the 8.22% DCF result.

13 Q. Why should the CAPM be given less weight than the
14 DCF in the weighting of the ROE methodologies?

15 A. As recognized by the Commission in prior rate
16 proceedings, the CAPM presents a conceptual
17 framework that provides a reasonable estimate of
18 a firm's cost of equity, however, given some of
19 the perpetual weaknesses of the CAPM discussed
20 previously in our testimony, the Commission
21 should continue its weighting of 33% compared to
22 the DCF weighting of 67%.

23 Q. Has the Commission ever addressed the issue of
24 equal weighting of the DCF and CAPM?

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 A. Yes. The Commission has consistently used the
2 DCF as its primary methodology for determining
3 ROE by applying a 2/3 weighting in the
4 determination of the cost of equity. About a
5 decade ago, some company witnesses in Cases 13-W-
6 0539 & 13-W-0564 involving Suez Water
7 Westchester, formerly known as United Water
8 Westchester and New Rochelle, raised concerns
9 about the weighting accorded the DCF and argued
10 for equal weighting of the DCF and CAPM when the
11 market-to-book ratio exceeds one or when the DCF
12 was producing lower results than other
13 methodologies the witnesses were advocating. In
14 all the cases that we reviewed, the Commission
15 repeatedly affirmed its preference for the two-
16 thirds and one-third weighting of the DCF and
17 CAPM, respectively. For example, we noted that
18 the 2/3 DCF and 1/3 CAPM weighting was affirmed
19 in 2008 by the Commission's Order in Case 07-E-
20 0523 Consolidated Edison Company of New York,
21 Inc.- Electric Rates, and in 2007 by the
22 Commission's Order in Case 07-G-0141, National
23 Fuel Gas Supply Co. - Gas Rates. There, the
24 Commission stated, "[w]e also agree with Staff,

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 CPB, and Multiple Intervenors that the Company
2 (NFG) has not provided any compelling reasons to
3 provide equal weight to the DCF and the CAPM
4 methods... Accordingly, we will continue to use
5 the two-thirds DCF Method and one-third CAPM
6 method weighting in this case." Similarly, on
7 pages 14 and 15 of the Commission's Order in
8 Cases 06-E-1433 and 06-E-1547, Orange & Rockland
9 Utilities, Inc. - Electric Rates, the Commission
10 stated, "We will continue to accord two-thirds
11 weight to the DCF result and one-third to the
12 CAPM result as we have in past decisions." It is
13 worthy of note that the Commission affirmed the
14 proportionate weighting of the DCF and the CAPM
15 when the utility stock valuations and dividend
16 yields were similar to the current levels as
17 discussed earlier. Therefore, we believe that
18 Ms. Bulkley has not presented any new evidence
19 that would compel the Commission to reject its
20 long-standing policy of a two-third and one-third
21 weighting of the DCF and CAPM and as such Ms.
22 Bulkley's approach should be again rejected.

23

24

1 **Impact of Correcting the Flaws in Ms. Bulkley's ROE**

2 **Approach**

3 Q. What is the combined effect on Ms. Bulkley's
4 results if she had corrected the principal flaws
5 in her DCF approach including 1) the use of the
6 extended version of internal rate of return (XIRR)
7 instead of the Commission preferred IRR version,
8 2) eliminated the excessive growth rate of
9 Northwest Natural Gas Company, 3) properly relied
10 on only Value Line betas, 4) used Merrill Lynch
11 market returns, and 5) weighted her DCF results
12 at two-thirds and CAPM results at one-third?

13 A. The combined effect of correcting the flaws in
14 her DCF and CAPM approach including the
15 inappropriate use of the extended version of IRR,
16 rely on only the Value Line betas, and weight her
17 DCF and CAPM results at two-thirds and one third,
18 respectively is a reduction of 131 basis points
19 from 9.71% to approximately 8.40%. The summary
20 recalculation is shown in Exhibit___ (SFP-35).

21

22 **Regulatory Framework in New York**

23 Q. On page 90 of her direct testimony, Ms. Bulkley
24 stated that New York's regulatory framework has a

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 somewhat greater risk than the jurisdictions in
2 which her proxy group companies provide service.
3 Did Ms. Bulkley perform any qualitative analyses
4 of state regulatory jurisdictions to support this
5 assertion?

6 A. Ms. Bulkley performed three analyses as contained
7 in her Exhibit___ (AEB-9) and Exhibit___ (AEB-10)
8 to support her argument that the New York
9 regulatory environment is relatively riskier.
10 While Exhibit___ (AEB-9) relates to KEDNY/KEDLI
11 and Proxy Group Companies' Regulatory Research
12 Associates (RRA) Rankings, Exhibit___ (AEB-10)
13 relates to S&P's assessment of regulatory credit
14 supportiveness of the Companies and her proxy
15 group.

16 Q. What is your opinion of Ms. Bulkley's statement
17 that New York's regulatory framework has a
18 somewhat greater risk than the jurisdictions in
19 which her proxy group companies provide service?

20 A. Recent industry reports regarding the relative
21 business and regulatory risks of New York's
22 regulatory regime appear to find otherwise. For
23 example, in May 2017, Regulatory Research
24 Associates, a business unit of S&P, published the

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 results of its comprehensive audit of regulatory
2 rankings in a report entitled, "State Regulatory
3 Evaluations: Regulatory Climate for Energy
4 Utilities Including an Overview of RRA's ranking
5 process". Contrary to Ms. Bulkley's contention
6 of higher business risk in New York, RRA viewed
7 regulatory risk in the State as decreasing, as
8 evidenced by its upgrading of New York's ranking
9 from "Average/2" to "Average/1". This report is
10 attached as Exhibit___(SFP-36).
11 The table on page 3 of that report only ranks
12 nine, out of 53, national regulatory
13 jurisdictions with higher evaluations relative to
14 New York, which implies that RRA finds New York
15 to have a more-favorable-than average regulatory
16 environment.

17 Q. What aspects of New York's regulatory environment
18 has RRA highlighted in its assessment?

19 A. In regards to New York's authorized electric and
20 gas ROEs, RRA states that the Commission, "...in
21 rate cases decided in recent years, has
22 authorized electric and gas ROEs that are lower
23 than the nationwide industry averages, for the
24 most part, these decisions were based on multi-

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 year settlements that incorporated increasing
2 rate bases over the term of the plans, revenue
3 decoupling mechanisms and deferral accounting for
4 increases in such items as net plant, pension
5 expense, and labor costs. Additionally, other
6 factors in the rate-setting process, including
7 the incorporation of fully forecasted test
8 periods improve the utilities' opportunity to
9 earn the authorized ROE". This is shown as
10 Exhibit___(SFP-37).

11 Q. Have any of the major credit rating agencies
12 commented on New York's regulatory environment in
13 recent credit reports?

14 A. Yes. Moody's issued a credit opinion for
15 National Grid USA on July 20, 2017, which is
16 provided in Exhibit___(SFP-38). On page 3 of
17 that report, Moody's stated that "[w]hile our
18 view of regulation in the US has improved
19 generally, we regard New York as one of the most
20 creditor-friendly jurisdictions. Recent rate
21 case settlements have allowed rates to increase
22 and included de-risking provisions such as timely
23 cost recovery, forward-looking test years for
24 operating expenditure and revenue decoupling

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 (designed to provide stable fixed cost recovery).
2 Collectively, these provisions have provided more
3 transparency and will likely result in lower cash
4 flow volatility going forwards. In addition, a
5 number of utilities regulated by the [Commission]
6 are required to maintain a certain financial
7 profile either through explicit leverage
8 restrictions (KeySpan Gas East Corporation, known
9 as KEDLI, and Brooklyn Union Gas Company, known
10 as KEDNY) or are at least required to maintain an
11 investment-grade rating (KEDLI, KEDNY and Niagara
12 Mohawk Power Corporation, NiMo, A2 stable).
13 KEDLI, KEDNY and NiMo are also subject to a
14 'golden share' provision which limits the
15 potential for financial distress at the parent
16 negatively affecting individual subsidiaries."

17 Q. Does New York regulation incorporate other risk-
18 reducing elements in addition to those cited by
19 Moody's?

20 A. Yes, New York regulation incorporates many
21 important elements that have a direct impact upon
22 a utility's ability to achieve its authorized
23 return on equity. For instance, New York uses a
24 fully forecasted test year to determine revenue

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 requirement, which recognizes changes in revenues
2 and expenses expected through the end of the rate
3 year. The Commission also generally allows for a
4 high level of expense reconciliation for such
5 material cost items such as environmental
6 remediation costs and pension and OPEB expenses.
7 New York also uses purchase power adjustment
8 clauses that allow full and timely recovery of
9 this large and volatile cost element. Many other
10 jurisdictions do not incorporate these mechanisms
11 into their rate plans. For overall blanket-type
12 protection, New York State, unlike most other
13 states, allows utilities to request deferral
14 accounting for material items actually incurred
15 but not provided for in the base forecasts.

16 Q. Please discuss the impact of a fully forecasted
17 rate year upon a utility's risk profile.

18 A. During periods of rising operating and
19 maintenance costs, combined with the need for
20 significant capital additions, we believe that
21 New York State's methodology of a fully-
22 forecasted rate year provides utilities with a
23 much greater opportunity to earn their authorized
24 return than jurisdictions that establish rates

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 based on an adjusted or unadjusted historic test
2 year. In addition, New York State regulation
3 allows utilities to revise their rate filings
4 during the suspension period for known changes in
5 cost rates, changes in estimates, and for
6 wholesale revisions because of changed
7 circumstances beyond the company's control. This
8 significantly reduces risk and improves earnings.

9 Q. Do you believe that investors are aware of such
10 risk reducing elements of NYS utility regulation?

11 A. Yes. The NYS regulatory environment was
12 presented by Commission Chair in a message to RRA
13 clients, dated October 29, 2014. We note two
14 main points in the report. First, the
15 Commission's reliance on fully forecasted test
16 years provides NYS utilities with mechanisms
17 whereby expenses, capital additions, and returns
18 are forecast through the end of the year for
19 which rates are being set. Therefore, earnings
20 are not adversely affected by inflation, new
21 programs, and plant additions. Second, New York
22 utilities have a strong history of being able to
23 achieve healthy returns largely because of New
24 York's risk-reducing mechanisms such as fully

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 forecasted test years, revenue decoupling
2 mechanisms, deferrals and true-up mechanisms for
3 pension, other post-employment benefits, and
4 property taxes. This report is shown in
5 Exhibit___(SFP-39).

6 Q. How many of their existing true-up and deferral
7 mechanisms have the Companies requested be
8 continued in this proceeding?

9 A. The Companies have requested for continuation of
10 all of their existing true-up and deferral
11 mechanisms.

12 Q. Please comment on the Companies' requested
13 deferral mechanisms in this proceeding.

14 A. Even though not all the requested true-ups have
15 been blessed by Staff, we believe that some of
16 KEDLI/KEDNY's revenues and costs would be
17 reconciled and therefore there will be no
18 substantial risk for investors. Here are a few
19 examples. First, Staff Efficiency and
20 Sustainability Panel recommends an energy
21 efficiency (ETIP) reconciliation that aligns with
22 the Commission's direction in the March 2018
23 ETIP. Second, the Staff Consumer Services Panel
24 agrees with the companies' proposal to fully

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 reconcile credit card and debit card costs but
2 with some modifications. Third, Staff witness
3 for the New York Facilities System Surcharge
4 (NYFS) agrees with the Companies' proposal to
5 change the timing of their NYFS reconciliations.
6 Fourth, the Staff Gas Supply Panel agrees with
7 the Companies' proposal to use 100 percent of
8 options as a financial hedge against volatility
9 in gas cost because such change will provide an
10 added level of diversification for mitigating gas
11 cost volatility. If granted by the Commission,
12 the resulting risk reduction would reduce the
13 need for thicker common equity ratio and the
14 equity return requirements.

15 Q. Does Ms. Bulkley take these deferral mechanisms
16 into account in her ROE recommendation?

17 A. No. Ms. Bulkley did not take into account the
18 various deferral mechanisms in her ROE
19 recommendation.

20 Q. Does Ms. Bulkley's return on equity request
21 accurately reflect the Companies' deferral
22 requests?

23 A. No, Ms. Bulkley has not made an attempt to
24 compare the extensive suite of true-up and

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 deferral mechanisms being requested by the
2 Companies with such mechanisms in place for her
3 surrogate group. Absent such an analysis, it is
4 very likely that Ms. Bulkley has overestimated
5 the cost of equity for the Companies.

6 Q. Have the Companies proposed any Earnings
7 Adjustment Mechanisms (EAMs) as part of the REV
8 initiative?

9 A. Yes. The Companies propose three categories of
10 EAMs, totaling six separate metrics. The three
11 categories consist of: System Efficiency, Energy
12 Efficiency, and Carbon Reduction. KEDNY could
13 earn up to 78 basis points at maximum attainment
14 levels for calendar year (CY) 2020 and 63 basis
15 points for CYs 2021, 2022, and 2023. KEDLI could
16 earn up to 77 basis points for CY 2020, 62 basis
17 points in 2021, 63 basis points in 2022 and 64
18 basis points in 2023. Staff is recommending EAMs
19 relating to Peak Reduction and Incremental Energy
20 Efficiency worth about 25 basis points for the
21 rate year.

22 Q. If approved by the Commission, how might these
23 EAMs impact the Companies?

24 A. Successful implementation of these new

Cases 19-G-0309 & 19-G-0310 SFP CORRECTED

1 initiatives would likely enable the Companies to
2 enhance their earnings above and beyond their
3 authorized ROE.

4 Q. Does Ms. Bulkley take into account the
5 opportunities afforded by the EAMs in her ROE
6 recommendation?

7 A. No. Ms. Bulkley did not take into account the
8 additional potential new sources of earnings
9 resulting from the EAMs in her ROE
10 recommendation. Rather, she discussed only the
11 number of customer service quality and gas safety
12 performance metrics that could negatively impact
13 the revenue adjustments of the Companies. Ms.
14 Bulkley's failure to account for the EAMs
15 incremental earnings is inconsistent with the
16 Companies' presentation for a reasonable
17 opportunity to earn extra basis points above and
18 beyond the Companies requested 9.65% ROE. To be
19 conservative, however, our recommended cost of
20 equity and credit metrics analysis do not reflect
21 any of the potential incremental earnings
22 associated with the EAMs.

23
24

1 Conclusion

2 Q. What is your recommended cost of capital for the
3 Companies?

4 A. As summarized in Exhibit___(SFP-2) referenced
5 earlier, on a pre-tax basis, our recommended
6 overall pre-tax rate of return for KEDNY is 7.58%
7 and 7.54% for KEDLI based on a capital structure
8 with a 48% common equity ratio and an 8.20% cost
9 of equity. As we stated earlier, we dismiss Ms.
10 Bulkley's recommended cost of equity range of
11 9.65% to 10.75% as too high. Therefore, we
12 recommend that the Commission reject both Ms.
13 Bulkley's recommended cost of equity range and
14 the Companies' requested 9.65% cost of equity and
15 instead adopt our recommended 8.20% cost of
16 equity.

17 Q. Does this conclude your testimony at this time?

18 A. Yes, it does.

19

20

21

22

23

24

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. FORST: Your Honors, I now proffer
3 the Staff Finance Panel for cross examination.

4 A.L.J. COSTELLO: Mr. Maloney.

5 MR. MALONEY: Yes.

6 CROSS EXAMINATION

7 BY MR. MALONEY:

8 Q. Good morning, panel. My name is
9 Kenneth Maloney. I'll be asking you some questions
10 on behalf of the companies.

11 MR. MALONEY: Before I start, Your
12 Honors, in the -- in the interest of trying to do
13 this efficiently, I've handed to you and to the panel
14 and passed out to counsel around the room 15
15 documents that I'm going to refer to during my cross
16 examination. And if I could have each of those
17 marked for identification, I think it would speed
18 things along.

19 The first one is N.G.A. -- the
20 response to N.G.A.-58.

21 A.L.J. COSTELLO: Okay. That'll be
22 645.

23 MR. MALONEY: The second one is the
24 response to N.G.-60.

25 A.L.J. COSTELLO: That'll be 646.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: The third one is the
3 response to N.G.-62.

4 A.L.J. COSTELLO: That's Exhibit 647.

5 MR. MALONEY: The next document is the
6 response to N.G.-63.

7 A.L.J. COSTELLO: That will be 648.

8 MR. MALONEY: The next one is the
9 response to N.G.-64.

10 A.L.J. COSTELLO: 649.

11 MR. MALONEY: The next one is the
12 response to N.G.-65.

13 A.L.J. COSTELLO: 650.

14 MR. MALONEY: The next one is the
15 response to N.G.-67.

16 A.L.J. COSTELLO: 651.

17 MR. MALONEY: The next one is a
18 document dated June 7, 1993. It purports to be a
19 letter to the -- the commission enclosing two copies
20 of the Nine Energy Utilities comments in support of
21 the return on equity consensus document.

22 I -- I will say that this document was
23 taken from the commission's website and what's in
24 here is the return on equity consensus document, but
25 I'd ask that that be marked the next number.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. COSTELLO: It'll be 652.

3 MR. MALONEY: 52. The next one is a
4 document dated January 31, 2020, entitled regulatory
5 research, R.R.A. regulatory focus, major rate case
6 decisions January to December 2019.

7 A.L.J. COSTELLO: That will be 653.

8 MR. FORST: Your Honors, is counsel
9 preparing to prepare a foundation for these
10 documents?

11 A.L.J. COSTELLO: Yeah, we're just
12 marking them at this point and then I believe he's
13 going to use them during cross, so any -- we're not
14 admitting them into evidence at this point. So any
15 objections you want to make, you'll be able to make
16 as we proceed.

17 MR. MALONEY: The next document is a
18 document date -- under a cover sheet that says, value
19 line information for staff proxy group April 2019 to
20 June 2019.

21 A.L.J. COSTELLO: That is marked for
22 identification as 654.

23 MR. MALONEY: The next document is
24 certain excerpts from a -- a book by Dr. Roger Morin,
25 PhD, new regulatory finance.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 A.L.J. COSTELLO: 655.

3 MR. MALONEY: The next document is a
4 document from the commission's files that is exhibit
5 -- labeled Exhibit 5 witness R.A. Morin in the
6 Niagara Mohawk Power Corporation Gas Rate Case 08-G-
7 0609.

8 A.L.J. COSTELLO: That will be 656.

9 MR. MALONEY: The next document is a
10 Moody's Investor Service Report dated November 18,
11 2019 that says, threat to revoke National Grid's
12 Operating License is credit negative for utilities.

13 A.L.J. COSTELLO: That's 657.

14 MR. MALONEY: The next one is a credit
15 opinion from Moody's dated December 30th, 2019, the
16 Brooklyn Union Gas Company update following rating
17 confirmation with negative outlook.

18 A.L.J. COSTELLO: That's 658.

19 MR. MALONEY: And finally, the last
20 document is labeled KeySpan Gas East Corporation,
21 it's a Moody's document dated December 30th, 2019 and
22 saying update, following rating confirmation with
23 negative outlook.

24 A.L.J. COSTELLO: And that will be
25 marked as 659.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: 659. Thank you, Your
3 honor.

4 BY MR. MALONEY: (Cont'g.)

5 Q. Panel, so that I -- I don't
6 forget. Good morning. You've been handed copies of
7 responses that have been marked between Exhibits 645
8 through 651. Do these documents represent correct
9 and accurate copies of responses that were provided
10 by the Finance Panel to National Grid?

11 A. (Mr. Duah) Yes.

12 Q. And -- and to -- to the best of
13 your knowledge, is the information contained in them
14 true and correct?

15 A. Yes.

16 Q. Okay. Thank you. So panel, it's
17 correct, isn't it that the primary purpose of your
18 testimony is to recommend the fair rate of return to
19 be used to determine the revenue requirements in this
20 case.

21 A. As we stated on page 6 of our
22 testimony, the purpose of our testimony is to
23 recommend a fair rate of return to be used by the
24 staff accountant panel to determine the revenue
25 requirements. So the simple answer is yes.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Okay. And one component of that
3 rate of return is the rate of return on common
4 equity. Is that correct?

5 A. Yes.

6 Q. And the other major component of
7 the rate of return is the return on long-term debt.
8 Is that correct?

9 A. Yes.

10 Q. So in order to compute the
11 overall return, you need the proportions of debt and
12 equity and the cost rates applied to each of those
13 components. Is that correct?

14 A. Yes.

15 Q. Okay. And is -- is it also
16 correct that the cost of equity is greater than the
17 cost of debt?

18 A. Yes, I agree with you.

19 Q. And is it also correct that both
20 the companies and the panel are proposing to set
21 rates in this proceeding using a capital structure
22 consisting of 48% common equity?

23 A. That's correct.

24 Q. Nonetheless, is it correct that
25 if we wanted to increase the return dollars included

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 in the company's revenue requirement, we could do
3 that by either increasing the return on equity or
4 increasing the amount of equity in the capital
5 structure?

6 A. Can you repeat the question?

7 Q. Sure. Is it correct that if we
8 wanted to increase the return dollars included in the
9 company's revenue requirements, we could do that by
10 either increasing the return on equity or increasing
11 the amount of equity in the capital structure?

12 A. The panel believes that you can
13 increase the equity -- equity ratio, or you can
14 increase the debt. But the overall cost of capital
15 should say that it is at the lowest level.

16 In terms of revenue requirement, it
17 should be such that it should not lead to an
18 excessive revenue requirement. So that is my simple
19 answer. So you should have protocols that they would
20 impact.

21 Q. I'm sorry, I had trouble hearing
22 that.

23 A. You can either increase the
24 equity or you can increase the equity ratio, increase
25 the return on equity. But it must be in such a way

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 the overall rate of return should be at the lowest
3 level and affordable to ratepayers.

4 Q. Right. But -- but overall, all
5 I'm asking you is, if -- if you want to increase the
6 dollars you can do it by increasing the equity ratio
7 or you can do it by increasing the return applied to
8 that equity ratio. That's correct?

9 A. Correct.

10 Q. Okay. Yes. Okay. Now, from the
11 standpoint of what we mean by a fair rate of return
12 is such a return one that will enable the companies
13 to provide safe and adequate service to their
14 customers?

15 A. Can you repeat the question?

16 Q. Yeah. When we speak of a -- a
17 fair rate of return, will such a return enable the
18 companies to provide safe and adequate service to
19 their customers?

20 A. We respond to that on -- on page
21 12, line 24, is a fair rate of return for a regulator
22 utility is overall rate of return enables the company
23 to provide safe and adequate service to each customer
24 while at the same time assuring that the utility
25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 continues support in the aftermarket for both its
3 long-term debt and equity.

4 A.L.J. LEARY: So I need to ask the
5 witness to speak really slowly so the record can pick
6 up more precisely what your testimony is and the same
7 for you Mr. Maloney, just be a little aware of how
8 quickly you're speaking for purposes of making sure
9 the record is clear. Thank you.

10 BY MR. MALONEY: (Cont'g.)

11 Q. And you were referring to your
12 testimony -- I'm sorry, on 12 and 13 of the corrected
13 testimony. Is that correct?

14 A. I'm referring to page 12, line 24
15 to page 13, line 1 up to 5.

16 Q. Yes. Thank you. Is it also
17 correct that a fair return on equity amounts should
18 be consistent with returns on investments having
19 corresponding risks?

20 A. We respond to that on page 14, if
21 you go to line 3, a fair rate of return allowed the
22 utility to recover its incurred costs of long-term
23 debt while providing its common equity with a great
24 opportunity to earn a return that is comparable to

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 the return available for -- with investment of
3 similar risk.

4 Q. Okay. And when we use the term
5 risk, is it fair to say that another word for the
6 term risk is uncertainty such that the greater
7 uncertainty about the ability of shareholders to
8 realize their returns, the greater the risk?

9 A. Can you repeat the question?

10 Q. What -- when we use to -- the
11 term risk, is it fair to say that another term for --
12 another word for the term risk is uncertainty such
13 that the greater uncertainty faced by shareholders in
14 attempting to earn the rate of return, the greater
15 the risk?

16 A. I would say the panel believes
17 the uncertainty is one of risk, but that isn't the
18 total risk because if you want to look at total risk
19 you look at the financial risk and also look at
20 business risk of the company. So it's one of them.

21 Q. I -- I understand that there are
22 business risks and there are financial risks. What
23 I'm asking you to -- whether you agree or not is do
24 you agree that that means essentially uncertainty?
25 There's uncertainty surrounding the company's future

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 business prospects. There's uncertainty surrounding
3 its finances.

4 A. Yeah, the panel would believe
5 that that is the case.

6 Q. Thank you. Now, you're proposing
7 a return on equity for the companies of 8.2%, is that
8 correct?

9 A. (Mr. Bullock) Correct.

10 Q. I think you need to turn your mic
11 on.

12 A. Correct.

13 Q. Okay. And would you agree that
14 if the commission adopts your recommendation the 8.2%
15 would represent the lowest return on equity adopted
16 by the commission in the last 30 years?

17 A. (Mr. Duah) Can you repeat the
18 question?

19 Q. Yeah. Would you agree that if
20 the commission adopts your recommended 8.2% return on
21 equity that would represent the lowest return on
22 equity adopted by the commission in the last 30
23 years?

24 A. I would say yes, but we need to
25 also to understand that over the last 30 years, we

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 had the lowest interest rate environment. Well, if
3 you look at the use on corporate bonds, property
4 equity bonds, we are the lowest at this point.

5 In fact, the triple B is a yield in
6 3.5% was the lowest so far we have ever seen.

7 Q. Is it correct that you used a
8 proxy group of 28 holding companies that own various
9 combinations of either electric and gas utilities or
10 electric only and gas only utilities to establish the
11 rate of return in this -- in this case?

12 A. (Mr. Bullock) Correct.

13 Q. Are you aware of whether any of
14 the regulated electric or gas utilities that are
15 owned by the members of the Staff Proxy group have
16 authorized returns on equity of less than 8.9%?

17 A. (Mr. Duah) Can you repeat the
18 question?

19 Q. Yeah. Are you aware of whether
20 any of the regulated electric combination, electric
21 and gas or gas utilities owned by the members of the
22 Staff proxy group have authorized returns on equity
23 from their public service commissions or regulators
24 that are less than 8.9%?

25 A. Can you repeat the question?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Are you aware of whether any of
3 the regulated electric or combination electric and
4 gas or gas only utilities owned by the members of the
5 Staff proxy group have augh -- authorized return on
6 equity of less than 8.9%?

7 A. We are not aware. What we are
8 aware is that each jurisdiction has their own
9 approach in establishing return on common equities.

10 Q. So would it be correct to say
11 that in setting your return on equity, you did not
12 inquire or consider information as to what the
13 authorized returns on equity were for the regulated
14 companies that were owned by your proxy group?
15 Please don't ask me to repeat that question.

16 A. I'm sorry. Can you rephrase the
17 question?

18 Q. I -- I could try. Is it correct
19 that you were not aware and did not make inquiry
20 about what the authorized returns on equity were for
21 the regulated electric, combination gas and electric
22 or gas only distribution companies that were owned by
23 the members of your proxy group?

24 A. I will say we -- we are aware
25 that the allowed return equity for the companies in

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 our proxy were generally higher than what we're
3 recommending. But as I said earlier, the methodology
4 of setting those allow return on a common equity,
5 that methodology is a different from each
6 jurisdiction.

7 And as we said in our testimony at in
8 page 64 investors are aware of what the commission's
9 approach is when it comes to a return on common
10 equity determination.

11 Q. So -- so your answer then is
12 generally you are aware that the returns for the
13 regulated companies are higher than what you're
14 recommending here?

15 A. Correct.

16 Q. Okay. Now, the equity returns
17 that we're seeking to determine in these proceedings
18 are for two local gas distribution companies. Is
19 that correct?

20 A. Yes.

21 Q. It's correct that we're not
22 seeking to establish the return on equity for
23 National Grid P.L.C., the companies ultimate parent
24 company or any other affiliate company in the
25 National Grid corporate structure. Is that correct?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. Yes.

3 Q. Could you refer to your testimony
4 on -- beginning on page 53 at line 22. You have that
5 reference?

6 A. Yes.

7 Q. Okay. And is it correct that you
8 say, even though the companies are local distribution
9 companies, their ultimate parent is largely
10 considered to be an electric utility by investors?

11 Accordingly, we believe that the most
12 suitable proxy group would be derived from a universe
13 of 37 holding companies deemed by Value Line to be
14 electric utilities. Is that a correct reading of
15 your testimony?

16 A. Yes.

17 Q. Now, when you use the word
18 believe to describe your conclusion that electric
19 utilities are the most suitable proxy group, was the
20 panel's decision to use a group of utilities deemed
21 by Value Line to be electric utilities, the product
22 of some preconceived notion you had or that that was
23 the most suitable option?

24

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Or did you do some analysis of various
3 possibilities and then decide to use the group of
4 electric utilities?

5 A. Can you repeat the question?

6 Q. In your testimony, you used the
7 word believe and I don't want to mischaracterize your
8 testimony. We believe the most suitable proxy group
9 would be divided from a universe of 37 holding
10 companies deemed by Value Line to be electric
11 utilities.

12 And what I'm asking you is when you
13 use the word believe, did you simply have a
14 preconceived notion that this was appropriate, or did
15 you do some analysis of various possibilities and
16 then decide that electric utilities were the most
17 suitable proxy group?

18 A. We believe the electric proxy
19 group is the most suitable for the proxy group
20 because we look at the parent company, National Grid
21 P.L.C., and then determine that investors, first of
22 all, do not invest in KEDLY and KEDNI, they do invest
23 in the parent -- ultimate parent company.

24 And the parent company is viewed as
25 electric by investors and also if the parent company

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 were to be covered by Value Line, Value Line will
3 have classified as electric.

4 Q. Now, I thought you told me before
5 that we were setting the return on equity for gas
6 distribution companies, not for National Grid P.L.C.,
7 are you -- or an electric utility. Are you changing
8 your testimony now?

9 A. No.

10 Q. Is it your testimony that if --
11 strike that. Are you aware that KEDNI, the Brooklyn
12 Union Gas Company, was once a standalone gas
13 distribution company?

14 A. Yes.

15 Q. Okay. Is it your testimony that
16 as a standalone distribution company, its cost of
17 equity would be different -- if that were the case
18 today, its cost of equity would be different than it
19 would be because it's owned by National Grid?

20 MR. FORST: Objection. I think that
21 calls for speculation. They're not currently
22 independent or they're not their own gas distribution
23 utility. They are owned by National Grid P.L.L.C.

24 BY MR. MALONEY: (Cont'g.)

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. And I'm asking you the panel as
3 experts as to whether as a standalone gas
4 distribution company they would have a different cost
5 of equity, they would be if they weren't owned by
6 National Grid. The panel is experts in finance.
7 This is -- seems to be a pretty basic question.

8 A.L.J. LEARY: As long as the record
9 is clear that this is a question posed to the expert
10 panel that is not sourced in factual information in
11 this case, the panel can answer. But I want to make
12 sure that we don't cloud the record with a lot of
13 examples or speculation about what KEDLY or KEDNI are
14 not.

15 So I'm just going to caution, but I'm
16 going to let the panel answer.

17 THE WITNESS: (Mr. Duah) The panel
18 believes that the circumstance - the circumstances
19 would be different because in the first instance that
20 you mentioned, equity investor will have -- will
21 invest directly if KEDLI were to be on a standalone
22 entity in the stock market.

23 BY MR. MALONEY: (Cont'g.)

24 Q. So in effect, what you're saying
25 is you're concerned about the return that an equity

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 investor and National Grid P.L.C. will earn what
3 they're expecting, not what the cost of equity is for
4 the gas distribution properties within National Grid?

5 A. Can you rephrase the question?

6 Q. Okay. I -- I believe you just
7 said that investors could only invest in National
8 Grid and, therefore, you're concerned about what
9 those investors could earn in National Grid.

10 Correct of what we're trying to
11 measure is the cost of equity of the gas distribution
12 assets and properties owned by National Grid in
13 downstate New York. Not National Grid as a whole
14 which would be a different answer I would think. Yes
15 or no?

16 A. (Mr. Duah) The -- the panel
17 believes that in order to determine or recommend the
18 return on common equity for the two companies KEDLI
19 and KEDNY, the appropriate proxy group should base on
20 the electric proxy group because investors do not
21 invest directly into the company KEDLI and KEDNY,
22 they're under a parent company.

23 And we also say on page 54 of our
24 testimony that this approach is also consistent of

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 what staff did in the Niagara Mohawk case which is a
3 sister company.

4 Q. Okay. Its correct isn't it that
5 Value Line is a source of a significant valid data in
6 your -- in -- in your forecast analysis?

7 MR. GOODRICH: Objection, please
8 define significant.

9 BY MR. MALONEY: (Cont'g.)

10 Q. Does the panel use Value Line
11 information in -- did the panel use Value Line
12 information in determining the cost of equity for the
13 companies of this proceeding?

14 A. Yes, we did use.

15 Q. Are you aware the Value Line
16 considers natural gas utilities and electric
17 utilities to be separate types of entities for
18 investment purposes?

19 A. I'm not sure if you are referring
20 to National Grid -- National Grid P.L.C. or you're
21 referring to which one -- are you refer -- the
22 ultimate parent?

23 Q. I'm referring to the categories
24 natural gas utilities and electric utilities. Are
25 those separate categories within Value Line?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. Value Line categorization for
3 utilities that electric consist of companies that are
4 -- combination electric and gas and also companies
5 that are also electric. And then for the gas is a
6 separate categorization.

7 Q. Could you turn to the document
8 that's been marked for identification as -- I'd great
9 if I can read my on handwriting, 652?

10 A. Okay. Got it.

11 Q. Is it correct that this --

12 A.L.J. LEARY: Excuse me, you need to
13 lay a foundation about whether this panel has ever
14 seen this document.

15 BY MR. MALONEY: (Cont'g.)

16 Q. Has the panel ever seen this
17 document?

18 A. I'm generally familiar with it --
19 familiar.

20 Q. You are familiar with it?

21 A. Yeah.

22 Q. Yes, thank you. And -- and in
23 fact, in this case you performed a back cast of
24 certain data that was contained in this document,
25 isn't it -- in examining the relationship between

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 X.I.R.R. and I.R.R functions in excel spread sheet.
3 Is that correct?

4 MR. FORST: Objection, Your Honor. I
5 don't think that the counsel has laid a proper
6 foundation for this document, while they've
7 considered or ask the panel whether they're familiar
8 with this document. I don't believe that they've
9 certified that this is a true and accurate copy of
10 the documents that's been provided.

11 A.L.J. LEARY: I'm also not hearing a
12 reference to anything in their testimony indicating
13 that they actually use this, but do you have a
14 reference that says that they used it for -- I think
15 you've said X.I.R.R. and --

16 MR. MALONEY: Well, that's what I just
17 asked was did -- did you, in fact, perform an
18 analysis?

19 A.L.J. LEARY: No, you did not ask
20 that. What you asked was slightly different and you
21 can ask that question, but you asked them -- you jump
22 over that question so you -- you assumed in your
23 question that they had used this.

24 So what I'm asking consistent with --
25 I think the objection here is for you to lay the

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 foundation that they actually used it. Generally
3 familiar is one thing, use of this document in the
4 preparation of their testimony is another. So let's
5 go there first before you get into this document.

6 BY MR. MALONEY: (Cont'g.)

7 Q. Did you -- did you use
8 information that was part of the equity consensus
9 document in your testimony -- in preparing your
10 testimony?

11 A. Yes, if you go to page 99 of our
12 testimony --

13 A.L.J. LEARY: Would you repeat the
14 page again?

15 THE WITNESS: Page 99 nine, nine.

16 A.L.J. LEARY: Thanks.

17 THE WITNESS: The question was, panel
18 what is your opinion about whether the general
19 finance case either they relied on the I --- I.R.R.
20 which is internal rate of return or X.I.R.R. formula.

21 BY MR. MALONEY: (Cont'g.)

22 Q. And -- and you refer there to the
23 fact that you reviewed and recast the D.C.F. results
24 for both the 34 member electric and 11 member gas
25 proxy groups. Is that correct?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. Yes, that is line -- line 11 on
3 page 99 of our testimony.

4 Q. Now, if I could refer you to the
5 document on page 5. There's a discussion of those
6 proxy groups. Is that correct?

7 MR. GOODRICH: Still -- still
8 objection though because counsel still has not
9 adduced whether or not this is a true and accurate
10 copy and -- and given of -- of the document it
11 purports to be and given that he has provided this to
12 -- to the panel today and the panel doesn't know
13 where the document came from, I don't see how the --
14 the panel could adduce without reading every word and
15 comparing it to their own copy somewhere that it is a
16 true and accurate copy.

17 MR. MALONEY: This -- this is a public
18 document from the commission website that we obtain.

19 A.L.J. LEARY: I -- I agree. I mean
20 this is in case 91-M-0509. I think the testimony,
21 Mr. Goodrich, is that they're generally familiar when
22 ask whether they used it, they referred to the
23 discussion on page 99 of their testimony.

24

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 So is your point that they -- in -- in
3 response to this question I'm not exactly sure what
4 your point is.

5 MR. GOODRICH: Counsel is seeking to
6 have a particular copy of this document entered as an
7 exhibit and counsel hasn't demonstrated that this
8 particular copy is true and accurate.

9 A.L.J. LEARY: It's a publicly
10 available document on the department's website. Now
11 I would say we -- we said at the beginning of the
12 hearing that we would make things like this subject
13 to check.

14 I -- I don't think that the company
15 has offered a document that would be in any way
16 incomplete. Is that right, Mr. Maloney?

17 MR. MALONEY: That's correct. This is
18 the document we were able to obtain with -- the
19 company would be willing to stipulate that whatever
20 the correct -- if this is not the correct version of
21 this document, the commission's records, whatever
22 that document is we would -- we would stipulate to
23 allow you at the record.

24

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: Well, that doesn't help
3 me. What will help me is where you got this document
4 and when you got it?

5 MR. MALONEY: We -- we -- we took it
6 from the commission's website as I understand it.

7 A.L.J. LEARY: As you understand it?

8 MR. MALONEY: Yeah.

9 A.L.J. LEARY: All right. So let's --
10 we're not going to -- I think you're objection is
11 about admission of this document if that is the
12 proper interpretation of your objection and what I
13 would say is that we can save those objections when
14 we deal with all of the hearing exhibits.

15 Generally familiar and this panel's
16 testimony so far appears that they can at least
17 testify about this document whether it's going to be
18 actually admitted in the record is a separate issue.
19 So why don't we punt on that today and revisit it,
20 and let's allow Mr. Maloney and the panel to move
21 forward with the testimony.

22 BY MR. MALONEY: (Cont'g.)

23 Q. Panel, I'm referring you to page
24 5 through 7 of this document, and if you'd take a
25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 moment to review that. And let me know when you have
3 completed that review.

4 A.L.J. LEARY: I just want to identify
5 for the record this has been pre-marked as hearing
6 Exhibit 652. It's subject to later admission and
7 it's dated June 7th, 1993 in case 91-M-0509. It is
8 captioned a return on equity consensus document in a
9 proceeding on motion of the commission to consider
10 financial regulatory policies for New York State
11 Utilities.

12 THE WITNESS: Okay.

13 BY MR. MALONEY: (Cont'g.)

14 Q. As -- as a general matter, you're
15 familiar with what's known as the generic financing
16 case?

17 A. Generally, we are familiar, but
18 not into detail because we are not part of the
19 proceedings.

20 Q. But you believe that the
21 methodology that you followed in this case follows
22 what's known as the generic financing method. Is
23 that --

24 A. Yeah, it has -- it's rooted in
25 the -- the general finance case, yes.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Would you agree that the section
3 that I just ask you to read reflects agreement among
4 the -- the parties who signed this document that
5 natural gas company -- that the proxy group used to
6 determine the cost of equity for natural gas
7 companies would be to -- determined using a -- a -- a
8 group of comparable gas companies?

9 A. Can you point me to the specific
10 paragraph you're reading through?

11 Q. Sure. I'm looking at the first
12 paragraph beginning on -- on 5 and carrying over to
13 6. The D.C.F. and CAP-F -- CAP-M calculations will
14 be performed on proxy groups of electric and gas
15 companies.

16 The electric company proxy group will
17 be used to determine the cost of equity for the 7
18 electric and gas combination utilities. The gas
19 proxy group will be used for the two gas only
20 utilities.

21 A. And the question -- the question
22 again?

23 Q. Would you agree that this
24 reflects agreement that a gas proxy group would be

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 used to determine the cost of equity for gas
3 distribution companies?

4 A. This is what it says.

5 Q. Okay. And if -- if -- is it also
6 correct that there's no suggestion in the pages that
7 I asked you to read that a group of electric or
8 combination gas and electric utilities should be used
9 to establish the R.O.E. for the two gas distribution
10 companies in New York at that time?

11 A. Can you point me to the exact
12 term or the specific paragraph you're reading from?

13 Q. I think you'd have to read the
14 whole thing but I guess I -- I would refer to page 7
15 and it says, if at any time -- if at the time of any
16 calculation of return on equity there will be applied
17 to a gas utility, fewer than 10 companies meet all 3
18 criteria, i.e., percentage of revenues derived from
19 gas operations will be relaxed to pick up one or more
20 companies that have 96% or less of their total annual
21 revenues derived from gas utility operations.

22 So as to bring the number of proxy
23 group companies up to 10. If it's a result of doing
24 this the simple average percentage of revenues from
25 gas utility operation of the entire proxy group drops

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 below 95, the parties will meet to discuss whether it
3 is appropriate to make further adjustment to the
4 proxy group selection criteria or if it is determined
5 that an acceptable proxy group have at least 10 pure
6 play gas utilities cannot be constituted whether the
7 cost of equity result should be adjusted to account
8 for the impact on the cost of equity of investment to
9 the unregulated activities, and if so how much -- how
10 such an adjustment would be made.

11 There is no suggestion in there that
12 gas and electric company -- electric companies would
13 be substituted for the gas companies, is there?

14 A. We -- as stated in the testimony
15 on page 80, we will have included the gas companies,
16 but in our proxy group, but we had really few
17 companies that meet the selection criteria. We will
18 have used their gas companies, but only five of them
19 that meet staff criteria and then we believe it's an
20 insufficient size to produce any reasonable results.

21 Q. But going back to my question,
22 it's fair to say that at least at the time this
23 document was executed, it appears that gas companies
24 were intended to be used to establish the -- a proxy
25 group of gas companies was intended to be used to

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 establish the cost of equity for gas distribution
3 companies. Is that correct?

4 A. Yeah, that is correct. But in
5 our case you don't have enough gas companies to run
6 the analysis to produce a reasonable result.

7 Q. Now, I think we established
8 before that you used a -- a group of 28 electric or
9 combination gas and electric utilities to -- as a
10 proxy group to derive your recommendation of the
11 appropriate return on equity for companies. Is that
12 correct?

13 A. Correct.

14 Q. And if you could look at the
15 response to N.G.-67 which has been marked for
16 identification as Exhibit 651. N.G.-67, 651 is the
17 exhibit number.

18 A. Ready.

19 Q. Is it correct that 12 of the 28
20 proxy group companies have no gas operations?

21 A. Yes, 12 companies we agree with
22 you, but our proxy group has companies that have more
23 vertical integrate companies and those companies have
24 more risk or they're riskier than the gas companies.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 So our proxy group you always see on
3 that basis is riskier than the pure gas companies.

4 Q. Is it also correct that none of
5 the companies in your proxy group derive a majority
6 of their revenue from gas operations?

7 A. There is -- is about 50 -- 58% of
8 its revenue comes in from gas operation.

9 Q. So there is one -- one --

10 A. Yes, yes one over here and again,
11 our proxy group of 28 companies, there are more
12 vertically integrated companies in that proxy group
13 and those vertical integrate company have more risk
14 than gas operation. So our proxy group is more
15 riskier than pure -- pure gas companies.

16 Q. But just so I'm reading this
17 document correct. The -- the average of gas revenue,
18 the 13% which reflected on page 2 of this document,
19 that represents the average of all 28 companies?

20 A. Yes.

21 Q. Thank you. Let me ask you about
22 the -- of your opinion about the future prospects for
23 gas and electric companies. I -- I think we have
24 heard testimony, we can all agree that the recent
25 governmental responses to climate change is something

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 that's relatively new and that there is uncertainty
3 surrounding the ultimate steps that might be taken to
4 address climate change. Is that -- is that correct?

5 MR. FORST: Objection. Could counsel
6 point to the specific testimony that we've heard that
7 he is referring to?

8 A.L.J. LEARY: Is there such a
9 testimony Mr. Maloney, or are you asking more of a
10 general question?

11 MR. MALONEY: I'm asking more of a
12 general question.

13 A.L.J. LEARY: And I think that's
14 acceptable to the extent that the finance panel can
15 respond about climate change, which is not a subject
16 of their testimony as I read it.

17 Let's -- let's give Mr. Maloney some
18 latitude on this. The panel can answer.

19 THE WITNESS: Can you repeat the
20 question?

21 BY MR. MALONEY: (Cont'g.)

22 Q. Well, let -- let me -- I'll ask
23 it this way. Would the panel agree that the
24 potential for the electrification of transportation
25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 holds the potential for significant growth in the
3 electric utility industry today?

4 A. We respond to that in I.R.
5 response N.G.-59, so I'll point you to that.

6 A.L.J. LEARY: This is not among your
7 exhibits, I don't think.

8 MR. MALONEY: No, it's not.

9 THE WITNESS: Is a -- is a part --

10 MR. MALONEY: I mean, I'm looking to
11 hear the answer, but no, it's not --

12 THE WITNESS: Yeah.

13 MR. MALONEY: -- among the exhibits.

14 THE WITNESS: For the question in the
15 I.R. was that the Staff Finance Panel have an opinion
16 as to whether climate change such as that passed
17 recently in New York is likely to require gas utility
18 such as KEDLY and KEDNY to undergo business
19 transformation in foreseeable future.

20 If not, please explain why not. If
21 so, explain whether the Staff Finance Panel believe
22 such information will create additional risk for gas
23 utilities that is not captured in proxy group that
24 are used by the panel to determine the recommended
25 R.O.E. in these proceedings.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 And our response was, we believe that
3 the New York State Climate Leadership and Community
4 Protection Act and thereby the Climate Action Council
5 will discuss various topics and engage in various
6 opportunities and challenges, which may or may not
7 impact electric and gas utilities. And which may or
8 may not require certain business transformation.

9 So we believe that is, is pretty much
10 here to suggest that it may have an impact.

11 BY MR. MALONEY: (Cont'g.)

12 Q. I think that that is the answer
13 that you gave to that discovery response. But the --
14 the question I asked was, whether the electrification
15 of the transportation of -- the electrification of
16 transportation holds the potential for significant
17 growth for the electric industry. Do you believe
18 that's true or not?

19 A. I think it's -- it's too early
20 for me to or for the panel to speculate on that
21 because there are many things as we just mentioned,
22 of may or may not.

23 Q. And would your answer be the same
24 as -- as it applies to the electrification of heat?

25 A. Yes.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. So it's fair to say that -- well,
3 let me ask you. In -- in preparing your -- in your
4 discounted cash flow analysis that's used to, in part
5 to establish your recommended cost of equity, it's
6 correct that you consider dividend growth over a
7 period of perpetuity or at least the next 100 years
8 and feel free to tell me what the data is that you
9 actually use.

10 A. Actually the projection for the
11 dividend group, it go up to 200 years.

12 Q. 200 years.

13 A. Yes.

14 Q. So it's fair to say that in -- in
15 making that projection you -- you haven't given any
16 thought to whether the electric industry might be
17 subject to significant growth during that period as a
18 result of -- of responses to climate change such as
19 increased electrification of heat or increased
20 electrification of transportation?

21 MR. FORST: Objection. I think that
22 the panel already stated that they've considered it,
23 but they find that the results to be too speculative.
24 I think this has been asked and answered.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: Slightly different
3 question, but let's hear from the panel.

4 THE WITNESS: Can you repeat the
5 question?

6 BY MR. MALONEY: (Cont'g.)

7 Q. I don't know if I can.

8 A.L.J. LEARY: It was, did the panel
9 consider growth over -- growth of the gas industry
10 over 200 years?

11 MR. MALONEY: The -- the growth of the
12 electric industry --

13 A.L.J. LEARY: Electric industry.

14 MR. MALONEY: -- as a result of the
15 electrification of heat.

16 BY MR. MALONEY: (Cont'g.)

17 Q. Is it -- is it fair to say that
18 you didn't take that into account, the potential for
19 growth of electrification of heat and of
20 transportation in contemplating the growth of the
21 industry over the next 200 years?

22 A. And I'll point you -- the panel
23 would point you to page 103, line 8 to line 11 of our
24 testimony. There is -- we said that the D.C.F. model
25 processes as its top prices reflect collective

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 judgment of all stock market participants and,
3 therefore, all known factors influence in the stock.
4 So we believe that is what investors may consider
5 that.

6 Q. So basically whatever is built
7 into the stock price today that reflects the -- I
8 mean, the judgment of investor is reflected in the
9 stock price today. Is that -- that's your testimony?

10 A. Yes, that's what we're saying on
11 page 108 of our testimony.

12 Q. And -- but let me ask you just in
13 terms of the natural gas business does the panel have
14 a opinion as to whether the prospects for growth of
15 the natural gas business are as great as the
16 prospects for growth of the electric industry?

17 MR. GOODRICH: I would say, objection,
18 vague. I mean, the prospects for growth over what
19 time period, 100 years --

20 MR. MALONEY: I think we've been
21 establishing 200 years is the -- the basis of what
22 we've used.

23 A.L.J. LEARY: Panel can answer.

24 THE WITNESS: Okay. As we said
25 earlier, investors do consider all available

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 information and price on a stock. So as long as
3 these things out there we believe stock prices
4 reflect such issue that you're talking about.

5 BY MR. MALONEY: (Cont'g)

6 Q. I'd like you to refer now to your
7 response to N.G.-62, which has been marked for
8 identification as Exhibit 647.

9 A.L.J. COSTELLO: Did you say 6 --

10 MR. MALONEY: 47 I believe, yes.

11 BY MR. MALONEY: (Cont'g.)

12 Q. Do you have that before you?

13 A. (Duah) Yes, I'm ready.

14 Q. Now, in attachment 2 to that, is
15 it correct that you utilized R.R.A. Regulatory Focus
16 major rate case decisions January to December 2018,
17 to support a conclusion that in the last 2 years of
18 the average returns on equity for gas and electric
19 utilities are virtually identical, indicating an
20 overall convergence of risk?

21 MR. FORST: Can counsel point to a
22 specific place in the attachment they're referring
23 to?

24 MR. MALONEY: I'm -- I'm pointing to
25 the response to the discovery request N.G.62 in the

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 second paragraph. I believe, it's maybe 4 sentences
3 down and then I'm also referring to attachment 2,
4 which is the paper that we're discussing.

5 MR. FORST: Thank you.

6 THE WITNESS: Yes, I believe there's a
7 convergence.

8 BY MR. MALONEY: (Cont'g.)

9 Q. Okay. And was that testimony or
10 was that response, that portion of your response
11 based on consideration of the -- and I'm referring to
12 Attachment 2 now and on the right-hand side of that
13 there is a list of various returns under various
14 circumstances.

15 And I think it's fair to say if you
16 look at that, you'll find that for electric it says
17 fully litigated cases 2018, 9.61 for gas fully
18 litigated cases, 9.59, is that correct?

19 A. It is what the document says.

20 Q. That's what you were -- that's
21 what you were relying on? And you -- and you consider
22 this to be an authoritative source for this
23 information?

24

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. FORST: Objection. There's two
3 questions there and I'd ask that the panel be allowed
4 to answer them individually.

5 MR. MALONEY: I apologize. That's
6 correct.

7 BY MR. MALONEY: (Cont'g.)

8 Q. So I think my first question was
9 that is what you relied upon, is that correct?

10 A. Yes, we relied on page 7 of 16 of
11 Attachment 2. What is the last line where it says
12 9.59 for electric or the average R.O.E., and then on
13 the other 9.59 which is for gas utilities, the
14 average.

15 Q. I'm sorry, were you looking at
16 page 7?

17 A. Yeah, Page 7 of --

18 Q. Okay.

19 A. -- Attachment 2.

20 Q. Okay. Okay. Now, if I could
21 refer you to page 3 of this document. There's a 3
22 paragraph summary that begins, capital structure
23 trends, is that correct?

24 A. Yes.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. And it suggests that for 2018,
3 the ac -- the average authorized equity ratio -- I'm
4 reading from the second paragraph, for electric
5 utilities was 50.53 during 2000 -- for cases decided
6 during 2018. And for gas utilities, it was 51.47, is
7 that correct?

8 A. Yes, that's what it says over
9 here.

10 Q. So would the combination of an
11 equivalent return on equity, and a higher equity
12 ratio for gas utilities, read you -- lead you to
13 believe that the decisions indicate that gas
14 utilities are somewhat riskier than electric
15 utilities?

16 A. Can you repeat the question?

17 Q. Would you agree that the
18 combination of equivalent rates of return on equity,
19 but is somewhat greater equity ratio for the natural
20 gas utilities indicates that the natural gas
21 utilities were viewed as somewhat riskier during 2018
22 in terms of the authorized returns that were set?

23 A. I believe so and you also said in
24 --.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Sir, I couldn't understand the
3 first thing you said.

4 A. I believe so.

5 Q. Thank you.

6 A. And you also said in response to
7 N.G.62 where we measure the electric and gas
8 utilities risk issues. In the last -- on page 2, we
9 say in the past couple of years, staff has observed
10 investors sharpen their focus on the overall impact
11 of decarbonization as to wind industry. So it would
12 be surprising if this convergence in perceived risk
13 was attributable to the diminishment of a key
14 advantage that a gas utilities has had for some time
15 relative to its electric counterpart. So in the
16 past, the gas was less riskier, than gas use on
17 safety going on.

18 Q. Now, you attach to this response
19 the R.R.A. Regulatory Focus, do you have access to
20 that database or their publications?

21 A. (Qadir) Yes.

22 Q. And so you review them from time
23 to time?

24 A. Yes.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. And you consider the data that
3 they provide reliable?

4 A. (Duah) The panel has no reason to
5 doubt the accuracy or the reliability of that -- of
6 the data from R.R.A.

7 Q. I'd like -- I'd like to refer now
8 to Exhibit 653 which is an updated version of the
9 same information that you provided in Exhibit N.G.62.

10 A.L.J. LEARY: Let's -- let the panel
11 characterize the document, recognize it first, rather
12 than you Mr. Maloney just for the record, so Hearing
13 Exhibit 653.

14 MR. MALONEY: 653. Yes, Your Honor.
15 Thank you.

16 THE WITNESS: Ready.

17 MR. MALONEY: Your Honor had asked the
18 panel, they say they're ready.

19 A.L.J. LEARY: Well, I -- I want you
20 to lay the foundation of asking the panel members if
21 they've seen this document and so forth.

22 BY MR. MALONEY: (Cont'g.)

23 Q. Well, have you seen this document
24 before?

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: Or are they familiar
3 with it and so forth.

4 THE WITNESS: Yes, the panel is
5 familiar of it.

6 BY MR. MALONEY: (Cont'g.)

7 Q. Okay. Is it -- is it correct to
8 say that for 2019 and I'm looking at page 1 of the
9 document. That for fully litigated cases, the gas
10 average return on equity was 9.74 percent, whereas
11 for fully litigated cases on the electric side, the
12 return on equity was 9.58 percent.

13 A. Yeah, this is what it says and
14 the panel --.

15 Q. And -- and -- and would you agree
16 that in terms of comparing authorized returns fully
17 litigated cases is the one to look at as opposed to
18 settled cases, which can reflect various agreements
19 among parties?

20 A. Yes, we look at the litigated
21 case, but as we said earlier, each state regulatory
22 jurisdiction, each of them has their own approach in
23 setting the return on common equity and investors are
24 aware of the commission's approach in setting the
25 return on common equity. In fact, Bank of America

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 equity analysts and Moody's says that they are even
3 expecting 8.8 in equity in this case which isn't a
4 surprise to them, something the -- they were
5 expecting below 9%, and now this latest report also
6 suggests the others were aware of the commission's
7 well-established formulaic approach and the split are
8 already below 9%.

9 Q. And so you're saying that
10 investors are expecting 8.8 percent and you're
11 recommending 8.2 percent, is that correct?

12 A. No, what I'm -- in that case, it
13 was a settled case, negotiated case. So what we are
14 recommending now is a one-year case, so it's
15 different.

16 Q. Just one more thing on the
17 document that's been marked Exhibit 653. If I go to
18 page 3, again, there's a -- a section that begins
19 capital structure trends.

20 A. Yes.

21 Q. And it says that the second
22 sentence of that or the second to last sentence, I'm
23 sorry, that the average authorized equity ratio for
24 electric utility cases nationwide was 4.94% in 2019.
25 Whereas in the next sentence it says the average

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 allowed equity ratio for gas utilities nationwide was
3 5 -- 51.75%, is that correct?

4 A.L.J. LEARY: Let's finish the
5 sentence, please, that you're quoting. In 2019 I
6 think it says, is that right?

7 MR. MALONEY: In 2019.

8 A.L.J. LEARY: And then 50.09.

9 MR. MALONEY: I'm sorry, I may have
10 read that wrong, Your Honor. I -- I did read it
11 wrong. Let me try it again.

12 A.L.J. LEARY: Okay.

13 BY MR. MALONEY: (Cont'g.)

14 Q. The average authorized equity
15 ratio for electric utility cases nationwide was
16 49.94% in 2019, 49.02% in 2018 And 48.9% in 2017.
17 The average allowed equity ratio for gas utilities
18 nationwide was 51.75% in 2019, 50.09% in 2018, and
19 49.88% in 2017. Is that correct?

20 A. Yes, that's what it says over
21 here.

22 Q. So would you agree that to the
23 extent that the average gas case reflected an R.O.E.
24 of 9.74% and an average equity ratio of 52.76%, that
25 and -- and the average electric litigated case

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 reflected an R.O.E. of 9.58% and an average equity
3 ratio of 51.55%.

4 The conclusion on average was that gas
5 utilities were riskier and required higher returns
6 than electric utilities?

7 A. I think we did answer that one
8 earlier.

9 Q. And this is just an update of
10 that for this further information.

11 A. Can you repeat your question,
12 please?

13 Q. Okay. I need to re-find the
14 exhibit to do that. Would you agree that the fact
15 that the -- in 2019 the average fully litigated rate
16 case resulted in an R.O.E. of 9.74% and an average
17 equity ratio of 51.75% for gas companies, while at
18 the same time for electric companies, the average
19 R.O.E. was 9.58% and the average authorized equity
20 ratio was 49.94%.

21 Would you believe that those 2 -- the
22 comparison of those 2 data points indicates that gas
23 utilities were judged to be riskier than electric
24 utilities by regulators on average in 2019?

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. As we said earlier, on that basis
3 we see that the -- if we're putting the I.R. response
4 62 which is page 2, then now we see that the gas
5 utilities looks like, become riskier compared to the
6 electric is what we said on page 2. And if you look
7 at a better trend you see the electric is around a
8 little bit -- a little bit lower than the gas
9 companies.

10 Q. Okay. Now, could I refer you to
11 your response to N.G.64, which has been marked for
12 identification as Exhibit 649?

13 A. And your question, please?

14 Q. So you're --- okay. You have the
15 document in front of you. Is it correct that what
16 you provided here was that you added 5 natural gas
17 companies to your proxy group and recalculated your
18 discounted cash flow and capital asset pricing model
19 results using those 5 additional companies? 5
20 additional gas companies, I should say.

21 A. Can you repeat it?

22 Q. Is it correct that what you did
23 here was to recalculate your discounted cash flow
24 results and capital asset price -- pricing mechanism
25 results by adding 5 additional gas companies to your

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 proxy group and those companies were Atmos Energy,
3 NiSource Inc., Northwest Natural Holding, ONE Gas,
4 Inc. and Spire Inc. Is that correct?

5 A. Yes.

6 Q. Okay. And it's your conclusion
7 that the addition of those five companies does not
8 materially change your cost of equity recommendation,
9 is that correct?

10 A. At the time of our testimony, we
11 related that there is no difference -- material
12 difference between the pure play -- between the 28
13 electric companies which we rely on their testimony.
14 This is adding extra augmenting a proxy group of 5
15 more pure play gas companies, you didn't see any
16 material difference. When you round them up, there
17 came to 8. -- 8.2, but since then we have seen some
18 variance between the 28 companies and it's 33
19 companies, including the 5 pure play gas companies.
20 It has been around -- the variance is about around 15
21 to 20 basis points, our latest analysis is what it
22 shows.

23 Q. Yes. So just to confirm. If I -
24 - if I were to look at page 4 of the attachment, and
25 I were to take the --

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: Attachment 1 or

3 Attachment 2, or am I not --

4 MR. MALONEY: I believe --

5 A.L.J. LEARY: -- on it --

6 MR. MALONEY: -- there's only one
7 attachment that we're in -- we're in N.G.64, Your
8 Honor.

9 A.L.J. LEARY: And that's been marked
10 --

11 MR. MALONEY: 649, I'm sorry.

12 A.L.J. LEARY: -- as Exhibit 649.

13 MR. MALONEY: Right.

14 A.L.J. LEARY: Okay, just make sure
15 the record is clear on what you're looking at and
16 asking the panel about. Thanks.

17 BY MR. MALONEY: (Cont'g.)

18 Q. So now, if -- I'm looking at the
19 last column on page 4, which says long form R.O.E.
20 Would you accept, subject to just checking the math,
21 that for those 5 companies, the average D.C.F. result
22 is 9.074% and the medium D.C.F. result is 8.46%?

23 A. I haven't checked that math. I
24 have not checked it.

25 Q. How could you check it?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. GOODRICH: He said I've not
3 checked.

4 BY MR. MALONEY: (Cont'g.)

5 Q. You have not checked?

6 A. No, I have not.

7 Q. But would you accept subject to
8 check, that if I take those 5 numbers and divide --
9 and add them up and divide them by 5, I'm going to
10 get 9.074% with the median and the median is the one
11 in the middle, which is 8.46%.

12 MR. GOODRICH: May I ask? I -- I --
13 subject to check becomes a bit of an issue.

14 A.L.J. COSTELLO: It does become, and
15 we asked that that not be done. So it looks like
16 he's calculating it now.

17 MR. MALONEY: It's -- it's a 5 number
18 calculation, so it's -- I understand subject to check
19 is problematic.

20 A.L.J. COSTELLO: We'll -- we'll can I
21 ask you. Yeah, can I ask you a question too?

22 MR. MALONEY: Yes.

23 A.L.J. COSTELLO: Do you have -- do
24 you have a sense of how much more you have with your
25 cross because after you get a response to your

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 question, we may take a break. If this is a good
3 part -- point to take a break.

4 MR. MALONEY: Yeah.

5 A.L.J. LEARY: If the panel needs more
6 time to do the math, we can do this now. Because is
7 this something that you can do quickly, panel?

8 A.L.J. COSTELLO: If we take --

9 MR. MALONEY: I probably have another
10 hour of cross --

11 A.L.J. LEARY: Yeah.

12 MR. MALONEY: -- taking a break right
13 now would be fine.

14 A.L.J. LEARY: Okay.

15 A.L.J. COSTELLO: So do you want them,
16 you know, --

17 BY MR. MALONEY: (Cont'g.)

18 Q. We can -- I -- I'd ask you to
19 check on, one is that the median data of your
20 calculation is .65 and then the other numbers that I
21 outlined for you which is the average is 9.07, 9.074
22 and the median is 8.46%.

23 A. Would it be then the long form
24 you're looking for those numbers is what you --

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. That's for the 5 companies, the 5
3 gas companies.

4 A.L.J. LEARY: And which five gas
5 companies --

6 MR. MALONEY: The 5 that are --

7 A.L.J. LEARY: -- you have to say.

8 MR. MALONEY: If you look at Exhibit
9 4, if you look -- I'm sorry, Attachment 1.

10 A.L.J. LEARY: Oh, I see the last
11 highlighted.

12 MR. MALONEY: Yes, yes. They are
13 highlighted.

14 A.L.J. LEARY: Blue.

15 MR. MALONEY: Yes.

16 A.L.J. LEARY: Okay. Again, this is
17 really important. Just so the record is clear when
18 you're talking about this exhibit, there's is a lot
19 of companies listed here. I do see those 5 companies
20 highlighted or grayed, if you will.

21 MR. MALONEY: Yeah.

22 A.L.J. LEARY: Just make sure that
23 you're clearly identifying for the record what you're
24 referring to.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: I think before I did
3 identify each company. Yes, Your Honor.

4 A.L.J. LEARY: Oh, you did, okay.

5 MR. MALONEY: Yes.

6 A.L.J. LEARY: I missed that. About
7 10 minutes -- 10, you want 15?

8 A.L.J. COSTELLO: If they're going to
9 be doing math and they want to get a calculator --

10 MR. FORST: We'll take the 15 minutes,
11 Your Honor.

12 A.L.J. LEARY: 15 it is, okay. See
13 you in 15.

14 (Off the record; 10:23 a.m.)

15 (On the record 10:47 a.m.)

16 A.L.J. COSTELLO: You may proceed.

17 BY MR. MALONEY: (Cont'g.)

18 Q. I believe when we went off the
19 record, I had asked the panel some questions for some
20 math calculations. Does the panel have that
21 information?

22 A. (Qadir) Yes.

23 Q. Could you explain what the
24 average D.C.F. result is and -- and the medium, beta
25 and medium D.C.F. result?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. (Duah) So the average for the 5
3 companies is 9.07%. And median is 8.46%. And the
4 beta for the 5 companies -- gas companies is the
5 average is .62 and median is .65.

6 Q. Thank you. Now, I take it that
7 in arriving at your -- your return on equity
8 recommendation, you conducted an analysis that relied
9 primarily on a discounted cash flow methodology. Is
10 that correct?

11 A. Yes.

12 Q. And it's correct that you
13 employed at what they referred to as a 2 stage D.C.F.
14 or 2 stage discounted cash flow, I'm going to try to
15 avoid acronyms entirely?

16 A. Yes.

17 Q. And the second stage -- I'm
18 sorry. And is it correct that in the first stage of
19 your calculation you rely on Value Line dividend
20 growth projections?

21 A. Yes.

22 Q. And when I say that, I mean, you
23 -- you take the data that's provided by Value Line
24 and simply use it in your calculations, you don't

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 make an independent evaluation or modify it in any
3 way?

4 A. We rely on the Value Line 3 to 5
5 year short-term growth rate for our short-term growth
6 rate. And then we use sustainable growth rate to
7 project the dividends through for the fifth to the
8 200 years.

9 Q. Okay. And -- and which you just
10 referred to the -- the second stage of the discounted
11 cash flow analysis has a greater impact on the
12 overall result than the first stage, is that correct?
13 And by that I mean, it's a larger part of the growth
14 number that falls out of it?

15 A. We did not run analysis to
16 determine the impact of the sustainable growth rate
17 on overall, but we believe it is only combined this
18 what we called the first stage growth rate, and this
19 is normal growth rate, it produces reasonable
20 results, which is the commission's approach for the
21 past, about 25 years or something like that.

22 Q. So -- so you don't know which was
23 larger, but it is essentially the sum of one -- the
24 one and the second one, the -- the -- the dividend
25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 growth rate for 5 years and then the sustainable
3 growth calculation for the next 195 years, I guess.

4 A. Yeah. The dividend, the
5 sustainable growth rate went from the 5th year to 200
6 years.

7 Q. Thank you. And is it correct
8 that in order to calculate sustainable growth in the
9 second stage, you need an estimate of the long-term
10 return on equity that will be earned by each member
11 of the proxy group?

12 A. Can you repeat the question?

13 Q. Is it correct that in order to
14 calculate the sustainable growth rate, you need an
15 estimate of the long-term return on equity that will
16 be earned by each member of the proxy group?

17 A. As we saw in S.F.P.17 page 2 the
18 second column or third column content from the left.
19 We see the return of commodity 2023 is used as one of
20 the input for the internal growth rate, which is
21 captured in the fourth column from the left and is
22 also the internal growth in one combined with the
23 external growth rate, which is in the heading as
24 M.B.R.-1 that we get the sustainable growth as a
25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 combination of the internal growth rate and the
3 external growth rate.

4 Q. Okay. The return on equity in
5 column 2 that you referred to, is it correct that the
6 source of that data is Value Line?

7 A. That is from -- yes, from Value
8 Line.

9 Q. Yes. And -- and so each estimate
10 in that column represents an individual determination
11 of the R.O.E., the return on equity -- the expected
12 return on equity for each company in the proxy group,
13 right, into the individual estimate for each company?

14 A.L.J. LEARY: I'm sorry, are you
15 referring to S.F.P.17?

16 MR. MALONEY: Yes, I'm sorry, Your
17 Honor. S.F.P.17 has been marked, I believe, as
18 Exhibit 440. And I'm referring to column 2.

19 A.L.J. LEARY: Thank you.

20 A. (Duah) Please, can you rephrase
21 your question?

22 BY MR. MALONEY: (Cont'g.)

23 Q. I -- yeah, I guess. If I refer
24 to Column 2, what that contains is an individual
25 return on equity estimate for each company in the

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 proxy group derived from Value Line. Is that
3 correct?

4 A. Yes.

5 Q. Could you refer to the exhibit
6 that's been marked for identification as Exhibit 654?

7 A. Yeah.

8 Q. Now, you are - you -- I don't
9 know if you utilize this specific value. Now, this -
10 - this Value Line information is from April to June
11 of 2019. And I believe you stated in your direct
12 testimony that your analysis in this case was based
13 on information developed between April and June of
14 2019. Is that correct?

15 MR. FORST: Objection, Your Honors. I
16 don't believe Counsel's laid a foundation for this
17 document.

18 MR. MALONEY: I'm not asking about the
19 document --

20 MR. FORST: Okay.

21 MR. MALONEY: -- I'm asking about the
22 Value Line information that they used.

23 A.L.J. LEARY: I think -- I think
24 that's right.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 THE WITNESS: Can you rephrase your
3 question, please?

4 BY MR. MALONEY: (Cont'g.)

5 Q. Okay. Is it -- is it correct --
6 this -- this document purports to contain Value Line
7 information from April to June of 2019. And it's my
8 understanding from your testimony that the Value Line
9 information that you used in developing your
10 recommendation was derived from Value Line during the
11 period, April to June of 2019. Is that correct? I
12 could probably find a reference to that, but it might
13 take a while.

14 A. Yeah, I'm checking my testimony
15 to see that -- let me check. Page 57.

16 MR. FORST: If I may, Your Honors,
17 just to speed time here. It's Page 65 of the
18 panel's testimony.

19 MR. MALONEY: Thank you, Mr. Forst.

20 THE WITNESS: Yes, it's from April to
21 June that is from page 65 of our testimony.

22 BY MR. MALONEY: (Cont'g.)

23 Q. Now, do you have access to
24 electronic Value Line database, or do you rely on
25 these individual documents to obtain your data?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. Both.

3 Q. Okay. So would you confirm for
4 me -- and I apologize that these are not in perfect
5 alphabetical order, that this document contains the
6 Value Line information for each of the 28 members of
7 your proxy group. Does that appear to be what it is?

8 A. I tried to count, and Con Ed --

9 Q. There are definitely 28 pages and
10 I believe they're all there although I know Con Ed is
11 out of order and so is Ameren, but I don't know how
12 that happened. It's because I'm incompetent at most
13 tasks like this.

14 A.L.J. COSTELLO: How many pages did
15 you say?

16 MR. MALONEY: 28. There are 28 pages
17 under the cover sheet.

18 A.L.J. LEARY: Thanks.

19 THE WITNESS: (Qadir) I think you said
20 that these are 3 months, so it should be like 28
21 times 3 then?

22 BY MR. MALONEY: (Cont'g.)

23 Q. No, it's just -- it's whatever
24 month that -- that was available for each one, but
25 it's either from April --

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. Okay.

3 Q. -- May or June, depending on the
4 company.

5 A. The count.

6 Q. Sure.

7 A.L.J. LEARY: I just -- I just want
8 to clarify the cover page. So it says Value Line
9 information for staff proxy group April 2019 to June
10 2019. Did this document -- was this document created
11 by the D.P.S. Staff Finance Panel?

12 MR. MALONEY: No, my -- my understand
13 -- this is just simply data from Value Line and the -
14 - the dates of each individual report are listed in
15 the bottom right-hand corner of each report. And so
16 some are from April, some are from May and some are
17 from June.

18 Now, my understanding of that is Value
19 Line doesn't do every company every month. And so
20 over the 3-month period that creates the data.

21 BY MR. MALONEY: (Cont'g.)

22 Q. Is that -- is that correct,
23 panel?

24 A. (Qadir) Yes, so I counted. It's
25 28.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Yes. And I just want to
3 understand from these -- looking at these documents,
4 the data that you use to derive the return on equity,
5 and some other inputs into what has been marked as
6 Exhibit 440.

7 So with respect to the return on
8 equity for 2023 if I were to look at the first page
9 and it's Ameren Company. Could you tell me where you
10 get the number that then shows up as 10.69 -- 10.69
11 for Ameren?

12 A.L.J. LEARY: You're going to have to
13 help me out here, Mr. Maloney. I'm looking at page
14 one of S.F.P. 17 marked as Exhibit 440.

15 MR. MALONEY: And if you're looking at
16 --

17 A.L.J. LEARY: I'm looking opposite
18 Ameren and you just said 10 point something.

19 MR. MALONEY: Yeah, if you look at
20 page 2 of 2.

21 A.L.J. LEARY: Okay. There you go,
22 so.

23 MR. MALONEY: And there in the second
24 column is 10.69.

25 A.L.J. LEARY: Okay. Just --

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: And if -- if I done this
3 competently we would have used Alead, but we didn't,
4 so.

5 A.L.J. LEARY: Yeah, they're not
6 appearing in this document as far as I can tell.

7 MR. MALONEY: They are -- Alead is in
8 there, but unfortunately --

9 A.L.J. LEARY: It's somewhere else.

10 MR. MALONEY: -- it ended up third.

11 A.L.J. LEARY: Okay.

12 MR. MALONEY: Because like I said the
13 brain doesn't work so well late at night.

14 THE WITNESS: (Duah) Can you rephrase
15 your question?

16 BY MR. MALONEY: (Cont'g.)

17 Q. Yes. So from looking at column
18 2, and I'm looking at Ameren and I see a return on
19 equity number of 10.69. And I'm looking at the Value
20 Line sheet for Ameren. And I could see off to the --
21 I will say off to the right-hand side of the page,
22 there is a Value Line set of data that appears to be
23 for 2022 to 2024.

24 And -- and there's a number below
25 that, that says all the way down at the bottom of the

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 column that says return on shareholder -- or return
3 on S.H.R. equity return on C.O.M. equity. Are -- are
4 those -- simply stated, are those the data that you
5 used to derive the 10.69 for Ameren in your column 2
6 of what's been marked Exhibit 440?

7 A. That one is based upon the
8 earnings per share which is in column page -- page 1
9 of 2 of S.F.P. 17, the earnings per share column
10 which is 4 from the left divided by the average book
11 -- book value per share which is also on page 1 of
12 S.F.P. 17.

13 Q. Okay. So you used the earnings
14 per share and the book value per share to derive your
15 individual R.O.E. for 23. And that number I think
16 you would agree is close to what Value Line reports
17 but not completely the same because you do it
18 somewhat differently, is that?

19 A. Yeah, this is how we came out.
20 We came out with that formula, yeah, earnings per
21 share and average book value per share, this is how
22 we came. And yeah, coming with Ameren. Yeah, come
23 in with 10.69 and they are also come in with 10.5.

24 Q. But -- but all this information
25 comes from that far right-hand column on the Value

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 Line sheets that we're looking at. So for Ameren, on
3 those -- those sheets right there. The far -- I'm
4 sorry, the far right boxes, if you will?

5 A.L.J. LEARY: So just identify it for
6 the record those far right boxes and what they are.

7 BY MR. MALONEY: (Cont'g.)

8 Q. Yeah. It -- it says under the
9 target price range, if you keep looking down it says
10 Value Line P.U.B. L.L.C. 22 to 24. And then there
11 are a series of numbers there including the book
12 value per share, the revenues per share, cash flow
13 per share, earnings per share. And if I think what
14 you told me you used the earnings per share and the
15 book value per share, to derive the return on equity,
16 is that correct?

17 A. Average but we didn't know how
18 Value Line also developed the returning of common
19 equity here. What is the year end -- what you call
20 it, what is the year-end book value per share? What
21 is the year-end book value per share, what do you use
22 the average book value per share, and we use average
23 book value per share.

24

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Right. So -- so you're relying
3 on Value Line inputs, you're just not relying on the
4 return on equity input per se, right?

5 A. That's what we rely on, yeah,
6 five -- due to 5-year forecast.

7 Q. Right. And so when I look at
8 this then, if I were to look at all of these column 2
9 numbers, if I were to look at each of these 28
10 sheets, I could re-calculate that. And I would end
11 up at the bottom of page 2 on what's been marked as
12 S.P. 440 with an average return on equity of 11.14%
13 and a median of 10.64% for the proxy group, right?

14 A. That is what staff methodology
15 produces.

16 Q. Yes. Now, how does the staff
17 then calculate the -- what inputs the staff use, I'm
18 sorry, to calculate the retention amounts that --
19 which I assume represents the portion of earnings
20 that are retained as opposed to paid out as
21 dividends, is that correct?

22 A. That's right. That is also how
23 much earnings per share the company generates and how
24 much is paid out as dividends. So if if -- if you go
25 to page 1 of S.F.P. 7 we have earnings per share

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 which is third -- fourth column from left and then
3 let's, I'm taking Alead, Alead has 4.25 earnings per
4 share. And then it has a dividend forecast of 2.85 -
5 - 85 --

6 Q. Correct.

7 A. -- which is between 2022 to 2024.
8 So the earnings of 4.25 and the paid dividend of
9 2.85. So what is retained is 4.25 minus 2.85. So
10 that's how we run the retention rate in column 2 from
11 the left on page 2.

12 Q. And so then you assume that that
13 percentage is essentially what's then retained for
14 the next 195 years. That's the way the model runs
15 out?

16 A. Yeah. I would say yeah. So here
17 the retention rate will be used in Alead that is
18 32.97. And then you look at the total ratio that
19 will be one line above that, I think it should come
20 somewhere around that.

21 Q. And -- and finally, where do you
22 derive the estimates of the issuance of stock above
23 book value, which I guess is the S.V. term of your
24 sustainable growth method, is that correct? I
25 realized there was a question in a statement in

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 there. Let me -- let me ask you. This is -- the --
3 the S.V. term represents the accruals to dividends
4 that will occur as a result of issuance of stock at
5 prices above book value?

6 A. Correct.

7 Q. And where do you derive that
8 information from on these Value Line pages?

9 A. That is coming from -- if you
10 look at the second and the third column content from
11 the right on page 1 of S.F. - S.F.P. 17. It is
12 coming from the number of shares. So for instance,
13 I'm using Xcel, which is last Xcel Energy. For 2019
14 Xcel Energy is forecasting 515.5 shares and then it's
15 forecasting issuance of 525, which is an accretion of
16 value, so this is how we derived the S.V. factor.

17 Q. And -- and so where I would get
18 that? If I'm looking at the Xcel Energy page from
19 the Value Line pages, I've handed out is Exhibit 654
20 it would be -- there's a -- there's a column in the
21 box about 7 lines down to the far right that says,
22 common shares outstanding. And is it the difference
23 between the 517 and the 521.50?

24 A. Yes, it's coming from 2019.
25 There's a box there which -- the Value Line described

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 as common shares as -- each as outstanding and then
3 it has superscript D. So it is a common share. So
4 we took the 2019 and then we also do the 2022 to
5 2024, 3- to 5-year forecast.

6 Q. Okay. Thank you. Does the panel
7 believe that given the uncertainties surrounding the
8 future of the electric business, that the commission
9 needs to exercise caution in accepting a growth
10 estimate for 195 years, that's based on data that
11 really is derived from a Value Line forecast for 20 -
12 - calendar year, 22 to 23?

13 MR. FORST: Objection. That's a very
14 vague question. What uncertainties is counsel
15 referring to?

16 MR. MALONEY: Well, uncertainty is
17 about growth over the next 195 years.

18 A.L.J. LEARY: Yeah, I'm wondering if
19 you could break that question down into two pieces.
20 Is that something that --

21 MR. MALONEY: Well, I can try.

22 A.L.J. LEARY: Yeah, try -- try to do
23 that. Mr. Forst, does that -- can we just wait and
24 hold your objection to see whether counsel is
25 rephrasing this question in two pieces works for you?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. FORST: Yeah, I think we can
3 afford them that opportunity. Thank you.

4 A.L.J. LEARY: Okay.

5 MR. MALONEY: Thank you, Mr. Forst.

6 BY MR. MALONEY: (Cont'g.)

7 Q. The -- the -- does the panel
8 agree -- well, does the panel agrees, doesn't it,
9 that you're basically using 1 year of data or change
10 in data over a 1-year period as forecast by Value
11 Line to forecast sustainable growth for the next 195
12 years. Is that correct?

13 A. As we -- as the panel pointed out
14 to page 62 of our testimony, we did compare the -- or
15 check the -- the reasonableness of sustainable growth
16 rate when comparing it with the G.D.P. which is Gross
17 --

18 A.L.J. LEARY: Domestic product.

19 THE WITNESS: Domestic growth rate, so
20 we did compare that and that has been the
21 commission's preferred approach by comparison of the
22 growth rate to the G.D.P. So this is what we did,
23 and we came up with 4.64 for sustainable growth rate.
24 And the G.D.P. forecast also is 4.0%. So we believe
25 ours was a little bit optimistic.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. That's pretty good answer.

3 Referring -- referring to page 53 of your testimony -
4 - your corrected testimony. Is it correct that the
5 reason that you employ a 28 company proxy group is
6 that you hope to eliminate biased or inaccurate
7 estimates of growth? And I refer you to 53, lines 7
8 to 12, is it?

9 A. Can you rephrase your question?

10 Q. Yeah. Is it -- is it correct
11 that the reason that you employ a proxy group of 28
12 companies, a relatively large proxy group, is that
13 you hope to eliminate biased or inaccurate estimates
14 of growth?

15 A. We believe that the 28 companies
16 is an adequate sample size, and when you don't have
17 adequate sample size, it introduces unreasonable
18 results. So that is why we -- one reason why we rely
19 on the electric proxy group.

20 Q. And --

21 A. And --

22 Q. I'm sorry, I didn't mean to
23 interrupt you.

24 A. And we didn't have sufficient gas
25 companies as we discussed earlier. The gas companies

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 are only 5 companies. So that was not enough to do
3 that. So I think having sufficient sample size would
4 produce reasonable results.

5 Q. When you say produces reasonable
6 results, the hope is that it eliminates biases one
7 way or the other, could be upward or downward or
8 inaccurate results, inaccurate forecasts, is that
9 correct?

10 A. Yes.

11 Q. Yes. At the same time, it's
12 correct in selecting a number of inputs in your
13 return on equity model, you rely on a single source
14 of data, is that correct? And -- and specifically,
15 I'll refer to the forecast of dividend growth, the
16 source of data for sustainable growth, the source of
17 data for beta in the capital asset pricing model, and
18 the source of data for the market risk premium in the
19 capital asset pricing model.

20 A. We rely on the Value Line data
21 because we believe, and consistent with the
22 commission's practice, the Value Line produces a very
23 superior to any other source that we know of.
24 Bloomberg has been issuing 2 years of their data and

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 the company used 10 years and 10 years has a problem
3 to us, to the finance panel.

4 It can generate more data, but our
5 analysis suggests that it can bias the D.C.F.
6 protocol, the beta results, so we don't believe the
7 10 year is a good estimation period to amended data
8 analysis. On the Merrill Lynch, also consistent with
9 the commission's approach. In estimating the market
10 risk premium Merrill Lynch uses dividend growth
11 model, 3-stage D.C.F. to generate the market returns.
12 What the company did was using the single stage
13 D.C.F. Single stage D.C.F. and what do you call it,
14 3-stage D.C.F.. The 3-stage D.C.F. is more superior
15 because it has 3 different growth rates. So that is
16 more superior to estimate the market return which
17 Merrill Lynch uses.

18 So we believe the market risk premium
19 that we rely on based upon Merrill Lynch is superior
20 because it's based upon 3-stage D.C.F. The company
21 also used single stage D.C.F. to estimate -- to
22 estimate the market risk premium which, by the way,
23 the company used any growth rate to estimate the --
24 what we called it, D.C.F. resource and the market

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 return. So we don't believe that is a reasonable
3 approach.

4 Q. Well, I understand that you have
5 reasons for selecting each of the publications that
6 you -- or data inputs that you use. My question,
7 though, is a little different. Why -- when -- is --
8 when the company -- clearly the panel is concerned,
9 correct, that in selecting a proxy group, you need a
10 significant number of inputs to eliminate the
11 potential for bias or inaccurate forecast, is that
12 correct?

13 And my question simply goes to -- that
14 go to sort of the ah-ha question. Why isn't the same
15 thing true when you're selecting the inputs for the
16 beta calculation, the market risk premium, the
17 sustainable growth methodology, the short-term growth
18 methodology to be used in the discounted cash flow?

19 A. This is what the panel discussed
20 earlier. That you have to look at which one produces
21 which of these sources produces reliable results. We
22 talk about the beta source. I believe the Merrill
23 Lynch is more superior to using a single stage D.C.F.
24 just what a company is using, the company is using
25 single stage D.C.F. to calculate the market return.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 And then we look at the rebuttal
3 testimony. The company used sources from Yahoo
4 Finance, and I think 3 different sources, all of
5 those sources the company rely on dividend yield and
6 growth rate and growth rate was based upon earnings
7 per share. I don't believe that earnings per share
8 is a proxy for dividend per share and growth rate.

9 Q. But going back to your
10 selections, is it the panel's testimony that there's
11 no potential for bias or inaccurate results in the
12 various inputs that you used that I identified
13 before?

14 A. The panel does not believe so.

15 Q. Let me ask you a few questions
16 about your capital asset pricing analysis. Capital
17 asset pricing mechanism analysis. Now, you stated
18 before that you rely on Value Line betas, is that
19 correct?

20 A. Yes.

21 Q. And is it correct that the beta
22 of a stock measures the volatility of the stock in
23 relation to the stock market as a whole? And I could
24 refer you to page 64 of your corrected testimony.
25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 THE WITNESS: On page 64, line 17
3 coming down, we said a beta or the comparing of the
4 data of a stock measures the volatility of that stock
5 in relation to the volatility of the stock market as
6 a whole, so the answer is yes.

7 BY MR. MALONEY: (Cont'g.)

8 Q. Thank you. And is it correct
9 that the Value Line calculates beta using a
10 regression analysis and represents the co-variance of
11 a particular stock to the market as a whole?

12 A. Yeah, Value Line uses a -- Value
13 Line co-variances and then makes some adjustment.

14 Q. And is it correct that Value Line
15 betas are generally calculated using the most recent
16 5 years of data?

17 A. Correct.

18 Q. And is it also correct that a
19 beta of less than one indicates that a particular
20 stock is less volatile in the market as a whole?

21 A. Yeah. Yeah, that's what it said
22 on page 64 line 22, beta therefore not only is the
23 stock has bigger risk than the market, so the answer
24 is yes.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Would you agree that utility
3 betas have declined significantly since the company's
4 previous rate case in 2016 and specifically what --
5 were you a witness in that case? Let me -- let me
6 ask it differently, were you a witness in that case?

7 MR. FORST: Objection, can the Counsel
8 define what he means by significantly?

9 MR. MALONEY: Sure. I believe the
10 betas have declined from 0.75 in your testimony in
11 that case to 0.60 and you could check that.

12 MR. FORST: I would also just note
13 there's two questions there, so there is one about
14 the significant decline of betas and then there is
15 also whether the with -- whether one of the panel
16 members was a witness in another case.

17 A.L.J. LEARY: All right. Does the
18 panel want to answer the witness question first?

19 THE WITNESS: (Qadir) From the panel,
20 I was the wit -- witness on the last case.

21 A.L.J. LEARY: You were?

22 THE WITNESS: Yeah.

23 A.L.J. LEARY: Anyone else?

24 THE WITNESS: (Duah) I was not in that
25 case.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 THE WITNESS: (Bullock) I was not.

3 A.L.J. LEARY: Okay. Good. And I
4 think Mr. - you were referring to the 2015 rate case?

5 MR. MALONEY: 2016, I believe, yeah.

6 A.L.J. LEARY: 2016 rate case?

7 MR. MALONEY: Yeah.

8 A.L.J. LEARY: That result -- I think
9 that's --

10 MR. MALONEY: Resulted in a joint
11 proposal.

12 A.L.J. LEARY: What's the case number
13 0058 and -59, but what's the year.

14 MR. MALONEY: 16-G.

15 THE WITNESS: (Duah) G.

16 A.L.J. LEARY: 16 E and G.

17 MR. FORST: Just G.

18 MR. MALONEY: G.

19 A.L.J. LEARY: Just G.

20 MR. FORST: Yes.

21 A.L.J. LEARY: Sorry.

22 MR. MALONEY: 0058 and 0059.

23 A.L.J. LEARY: Okay. Thanks.

24 THE WITNESS: (Duah) Okay.

25 MR. MALONEY: I'm sorry.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 THE WITNESS: What is your question?

3 BY MR. MALONEY: (Cont'g.)

4 Q. Would you agree that utility
5 betas declined from 0.75 at the time of the last case
6 to 0.60 today?

7 A. Based upon a proxy group or based
8 upon the --

9 Q. Based upon the proxy group.

10 A. Yeah. 2016, when I checked the
11 proxy group 0.75 and 2019 our proxy group is 0.61.

12 Q. Okay. Could you refer to your
13 testimony at page 46 beginning at line 17?

14 A. Okay.

15 Q. And it states there, doesn't it,
16 that the recent downgrade of the companies by Moody's
17 was not unique. The reduced cash flows resulting
18 from the tax act led Moody's to downgrade many
19 utilities over the past year-and-a-half. Is that
20 correct?

21 A. Yes.

22 Q. Is it correct that the Tax Cut
23 and Jobs Act which is the tax act that you're
24 referring to there, correct?

25 A. Yes.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Increased the cash flows for most
3 companies?

4 A. I'm not sure what you mean by
5 most companies.

6 Q. Well, other than -- it's correct
7 that most utilities not only had to reduce rates, but
8 also to refund previously collected deferred taxes as
9 a result of the passage of the tax act?

10 A. So you are referring to the
11 electric industry. Is that what you're referring --

12 Q. Electric utilities, gas
13 utilities, utilities generally experienced a decrease
14 in cash flow. Correct?

15 A. Yeah, I agree with you.

16 Q. Yes. But other companies, in all
17 other four -- all other businesses evaluated by Value
18 Line, generally experienced an increase in cash, in -
19 - in their ability to derive earnings and returns as
20 a result of the passage of the Tax Cuts and Jobs Act.
21 Isn't that a fair conclusion?

22 A. Can you repeat the question?

23 Q. With respect to the rest of the
24 S. and P. 500 if you will, or with the exception of
25 utility companies, didn't other companies as a result

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 of the passage of the tax act likely experience an
3 increase in cash flow and an increase in earnings?

4 A. The -- the -- because they are
5 competitive businesses, the impact on competitive
6 business was different from the impact on regulated
7 electric utilities, the -- the tax act had an impact
8 on the utilities' cash flows.

9 Q. Right. But -- whereas for other
10 companies, they had paid taxes at 35% and now they
11 only had to pay them at 21%, so everything else being
12 equal, they got to keep the other 14%, right?

13 A. Yeah, I understand that also the
14 pass back of the -- what do you call? This -- the
15 impact of -- what do you call? Pass back on the
16 different income taxes as a result of the T.C.J.A.,
17 it varies from companies to company.

18 Q. Right. And -- and -- so utility
19 companies were impacted by that, but generally
20 speaking, companies in other sectors that are not
21 regulated, they don't have to pass back different
22 taxes, correct?

23 A. They don't, but the impact varies
24 somewhat they -- they -- some of the pass back will
25 shorten -- some of them have a longer amortization

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 period, some have a shorter amortization period. So
3 it vary from company to company on their cash flows.

4 Q. But in the panels of -- opinion,
5 what affect would a reduction in cash flow for a
6 utility company compared to an increase in cash flow
7 for the rest of the market have on the regression
8 analysis that determines beta?

9 A. Beta determination is based upon
10 three factors. One is the stock prices, one, which I
11 say earlier, the stock prices reflects a collective
12 judgement of all market participants and it's also
13 based upon estimation period. It depends -- it
14 depends also upon the index that is selected.

15 So it depends upon these three
16 variables and it may be different -- because there
17 are different betas out there, if you go to Yahoo
18 Finance, their beta is different, if you go to
19 Capital IQ their beta is different.

20 A.L.J. LEARY: Excuse me. I need you
21 to speak much more slowly.

22 THE WITNESS: Thank you. There are
23 different sources of beta. Yahoo Finance provides
24 beta, Capital IQ provides beta, Bloomberg also
25 provides beta. So and each of these sources have a

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 different way of calculating it and also making an
3 adjustment.

4 Bloomberg adjustment is different from
5 Value Line.

6 BY MR. MALONEY: (Cont'g.)

7 Q. But I -- I guess my question is
8 the changing cash flows resulting from the passage of
9 the Tax Cuts and Jobs Act, as it affected utilities
10 as compared to the way that it affected non-
11 utilities, couldn't that have affected the
12 correlation of returns realized by utility companies
13 and resulted in the reduction in the beta.

14 A. It -- it will reflect the stock
15 prices because investors will perceive whatever, no
16 pricing. All these impacts on the company's cash
17 flows, the pricing and the stock -- you put in a
18 price -- pricing of the company's stock prices. So
19 those risks and the cash flow impact will be
20 reflected in a company's stock prices, which will be
21 used by these beta sources to determine the beta. So
22 it's -- it kind of captured in the beta calculation.

23 Q. I'm sorry. I didn't understand
24 the last thing --

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. The ca -- the cash flow input can
3 be captured in the beta calculation post stock price.

4 Q. Okay. So the drop in betas could
5 be attributable to the impact -- the different
6 impacts of the Tax Cuts and Jobs Act on the
7 companies, at least in part.

8 A. I'm not sure which drop in beta.
9 Are you referring -- which are you referring to, I'm
10 not sure of that.

11 Q. Referring to what we said before
12 was a decrease from 0.75 at the time of the last rate
13 case to 0.60 today.

14 A. Yes. But it could be part of it
15 that many thing that goes into the beta calculation.

16 Q. It's correct isn't it, that
17 Moody's and S -- Standard and Poor's, the company's
18 credit rating agencies generally regarded the impact
19 of the Tax Cuts and Jobs Act on utilities as a
20 negative - a credit negative that increase risk?

21 A. Do you have any document you can
22 show me or something like that?

23 Q. I think -- I -- I think if you
24 could look at page 46 of your direct testimony.

25 A. 46.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. If you look at lines 11 through
3 14.

4 A. And what is your question?

5 Q. That the ratings agencies in
6 general, this only refers to Moody's, but for the -
7 saw the impact of the Tax Cuts and Jobs Act on
8 utilities as generally a credit negative.

9 A.L.J. LEARY: I just want to make
10 sure that you are not mischaracterizing the testimony
11 because this testimony refers to the companies, not
12 the utility sector as a whole. So just make sure
13 that your question if -- I mean you can ask that
14 question.

15 MR. MALONEY: You can go to line 17,
16 Your Honor. Thank you, I -- I appreciate your --
17 your concern. The recent downgrade of the companies
18 by Moody's was not unique. The reduced cash flows
19 resulting from the tax act led Moody's to downgrade
20 many utilities over the past year-and-a-half.

21 A.L.J. LEARY: Thanks.

22 THE WITNESS: And your question is
23 what?

24 BY MR. MALONEY: (Cont'g.)

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. So -- so the -- the tax act was
3 viewed as a negative by the credit ratings agencies,
4 that was the question I asked. Something that
5 increased risk for utility companies.

6 A. I would say it's going to be a
7 permanent situation because it could change somewhere
8 along the line and now this is on report that shows
9 that the company's cash flows -- the utilities cash
10 flows will -- will get better after sometime.

11 So I would say it's going to be --
12 it's not going to improve, it is going -- it is
13 likely to improve according to one of the reports I
14 came across. So I would say it's going be a
15 permanent situation.

16 Q. But it was reasonable to -- is it
17 reasonable to conclude that it was negative for the
18 past four to five years or since 2017?

19 A. As is said in page 46 of our
20 testimony, it leads to think about 25 companies -- 25
21 utilities I think with -- has a return action. It
22 looks like they will put a negative -- I'm trying to
23 recall -- they will put a negative outlook or
24 something of that sort.

25 Q. Okay.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. But not all of them were
3 downgraded.

4 Q. Now, I'd like to refer to page 80
5 of your testimony.

6 A. I'm ready.

7 Q. Is it correct that at lines 19 to
8 22, you cite Dr. Roger Morin's book, the New
9 Regulatory Finance in support of proxy group size
10 that -- that a proxy group size of between 15 and 30
11 is reasonable to support a reliable cost of equity
12 estimate?

13 A. Yeah.

14 Q. And do you regard the text that
15 you cited by Dr. Morin as authoritative on the
16 subject of determination of rate of return?

17 A. I would say Dr. Morin, I think --
18 I wouldn't say everything I agree with him in the
19 book because in the Ni -- Niagara Mohawk case he
20 quoted some aspect of his -- of his book saying that
21 staff approaches of determining the return of common
22 equity secular and I don't believe in that. But --

23 Q. But overall, do you agree his
24 book is considered an authoritative exposition on the

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 -- on rate of return? You cited it in your
3 testimony, in support of your testimony.

4 MR. GOODRICH: So objection, I believe
5 that when asked the question of -- when asked that
6 question, the panel answered that they do disagree
7 with certain aspects of Morin's analysis.

8 A.L.J. LEARY: Why don't you ask about
9 the areas that they do find authoritative? This --
10 this fin -- Staff Finance Panel does find
11 authoritative or you could ask --

12 BY MR. MALONEY: (Cont'g.)

13 Q. Well, let me ask the question in
14 a different way. If we could look at exhibit what's
15 been mark as Exhibit 655.

16 A. Exhibit 655. The panel is ready.

17 Q. Let -- let me start off by just
18 referring to your testimony at -- at page 113. At --
19 at that point, is it correct that you criticize Ms.
20 Berkley's analysis for using sole -- for solely using
21 a 30-year treasury yield in -- in determining the
22 risk free rate for the capital asset pricing
23 methodology?

24 A. Yes.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Now, Dr. Morin, if I could refer
3 you to the second page of what's been marked as
4 Exhibit 655. Under the paragraph that says CAP-M
5 application risk free rate, it states there doesn't
6 it, that at the conceptual level, because common
7 stock is a long-term investment and because the cash
8 flows to investors in the form of dividends last
9 indefinitely, the yield on very long-term government
10 bonds, namely the yield on 30-year treasury bonds is
11 the best measure of the risk free rate for use in the
12 capital asset pricing methodology. It says CAP-M and
13 just premium methods.

14 MR. FORST: Objection, Your Honors. I
15 don't believe counsel has laid a foundation for the
16 panel's familiarity with this document nor whether
17 the sections of this book that they purport to be the
18 exhibit are true and accurate.

19 A.L.J. LEARY: Okay, okay.

20 MR. MALONEY: Your Honor.

21 A.L.J. LEARY: It's almost lunch time.

22 MR. MALONEY: You Honor, the panel
23 attached sections of Dr. Morin's book as exhibits and
24 --

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: And reference Dr.

3 Morin's book --

4 MR. MALONEY: -- reference Dr. Morin -

5 -

6 A.L.J. LEARY: -- in their testimony

7 so --

8 MR. MALONEY: And I'm perfectly happy
9 asking them how -- that they disagree with Dr. Morin,
10 but I believe we've established that Dr. Morin's
11 testimony is relevant to this - or the book is
12 relevant.

13 A.L.J. LEARY: All right. Why don't
14 you -- can you ask the panel if they recognize this
15 document et cetera, because one of the things I don't
16 see is the -- where were we; 80?

17 MR. MALONEY: Yes.

18 A.L.J. LEARY: I don't see the
19 version. So this is the two thou -- what's been
20 marked as Hearing Exhibit 655 is the 2006 version of
21 Dr. Morin's book.

22 MR. MALONEY: And -- and I believe if
23 we go to exhibit -- excuse me.

24

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: Well, you don't have to
3 do that. Is it your understanding that this is
4 exactly the version --

5 MR. MALONEY: My understanding is this
6 is the -- and I could ask the panel, is this the
7 version that you were using in -- quoting in page 80?

8 THE WITNESS: No, I use the 2009
9 version -- edition.

10 MR. MALONEY: The 2009 edition.

11 A.L.J. LEARY: We don't know as we sit
12 here how those two editions may have changed. I'm
13 going to give the company the opportunity to -- let
14 me just confer with Judge Costello a sec.

15 All right, we have an idea I would
16 like to throw out to the company and counsel for
17 D.P.S. staff. I would like to give the company the
18 opportunity to get the right version and ask the
19 questions that are needed to be asked in this area.

20 MR. MALONEY: Could I just -- just if
21 I -- sorry to interrupt, but if I can refer to
22 S.F.P.-22.

23 A.L.J. LEARY: Would the panel just
24 turn to S.F.P.-22 as well as counsel so we can -- go
25 ahead, I'm sorry.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: If you look at S.F.P.-
3 22, it says that the pages that were sponsored by the
4 Staff Finance Panel were the 2006 public utilities
5 report version of Dr. Morin's New Regulatory Finance,
6 which is the precise same document that I believe I'm
7 using here. And I didn't include the copyright page,
8 but it's says Public Utilities Reports 2006.

9 A.L.J. LEARY: Bear with me. Oh, I
10 see. So I didn't realize this S.F.P.-22 is in fact
11 the 2006 edition even though I think the testimony is
12 clear that they also relied on the 2009 version, but
13 I think you can clear this up.

14 On the record, is that acceptable to
15 counsel for D.P.S. Staff Finance Panel? It sounds
16 like they actually have relied on both versions of
17 this document.

18 THE WITNESS: And what is the question
19 again?

20 MR. MALONEY: Well, I did --

21 A.L.J. COSTELLO: So hold on one
22 second.

23 A.L.J. LEARY: Hold on, hold on.

24 MR. MALONEY: I -- I don't know that
25 there is a two -- can we go off the record?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. COSTELLO: Yeah.

3 A.L.J. LEARY: Sure.

4 (Off the record 11:48 a.m.)

5 (On the record 11:52 a.m.)

6 A.L.J. LEARY: So there was a
7 discussion off the record about some confusion that
8 we all agree has been created in the record and what
9 I'd like to do is impose on Staff Finance Panel to
10 take the lunch hour which we're not taking yet to --
11 in consultation with their counsel, clear up the
12 apparent lack of clarity about Dr. Morin's
13 publication.

14 Counsel for the company, Mr. Maloney,
15 has agreed to defer questions on that until after
16 lunch. He is going to continue with a line of
17 questioning and -- and decide when we're taking a
18 lunch break. And if he doesn't decide in the right
19 time, I -- I will decide with -- in consultation with
20 Judge Costello. So let that be a warning to you. I'm
21 just --

22 MR. MALONEY: Thank you, no pressure.

23 A.L.J. LEARY: -- being -- I'm -- I'm
24 just for the -- just for the record, I'm just having
25 a little levity here, so you want to proceed?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: Thank you, Your Honor.

3 BY MR. MALONEY: (Cont'g.)

4 Q. Panel, turn -- turning to another
5 area. I believe you testified earlier today that one
6 of the goals of a fair rate of return is that would -
7 - it would assure the utility continuing support in
8 the capital markets for both its long-term debt and
9 common equity security at terms that are reasonable
10 given the company's risk. Is that correct?

11 A. Yes.

12 Q. And it's correct isn't it that
13 the company's cost of debt is determined in a
14 significant part by the credit ratings that are
15 assigned to it by the major ratings agencies?

16 A. I would say it depends upon the
17 credibility list on the company, so to that I will
18 say yes.

19 Q. These companies are publicly
20 rated by Moody's and --

21 A. Yeah.

22 Q. -- Standard and Poor's. Is that
23 correct?

24 A. Yes.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Okay. And is it your
3 understanding that the company's current long-term
4 debt issuances are assigned an A. minus rating by
5 Standard and Poor's and an A.3 rating by Moody's?

6 A. Yes.

7 Q. Do you believe that the
8 commission should continue to offer rate support for
9 low A. credit quality for the companies and by that I
10 mean the current A. minus rating by Standard and
11 Poor's and A.3 rating by Moody's?

12 A. If you turn to page 30 of our
13 testimony --

14 Q. I'm sorry, what pages?

15 A. Thirty, 30.

16 Q. 30, yes.

17 A. Line 24. So when practical, the
18 commission has generally supported a variable that
19 provides utilities the opportunity to achieve and
20 maintain above rating within the A. range.

21 Q. And so that -- that's what the
22 commission has done. My question was does the panel
23 recommend that continue -- that that policy continue
24 to be implemented.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. If you turn to page 34, lines 7
3 to 14. It say yes, our common -- common equity ratio
4 when combined with the return on common equity
5 recommendation or on combined with either
6 quantitative metrics or qualitative factors produce
7 credit metrics that are generally consistent with the
8 performance required by Moody's and S. and P. to
9 maintain the company's current ratings of A.3 and A.
10 minus as you've shown in -- S.F.P.-10.

11 Q. Could you refer to your testimony
12 at page 45?

13 A. Ready.

14 Q. Is it correct there that you
15 refer to April 2019 credit reports from Moody's and
16 you state that Moody's identified a stable outlook
17 and therefore it's your opinion that Moody's does not
18 view KEDNY and KEDLI's creating -- credit rating is
19 likely to change over the intermediate term?

20 A. Yes, it's what it states on page
21 45, line 20 to 24 that Moody does not view KEDLI and
22 KEDNY a rate incre -- credit rating as likely to
23 change over the intermediate term. Also for April
24 2019, our submit -- our understanding of Moody's
25 opinion.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Now, I -- I've passed out three
3 documents that have been identified as -- marked for
4 identification as Exhibit 657, 658 and 659. Do you
5 have those documents?

6 THE WITNESS: Can you repeat that?

7 MR. MALONEY: 657, 658 and 659, what
8 is -- there are two -- three Moody's credit reports.
9 One has to do with the threat to revoke National
10 Grid's operating license and the other two
11 specifically have to do with Brooklyn Union and --
12 and KeySpan Gas East.

13 A.L.J. LEARY: Can we just get a
14 little bit more specific? So the first Exhibit 657
15 is a sector comment dated November 18th, 2019, which
16 as counsel stated is captioned quote, Threat to
17 revoke National Grid's operating license is credit
18 negative for utilities.

19 The other two are credit opinions both
20 dated December 30, 2019. Hearing Exhibit 658 is for
21 KEDNY Brooklyn Union Gas Company and the Hearing
22 Exhibit 659 is for KEDLI KeySpan Gas East.

23 BY MR. MALONEY: (Cont'g.)

24 Q. Are you aware of whether -- you
25 testified earlier that the outlook for the companies

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 according to Moody's was stable. Is it correct that
3 this is no longer the case?

4 A. Yes.

5 Q. And -- and these type -- these
6 are reports by Moody's. Are these the type that you
7 reviewed and -- and relied upon in -- in producing
8 your testimony? Have you seen these -- I'm sorry,
9 I'll let you answer this.

10 A. What's the question again?

11 Q. These reports from Moody's, are
12 these the type that you relied on and in some cases
13 included in preparing your testimony in this case?

14 A.L.J. LEARY: So, let's get specific.
15 Are these the type or are these the documents?

16 MR. MALONEY: Are these the type?

17 A.L.J. LEARY: Are these the type of
18 documents that you relied on?

19 MR. MALONEY: Right. They're Moody's
20 reports.

21 THE WITNESS: First of all, these
22 reports came in after the filing of our testimony.

23 BY THE WITNESS: (Cont'g.)

24 Q. Right. Yes, and I'm casting no
25 aspersions on your testimony as not being true at the

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 time that you produced it. But these reports have
3 since come in, are you familiar with these reports?

4 A. Yes.

5 Q. Yes, okay. And -- and is it fair
6 to say that the recent actions that occurred between
7 National Grid and the governor were seen as actions
8 that -- by Moody's that created a credit negative for
9 all utilities?

10 MR. FORST: Objection. I believe that
11 question is very vague. Could counsel point to
12 specific interactions between the companies and the
13 governor that they're referring to?

14 A.L.J. LEARY: And I'd also like to
15 have some reference or nexus with these particular
16 documents created so --

17 MR. MALONEY: Okay.

18 A.L.J. LEARY: -- let's take this
19 apart.

20 MR. MALONEY: Let's -- can we look at
21 that -- the document that been marked 657, sector
22 comment, November 18th, 2019.

23 THE WITNESS: And what's the question,
24 please?

25 BY MR. MALONEY: (Cont'g.)

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Would you agree that what this
3 document says is that the -- the letter that was sent
4 by Governor Andrew Cuomo to National Grid in which it
5 was -- he intends to direct the New York Public
6 Service Commission to revoke National Grid's
7 certificate to operate its downstate gas franchise
8 within 14 days unless the company presents meaningful
9 and immediate remedial actions to end its moratorium
10 on providing new natural gas hook ups to customers.

11 It was viewed as a credit negative for
12 not only National Grid, but the state's other
13 electric and gas utilities.

14 A. Yeah, it says the -- it says that
15 there is increasing risk and I said too, but I also
16 want to point out to another report. You did not
17 record this report over here, you look at S. and P.'s
18 also report which came, you know, February 18th, but
19 it was two days ago.

20 A.L.J. LEARY: I'm sorry, February
21 18th, 2020?

22 THE WITNESS: Yes, please.

23 A.L.J. LEARY: Thanks.
24
25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 THE WITNESS: I would direct you to,
3 excuse me, I don't have a copy, but we enter in the
4 record.

5 MR. MALONEY: Your Honor, I -- I don't
6 have a copy of what --

7 A.L.J. LEARY: Well, let --

8 MR. MALONEY: I -- I -- I'm not going
9 to -- think we're going to have an objection --

10 A.L.J. LEARY: Hold on, hold on.

11 MR. MALONEY: -- but I do -- we would
12 like to see the document.

13 A.L.J. LEARY: Okay. Hold on. You
14 asked this question an open this door and what the
15 panel is about to do is tell you something that I
16 agree you should have access to, but I want the panel
17 to be able to answer the question that you posed
18 about Hearing Exhibit 657, the sector comment and the
19 negative for all utilities in New York.

20 Let the panel respond to this
21 question. Again, I'm going to -- I agree with you,
22 you should have a copy of this. We'll get you a copy
23 of this after lunch, let the panel testify about
24 this.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 THE WITNESS: As I say -- it just says
3 that this is credit negative to all New York investor
4 owned utilities.

5 MR. MALONEY: I'm sorry, can I have
6 that repeated? Can you repeat that I can --

7 A.L.J. LEARY: Could you read that --
8 could you read that again?

9 MR. FORST: Your Honors, if I may
10 interject. I think there's some confusion based on
11 the colloquy between counsels and Your Honors and now
12 I believe that the panel is not aware of where we are
13 and what documents you're referring to.

14 A.L.J. LEARY: I see. Okay. I -- you
15 started to respond to Mr. Maloney's question, and I
16 want to give you the ability to provide that
17 response. Apologizing for the interruption, you are
18 referring to a February 18th, 2020 document and I --
19 we would like to hear what you were about to say.

20 THE WITNESS: The panel also reviewed
21 credit opinion that was issued on February 18th, 2020
22 which is about three days ago, by Standard and
23 Poor's and this is what it said, However, we believe
24 -- that's Page 5, we believe the company is somewhat

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 less effective at managing the political red letter
3 risk in the New York compared with its peers.

4 As largely informed by the recent
5 political focus on National Grid and continues, while
6 the company reached an agreement for the state that
7 relieves it's -- that relieves it from claims that
8 its franchise or licenses be revoked in connection
9 with the moratorium, recent events have led us to
10 believe that National Grid will not re-establish that
11 trust and relationship or in this case stakeholders
12 in the state.

13 In order to effectively advance a
14 strategy for all office New York subsidiary
15 consistent of how it has done so in the past, so we
16 reviewed that credit opinion for someone post. So I
17 would say intelligence believes the political or the
18 consequence of the moratorium is the company is
19 likely to be blamed, that's my understanding.

20 MR. MALONEY: If I could refer to pan
21 -- I'm sorry, if I could report -- refer the panel to
22 Exhibits 658 and 659 and it's correct isn't it that
23 these opinions discuss the specific circumstances of
24 Brooklyn Union in the case of 659 KEDNY and in the
25 case of 659 KEDLI. Is that correct?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. COSTELLO: Just I think you
3 said for 659 both times, so just to clarify 658 for
4 KEDNY and 659 for KEDLI.

5 MR. MALONEY: Thank you, Your Honor.
6 It's time for lunch.

7 A.L.J. LEARY: Sure you're not ready
8 for lunch?

9 MR. MALONEY: If I could just get
10 through this.

11 BY MR. MALONEY: (Cont'g.)

12 Q. Could -- could I refer the panel
13 to page 2 of each of these documents?

14 A. Okay.

15 Q. With respect to the document
16 marked 658, is it correct that one of the credit
17 challenges that Moody's believes KEDNY faces is
18 persistently weak cash flow, base metrics with
19 pressures accentuated until a new rate plan becomes
20 affected by U.S. tax reform and material and growing
21 spending on environmental remediation that may not be
22 immediately recovered through revenue and that's
23 under credit challenges.

24 A. Yes, that's what it says.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. And is it also true that as you
3 go down the page, it says factors that could lead to
4 a downgrade. The ratings could be downgraded if
5 there was -- if one -- there was a deterioration in
6 the regulatory or political environment or two, it
7 appeared unlikely that KEDNY would be able to
8 achieve, and I'm going to spell this out, cash flow
9 from operations pre-working capital over debt of high
10 teens in percentage terms on an underlying basis from
11 fiscal '21 onwards. Is that correct?

12 A. Yes.

13 Q. And similarly for KEDLI, Moody's
14 identifies a credit challenge as relatively weak cash
15 flow based metrics with pressure accentuated by U.S.
16 tax reform. Is that correct?

17 A. Yes, that's what it says.

18 Q. And once again, it says the
19 factors that could lead to a downgrade would be the
20 ratings could be downgraded if there was a
21 deterioration in the regulatory or political
22 environment and it appeared unlikely that KEDLI would
23 be able to achieve cash flow pre-working capital over
24 debt of high teens in percentage terms on an
25 underlying basis from fiscal 2021. Is that correct?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. Yes, that's what it says.

3 Q. Okay. And when we're speaking of
4 fiscal 2021, we are talking about the rate year of
5 this proceeding. Is that your understanding?

6 A. Yes, that's my understanding.

7 Q. Finally, in both the KEDNY and
8 KEDLI reports it's correct isn't it, that a material
9 strengthening of the metric, the cash flow from
10 operations pre-working capital of debt is identified
11 by Moody's and I'm reading from page 1 as, dependent
12 on a timely and favorable settlement of the rate case
13 currently ongoing, incorporating increased, operating
14 cost allowances, and timely recovery of growing
15 environmental remediation spend and its continued
16 large CAP-X program. Is that correct?

17 A. Can you point just to where you
18 are reading from?

19 Q. I'm sorry, I'm on page 1 of the
20 document, the third paragraph down under summary.

21 A. There are two document -- there
22 are two documents, which --

23 Q. Each document is -- it's in the
24 same place, both 658 and 659.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. Uh-huh. Yeah, it is what it
3 says.

4 Q. Okay. Now in the end, it matters
5 what -- in terms of whether the company is downgraded
6 or upgraded, it -- it matters what Moody's thinks and
7 what S. and P. thinks. It's not necessarily
8 depending on what any -- anybody else thinks. Is
9 that correct?

10 A. The -- the question again?

11 Q. It -- the determination of
12 whether KEDNY or KEDLI's debt is ultimately
13 downgraded, that's a rating -- that's a decision
14 that's made solely by the ratings agencies, Moody's
15 and S. and P. They don't rely on any other --
16 anybody else for that determination. Is that
17 correct?

18 MR. FORST: Objection, Your Honors. I
19 think that calls for a degree of speculation. I mean
20 I don't think the panel can testify to the extent
21 that Moody's may consider a variety of factors beyond
22 what is evidenced by what they include in their
23 credit ratings when they issue them.

24 MR. MALONEY: I -- I didn't ask them
25 what Moody's considered, I asked them whether the

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 company's debt ratings were in the end determined by
3 Moody's and S. and P., not by any third parties. In
4 other words, it doesn't matter what I think or
5 anybody else thinks, that is what they think.

6 A.L.J. LEARY: I heard more -- a
7 question that was more along the lines of what Mr.
8 Forst is talking about which asks the panel about
9 what Moody's and Standard and Poor's rely on in
10 setting their rating. So, you want to just --

11 MR. MALONEY: I withdraw the question
12 and then re -- try to -- try to restate it.

13 BY MR. MALONEY: (Cont'g.)

14 Q. Is it correct in the end that
15 it's Moody and S. and P. who determine the credit
16 ratings for the company's debt, not any other third
17 parties?

18 A. Yeah, we believe it's Moody's and
19 S. and P. who are the rating agencies.

20 Q. Yes.

21 A. They would do that.

22 Q. This is a convenient point to
23 stop for lunch if we're going to. Thank you, panel.

24 A.L.J. LEARY: We're going to go off
25 the record, but I would like to --

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 (Off the record 12:14 p.m.)

3 (On the record 1:06 p.m.)

4 A.L.J. COSTELLO: Just during the
5 break, I don't know if staff had the opportunity to
6 clarify the version of the -- that book that you're
7 referring to --

8 MR. FORST: Your Honors, we've
9 conferred with the staff panel and we've conferred
10 with counsel for the companies and the correct year
11 is 2006 as indicated in, I believe S.F.P.-17 and that
12 should clear up the record that is the correct date.

13 There is one version from 2006, not
14 2009 and we're all in agreement on that.

15 A.L.J. COSTELLO: Okay. Thank you.

16 MR. MALONEY: And -- and I will also
17 say, Your Honors, that we had a discussion with staff
18 counsel, and I think in return for their agreement
19 that they will withdraw any objections to Exhibit 655
20 and 656. I will have no further question on these
21 exhibits and we'll just allow them to come into the
22 records as long as no one else objects so --

23 MR. FORST: That is correct, Your
24 Honors. We can agree to that.

25 MR. MALONEY: So we're moving along.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: Sounds good.

3 BY MR. MALONEY: (Cont'g.)

4 Q. Good afternoon, panel.

5 A. Afternoon.

6 Q. Could you turn to your corrected
7 testimony at page 43?

8 A. Okay. There.

9 Q. Is it correct at lines 10 to 13,
10 you state that the core coverage ratio used by
11 Moody's to assess the financial health of regulated
12 electric and gas utility companies is cash flow from
13 operation pre-working capital to debt, what we were
14 talking about earlier C.F.L. pre W.C. to debt. Is
15 that correct?

16 A. Yeah, that's the core metric.

17 Q. Yes. And now, I'd like you to
18 refer to the document that's been marked for
19 identification as Exhibit 645, which is the staff
20 response to N.G.-58. Do you have that in front of
21 you?

22 A. Ready. Ready.

23 Q. Okay. Now, it's correct there
24 that you were asked to confirm whether the -- some
25 information presented by the companies reflected an

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 appropriate calculation of the cash flow from
3 operations pre-working capital over debt metric based
4 on staff's revenue requirement in this case?

5 A. Yes.

6 Q. And your response was that the
7 information presented in the request was not correct
8 and you presented an alternative version --
9 alternative versions of the calculations. Is that
10 correct?

11 A. Yes.

12 Q. And those are set forth on -- on
13 page 3 of the I.R. response or the exhibit. Is that
14 correct?

15 A. Yes.

16 Q. Now, the difference between the
17 calculation at the top of the page and the one at the
18 bottom of the page, is that the presentation excludes
19 cash flow impacts associated with net pension and
20 OPEB accruals and certain cash flow impacts
21 associated with uncollectable amounts. Is that
22 correct?

23 Let me just try to restate that. The
24 one at the bottom excludes it and -- I'm sorry, the

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 one at the top excludes it, the one at the bottom
3 includes it. Is that correct?

4 A. Yes.

5 Q. Okay. Now, is -- in the staff
6 revenue requirement, is there an amount associated
7 with pension and OPEB expense?

8 A. Staff does not have in front of
9 us now what we included in the cash flow analysis is
10 what the company provided in one of its exhib --
11 exhibits, which we refer to on bullet number D on
12 page 2.

13 So we made references to R.R.P.7 C.U.
14 corrections and update and then you also mentioned
15 uncollectable accounts expense also R.R.P. with the
16 companies' 11 C.U. So this is where we pull
17 information from.

18 Q. Right. And -- and that's
19 reflected in the analysis of the metric that's
20 presented at the bottom of page 3, correct? The data
21 that was provided in that response?

22 A. That's right. The company's
23 exhibit is what is reflected in the -- in page 3.

24 Q. Right. Now, in this question
25 we're asking you to calculate the metric based on the

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 staff revenue requirement and I know that you said
3 you use data that the companies provided, but with
4 respect to the amount reflected in the staff revenue
5 requirement, would you agree that there is an amount
6 for pension and OPEB expense?

7 A. We -- the Staff Finance Panel run
8 these numbers with the accounting panel, and they
9 confirm these are the numbers that they -- they
10 confirm these numbers.

11 Q. So with respect to pension and
12 OPEB expense, is it the panel's understanding that
13 the amount that's reflected in the revenue
14 requirement within the staff revenue requirement is
15 recovered by the company and in accordance with the
16 commission policy statement on pensions and OPEBs is
17 then used to fund the pension and OPEB trusts that
18 the company manages?

19 Or that the company has created for
20 the purpose of administrating its pension and OPEB
21 funds?

22 A. The staff finance panel believes
23 that to the extent the company's cash contributions
24 and then expands the difference that should be
25 reflected in the cash flow metrics and that is

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 consistent on the company's financial statement 2009
3 to 2018.

4 You also look at the company's
5 P.S.N.R. report in which they do reflect those, what
6 do you call net pension and OPEB accruals or
7 deferrals.

8 Q. But wouldn't the staff expect
9 that the company would comply with the policy
10 statement by taking in the amount of expense and
11 rates and using it to fund the trust which is -- now
12 there are possibilities where that doesn't happen,
13 but is that in the forecast?

14 A. The staff panel believes that
15 whatever is the contribution and whatever the expense
16 which is -- which is -- the pension expense which is
17 this important as S.F.E.S. -- I've got the acronym,
18 what's its name.

19 The FASB which is the accountant
20 methodology of calculating pension expense. If there
21 is any variance between what a company contributes,
22 that variance is always captured in the cash flow and
23 the company also in response to I.R.-590 also
24 provided projection of the company's pension and --
25 net pension and OPEBs deferrals.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 So you look at that I.R. response and
3 you also look at the company's history and also look
4 at the P.S.N.R report and we believe that it
5 shouldn't be zero. So what we did was that, okay,
6 assuming, no one is excluded, those two items are
7 excluded, what would be the cash flow metric or the
8 core metric. And if you include it what would be the
9 cash flow metrics. So we look at the two scenarios.

10 Q. So -- so it's fair to say you
11 looked at it both ways --

12 A. That's right.

13 Q. -- based on an understanding that
14 the company might not contribute dollar for dollar
15 what it collects in rates.

16 A. So, look at a two extremes,
17 whatever the case may be.

18 Q. And -- and now with respect on
19 collectables, is it fair to say that you did
20 something of the same thing. It's correct isn't it
21 that the staff revenue requirement would have an
22 amount in rates that would be equal to the amount of
23 uncollectable expense that the staff would expect the
24 company to incur during the rate year?

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. It -- again, the same idea that
3 we talk about pension and OPEBs, so we look at a two
4 way -- it's two scenarios with and without and the
5 company's cash flow statement based upon the P.S.N.R.
6 report and based upon their own financial statement
7 and based also upon the 590 response, where they
8 capture this kind of -- what do we call it numbers
9 for the two items, which is the net pension and OPEBs
10 deferral and accountant -- what you call,
11 uncollectables.

12 Q. Could -- I want to ask you about
13 one more line in this which is the differed tax
14 amount. Now, in the upper amount you show -- in the
15 upper portion of page 3 of N.G., you show a
16 \$111,376,000 of deferred taxes for KEDNY and
17 \$34,280,000 for KEDLI. Is that correct?

18 A. Yes.

19 Q. Is it your understanding that
20 KEDNY and KEDLI are in a net operating loss position
21 with respect to income taxes?

22 A. This one, we also run the one of
23 the accountant folks and they also confirmed these
24 numbers.

25 Q. The accounting, I'm sorry, who?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. Staff accounting panel.

3 Q. Well --

4 A. So these numbers is coming from
5 the company's -- the deferred tax over here is coming
6 from the company's file and which is -- I -- which
7 the company responded in D.P.S., I think 35. We said
8 in bullet number 2, plan number A -- number A, A as
9 in Apple, page 2 of 6 -- 645.

10 We said that the company responds they
11 project deferred income taxes of about 111 and 34
12 million for KEDLI, this in response to D.P.S. 35.

13 Q. But those were amounts based on
14 the company's filings in this case. Isn't that
15 correct?

16 A. Yeah, this was what the company
17 provide in response to this I.R., what is the
18 current, not accumulated deferred income taxes.

19 Q. With respect to the staff revenue
20 requirement, wouldn't it be the case that the amount
21 of cash that the company would take in with respect
22 to taxes would be equal to the amount of income tax
23 expense built into the staff revenue requirement?

24 A. As we said earlier, we run this
25 one with the accountant panel because the accountant

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 -- the staff accounting panel, they checked these
3 numbers for us.

4 We produce a special -- we pulled this
5 number from our accounting staff and they confirmed
6 this is the right number.

7 Q. Would you agree that the only
8 cash flow from operations that the company can take
9 in that it -- that affects the F.F.O metric, if you
10 will, is the actual cash the company takes in or
11 recovers?

12 A. Yeah, we're looking at the cash
13 flows and this is -- we are looking at actual cash
14 and this is what the company is projecting for the
15 current deferred but not for the accommodated
16 deferred income tax. What is the cash flow to the
17 company?

18 Q. But if -- and I'm looking at the
19 staff revenue requirement for the Brooklyn Union Gas
20 Company and I can pass this out. This is Exhibit
21 515, which is the corrected Exhibit S.R.R.P.-6 that
22 was posted in D.M.M. on February 13th, 2020.

23 There is no header on it, but my
24 understanding is this is Exhibit 515. And that's

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 because I printed it off. That's why -- I think that
3 was it.

4 A. Yeah, ready.

5 Q. Yeah, so if you look at that
6 exhibit, it shows total income taxes in the revenue
7 requirement of \$54,313,000. Is that correct? And
8 that's near bottom of the page.

9 A. Yes, we see that.

10 Q. Is there any other amount of cash
11 in the revenue requirement which is listed and would
12 be everything below operating revenues that -- that
13 is associated with income taxes or deferred income
14 taxes?

15 A. Can you rephrase your question?

16 Q. Yes. Other than the \$54,000,000
17 that I identified, is there any other recovery amount
18 reflected in that revenue requirement that's
19 associated with income taxes such that it would
20 become deferred taxes?

21 A. We see here two total income
22 taxes of \$54 million for the rate year and then 2021.
23 That's what we see over here, \$54,000,313. And of
24 course --

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Other than that there is no other
3 amount for taxes that you're aware of in this revenue
4 requirement, is --

5 A. I see --

6 Q. -- or income taxes I should say.

7 A. Yeah, because the taxes would
8 have done through revenue as well.

9 Q. There were other taxes --

10 A. That's right.

11 Q. -- I see, but the answer on
12 income taxes is no or deferred income taxes is no.

13 A. Yeah, I don't see anything
14 described as income -- deferred incomes taxes.

15 Q. Okay. Thank you. One final
16 question on -- on credit metrics and it's -- if the
17 commission decides that the -- the staff revenue
18 requirement creates a likelihood that KEDNY and KEDLI
19 would be downgraded, do you recommend that the
20 commission provide any change -- do you recommend any
21 changes to your return on equity or capital structure
22 to offer additional rate support for KEDNY and
23 KEDLI's current credit ratings?

24 A. First of all, we believe if the
25 companies are downgraded, it won't be two notches at

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 least, it may be one notch downgrade and if it's one
3 notch downgrade, our proxy group is also triple B
4 plus.

5 What that means -- let me try rephrase
6 it again. The company is now rated A.3 A. minus and
7 if it's downgraded, we believe it will be triple B.
8 plus. If it's triple -- triple B plus, our proxy
9 group average credit rating is B plus, so we don't
10 believe that it -- it's -- it's necessary to
11 recommend to the commission to increase the company's
12 return on common equity as a result of a downgrade
13 because our proxy group at this point is triple B
14 plus and the company's A minus.

15 So on that rating basis the proxy
16 group is relatively riskier than the company.

17 Q. Okay. Just one follow-up, I mean
18 if the company is downgraded it's not a given is it,
19 that would be one notch downgrade?

20 A. Please repeat your question.

21 Q. If the company is downgraded,
22 would you agree it's not a given that that would be a
23 one notch downgrade?

24 A. (Duah) -- the company's rating
25 history. I didn't see the 2 notch downgrade just at

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 once. What I see 1 notch downgrade or upgrade, I
3 didn't see 2 notch downgrade or upgrade at a point in
4 time. So I don't expect that Moody's or S. and P.
5 downgraded companies two notches right away.

6 Q. Okay. Could you -- turn to page
7 97 of your testimony. Now, this is a great subject
8 for the end of the cross examination which is, it's
9 correct that at line 11 you expressed a concern about
10 Ms. Bulkley, what you term her inappropriate use of
11 the extended version of the internal rate of return
12 X.I.R.R. in her D.C.F. analyses, is that correct?

13 A. Yes.

14 Q. And for the record, X.I.R.R. and
15 I.R.R. are two excel functions, as I understand it,
16 that allow you to reflect differing cash flows in a
17 model?

18 A. Yes.

19 Q. And it's correct, isn't it, that
20 all the companies in your proxy group paid dividends
21 quarterly, is that correct?

22 A. They all paid dividend of a
23 quarter, so that is yes.

24 Q. Yes. And would you agree that an
25 investor would value for example, payments of 25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 cents that were received on March 31, June 30,
3 September 30 and December 31 differently than an
4 investor would value a payment of a dollar on
5 December 31st?

6 A. If an investor -- if an investor
7 is -- had the option of receiving \$25 or 25 cents per
8 quarter which amounts to \$100, versus, another
9 investor given the option to receive \$100 at the
10 year-end, just one-time payment, I will say that one
11 has a quarterly dividend, -- will get the \$100.

12 But then, his required return on
13 common equity would be lower because the company that
14 pays \$25 in first quarter has no retained earnings,
15 reduce the company's retained earnings. And when the
16 company's return earnings reduced -- it's re -- is
17 reduced, it reduces the company's sustainable growth
18 rate. And when the company's sustainable growth rate
19 is reduced, the cost of equity or required rate of
20 return is also reduced.

21 So the company that has the 2 options
22 would be, I would say would be indifferent. And this
23 argument was also brought up sometime back in case
24 08-00539 when -- in a Con Edison's case. 1.2 -- 125
25 of that order, the commission mentioned the company

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 was -- given that the use of staff approach was the -
3 - which is this annual dividend growth -- annual
4 dividend D.C.F. ignores the entire value of money.
5 And the commission didn't really buy into that
6 argument.

7 In fact, on page 126, the commission
8 said, we are not adopting a judge's recommendation,
9 because the judge recommended that should be the
10 case. But the commission said that the judge's
11 recommendation that our D.C.F. is toward a further
12 payment of dividends quarterly rather than early on
13 the end of the -- on the end of each year.

14 In the excel tend to be achieved on
15 account of quarterly dividend, re-investment would be
16 achieved --

17 A.L.J. LEARY: Excuse me -- excuse me.
18 You need to speak much more slowly.

19 THE WITNESS: Thank you.

20 A.L.J. LEARY: So I think you're
21 quoting some -- something that you're reading, is
22 that right?

23 THE WITNESS: Yes.

24

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: Would you just start
3 back at the beginning of that quote if it's not too
4 long ago and just speak more slowly?

5 THE WITNESS: Thank you. On page 125
6 of the order, which is case 08-E as in echo -0539.
7 The commission said, and I quote, The company replied
8 that the insistence on the use of an annual dividend
9 were half as improperly ignored the time value of
10 money.

11 And on page 126, the commission
12 continued, We are not adopting the judge's
13 recommendation that our D.C.F. estimates reflect the
14 payment of dividends quarterly rather than annually
15 at the end of each year. And the tend to be achieved
16 on account of quarterly dividend, re-investment would
17 be achieved by those who actually invest their the
18 dividends in the company stock. And any additional
19 allowance will be duplicative for those who actually
20 reinvest dividends un -- unnecessarily and generous
21 to those who do not. Accordingly, the company
22 proposed upward adjustment is rejected, unquote.

23 BY MR. MALONEY: (Cont'g.)

24 Q. So that was an interesting
25 reading of the commission order and I wouldn't

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: Yes.

3 A.L.J. LEARY: --in your expertise?

4 It -- I agree it's speculative but I think the com --
5 the panel's position on this would be in -- would be
6 informative for the record.

7 MR. FORST: So I would just
8 distinguish in terms of counsel's restatement of the
9 question. I think the original question spoke about
10 what would investor value more in terms of quarterly
11 dividends versus an annual dividend. And now the
12 restatement of the question or at least as it's being
13 discussed currently relates to what is the preferred
14 cash flow. And I'm not sure there's really a --

15 A.L.J. LEARY: I didn't hear cash
16 flow, I heard rational investor. This panel's
17 opinion about which of the 2 scenarios Mr. Maloney
18 laid out would be, in their expertise and their
19 opinion, preferable to a rational investor? Which of
20 those 2 scenarios which is 25 cents -- or \$25 a
21 quarter or a \$100 at the close of the year? So the
22 panel can answer.

23 THE WITNESS: Can you restate your
24 question?

25 BY MR. MALONEY: (Cont'g.)

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. From the standpoint -- does the
3 panel have an opinion on whether from the standpoint
4 of a hypothetical rational investor, would the
5 investor prefer to get 4 payments of \$25 equally
6 spaced through the year or 1 payment of \$100 at the
7 end of the year?

8 A. The panel believes the rational
9 investor would be indifferent.

10 Q. Okay. It's correct, isn't it,
11 that with respect to the I.R.R. and X.I.R.R. model,
12 that those models can be operated in a way that
13 achieves the precise same results?

14 A. The panel believes it can be
15 managed to achieve the same results provided there is
16 no mismatch in the cash flows and the timing of the
17 cash flows.

18 Q. Is it your testimony that Ms.
19 Bulkley's -- the timing of the cash flows that she
20 reflected in her model was inconsistent with the
21 timing of the cash flows of her proxy group?

22 A. Do you have any specific
23 reference for us, in our testimony?

24

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. No. I -- I was asking you if you
3 believed -- you -- you analyzed Ms. Bulkley's use of
4 the X.I.R.R. function didn't you?

5 A. Yes, I did review it.

6 Q. Okay. And is it your testimony
7 that she entered the cash flow payments into the
8 excel spreadsheet that provides this function in a
9 manner that's inconsistent with the cash flows of the
10 companies that she was evaluating in her proxy group?
11 Is it -- is that your understanding?

12 A. Yeah. I think there's a mismatch
13 there. I see some mismatch because the company stock
14 price was -- was taken at the end of February or
15 specifically February 28th, 2019. The annualized
16 dividend growth and the annualized dividend -- put it
17 in this way, they were annualized, they were not
18 semi-annual. And then when she was forecasting the
19 first dividend payment was based upon 6 months
20 period. Meanwhile, the dividend was annualized, so I
21 see a mismatch there..

22 Q. Thank you, panel. I have nothing
23 further.

24 A.L.J. COSTELLO: Do you want to take
25 a few minutes?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. FORST: If we could, Your Honors,
3 that would be great.

4 A.L.J. COSTELLO: 10 minutes?

5 MR. FORST: I think that'd be
6 appropriate. Thank you.

7 A.L.J. COSTELLO: Okay. Go off the
8 record.

9 (Off the record, 1:40 p.m.)

10 (On the record 1:56 p.m.)

11 THE REPORTER: On the record.

12 A.L.J. COSTELLO: Do you have any re-
13 direct?

14 MR. FORST: Are we back on the record,
15 Your Honors?

16 A.L.J. COSTELLO: We are back on the
17 record.

18 MR. FORST: Yes. We do have a few
19 questions for re-direct.

20 A.L.J. COSTELLO: Okay. Thank you.
21 Proceed.

22 RE-DIRECT EXAMINATION

23 BY MR. FORST:

24 Q. Panel, there's a document being
25 passed around titled response to N.G.59. It's a 1-

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 page response document. It was issued on November
3 12th, 2019 and it was responded to on November 27th,
4 2019. Do you have that document before you?

5 A. (Duah) Yes.

6 Q. And are you familiar with this
7 document?

8 A. Yes.

9 Q. And would you say that the
10 content of the document is true and correct to the
11 best of your knowledge?

12 A. Yes.

13 MR. FORST: So I would ask that this
14 document be given a pre-marked exhibit number.

15 A.L.J. COSTELLO: It'll be marked as
16 Exhibit 660.

17 BY MR. FORST: (Cont'g.)

18 Q. Earlier panel, you were asked a
19 number of questions regarding the C.L.C.P.A., known
20 as the Climate Leadership and Community Protection
21 Act, is that correct?

22 A. Yes.

23 Q. And in response to those
24 questions you referred to the response to N.G.59, is
25 that correct?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. Yes.

3 Q. And based on the document you
4 have before you, were your answers to those questions
5 consistent with the response provided in this
6 document?

7 A. Yes.

8 Q. Excellent, thank you. We're
9 passing around another document. Panel, the document
10 being passed around is a 5-page document containing a
11 number of figures and tables. Could you -- do you
12 have that document before you?

13 A. Yes.

14 Q. And could you please explain what
15 is included in this document?

16 A. Yes.

17 Q. If I could just direct the
18 panel's attention to the document that my co-counsel
19 Raquel Parks just passed out. If you could just
20 refer to that document and the question asked was,
21 could you explain what's contained in that document?

22 A. Staff panel D.C.F. cost of equity
23 calculations, electric and gas, 33 companies.

24 Q. And is this document similar to -
25 - or an update to the document that was included with

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 -- and I'm going to find the hearing exhibit number
3 here right away. Pardon me, Your Honors, we're just
4 looking for the hearing exhibit number. That would
5 be Hearing Exhibit 649. So is the document before
6 you panel, an update to the attachment to N.G.64
7 otherwise known as Hearing Exhibit 649?

8 A. Yes.

9 A.L.J. LEARY: This is a different
10 document than 649, is that correct?

11 MR. FORST: That's correct.

12 A.L.J. LEARY: So we need to give this
13 a separate hearing exhibit number.

14 MR. FORST: Correct. You've predicted
15 my exact next question.

16 A.L.J. LEARY: That's where you were
17 going, I just --

18 MR. FORST: Correct.

19 A.L.J. LEARY: -- wanted to write this
20 down correctly so --

21 MR. MALONEY: Your Honor, I'm going to
22 object to the admission of this document or any
23 further direct on it. This is a whole new analysis
24 being propounded on -- being dropped on the company
25 in re-direct. This -- this includes now a 33 member

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 proxy group that the staff never supported before.
3 They -- they did give us some information on that,
4 and we did ask some questions about it. But that it
5 -- that wasn't their proposal. That was something
6 they gave to us at discovery. Now, we're seeing a
7 new proposal?

8 MR. FORST: And the company has opened
9 the door for this type --

10 MR. MALONEY: We didn't open the door
11 for this.

12 MR. FORST: -- of exhibit when you
13 asked about the 5 additional gas proxy groups which
14 this contains. In addition, this includes additional
15 time, you know, time varying information which is
16 extending off of the exact document that the
17 company's introduced earlier today.

18 A.L.J. LEARY: Okay. Both points
19 well-taken. And I think what we want to do is to
20 provide the company -- we're not going to keep this
21 out, as it is an update to a discovery response. And
22 those updates can come in at any time. That's the
23 way I view this document. I'd like to know when it
24 was prepared, what's the date of prep -- when it was
25 prepared?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. FORST: I mean, I -- I don't know
3 exactly when it was prepared. It was prepared for
4 this hearing though.

5 A.L.J. LEARY: Okay. The company
6 needs to have an opportunity to digest this, consult
7 with their own experts on it. And unfortunately,
8 that could involve having the Finance Panel return.
9 Judge Costello and I don't want to force the company
10 to have to look at this, I believe, 5-page document
11 with lots and lots of companies and numbers on it and
12 just be reactive at this point.

13 Again, your -- your objection to this
14 is noted. Again, it goes to whether this gets
15 admitted. We're going to allow the testimony to be
16 elicited based on this document that has nothing to
17 do with whether this document ultimately comes into
18 the record, that's for another day. But we are
19 giving you the opportunity, to take a look at it and
20 if you think you have to recall the Finance Panel,
21 I'm just telling D.P.S. staff, the Finance Panel's
22 coming back.

23 MR. FORST: We understand that, Your
24 Honors.

25 A.L.J. LEARY: Okay?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: Your Honor, we're going
3 to need the opportunity to do some discovery on it
4 because there's a whole set of new assumptions in
5 here. There's -- there's --

6 A.L.J. LEARY: We have not closed
7 discovery.

8 MR. MALONEY: Okay.

9 A.L.J. LEARY: If you think you need
10 discovery, you can serve discovery.

11 MR. MALONEY: And I just went through
12 a 4-hour cross examination on a set of numbers, that
13 now the numbers have changed entirely. And -- and
14 that includes the metrics, that includes things that
15 -- that I think the commission will want to make sure
16 it has an accurate record on.

17 A.L.J. LEARY: Did the proxy group
18 D.C.F. R.O.E. change? It -- it looks to me like it
19 might be the same, is that right? Is that number the
20 -- the same -- basically the same number?

21 MR. FORST: So if you're looking
22 between the Exhibit 649 and what's been -- what's
23 just been provided to the panel, there is a slight
24 change.

25 MR. MALONEY: A slight change --

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: What --

3 MR. MALONEY: -- it went from --

4 A.L.J. LEARY: Hold on.

5 MR. MALONEY: -- 2 to 8% in the --

6 A.L.J. LEARY: I'm sorry.

7 MR. MALONEY: Okay.

8 A.L.J. LEARY: Slight change meaning
9 what, Mr. Forst?

10 MR. FORST: So that would be from 8 2
11 to 8.0.

12 MR. MALONEY: That -- that's not a
13 slight change, that's -- I believe I could calculate
14 it several million dollars.

15 A.L.J. COSTELLO: Just so that we have
16 something to refer to. And again, it's not being
17 admitted at this point in time, but we're going to
18 mark it for identification as Exhibit 661.

19 A.L.J. LEARY: Unfortunately, I -- I
20 hope that it's not another 4 hours of cross because I
21 don't remember you talking for 4 hours about a
22 document like this although you would know better
23 than I what you may have to do. The -- again, I'm
24 going to allow the testimony to be elicited but the
25 question of whether this comes in and potentially any

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 testimony that is derived from this document, we're
3 going to defer for another day, but we want to hear
4 on the record what the panel has to say about it.

5 If you want to ask questions today,
6 you're welcome to do that, but I'm going to give you
7 the opportunity to go discuss with others, your
8 experts and counsel and come back and advise Judge
9 Costello and I if you need to have the Finance Panel
10 come back and for however long you estimate their
11 return being necessary, okay?

12 MR. DECICCO: Do -- Phil Decicco. Did
13 we get an answer as to when this document was
14 prepared, just so we know?

15 THE WITNESS: (Duah) If you look on
16 page 3 of the Exhibit on end of December 2019.

17 MR. DECICCO: So -- so just for the
18 record, this was prepared over a month ago and it's
19 trying to --

20 MR. FORST: No, no, no. It includes
21 information from December 2019 which is, I believe,
22 the latest available. It was prepared in advance for
23 this hearing.

24

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: So was it prepared at
3 some point in the last, you know, month or so, a few
4 weeks?

5 MR. FORST: I would say probably a
6 week or --

7 A.L.J. LEARY: Week or so?

8 MR. FORST: Yes.

9 A.L.J. LEARY: Okay. I do --

10 MR. MALONEY: Your Honor, I'll be
11 honest with you, you know we -- we sent the Moody's
12 reports that we wanted -- we sent it in discovery
13 before the hearing. This could've been sent to us
14 before the hearing and we would have had the
15 opportunity to cross it.

16 A.L.J. LEARY: Certainly, that is --

17 MR. MALONEY: So I -- I'll restate my
18 objection's note, I understand.

19 A.L.J. LEARY: Well, the -- the reason
20 I rolled over there to talk to Judge Costello was for
21 that very reason. These -- these are the kind of
22 things that, you know -- that got you, not intended,
23 I know that, but these are the kinds of things that
24 we have to look at in terms of the prejudice to the
25 other parties.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Again, I think that prejudice is
3 ameliorated if we provide the company with an
4 adequate opportunity to review it and bring the
5 Finance Panel back to discuss it. And that is what
6 we think will best serve, you know, everyone's
7 interest since this is a belated -- belatedly
8 submitted document.

9 So let's go forward. And again, we're
10 not -- we're not ruling about anything right now in
11 terms of this -- the admission of this or the
12 testimony associated with it. But I want to hear
13 from the company further, maybe Monday of next week
14 to advise all the parties about whether you believe
15 that further questioning is necessary.

16 At the end of the hearing, I think
17 we're going to discuss -- before the end of the
18 hearing when we discuss the admission of all of
19 these, we don't a big fight at that time. We want to
20 resolve this hopefully on Monday or Tuesday, if you
21 can take a look at this information between now and
22 then.

23 And again, you're welcome to continue
24 today if you feel that that's in your best interest,
25 Mr. Maloney.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: I'd like to reserve for
3 a later time at this point.

4 A.L.J. LEARY: Sounds good. Okay, go
5 ahead.

6 BY MR. FORST: (Cont'g.)

7 Q. Panel, the document before you
8 includes an additional set of information for
9 October, November and December 2019, is that correct?

10 A. (Duah) Yes.

11 Q. And it also includes a number of
12 gas only utilities, is that correct?

13 A. Yes.

14 Q. And are these the same 5 gas
15 utilities that were included in the analysis provided
16 in response to N.G.64?

17 A. Yes.

18 Q. And what is the impact of the
19 inclusion of those additional months as well as the
20 gas utilities on the overall analysis provided in
21 this document?

22 A. By including the 5 gas companies
23 brings the recommended R.O.E. to 8-- 8%.

24 Q. Okay. Thank you. We're going to
25 move on.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: Are we going to get a
3 whole new revenue requirement presentation as well
4 with bill impacts et cetera associated with this
5 return? I -- I'd also like to make sure all the
6 discovery is updated, that -- that went to these
7 metric numbers et cetera. I realized I can ask that,
8 but if I have to get back to my office and ask you it
9 would -- it will be Monday.

10 MR. FORST: So I think the -- the
11 issue here is that the company introduced a response
12 to an -- a res -- a request that was issued in
13 November that included the same specific information
14 here.

15 A.L.J. LEARY: Be specific about that
16 request --

17 MR. FORST: Okay.

18 A.L.J. LEARY: -- what Hearing Exhibit
19 was that?

20 MR. FORST: That'd be Hearing Exhibit
21 649. So the company introduced that today during
22 these proceedings which included a table of -- the
23 exact same table which we are now providing with
24 additional months of data for October, November and
25 December.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. DECICCO: And -- and it's
3 counsel's position that you conveniently had this
4 with an exhibit number blank ready to be submitted
5 only because we introduced that -- that topic in --
6 in cross examination.

7 A.L.J. LEARY: So let me do this, Mr.
8 Decicco, because I'm going to ans -- ask the
9 questions here. I don't want to get into some kind
10 of thing between the company and staff. But I would
11 like to know how come this wasn't provided to the
12 companies and the parties before this moment in time?

13 MR. GOODRICH: In assessing our risk -

14 -

15 A.L.J. LEARY: Your mic's not on, I
16 don't think.

17 MR. GOODRICH: Yes, it is.

18 A.L.J. LEARY: Oh, it is?

19 MR. GOODRICH: In assessing our risks
20 on cross examination, one of the things that we
21 assess was what if the company asks us, asks our
22 panel about the exclusion of gas companies from the -
23 - the proxy group. And one of the things that we
24 wanted to have available if we -- if that question
25 came up on direct, was an ability to say what the

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 impacts would be of including the gas companies in
3 the proxy group.

4 So that is why in assessing what would
5 happen today at the hearing, we did prepare an
6 exhibit to be able to explain what the impact of
7 including the gas companies in our proxy group would
8 be.

9 A.L.J. LEARY: So this really wasn't
10 as I initially noted, an update to discovery. This
11 was actually in anticipation of the questioning that
12 the companies would present to this panel?

13 MR. GOODRICH: But it is the same
14 exact information that was provided in response to
15 the discovery request --

16 MR. MALONEY: No, it's not.

17 MR. GOODRICH: -- up -- updated for
18 subsequent months.

19 A.L.J. LEARY: So --

20 A.L.J. COSTELLO: What -- so would
21 that have been responsive to discovery request by the
22 company? If the --

23 MR. GOODRICH: If the company had
24 asked for a different time period, yes.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: Yes, the company's
3 discovery was actually directed at the testimony that
4 was filed in the case as opposed to anticipating that
5 we might see a whole new set of numbers 4 months down
6 the road. It is very difficult to ask discovery on
7 something that doesn't exist.

8 A.L.J. LEARY: So this is Hearing
9 Exhibit 649.

10 A.L.J. COSTELLO: Because this -- this
11 -- I mean, I understand it goes to information that
12 was brought up but it -- it's -- it is like new
13 direct testimony. So I mean we do have to give them
14 an opportunity. They have asked whether information
15 -- discovery-type information can be provided to
16 them. Do you -- do you have an answer to that?
17 Would it be something that you can do relatively
18 quickly if that's -- I just want to hear your --

19 MR. FORST: Yes, if the company can
20 issue its discovery request, we can be, you know,
21 responsive as we've always been.

22 MR. MALONEY: What -- what about
23 updating the revenue requirement and the bill impacts
24 et cetera?

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: Yeah, I'm -- I am
3 interested in that question. Is that required here
4 or --

5 MR. FORST: So as we stated earlier,
6 in preparation for questions we believed we would
7 receive today at the hearing which include whether we
8 wouldn't -- had provided analysis of the inclusion of
9 gas utilities, we updated that analysis for the most
10 time relevant information that we had. That does not
11 mean that we are trying to supplement or replace the
12 testimony that is already currently on the record.
13 We are simply providing an illustrative --
14 illustrative example of a response to that very
15 question.

16 A.L.J. LEARY: So I take that as a no
17 in response to your question, Mr. Maloney, that the
18 revenue requirement --

19 MR. MALONEY: Is it the staff's
20 position that R.O.E. should be 8% or 8.2%?

21 A.L.J. LEARY: Well, I think that
22 that's an excellent question that you can ask on re-
23 cross after re-direct is completed. And I think
24 that, you know, that --

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: Well -- well, that goes
3 to whether it's the revenue requirement. I -- I
4 think we should be able to deal with, are they
5 putting in a new position or are they simply
6 providing additional information which is nice but
7 pertains to a period that someone might argue is
8 relevant or not relevant.

9 MR. FORST: As -- as I stated before,
10 we are not providing an entire new case here on re --
11 on re-direct. We are simply answering and providing
12 information that is responsive to a question that the
13 panel received during its cross examination.

14 A.L.J. LEARY: Okay. Let's go ahead
15 with re-direct. I'm -- we'll give you an opportunity
16 to pursue re-cross and again, that's without
17 prejudice to you advising Judge Costello and I that
18 you need additional time and you need the panel to
19 return.

20 MR. MALONEY: Thank you, Your Honor.

21 A.L.J. LEARY: But I want a
22 justification if they're coming back, in writing.
23 And you know, some -- some -- yeah, or we can put it
24 on the record Monday or Tuesday whenever you're
25 ready.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: Thank you.

3 A.L.J. LEARY: Okay.

4 BY MR. FORST: (Cont'g.)

5 Q. Panel, a doc -- 2 documents were
6 just passed around. They are both 13 pages in
7 length. One is titled S&P Global Ratings
8 RatingsDirect, the Brooklyn Union Gas Company. The
9 second document is S. and P. Global Ratings
10 RatingsDirect, KeySpan Gas East Corporation. Do you
11 have these 2 documents before you?

12 A. (Duah) Yes.

13 Q. And are you familiar with these -
14 - no. Okay.

15 A.L.J. COSTELLO: Yeah. We can mark
16 the first one for the Brooklyn Union Gas Company as
17 Exhibit 662. And the document for KeySpan Gas East
18 Corporation, 663.

19 MR. FORST: Thank you, Your Honors.

20 BY MR. FORST: (Cont'g.)

21 Q. Did you refer to these documents
22 earlier today?

23 A. Yes.

24

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. And are these copies before you
3 true and accurate copies of the reports you referred
4 to earlier?

5 A. Yes.

6 MR. FORST: Just bear with me 1
7 second, Your Honors, I appreciate the time.

8 BY MR. FORST: (Cont'g.)

9 Q. Earlier panel, you were asked if
10 -- whether Value Line information including the
11 source of the inputs to that Value Line information -
12 - strike that.

13 Panel, earlier today you were asked if
14 various inputs to the Value Line information that you
15 rely upon, such as the market risk premium was also
16 sourced from Value Line, could you please clarify
17 your answer to that question?

18 A. Our market risk premium was not
19 based on Value Line, it was based on Merrill Lynch
20 data and then treasury rates.

21 MR. FORST: Okay. We have no further
22 questions, Your Honors.

23 A.L.J. COSTELLO: Mr. Maloney, other
24 than with respect to Exhibit 661, do you have any
25 further re-cross?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: If you'd bear with me.

3 A.L.J. COSTELLO: Sure.

4 MR. MALONEY: Your Honor, can I ask
5 some limited cross at this time on Exhibit 661?

6 A.L.J. LEARY: I told you you're --
7 it's without prejudice to further review outside of
8 this hearing and I'm looking forward to hearing from
9 you next week about what you need further. So you
10 can ask whatever you want today within the bounds of
11 relevancy et cetera --

12 A.L.J. COSTELLO: Yes. And my re --

13 A.L.J. LEARY: -- it it's without
14 prejudice to you --

15 A.L.J. COSTELLO: And my reference --

16 A.L.J. LEARY: -- coming back.

17 A.L.J. COSTELLO: I'm sorry, I didn't
18 mean to interrupt. But my reference before was
19 except for 661, that was because my understanding for
20 what you said was you wanted to reserve on that, but
21 you can certainly ask que -- questions at this time.

22 MR. MALONEY: Thank you, Your Honor.

23 RE-CROSS EXAMINATION

24 BY MR. MALONEY:

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Good afternoon panel, Ken Maloney
3 for the companies. Earlier today, you submitted
4 sworn testimony that said we believe that the most
5 suitable proxy group would be derived from a universe
6 of 37 holding companies deemed by Value Line to be
7 electric utilities, is that correct?

8 A. (Duah) Can you repeat you
9 question?

10 Q. I -- I think if you can refer to
11 page 54 of your testimony at lines 3 to 6, you'll
12 know what I just asked you.

13 A. And the question again?

14 Q. You testified -- and you, I
15 believe, testified and swore today that it was true
16 that you believe the most suitable proxy group would
17 be derived from a universe of 37 holding companies
18 deemed by Value Line to be electric utilities, is
19 that correct?

20 A. Yes.

21 Q. And are you now saying that 33
22 companies including 5 gas companies is the most
23 suitable proxy group?

24 MR. GOODRICH: May I? One -- one
25 point your -- one -- one simple point. I think -- I

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 thought I understood from the testimony we had in the
3 room earlier was that while the universe -- Value
4 Line universe might have been 37 companies that the
5 proxy group -- that staff was using was 28
6 companies. And I just fear that we're going to
7 confuse the record with the extra number if that's --
8 if my understanding's correct.

9 MR. MALONEY: It's correct, there are
10 28 companies -- electric companies and combination
11 gas and electric companies in the staff proxy group.

12 THE WITNESS: (Duah) Please, can you
13 repeat the question for us? Sorry.

14 BY MR. MALONEY: (Cont'g.)

15 Q. Is it correct that at page 54 of
16 your testimony, you testified that we believe the
17 most suitable proxy group would be derived from a
18 universe of 37 holding companies deemed by Value Line
19 to be electric utilities?

20 A. We believe it should be electric,
21 based upon our testimony on page 54, of our
22 testimony.

23 Q. So are you now impeaching your
24 own testimony? Are you testifying that that's not

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 the case and that there should be 33 companies
3 including 5 gas companies in your proxy group?

4 A. We are not changing our 8.2, our
5 reco -- recommendation, this is just an illustration
6 of what if you were to include the 5 additional com -
7 - electric companies in our proxy group. But we
8 believe it should be based upon the electric company
9 because as we stated on page 53 of our testimony that
10 the companies are local gas companies even though the
11 investors look at the parent company -- invest in the
12 pen -- parent company and even though it was
13 electric.

14 Q. So just to be clear, I heard you
15 testify that you're not changing your initial set of
16 recommendations as in your direct testimony?

17 A. Correct.

18 MR. MALONEY: I'll stop there for now,
19 Your Honor. Thank you.

20 A.L.J. COSTELLO: Anything further?

21 MR. FORST: Nothing further, Your
22 Honor -- Your Honors.

23 A.L.J. COSTELLO: Okay. What we're
24 going to do is we're not going to excuse the panel at
25 this time. I mean you are free to leave, but you're

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 subject to being recalled if there is further cross
3 examination that would be required of you. And we
4 thank you.

5 A.L.J. LEARY: I do -- I do want to
6 ask if any of the panel members are unavailable next
7 week to return. For any day next week.

8 THE WITNESS: (Bullock) I won't be
9 available Thursday.

10 A.L.J. LEARY: Anyone else?

11 THE WITNESS: (Duah) Me and Abdul will
12 be available.

13 A.L.J. LEARY: I'm sorry?

14 THE WITNESS: Abdul and I will be
15 available next -- next week, yeah. We're available.

16 A.L.J. LEARY: Okay. Monday and
17 Tuesday would be the likely time that you would be
18 recalled. We have hearings scheduled for those
19 dates. So if you could just keep those dates open in
20 your work schedules until you hear from Mr. Goodrich
21 or Mr. Forst that you will not be recalled. We
22 expect to hear from the company hopefully on Monday
23 about whether that will be necessary.

24 MR. MALONEY: We'll be prepared to
25 respond at that time, Your Honor.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: Perfect, thank you.

3 Thank you to the panel.

4 A.L.J. COSTELLO: Yeah. We'll go off
5 the record.

6 (Off the record, 2:27 p.m.)

7 (on the record 2:31 p.m.)

8 THE REPORTER: We're on the record.

9 A.L.J. COSTELLO: Okay. Mr. Fung?

10 MR. FUNG: Justin Fung, City of New
11 York.

12 A.L.J. COSTELLO: Okay. Thank you.
13 And may I ask the witness to please state your name
14 and business address for the record?

15 MR. CONNOLLY: Christopher Connolly,
16 40 Sylvan Road, Waltham, Massachusetts 02451.

17 A.L.J. COSTELLO: And please stand and
18 raise your right hand. Do you swear or affirm that
19 the testimony you will provide is the truth?

20 MR. CONNOLLY: Yes.

21 WITNESS; CHRISTOPHER CONNOLLY; Sworn

22 A.L.J. COSTELLO: Thank you. You may
23 be seated. You may continue.

24 MR. GAVILONDO: Thank you, Your
25 Honors.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 DIRECT EXAMINATION

3 BY MR. GAVILONDO:

4 Q. Carlos Gavilondo on behalf of the
5 companies. Good afternoon, Mr. Connolly. Do you
6 have before you a document entitled the Direct
7 Testimony of Christopher J. Connolly dated April 2019
8 consisting of 42 pages, a cover sheet, a table of
9 contents?

10 A. Yes.

11 Q. Thank you. And was that document
12 that you just identified -- I apologize, I skipped
13 over. Do you also have before you a document
14 entitled Rebuttal Testimony of Christopher J.
15 Connolly dated September 18, 2019 consisting of 11
16 pages, a cover sheet and a table of contents?

17 A. Yes.

18 Q. Okay. And now, were those
19 documents that you just identified prepared by you or
20 under your direction and supervision?

21 A. Yes.

22 Q. Okay. If I were to ask you the
23 questions contained in those documents today, would
24 your answers be the same?

25 A. Yes, they would.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Okay. And do you adopt those
3 documents as your sworn testimony in these
4 proceedings?

5 A. Yes, I do.

6 MR. GAVILONDO: Your Honors, I ask
7 that the direct and rebuttal pre-filed testimony of
8 Mr. Connolly be transcribed into the record as if
9 given orally.

10 A.L.J. COSTELLO: The request is
11 granted and at this point the court reporter should
12 insert the following files. It's KEDNY-KEDLI
13 Christopher J. Connolly Direct Testimony and KEDNY-
14 KEDLI Christopher J. Connolly Rebuttal Testimony. #

VI. Forecasted Efficiency and Productivity Savings33

VII. GBE Incentive Proposal.....36

VIII. Program Delivery, Readiness and Training Elements39

1 **I. Introduction and Qualifications**

2 **Q. Mr. Connolly, please state your full name and business address.**

3 A. My name is Christopher J. Connolly. My business address is 404 Wyman
4 Street, Waltham, Massachusetts 02451.

5
6 **Q. By whom are you employed and in what capacity?**

7 A. I am employed by National Grid USA Service Company, Inc., a subsidiary
8 of National Grid USA (“National Grid”), as the Business Lead for the Gas
9 Business Enablement (“GBE”) Program. In this role, I have overall
10 accountability for the delivery of the GBE Program, which is one of the key
11 strategic priorities for National Grid and its U.S. operating companies,
12 including The Brooklyn Union Gas Company d/b/a National Grid NY
13 (“KEDNY”) and KeySpan Gas East Corporation d/b/a National Grid
14 (“KEDLI”) (collectively, the “Companies”).

15
16 **Q. Please describe your educational background and professional
17 experience.**

18 A. I received a Bachelor of Science in Mechanical Engineering Technology
19 from Northeastern University in 1999. I have worked in the energy industry
20 for approximately 20 years in various capacities, first as a contract engineer
21 for DistriGas of Massachusetts Corporation beginning in June 1998 until

1 October 1999 when I joined Boston Gas Company. From October 1999
2 through October 2001, I held various engineering and operations
3 supervisory roles at Boston Gas Company, including oversight for gas
4 system relocation and infrastructure modernization activities associated
5 with Boston’s Central Artery Tunnel “Big Dig” Project. Following
6 KeySpan Corporation’s (“KeySpan”) acquisition of Boston Gas Company
7 in 2001, I continued my tenure in operations from 2001 to 2007 with
8 responsibility for the design and execution of complex construction projects
9 across KeySpan’s New England service territory in Massachusetts and New
10 Hampshire. In 2007, when National Grid acquired KeySpan, through 2016,
11 I held a number of leadership positions of increasing responsibility within
12 gas engineering and operations. I co-led the development of the Process
13 Excellence Organization in 2013 through 2015, during which time I
14 assembled a process-focused stakeholder team responsible for identifying
15 improvements in safe and reliable gas system operations while ensuring
16 compliance across all jurisdictions. Further, I directed enterprise-wide
17 engineering teams advancing complex engineering, capital work plan
18 strategies, public works projects coordination, and gas growth analysis. In
19 addition, the teams I supervised supported the safe and reliable execution of
20 the gas capital work plan and provided engineering support during
21 emergencies. From February 2015 through July 2015, I took on the role of

1 Acting Vice President of Gas Systems Engineering and subsequently the
 2 role of Director, Gas Project Development from August 2015 through April
 3 2016. On May 1, 2016, I was named Vice President of Process and Business
 4 Requirements for the GBE Program, responsible for identifying business
 5 requirements and developing and implementing the standardized business
 6 processes and new solutions capability and functionality that will support
 7 enhanced customer satisfaction, improved safety and compliance
 8 performance, and enhanced employee engagement across National Grid’s
 9 U.S. operating companies. In October 2018, I was named to my current
 10 position.

11

12 **II. Purpose of Testimony**

13 **Q. What is the purpose of your testimony?**

14 A. The purpose of my testimony is to present an overview of National Grid’s
 15 GBE Program, as well as the Companies’ proposal for associated cost
 16 recovery. I will provide KEDNY’s and KEDLI’s forecast of rent expense
 17 for the capital investments associated with the GBE Program for the twelve-
 18 month period ending March 31, 2021 (“Rate Year”) and the three
 19 subsequent twelve-month periods ending March 31, 2022 (“Data Year 1”),
 20 March 31, 2023 (“Data Year 2”), and March 31, 2024 (“Data Year 3”) (Data
 21 Year 1, Data Year 2, and Data Year 3 are collectively referred to as the

1 “Data Years”). I will also discuss the operating costs that KEDNY and
2 KEDLI will incur in the Rate Year and Data Years for the GBE Program.
3 Finally, I will detail the efficiency savings expected from implementation
4 of GBE Program capabilities and propose an incentive mechanism tied to
5 the delivery of those benefits.

6

7 **Q. Do you sponsor any exhibits as part of your testimony?**

8 A. Yes. I sponsor the following exhibits that were prepared under my direction
9 and supervision:

10 Exhibit __ (CJC-1): High-Level Roadmap Showing Phased
11 Implementation and Capabilities;

12 Exhibit __ (CJC-2): Description of the Specific GBE Capabilities and
13 Benefits that will go In-Service in the Rate Year and
14 Data Years for KEDNY and KEDLI;

15 Exhibit __ (CJC-3): Incremental Operating Expenses for the GBE
16 Program Allocable to KEDNY and KEDLI in the
17 Rate Year and Data Years;

18 Exhibit __ (CJC-4): Additional Run the Business Costs to KEDNY and
19 KEDLI to Support the GBE Program Post-
20 Implementation:

1 Exhibit __ (CJC-5): Total U.S. Type I and Type II Savings Estimates
2 (Capital and O&M) and KEDNY and KEDLI
3 Allocated Type I Savings Estimates Identified in
4 Connection with the GBE Program; and
5 Exhibit __ (CJC-6): Proposed GBE Performance Incentive Mechanism.
6

7 **III. Overview of the GBE Program**

8 **Q. What is the GBE Program?**

9 A. The GBE Program is a comprehensive framework of new technology
10 solutions and business process changes necessary to strengthen and improve
11 the performance of National Grid’s U.S. gas business. Currently, the U.S.
12 gas business faces a number of challenges. These challenges include the
13 need to replace aged computer systems, drive continuous improvement in
14 gas safety performance, deliver an expanding and increasingly complex
15 capital investment program, and meet evolving customer expectations.
16

17 The GBE Program was developed through a collaboration among National
18 Grid’s U.S. gas business and Information Technology (“IT”), Procurement,
19 Customer, Finance, Shared Services, Customer Meter Services (electric and
20 gas), and the Human Resources functions, among others. The program has
21 been designed as a holistic transformation of National Grid’s U.S. gas

1 business to deliver process improvements across people, systems, and
2 technology to strengthen operational and safety performance and build a
3 modern platform that supports customer demands.

4

5 **Q. Why is the GBE Program needed?**

6 A. Over 90 percent of the systems used by National Grid’s U.S. gas business
7 are at or approaching end of life prior to the Rate Year. The average age of
8 these systems today is approximately 15 years compared to an industry
9 average of six. Because the age of these systems limits the ability to make
10 modifications and increases the amount of time the systems are down, it is
11 becoming increasingly difficult to support safe, compliant operations and
12 meet evolving and emerging regulatory obligations. In addition, the current
13 systems, many of which still rely on paper records, no longer support the
14 way today’s gas companies must manage work and performance, and
15 provide employees with real time information and effective tools. Modern,
16 supported solutions are also needed to help reliably deliver significant levels
17 of capital investments.

18

19 **Q. What are the benefits of the GBE Program?**

20 A. The GBE Program provides numerous benefits such as:

1 *Gas Safety.* The GBE Program will strengthen in several respects the
2 Companies' ability to operate a safe, reliable gas distribution system. First,
3 GBE will implement a new enterprise asset management ("EAM") system,
4 creating a single repository for all asset information and enabling a standard
5 process for managing preventative maintenance. The EAM system will be
6 integrated with a geographic information system ("GIS") to improve the
7 Companies' ability to capture, store, access, and analyze geographical asset
8 information concerning its gas distribution network. This will provide a
9 single view of all assets, which will facilitate data-driven investment and
10 maintenance decisions. The GBE Program investments will consolidate
11 information on all required operations and maintenance ("O&M") work,
12 rather than across multiple, manual spreadsheets. Finally, implementing
13 modern, more reliable platforms will provide better records to document
14 compliance and decreases the likelihood of system outages impacting the
15 ability to deliver work.

16

17 National Grid's Pipeline Safety Management organization has a central role
18 in the GBE Program to ensure that initiatives have a direct linkage to
19 improving pipeline safety and compliance. For instance, National Grid is
20 in the process of implementing a Pipeline Safety Management System
21 ("PSMS"), a process safety model based on employing and strengthening

1 the ten essential elements of the American Petroleum Institute's
2 recommended pipeline safety management standards (Recommended
3 Practice 1173 or "API 1173"). GBE Program initiatives have been mapped
4 to API 1173's ten core elements for strong alignment to enhance safety and
5 compliance upon implementation. In addition, National Grid enlisted a
6 third-party consultant (P-Pic) to independently validate that the GBE
7 Program initiatives will strengthen the Company's PSMS.

8
9 *Improved Operational Performance.* The main objective of the GBE
10 Program is to consolidate and replace many of the Companies' disparate
11 and aging systems, as well as the associated work processes to achieve a
12 step change in operational performance. The GBE Program investments
13 will also drive continuous improvement in regulatory compliance and
14 transparency with more complete data capture and reporting, less reliance
15 on paper, and greater visibility of required work. The GBE Program aims
16 to create a more performance aligned organization through a focus on end-
17 to-end processes and by implementing business practice changes such as
18 improved data quality and cleansing and field technical training.

19

1 *Operations Support.* The GBE Program will implement system
2 improvements and enable the standardization of business processes for
3 enhanced tracking, visibility, and scheduling of work.

4
5 *Customer.* Another benefit of the GBE Program is enhanced customer
6 service through improved scheduling and dispatch. This includes enhanced
7 appointment booking and an interactive customer framework (described
8 below), as well as the ability for dispatch and field crews to create a
9 consolidated view of past, scheduled, and potential future work for
10 customers so they will be better equipped to answer customer questions.

11

12 **Q. What are the key elements of the GBE Program?**

13 A. The key elements of the GBE Program include: replacement of aged core
14 systems; enabling customer and employee interaction platforms; and
15 implementing standardized processes and training. I describe each element
16 below.

17

18 *Replacement of Aged Core Systems.* Initially, the GBE Program will
19 integrate, standardize, and simplify core delivery processes and systems
20 onto a modern platform (comprising approximately 20 solution
21 components, down from the 100 disparate applications used today).

1 Specifically, the core systems GBE will design, standardize, and implement
 2 include:

- 3 • a common industry-standard EAM platform to manage
 4 inspection and maintenance of existing assets and capture new
 5 asset information in a single database;
- 6 • a common scheduling platform to support optimized scheduling,
 7 work bundling, and routing of work;
- 8 • a common GIS platform with more accurate foundation maps
 9 and conversion of gas service records and sketches, available
 10 with mobile functionality and enabled for full access viewing
 11 from mobile device (Apple iPad);
- 12 • a field mobility work management solution accessed from Apple
 13 iPads with base capabilities that include receipt and views of
 14 work assignment, turn-by-turn directions to work location,
 15 access to electronic work packages and customer premise data,
 16 updated work status and entry of field completion data, and
 17 capabilities to initiate new work in the field, attach pictures, and
 18 view assets in GIS maps;
- 19 • a standardized Asset Investment Planning and Management
 20 (“AIPM”) platform for managing the enterprise’s project
 21 portfolio, including project routing and approval, with the ability
 22 to forecast costs; and
- 23 • an Asset Risk Ranking/Prioritization application to perform
 24 asset condition assessment, assign asset risk ratings, and with the
 25 ability to prioritize asset replacements.

26 The integration of these core systems will support a more holistic
 27 management of assets and administration of work. In addition, updating
 28 and integrating these core systems will enable full utilization of new tools
 29 such as the field mobility work management solution for leak investigation
 30 and inspection work orders; drive improvement in gas safety performance;

1 improve capital delivery effectiveness; and lead to better employee
2 utilization, and ultimately improved customer service.

3
4 *Customer & Employee Interaction Platforms.* A flexible interface will be
5 built on top of the core systems to allow customers, call center
6 representatives, and field employees to operate on a common platform and
7 more easily access data. The solution capabilities will be developed and
8 integrated with work management and scheduling solutions that allow
9 customers to interact with National Grid such as by self-service
10 appointment scheduling and re-scheduling, receiving updates (*e.g.*, text or
11 email) based on their preferences for appointments, addressing inquiries for
12 new gas connections and conversions, and accessing information about
13 work on their street or neighborhood. Similarly, capabilities will be
14 developed and further integrated with the asset and work management
15 platforms including scheduling and dispatch, and GIS systems to provide
16 office based employees and field employees with prompts and validations
17 for accurate capture of required information for compliance, field mobility
18 access to asset data, maps, standards and policies, training references, and a
19 consolidated view of relevant customer and premise information to support
20 enhanced customer service. This interface also builds the capabilities

1 necessary to rapidly adapt processes and address developing channels for
 2 customer engagement in the evolving energy marketplace.

3 *Standardized Processes and Training.* The GBE Program will also support
 4 the implementation of standardized operations processes and training that
 5 to this point has been fragmented due to the significant complexity of
 6 multiple supporting systems. This will reduce the level of requirements that
 7 would need to be designed, built, tested and trained, and as a result, mitigate
 8 the costs of the new technical solution. In addition, standardized processes
 9 and training will further support more consistent delivery and performance
 10 reporting.

11

12 **Q. Has the GBE Program been considered in any other New York rate**
 13 **proceeding?**

14 A. Yes. In Cases 17-E-0238 and 17-G-0239, the Commission adopted a Joint
 15 Proposal providing for recovery of GBE costs for Niagara Mohawk Power
 16 Corporation d/b/a National Grid (“Niagara Mohawk”), KEDNY and
 17 KEDLI’s affiliated operating company in New York.

18

19

1 **IV. Program Implementation Approach, Roadmap, and Capabilities**

2 **Q. Please explain National Grid's approach to implementing the GBE**
3 **Program.**

4 A. National Grid established a project organization to support the development
5 and implementation of the GBE Program. I am the dedicated Program
6 Lead, overseeing business requirements, solution design, schedule, and
7 budget, with an IT Lead accountable for solution development and delivery.
8 A Chief Transformation Officer is responsible for oversight of all of
9 National Grid's large change programs, including GBE, Advanced
10 Metering Infrastructure, Grid Modernization, Project Volt, SAP S/4 HANA,
11 and CIS to ensure these transformative investments are aligned, prioritized,
12 and built with capabilities to maximize value to customers and support the
13 delivery of anticipated benefits. A separate GBE Steering Committee,
14 comprised of senior executives from the Gas Business Unit, Finance, IT,
15 Regulation and Strategy, Human Resources, and Customer Operations,
16 Safety and Business Excellence oversees the program, including the
17 deployment timeline, benefits realization, and costs. The Chief Operating
18 Officer for the Gas Business Unit is a member of the GBE Steering
19 Committee and Program Sponsor with a focus on the GBE Program's
20 delivery of capabilities and benefits to National Grid's gas operating
21 companies, including KEDNY and KEDLI.

1 In terms of external support, National Grid worked with two of the top
2 system integrators with experience on similar, large-scale implementations,
3 Accenture and PWC, to complete a high-level design and develop a
4 roadmap that leverages modern system implementation approaches to
5 minimize risk and maximize the likelihood that the desired business
6 outcomes are successfully delivered.

7

8 **Q. Please explain the procurement process utilized for the selection of**
9 **vendors to deliver GBE Program solutions.**

10 A. The fundamental purpose of the competitive procurement process was to
11 develop the components of the GBE Program using capable and
12 experienced third-party vendors that (i) have the competency to assist in
13 delivering the program on time, on budget, and with the stated capabilities,
14 and (ii) are subject to clearly defined contractual parameters and
15 performance requirements. Specifically, National Grid utilized a
16 competitive, agile sourcing strategy consisting of a pre-defined four-step
17 stage gate process to evaluate and down-select vendors through
18 collaboration to enhance understanding of scope, deliverables, and
19 assessing culture of partnership to reduce the risk of delivery of the GBE
20 Program.

1

2 With the benefit of several months of program experience, and in the
3 interest of identifying the optimal delivery model for the next phases of the
4 program, a strategic review of the GBE Program was launched in December
5 2018. The purpose of the strategic review was to recommend program
6 adjustments, with Steering Committee approval, to strengthen program
7 delivery, improve accountability, reduce risks, provide greater cost
8 assurance, and ensure clarity with regards to program roles and
9 responsibilities going forward. As a result of the strategic review, the GBE
10 Program (i) re-planned the roadmap, as reflected in Exhibit __ (CJC-1), to
11 account for experience to date and re-phase program releases to better
12 manage risks and priorities; (ii) restructured the multi-vendor integrator
13 construct to streamline program delivery and create clearer vendor
14 accountability; and (iii) adjusted program resources to clarify accountability
15 for delivery.

16

17 In March 2019, the GBE Steering Committee approved the transition to a
18 single system integrator consultant for the completion of design,
19 development, and delivery of the remainder of the scope of the GBE
20 Program. This decision to transition to one system integrator firmed up the

1 cost to deliver the GBE Program within budget and contingency, shortened
2 the duration of the overall program with substantial completion of enhanced
3 capabilities by December 2020, and re-confirmed delivery against the
4 planned releases in the revised roadmap with consultant fees at risk for
5 missed delivery dates and a cap on future change orders.

6
7 National Grid selected PwC as the single system integrator for the GBE
8 Program. This shift to a single solution integrator model will further ensure
9 end-to-end accountability and help to address challenges the program faced
10 with regards to role clarity, testing, solution performance, and IT
11 integration.

12
13 **Q. Please describe the planned implementation approach.**

14 A. The initial focus of the GBE Program will be development of standardized
15 business processes, validation of jurisdictional requirements coordinated
16 through the end-to-end solution design activities, implementation of asset
17 management, work management, and scheduling applications along with an
18 integrated mapping (*i.e.*, GIS) solution. National Grid will focus on
19 replacing aged core applications and implementing updated solutions as
20 quickly as possible to help reduce the risk associated with critical,
21 unsupported applications. This will create the foundation for building

1 incremental enhanced capabilities to support safety performance,
2 operational efficiency, the customer experience, and a performance-
3 oriented culture. Examples of such enhanced capabilities include advanced
4 analytics on asset demographic, condition, health, and other information to
5 provide a consolidated view of asset risk geospatially; the customer and
6 employee interaction portals; advanced analytics for work forecasting and
7 planning; and supervisor field mobile capabilities on viewing and tracking
8 crew and work order progress spatially; and auto work notifications to plan
9 and schedule preventative maintenance activities.

10
11 A stage-gate methodology is being employed to manage delivery and
12 implementation in the service territories and operating companies once pre-
13 defined thresholds of performance are successfully demonstrated in Rhode
14 Island. The GBE Program is practicing agile development methods
15 wherever it is appropriate to do so. Under this model, business and IT teams
16 work collaboratively in short-cycles to prioritize functionality and get to a
17 minimum viable product (*i.e.*, the simplest solution that can be
18 implemented) allowing earlier release of initial functionality and
19 reprioritization of added features and enhancements based on learning and
20 user feedback.

21

1 As shown in Exhibit __ (CJC-1), the GBE Program has developed a well-
2 defined program roadmap to reduce risk in implementation and provide
3 clear visibility of critical path dependencies to assure successful
4 implementation as each phase progresses. The roadmap is defined by the
5 major releases grouped under a total of seven portfolio anchors. Each of
6 the portfolio anchors represents a series of releases with defined capabilities
7 delivered across National Grid's operating companies. The portfolio
8 anchors provide definition to the roadmap timeline to highlight major
9 delivery milestones while signaling the transition of solution focus,
10 jurisdiction focus and resource support for design, development, test,
11 deployment, and solution support activities.

12
13 Portfolio Anchor 1 ("PA1") (delivered April 2018) – The first GBE
14 solution deployment included a minimum viable product release of
15 solutions for corrosion, instrumentation and regulation, and collections in
16 Rhode Island. The solutions included deployment of the enterprise asset
17 management application (IBM Maximo), and the scheduling and dispatch
18 and field mobility applications under Salesforce Field Service Lightning.
19 The GBE Program roadmap designed the first release at National Grid's
20 Rhode Island gas distribution company, The Narragansett Electric

1 Company (gas segment), given its significant reliance today on paper-based
2 operations and its manageable scale (*i.e.*, fewer operating yards).

3 Portfolio Anchor 2 (“PA2”) (releases from October 2018 through July
4 2019) – Includes enhancements to the capabilities delivered in PA1 in
5 Rhode Island for corrosion, instrumentation and regulation, and collections
6 plus delivery of the minimum viable product solution for resource
7 management with the first release of the Workforce Time and Attendance
8 application, the first implementation of the GIS solution, enhancements to
9 the AIPM application, and first minimum viable product release of the Asset
10 Risk Management application. This anchor also expands the solution
11 capabilities and functionality to support Customer Meter Services work
12 types and the first implementation of the Customer Contact Center
13 Customer Relationship Management application, Salesforce Service Cloud.

14
15 Portfolio Anchor 3 (“PA3”) (releases from September 2019 through July
16 2020) – Includes additional enhancements and added features delivered in
17 Rhode Island for PA1 and PA2 along with the release of a minimum viable
18 product solution to support the leak response, investigation, and grading of
19 leaks. This portfolio anchor also expands the releases for the first time to
20 National Grid’s New York and Massachusetts operating companies. At the

1 end of this portfolio anchor, all the corrosion, instrumentation and
 2 regulation, customer meter services, customer contact center, resource
 3 management, asset risk management, and investment planning solutions are
 4 fully released along with minimum viable product solution for the leak
 5 process, including the deployment of the standard GIS application and
 6 mobile GIS in all operating companies. All field-based operations
 7 employees supporting the work will have mobile devices deployed and full
 8 use of the applications including the assignment and receipt of orders, field
 9 data capture, and order completion information.

10

11 Portfolio Anchor 4 (“PA4”) (releases for Rate Year) – Includes the initial
 12 roll-out of the minimum viable product solutions that support construction
 13 and maintenance work types and expands the leak process end-to-end to
 14 include leak repair and leak re-check to the Rhode Island business. The
 15 same software applications previously released in portfolio anchors 1 – 3
 16 are enhanced with new capabilities and features to support construction and
 17 maintenance.

18

19 Portfolio Anchor 5 (“PA5”) (releases for Rate Year) – Includes additional
 20 enhancements and added features delivered in Rhode Island for PA4 and
 21 expands the PA4 releases for the first time to National Grid’s New York

1 and Massachusetts operating companies. These releases also deliver the
 2 graphic work design and field redlining capabilities to support construction
 3 and maintenance. At the end of this portfolio anchor, all construction and
 4 maintenance capabilities are fully released in all operating companies.
 5 Field based, operations employees assigned to construction and
 6 maintenance will use mobile devices to support work.

7
 8 Portfolio Anchor 6 (“PA6”) and Portfolio Anchor 7 (“PA7”) (releases for
 9 the Rate Year) – Include enhancements to the solutions in the areas of
 10 graphic work design and estimating. These anchors also include efforts
 11 focused on optimization of the solutions and additional analytics use cases.
 12 Many of these activities are driven and supported by IT operations under
 13 run the business activities.

14

15 **Q. Please describe the capabilities the Program has delivered to date?**

16 A. To date, the GBE Program delivered three major program releases in April,
 17 October, and December 2018 implementing solution capabilities for
 18 corrosion, instrumentation and regulation, and collections. The core
 19 systems deployed in Rhode Island include enterprise asset management,
 20 scheduling and dispatch, field mobile work management, resource
 21 management, asset risk management, and GIS solutions. Concurrent with

1 the delivery of these releases, the GBE Program began preparations for two
2 future releases in 2019 including the customer call center front end,
3 Customer Meter Services scheduling, dispatch and field mobility, and leak
4 response, investigation, and grading solutions. Key program activities
5 included design and development of functionality, planning and initiation
6 of end-to-end integration testing, business stakeholder engagement,
7 solution demonstrations, as well as planning for data loads and other
8 deployment-related activities that have involved users in New York. To
9 date, the GBE Program capabilities have been rolled out to over 800 users,
10 including 77 in New York for purposes of training and supporting their roles
11 requiring access to Rhode Island data.

12
13 **Q. Please describe the GBE Program capabilities that have been**
14 **implemented for New York.**

15 A. The first GBE Program deployment for Niagara Mohawk, KEDNY, and
16 KEDLI occurred in August 2017 with implementation of the Work Order
17 Lifecycle Redesign project. This project restructured and made more robust
18 the work order interfaces between the SAP, PowerPlan, and existing work
19 management applications (*i.e.*, IBM Maximo in KEDNY and KEDLI and
20 Storms in Niagara Mohawk) and was a pre-requisite for deployment of the
21 GBE Program solution.

The first major New York releases are planned under PA3 for September 2019 for Niagara Mohawk, November 2019 for KEDLI, and June 2020 for KEDNY with the deployment of the capabilities released in Rhode Island. New York operating company employees have been included in the solution design, development, and testing phases to ensure the solution capabilities and features are fit for purpose and meet the requirements for the New York operating companies. Solution development for Niagara Mohawk is complete and solution testing is in progress. Existing solution capabilities and features are being validated through solution demonstrations with KEDLI employees, and design activities have commenced to develop solution enhancements and include requirements specific to KEDNY and KEDLI (*e.g.*, addressing integration architecture requirements with legacy systems).

Notably with respect to KEDNY and KEDLI, recognizing the need and benefits of the GBE capabilities for customers, National Grid and its shareholders have made and will be making the required investments before securing cost recovery for the GBE Program.

1 **Q. Please describe the specific projects/capabilities that will go in-service**
2 **in the Rate Year and Data Years for KEDNY and KEDLI.**

3 A. Implementation is planned for KEDLI prior to the Rate Year, beginning
4 November 2019, and for KEDNY within the Rate Year beginning in June
5 2020 as discussed above and shown in Exhibit __ (CJC-1).

6
7 Exhibit __ (CJC-2) further describes the specific projects and capabilities
8 that will go in-service in the Rate Year and Data Years for KEDNY and
9 KEDLI.

10
11 **V. GBE Program Costs**

12 **Q. What is the total cost of the GBE Program?**

13 A. The total cost of the GBE program for all of National Grid's U.S. operating
14 companies is currently estimated at approximately \$539.3 million, of which
15 approximately \$384.3 million is capital costs, and \$155.0 million is
16 operating expense. While delivery of the GBE Program initiatives is
17 expected to be within the total costs stated herein, it is important to note that
18 GBE Program costs may shift between the Rate Year and Data Years as
19 each of the projects completes detailed design.

20

1 The GBE Program follows a sanctioning approval process to provide on-
2 going assurance and transparency of the program delivery, schedule, and
3 budget as the program moves through its various stages. An annual partial
4 sanctioning against the total approved cost estimate is required throughout
5 the duration of the program. The latest sanction approval reflects the total
6 costs referenced above.

7

8 **Q. Explain how the current total cost estimate for the GBE Program**
9 **relates to the \$458 million forecast reflected in Niagara Mohawk's rate**
10 **plan approved in Cases 17-E-0238 and 17-G-0239.**

11 A. Rates established in Niagara Mohawk's rate plan included \$458.1 million
12 forecast for the GBE Program. Although Niagara Mohawk identified a
13 program contingency of \$61 million, those costs were not reflected in rates
14 because they were not sufficiently certain. The \$539.3 million total cost
15 estimate in this case includes: (i) the \$458.1 million forecast reflected in
16 Niagara Mohawk's current rates; (ii) \$61.0 million of contingency (\$57.4
17 million of which has been subsequently sanctioned); and (iii) \$20.1 million
18 incurred in fiscal year ("FY") 2017 for the initial development of the
19 business case, assessment of processes and applications, and high-level
20 design for the GBE Program. The Companies' revenue requirements in this
21 filing do not reflect the \$20.1 million for the initial development of the

1 business case, \$3.6 million in contingency that is not planned for sanction,
2 or operating costs prior to the Rate Year.

3

4 As such, as discussed later in my testimony, by the Rate Year, KEDNY and
5 KEDLI collectively will have incurred more than \$67.4 million in
6 connection with the GBE Program that is not reflected in their revenue
7 requirements, and therefore are costs borne by shareholders for the benefit
8 of customers.

9

10 **Q. Why is National Grid forecasting the need to spend budgeted**
11 **contingency?**

12 A. While significant progress has been made in the development and delivery
13 of the GBE Program, National Grid is expecting upward cost pressure on
14 the budgeted contingency. Challenges and complexities of replacing the
15 aged systems or developing legacy interfaces has been a major driver of the
16 need to utilize budgeted contingency.

17

18 In addition, delays in development and design work required to enable fully
19 capturing detailed business requirements, including requirements
20 rationalized across operating companies to understand differences, have led
21 to testing delays. Addressing and limiting the scope of these delays has

1 placed an upward pressure on the budgeted contingency in the form of
2 additional cost for National Grid resources and longer phasing for training
3 and software costs.

4
5 Furthermore, due to the phased release of capability across the jurisdictions
6 (one of the key lessons learned from previous programs to mitigate delivery
7 risk), the original estimate of Allowance for Funds Used During
8 Construction (“AFUDC”) was significantly under forecast in the original
9 \$458 million estimate.

10
11 Together, the unanticipated legacy integration costs, incremental National
12 Grid resource, training and software costs, and underestimation of AFUDC
13 have resulted in an increase of \$57.4 million against the budgeted
14 contingency.

15
16 The refreshed roadmap reflected in Exhibit __ (CJC-1) is the result of the
17 GBE Program’s recent strategic review and evaluation of program status
18 discussed earlier, resource requirements and availability, and lessons
19 learned through release implementations. This roadmap further addresses
20 delivery risk by limiting releases to one jurisdiction at a time (*i.e.*, no more
21 than one jurisdiction for a CMS release), separating large releases across

1 multiple companies (*i.e.*, separate M&C releases for KEDNY and KEDLI),
2 increasing the timeframe between releases to improve testing, solution
3 development, and solution readiness, and avoiding releases during winter
4 operations.

5

6 **Q. Does the Historic Test Year include costs for the GBE Program?**

7 A. Yes, the Historic Test Year includes operating costs for the GBE Program
8 related to operating model assessment and design, business engagement,
9 readiness and change management, training and post go-live support for the
10 three major releases, modifications to existing technology infrastructure,
11 and the day-to-day program management activities, KEDNY and KEDLI
12 have made a normalizing adjustment of \$10.910 million and \$4.954 million,
13 respectively, to remove these costs from the Historic Test Year and isolate
14 costs for the Rate and Data Years.

15

16 **Q. What is the cost of the GBE Program to KEDNY and KEDLI in the**
17 **Rate Year and Data Years?**

18 A. Because the GBE Program is a shared investment among National Grid's
19 U.S. gas operating companies, only a portion of the total capital investment
20 will be allocated to KEDNY and KEDLI in the form of an annual rent
21 expense as part of the overall IT service rent expense. The portion of the

1 annual rent expense attributable to the GBE Program investment for
 2 KEDNY is \$11.73 million, \$18.38 million, \$17.64 million, and \$16.89
 3 million in the Rate Year and Data Years, respectively as shown in Exhibit
 4 __ (RRP-11), Workpapers to Exhibit __ (RRP-3), Schedule 9, Workpapers
 5 3, 6, 9, and 12. The annual rent expense attributable to KEDLI is \$8.59
 6 million, \$8.34 million, \$7.99 million, and \$7.65 million in the Rate Year
 7 and Data Years, respectively as shown in Exhibit __ (RRP-11), Workpapers
 8 to Exhibit __ (RRP-3), Schedule 9, Workpapers 3, 6, 9, and 12.

9

10 KEDNY's and KEDLI's allocated share of the \$14.2 million, excluding
 11 base labor and benefits, total operating expense in the Rate Year, as shown
 12 in Exhibit __ (CJC-3) are \$4.8 million for KEDNY and \$2.2 million for
 13 KEDLI. Exhibit __ (CJC-3) also shows the forecast of operating expense
 14 allocated to KEDNY and KEDLI for the Data Years.

15

16 **Q. Please identify the amount and explain the basis of the incremental**
 17 **operating expense for KEDNY and KEDLI in the Rate Year and Data**
 18 **Years.**

19 A. The incremental project operating expense included in Exhibit __ (CJC-3)
 20 relates to (i) end user training, (ii) data conversion from the legacy
 21 applications to the new GBE Program applications, (iii) program

1 management and leadership to manage the schedule, resources, finance,
 2 risks, issues and performance, and (iv) business process documentation that
 3 is non-system related.

4

5 **Q. Are there any post-implementation run the business costs associated**
 6 **with the GBE Program?**

7 A. Yes. As shown in Exhibit _ (CJC-4), the Company will incur additional run
 8 the business costs to support the GBE Program post-implementation. These
 9 costs include (i) a team to support business functions in the use of the new
 10 systems, design new processes to take full advantage of the new system,
 11 and monitor business controls embedded in the system; (ii) hardware,
 12 software, and mobile solutions license maintenance fees and subscriptions;
 13 and (iii) support costs to maintain certain legacy applications following
 14 implementation until legacy applications are replaced or maintained in an
 15 upgraded future state, as appropriate.

16

17 Support costs for the legacy applications will decrease from the Rate Year
 18 to the Data Years. Additional support costs will be required for legacy
 19 applications that will continue to remain after full implementation due to
 20 regulatory reporting needs and outstanding legal hold obligations.

21

1 Nevertheless, as legacy software systems are retired due to functional
 2 replacement as part of the GBE Program, the run the business costs for
 3 operating the associated servers, software systems, and field devices will be
 4 eliminated. As shown in Exhibit _ (CJC-4), the Companies have netted
 5 these costs against the forecast run the business costs expected for the Rate
 6 Year and Data Years.

7

8 **Q. What are the post-implementation run the business costs associated**
 9 **with GBE in the Rate Year and Data Years?**

10 A. As shown in Exhibit __ (CJC-4), KEDNY’s and KEDLI’s allocated share
 11 of these costs in the Rate Year are \$6.3 million and \$3.8 million,
 12 respectively. The Companies’ respective allocated share of these costs in
 13 the Data Years is also shown in Exhibit __ (CJC-4).

14

15 **Q. Please explain how costs for the GBE Program are allocated to KEDNY**
 16 **and KEDLI.**

17 A. Most GBE Program costs have been allocated among all of National Grid’s
 18 gas operating companies based on the number of gas retail customers, with
 19 the exception of those relating to work management scheduling,
 20 dispatch/mobility and workforce management, and customer contact

1 support and interaction, which have been allocated based on the number of
 2 gas and electric retail customers.

3
 4 Exhibit _____ (RRP-11), Workpapers to RRP-3, Schedule 9, Workpapers
 5 3, 6, 9, and 12 set forth the allocations of these program costs.

6

7 **Q. Do KEDNY's and KEDLI's revenue requirements incorporate any**
 8 **adjustments for potential slippage in costs or timeline for the GBE**
 9 **Program?**

10 A. No. The Companies reviewed the concerns Staff raised in the Niagara
 11 Mohawk case about potential slippage in costs or schedule for the GBE
 12 Program. However, it has been approximately two years since the Niagara
 13 Mohawk case, and the KEDNY and KEDLI revenue requirements in this
 14 case reflect additional program maturity and the updated program roadmap
 15 provided in Exhibit __ (CJC-1). As explained earlier, the roadmap is a
 16 result of a detailed strategic review undertaken to strengthen program
 17 delivery, reduce risks, and provide greater cost and timeline assurance. As
 18 such, the Companies believe that no further adjustment to GBE Program
 19 costs or timeline are required. Importantly, as mentioned earlier, by the
 20 Rate Year, KEDNY and KEDLI will have incurred more than \$67.4 million
 21 in connection with the GBE Program that is not reflected in their revenue

1 requirements due to regulatory lag. A further slippage adjustment on
 2 KEDNY's and KEDLI's revenue requirement is unnecessary.

3

4 **VI. Forecasted Efficiency and Productivity Savings**

5 **Q. Are there any efficiency and productivity savings associated with the**
 6 **GBE Program?**

7 A As explained earlier, the main objective of the GBE Program is to
 8 consolidate the many duplicate and aging applications and systems across
 9 the enterprise. Because GBE is an asset replacement program, the primary
 10 benefit is a reduction in operational risk.

11

12 The implementation of new asset, work, and mobility systems lays the
 13 foundation for enhanced capabilities that will drive a broad range of
 14 operational benefits and performance improvements, some of which are
 15 anticipated to result in cost reductions. To that end, the GBE Program is an
 16 initiative that contributes towards National Grid's Accelerate Program
 17 targets, as described in the testimony of the Revenue Requirements Panels.
 18 Because of the attention and focus on the GBE Program, benefits have been
 19 separately reflected from Accelerate Program savings. Exhibit __ (CJC-5),
 20 Page 1 provides the total U.S. benefits (Type I and Type II, and capital and

1 operating expense benefits) anticipated for the GBE Program as a result of
 2 the strategic review discussed earlier.

3

4 **Q. Please discuss the business case benefits initially identified by National**
 5 **Grid.**

6 A. As reflected in Exhibit __ (CJC-5) Page 1, the majority of benefits under
 7 the business case will be realized after Data Year 1. Once the enhanced
 8 capabilities are fully embedded by FY 2024, the GBE Program estimates a
 9 steady state run rate of \$50.289 million in total benefits annually. Over a
 10 five-year period, the \$50.289 million annual benefits will amount to \$251
 11 million, which is greater than the approximately \$185 million investment in
 12 the enhanced capabilities. Specifically, implementation of enhanced
 13 capabilities could provide the following benefits:

14 Type I (Spend Reduction) – the benefit has a direct, quantifiable, and
 15 sustainable impact in reducing costs. For example, the GBE Program
 16 investments are anticipated to deliver increased clerical and back office
 17 productivity beginning in the Rate Year as a result of automation of some
 18 manual tasks (*e.g.*, time entry), elimination of paper-based processes, as
 19 well as streamlining of data updates performed by clerical staff.

20 Type II (Capacity Savings) – the benefit is a process improvement that
 21 consists of resources freed up or future cost or potential penalty avoidance.

1 For example, the work and asset management will provide improved
 2 scheduling, bundling of work, and enhanced, prescriptive routing for field
 3 technicians. In turn, these enhancements will allow optimization of drive
 4 time and existing resources freeing additional resource capacity (*i.e.*,
 5 additional jobs completed per shift).

6

7 **Q. What is the estimate of savings?**

8 A. As shown in Exhibit ___ (CJC-5), Page 2, approximately \$4.4 million,
 9 \$10.3 million, \$10.5 million, and \$10.5 million in Type I and Type II O&M
 10 savings are allocable to KEDNY in the Rate Year and Data Years,
 11 respectively. Approximately \$0.8 million, \$1.8 million, \$2.0 million, and
 12 \$2.0 million in Type I and Type II O&M savings are allocable to KEDLI in
 13 the Rate Year and Data Years, respectively.

14

15 **Q. Have forecast cost reductions associated with the GBE Program been**
 16 **reflected in this filing?**

17 A. Yes. KEDNY and KEDLI have made adjustments to the Rate Year and
 18 Data Years to reflect their allocated share of the estimated Type I savings
 19 from the GBE program initiatives. KEDNY's adjustment reduces the
 20 revenue requirement by \$2.9 million in the Rate Year and \$6.8 million, \$7.1
 21 million, and \$7.1 million in Data Years 1, 2 and 3, respectively. KEDLI's

1 adjustment reduces the revenue requirement by \$0.8 million in the Rate
 2 Year and \$1.7 million, \$1.9 million, and \$1.9 million in Data Years 1, 2,
 3 and 3, respectively. No adjustment is being made for Type II savings
 4 because they do not result in a direct cost reduction, but increase capacity
 5 for work that otherwise would not be completed. No adjustment is being
 6 made for penalty avoidance savings because penalties are not recovered
 7 from customers.

8

9 **Q. How were initiatives that targeted capital related savings treated in the**
 10 **filing?**

11 A. With respect to initiatives estimated to result in capital savings, those
 12 savings are embedded in the capital plan and not reflected as separate
 13 adjustments in the revenue requirement.

14

15 **VII. GBE Incentive Proposal**

16 **Q. Please explain the Companies' proposal for an incentive on the delivery**
 17 **of GBE Program benefits.**

18 A. Recognizing the importance of the GBE Program to National Grid's efforts
 19 to improve operations, customer service, and gas safety, National Grid
 20 incurred significant costs to begin implementing the five-year program even
 21 where costs were not recovered in rates. In particular, because GBE

1 Program costs were not included in KEDNY and KEDLI's current rate
2 plans, National Grid's shareholders have or will be funding approximately
3 \$20.4 million of unrecovered costs through FY 2019 and expect to incur
4 another \$24.3 million of unrecovered costs for FY 2020.

5 Recognizing the value of this shareholder funding for significant program
6 development costs between rate cases and the importance of incenting large
7 investments in critical programs to support operations and deliver customer
8 benefits, the Companies are proposing an incentive mechanism that aims to
9 recover a modest portion of otherwise unrecoverable costs while further
10 incentivizing the delivery of customer benefits from the GBE Program.

11

12 **Q. How are the Companies proposing to collect an incentive on the**
13 **delivery of GBE Program?**

14 A. The Companies will measure performance on six key performance
15 indicators ("KPIs"), similar to those adopted in Cases 17-E-0238 and 17-G-
16 0239 for Niagara Mohawk, that are intended to demonstrate successful
17 delivery of GBE Program capabilities. The GBE Program KPIs are (i) the
18 average number of completed Customer Meter Services ("CMS") jobs per
19 worker per day; (ii) the average feet of main replaced per Maintenance and
20 Construction ("M&C") worker per day; (iii) work orders processed each

1 year per each full-time equivalent (“FTE”) engineering clerical employee;
2 (iv) total call volume related to customer moves and non-moves per year;
3 (v) total number of gas safety non-compliance occurrences per year; and
4 (vi) the Companies’ customer experience (effort) rating based on customer
5 surveys.

6
7
8
9
10
11
12
13
14
15
16
17

At the end of FY 2023, the Companies will measure delivery of GBE Program capabilities based on performance across the FY 2023 KPI targets. The FY 2023 GBE KPIs, weightings, and targets are set forth in Exhibit __ (CJC-6), Schedules 1 and 2. Illustrative examples of the GBE KPI performance measurement are provided in Exhibit __ (CJC-6), Schedules 1 and 2. To the extent the Companies measure improvement against the FY 2023 KPI targets , the Companies will record a regulatory asset for all or a portion of their respective GBE Program investment costs for the period January 1, 2019 through March 31, 2020 (“linking period”).

1 **VIII. Program Delivery, Readiness and Training Elements**

2 **Q. Please describe how Software as a Service (“SaaS”) is utilized by the**
 3 **GBE Program, and the benefits of its use.**

4 A. The GBE Program is exploring the use of SaaS cloud solutions wherever
 5 options are available and best meet overall requirements. Examples are in
 6 the core systems like enterprise asset management, work management,
 7 scheduling and dispatch, and field mobile as well as for data analytics and
 8 visualization.

9
 10 Use of SaaS cloud solutions will provide several benefits including faster
 11 implementation and enhancement adoption, fewer upgrades to legacy
 12 infrastructure, easier upgrades when needed, reduced risk of obsolescence
 13 in the future, and the opportunity to enhance security. SaaS also provides
 14 strategic advantages by facilitating external interfaces with third party
 15 partners. SaaS can also be more easily scaled for additional capacity when
 16 required to enable growth

17
 18 **Q. How does the GBE Program address cyber security?**

19 A. Protection of confidential customer information, asset data, and proprietary
 20 gas network information is essential to the success of the program. The
 21 program team is committed to meet or exceed National Grid’s stringent

1 cyber security requirements, which are based on best practices in the utility
 2 and other industries. National Grid’s Digital Risk and Security department
 3 will provide cyber security guidance in testing and development activities.
 4 Digital Risk and Security will also implement device and personnel
 5 authentication, monitoring for unauthorized access to information, cloud
 6 data security services, malware protection, and identity and access
 7 management control such as role-based access, single-sign on,
 8 provisioning/de-provisioning, and privileged access management.

9
 10 The program also has a Cyber Security Architect dedicated to the project
 11 beginning in April 2017. In addition, the system integrator, existing partner
 12 suppliers, and security analysts will serve as supplemental cyber security
 13 experts.

14
 15 It is important to note that the existing application estate is complex and
 16 includes a large number of applications that are at or near end of life. This
 17 requires a significant effort to maintain a safe and secure environment. The
 18 cloud-based environment the program will implement is far less complex
 19 and, therefore, presents less cyber security risk.

20
 21 **Q. What training will be delivered as part of the GBE Program?**

1 A. Comprehensive training will be provided to all users of the systems, both
 2 field and office workers as well as first line and upper levels of
 3 management. Training will be delivered using various media such as
 4 computer-based instruction, video, classroom, mobile and written help
 5 guides. The GBE Program continues to focus on the upfront change
 6 management effort to impacted users through engagement roadshows,
 7 demos, and team hub meetings, as well as explore enhanced approaches
 8 such as “guided walk me tools” for user support and knowledge retention.
 9 Multiple sessions of training classes are scheduled to be delivered for users
 10 supporting KEDNY and KEDLI around November 2019.

11

12 **Q. How will the program team assess the readiness of the business to begin**
 13 **using the various functional parts of a project?**

14 A. The GBE Program team has been working with gas business leadership to
 15 identify business readiness requirements and develop business readiness
 16 checklists and go/no go checkpoints to ensure business readiness by
 17 geography. The approach focuses on the business not only being ready to
 18 receive the solution but also feeling accountable for making the decision.
 19 The business readiness approach utilized across each of the releases to date
 20 measures and tracks against an agreed set of go/no go criteria, including
 21 readiness of functionality, data, controls, new business processes

Before the Public Service Commission

**THE BROOKLYN UNION GAS COMPANY d/b/a NATIONAL GRID NY
AND KEYSpan GAS EAST CORPORATION d/b/a NATIONAL GRID**

Rebuttal Testimony

of

Christopher J. Connolly

September 18, 2019

TABLE OF CONTENTS

I.	Introduction.....	1
II.	Response to Staff’s Recommendations and Proposed Adjustments.....	3
	A. Proposed \$57.4 Million Downward GBE Program Adjustment	4
	B. Proposed Cap on GBE Program Cost Recovery.....	7
	C. Proposed Downward-Only Net Utility Plant and Depreciation Expense Tracker.....	8
	D. Proposal to Implement Performance Benchmarks.....	9
	E. Proposal to Modify Service Company Cost of Capital for Rate Setting Purposes.....	10
	F. Proposed Reporting Requirements	11
III.	Conclusion	11

1 **I. Introduction**

2 **Q. Please state your name and business address.**

3 A. My name is Christopher J. Connolly. My business address is 404 Wyman
4 Street, Waltham, Massachusetts 02451.

5

6 **Q. Are you the same Christopher J. Connolly who previously submitted**
7 **testimony in these proceedings?**

8 A. Yes. Capitalized terms defined in my direct testimony have the same
9 meanings here.

10

11 **Q. What is the purpose of your rebuttal testimony?**

12 A. The purpose of my rebuttal testimony is to respond to certain
13 recommendations presented in the testimonies of the Department of Public
14 Service Staff (“Staff”) Policy Panel (“SPP”) and Staff Information
15 Technology Panel (“SITP”). Specifically, I will address the following
16 topics:

17 (i) The SITP’s recommendation to apply cost adjustments to the GBE
18 Program, including the proposal to impose an overall cap on the
19 amount of investment the Companies can recover for the GBE
20 Program;

- 1 (ii) The SITP's recommendation of a downward-only net utility plant and
2 depreciation expense tracker applicable to the GBE Program;
- 3 (iii) The SITP's recommendation to implement specific performance
4 benchmarks related to the GBE Program; and
- 5 (iv) The SITP's recommendation to implement additional GBE Program
6 reporting.

7

8 **Q. Please summarize the Companies' response to Staff's testimony.**

9 A. The Companies filed rates for the Rate Year commencing April 1, 2020, and
10 submitted additional information to enable the Public Service Commission
11 (the "Commission") to set rates for the subsequent three years (*i.e.*, April 1,
12 2021 through March 31, 2024, which are collectively referred to hereinafter as
13 the "Data Years" and individually as a "Data Year"). Staff conducted a
14 thorough review of the Companies' GBE Program; however, the SITP limited
15 its testimony and recommendations to the Rate Year. As I explain below, in
16 some instances, the Companies agree with Staff's recommendations, but in
17 other areas we disagree. Where the Companies accept an adjustment or agree
18 with an issue raised by Staff, such acceptance or agreement is affirmatively
19 noted. Where the Companies disagree with Staff's position, or where more
20 information is needed to clarify the record, I indicate that in my testimony.

21

1 **II. Response to Staff's Recommendations and Proposed Adjustments**

2 **Q. Please summarize Staff's recommendations regarding the GBE Program.**

3 A. Staff's recommended adjustments and changes specific to the GBE Program
4 are described primarily at pages 45-49 of the SITP's testimony. The SITP
5 proposes:

6 (i) an adjustment to remove \$57.4 million of investment from the
7 GBE Program budget;

8 (ii) an overall cap on the amount of investment the Companies can
9 recover for GBE;

10 (iii) a downward-only net utility plant and depreciation expense
11 tracker for the GBE Program;

12 (iv) implementation of specific performance benchmarks related to
13 GBE; and

14 (v) additional GBE-specific reporting.

15 In addition to the foregoing, Staff also recommends changes in the rate of
16 return that would apply to National Grid USA Service Company, Inc.
17 ("Service Company") Information Technology ("IT") investments, which also
18 would have an impact on cost recovery by the Companies associated with the
19 GBE Program.

20

1 **A. Proposed \$57.4 Million Downward GBE Program Adjustment**

2 **Q. Please address the SITP’s proposal to remove \$57.4 million of investment**
3 **from the Companies’ GBE Program forecast budget.**

4 A. The SITP (pages 46-47) proposes an adjustment to reduce the investment
5 forecast for the GBE Program by \$57.4 million as follows: (i) \$12.2 million
6 reduction related to increased testing and training; (ii) \$21.17 million
7 reduction related to increased legacy project integration complexity; and (iii)
8 \$24.03 million reduction for allowance for funds used during construction
9 (“AFUDC”).

10

11 The Companies disagree with these proposed adjustments. As discussed in
12 the Companies’ response to Information Request (“IR”) DPS-970, a copy of
13 which is included in Exhibit ____ (SITP-1), pages 1438-1441, between the
14 2017 Niagara Mohawk Rate Case filing and the 2019 KEDNY/KEDLI filing
15 in this proceeding, the total planned budget for the GBE Program increased
16 from \$458.1 million to \$515.4 million. This amount excludes \$20.1 million
17 for the Strategic Assessment work in Fiscal Year (“FY”) 2017 for the
18 development of the GBE Program business case for which the Companies are
19 not seeking recovery. At the time rates were set in the 2017 Niagara Mohawk
20 Rate Case, the base budget for the GBE Program was forecast at \$458.1
21 million. In addition to the base forecast, the GBE Program budget reflected

1 \$61 million as a budget contingency in the event of unforeseen scope changes,
2 changing market conditions affecting vendor and procurement costs, and
3 unanticipated program complexity. Although Niagara Mohawk identified the
4 \$61 million amount as a budget contingency in its filing, no portion of it was
5 included in Niagara Mohawk's case because the costs were not sufficiently
6 certain at that time.

7
8 Since the 2017 Niagara Mohawk Rate Case, National Grid has completed the
9 procurement process as well as launched the Detailed Design and Delivery
10 Phase of the GBE Program, which firmed up the program spending details.
11 As I describe in my direct testimony (pages 25-28), and as detailed in the
12 Companies' responses to IRs DPS-684, DPS-725, and DPS-970, all of which
13 are included in Exhibit __ (SITP-1), the GBE Program has experienced
14 upward cost pressure and unanticipated program complexity due to several
15 factors. These factors include greater than anticipated challenges and
16 complexities replacing aged systems and developing legacy system interfaces
17 for the Companies' two existing customer information systems (\$21.168
18 million), increased workforce and subject matter expert testing and training
19 and associated software costs (\$12.196 million), and estimated AFUDC,
20 which had been incorrectly omitted from the original program cost estimates
21 (\$24.025 million). Based on the most recent actual and projected cost

1 information, National Grid sanctioned an additional \$57.4 million of costs
2 from what was reflected in the 2017 Niagara Mohawk Rate Case for the GBE
3 Program, and these updated costs are reflected in this case to set rates for
4 KEDNY and KEDLI. Through August 2019, National Grid has incurred
5 nearly half (\$27.7 million) of this total sanctioned amount to advance and
6 implement the GBE Program (\$7.653 million for testing and training; \$8.668
7 million to address legacy interfaces; and \$11.415 on AFUDC).

8
9 The SITP's basis for the \$57.4 million downward adjustment is to shield
10 customers from increased costs of the GBE Program. Although I recognize
11 the costs to implement the GBE Program are significant, they are being
12 incurred to enable the Companies to continue to provide safe and reliable
13 service for the benefit of customers into the future. Further, as I addressed in
14 my direct testimony (pages 33-36), in addition to replacing aged and duplicate
15 assets to support future operations, the GBE Program also provides the
16 foundation for enhanced capabilities that support operational benefits and
17 performance improvements. The savings to be delivered once the GBE
18 Program is fully implemented are estimated to significantly exceed the
19 investments in the enhanced capabilities of the program, as described in my
20 direct testimony and shown in Exhibit __ (CJC-5). Absent evidence that such
21 costs are unreasonable or imprudent, which Staff has not provided, the

1 Commission should approve the Companies' request to set its rates based on
2 the updated GBE Program costs, which include the \$57.4 million increase.
3 The Commission should reject Staff's proposed adjustment.

4
5 **B. Proposed Cap on GBE Program Cost Recovery**

6 **Q. Please address the SITP's proposal to set an overall cap on the amount of**
7 **investment the Companies can recover in rates for the GBE Program.**

8 A. Based on its recommendation to reduce the GBE Program expenditure
9 allowance by \$57.4 million, the SITP proposes to impose a cap on the portion
10 of the GBE Program costs the Companies could recover. Specifically, the
11 SITP would limit cost recovery by KEDNY based on maximum capital
12 expenditures of \$101.9 million and total operating expenses of \$45.2 million.
13 The SITP also would limit cost recovery by KEDLI based on maximum
14 capital expenditures of \$47.2 million and total operating expenses of \$20.9
15 million. The Companies disagree with the SITP's recommendation to impose
16 such caps on cost recovery.

17
18 As discussed above, the Companies disagree with the SITP's recommended
19 adjustment to reduce expenditures by \$57.4 million. These are reasonable and
20 prudent costs to implement the GBE Program for the benefit of customers and
21 are expected to provide efficiency and productivity savings as discussed in my

1 April 30 direct testimony. Furthermore, as I noted in my direct testimony
2 (page 26), by the Rate Year, KEDNY and KEDLI collectively will have
3 incurred more than \$67.4 million in costs in connection with the GBE
4 Program that are not reflected in their revenue requirements and therefore are
5 costs borne by shareholders for the benefit of customers. If the Commission
6 were to adopt the SITP's adjustment, the result would be that the Companies
7 would have incurred in excess of \$120 million in unremunerated costs to
8 deliver a project that will have longstanding and significant benefits to
9 customers. Absent a determination that the costs incurred to deliver the GBE
10 Program are unreasonable or imprudent, which Staff has not shown, limiting
11 recovery of costs based on an arbitrary cap that excludes the sanctioned \$57.4
12 million in necessary program costs would be confiscatory and unreasonable.

13

14 **C. Proposed Downward-Only Net Utility Plant and Depreciation**
15 **Expense Tracker**

16 **Q. Please describe the SITP's recommendation that the Companies**
17 **implement a downward-only net utility plant and depreciation expense**
18 **tracker for the GBE Program.**

19 **A.** The SITP proposes that the Companies implement a downward-only net
20 utility plant and depreciation expense tracker for the GBE Program similar to

1 what was adopted by the Commission in the 2017 Niagara Mohawk Rate
2 Case.

3

4 **Q. Do the Companies agree with the implementation of a downward-only**
5 **tracker in this case?**

6 A. No. Although a tracker may be appropriate for a multi-year rate plan, such as
7 the one adopted by the Commission for Niagara Mohawk, the rationale for
8 such a mechanism is less relevant for a litigated one-year case. Additionally,
9 given that the program operates under a cap for Niagara Mohawk, the
10 Companies are already incited to manage GBE Program costs. For these
11 reasons, the Companies do not support a downward-only tracker for the GBE
12 Program in these proceedings.

13

14 **D. Proposal to Implement Performance Benchmarks**

15 **Q. What is the position of the Companies regarding the SITP's**
16 **recommendation to implement specific performance benchmarks**
17 **related to the GBE Program?**

18 A. Although performance benchmarks may be appropriate as part of a negotiated
19 resolution of a multi-year rate plan, there is less of a basis for them in a one-
20 year litigated case. Therefore, unless this matter were to proceed to
21 negotiation that resulted in a multi-year resolution, the Companies do not

1 support establishing specific performance benchmarks for the GBE Program
2 relative to KEDNY and KEDLI. In the event a negotiated resolution of the
3 case was to be pursued, I recommend that any performance benchmarks that
4 may be established reflect updates and learnings since the time of the 2017
5 Niagara Mohawk Rate Case; and also that the positive incentive proposal
6 described in my direct testimony be incorporated as part of such a
7 performance benchmark program.

8
9 **E. Proposal to Modify Service Company Cost of Capital for Rate**
10 **Setting Purposes**

11 **Q. What is the position of the Companies on Staff's proposal to use its**
12 **proposed cost of capital and corporate structure to set the rate of return**
13 **applicable to GBE Program charges from the Service Company to the**
14 **Companies?**

15 A. The Companies disagree with the SITP's proposal to apply the Staff's
16 proposed cost of capital and capital structure to the GBE Program investments
17 of the Service Company. The matter is addressed in the Rebuttal Testimony
18 of Company Witness Jonathan Cohen.

19

1 **F. Proposed Reporting Requirements**

2 **Q. Do you agree with the SITP's recommendation that the Companies**
3 **implement the reporting and process requirements adopted in the**
4 **Niagara Mohawk Joint Proposal for the GBE Program?**

5 A. Yes. The Companies agree to implement the same quarterly and annual
6 reporting requirements for the GBE Program as they agreed to provide for
7 Niagara Mohawk. Also, the Companies agree to hold semi-annual meetings
8 with Staff similar as is done on behalf of Niagara Mohawk to (i) discuss
9 budget and actual GBE Program spending to date; (ii) provide an update on
10 the status of GBE Program initiatives that have been undertaken; and (iii)
11 review quarterly filings.

12

13 **III. Conclusion**

14 **Q. Does this conclude your testimony?**

15 A. Yes, it does.

1 procedures, engagement of all key stakeholders, labor relations, site and
2 governance readiness, and the supporting operational model and the ability
3 to realize expected benefits. The approach also includes incremental
4 readiness checks and regular business forums commencing six months in
5 advance of any go live to ensure sufficient time to manage and address any
6 concerns. The process continues post go live with measurement and
7 tracking of solution sustainment with metrics across people, process, and
8 technology.

9

10 **Q. Does this conclude your testimony?**

11 **A. Yes.**

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. GAVILONDO: Thank you.

3 BY MR. GAVILONDO: (Cont'g.)

4 Q. Now, with respect to your direct
5 testimony Mr. Connolly, did you sponsor 6 Exhibits
6 identified as C.J.C.-1 through C.J.C.-6?

7 A. Yes.

8 Q. Okay. Your Honors, those
9 exhibits have been pre-marked for identification as
10 exhibits -- as Hearing Exhibit numbers 52 through 57.
11 And Mr. Connolly, were those exhibits prepared by you
12 or under your direction and supervision?

13 A. Yes, they were.

14 Q. Okay. Thank you.

15 MR. GAVILONDO: Your Honors, the
16 witness is available for cross examination.

17 A.L.J. COSTELLO: Thank you. Mr.
18 Forst?

19 CROSS EXAMINATION

20 BY MR. FORST:

21 Q. Good afternoon. Being passed
22 around right now is a response document to an
23 information request titled D.P.S. 1045. It's a 3-
24 page response document submitted or responded to on
25 November 25th, 2019 and includes a -- an additional

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 31 pages of exhibits for a total of 34 pages. Just
3 take a second to review that. Was this response
4 prepared by you or under your direct supervision?

5 A. Yes.

6 Q. And is this a true and accurate
7 copy of the company's response to information request
8 D.P.S. 1045?

9 A. Yes, it is.

10 MR. FORST: Your Honors, I'd ask that
11 this be given a pre -- a marked exhibit number?

12 A.L.J. COSTELLO: Sure, that will be
13 marked as Exhibit 664.

14 MR. FORST: Thank you.

15 BY MR. FORST: (Cont'g.)

16 Q. Can you explain what a portfolio
17 anchor is?

18 A. Sure. A portfolio anchor as
19 referenced in our roadmap is a place in our timeline
20 where we have a major capability release of the
21 solution into our business.

22 Q. So another way of stating that is
23 it's similar to a project milestone?

24 A. Yeah. That would be fair.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. And for the Gas Business
3 Enablement Project or G.B.E., these milestones or
4 project anchors are numbered to correspond to
5 specific phases, is that correct?

6 A. That is correct.

7 Q. And would phases 1 and 2 refer to
8 project implementation for National Grid's companies
9 in Rhode Island?

10 A. Yes, that is correct, in addition
11 to Massachusetts electric business.

12 Q. Can you specify where phases 1
13 and 2 implement assets for the Massachusetts
14 companies?

15 A. So the only phase where we
16 implemented in the Massachusetts electric business as
17 released 2.3 July of 2019.

18 Q. Now you state in your response to
19 D.P.S. 1045 that the portfolio anchor that are -- for
20 the releases related to G.B.E. in Rhode Island were
21 delayed. Can you explain to what date these releases
22 were delayed?

23 A. The original release date for
24 release 2.3 was April of 2019.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. And so I think you just stated
3 earlier that 2.3 was completed in July of 2019?

4 A. That is correct.

5 Q. And the delays were necessary to
6 address what you referred to in the response as
7 defect resolution, is that correct?

8 A. Yes, that is correct.

9 Q. And were these defect resolutions
10 meant to address specific issues related to National
11 Grid's Rhode Island companies?

12 A. Correct, yes. National Grid's
13 Rhode Island company as well as Massachusetts
14 Electric.

15 Q. Is it correct that phase 3 refers
16 to implementation in New York?

17 A. Correct.

18 Q. So in your response to D.P.S.
19 1045 specifically your response to questions 1 and 4
20 which I believe is on page 2 of the response
21 document, you state that portfolio anchor 3.1 which
22 refers to implementation in upstate New York was
23 delayed from September to October 2019. And then you
24 state it was further delayed to October 2020, is that
25 correct?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. I'm just reviewing here the
3 response, give me a moment please.

4 MR. DECICCO: Counsel, did you mean
5 April 2020, Phil Decicco for the company?

6 MR. FORST: If I mis -- if I misspoke
7 and said April 2019, it's April 2020.

8 THE WITNESS: Thank you. That --
9 that's -- that's where I was confused in re --
10 reviewing the response again.

11 BY MR. FORST: (Cont'g.)

12 Q. Sorry. Just to clarify the
13 record, that should read September 2019 to October
14 2019, to then April 2020.

15 A. And -- and that would be correct.

16 Q. Yeah. And what is the current
17 anticipated date for the implementation of portfolio
18 anchor 3.1?

19 A. The current anticipated release
20 date for portfolio anchor 3.1 for our Niagara Mohawk
21 Power Corporation Operating Company is April of 2020.

22 Q. Does anchor 3.1 include any of --
23 any other National Grid New York operating companies?

24 A. It does not.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Referring to page 2 -- sorry, the
3 first page of the attachments to the response
4 document. This is the G.B. roadmap current. If you
5 refer down to portfolio anchor 3, there's a purple
6 box with then 2 purple arrows. I believe the bold
7 language on the right-side of the roadmap states
8 release 3.1 and 3.2 U.N.Y.N.L.I., April 2020. Could
9 you clarify what that refers to?

10 A. Sure. So release 3.1 refers to
11 our Niagara Mohawk Power Corporation, upstate New
12 York U.N.Y. release. Release 3.2 refers to our Long
13 island or KEDLI release.

14 Q. So would you say that the further
15 anchor phases for example, you know, 3.2, 3.3, 4, 5,
16 6 are referred to activities which include some or
17 all of the other National Grid New York operating
18 companies?

19 A. Yes, that is correct.

20 Q. And in your response to D.P.S.
21 1045, you stated that these further phases are
22 undergoing or have undergone various replanning
23 activities, is that correct?

24 A. Yes, it is.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. And you stated that this was
3 caused by cascading impact, is that correct?

4 A. Correct.

5 Q. Would you consider these
6 cascading impacts to be a factor which contributes to
7 the upward pressure on the budget contingency?

8 A. Yeah, it is, yes.

9 Q. And has there been any pro -- has
10 there been any progress in the replanning activity?

11 A. There has been progress, yes.
12 The team has progressed what we referred to as our
13 Gas Business Enhancement reset or G.B.E. reset. The
14 team is actively working through that reset and it is
15 not completed at this time.

16 Q. When is the anticipated
17 completion date of the G.B.E. reset?

18 A. The anticipated completion is
19 approximately mid-March, during which time the
20 recommendations will be presented to the senior
21 leadership team.

22 Q. And that's March 2020?

23 A. March 2020, correct.

24 Q. And when you stated that the
25 recommendations will be presented, is that

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 recommendations to be implemented or a battery of
3 recommendations that need to be considered and then
4 implemented?

5 A. It'll be -- well, it'll be a
6 recommendation presented to the senior leadership for
7 implementation.

8 Q. And included in those
9 recommendations are there updated release dates for
10 the further portfolio anchors listed in the roadmap?

11 A. Yes, there will be updated
12 release dates.

13 Q. And are those updated release
14 dates further or later in time than those indicated
15 on the roadmap included in the response to D.P.S.
16 1045?

17 A. They will change. I can't speak
18 to today what those changes are as I'm not involved
19 in those efforts through the reset.

20 Q. Referring to your response to
21 D.P.S. 1045 specifically question 3. You stated that
22 the -- there's an update to the last projected G.B.E.
23 budget of 569 million dollars, is that correct?

24 A. Yes, that is correct.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Is there an update to that figure
3 at this time?

4 A. As part of the reset, the team
5 has continued to work on what the final cost to
6 deliver the program will be. Again, I'm not part of
7 those conversations or activity, so I don't know what
8 the update is at this time.

9 Q. Has there been any
10 reconsideration of the percentage of costs associated
11 with the G.B.E. allocated to both KEDNY and KEDLI?

12 A. No, not to my knowledge.

13 Q. And haven't -- and to your
14 knowledge, has any other National Grid company had
15 their percentage share re -- redistributed or changed
16 based on these updates?

17 A. No.

18 Q. Okay.

19 MR. FORST: No further questions, Your
20 Honor.

21 A.L.J. COSTELLO: Any re-direct?

22 A.L.J. LEARY: Can I just clarify
23 something before you do redirect because I heard a
24 couple of dates KEDLI, Long Island, April 2020 for

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 release. I'm looking at the G.B.E. roadmap, is that
3 correct?

4 THE WITNESS: The KEDLI release is now
5 currently scheduled for May of 2020. So where it
6 refers to here in the roadmap as April of 2020 is now
7 May of 2020.

8 A.L.J. LEARY: And because of the
9 reset, will that be further extended? That May 2020
10 date?

11 THE WITNESS: No. It -- it will not.

12 A.L.J. LEARY: Okay.

13 THE WITNESS: So what's happening
14 right now is the team is currently in user acceptance
15 testing preparing for both the April and May
16 releases. And the decision to move forward, will be
17 subject to a go no-go decision by both the program
18 and the business. But they're currently on target
19 for those release dates.

20 A.L.J. LEARY: Okay. And then I see
21 what I think is a reference to KEDNY in New York City
22 for October 2020 as a release. And that looks like
23 it's 3.4?

24 THE WITNESS: That's correct.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: So there are actually 2
3 dates here relevant in the proceeding which would be
4 May 2020 and October 2020?

5 THE WITNESS: Correct.

6 A.L.J. LEARY: Okay. Thank you.

7 MR. GAVILONDO: Your Honor, if you --

8 A.L.J. LEARY: Sorry. As a result of
9 the reset, will the October 2020 date be further
10 extended?

11 THE WITNESS: It -- it likely will.
12 Again, I'm not involved in the most recent reset
13 discussions and activities so I -- I can't speak -- I
14 can't speculate on when that date will be.

15 A.L.J. LEARY: Well, are we talking
16 about a month or 6 months?

17 THE WITNESS: I -- I don't know, I
18 can't --

19 A.L.J. LEARY: Okay.

20 THE WITNESS: -- answer to that
21 question.

22 A.L.J. LEARY: Okay. Thank you.
23 Sorry about that.

24 MR. GAVILONDO: No, it's quite all
25 right, Your Honor. Can I just have 2 minutes to --

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: Yeah.

3 MR. GAVILONDO: Thank you.

4 A.L.J. COSTELLO: Off the record.

5 (Off the record 2:45 p.m.)

6 (On the record 2:46 p.m.)

7 MR. GAVILONDO: Okay. The company has
8 no re-direct for Mr. Connolly.

9 A.L.J. COSTELLO: Okay. Thank you.
10 Mr. Connolly, thank you for your testimony, and
11 you're excused.

12 THE WITNESS: Thank you.

13 A.L.J. LEARY: Let's call D.P.S. Staff
14 Policy Panel.

15 MR. GOODRICH: Your -- Your Honors, I
16 just -- be -- I was wondering if given time
17 constraints I know that the companies have brought up
18 Mr. Williard who's an S.I.R. witness. And I know
19 that if you want to -- if -- if it is desired to
20 reshuffle a little bit, I know that the Staff Policy
21 Panel would be available on, for example, Monday if -
22 - if -- you know, they don't get on by the end of
23 today. So if we wanted to reshuffle a little bit,
24 that would be --

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. COSTELLO: Yeah, that's fine.

3 If everybody --

4 MR. GOODRICH: -- possible?

5 A.L.J. COSTELLO: Is that agreeable --

6 A.L.J. LEARY: Is that okay?

7 A.L.J. COSTELLO: -- to the company to

8 --

9 A.L.J. LEARY: To go ahead with Mr.
10 Williard? Is that okay with everyone else because I
11 see --

12 A.L.J. COSTELLO: PULP.

13 A.L.J. LEARY: -- PULP. You have
14 questions A.R.P. has waived their questions, is that
15 okay Ms. Wheelock and Mr. Berkley?

16 MS. WHEELLOCK: Yes, Your Honors.

17 A.L.J. LEARY: Thanks. That was a
18 good idea, I think.

19 (Discussions)

20 A.L.J. COSTELLO: All right. We'll go
21 back on the record. Could the witness please state
22 your name and business address for the record?

23 MR. WILLIARD: My name is Charles
24 Williard.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. COSTELLO: Okay. Please stand
3 and raise your right hand. Do you swear or affirm
4 that the testimony you'll provide is the truth?

5 MR. WILLIARD: Yes, Your Honor.

6 WITNESS; CHARLES F. WILLIARD; Sworn

7 A.L.J. COSTELLO: Thank you. You may
8 be seated. And you may proceed.

9 DIRECT EXAMINATION

10 BY MR. EUTO:

11 Q. Good afternoon Mr. Williard. Can
12 you hear me okay?

13 A. Yes.

14 Q. Do you have before you a document
15 entitled Direct Testimony of Charles F. Williard
16 dated April 2019, consisting of 28 pages, a table of
17 contents and a cover sheet?

18 A. Yes, I do.

19 Q. Do you also have before you a
20 document entitled Rebuttal Testimony of Charles F.
21 Williard dated September 18th, 2019, consisting of 5
22 pages and a cover sheet?

23 A. Yes.

24 Q. Were all these documents prepared
25 by you or under your supervision?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. COSTELLO: Could -- can I just
3 -- for clarification purposes, I -- the testimony was
4 filed under the 2 separate documents I believe the
5 direct testimony?

6 THE WITNESS: Yeah -- yeah. To be
7 clear, Your Honors and apologies for that. I am
8 speaking --

9 THE REPORTER: You need to speak in to
10 your microphone as well.

11 THE WITNESS: I am speaking for case
12 19-G-0309 for the KEDNY docket.

13 A.L.J. COSTELLO: Okay. Thank you.

14 MR. EUTO: Thank you for that.

15 BY MS. EUTO:

16 Q. All right Mr. Williard, if I ask
17 you the questions contained in those documents today,
18 would your answers be the same?

19 A. (Inaudible)

20 Q. Do you adopt these documents as
21 your sworn testimony as if given orally in these
22 proceedings?

23 A. Go ahead, sorry. Can you repeat
24 that?

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Do you adopt these documents as
3 your sworn testimony as if given orally in these
4 proceedings?

5 A. Yes.

6 Q. Your Honor, I ask that the direct
7 and rebuttal testimony of Charles F. Williard be
8 transcribed into the record as if given orally in the
9 KEDNI docket.

10 A.L.J. COSTELLO: Okay. That request
11 is granted. If you can also lay the foundation for
12 the other documents I will just put them all in at
13 one time.

14 MR. EUTO: Okay.

15 BY MR. EUTO: (Cont'g.)

16 Q. All right Mr. Williard, I'm going
17 to turn to case 19-G-0310, the KEDLI docket. Do you
18 have before you a document entitled Direct Testimony
19 of Charles F. Williard dated April 2019 consisting of
20 17 pages, a table of contents and a cover sheet?

21 A. Yes.

22 Q. Do you also have before you a
23 document entitled Rebuttal Testimony of Charles F.
24 Williard dated September 18th, 2019, consisting of 5
25 pages and a cover sheet?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. Yes.

3 Q. Were all these documents prepared
4 by you or under your direction and supervision?

5 A. Yes.

6 Q. And if I ask you the -- the
7 questions contained in these documents today, would
8 your answers be the same?

9 A. Yes.

10 Q. Do you adopt these documents as
11 your sworn testimony as if given orally in these
12 proceedings?

13 A. Yes.

14 Q. Your Honor, I ask that the direct
15 and rebuttal testimony of Charles F. Williard be
16 transcribed into the record as if orally given in the
17 KEDLI docket.

18 A.L.J. COSTELLO: That request was
19 granted. At this point in the record the court
20 reporter should insert the following files.

21 The first one is KEDNY Charles F.
22 Williard direct testimony. The second is KEDLI
23 Charles F. Williard direct testimony and the last is
24 KEDNY-KEDLI Charles F. Williard rebuttal testimony. #

25

Before the Public Service Commission

THE BROOKLYN UNION GAS COMPANY d/b/a NATIONAL GRID NY

Direct Testimony

Of

Charles F. Willard

Dated: April 2019

Table of Contents

I.	Introduction and Qualifications	1
II.	SIR Program Overview	5
III.	SIR Program Costs	9
IV.	SIR Cost Control Efforts.....	25
V.	Compliance with Rate Case Filing Requirements	26

1 **I. Introduction and Qualifications**

2 **Q. Please state your name and business address.**

3 A. My name is Charles F. Willard. My business address is 300 Erie
4 Boulevard West, Syracuse, New York 13202.

5
6 **Q. By whom are you employed and in what capacity?**

7 A. I am employed by National Grid USA Service Company, Inc., a subsidiary
8 of National Grid USA (“National Grid”), and currently hold the position of
9 Director, Environmental Management. My responsibilities include
10 overseeing the environmental and site investigation and remediation
11 (“SIR”) programs for National Grid’s operating companies, including The
12 Brooklyn Union Gas Company d/b/a National Grid NY (“KEDNY” or
13 “Company”) and KeySpan Gas East Corporation d/b/a National Grid
14 (“KEDLI”).

15
16 **Q. Please describe your educational background and business experience.**

17 A. I am a graduate of the State University of New York at Geneseo with a
18 Bachelor of Arts degree in Geology. In addition, I hold a Masters in
19 Engineering Geology with a concentration in Environmental Engineering
20 from Drexel University and a Masters in Business Administration from
21 LeMoyne University.

1 I have been with National Grid since 1996. Prior to my appointment as
2 Director, Environmental Management in 2014, I held the positions of Lead
3 Environmental Engineer, Manager of New York SIR, and Director of SIR.
4 Before joining National Grid, I held various management level positions in
5 the field of environmental engineering and worked on projects such as
6 environmental investigations, feasibility studies, remedial designs, and
7 construction at large Environmental Protection Agency (“EPA”) Superfund,
8 Resource Conservation and Recovery Act, and New York State Superfund
9 sites.

10

11 **Q. Have you previously testified before the New York State Public Service
12 Commission (the “Commission”)?**

13 A. Yes. I testified on behalf of KEDLI and KEDNY in Cases 16-G-0058 and
14 16-G-0059 (collectively, the “2016 KEDNY and KEDLI Rate Cases”), and
15 on behalf of Niagara Mohawk Power Corporation d/b/a National Grid in
16 Cases 17-E-0238 and 17-G-0239.

17

18 **Q. What is the purpose of your testimony?**

19 A. The purpose of my testimony is to support the SIR costs included in
20 KEDNY’s revenue requirement. Specifically, I will:

21 (i) provide an overview of KEDNY’s SIR program;

- 1 (ii) discuss the historic level of SIR costs incurred by KEDNY,
2 including those incurred during the twelve months ended December
3 31, 2018 (“Historic Test Year”), as well as the forecast costs for the
4 twelve months ending March 31, 2021 (“Rate Year”) and the twelve
5 months ending March 31, 2022 (“Data Year 1”), March 31, 2023
6 (“Data Year 2”), and March 31, 2024 (“Data Year 3”) (collectively,
7 the “Data Years”);
- 8 (iii) present KEDNY’s proposal for recovery of SIR costs in the Rate
9 Year and Data Years, including its proposal to address the
10 significant level of projected SIR costs at the Newtown Creek and
11 Gowanus Canal Superfund sites; and
- 12 (iv) discuss KEDNY’s cost control procedures.

13
14
15
16
17

I will also address KEDNY’s compliance with the rate case filing requirements adopted by the Commission in its November 28, 2012 Order in Case 11-M-0034 (“SIR Generic Order”).

18 **Q. Do you sponsor any exhibits as part of your testimony?**

19 A. Yes. Attached to my testimony are the following exhibits and appendix
20 that were prepared under my direction and supervision:

- 21 (i) Exhibit __ (CFW-1) provides details on work progress at KEDNY’s

- 1 manufactured gas plant (“MGP”) and Superfund sites;
- 2 (ii) Exhibit __ (CFW-2) is an example of a New York State Department
3 of Environmental Conservation (“DEC”) Order on Consent;
- 4 (iii) Exhibit __ (CFW-3) is the Unilateral Administrative Order for the
5 remedial design of the Gowanus Canal Superfund Site;
- 6 (iv) Exhibit __ (CFW-4) is the Administrative Settlement Agreement
7 and Order on Consent for the remedial investigation and feasibility
8 study of the Newtown Creek Superfund Site;
- 9 (v) Exhibit __ (CFW-5) provides examples of changes to DEC remedy
10 decisions following discussions with KEDNY;
- 11 (vi) Exhibit __ (CFW-6) is a copy of the DEC work schedules for fiscal
12 years 2018, 2019, and 2020;
- 13 (vii) Exhibit __ (CFW-7) sets forth KEDNY’s compliance with existing
14 timetables and DEC requirements;
- 15 (viii) Exhibit __ (CFW-8) provides KEDNY’s past SIR program spend on
16 an annual basis for 2016 and 2017;
- 17 (ix) Exhibit __ (CFW-9) sets forth KEDNY’s SIR program spend in the
18 Historic Test Year;
- 19 (x) Exhibit __ (CFW-10) sets forth KEDNY’s forecast SIR program
20 spend in the Rate Year and Data Years; and
- 21 (xi) Appendix 1 sets forth the Company’s cost control efforts.

1 **II. SIR Program Overview**

2 **Q. Please provide a brief overview of KEDNY’s SIR program.**

3 A. KEDNY’s SIR program includes activities in connection with the
 4 management, investigation, and remediation of MGP and Superfund sites
 5 that have been contaminated by the past release of substances from property
 6 owned or formerly owned by KEDNY or its predecessors. KEDNY has
 7 responsibility for 27 MGP and two federal Superfund sites associated with
 8 waterways (Gowanus Canal and Newtown Creek) adjacent to former MGP
 9 sites. Both Superfund sites are in the remedial planning process. Of the
 10 27 MGP sites, seven sites are in site characterization or remedial
 11 investigation, five sites are in remedial planning, one site is in remedial
 12 action and nine sites are have been either remediated but are subject to
 13 future monitoring and/or are subject to site management obligations. Five
 14 sites have received a “No Further Action” determination following site
 15 characterization and/or remediation, with four of the five no longer reported
 16 to DEC. As I will discuss later in my testimony, remediation and
 17 investigation activities at the Gowanus Canal and Newtown Creek
 18 Superfund sites are projected to cause KEDNY to incur significant SIR
 19 costs in the Rate Year, Data Years, and beyond.

20
 21 Exhibit __ (CFW-1) describes the sites currently being managed by

1 KEDNY. The exhibit includes the background of each site, and details the
2 investigation and remediation activities that have taken place over the last
3 three years from January 2016 through the end of the Historic Test Year.

4

5 **Q. What types of costs does KEDNY incur under its SIR program?**

6 A. Costs under KEDNY's SIR program include consultant and contractor
7 costs, remediation activities aimed at reducing the volume, toxicity, or
8 mobility of pre-existing contamination, and incremental external costs
9 (including insurance and legal costs) incurred to seek recovery from third
10 parties or to otherwise mitigate the Company's SIR costs or liabilities.

11

12 **Q. What roles do the DEC and other regulatory agencies play with regard**
13 **to the scope and timing of investigation and remediation work**
14 **conducted at MGP and Superfund sites?**

15 A. The DEC and EPA control the scope and timing of work at MGP and
16 Superfund sites. The scope of KEDNY's site investigations, work plans,
17 clean-up, and field work decisions are reviewed, approved, and/or expanded
18 by the DEC and/or the EPA pursuant to various orders. An example Order
19 on Consent for 23 of KEDNY's MGP sites is provided in Exhibit __ (CFW-
20 2). The Unilateral Administrative Order for the remedial design of the
21 Gowanus Canal Superfund site and the Administrative Settlement

1 Agreement and Order on Consent for the remedial investigation and
 2 feasibility study of the Newtown Creek Superfund site are provided in
 3 Exhibit __ (CFW-3) and Exhibit __ (CFW-4), respectively. Although the
 4 Company has limited control over the scope and timing of SIR activities,
 5 KEDNY challenges the DEC and EPA when a more cost effective and
 6 equally protective remedy is available and, as described later in my
 7 testimony, manages costs in the areas it can control, such as contracting
 8 procedures. Exhibit __ (CFW-5) provides examples of changes to DEC
 9 remedy decisions and value engineering related modifications following
 10 discussions with KEDNY that resulted in cost savings to customers.

11

12 **Q. How is the schedule for work at MGP sites determined?**

13 A. Prior to the beginning of each New York State fiscal year (April 1 through
 14 March 31), KEDNY and the DEC meet to discuss the upcoming work
 15 schedule. The DEC approves the work schedule for the upcoming fiscal
 16 year only. As a result, the amount of spending in a given year is highly
 17 dependent upon the DEC and other third parties, including private property
 18 owners, permitting authorities, *et cetera*. While the DEC only approves a
 19 one-year schedule, in the course of meetings, the Company and the DEC
 20 discuss the anticipated logical progression of work at each site for an

21

1 additional year beyond the upcoming fiscal year, which gives the Company
2 a sense of the projected work that will be required.

3
4 The DEC-approved schedule for the twelve months ended March 31, 2018,
5 March 31, 2019 and March 31, 2020 is provided in Exhibit __ (CFW-6).
6 The schedule includes KEDNY's 23 actively tracked MGP sites subject to
7 DEC Orders on Consent. One site Jamaica Gas Light received a "No
8 Further Action" determination during the past year. Three sites (Jamaica
9 Holder Station, Keap Street Holder Station, and Rutledge Street Holder
10 Station) have received "No Further Action" determinations and are no
11 longer tracked with the DEC. Remediation at a fourth site, the Newtown
12 Holder Station, was previously completed and the site closed in
13 approximately 2002.

14
15 The schedule for work at the Gowanus Canal and Newtown Creek
16 Superfund sites as required by the EPA is discussed later in my testimony.

17
18 **Q. Has the Company prepared an exhibit demonstrating that its**
19 **remediation process is in compliance with existing timetables and DEC**
20 **and EPA requirements?**

21 A. Yes. Exhibit __ (CFW-7) shows the status as of the end of calendar year

1 2018 for each site, indicates whether there was a difference between the
 2 scheduled activities and the activities actually completed and, if there was
 3 a difference, explains the reason. Variance from the timetable has occurred
 4 at six of KEDNY's MGP sites and were due to delays resulting from site
 5 access constraints, negotiated work scope changes due to changes in
 6 regulatory or site conditions, and regulatory reviews or approvals, all of
 7 which were outside of KEDNY's control.

8

9 **Q. Has KEDNY discussed the differences identified in Exhibit __ (CFW-**
 10 **7) with the DEC and EPA?**

11 A. Yes. KEDNY updates the DEC bi-monthly and the EPA monthly on the
 12 status of each site. Further, the Company's project managers communicate
 13 with the DEC's and EPA's project managers on project schedule and
 14 progress of work as necessary. Based on these updates, it is my
 15 understanding that the DEC and EPA are satisfied with KEDNY's progress.

16

17 **III. SIR Program Costs**

18 **Q. What level of SIR costs does KEDNY currently recover annually**
 19 **through base rates?**

20 A. KEDNY currently recovers (i) historic, unrecovered SIR expenditures in an
 21 amount equal to one-tenth of the forecast SIR deferral balance as of

1 December 31, 2016 (\$18.521 million per year) and (ii) forecast SIR costs of
 2 \$53.872 million in calendar year 2017, \$45.653 million in calendar year
 3 2018, and \$46.767 million in calendar 2019) (the “Forecast Rate
 4 Allowance”). These amounts were approved in the Commission’s
 5 December 16, 2016 Order in the 2016 KEDNY and KEDLI Rate Cases.
 6 Because remediation and investigation activities at the Gowanus Canal and
 7 Newtown Creek sites were in their early stages at the time of the 2016
 8 KEDNY and KEDLI Rate Cases, it was difficult to accurately forecast SIR
 9 expenses attributable to clean-up those sites. Consequently, forecast SIR
 10 costs associated with the Gowanus Canal and Newtown Creek sites are not
 11 currently included in base rates. However, given the uncertain timing and
 12 potential magnitude of these costs, the Joint Proposal adopted by the
 13 Commission authorized KEDNY to defer any costs related to those sites
 14 and implemented an SIR Recovery Surcharge that would be triggered if
 15 KEDNY incurred total SIR costs above a set threshold.

16

17 **Q. Does KEDNY fully reconcile SIR costs?**

18 A. Yes. Each year, KEDNY fully reconciles its actual SIR expense (inclusive
 19 of Gowanus Canal and Newtown Creek costs) to the Forecast Rate
 20 Allowance. Any under or over expenditures are deferred for future refund
 21 to or recovery from customers (with the exception of the Citizens site).

1 Under the Joint Proposal, KEDNY agreed to absorb 10 percent of the
2 remaining investigation costs for the Citizens site pursuant to the Stipulation
3 and Agreement Resolving Corporate Structure Issues and Establishing
4 Multi-Year Rate Plan, dated June 25, 1996 in Case 95-G-0671.

5

6 **Q. Please explain how the SIR Recovery Surcharge operates.**

7 A. Beginning in calendar year 2018, if the difference between actual SIR
8 expense (inclusive of Gowanus Canal and Newtown Creek costs) and the
9 Forecast Rate Allowance exceeds \$25 million on a cumulative basis,
10 KEDNY is authorized to recover through the SIR Recovery Surcharge (i)
11 the difference between actual SIR expense and the Forecast Rate Allowance
12 and (ii) any amount that was not recovered in the prior rate year's SIR
13 Recovery Surcharge (if triggered) because the cumulative difference
14 between actual SIR costs and the Forecast Rate Allowance did not exceed
15 the \$25 million threshold and/or the amount would have increased
16 KEDNY's aggregate revenues by more than two percent.

17

18 To date, KEDNY has not triggered the SIR Recovery Surcharge.
19 However, as explained below, given the size of the costs associated with
20 Gowanus Canal and Newtown Creek, the same circumstances that

1 supported Commission approval of KEDNY's SIR Recovery Surcharge still
2 exist and warrant continuation of the mechanism.

3

4 **Q. What have the Company's historic SIR costs been?**

5 A. Prior to the Historic Test Year, during calendar years 2016 through 2017,
6 KEDNY conducted investigation, remediation, and operations,
7 maintenance and monitoring ("OM&M") activities pursuant to Orders on
8 Consent or EPA Administrative Agreements under the DEC's and EPA's
9 remedial programs at 23 of its MGP and Superfund sites. KEDNY
10 incurred approximately \$47 million and \$52 million of SIR costs in 2016
11 and 2017, respectively, for these activities. While investigation and
12 OM&M activities contributed to a steady and significant level of costs
13 during this time period, increased spending was primarily due to the
14 remedial construction activities at the Williamsburg MGP site and remedial
15 program spending related to the Gowanus Canal and Newtown Creek
16 Superfund sites.

17

18 **Q. What SIR costs did KEDNY incur in the Historic Test Year?**

19 A. KEDNY incurred \$32.682 million in SIR costs in the Historic Test Year, as
20 shown in Exhibit __ (CFW-9). Of this amount, \$12.486 million was
21 incurred for design work at Gowanus Canal and \$7.489 million for remedial

1 investigation activities at Newtown Creek (totaling \$19.975 million). The
 2 remaining \$12.707 million was for investigation and remediation activities
 3 at 24 of KEDNY's MGP sites. These activities included: remedial
 4 planning, remedial action, or OM&M activities at 17 sites; site
 5 characterization or remedial investigation activities at seven sites; and SIR
 6 Program activities.

7

8 **Q. What is KEDNY's forecast of SIR costs for work at the Company's**
 9 **MGP sites?**

10 A. As shown in Exhibit __ (CFW-10), KEDNY forecasts SIR costs for work
 11 at MGP sites to be \$66.088 million in the Rate Year and \$62.635 million,
 12 \$44.916 million, and \$30.040 million in Data Years 1, 2 and 3, respectively.
 13 These forecasts do not include projected costs for Gowanus Canal or
 14 Newtown Creek, which are addressed separately below.

15

16 **Q. Please explain how KEDNY developed its forecast of SIR costs for work**
 17 **at its MGP sites.**

18 A. The DEC schedule is not yet available for the Rate Year or Data Years.
 19 Therefore, to develop the forecast, KEDNY utilized the current approved
 20 DEC schedule as well as the anticipated work schedule for fiscal year 2020.
 21 KEDNY took into account the status of each site and knowledge derived

1 from project managers regarding site progress and potential delays to
 2 determine the projected work on a site-by-site basis. KEDNY projected
 3 costs for each site based on the nature of the work at the site and the
 4 expected remedy for those sites where a remedy has been selected (*e.g.*,
 5 excavation of site soils, containment recovery, installation of barrier walls,
 6 treatment of groundwater, *et cetera*), site specific conditions, and past
 7 spending and estimates provided by consultants for the anticipated work.
 8 In instances where the project manager anticipated delays (*e.g.*, potential
 9 site access issues, permitting delays, or onsite condition constraints), the
 10 timing of the work was adjusted in the forecast.

11

12 **Q. What are the major drivers of SIR costs in the Rate Year for KEDNY's**
 13 **MGP sites?**

14 A. While KEDNY has made progress at most of its MGP sites, SIR spending
 15 above the Historic Test Year level is expected to continue through the Rate
 16 and Data Years. The increase in SIR costs at KEDNY's MGP sites (*i.e.*,
 17 excluding Gowanus Canal and Newtown Creek) from \$12.707 million in
 18 the Historic Test Year to \$66.088 million in the Rate Year is due to remedial
 19 action work that KEDNY anticipates will take place, and work that was
 20 delayed in the Historic Test Year that will now take place in the Rate Year.
 21 While the Company will continue its investigation and remediation

1 activities at all 24 sites worked on in the Historic Test Year, approximately
 2 90 percent of the spending forecast for the Rate Year is due to activity at
 3 four sites and MGP Program activities. Specifically, KEDNY will be
 4 conducting significant remedial activities at the Citizens Gas Works, Fulton
 5 Municipal Gas Works, Metropolitan Gas Works, and Greenpoint sites, as
 6 well as MGP Program activities. This work is described below. Portions
 7 of the remedial plans at three of these sites (*i.e.*, Citizens, Fulton Municipal
 8 Gas Works, and Metropolitan Gas Works) must be completed on a schedule
 9 coordinated with the EPA’s schedule for the Gowanus Canal remediation.

10
 11 Citizens and Fulton Municipal Gas Works - Both sites were in the remedial
 12 planning (design) phase during the Historic Test Year, have commenced
 13 procurement of remedial contractor services, and are expected to progress
 14 to the remedial action phase in the Rate Year and Data Years resulting in a
 15 significant ramp up in spending. The work will include construction of
 16 deep barrier walls along the Gowanus Canal and soil excavation activities
 17 as part of the DEC-selected site remedies.

18
 19 Metropolitan Gas Works - The Metropolitan site was in the remedial
 20 planning (remedy selection) phase during the Historic Test Year and is
 21 expected to progress to the remedial action phase in the Rate Year and Data

1 Years. The work is expected to include remedial measures that are
 2 protective of the Gowanus Canal. The DEC has not yet selected a remedy
 3 for the Metropolitan site but is expected to support the EPA’s remedy
 4 schedule for the Gowanus Canal.

5
 6 Greenpoint - Greenpoint was in the remedial investigation phase during the
 7 Historic Test Year. Given the size of this 100-acre site, the remedial
 8 investigation is being performed in multiple phases that may continue into
 9 the Rate Year. It is expected that, in consultation with the DEC, specific
 10 remedial objectives will be established, and interim remedial measure will
 11 be conducted, to begin addressing environmental conditions within specific
 12 areas at the site. In addition, Site Management Plan support activities are
 13 expected to address site related contamination on an as necessary basis
 14 through this period. The site is expected to transition into the remedial
 15 planning phase in the Data Years.

16
 17 SIR Program Activities – Activities including pursuit of cost recovery from
 18 other parties and legacy insurance policies is expected to continue along
 19 with other SIR Program activities.

20
 21

1 **Q. What are the major drivers of SIR costs in the Data Years for**
 2 **KEDNY's MGP sites?**

3 A. For Data Year 1, KEDNY forecasts spending to remain significant and at
 4 levels consistent with the Rate Year, at approximately \$62.635 million. In
 5 Data Year 1, the four sites listed above and the MGP Program activities are
 6 expected to continue, as explained above. In addition, the Nassau site is
 7 expected to have higher spend for remedial construction and investigation
 8 and site management support activities.

9 In Data Year 2, KEDNY anticipates spending approximately \$44.916
 10 million. Significant spending is expected to continue at the Fulton site, and
 11 increased spends at the Greenpoint, Williamsburg, Jamaica Gas Light, and
 12 Nassau sites in support of remedial activities.

13
 14 For Data Year 3, KEDNY forecasts spending to remain significant but
 15 lower than the Rate Year, Data Years 1, and Data Year 2 levels, at
 16 approximately \$30.040 million. Significant spending is expected to
 17 continue at the Fulton and Greenpoint sites, but decrease at the
 18 Williamsburg and Nassau sites. Moderate spending at the Fulton site will
 19 continue in support of remedial activities.

20

21

1 **Q. Could actual SIR costs differ from the Company’s forecast for the**
 2 **MGP sites?**

3 A. The forecast reflects the Company’s best estimate of SIR costs. While
 4 KEDNY believes that its forecast is reasonable, SIR costs are subject to a
 5 high degree of variability, through no fault of the Company, as projects are
 6 subject to schedule and scope modifications by the DEC and the EPA, as
 7 well as site access issues with property owners or delays resulting from
 8 onsite condition constraints. In addition, estimates of future costs for SIR
 9 activities can be significantly influenced by the pace of redevelopment in
 10 areas where former MGP facilities are located. Areas of Brooklyn that
 11 historically were used for industrial and commercial purposes, particularly
 12 along waterfronts, are being redeveloped rapidly for residential and mixed
 13 use. Redevelopment at these properties or adjacent properties could
 14 significantly influence the schedule and scope of remedial activities at a
 15 number of sites. KEDNY’s forecast reflects costs that it expects will be
 16 incurred in the Rate Year and Data Years; however, there is a risk that actual
 17 costs could be more or less. Accordingly, as discussed below, KEDNY is
 18 proposing to continue fully reconciling these costs.

19

1 **Q. Turning to the Gowanus Canal and Newtown Creek Superfund sites,**
2 **please provide some background on these sites.**

3 A. Gowanus Canal - KEDNY had three former MGP facilities located along
4 the Gowanus Canal – Fulton, Citizens, and Metropolitan. These former
5 MGP facilities are individual remediation projects (as discussed above) and,
6 along with other industries and processes located on or near the Canal, have
7 contributed to the need for environmental remediation of the Canal itself,
8 which is listed on the EPA’s Superfund National Priorities List.

9
10 In 2013, the EPA identified a remediation plan for the Canal that involves
11 removing contaminated sediment via dredging, installing a cap, and other
12 activities. In 2014, the EPA issued a Unilateral Administrative Order,
13 provided in Exhibit __ (CFW-3), to KEDNY and 26 other parties to perform
14 the remedial design of the EPA’s selected remedy in accordance with the
15 schedule set by the EPA. Because of pressures to redevelop the area
16 around the Gowanus Canal, the EPA led and expedited the completion of
17 the remedial investigation and feasibility study in a little more than two
18 years. The cleanup is being designed in multiple phases. Once the final
19 design for each phase is approved, it is expected that active construction to
20 remediate the Canal will begin and take place over a five to seven-year
21 period. In addition to KEDNY, at least 26 other parties are responsible for

1 the remedial design of the Gowanus Canal under the Unilateral
2 Administrative Order and could be potentially responsible for construction
3 and cleanup under future EPA orders. KEDNY has been proactive in its
4 efforts to research and work with the EPA to identify and engage these and
5 other potentially responsible parties to equitably share the cost of
6 investigation and remediation. KEDNY was initially approached to
7 complete the work on its own, but refused, citing the multiple other parties
8 that share responsibility.

9

10 Newtown Creek - At the Newtown Creek Superfund site, the remedial
11 investigation and feasibility study commenced in 2011 and is in progress.
12 This project is proceeding more slowly than Gowanus Canal because the
13 EPA is pursuing a traditional remedial investigation conducted by a group
14 of responsible parties. KEDNY and five other responsible parties have
15 entered an Administrative Settlement Agreement and Order on Consent,
16 provided in Exhibit __ (CFW-4), with the EPA to conduct the Newtown
17 Creek remedial investigation and feasibility study. The remedial
18 investigation of this site is in its final stages and the feasibility study to
19 develop and evaluate remedial alternatives has commenced. However, it
20 is likely to be some time before a remedy is evaluated, selected, and
21 designed, and construction commences. During the remedy evaluation

1 process, it is expected that some supplemental investigation will be
 2 required. Given the size and complexity of this site, the remainder of the
 3 investigation, design, and construction is likely to be lengthy, extensive, and
 4 costly. The responsible parties have proposed an Early Action to the EPA
 5 and are working with to develop the scope and objectives for this expedited
 6 remedial work that will target a portion of Newtown Creek.

7
 8 KEDNY continues to be very active in discussions with the other
 9 responsible parties and with the EPA to manage the process and ensure a
 10 fair and equitable characterization of impacts and allocation of
 11 responsibility. KEDNY also is working with the other responsible parties
 12 who executed the settlement agreement to develop information regarding
 13 the operations and resulting environmental impacts of still other responsible
 14 parties to enable KEDNY to seek cost recovery proportionate to its
 15 equitable share of liability.

16

17 **Q. Does the Company expect to incur SIR costs in the Rate Year and Data**
 18 **Years for the Gowanus Canal and Newtown Creek sites?**

19 A. Yes. KEDNY expects to incur significant SIR costs for work performed
 20 in the Rate Year and Data Years for both Gowanus Canal and Newtown
 21 Creek. The precise amount of these costs, however, remains difficult to

1 estimate with reasonable certainty given the dynamic scope of these projects
2 and the number of parties involved.

3
4 With respect to the Gowanus Canal, the process of dredging and capping
5 sediments in the first of three remediation areas along with the remedial
6 design for areas two and three are expected to occur in the Rate Year. The
7 completion of the remedial design, bulkhead construction along the canal,
8 and the start of sediment dredging and capping in remediation areas two and
9 three is anticipated during Data Years 1, 2, and 3. The work will be
10 conducted in accordance with the EPA Record of Decision, which estimated
11 the total project cost at \$506 million. The pace of progress and the
12 associated costs are highly dependent on regulatory drivers and third-party
13 access and cooperation along the entire length of the canal.

14
15 As to Newtown Creek, work is expected to continue through the Rate Year
16 and Data Years and involve the completion of both the Remedial
17 Investigation and Feasibility Study process, with the projected issuance of
18 a Record of Decision in 2024. The longer-term costs associated with the
19 feasibility study and remedy selection process, the early action in a portion
20 of Newtown Creek, and other project costs are highly uncertain given the
21 changing scope and schedule of the project, which is being driven by the

1 EPA. While near term spending at the Gowanus Canal is expected to be
2 higher, the total costs for Newtown Creek are likely to exceed those of
3 Gowanus Canal, as Newtown Creek is larger, more polluted, and will
4 require extensive design and remediation work.

5

6 **Q. What is KEDNY’s proposal for recovery of its SIR costs?**

7 A. KEDNY proposes to include the following three cost components in base
8 rates:

- 9 (i) forecast MGP-related SIR costs of \$66.088 million in the Rate Year,
10 \$62.635 million in Data Year 1, \$44.915 million in Data Year 2, and
11 \$30.040 million in Data Year 3;
- 12 (ii) \$20 million in each of the Rate Year and Data Years for costs
13 associated with remediation of Gowanus Canal and Newtown
14 Creek, based on the combined spending on these sites during the
15 Historic Test Year; and
- 16 (iii) the current amortization of \$18.521 million annually, representing
17 one-tenth of the forecast deferral balance at December 31, 2016.

18

19 While it is difficult to estimate the costs for the Gowanus Canal and
20 Newtown Creek Superfund sites, there are certain baseline project costs that
21 are expected to continue in the Rate Year and Data Years and can be

1 estimated with reasonable confidence. The combined spending for the
 2 Gowanus Canal and Newtown Creek during the Historic Test Year totaled
 3 approximately \$20 million and is projected to be representative of the
 4 baseline spending for these two sites over the next several years.
 5 Consequently, the Company’s forecast includes \$20 million as the
 6 reasonable estimate of baseline costs for the Superfund sites.

7
 8 KEDNY also proposes to continue the current SIR reconciliation, whereby
 9 any difference between actual SIR expense (including actual Gowanus
 10 Canal and Newtown Creek costs) would be reconciled to the base rate
 11 allowance (exclusive of the amortization), with any difference deferred for
 12 future recovery from, or credit to, customers. The provision in the current
 13 reconciliation related to the Citizen’s site would continue. In addition,
 14 KEDNY proposes to continue the current SIR Recovery Surcharge.

15

16 **Q. Why does KEDNY believe that its proposal is consistent with the**
 17 **Commission’s guidance and in the best interests of customers?**

18 A. The rate recovery proposal is consistent with the SIR Generic Order as it is
 19 tailored to address the specific conditions at KEDNY – namely, the rate
 20 allowance reflects significant forecast SIR costs combined with a means to
 21 recover a portion of KEDNY’s historic deferral balance. In the SIR

1 Generic Order, the Commission noted its intent to retain the flexibility to
 2 “tailor the rate treatment of SIR costs to the concrete conditions of each
 3 utility” and moderate annual bill impacts by spreading the amortization of
 4 costs over a longer period “as needed and as dictated by the costs in specific
 5 rate cases.” Increasing the rate allowance for forecast MGP-related SIR
 6 costs and including a baseline projection of costs for Gowanus Canal and
 7 Newtown Creek allows the Company to recover costs going forward and
 8 avoids adding to an already substantial deferral balance. Maintaining the
 9 SIR Recovery Surcharge enables the Company to mitigate bill impacts by
 10 not reflecting an overly aggressive forecast in base rates for Gowanus Canal
 11 and Newtown Creek, while addressing the uncertainty in forecasting
 12 expenditures should the costs for these two Superfund sites accelerate in the
 13 Rate Year and Data Year. These same circumstances justified the
 14 Commission’s adoption of the SIR Recovery Surcharge in the 2016
 15 KEDNY and KEDLI Rate Cases. The recovery proposal reflects the
 16 specific SIR cost issues affecting the Company and is intended to avoid
 17 future rate shock to customers.

18

19 **IV. SIR Cost Control Efforts**

20 **Q. What steps has the Company undertaken to control its SIR costs and**
 21 **liabilities?**

1 A. KEDNY follows the cost management practices set forth in the Inventory
 2 of Best Practices for Utility SIR Programs established in the SIR Generic
 3 Order and as clarified by the DEC. Appendix 1 describes the Company's
 4 cost control efforts.

5
 6 **Q. Has the Commission previously reviewed KEDNY's cost control
 7 measures?**

8 A. Yes. In its November 28, 2012 Order in Case 06-G-1185, which
 9 authorized KEDNY to recover a portion of its SIR deferral balance, the
 10 Commission found that KEDNY had employed cost effective measures and
 11 that the costs through December 31, 2009 had been prudently incurred. In
 12 its October 19, 2015 Order in Case 15-G-0323, the Commission reviewed
 13 the Company's oversight and cost containment procedures and found that
 14 they appeared reasonable. More recently, in its December 16, 2016 Order
 15 in the 2016 KEDNY and KEDLI Rate Cases, the Commission noted that
 16 Staff had reviewed and concurred that the Company was pursuing all
 17 appropriate cost control efforts.

18
 19 **V. Compliance with Rate Case Filing Requirements**

20 **Q. Are you familiar with the rate case filing requirements adopted by the
 21 Commission in the SIR Generic Order?**

1 A. Yes, I am. At page 30 of the SIR Generic Order, the Commission required
 2 that “[in] any future rate filing in which a utility seeks to recover SIR
 3 expenses, the utility must provide sworn testimony (1) establishing that the
 4 remediation process is in compliance with existing timetables and DEC
 5 requirements, or providing explanations for any divergence; (2) discussing
 6 the utility’s SIR cost control efforts, including an attestation to utility
 7 compliance with the best practices inventory; and (3) indicating the results
 8 of any internal process the utility may have conducted with respect to
 9 review of SIR procedures, and in particular explaining how internal controls
 10 are brought to bear on site investigation and remediation projects.”

11

12 **Q. Has the Company complied with each of these requirements in this**
 13 **filing?**

14 A. Yes, it has.

15

16 **Q. Please discuss the Companies’ compliance with each of these**
 17 **requirements.**

18 A. Earlier in my testimony, I discussed the Company’s compliance with
 19 existing timetables and DEC requirements, with reference to Exhibit __
 20 (CFW-7). The Company’s cost control efforts are also discussed earlier in
 21 my testimony and in Appendix 1, which details SIR cost control efforts.

1 With respect to the Company's internal controls and how they apply to SIR
2 projects, National Grid has conducted internal reviews of the administration
3 and management of the SIR group, as well as the adequacy of controls to
4 meet significant environmental obligations. Further, as discussed above
5 and in Appendix 1, the Company utilizes established procedures for
6 selecting environmental consultants and contractors as well as a rigorous
7 process for reviewing and approving consultant and contractor invoices as
8 additional internal controls on SIR projects.

9

10 **Q. Does this conclude your testimony?**

11 A. Yes.

Before the Public Service Commission
KEYSPAN GAS EAST CORPORATION d/b/a NATIONAL GRID
Direct Testimony
Of
Charles F. Willard

Dated: April 2019

Table of Contents

I. Introduction and Qualifications1

II. SIR Program Overview5

III. SIR Program Costs9

IV. SIR Cost Control Efforts.....15

V. Compliance with Rate Case Filing Requirements16

Introduction and Qualifications

1 **Q. Please state your name and business address.**

2 A. My name is Charles F. Willard. My business address is 300 Erie Boulevard
3 West, Syracuse, New York 13202.

4
5 **Q. By whom are you employed and in what capacity?**

6 A. I am employed by National Grid USA Service Company, Inc., a subsidiary
7 of National Grid USA (“National Grid”), and currently hold the position of
8 Director, Environmental Management. My responsibilities include
9 overseeing the environmental and site investigation and remediation
10 (“SIR”) programs for National Grid’s operating companies, including The
11 Brooklyn Union Gas Company d/b/a National Grid NY (“KEDNY”) and
12 KeySpan Gas East Corporation d/b/a National Grid (“KEDLI” or
13 “Company”).

14
15 **Q. Please describe your educational background and business experience.**

16 A. I am a graduate of the State University of New York at Geneseo with a
17 Bachelor of Arts degree in Geology. In addition, I hold a Masters in
18 Engineering Geology with a concentration in Environmental Engineering
19 from Drexel University and a Masters in Business Administration from
20 LeMoyne University.

I have been with National Grid since 1996. Prior to my appointment as Director, Environmental Management in 2014, I held the positions of Lead Environmental Engineer, Manager of New York SIR, and Director of SIR. Before joining National Grid, I held various management level positions in the field of environmental engineering and worked on projects such as environmental investigations, feasibility studies, remedial designs, and construction at large Environmental Protection Agency (“EPA”) Superfund, Resource Conservation and Recovery Act, and New York State Superfund sites.

Q. Have you previously testified before the before the New York State Public Service Commission (the “Commission”)?

A. Yes. I testified on behalf of KEDLI and KEDNY in Cases 16-G-0058 and 16-G-0059 (collectively, the “2016 KEDNY and KEDLI Rate Cases”), and on behalf of Niagara Mohawk Power Corporation d/b/a National Grid in Cases 17-E-0238 and 17-G-0239.

1 **Q. What is the purpose of your testimony?**

2 A. The purpose of my testimony is to support the SIR costs included in
3 KEDLI’s revenue requirement. Specifically, I will:

- 4 (i) provide an overview of KEDLI’s SIR program;
- 5 (ii) discuss the historic level of SIR costs incurred by KEDLI, including
6 those incurred during the twelve months ended December 31, 2018
7 (“Historic Test Year”), as well as the forecast costs for the twelve
8 months ending March 31, 2021 (“Rate Year”) and the twelve
9 months ending March 31, 2022 (“Data Year 1”), March 31, 2023
10 (“Data Year 2”), and March 31, 2024 (“Data Year 3”) (collectively,
11 the “Data Years”);
- 12 (iii) present KEDLI’s proposal for recovery of SIR costs in the Rate
13 Year and Data Years; and
- 14 (iv) discuss KEDLI’s cost control procedures.

15

16 I will also address KEDLI’s compliance with the rate case filing
17 requirements adopted by the Commission in its November 28, 2012 Order
18 in Case 11-M-0034 (“SIR Generic Order”).

19

1 **Q. Do you sponsor any exhibits as part of your testimony?**

2 A. Yes. Attached to my testimony are the following exhibits and appendix that
3 were prepared under my direction and supervision:

4 (i) Exhibit __ (CFW-1) provides details on the progress of work at
5 KEDLI’s manufactured gas plant (“MGP”) sites;

6 (ii) Exhibit __ (CFW-2) is an example of a New York State Department
7 of Environmental Conservation (“DEC”) Order on Consent;

8 (iii) Exhibit __ (CFW-3) provides examples of changes to DEC remedy
9 decisions following discussions with KEDLI;

10 (iv) Exhibit __ (CFW-4) is a copy of the DEC work schedules for fiscal
11 years 2018, 2019, and 2020;

12 (v) Exhibit __ (CFW-5) sets forth KEDLI’s compliance with existing
13 timetables and DEC requirements;

14 (vi) Exhibit __ (CFW-6) provides KEDLI’s past SIR program spend on
15 an annual basis for 2016 and 2017;

16 (vii) Exhibit __ (CFW-7) sets forth KEDLI’s SIR program spend in the
17 Historic Test Year;

18 (viii) Exhibit __ (CFW-8) sets forth KEDLI’s forecast SIR program spend
19 in the Rate Year and Data Years; and

20 (ix) Appendix 1 describes the Company’s cost control efforts.

21

1 **I. SIR Program Overview**

2 **Q. Please provide a brief overview of KEDLI’s SIR program.**

3 A. KEDLI’s SIR program includes activities in connection with the
 4 management, investigation, and remediation of MGP sites that have been
 5 contaminated by the past release of substances from property owned or
 6 formerly owned by KEDLI or its predecessors. KEDLI is responsible for
 7 29 MGP sites, one of which, Belle Harbor, involves other potentially
 8 responsible parties (“PRPs”) that share responsibility for the site with
 9 KEDLI. As of the end of the Historic Test Year, 16 sites were actively
 10 tracked with the DEC, including one site in the site
 11 characterization/remedial investigation phase and 15 sites in remedial
 12 planning, remedial action, or operations, maintenance and monitoring
 13 (“OM&M”) phases of work. Seven of the 15 sites have received varying
 14 degrees of DEC regulatory closure. It is important to note that despite
 15 regulatory closure or a “No Further Action” finding, these sites may
 16 continue to have ongoing regulatory obligations for operations and
 17 maintenance and/or site management requirements. As of the end of the
 18 Historic Test Year, a total of 13 of the 29 sites have received a No Further
 19 Action finding, have no ongoing obligation and are no longer tracked with
 20 DEC.

21

1 Exhibit __ (CFW-1) describes the sites currently being managed by KEDLI.
2 The exhibit includes the background of each site, and details the
3 investigation and remediation activities that have taken place over the last
4 three years from January 2016 through the end of the Historic Test Year.

5

6 **Q. What types of costs does KEDLI incur under its SIR program?**

7 A. Costs under KEDLI's SIR program include consultant and contractor costs,
8 remediation activities aimed at reducing the volume, toxicity, or mobility of
9 pre-existing contamination, and incremental external costs (including
10 insurance and legal costs) incurred to seek recovery from third parties or to
11 otherwise mitigate the Company's SIR costs or liabilities.

12

13 **Q. What role does the DEC play with regard to the scope and timing of**
14 **investigation and remediation work conducted at MGP sites?**

15 A. The DEC controls the scope and timing of work at MGP sites. The scope
16 of KEDLI's site investigations, work plans, clean-up, and field work
17 decisions are reviewed, approved, and/or expanded by the DEC pursuant to
18 Orders on Consent. An example Order on Consent for eight of KEDLI's
19 MGP sites is provided in Exhibit __ (CFW-2). Although the Company has
20 limited control over the scope and timing of SIR activities, KEDLI
21 challenges the DEC when a more cost effective, and equally protective

1 remedy is available and, as described later in my testimony, manages costs
2 in the areas it can control, such as contracting procedures. Exhibit __
3 (CFW-3) provides examples of changes to DEC remedy decisions
4 following discussions with KEDLI that resulted in significant cost savings
5 to customers.

6
7 **Q. How is the schedule for work at MGP sites determined?**

8 A. Prior to the beginning of each New York State fiscal year (April 1 through
9 March 31), KEDLI and the DEC meet to discuss the upcoming work
10 schedule. The DEC approves the work schedule for the upcoming fiscal
11 year only. As a result, the amount of spending in a given year is highly
12 dependent upon the DEC and other third-parties, including private property
13 owners, permitting authorities, *et cetera*. While the DEC only approves a
14 one-year schedule, in the course of meetings, the Company and the DEC
15 discuss the anticipated logical progression of work at each site for an
16 additional year beyond the upcoming fiscal year, which gives the Company
17 a sense of the projected work that will be required.

18
19 The DEC-approved schedule for the twelve months ended March 31, 2018,
20 March 31, 2019, and March 31, 2020 is provided in Exhibit __ (CFW-4).
21 The schedule includes all 16 of KEDLI's active MGP sites subject to DEC

1 Orders on Consent. Thirteen sites (Bellmore, Brentwood, East Hampton
 2 GVF, East Hampton Hortonsphere, Garden City, Long Beach, Lynbrook,
 3 Manhasset, Pinelawn, Port Jefferson, Riverhead, Saltaire and Southold)
 4 have received “No Further Action” determinations and are no longer
 5 tracked with the DEC.

6

7 **Q. Has the Company prepared an exhibit demonstrating that its**
 8 **remediation process is in compliance with existing timetables and DEC**
 9 **requirements?**

10 A. Yes. Exhibit __ (CFW-5) shows the status as of the end of calendar year
 11 2018 for each MGP site and includes a column to show whether there was
 12 a difference between the scheduled activities and the activities actually
 13 completed. There has been no variance from the timetable for the 16 sites
 14 that were actively tracked by DEC during 2018. Of the 16 sites, twelve are
 15 in the OM&M phase where either active maintenance and/or monitoring are
 16 taking place, or site management or inspections and reporting are required.
 17 Only four sites remain in the Remedial Investigation or Remedial Planning
 18 phases.

19

1 **Q. Please describe communications with the DEC for the work activities**
 2 **described in Exhibit __ (CFW-5)?**

3 A. KEDLI updates the DEC on a bi-monthly basis on the status of each site.
 4 Further, the Company’s project managers communicate with the DEC’s
 5 project managers on project schedule and progress of work, as necessary.
 6 Based on these updates, it is my understanding that the DEC is satisfied
 7 with KEDLI’s progress.

8
 9 **II. SIR Program Costs**

10 **Q. How much SIR costs does KEDLI currently recover annually through**
 11 **base rates?**

12 A. KEDLI currently recovers (i) its historic, unrecovered SIR expenditures in
 13 an amount equal to one-tenth of the forecast SIR deferral balance as of
 14 December 31, 2016 (\$14.168 million per year) and (ii) forecast SIR costs of
 15 \$13.402 million in calendar year 2017, \$7.442 million in calendar year
 16 2018, and \$4.648 million in calendar year 2019. These amounts were
 17 approved in the Commission’s December 16, 2016 Order in the 2016
 18 KEDNY and KEDLI Rate Cases.

19
 20 Each year, KEDLI fully reconciles its actual SIR expense to the rate
 21 allowance for forecast SIR costs set forth above. Any under or over

1 expenditures of the rate allowance are deferred for future refund to or
 2 recovery from customers.

3

4 **Q. What is the Company’s recent experience with SIR costs?**

5 A. During calendar years 2016 and 2017, KEDLI conducted investigation,
 6 remediation and OM&M activities under the DEC’s remedial program at 20
 7 of its MGP sites. KEDLI incurred approximately \$19 million of SIR costs
 8 from 2016 through 2017 for these activities. As illustrated in Exhibit __
 9 (CFW-6), KEDLI observed a declining level of spending from 2016 to
 10 2017. The lower spending was attributable to less remediation construction
 11 activities during this period due to the completion of field construction
 12 programs at the larger sites, receipt of “No Further Action” determinations,
 13 and low levels of activity at the four sites with remaining future remedial
 14 obligations.

15

16 **Q. What SIR cost did KEDLI incur in the Historic Test Year?**

17 A. Actual spending during the Historic Test Year was approximately \$8.3
 18 million (compared to a rate allowance of \$7.4 million) as shown in Exhibit
 19 __ (CFW-7). Pursuant to Orders on Consent with the DEC, KEDLI
 20 incurred costs for site investigation and remediation activities at 16 of 29
 21 MGP sites during the Historic Test Year. The SIR activities during the

1 Historic Test Year included: remedial investigation at one site (Inwood
 2 Holder); remedial planning activities at three sites (Babylon, Belle Harbor,
 3 and Patchogue); and OM&M (including site management activities) at
 4 twelve sites.

5 **Q. What is KEDLI’s forecast of SIR costs for work at the Company’s**
 6 **MGP sites?**

7 A. As shown in Exhibit __ (CFW-8), KEDLI forecasts SIR costs of \$6.6
 8 million in the Rate Year and \$6.6 million, \$3.8 million, and \$2.6 million in
 9 Data Years 1, 2 and 3, respectively.

10

11 **Q. Please explain how KEDLI developed its forecast of SIR costs for work**
 12 **at its MGP sites.**

13 A. The DEC schedule is not yet available for the Rate Year or Data Years.
 14 Therefore, KEDLI developed the forecast utilizing the current approved
 15 DEC schedule as well as the anticipated work schedule for fiscal year 2020.
 16 KEDLI took into account the status of each site and knowledge derived
 17 from project managers regarding site progress and potential delays to
 18 determine the projected work on a site-by-site basis. KEDLI projected costs
 19 for each site based on the nature of the work at the site and the expected
 20 remedy for those sites still requiring remedial activities (*e.g.*, excavation of
 21 site soils, containment recovery, installation of barrier walls, treatment of

1 groundwater), site specific conditions, and past spending and estimates
 2 provided by consultants for the anticipated work. In instances where the
 3 project manager anticipated delays (*e.g.*, potential site access issues,
 4 permitting delays, or on-site condition constraints), or negotiated with DEC
 5 to delay work to best manage project or program resources, the timing of
 6 the work was adjusted in the forecast.

7

8 **Q. What are the major drivers of SIR costs in the Rate Year and Data**
 9 **Years?**

10 A. Spending in the Rate Year is expected to decrease slightly from Historic
 11 Test Year levels, primarily due to work at three sites (Patchogue, Belle
 12 Harbor, and Babylon) progressing through remediation. The most costly of
 13 the remediation projects is the Patchogue site, where a portion of
 14 construction activities are expected to be performed in the Rate Year.

15

16 The SIR activities anticipated in the Data Years are comprised principally
 17 of OM&M related activities with some remaining remedial construction
 18 activities associated with the Inwood Holder site.

19

1 **Q. Could actual SIR costs differ from the Company's forecast?**

2 A. The forecast reflects the Company's best estimate of SIR costs. While
3 KEDLI believes that its forecast is reasonable, SIR costs are subject to a
4 high degree of variability, through no fault of the Company, as projects are
5 subject to schedule and scope modifications by the DEC and environmental
6 regulators, as well as site access issues with property owners or delays
7 resulting from onsite condition constraints. KEDLI's forecast reflects costs
8 that it expects will be incurred in the Rate Year and Data Years; however,
9 there is a risk that actual costs could be more or less. Accordingly, as
10 discussed below, KEDLI is proposing to continue to fully reconcile these
11 costs.

12
13 **Q. What is KEDLI's proposal for recovery of its SIR costs?**

14 A. KEDLI proposes to recover SIR costs in the same manner as it does
15 presently under its current rate plan. Specifically, KEDLI proposes a base
16 rate allowance of \$6.6 million, \$6.6 million, \$3.8, and \$2.6 million in the
17 Rate Year and Data Years 1, 2 and 3, respectively, which represents forecast
18 SIR costs. In addition, to enable the continued recovery of historic SIR
19 expenditures, base rates will continue to include the current amortization of
20 \$14.168 million annually, representing one-tenth of the forecast SIR
21 deferral balance at December 31, 2016. KEDLI also proposes to maintain

1 the current SIR reconciliation, whereby any difference between actual SIR
2 expense and the level of forecast SIR costs in rates would be reconciled,
3 with any difference deferred for future recovery from, or credit to,
4 customers. Finally, KEDLI proposes to continue the provision in its current
5 rate plan that allows the Company to petition the Commission to recover
6 unanticipated, incremental SIR costs through the SIR Recovery Surcharge.

7 **Q. Why does KEDLI believe that its proposal is consistent with the**
8 **Commission’s guidance and in the best interests of customers?**

9 A. The proposal is consistent with the SIR Generic Order because it is tailored
10 to address the specific conditions at KEDLI. Specifically, in the SIR
11 Generic Order, the Commission noted its intent to retain the flexibility to
12 “tailor the rate treatment of SIR costs to the concrete conditions of each
13 utility” and moderate annual bill impacts by spreading the amortization of
14 costs over a longer period “as needed and as dictated by the costs in specific
15 rate cases.” KEDLI’s proposal reduces its base rate allowance to align with
16 a forecast decrease in SIR costs, while providing for the continued recovery
17 of historic SIR expenditures in a manner that should fully resolve the
18 Company’s prior deferral balance.

19

1 **III. SIR Cost Control Efforts**

2 **Q. What steps has the Company undertaken to control its SIR costs and**
 3 **liabilities?**

4 A. KEDLI follows the cost management practices set forth in the Inventory of
 5 Best Practices for Utility SIR Programs established in accordance with the
 6 SIR Generic Order and as clarified by the DEC. Appendix 1 describes the
 7 Company's cost control efforts.

8

9 **Q. Has the Commission reviewed KEDLI's cost control measures?**

10 A. Yes. In its November 28, 2012 Order in Case 06-G-1186, the Commission
 11 found that KEDLI had employed cost effective measures and that the costs
 12 through December 31, 2009 had been prudently incurred. In its October 19,
 13 2015 Order in Case 15-G-0323, the Commission reviewed KEDNY's
 14 oversight and cost containment procedures, which are the same procedures
 15 as KEDLI's, and found they appeared reasonable. More recently, in its
 16 December 16, 2016 Order in the 2016 KEDNY and KEDLI Rate Cases, the
 17 Commission noted that Staff had reviewed and concurred that the Company
 18 was pursuing all appropriate cost control efforts.

19

1 **IV. Compliance with Rate Case Filing Requirements**

2 **Q. Are you familiar with the rate case filing requirements adopted by the**
3 **Commission in the SIR Generic Order?**

4 A. Yes, I am. At page 30 of the SIR Generic Order, the Commission required
5 that “[in] any future rate filing in which a utility seeks to recover SIR
6 expenses, the utility must provide sworn testimony (i) establishing that the
7 remediation process is in compliance with existing timetables and DEC
8 requirements, or providing explanations for any divergence; (ii) discussing
9 the utility’s SIR cost control efforts, including an attestation to utility
10 compliance with the best practices inventory; and (iii) indicating the results
11 of any internal process the utility may have conducted with respect to
12 review of SIR procedures, and in particular explaining how internal controls
13 are brought to bear on site investigation and remediation projects.”

14

15 **Q. Has the Company complied with each of these requirements in this**
16 **filing?**

17 A. Yes, it has.

18

1 **Q. Please discuss the Company's compliance with each of these**
2 **requirements.**

3 **A.** Earlier in my testimony, I discussed the Company's compliance with
4 existing timetables and DEC requirements, with reference to Exhibit __
5 (CFW-5). The Company's cost control efforts are also discussed earlier in
6 my testimony and in Appendix 1, which details SIR cost control efforts.
7 With respect to the Company's internal controls and how they apply to SIR
8 projects, National Grid has conducted internal reviews of the administration
9 and management of the SIR group, as well as the adequacy of controls to
10 meet significant environmental obligations. Further, as discussed above
11 and in Appendix 1, the Company utilizes established procedures for
12 selecting environmental consultants and contractors as well as a rigorous
13 process for reviewing and approving consultant and contractor invoices as
14 additional internal controls on SIR projects.

15

16 **Q. Does this conclude your testimony?**

17 **A.** Yes.

Before the Public Service Commission
THE BROOKLYN UNION GAS COMPANY d/b/a NATIONAL GRID NY
AND
KEYSPAN GAS EAST CORPORATION d/b/a NATIONAL GRID

Rebuttal Testimony

of

Charles F. Willard

September 18, 2019

1 **I. Introduction**

2 **Q. Please state your name and business address.**

3 A. My name is Charles F. Willard. My business address is 300 Erie
4 Boulevard West, Syracuse, New York 13202.

5

6 **Q. Are you the same Charles F. Willard who previously filed direct
7 testimony in these proceedings?**

8 A. Yes. The terms defined in my direct testimony have the same definitions
9 here.

10

11 **Q. Mr. Willard, what is the purpose of your rebuttal testimony?**

12 A. I am responding to testimony from the Department of Public Service Staff
13 (“Staff”) Site Investigation and Remediation (“SIR”) Panel
14 recommending downward adjustments to the Companies’ proposed rate
15 allowances for SIR programs, and testimony from the Public Utility Law
16 Project (“PULP) witness William Yates regarding impacts to customers in
17 the vicinity of certain clean-up sites.

18

19 **Q. Do you agree with the Staff SIR Panel’s recommendation (at 29) to
20 reduce KEDNY and KEDLI’s Rate Year forecast of SIR expense by**

21

1 **\$15.168 million and \$1.734 million, respectively?**

2 A. Not entirely. The Companies acknowledge that SIR work schedules are
3 subject to a high degree of uncertainty and reflected this variability in the
4 SIR forecasts. As described in my direct testimony, the Companies took
5 into account the status of each site and potential delays to determine
6 projected work on a site-by-site basis. As part of this evaluation, the
7 Companies reviewed the last six years of historic spend and adjusted the
8 forecast for KEDNY based on that historical underspend. In addition, the
9 latest available information indicates that key elements driving the
10 Companies' respective forecasts, including increased investigation and
11 remediation activities at a number of active SIR sites, are still anticipated
12 to occur. Therefore, the Companies believe that their forecasts, which are
13 based on an extensive review of SIR activities at each individual MGP and
14 Superfund site, are the best indicator of SIR Program spend in the Rate
15 Year.

16

17 **Q. Mr. Willard, please summarize key elements driving the Rate Year**
18 **forecast for KEDNY.**

19 A. For KEDNY, the main drivers for Rate Year expenditures are
20 investigation and remediation activities at the Fulton, Citizens,
21 Metropolitan and Greenpoint sites along with related SIR program

1 spending, including insurance recovery efforts. Work at the Citizens,
2 Fulton, and Metropolitan sites is performed on a schedule that is being
3 coordinated by the EPA. Since my direct testimony was filed,
4 construction contracts have been issued for construction of barrier walls at
5 the Citizens and Fulton sites, and for soil remediation at the Citizens site.
6 Field work associated with both contracts has begun and is expected to
7 extend into the Rate Year as originally anticipated. Discussions with
8 property owners regarding the remediation at the Metropolitan site has
9 commenced, which could facilitate an increase in work at that site.
10 Further, KEDNY's insurance recovery litigation trial has been scheduled
11 for the Fall of 2020, during the Rate Year, which will drive legal and
12 expert expenses associated with trial preparation during the Rate Year.

13

14 **Q. Mr. Willard, please summarize key elements driving the Rate Year**
15 **forecast for KEDLI.**

16 A. For KEDLI, the main drivers for Rate Year expenditures are activities at
17 the Bay Shore, Babylon, Belle Harbor, and Patchogue sites. The Bay
18 Shore site is in the operation, maintenance, and monitoring phase with
19 predictable spends, and KEDLI has recently obtained access to the
20 Babylon site, with pre-design investigations planned for Fall 2019.
21 Further, the Patchogue site is currently in the remediation construction

1 phase at this time, so the work projected for the Rate Year for this site is
2 unlikely to be delayed or impacted.

3

4 **Q. Do you believe that the Staff SIR Panel’s proposed adjustments are**
5 **necessary to more closely align rate recovery with project spending?**

6 A. No. Based on latest available information, the Companies believe that key
7 work activities driving the Companies’ forecast of SIR expenditures
8 during the Rate Year will occur, and thus, the Companies proposed rate
9 allowances should be used in favor of the Staff SIR Panel’s proposed
10 alternatives.

11

12 **Q. Do you agree with Mr. Yates assertions (at 22-23) regarding recovery**
13 **of clean-up costs from customers who live in the vicinity of superfund**
14 **sites based on assertions that the impacts on such customers are only**
15 **negative?**

16 A. No. Mr. Yates’ asserts (at 22) that it is against the public interest to
17 expect customers who live in the vicinity of superfund sites to pay for the
18 costs to clean-up these sites. Mr. Yates suggests (at 22-23) that these
19 efforts bear only negative impacts for such customers. In the Order in the
20 2016 KEDNY and KEDLI Rate Cases, the Commission noted that utilities
21 are required by law to incur SIR expenses and they should “therefore be

1 treated as normal costs of doing business in today's society" (at 83-84).
2 Mr. Yates' assertions ignore the fact that the Companies' efforts to clean
3 up these sites benefit both the sites and the surrounding communities. The
4 Companies' efforts not only remedy historical impacts, but also enable
5 various projects with substantial benefits for customers in the vicinity of
6 such sites, such as the creation and/or improvement of public parks and
7 support for brownfield redevelopment. For these reasons, Mr. Yates'
8 assertions should be rejected.

9

10 **Q. Does this conclude your testimony?**

11 A. Yes.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 BY MR. EUTO: (Cont'g.)

3 Q. Okay. Moving on to your
4 exhibits. For your direct testimony, did you also
5 sponsor in the KEDNY docket 11 exhibits pre-marked
6 for identification as Exhibits 172 through 181
7 consisting of C.F.-1 through C.F.W.-10 -- let me --
8 let me back up, C.F.W.-1 through C.F.W.-10 and
9 Exhibit 613, which is appendix 1-KEDNY cost control
10 efforts?

11 A. Yes.

12 Q. Were these exhibits prepared by
13 you or under your supervision and direction?

14 A. Yes.

15 Q. All right. In addition for your
16 direct testimony in the KEDLI docket, did you also
17 sponsor 9 exhibits pre-marked for identification as
18 Exhibits 182 through 189 consisting of C.F.W.-1
19 through C.F.W.-8. And Exhibit 614 consisting of
20 Appendix 1-KEDLI cost control efforts?

21 A. Yes.

22 Q. Were these exhibits prepared by
23 you or under your supervision and direction?

24 A. Yes.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Thank you. Your Honors, the
3 witness is available for cross examination.

4 A.L.J. COSTELLO: Okay. Thank you.
5 PULP?

6 MS. WHEELLOCK: Thank you, Your Honors.

7 CROSS EXAMINATION

8 BY MS. WHEELLOCK:

9 Q. Good afternoon, Mr. Williard. My
10 name is Laurie Wheelock. I'm an attorney with the
11 Public Utility Law Project. My questions are going
12 to focus on your -- primarily your KEDNY initial
13 testimony. And today I'm going to be asking
14 questions about Site Investigation Remediation cost.
15 For the record, those are SIR cost and I do apologize
16 I'll probably revert to the acronym a lot.

17 So with the first question, if you
18 could turn to page 5 in the KEDNY direct testimony
19 and focus on lines 6 through 9 please. And you can
20 let me know when you found that.

21 A. I'm sorry page?

22 Q. 5, lines 6 through 9 please.

23 A. Okay.

24 Q. Can you clarify what the current
25 status is for both superfund sites?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. Sure. The 2 super -- superfund
3 sites I believe you're referring to are the Gowanus
4 Canal and Newtown Creek. Currently, Gowanus is in
5 design, our -- we are nearing submission of our final
6 design to the E.P.A. that should be submitted next
7 week. And we are expecting -- right now, we are
8 scheduled to begin the workout in the canal in
9 August. For Newtown Creek, it is still under
10 investigation. We don't expect a -- an evaluation of
11 alternatives until another year or 2.

12 Q. Thank you. Now if you could turn
13 to page 10 and review lines 20 through 21 that then
14 turns into page 11, lines 1 through 4 please.

15 A. Okay.

16 Q. To your knowledge, are there any
17 other sites in either KEDNY or KEDLI'S territory like
18 the citizen site where the company has ever agreed to
19 absorb any percentage of the remaining investigation
20 costs?

21 A. No, these sites were entered into
22 prior to the generic proceeding.

23 Q. Has KEDNY ever refunded customers
24 when there are any under-expenditures for SIR
25 expenses?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. Not to my knowledge.

3 Q. And if not, what has KEDNI done
4 with the unexpended funds when there are under-
5 expenditures?

6 A. Historically, it was a deferral
7 balance. So we are currently recovering 10 years'
8 worth of expenses prior to the last rate agreement,
9 have been amortized over a 10-year period. So those
10 were not collected initially, they were collected
11 after the work was completed.

12 Q. Thank you. You can turn now to
13 page 19 in your testimony reviewing lines 21 that run
14 over to page 20, lines 1 through 3 please.

15 And this part of your testimony is
16 about the Gowanus Canal.

17 A. Okay.

18 Q. Has the number of potentially
19 responsible parties for the Gowanus Canal Superfund
20 site changed at all since April 2019 to your
21 knowledge?

22 A. No.

23 Q. Okay. Moving on to Page 20,
24 lines 3 through 8. Do you expect any of the
25 potentially responsible parties that have been

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 identified to help pay for the investigation or
3 remediation costs in this rate case year?

4 A. Yes. This year, that has yet to
5 be determined.

6 Q. Okay. What about in future years
7 has the company?

8 A. Yes.

9 Q. Thank you. Now moving on to
10 Newtown Creek which is also on Page 20 but looking at
11 lines 14 through 17.

12 A. Okay.

13 Q. Are all 5 of the potentially
14 responsible parties that have been identified in the
15 administrative settlement agreement in order on
16 consent still active or have any dropped out?

17 A. Since the beginning of the work,
18 one party has dropped out.

19 Q. Do you know if there is any other
20 additional parties that have been identified
21 potentially in the rate year to come?

22 A. I'm not aware of any, no.

23 Q. Okay. Turning now to your
24 rebuttal testimony, Page 3. And this will -- I guess
25 it's both KEDNY and KEDLI.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. Page 3?

3 Q. Yeah, lines 10 through 12,
4 please. So here it says further KEDNY's insurance
5 recovery litigation trial has been scheduled for the
6 fall of 2020 during the rate year, which will drive
7 legal and expert expenses associated with trial
8 preparation during the rate year. Can you just
9 clarify which insurance recovery litigation trial
10 this is?

11 A. Can -- can you restate where --
12 where it's --

13 Q. Of course.

14 A. -- located on that page? Sorry.

15 Q. So -- no problem. In your
16 rebuttal testimony.

17 A. Okay.

18 Q. It's page 3, lines 10 through 12.

19 A. I'm having problems locating it,
20 but if you can just read it to me I'll be able.

21 Q. Of course and I can --

22 A. Yeah.

23 Q. -- give you my copy.

24 A. Could you -- thank you. Okay.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. So if you could just clarify
3 which trial that is for the record.

4 A. We are pursuing in court, both
5 Munich Insurance and Century.

6 Q. And are those tied to any
7 specific sites to your knowledge?

8 A. They are for the Gowanda's Canal
9 sites.

10 Q. Thank you.

11 A. Gowanda canal and -- and the
12 sites associated.

13 Q. So you can turn back now to your
14 additional testimony page 27. And once you're at
15 page 27, if you could just review lines 18 through
16 21, please.

17 A. Okay.

18 Q. To your knowledge has KEDNY
19 conducted any analysis on the bill impacts associated
20 with its SIR costs, including the recovery surcharge
21 in this rate year?

22 A. Our rates requirement group has
23 done that. Yes.

24

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. And has KEDNY ever considered
3 sharing any of the costs associated with the SIR
4 expenses in this rate year?

5 A. We've been operating under the
6 generic order from 2012. So we have been following
7 the guidelines that are included in that order from
8 the commission to ensure that we are following the
9 guidelines in that -- that order. So no.

10 Q. And my last question has to do
11 with the Environmental Protection Agency. Living in
12 uncertain times with the federal level and changes
13 that occur to federal rules, laws and regulations,
14 what, if any, planning has the company done in case
15 there are dramatic changes to the federal superfund
16 law?

17 A. We don't anticipate significant
18 changes to the superfund law. There are changes in
19 agency fundings, but the work that -- work undergoing
20 are funded separately through orders on consent or
21 unilateral orders. So it's separate from the federal
22 government's funding.

23 MS. WHEELLOCK: No further questions.

24 A.L.J. COSTELLO: Do you --

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: I have a couple of
3 questions.

4 A.L.J. COSTELLO: Sure.

5 A.L.J. LEARY: On the -- I believe
6 it's Gowanda so you -- you're down to now P.R.P.
7 group of 4 plus KEDNY or are you at 5 plus -- plus
8 KEDNY?

9 THE WITNESS: So --

10 A.L.J. LEARY: 3, I'm sorry.

11 THE WITNESS: So all the parties still
12 exist. The latest order that came out from the
13 E.P.A., there was -- there has been a series of
14 orders that have come out from the E.P.A. unilateral
15 orders.

16 A.L.J. LEARY: Uh-huh.

17 THE WITNESS: The earlier orders had
18 named all of the parties, but now that we're getting
19 towards the implementation, they're naming the larger
20 parties, which are 5 other parties in addition to
21 KEDNY.

22 A.L.J. LEARY: And so it's not 4 plus

23 1 --

24 THE WITNESS: It's --

25 A.L.J. LEARY: -- it's 5 plus 1.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 THE WITNESS: -- 5 plus 1, but all the
3 other parties are still in -- in it, but not
4 necessarily named in the order.

5 A.L.J. LEARY: Not necessarily named
6 in the order.

7 THE WITNESS: Yeah, they are not named
8 in the last order. They were named in the prior
9 orders.

10 A.L.J. LEARY: And that's a remedial
11 design order?

12 THE WITNESS: No, the latest or --
13 latest 2 orders so they're -- the first order for
14 design was a preliminary order to get us out into the
15 field to get preparations done in order to keep the
16 schedule. The order that just came out last month
17 was to complete the upper end of the canal, so the
18 first of the third sections of the canal.

19 A.L.J. LEARY: And who are those other
20 parties and let me ask you this. Do you have a joint
21 defense agreement with those other parties, the 5
22 plus KEDNY?

23 THE WITNESS: For implementation, we
24 don't have anything in place at this point.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: Do you have some kind
3 of agreement that has percentages designated for each
4 of those parties in terms of liability?

5 THE WITNESS: For -- for the
6 remediation, no we have -- we have just received the
7 order as of last month. So those discussions are
8 ongoing.

9 A.L.J. LEARY: Was there any
10 percentage that you had on the remedial investigation
11 side, those costs? You're smiling Mr. Williard.

12 THE WITNESS: You know, just -- just
13 from -- from the confidentiality perspective, we --
14 we are ongoing in discussions with the other parties
15 for the -- for the remediation, the prior work.
16 There is -- it is subject to confidentiality. But
17 the more information we provide in a public forum,
18 the more it puts us at risk in our --

19 A.L.J. LEARY: Very helpful.

20 THE WITNESS: -- negotiations.

21 A.L.J. LEARY: I don't want to press
22 you on this, but I'm going to request that this
23 question be answered in and shared with the parties
24 who are subject to the confidentiality agreement.
25 It's -- it gives me context, it helps me understand

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 what's up with KEDNY as well as the other parties
3 prospectively even in just the rate year.

4 So I guess I have to assume that that
5 percentage will have some correlation with what the
6 percentage may be under the -- the new E.P.A.
7 unilateral 113 order, right?

8 THE WITNESS: It --

9 A.L.J. LEARY: It may -- it may bear
10 some.

11 MR. EUTO: Your Honor, there's another
12 issue that I think we need to raise at this point and
13 that is that one of the parties to this proceeding is
14 also a potential P.R.P., being the city.

15 A.L.J. LEARY: Oh, oh, the city.

16 MR. EUTO: And also a signatory to the
17 protective order and so if we --

18 MR. O'BRIEN: Patrick O'Brien. So
19 that sort of complicates the company responding to
20 that request.

21 A.L.J. LEARY: Okay. I'm just going
22 to stay my request for now. Let me talk to Judge
23 Costello about that, and so I was going to ask who
24 the other parties are. The city is another party and
25 -- and who are the other parties?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 THE WITNESS: If I could recall off
3 the top of my head, Honeywell was one of them. And
4 I'd have to take a look at the list of other parties.
5 A lot of the parties that you would have, you know,
6 that are on the order, I think, I'm not sure if Kraft
7 is one of the larger ones. But a lot of the names
8 aren't necessarily traditionally what you would think
9 of as a polluting party, but they've morphed over the
10 years.

11 A.L.J. LEARY: Right.

12 THE WITNESS: So I'd have to take a
13 look at the list on the order.

14 A.L.J. LEARY: Okay. Thanks. That's
15 very helpful. And again, I'm not asking the company
16 to do anything at this point, but I may need further
17 information in this regard, which I'm wondering how I
18 get without somehow prejudicing the company's
19 negotiations on the P.R.P. agreement. And I don't
20 want to do that. So that's all I have. Ms.
21 Wheelock, you have something else resulting from what
22 I just asked the witness.

23 MS. WHEELLOCK: Just briefly, Your
24 Honor, as far as the name of potentially responsible
25 parties, there was an exhibit. If you just want me

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 to direct you to that, within your -- your testimony,
3 it's Exhibit C.F.W.-3 page 1 of 25 it's pre-marked as
4 Exhibit 184.

5 A.L.J. LEARY: I see. But this is the
6 old unilateral 113 order and it's 1 of 6 order and
7 it's not the 5 -- it's not directed, right, at the
8 most recent.

9 THE WITNESS: Correct.

10 A.L.J. LEARY: Was this the most
11 recent?

12 THE WITNESS: It -- it was the latest
13 information that came out last month.

14 A.L.J. LEARY: So I think that, you
15 know, this is -- but in the record, we don't have
16 that more limited P.R.P. group. Is that right, we
17 don't have that order --

18 THE WITNESS: Correct.

19 A.L.J. LEARY: -- publicly available.

20 A.L.J. COSTELLO: That's iden --

21 THE WITNESS: It's publicly available.

22 A.L.J. COSTELLO: -- identified.

23 THE WITNESS: It is publicly
24 available.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. COSTELLO: It is publicly
3 available.

4 A.L.J. LEARY: Okay.

5 THE WITNESS: Yeah.

6 A.L.J. LEARY: Thanks.

7 A.L.J. COSTELLO: D.P.S. staff.

8 MR. FORST: Yes, we just have one
9 document we'd like to get on the record. So we'll
10 pass that out now.

11 CROSS EXAMINATION

12 BY MR. FORST:

13 Q. So being passed around right now
14 is a document request response, titled D.P.S. 1031.
15 It consists of a 2-page response document issued on
16 November 15, and 4 pages of attachments for a total
17 of 6 pages. Can you just review that really quickly?

18 A. Yes.

19 A.L.J. COSTELLO: Okay. And we're
20 going to mark that as Exhibit 665.

21 BY MR. FORST: (Cont'g)

22 Q. And was this exhibit prepared by
23 you or under your direct supervision?

24 A. Yes.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. And is the information contained
3 in this document true and correct to the best of your
4 knowledge?

5 A. Yes.

6 Q. Excellent.

7 MR. FORST: No further questions, Your
8 Honor.

9 A.L.J. COSTELLO: Any redirect, you
10 want to take a moment -- moment or?

11 MR. EUTO: No, Your Honor, no
12 redirect. Thank you.

13 A.L.J. COSTELLO: Okay. Thank you.
14 Mr. Willard, thank you for your testimony and you're
15 excused.

16 A.L.J. LEARY: Yeah, I think we need a
17 break right. Is that okay, off the record.

18 (Off the record 3:09 p.m.)

19 (On the record 3:25 p.m.)

20 A.L.J. COSTELLO: I'm going to ask the
21 witnesses to please one at a time, state your name
22 and business address for the record.

23 MR. CASTANO: John Castano, 3 Empire
24 State Plaza, Albany, New York.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. FLAUM: Jeremy Flaum, 3 Empire
3 State Plaza, Albany, New York.

4 A.L.J. COSTELLO: Please stand and
5 raise your right hand. Do you swear or affirm that
6 the testimony you will provide is the truth?

7 MR. CASTANO: Yes.

8 MR. FLAUM: Yes.

9 WITNESS; JOHN CASTANO; Sworn

10 WITNESS; JEREMY FLAUM; Sworn

11 A.L.J. COSTELLO: Thank you. You may
12 be seated. Counsel.

13 DIRECT EXAMINATION

14 BY MR. FORST:

15 Q. Panel members, before you is a
16 document entitled prepared testimony of Staff Site
17 Investigation and Remediation Panel consisting of a
18 cover page and 30 pages of question and answers dated
19 August 2019, which has both a redacted and
20 confidential version as well as 4 exhibits submitted
21 with your testimony labeled S.I.R.-1 redacted,
22 S.I.R.-1 confidential, S.I.R.-2 and S.I.R.-3, is that
23 correct?

24 A. (Flaum) That's correct. Three
25 exhibits.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. MR. FORST: Yeah. These exhibits
3 have been pre-marked as exhibits 506 through 509.
4 Was this set of testimony and exhibits prepared by
5 you or under your direct supervision?

6 A. Yes.

7 Q. Do you have any changes or
8 corrections to make to that tes -- to make to that
9 testimony?

10 A. No.

11 Q. If you were asked the same
12 questions today under oath, would you answer them the
13 same way?

14 A. Yes.

15 Q. And do you affirm the information
16 contained in your testimony and exhibits true to the
17 best of your knowledge, information and belief?

18 A. Yes.

19 MR. FORST: Your Honors, I would like
20 to move that the pre-filed testimony of the Staff
21 Site Investigation Remediation Panel be entered into
22 the record as if given orally today during the
23 hearing.

24 A.L.J. COSTELLO: That request is
25 granted. And at this point, in the public version of

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 the transcript, the court reporter should insert
3 D.P.S. staff, S.I.R. Panel redacted testimony and in
4 the separate confidential trans -- transcript it
5 should be inserted the following file D.P.S. staff
6 S.I.R. Panel confidential testimony. #

BEFORE THE
STATE OF NEW YORK
PUBLIC SERVICE COMMISSION

In the Matter of

The Brooklyn Union Gas Company d/b/a National Grid NY
KeySpan Gas East Corporation d/b/a National Grid

Case 19-G-0309 & 19-G-0310

August 2019

Prepared REDACTED Testimony of:

Staff Site Investigation and
Remediation Panel

John P Castano
Auditor 2 (Public Utilities)
Office of Accounting, Auditing
and Finance

Jeremy Flaum
Utility Analyst 3
Office of Electric, Gas and
Water

State of New York
Department of Public Service
Three Empire State Plaza
Albany, New York 12223-1350

Cases 19-G-0309 & 19-G-0301 SSIRP

1 Q. Please state the names, employer, and business
2 address of the Staff Site Investigation and
3 Remediation (SIR) Panel.

4 A. Our names are John Castano, and Jeremy Flaum.
5 We are employed by the New York State Department
6 of Public Service (Department). Our business
7 address is Three Empire State Plaza, Albany, New
8 York 12223.

9 Q. Mr. Castano, are you a member of the Staff
10 Revenue Requirement Panel and are your
11 credentials contained in that testimony?

12 A. Yes.

13 Q. Mr. Flaum, what is your position at the
14 Department?

15 A. I am employed as a Utility Analyst 3 in the
16 Environmental Certification and Compliance
17 Section of the Office of Electric, Gas and
18 Water.

19 Q. Please briefly describe your educational
20 background and professional experience.

21 A. I graduated from the State University of New
22 York College at Cortland in 2003 with a Bachelor
23 of Science degree in Geology. I also earned a
24 Master of Science degree in Environmental

Cases 19-G-0309 & 19-G-0301 SSIRP

1 Management from the University of Maryland,
2 University College, in 2008. I joined the
3 Department in 2009. Prior to joining the
4 Department, I held Geologist positions at two
5 environmental consulting firms where I performed
6 field investigations, oversight, and data
7 analysis for multiple environmental remediation
8 sites.

9 Q. Please describe your responsibilities with the
10 Department.

11 A. My primary responsibilities include evaluating
12 environmental and land use impacts for the
13 siting of electric and gas transmission
14 facilities and electric generating facilities
15 under Articles VII and 10 of the New York State
16 Public Service Law. Additionally, I have been
17 assigned to review utility SIR cost control
18 practices and have provided recommendations for
19 previous rate cases before the Public Service
20 Commission of the State of New York
21 (Commission).

22 Q. Have you provided testimony in previous
23 Commission proceedings?

24 A. Yes. I previously testified as part of

Cases 19-G-0309 & 19-G-0301 SSIRP

1 Department Staff's SIR Panels for several rate
2 cases. Most recently, I testified in Cases 18-
3 E-0067 and 18-G-0068, Orange and Rockland
4 Utilities, Inc.; 17-E-0459 and 17-G-0460,
5 Central Hudson Gas and Electric Corporation; and
6 Cases 17-E-0238 and 17-G-0239, Niagara Mohawk
7 Power Corporation d/b/a National Grid. I have
8 also testified before the Commission regarding
9 geologic and water resource impacts of proposed
10 electric transmission projects in Cases 08-T-
11 0034 and 10-T-0139, and before the New York
12 State Board on Electric Generation Siting and
13 the Environment regarding geologic and water
14 resource impacts, and as part of the Staff
15 Policy Panel, for proposed wind energy
16 facilities in Cases 14-F-0490, 15-F-0122, 16-F-
17 0062, 16-F-0328, 16-F-0559, and 16-F-0205.

18 Q. Please summarize the scope of the SIR Panel's
19 testimony.

20 A. Our testimony consists of our review of the SIR
21 programs and costs of the KeySpan Gas East
22 Corporation d/b/a National Grid (KEDLI) and the
23 Brooklyn Union Gas Company d/b/a National Grid
24 NY (KEDNY), including the Companies' SIR

Cases 19-G-0309 & 19-G-0301 SSIRP

1 practices, historic and forecasted expenditures,
2 and rate allowance and SIR surcharge requests.
3 We then present our findings regarding the
4 effectiveness of the Companies' SIR cost
5 mitigation strategies and procurement practices
6 for SIR work; the Companies' compliance with
7 regulatory requirements applicable to their SIR
8 sites; and the reasonableness of the Companies'
9 projected SIR expenditures and proposed rate
10 allowances related to the recovery of their SIR
11 program costs. Our findings concerning these
12 issues form the basis for our recommendations to
13 the Commission.

14 Q. Is the Panel sponsoring any exhibits?

15 A. Yes, we are sponsoring three exhibits;
16 Exhibit__(SIR-1), Exhibit__(SIR-2), and
17 Exhibit__(SIR-3).

18 Q. Please describe Exhibit__(SIR-1).

19 A. Exhibit__(SIR-1) includes the information
20 request (IR) responses we relied upon and have
21 referenced throughout our testimony. We will
22 refer to these IRs by the number assigned by the
23 Department, for example DPS-100.

24 Q. Please describe Exhibit__(SIR-2).

Cases 19-G-0309 & 19-G-0301 SSIRP

1 A. Exhibit___(SIR-2) consists of the workpapers
2 that were created in calculating the adjustments
3 referenced in our testimony.

4 Q. Please describe Exhibit___(SIR-3).

5 A. Exhibit___(SIR-3) consists of the Companies'
6 budgeted versus actual amounts for calendar
7 years 2016, 2017, and 2018.

8 **Regulation and Oversight**

9 Q. Briefly describe the regulation and oversight of
10 SIR programs in New York State.

11 A. SIR programs are primarily overseen by the New
12 York State Department of Environmental
13 Conservation (DEC), in accordance with 6 NYCRR
14 Part 375 regulations. The United States
15 Environmental Protection Agency (EPA) regulates
16 and oversees certain sites regulated pursuant to
17 the Federal Comprehensive Environmental
18 Response, Compensation and Liability Act of 1980
19 ("Superfund"). Under orders or agreements with
20 utilities, DEC regulates the cleanup of former
21 manufactured gas plant ("MGP") sites within the
22 State.

23 Q. How are SIR activities for the utilities' MGP
24 sites within New York State prioritized?

Cases 19-G-0309 & 19-G-0301 SSIRP

- 1 A. In consultation with the New York State
2 Department of Health, DEC's prioritization of
3 remedial activities at MGP sites is ongoing.
4 DEC prioritizes sites based on several
5 considerations, including existing land use of
6 the site and nearby properties, proximity of the
7 site to sensitive environmental receptors,
8 cultural and recreational resources in close
9 proximity to the site, reliance on private and
10 public water supply wells in close proximity to
11 the site, and potential reuse of the site.
- 12 Q. Please summarize your understanding of the
13 Commission's Order Concerning Costs for Site
14 Investigation and Remediation, issued November
15 28, 2012, in Case 11-M-0034 (SIR Order).
- 16 A. During that proceeding, the Commission
17 considered the possibility of adopting a generic
18 policy with respect to the sharing of SIR costs
19 between ratepayers and shareholders. The
20 Commission concluded that a generic cost-sharing
21 requirement should not be applied; however, the
22 Commission stated that cost-sharing should be
23 considered in future rate cases if it is
24 determined that a utility is not exerting

Cases 19-G-0309 & 19-G-0301 SSIRP

1 appropriate efforts to control SIR costs. The
2 SIR Order required the joint major electric and
3 gas companies to collaborate and file with the
4 Commission an inventory of best practices for
5 SIR cost containment. In addition, the SIR
6 Order required that, in any future rate filing
7 in which a utility seeks to recover SIR
8 expenses, the utility must provide testimony
9 discussing its SIR cost control efforts and
10 include an attestation to the utility's
11 compliance with the inventory of best practices
12 for SIR cost containment. Furthermore, the SIR
13 Order directed that testimony be provided
14 establishing that the remediation process is in
15 compliance with existing timetables and DEC
16 requirements, explaining the results of any
17 internal process the utility may have conducted
18 to review its SIR procedures, and describing how
19 internal controls are utilized for SIR projects.

20 **SIR Program Overview**

- 21 Q. What type of expenses are included in the
22 Companies' SIR program?
- 23 A. SIR expenses primarily relate to the costs of
24 assessment, monitoring, cleanup and restoration

Cases 19-G-0309 & 19-G-0301 SSIRP

1 of sites containing environmental contamination
2 for which the Companies have been found to be
3 wholly or partially responsible, pursuant to
4 Superfund and the Companies' Consent Orders with
5 DEC, to perform SIR activities associated with
6 the cleanup of environmental contamination
7 resulting from the former operation of MGP sites
8 owned or operated by the Companies and their
9 predecessor companies.

10 Q. How many sites are currently included in KEDLI's
11 and KEDNY's SIR Programs?

12 A. According to the testimony of Company Witness
13 Willard, KEDLI is wholly or partially
14 responsible for 29 MGP sites, of which 13 have
15 received a "No Further Action" determination
16 with no ongoing obligation. KEDNY is wholly or
17 partially responsible for 27 MGP sites, five of
18 which have received a "No Further Action"
19 determination, and two federal Superfund sites
20 associated with the Gowanus Canal and Newtown
21 Creek waterways.

22 Q. Have the Companies identified, or been notified,
23 of any other potential SIR sites for which they
24 may be wholly or partially responsible?

Cases 19-G-0309 & 19-G-0301 SSIRP

1 A. According to the Company's response to IR DPS-
2 411 included in Exhibit____(SIR-1), KEDNY is
3 currently aware of four additional SIR sites
4 identified by DEC for which it may be wholly or
5 partially responsible, however, no formal
6 determination of liability for these sites have
7 been made by DEC. Additionally, according to
8 the responses to IRs DPS-411 and DPS-412,
9 included in Exhibit____(SIR-1), both Companies
10 received notifications from the EPA on September
11 21, 2018 regarding alleged responsibility for
12 potential contamination at the Pure Earth
13 Superfund Site, a former waste disposal facility
14 located in Vineland, New Jersey. Both KEDNY and
15 KEDLI are evaluating EPA requests to join a
16 potentially responsible parties (PRP) group,
17 yet, no formal determination of liability have
18 been made for either Company with respect to the
19 site.

20 Q. Are there any other environmental contamination
21 sites for which the Companies are responsible?

22 A. Yes. According to the Companies' response to IR
23 DPS-411, and DPS-412, both KEDLI and KEDNY have
24 responsibility for the cleanup of petroleum and

Cases 19-G-0309 & 19-G-0301 SSIRP

1 other hazardous materials released as part of
2 their operations, however, these remediation
3 projects are treated by the Companies as
4 operational expenses and the costs are not
5 included in their SIR deferral balances for
6 future recovery.

7 Q. Has the Panel reviewed the Companies' forecasted
8 schedules and costs for SIR activities for each
9 of their SIR sites?

10 A. Yes, we have reviewed all relevant materials
11 associated with the Companies' SIR schedule and
12 cost forecasts. Based on our experience in
13 examining SIR programs, we conclude that these
14 costs are appropriate for the scopes of work
15 anticipated by the Companies, however, we also
16 note that schedule slippages have historically
17 occurred, resulting in spending delays, and
18 should be considered when evaluating SIR cost
19 projections on an annual basis.

20 Q. Have KEDLI and KEDNY demonstrated that their SIR
21 programs are in compliance with all applicable
22 regulatory requirements and timetables?

23 A. Yes. Company witness Willard provides an
24 attestation of the Companies' overall compliance

Cases 19-G-0309 & 19-G-0301 SSIRP

1 with existing timetables and DEC requirements in
2 his testimonies for both KEDNY and KEDLI.
3 Additionally, Exhibit___(CFW-7) of Charles F.
4 Willard's KEDNY testimony and Exhibit___(CFW-5)
5 of Charles F. Willard's KEDLI testimony provide
6 explanations for any variances from the
7 scheduled activities and the activities actually
8 performed in calendar year 2018.

9 Q. Do the Companies describe their practices and
10 strategies for reducing and/or minimizing SIR
11 costs?

12 A. Company witness Willard provides attestations
13 that both of the Companies' SIR programs comport
14 with the Inventory of Best Practices for Utility
15 SIR Programs, filed March 28, 2013, in Case 11-
16 M-0034, pursuant to the Commission's direction
17 in the SIR Order. Company witness Willard
18 summarizes the Companies' cost control efforts
19 for their SIR programs in Appendix 1 of his
20 testimony for both Companies.

21 Q. Describe the Companies' competitive bidding and
22 procurement processes for consultants and
23 remediation contractors for their SIR programs.

24 A. KEDLI and KEDNY use the same competitive bidding

Cases 19-G-0309 & 19-G-0301 SSIRP

1 and procurement processes. Their processes for
2 the competitive bidding and procurement of
3 consultant and remediation contractor services
4 for the SIR programs are described in Appendix 1
5 of the testimony of Company witness Willard for
6 both Companies. Based on the information
7 provided, we understand that the Companies use a
8 competitive bidding process to procure
9 consultant and remediation contractor services
10 for all of their SIR sites. The procurement
11 processes for both environmental consultants and
12 remediation contractors involve the same general
13 process, which includes a project-specific
14 request for proposals. For certain smaller
15 projects or routine work, the Companies
16 sometimes use Blanket Purchase Orders to solicit
17 competitive bids. The Companies require that
18 competitive bids include specific details
19 breaking down the cost, including labor hours,
20 subcontractor costs, and other direct costs for
21 each task. Consultant and contractor bids are
22 then reviewed, and selections are made based on
23 cost, technical merit and personnel
24 qualifications. According to Appendix 1 of the

Cases 19-G-0309 & 19-G-0301 SSIRP

1 testimonies of Mr. Willard for both KEDLI and
2 KEDNY, the Companies established new Master
3 Services Agreements (MSAs) for routine SIR-
4 related environmental consulting work and for
5 construction management work in 2018. The new
6 MSAs issued in 2018 resulted in an expansion of
7 the Companies' consulting pool from five to
8 seven firms. Proposals for routine SIR work are
9 evaluated based on the negotiated rates under
10 these agreements. The use of MSAs allows the
11 Companies to maintain consistency with SIR
12 consultants during multi-phased long-term
13 remediation projects and minimize overhead costs
14 by reducing costs of bidding and achieving
15 savings through negotiated rates and volume
16 discounts. According to Appendix 1 of Mr.
17 Willard's testimonies, the Companies separately
18 perform interviews and establish rates with a
19 single vendor for circumstances where
20 specialized consulting services are required,
21 particularly in support of legal matters.

22 Q. Do the Companies' procurement and competitive
23 bidding practices enable them to effectively
24 implement their SIR programs while mitigating

Cases 19-G-0309 & 19-G-0301 SSIRP

1 consultant and remediation contractor costs?
2 A. Based on the information provided by KEDLI and
3 KEDNY in this proceeding, we believe that the
4 consultant and remediation contractor
5 procurement and competitive bidding practices
6 enable the Companies to effectively carry out
7 the SIR programs, while utilizing competitive
8 bidding processes that minimize costs for
9 individual sites.

10 **Cost Control Efforts**

11 Q. Do KEDLI and KEDNY describe the Companies'
12 mechanisms for reducing and/or minimizing SIR
13 costs?
14 A. Yes. Appendix 1 of the testimonies of witness
15 Willard and the Companies' responses to IRs in
16 this proceeding identify numerous cost control
17 efforts that are utilized in the SIR programs.
18 The Companies' cost control efforts include
19 implementation of flexible investigation work
20 plans that reduce costs associated with
21 recurrent work plans and mobilization of
22 contractors and equipment, development of
23 remediation solutions that contemplate current
24 and planned uses of a site, and reuse of

Cases 19-G-0309 & 19-G-0301 SSIRP

1 excavated materials where feasible and
2 acceptable.

3 Q. Do the Companies perform audits or other
4 internal reviews of their SIR Programs or
5 individual SIR sites?

6 A. According to the Companies' response to IR DPS-
7 410, included in Exhibit____(SIR-1), over the
8 past five years, National Grid conducted five
9 audits for work conducted under the MSA
10 contracts. Further, National Grid's SIR Project
11 Managers performed 44 compliance assessments on
12 active SIR sites between June 2014 and June
13 2019. According to the response to DPS-410,
14 National Grid also performs multiple audits per
15 year of facilities the Companies use for
16 disposal of materials from SIR sites in order to
17 minimize risk of future environmental
18 liabilities. National Grid's SIR group also
19 retained an external consultant to assess active
20 SIR project sites.

21 Q. How do the Companies address deficiencies and
22 recommendations identified in the reports of
23 audits of their SIR programs?

24 A. According to the Companies' response to IR DPS-

Cases 19-G-0309 & 19-G-0301 SSIRP

1 410, the SIR group reviews audit recommendations
2 or deficiencies with the audit team and
3 identifies appropriate corrective actions.
4 Corrective action items are tracked on a monthly
5 basis and documentation is provided to the audit
6 team upon completion.

7 Q. Do the Companies pursue cost-sharing or cost
8 recovery opportunities?

9 A. Yes. According to the testimonies of witness
10 Willard, both KEDLI and KEDNY routinely perform
11 reviews of historic land uses of specific sites
12 and neighboring properties and perform
13 investigations to identify other PRPs.

14 Q. Describe the results of the efforts by the
15 Companies to identify other PRPs at their SIR
16 sites.

17 A. As described in the Companies' redacted response
18 to IR DPS-413, included in Exhibit____(SIR-1),
19 both KEDLI and KEDNY have successfully
20 identified PRPs at some of their SIR sites,
21 including Gowanus Canal, Newtown Creek,
22 Williamsburg, Sag Harbor, and College Point.
23 The Companies' efforts have included successful
24 demonstrations to DEC that existing

Cases 19-G-0309 & 19-G-0301 SSIRP

1 contamination is not attributable to the
2 Companies' legacy operations and were
3 alternatively caused by historic operations from
4 other former property occupants or historic
5 operations at adjacent properties. These
6 efforts to identify other PRPs have resulted in
7 decreases in the liabilities of KEDLI and KEDNY
8 at these sites. For example, as noted in the
9 redacted response to DPS-413, KEDNY was
10 initially tasked to assume full responsibility
11 for remediation costs at the Gowanus Canal.
12 KEDNY's efforts to identify other PRPs for this
13 site have resulted in the formation of a group
14 of 21 parties that have agreed to fund the
15 remedial design on an interim basis.

16 Q. Do KEDLI and KEDNY pursue insurance cost
17 recovery opportunities for investigation and
18 remediation of their MGP sites?

19 A. Yes. As noted in the Companies' response to
20 DPS-227 and the confidential response to DPS-
21 905, both of which are included in
22 Exhibit____(SIR-1), KEDLI has successfully
23 settled MGP claims with a number of insurance
24 companies for approximately

Cases 19-G-0309 & 19-G-0301 SSIRP

1 BEGIN CONFIDENTIAL INFORMATION < [REDACTED]
 2 [REDACTED]
 3 [REDACTED]
 4 [REDACTED] > END CONFIDENTIAL INFORMATION

5 KEDNY has settled MGP claims with a number of
 6 insurance companies for approximately BEGIN
 7 CONFIDENTIAL INFORMATION < [REDACTED] > END
 8 CONFIDENTIAL INFORMATION

9 Q. Are the Companies currently pursuing insurance
 10 cost recoveries with any other excess liability
 11 insurance carriers?

12 A. In its response to IR DPS-227, included in
 13 Exhibit__(SIR-1), KEDNY indicates that it is
 14 involved in litigation with Century Indemnity
 15 Company and Munich Reinsurance America,
 16 involving questions of insurance coverage for 17
 17 of the Company's MGP sites. According to KEDNY,
 18 the amount of the claim is unknown at this point
 19 and will be based on a number of factors. KEDLI
 20 has not identified any additional insurance
 21 claims that remain outstanding.

22 Q. Are there any other cases involving claims made
 23 by or against the Companies relating to their
 24 SIR sites?

Cases 19-G-0309 & 19-G-0301 SSIRP

1 A. Yes. According to the response to DPS-227,
2 KEDLI is defending multiple lawsuits brought on
3 behalf of property owners and residents of Bay
4 Shore, primarily associated with alleged
5 diminution of the values of residential and
6 commercial properties proximal to the Bay Shore
7 MGP site. The response to DPS-227 further
8 indicates that KEDNY filed a federal Superfund
9 lawsuit in January 2017 against 15 parties from
10 which it seeks cost recovery and contribution
11 for SIR costs in the area of KEDNY's
12 Williamsburg MGP site. Litigation in this
13 proceeding is ongoing.

14 **SIR Program Costs & Cost Recovery**

15 Q. What level of SIR costs does KEDNY currently
16 recover through base rates?

17 A. KEDNY's annual base rate recovery for SIR costs
18 is \$65.288 million. This includes annual
19 recovery of one-tenth of the forecast SIR
20 deferral balance as of December 31, 2016, or
21 \$18.521 million, and \$46.767 million for
22 forecasted expenses at its MGP sites.

23 Q. Is KEDNY currently recovering costs associated
24 with the Gowanus Canal and Newtown Creek?

Cases 19-G-0309 & 19-G-0301 SSIRP

1 A. No. According to the direct testimony of
2 Charles F. Willard, at the time of the 2016 Rate
3 Case, it was difficult to accurately forecast
4 SIR expenses for those sites. Therefore, the
5 costs associated with the Gowanus Canal and
6 Newtown Creek are not currently included in base
7 rates. However, KEDNY is authorized to defer
8 any costs related to the Gowanus Canal and
9 Newtown Creek, and an SIR Recovery Surcharge
10 would be triggered if KEDNY incurred costs above
11 a set threshold. The mechanics regarding the
12 SIR Recovery Surcharge are discussed below.

13 Q. Has KEDNY incurred costs above the set threshold
14 triggering the SIR Recovery Surcharge Mechanism?

15 A. No. KEDNY has underspent its base rate
16 allowance. As of December 31, 2018, KEDNY's
17 actual post-2016 SIR deferral balance is
18 deferred credit in the amount of (\$14.761)
19 million.

20 Q. What level of SIR costs does KEDLI currently
21 recovery through base rates?

22 A. KEDLI's annual base rate recovery for SIR costs
23 is \$18.816 million. This includes annual
24 recovery of one-tenth of the forecast SIR

Cases 19-G-0309 & 19-G-0301 SSIRP

1 deferral balance as of December 31, 2016, or
2 \$14.168 million, and \$4.648 million for
3 forecasted expenses at its MGP sites.

4 Q. Please describe KEDLI's recent SIR spending?

5 A. According to the direct testimony of Charles F.
6 Willard, KEDLI experienced a declined level of
7 spending from 2016 to 2017, largely attributable
8 to less remediation construction activity.
9 Based on KEDLI's recent historic spending, and
10 spending forecast through Fiscal Year (FY) 2024,
11 we do not anticipate any significant increase in
12 SIR spending.

13 Q. Has KEDLI also been underspending its base rate
14 allowance?

15 A. Yes. As of December 31, 2018, KEDLI's actual
16 post-2016 SIR deferral balance is deferred
17 credit in the amount of (\$5.771) million.

18 **Rate Year Recovery**

19 Q. Explain how the Companies developed their Rate
20 Year forecasts.

21 A. According to the direct testimonies of Charles
22 F. Willard, the Companies' Rate Year forecasts
23 utilized the current approved DEC schedule, and
24 the anticipated work schedule for fiscal year

Cases 19-G-0309 & 19-G-0301 SSIRP

1 2020. The work schedules take into account the
2 status of each site, and the knowledge derived
3 from project managers regarding site progress
4 and potential delays to determine the projected
5 work on a site-by-site basis. The projected
6 costs for each site are based on the anticipated
7 scope of work at the site and the projected
8 remedy for those sites still requiring remedial
9 activities. KEDNY's forecast of MGP costs for
10 the Rate Year is \$66.088 million. KEDNY also
11 forecasted \$20.0 million for its Superfund sites
12 (Gowanus Canal, and Newtown Creek) based on
13 Historic Test Year spending. The resulting
14 total of Rate Year recovery is \$86.088 million.
15 KEDLI's forecast of SIR costs for the Rate Year
16 is \$6.6 million.

17 Q. Please explain the Companies' proposal for
18 recovery of SIR expenditures during the Rate
19 Year.

20 A. The Companies propose to include the forecast of
21 SIR costs for the Rate Year in base rates. In
22 addition, the Companies propose to continue to
23 annually recover one-tenth of their respective
24 SIR deferral balance, as of December 31, 2016.

Cases 19-G-0309 & 19-G-0301 SSIRP

1 Further, KEDNY proposes the continuation of the
2 SIR Recovery Surcharge.

3 Q. Explain how the SIR Recovery Surcharge is
4 supposed to function.

5 A. In the event the difference between actual SIR
6 costs (inclusive of the Gowanus Canal and
7 Newtown Creek), and the SIR base rate allowance
8 exceeds \$25 million on a cumulative basis, KEDNY
9 is authorized to recover through the SIR
10 Recovery surcharge (1) the difference between
11 actual SIR expense and the SIR rate allowance
12 (2) any amount that was not recovered in the
13 prior year's SIR Recovery Surcharge because the
14 cumulative difference between actual SIR costs,
15 and the base rate allowance did not exceed the
16 \$25 million threshold and/or the amount would
17 have increased KEDNY's aggregate revenue by more
18 than two percent.

19 Q. Do you agree with the continuation of the SIR
20 Recovery Surcharge Mechanism for KEDNY?

21 A. Yes. KEDNY has demonstrated that the
22 substantial anticipated costs associated with
23 the Gowanus Canal and Newtown Creek Superfund
24 sites warrant continuation of the SIR Recovery

Cases 19-G-0309 & 19-G-0301 SSIRP

1 Surcharge Mechanism. The SIR Recovery Surcharge
2 Mechanism would enable the Company to
3 appropriately recover significant incremental
4 costs associated with these sites in a manner
5 that would not unreasonably impact ratepayers.

6 Q. Do you agree with KEDLI's proposal to continue
7 the provision, allowing KEDLI to petition the
8 Commission to recover unanticipated, incremental
9 SIR costs through the SIR Recovery Surcharge?

10 A. Yes. While we recognize KEDLI is currently in a
11 maintenance phase for many of its remediation
12 sites, facilitating more reliable forecasting of
13 SIR costs, it remains a reasonable possibility
14 that KEDLI may have to recover considerable
15 incremental SIR expenses.

16 Q. Do you agree with the Companies' proposal to
17 recover forecasted SIR costs for the Rate Year?

18 A. Not entirely. We do not agree with the
19 Companies' proposed Rate Year recovery for their
20 MGP sites.

21 Q. Please explain.

22 A. Based on the information provided in the
23 Companies' responses to IRs DPS-234 and DPS-235,
24 included in Exhibit__(SIR-1), and the

Cases 19-G-0309 & 19-G-0301 SSIRP

1 Companies' SIR Annual Reports filed in Case 11-
2 M-0034, the Companies actual expenditures for
3 its SIR sites have historically been below its
4 cost budget. A comparison of forecasted versus
5 actual spending for calendar years 2016 through
6 2018 is provided in Exhibit___(SIR-3).

7 Q. Has the Panel compared KEDNY's actual MGP costs
8 to KEDNY's rate allowance for its MGP sites, per
9 its latest rate plan, Case 16-G-0059?

10 A. Yes. For Rate Year 1, or calendar year 2017,
11 KEDNY had a rate allowance of \$53.871 million,
12 and incurred actual MGP costs of \$23.383
13 million. For Rate Year 2, or calendar year
14 2018, KEDNY had a rate allowance of \$45.643
15 million, and incurred actual MGP costs of
16 \$12.706 million. This results in a combined
17 rate recovery for KEDNYs MGP sites of \$99.514
18 million, and combined actual spending of only
19 \$36.089 million, or a difference of \$63.425
20 million.

21 Q. Has the Panel compared KEDLI's actual MGP costs
22 to KEDLI's rate allowance for its MGP sites, per
23 its latest rate plan, Case 16-G-0058?

24 A. Yes. For Rate Year 1, or calendar year 2017,

Cases 19-G-0309 & 19-G-0301 SSIRP

1 KEDLI had a rate allowance of \$13.402 million,
2 and incurred actual MGP costs of \$7.301 million,
3 resulting in difference of \$6.101 million. For
4 Rate Year 2, or calendar year 2018, KEDLI had a
5 rate allowance of \$7.442 million, and incurred
6 actual MGP costs of \$8.259 million. This
7 results in a combined rate recovery for KEDLI's
8 MGP sites of \$20.844 million, and combined
9 actual spending of only \$15.56 million, or a
10 difference of \$5.284 million.

11 Q. What could potentially cause SIR spending to be
12 lower than what is forecasted under the DEC
13 schedule?

14 A. Several factors could contribute, including: (1)
15 schedule and scope modifications that occur on a
16 year to year basis, which are outside of the
17 Companies' control; (2) construction delays due
18 to site access issues with property owners; (3)
19 permitting requirements and regulatory
20 approvals; and (4) investigation, design, and
21 implementation delays associated with
22 unanticipated site conditions. Further, as
23 stated in the testimonies of Charles F. Willard,
24 SIR costs are subject to a high degree of

Cases 19-G-0309 & 19-G-0301 SSIRP

1 variability, which leads to a high degree of
2 risk that actual costs could be more or less
3 than anticipated.

4 Q. What is the Panel's recommendation?

5 A. We are concerned about the accuracy of the Rate
6 Year MGP forecasts. Therefore, we recommend the
7 use of a projected average for the Companies'
8 MGP sites based on their projections for Fiscal
9 Year(s) 2021 through 2024.

10 Q. Explain why the Panel disagrees with the
11 Companies' proposed rate year forecast.

12 A. Historically, the Companies' projections have
13 been significantly inaccurate. While we
14 acknowledge that the Companies have attempted to
15 consider potential delays and other inhibiting
16 factors in their forecasts, we do not have
17 confidence that the forecasts can be relied upon
18 given the large margin between the Companies'
19 MGP rate allowance, and what costs were actually
20 incurred during the previous rate period. The
21 use of a projected average levelizes the costs
22 the Companies expect to incur.

23 Q. Please explain why the use of a projected
24 average to levelized costs is appropriate.

Cases 19-G-0309 & 19-G-0301 SSIRP

1 A. Based on the historical differences between the
2 Companies' MGP forecasts and actual MGP
3 spending, our approach will more closely align
4 rate recovery with project spending and reduce
5 the year to year variability. We expect this
6 approach to stabilize rate impacts as SIR costs
7 increase in coming years.

8 Q. Why does the Panel anticipate SIR costs to
9 increase in coming years?

10 A. KEDNY is anticipating significant liabilities at
11 two Superfund sites: Gowanus Canal and Newtown
12 Creek. KEDNY's liabilities for these sites are
13 unknown at this time. Therefore, we are unable
14 to reasonably forecast the expenses for these
15 sites. In the event KEDNY incurs significant
16 incremental costs, the SIR Recovery Surcharge is
17 readily available.

18 Q. Is the Panel proposing any adjustment to KEDNY's
19 Rate Year forecast relating to the Gowanus Canal
20 and Newtown Creek?

21 A. No. We agree with KEDNY's proposal to utilize
22 the amount of \$20.0 million, incurred for the
23 Gowanus Canal, and Newtown Creek in the Historic
24 Test Year be used as the basis to forecast the

Cases 19-G-0309 & 19-G-0301 SSIRP

1 Rate Year. As previously stated, KEDNY is
2 unable to reasonably forecast its future
3 liabilities at these sites at this time.
4 However, we recognize that the Company is
5 currently incurring costs for both sites that
6 are generally consistent with the proposed
7 amount of \$20.0 million.

8 Q. Please summarize the SIR Panel's
9 recommendations.

10 A. Based on the information provided in this
11 proceeding, we believe that the Companies have
12 sufficiently satisfied the informational
13 requirements of the SIR Order and adequately
14 demonstrated compliance with the Inventory of
15 Best Practices for Utility SIR Programs. We
16 recommend the use of a projected average to
17 forecast the Companies' MGP spending for the
18 Rate Year. Our proposal utilizes the Companies'
19 MGP forecasts for FY 2021 through FY 2024.
20 Therefore, we have reflected a downward
21 adjustment to SIR expense in the amount of
22 \$15.168 million for KEDNY, and \$1.734 million
23 for KEDLI. This results in a Rate Year forecast
24 for KEDNY in the amount \$70.920, and a Rate Year

Cases 19-G-0309 & 19-G-0301 SSIRP

1 forecast for KEDLI in the amount of \$4.896
2 million.

3 Q. Does the SIR panel propose any other adjustments
4 or recommendations?

5 A. No.

6 Q. Does this conclude your testimony at this time?

7 A. Yes it does.

8

13

14

15

16

17

18

19

20

21

22

23

24

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. FORST: Excellent. I now proffer
3 the S.I.R. panel or Site Investigation Remediation
4 panel for cross examination.

5 A.L.J. COSTELLO: Okay. Okay. We're
6 going to start with the companies.

7 CROSS EXAMINATION

8 BY MR. EUTO:

9 Q. Good afternoon panel, my name is
10 Jeremy Euto for National Grid. Could you please
11 describe the process that you use to conduct
12 discovery of the company's S.I.R. programs?

13 A. Could you please clarify what you
14 mean by the process?

15 Q. Sure. For example, when you were
16 undertaking to conduct discovery on certain
17 confidential information that was related to the
18 S.I.R. program, could you just describe the process
19 that you followed, how did you actually do that?

20 A. With respect to discovery that
21 was requested, if any discovery was referencing
22 information that was confidential per this proceeding
23 that was so noted in the discovery question to the
24 company.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. In addition to marking or noting
3 that discovery -- certain discovery responses were
4 confidential, did you also conduct any in-camera
5 reviews?

6 A. Yes, we did.

7 Q. Thank you.

8 MR. EUTO: No further questions, Your
9 Honors.

10 MR. O'BRIEN: Okay. Ms. Wheelock.

11 MS. WHEELLOCK: Thank you, Your Honors.

12 CROSS EXAMINATION

13 BY MS. WHEELLOCK:

14 Q. Good afternoon, panel. My name
15 is Laurie Wheelock. I'm an attorney with the Public
16 Utility Law Project and I'm going to ask you just a
17 few questions about your testimony. To begin, is the
18 panel familiar with the ordering Case 11-M-0034 the
19 proceeding on motion of the commission to commence
20 review and evaluation of the treatment of the states
21 regulated utilities, site investigation and
22 remediation or SIR costs, which was issued and
23 effective on November 28th, 2012?

24 A. (Flaum) Generally, yes.
25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 MS. WHEELLOCK: I believe Your Honor
3 for the record I just wanted to mention that this is
4 Exhibit SIR-1, attachment 1 D.P.S. response to I.R.
5 question 234 and it's pre-marked as Exhibit 506. We
6 do have copies if anyone else would like one in the
7 room.

8 THE WITNESS: (Castano) Yes, please.

9 BY MS. WHEELLOCK: (Cont'g)

10 Q. And once you have the order, if
11 you could open it up to Page 12?

12 A. (Flaum) Thank you.

13 Q. Please review the last full
14 paragraph which starts with, in so deciding. And
15 again, that's page 12 of the order, the last full
16 paragraph starting with, in so deciding and you can
17 let me know once you review that.

18 A. Okay. We've reviewed that
19 paragraph.

20 Q. Thank you. While reviewing Mr.
21 Williard's testimony for the company, did you
22 consider whether KEDNY should share any portion of
23 the SIR related costs?

24

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. We did consider that as we do for
3 every rate case, requesting S.I.R. cost recovery in -
4 - consistent with the order that you provided.

5 Q. And ultimately did the panel
6 decide that the company should share some sort of
7 proportion of the SIR costs.

8 A. We recommended that no -- no
9 sharing of SIR costs be required for this proceeding.

10 Q. And briefly plan -- panel, can
11 you explain why that determination was made?

12 A. (Castano) If you please refer to
13 our direct testimony on page 10, line -- excuse me --
14 line 10, page 10, we state, we have reviewed all
15 relevant materials associated with the company's
16 S.I.R. schedule and cost forecasts. Based on our
17 experience and examining S.I.R. programs we conclude
18 that these costs are appropriate for the scopes of
19 work anticipated by the companies.

20 However, we also know that the
21 schedule surprises have historically occurred
22 resulting in spending delays and should be considered
23 when evaluating SIR cost projections on an annual
24 basis.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Thank you. Now turning to page
3 27, if you could review.

4 A. Excuse me, our testimony or the
5 element of your --

6 Q. Of you testimony.

7 A. Thank you.

8 Q. So reviewing page 27 of your
9 testimony, lines 10 through 22, please.

10 A. (Flaum) For the record, may I
11 just request that you clarify, did you mean to refer
12 to lines 9 through 21?

13 Q. I have lines 10 through 22, but
14 I'd be happy to read it to make sure that we have it
15 accurate for the record.

16 A. Yes, please.

17 Q. Question, explain why the panel
18 disagrees with the company's proposed rate year
19 forecast. Answer, historically, the company's
20 projections have been significantly inaccurate.
21 While we acknowledge that the companies have
22 attempted to consider potential delays and other
23 inhibiting factors in their forecasts, we do not have
24 confidence that the forecast can be relied upon given
25 the large margin between the company's M.G.P. rate

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 allowance and what costs were actually incurred
3 during the previous rate period. The use of
4 projected average levelizes the cost the company
5 expect to incur.

6 A. Thank you.

7 Q. Of course. The question I have
8 following that is since the panel's testimony was
9 filed and panel being you in August 2019, has the
10 company provided staff with any additional
11 information that changes the panel's conclusion?

12 A. No.

13 Q. And so therefore, in the panel's
14 opinion, the rate year forecasts remain inaccurate?

15 A. I think inaccurate would not be
16 the term that we use. Forecast are by nature, not
17 100% definitive and our review of previous forecasts,
18 combined with our general experience in these types
19 of reviews for S.I.R. programs is what -- is the
20 basis of our recommendation as indicated in our
21 testimony that you just read aloud.

22 Q. Thank you. Remaining on that
23 page 27 please review lines 23 through 24 that carry
24 over to page 28 lines 1 through 7. And specifically
25 lines 5 through 7 on page 28 read, we expect this

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 approach to stabilize rate impacts as SIR costs
3 increase in coming years. Can the panel please
4 explain how this approach stabilizes rate impacts as
5 SIR costs are expected to increase?

6 A. So I'm just going to refer to
7 Exhibit S.I.R.-2 page 2 of 3. As you can see for
8 fiscal year '21, the forecast for KEDNY's total site
9 spending is 80 -- approximately 86 million dollars,
10 for fiscal year '22, approximately 82 million
11 dollars, for fiscal year '23, it drops down to
12 approximately 65 million dollars and for fiscal year
13 '24, it drops down to approximately 50 million
14 dollars.

15 And based on past experience and what
16 the rate allowance was in the 2016 case, and what the
17 company actually incurred, we felt that this approach
18 as reiterated in our testimony will stabilize the
19 right impacts as the costs associated with a
20 Superfund sites increase in the later years.

21 Q. Thank you.

22 MR. FORST: Your Honors, just for
23 clarity of the record. The 2016 cases I believe
24 referred to 16-G-0059 and -0058 as we've discussed
25 previously.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: Okay.

3 BY MS. WHEELLOCK: (Cont'g)

4 Q. And my last question to the panel
5 is, did the panel consider or conduct any analysis to
6 determine what the bill impacts will be from the SIR
7 costs including the recovery surcharge in conjunction
8 with the proposed rate and increase in this case?

9 A. We did not provide testimony on -
10 - in addressing that question.

11 Q. Thank you.

12 MS. WHEELLOCK: No further questions,
13 Your Honors.

14 A.L.J. COSTELLO: Thank you. Mr.
15 Forst, do you need a moment or?

16 A.L.J. LEARY: I have a question
17 because I'm actually not completely satisfied that
18 you did what I was hoping that you would do. And I
19 think you know that, right? No. Okay. So off the
20 record, we had a colloquy among counsel as well as
21 the witness panel about how discovery was conducted
22 and how information was exchanged between the
23 companies and D.P.S. staff.

24 And I'm going to ask the panel if you
25 could, to identify what was meant by, quote in camera

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 review of information that was provided to you by the
3 company. What did that -- what does that mean?

4 THE WITNESS: (Castano) We had a
5 meeting with the company during which the company
6 provided certain information that was shared during
7 the meeting, no documentation was provided for us to
8 leave the meeting with. So there was no exchange of
9 documentation, other than for the purposes of and
10 during the meeting and no I.R. responses or any other
11 documentation was provided regarding the information
12 shared during that in-camera meeting any time after
13 that meeting.

14 A.L.J. LEARY: And what was your
15 understanding about why that was the protocol that
16 was necessary to be followed as -- as -- as an
17 explanation provided by the company.

18 THE WITNESS: The company reiterated
19 to the panel that this information was extremely,
20 extremely sensitive. And once again, given that
21 there is other parties involved in this case that may
22 have some sort of allocation associated with these
23 sites.

24 A.L.J. LEARY: Liability allocation.
25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 THE WITNESS: Liability -- liability
3 allocation yes, that it would be best to do this in-
4 camera review.

5 A.L.J. LEARY: And so it's your
6 understanding that this protocol was necessary to --
7 to -- to protect an interest of the company, is that
8 correct?

9 THE WITNESS: That is correct, Your
10 Honor.

11 A.L.J. LEARY: Okay, that's all I
12 have. I just want to make sure that we're clear.
13 And I -- if anyone has any other questions about
14 this, please if it -- if you don't think it's clear,
15 please feel free to inquire of the panel. Anybody?
16 Okay. Anything?

17 A.L.J. COSTELLO: Mr. Forst.

18 A.L.J. LEARY: Mr. Forst.

19 MR. FORST: I'm going to go --

20 A.L.J. LEARY: You want to take a
21 minute?

22 MR. FORST: We'll take one minute.

23 A.L.J. LEARY: Okay. We're off the
24 record.

25 (Off the record 3:45 p.m.)

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 (On the record 3:48 p.m.)

3 MR. FORST: Yes, Your Honors. We have
4 one question for redirect.

5 A.L.J. COSTELLO: Okay.

6 RE-CROSS EXAMINATION

7 BY MR. FORST:

8 Q. Panel, in the course of your in-
9 camera review of certain information, can you clarify
10 what types of information you reviewed during that
11 in-camera review?

12 A. (Flaum) Yes, we reviewed cost and
13 design information with respect to potential
14 allocations and liabilities for remedial design work
15 for Gowanda and mostly Gowanda but also Newtown Creek
16 sites and our understanding is that both of those are
17 still subject to litigation outside of this
18 proceeding.

19 Q. And when you speak of
20 allocations, you're referring to allocations amongst
21 P.R.P.s or potentially responsible parties.

22 A. That is correct.

23 MR. FORST: No further questions, Your
24 Honors.

25 A.L.J. LEARY: Thanks.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. COSTELLO: Ms. Wheelock.

3 MS. WHEELOCK: No further questions.

4 A.L.J. COSTELLO: Okay. We thank the
5 panel for its testimony. You're excused. We'll just
6 go off the record for a moment.

7 (Off the record 3:50 p.m.)

8 A.L.J. COSTELLO: And I'm just going
9 to ask the panel members beginning with the
10 gentleman, the furthest seated from -- from me just
11 to state your name and business address for the
12 record.

13 MR. CALKINS: My name is Ron Calkins.
14 My address is 3 Empire State Plaza, Albany, New York.

15 MR. RIDER: Aric Rider, my business
16 address is 3 Empire State Plaza, Albany, New York.

17 MR. DUAH: Kwaku Duah, 3 Empire State
18 Plaza, Albany, New York.

19 MS. MAMMENS: Kathryn Mammens, 3
20 Empire State Plaza, Albany, New York.

21 A.L.J. COSTELLO: Please stand and
22 raise your right hand. Do you swear or affirm that
23 the testimony you will provide is the truth?

24 MR. CALKINS: Yes.

25 WITNESS; RONALD CALKINS; Sworn

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. RIDER: Yes.

3 WITNESS; ARIC RIDER; Sworn

4 MR. DUAH: Yes.

5 WITNESS; KWAKU DUAH; Sworn

6 MS. MAMMENS: Yes.

7 WITNESS; KATHRYN MAMMENS; Sworn

8 A.L.J. COSTELLO: Thank you. You may
9 be seated. Mr. Forst -- Mr. Goodrich, I'm sorry.

10 MR. GOODRICH: It's actually back to
11 me. I just want to note one thing. On our testimony
12 we have listed as -- as one of the panel members is
13 Chelsea Krueger and while she is a -- a panel member
14 she is -- is out for -- for medical reasons and --
15 but we, the panel is -- is fully prepared to proceed.

16 A.L.J. COSTELLO: Okay.

17 A.L.J. LEARY: Thank you.

18 DIRECT EXAMINATION

19 BY MR. GOODRICH:

20 Q. So staff policy panel before you
21 is a document entitled prepared testimony of Staff
22 Policy Panel consisting of a cover page and 57 pages
23 of questions and answers dated August 2019. Was that
24 testimony prepared by you or under your direct
25 supervision?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. (Rider) Yes.

3 Q. Also before you is a document
4 entitled prepared supplemental testimony of Staff
5 Policy Panel consisting of a cover page and 17 pages
6 of questions and answers dated January 2020. Was
7 that testimony prepared by you or under your direct
8 supervision?

9 A. Yes.

10 Q. Do you have any changes or
11 corrections to make to your prepared testimony?

12 A. No.

13 Q. Do you affirm that the
14 information contained in the panel's prepared
15 testimony is true and correct to the best of your
16 knowledge?

17 A. Yes.

18 Q. If you are asked the same
19 questions today under oath, would you answer them in
20 the same way?

21 A. Yes.

22 MR. GOODRICH: Your Honor, I ask that
23 the prepared testimonies of the staff policy panel be
24 entered into the record as if given orally.

19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
A.L.J. COSTELLO: That's granted. And
at this point the court reporter should insert the
following files. DPS Staff Policy Panel direct
testimony and D.P.S. Staff Policy Panel supplemental
testimony. #

BEFORE THE
STATE OF NEW YORK
PUBLIC SERVICE COMMISSION

In the Matter of

The Brooklyn Union Gas Company d/b/a National Grid NY &
KeySpan Gas East Corporation d/b/a National Grid

Cases 19-G-0309 & 19-G-0310

August 2019

Prepared Testimony of:

Staff Policy Panel

Aric Rider
Chief, Consumer Advocacy

Chelsea Kruger
Utility Analyst 2
Office of Consumer Services

Ronald Calkins
Supervisor, Utility Accounting and
Finance

Kwaku Duah
Principal Utility Financial Analyst

Office of Accounting Audits and
Finance

Kathryn Mammen
Utility Analyst 3
Office of Markets & Innovation

State of New York
Department of Public Service
Three Empire State Plaza
Albany, New York 12223-1350

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 Q. Members of the Department of Public Service
2 (Department) staff (Staff) Policy Panel (Panel),
3 please state your names, employer and business
4 address.

5 A. Our names are Aric Rider, Chelsea Kruger, Ronald
6 Calkins, Kwaku Duah, and Kathryn Mammen. We are
7 employed by the Department of Public Service.
8 Our business address is Three Empire State
9 Plaza, Albany, New York, 12223-1350.

10 Q. Mr. Rider, in what capacity are you employed by
11 the Department?

12 A. I have been recently promoted to Chief, Consumer
13 Advocacy for the Office of Consumer Services.

14 Q. Mr. Rider, please provide a summary of your
15 educational background and professional
16 experience.

17 A. I hold a Bachelor of Science Degree in Civil
18 Engineering Technology, which I received in 2001
19 from the State University of New York Institute
20 of Technology at Utica/Rome. Within the Office
21 of Electric, Gas and Water, I was previously
22 assigned to the Gas and Water Rates and Supply,
23 Gas and Water Rates, Major Utility Rates, Gas
24 Rates, Gas Safety, Gas Policy and Supply, and

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 Electric Rates Sections. My duties involve the
2 engineering analysis of utility operations as
3 they relate to the ratemaking process, as well
4 as participating in various reviews of local
5 distribution companies' activities.

6 Q. Mr. Rider, have you previously provided
7 testimony in proceedings before the Commission?

8 A. Yes, I have provided testimony in several
9 proceedings before the Commission regarding
10 sales forecasts, revenue imputations, operation
11 and maintenance expenses, depreciation, capital
12 planning, development of net plant, cost of
13 service, revenue allocation, rate design,
14 merchant function charges, revenue decoupling
15 mechanisms, gas safety performance mechanisms,
16 and tariff issues.

17 Q. Ms. Kruger, are you the same Chelsea Kruger
18 testifying as part of the Staff Consumer
19 Services Panel?

20 A. Yes. I discuss my credentials in that Panel's
21 testimony.

22 Q. Mr. Calkins, are you the same Ronald F. Calkins
23 testifying as part of the Staff Accounting
24 Panel?

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 A. Yes. I discuss my credentials in that Panel's
2 testimony.

3 Q. Mr. Duah, are you the same Kwaku Duah testifying
4 as part of the Staff Finance Panel?

5 A. Yes. I discuss my credentials in that Panel's
6 testimony.

7 Q. Ms. Mammen, are you the same Kathryn Mammen
8 testifying as part of the Staff Efficiency and
9 Sustainability Panel?

10 A. Yes. I discuss my credentials in that Panel's
11 testimony.

12

13

SCOPE OF TESTIMONY

14 Q. Panel, what is the purpose of your testimony?

15 A. We will: (1) Explain the impact of the Northeast
16 Supply Enhancement project on these rate
17 proceedings; (2) present an overview of Staff's
18 recommended revenue requirements for The
19 Brooklyn Union Gas Company d/b/a National Grid
20 NY's (KEDNY) and KeySpan Gas East Corporation
21 d/b/a National Grid LI's (KEDLI) (collectively,
22 the Companies); (3) present an overview of
23 Staff's recommended return on equity, common
24 equity ratio and earnings sharing mechanism; (4)

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 provide a summary of the Companies' proposed
2 capital investment plans; (5) provide an
3 overview of the proposed Information Technology
4 (IT) capital and Operation and Maintenance (O&M)
5 expense plans; (6) summarize Staff's
6 recommendations regarding earning adjustment
7 mechanisms, performance metrics and incentives;
8 and, (7) discuss KEDNY's Newtown Creek
9 renewable natural gas project and make
10 recommendations for rate treatment of the
11 project.

12 Q. In your testimony, will you refer to, or
13 otherwise rely on, any information obtained
14 during the discovery phase of this proceeding?

15 A. Yes. We rely on several IR responses provided
16 by the Companies. These responses are included
17 in Exhibit___(SPP-1), and will be referred to
18 using the Department's assigned request number
19 (e.g., DPS-121). This Exhibit includes a Table
20 of Contents that identifies each IR included
21 within our testimony, and the page on which it
22 may be found in the Exhibit.

23 Q. Are you sponsoring any other exhibits?

24 A. Yes. We are also sponsoring the following

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 exhibits: Exhibit___(SPP-2), which contains a
2 summary of Staff's recommended incentive
3 mechanisms; and, Exhibit___(SPP-3), which
4 contains our calculation of the Newtown Creek
5 Project Revenue Imputation.

6 Q. What is the Historic Test Year in these
7 proceedings?

8 A. The Historic Test Year is the twelve months
9 ending December 31, 2018.

10 Q. What is the Rate Year in these proceedings?

11 A. The Rate Year is the twelve months ending
12 March 31, 2021. This period coincides with
13 KEDNY and KEDLI's fiscal year (FY) 2021.

14 Q. Did the Companies include additional data for
15 periods beyond the Rate Year?

16 A. Yes. The Companies provided data for the three
17 subsequent twelve-month periods ending March 31st
18 after the Rate Year, or what they called Data
19 Years 1, 2 and 3.

20

21 **NORTHEAST SUPPLY ENHANCEMENT PROJECT**

22 Q. What is Transcontinental Gas Pipe Line LLC's
23 (Transco) Northeast Supply Enhancement (NESE)
24 project?

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

- 1 A. As described by Ms. Arangio, KEDNY and KEDLI
2 signed precedent agreements for 100 percent of
3 the incremental pipeline capacity with Transco
4 to deliver an additional 400,000 dekatherms
5 (dth) of natural gas per day to the downstate
6 New York area. Transco plans to expand its
7 existing pipeline system along Pennsylvania, New
8 Jersey, and New York to connect to the
9 Companies' system in the Rockaway Peninsula.
- 10 Q. Did the Companies assume the NESE project would
11 be built during the Rate Year when they filed
12 the instant cases?
- 13 A. Yes. As described by Ms. Arangio, KEDNY and
14 KEDLI's rate filing assumes that NESE will be
15 completed and available by the 2020/2021 winter
16 heating season. This would be in the second
17 half of the Rate Year.
- 18 Q. Does the Panel agree that rates should be set in
19 these proceedings assuming that the NESE project
20 will be built during the Rate Year?
- 21 A. No. This Staff team has no indication of
22 whether or not the NESE project will be
23 constructed, and if so, when. At present the
24 NESE Project is under review at the New York

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 State Department of Environmental Conservation
2 and the New Jersey Department of Environmental
3 Protection. Given this situation, we believe
4 that the most reasonable course of action for
5 these rate proceedings is to assume that the
6 NESE Project will not be available during the
7 Rate Year. Accordingly, we have instructed the
8 other Staff witnesses and panels to present
9 recommendations based on the assumption that the
10 NESE project will not be available during the
11 Rate Year.

12 Q. What if the circumstances around the NESE
13 project change prior to the Commission issuing a
14 final rate order in these proceedings?

15 A. Each of the Staff witnesses and panels has
16 endeavored to provide information sufficient for
17 the Commission to set rates for the Rate Year
18 under either circumstance, whether or not the
19 NESE project will be available during the Rate
20 Year. For example, the Staff Gas Infrastructure
21 and Operations Panel (SGIOP) provides
22 adjustments for both scenarios.

23

24

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 SUMMARY OF STAFF'S REVENUE REQUIREMENTS

2 Q. Please summarize Staff's recommendation
3 regarding KEDNY's requested gas revenue
4 requirement?

5 A. Staff recommends a gas base rate revenue
6 requirement increase of \$2.205 million, or
7 approximately \$173.5 million less than the
8 \$175.703 million requested by KEDNY.

9 Q. How does Staff's recommendation compare to
10 KEDNY's on an overall total base delivery
11 revenue increase?

12 A. Compared to KEDNY's \$195.6 million base delivery
13 revenue increase, Staff's recommendation results
14 in a total base delivery revenue increase of
15 \$28.294 million, or a difference of
16 approximately \$167.3 million. The \$28.294
17 million reflects a base delivery revenue
18 requirement increase of \$2.205 million, less
19 incremental gross revenue taxes of \$0.078
20 million, plus the impact of removing both the
21 currently in place 2017 Tax Cuts and Jobs Act
22 sur-credit of \$44.646 million and the energy
23 efficiency surcharge of \$18.636 million as Staff
24 also recommends including both of these

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 components in the base rate revenue requirement.
2 The Staff Revenue Requirements Panel describes
3 the major reasons for the differences between
4 KEDLI's requested and Staff's recommended Rate
5 Year revenue requirement.

6 Q. Please summarize Staff's recommendation
7 regarding KEDLI's requested gas revenue
8 requirement?

9 A. Staff recommends a base delivery revenue
10 requirement decrease of \$51.852 million, or
11 approximately \$91.1 million less than the
12 \$39.234 million requested by KEDLI.

13 Q. How does Staff's recommendation compare to
14 KEDLI's on a total base delivery revenue
15 increase basis?

16 A. Compared to KEDLI's \$61.2 million total base
17 delivery revenue increase, Staff's
18 recommendation results in a total base delivery
19 revenue decrease of \$28.740 million, or a
20 difference of approximately \$89.9 million. The
21 \$28.740 million reflects a base delivery revenue
22 requirement decrease of \$51.852 million, less
23 decremental gross revenue taxes of \$0.772
24 million, plus the impact of removing both the

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 currently in place 2017 Tax Cuts and Jobs Act
2 sur-credit of \$31.834 million and the energy
3 efficiency surcharge of \$9.478 million as Staff
4 also recommends including both of these
5 components in the base rate revenue requirement.
6 The Staff Revenue Requirements Panel describes
7 the major reasons for the differences between
8 KEDLI's requested and Staff's recommended Rate
9 Year revenue requirement.

10

11 **Low Income Program Deferral Credits**

12 Q. What are KEDNY and KEDLI's deferral credit
13 balances related to the low income programs?

14 A. As of December 31, 2018, KEDNY has a deferral
15 credit of \$10.9 million and KEDLI has a credit
16 of \$9.8 million.

17 Q. What do you recommend regarding these deferral
18 credits?

19 A. Based on Staff's proposed revenue requirement,
20 we believe use of the low income deferral
21 credits is not needed during the Rate Year.
22 However, if the revenue requirement for both
23 Companies does increase, we recommend the
24 Commission apply a quarter of the deferral

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 credit balances to the Energy Affordability
2 Program budgets in the Rate Year to minimize
3 bill impacts on ratepayers. The remainder of
4 the deferral credits can be reserved to offset
5 the Energy Affordability Programs in the future,
6 as the program's bill discounts and budgets
7 fluctuate.

8

9

COST OF CAPITAL

10 Q. What return on equity (ROE) and common equity
11 ratio did the Companies request?

12 A. The Companies requested a 48.0 percent common
13 equity ratio, with a 9.65 percent return on
14 equity and overall pre-tax rate of return of
15 8.53 percent for KEDNY and 8.51 percent for
16 KEDLI.

17 Q. What does Staff recommend for a return on equity
18 and a common equity ratio?

19 A. The Staff Finance Panel recommends a common
20 equity ratio of 48.0 percent, with a return on
21 equity of 8.20 percent for both Companies.
22 These result in an overall pre-tax rate of
23 return of 7.58 percent for KEDNY and 7.54
24 percent for KEDLI.

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 Q. What is the impact of Staff's recommended rate
2 of return on the Companies' revenue
3 requirements?

4 A. The impact of our recommended rate of return is
5 to decrease the Companies' revenue requirements
6 by approximately \$49.00 million and \$33.0
7 million for KEDNY and KEDLI, respectively.

8 Q. What is an earnings sharing mechanism (ESM)?

9 A. An ESM provides for the sharing of any earnings
10 in excess of a threshold above a company's
11 allowed return on equity. Such a mechanism is
12 useful in two ways. First, by requiring that a
13 portion of such excess earnings be retained for
14 customers, the mechanism helps to protect
15 customers from paying for an excessive return.
16 Second, as shareholders will receive the benefit
17 of a portion of these excess earnings, the
18 structure of the ESM maintains an incentive for
19 a company to increase efficiencies.

20 Q. Do you recommend that the Commission institute
21 an ESM in the event that the Commission sets
22 rates for a one year period, i.e., the Rate
23 Year?

24 A. An ESM should not be instated during the Rate

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 Year, however, if the Commission sets rates for
2 a single Rate Year, we recommend that the
3 Commission institute an ESM for the period after
4 the end of the Rate Year. Additionally, we note
5 that the Commission instituted an ESM for the
6 period following the rate year when it last set
7 rates for National Fuel Gas Distribution
8 Corporation in Case 16-G-0257. Specifically, we
9 recommend that the Commission require the
10 implementation of an ESM for each 12-month
11 period following the Rate Year, i.e., the 12-
12 month period ending March 31, 2022 and so on.
13 The ESM would only go into effect in the event
14 the Companies do not file for new rates to go
15 into effect on or before October 1, 2021. By
16 doing so, the Commission can ensure that the
17 Companies' rates remain just and reasonable in
18 the event there are unanticipated consequences
19 that may unreasonably increase the Companies'
20 actual earnings.

21 Q. What structure do you recommend for the ESM?

22 A. We recommend structuring the ESM in four bands.
23 For the first band, we recommend that the
24 Companies be allowed to retain 100 percent of

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 earnings up to and including 50 basis points
2 above their allowed ROE. For the second band,
3 defined as earnings greater than 50 basis points
4 above their allowed ROE and up to 100 basis
5 points above their allowed ROE, we recommend
6 that 50 percent of any earnings be deferred for
7 the benefit of customers and the remaining 50
8 percent be retained by the Companies. For the
9 third band, defined as earnings greater than 100
10 basis points above their allowed ROE and up to
11 150 basis points above their allowed ROE, we
12 recommend that 75 percent of any earnings be
13 deferred for the benefit of customers and the
14 remaining 25 percent should be retained by the
15 Companies. For the last band, defined as any
16 earnings in excess of 150 basis points above
17 their allowed ROE, we recommend that 90 percent
18 of any earnings should be deferred for the
19 benefit of customers and the remaining 10
20 percent be retained by the Companies.

21

22

CAPITAL INVESTMENT PLANS

23 Q. Please briefly describe how many gas customers
24 the Companies serve and the areas in which they

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 operate.

2 A. KEDNY serves approximately 1.2 million customers
3 in Brooklyn, Staten Island and Parts of Queens.
4 KEDLI serves approximately 590,000 customers in
5 Nassau and Suffolk Counties and the Rockaway
6 Peninsula.

7 Q. Have the Companies proposed investment plans to
8 address the conditions of their gas distribution
9 systems?

10 A. Yes. KEDNY and KEDLI plan to invest \$856
11 million and \$568 million, respectively, in the
12 Rate Year, as shown in the Companies'
13 Exhibits___(GIOP-1CU), in order to support
14 maintaining safe, reliable and resilient
15 delivery service. The budgets exclude the cost
16 of removal, which the Companies show in their
17 presentations for cash flow purposes. The
18 Companies' investment plans include the
19 retirement of leak prone pipe (LPP), programs to
20 respond to conditions on their transmission
21 system, as well as preparing for the major
22 rehabilitation of their liquified natural gas
23 (LNG) tanks.

24 Q. What investment levels did the Commission

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 authorize in the 2016 Rate Order, issued on
2 December 16, 2016 in Cases 16-G-0058 and 16-G-
3 0059?

4 A. As shown in Appendix 1, Schedule 5 of the Joint
5 Proposal adopted through the 2016 Rate Order,
6 the Commission approved KEDNY's budgets of \$603
7 million, \$654 million, \$650 million and \$629
8 million for calendar years 2017 through 2020,
9 respectively. As shown in Appendix 2, Schedule
10 5 of the Joint Proposal, the Commission approved
11 KEDLI's budgets of \$322 million, \$377 million,
12 \$396 million and \$406 million in 2017 through
13 2020, respectively.

14 Q. Please explain the major drivers of the
15 increases in the capital budgets in the instant
16 cases.

17 A. The major drivers are the need for the following
18 investments: (1) to meet customers' requests for
19 service; (2) the City/State construction
20 activity; (3) the removal of LPP; (4) integrity
21 management programs to identify and address the
22 gas system; and (4) to start major reliability
23 projects - the LNG tank rehabilitations.

24 Q. What are the current drivers of the incremental

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

- 1 increases in the O&M budgets associated with the
2 capital investment plans?
- 3 A. The Companies identified the drivers as: (1)
4 increasing capital investments and increased
5 costs for executing the Companies' capital
6 plans; (2) changes to Companies' O&M workload;
7 and, (3) initiatives the Companies are
8 undertaking in the Rate Year to address new or
9 expanding safety requirements and to implement
10 lessons learned from recent incidents throughout
11 the gas distribution industry.
- 12 Q. What are the proposed costs of the incremental
13 O&M programs?
- 14 A. As shown on Exhibits__(GIOP-8CU), KEDNY proposes
15 \$12.3 million and KEDLI proposes \$8.3 million in
16 incremental O&M expenses for the Rate Year.
- 17 Q. Did the Companies propose increases to the
18 number of FTE positions to deliver the capital
19 and O&M programs?
- 20 A. Yes. As shown on Exhibits__(GIOP-9CU), the
21 Companies included an additional 145.7 and 85.3
22 FTE positions for KEDNY and KEDLI, respectively,
23 in the Rate Year in various areas including:
24 service line inspection, contractor safety

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 inspection, enhanced inactive account,
2 instrumentation and regulation, pipeline safety,
3 materials lab testing, meter inspection, gas
4 control standard operating procedure training,
5 first responder training, high emitter methane
6 detection, operator qualification program,
7 support for capital investments, integrity
8 management programs, storm hardening, and
9 research and development.

10 Q. What did the Companies forecast for incremental
11 O&M expenses related to the new FTEs?

12 A. As shown on Exhibits___(RRP-3CU), Schedule 27,
13 Page 6 of 8, the Companies forecast total
14 incremental gas expense of \$8.3 million and \$6.5
15 million for KEDNY and KEDLI, respectively.

16 Q. Did the SGIOP conduct a comprehensive review of
17 the Companies' Capital and O&M budgets?

18 A. Yes. The SGIOP performed a review of the
19 Companies' process and procedures, including
20 project planning, estimating, project
21 management, budgeting and the approval process.
22 The SGIOP also reviewed the historic capital
23 expenditures and expenses, forecast capital
24 expenditures and expenses and changes to O&M

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 expenses related to changes to the forecast
2 capital expenditures.

3 Q. Does the SGIOP have recommendations with regard
4 to the gas capital investment plans?

5 A. Yes. The SGIOP recommends that the Rate Year
6 capital expenditure budgets, inclusive of cost
7 of removal, be reduced by \$124.3 million and
8 \$157.5 million for KEDNY and KEDLI,
9 respectively.

10 Q. Does the SGIOP have O&M expense recommendations
11 with regard to the new initiatives and FTEs?

12 A. Yes. The SGIOP reduced the Companies' Rate Year
13 O&M expense budgets by \$4.806 million and \$3.010
14 million for KEDNY and KEDLI, respectively, and
15 reduced the Companies' FTE requests by 11.6 and
16 7.9 for KEDNY and KEDLI, respectively.

17

18 **INFORMATION TECHNOLOGY INVESTMENT PLANS**

19 Q. Please briefly describe the proposed Information
20 Technology capital investment plan.

21 A. The Companies' IT Panel explained that IT serves
22 a wide range of services, from critical gas
23 transmission / distribution support systems to
24 standard office desktop applications, and is

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 vital for the "safe, reliable, and secure
2 physical and commercial operation of KEDNY and
3 KEDLI's gas distribution business". IT also
4 provides the necessary software applications to
5 serve the customer needs and to efficiently and
6 effectively manage and operate KEDNY and KEDLI.

7 Q. Where in National Grid's corporate structure do
8 IT investments take place.

9 A. Generally, National Grid USA Service Company,
10 Inc (Service Company) makes investments in IT
11 and then allocates the cost of those investments
12 to the operating utilities, including KEDNY and
13 KEDLI through Service Company Rents.

14 Q. What investment levels do KEDNY and KEDLI
15 propose?

16 A. As shown in the Exhibit____(ITP-4CU), the
17 proposed IT spending levels are \$243.8 million,
18 \$382.8 million, \$180.8 million and \$299.2 for
19 the Rate Year, FY 22, FY 23, and FY 24,
20 respectively, for the Service Company. This is
21 a significant increase as compared to the five-
22 year average of annual capital spending of \$97.5
23 million. The Companies also forecast Service
24 Company-level "run the business" expenses and

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 operating expenses of approximately \$318.7
2 million for all projects in the Rate Year. This
3 is also a significant increase, compared to
4 \$244.2 million of run the business and operating
5 expenses incurred in the Historic Test Year.

6 Q. Please explain the major drivers of the
7 investment in IT.

8 A. The Companies state that in addition to the
9 baseline IT needed to run the business, there
10 are several significant IT programs and
11 initiatives: (1) Technology Modernization; (2)
12 Cyber and Physical Security; (3) Customer
13 Information System Replacement; (4) SAP S/4
14 HANA; (5) Gas Business Enablement; and (6) and
15 Customer Transformation.

16 Q. Did the Staff IT Panel conduct a comprehensive
17 review of the Companies' proposal?

18 A. Yes. For the proposed new IT projects the Staff
19 IT Panel performed a thorough review of the IT
20 budgeting process, proposed IT investment plan,
21 and the cost estimation and implementation
22 planning process.

23 Q. Describe the Staff IT Panel's recommendations
24 regarding the IT investments.

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

- 1 A. The Staff IT Panel recommends revenue
2 requirement adjustments to reflect: (1) the
3 removal of certain IT projects, (2) an
4 adjustment to KEDNY and KEDLI's forecast of the
5 Service Company-level IT capital budget, and (3)
6 an adjustment to Service Company return on IT
7 capital investments. The Staff IT Panel also
8 recommends a downward-only reconciliation of
9 capital expenditures associated with KEDNY and
10 KEDLI's Service Company Rent Expense and adding
11 reporting requirements to allow for enhanced
12 oversight of the Companies' IT programs.
- 13 Q. Did the Staff IT Panel have concerns with the
14 Companies' IT proposals?
- 15 A. Yes. Due to the Companies' budgeting process
16 and the timing of the rate filings, many
17 projects do not have sanction papers for Staff
18 to review. It is, therefore, extremely
19 difficult for Staff to determine if the proposed
20 Service Company budgets are reasonable and
21 appropriate.
- 22 Q. How can the Companies improve on their
23 processes?
- 24 A. We recommend the following process improvements:

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 (1) proposed budgets included in a rate filing
2 should be supported by sanction papers; (2) once
3 the sanction papers are developed, National
4 Grid's CIO should attest to the costs and
5 benefits of the programs that make up the
6 approved budget; (3) after the projects are
7 closed, National Grid's CIO should attest to and
8 report on the actual costs and benefits achieved
9 through the IT investment plan, and, (4) these
10 improvements should be incorporated into the IT
11 reporting requirements.

12 Q. Why are these improvements reasonable?

13 A. If the Companies filed sanction papers in the
14 rate case, Staff could assess the reasonableness
15 of the IT budgets. Moreover, having the CIO
16 attest to the costs and benefits would provide a
17 level of accountability for the Companies to
18 deliver on their promises.

19

20 **EFFICIENCY AND SUSTAINABILITY**

21 **Energy Efficiency**

22 Q. Describe Staff's recommendations regarding
23 energy efficiency.

24 A. The Staff Efficiency and Sustainability Panel

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 recommends using the Companies' proposed energy
2 efficiency budgets as placeholders until the
3 Commission authorizes budgets in Case 18-M-0084,
4 at which time the authorized budgets should
5 replace the Companies' proposed budgets. In
6 addition, the Staff Efficiency and
7 Sustainability Panel recommends amortizing the
8 Companies' unspent energy efficiency related
9 funds over five years to offset the energy
10 efficiency collections.

11

12 **Gas Supply**

13 Q. Did the Staff Gas Supply Panel address the
14 Companies proposed Green Gas Tariff?

15 A. Yes. The Staff Gas Supply Panel supports the
16 proposed program with two modifications: the
17 proposed FTEs be reduced from two to one FTE for
18 the Rate Year and the Companies' proposed
19 reconciliation mechanism be modified given the
20 innovative nature of the Green Gas Tariff.

21 Q. What does Staff recommend regarding the Clean
22 Conversion Program and the Low and Moderate
23 Income Conversion Program.

24 A. The Staff Efficiency and Sustainability Panel

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 addresses the Companies' conversion programs.

2 That Panel recommends that as we are assuming
3 that the NESE project will not be built in the
4 Rate Year, these programs should be denied.

5 Q. If the NESE Project does get built, do you
6 recommend approving the Clean Conversion Program
7 or the Low and Moderate Income Conversion
8 Program?

9 A. No.

10 Q. Please explain.

11 A. Despite its name, the Clean Conversion Program
12 is no different than the former Neighborhood
13 Expansion Program, except for the provision of
14 information regarding renewable natural gas and
15 geothermal heat pumps. Even if supply is
16 available, we recognize that these programs ask
17 existing firm customers to subsidize providing
18 gas service to new customers. Accordingly, we
19 recommend discontinuing them.

20 Q. What does Staff recommend regarding the Fuel
21 Switching Calculator, Demand Response program
22 expansion, and expanded utility-owned Geothermal
23 Demonstration Project?

24 A. The Staff Efficiency and Sustainability Panel

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 makes recommendations related to each of these
 2 topics. Specifically, the Staff Efficiency and
 3 Sustainability Panel recommends: (1) approval of
 4 the Fuel Switching Calculator, provided that the
 5 costs of the platform are spread amongst the
 6 other National Grid operating utilities; (2)
 7 approval of the expanded Demand Response Program
 8 as requested by the Companies, with the
 9 exception that recovery of such costs occur as a
 10 line item through the Delivery Service
 11 Adjustment surcharge mechanism; and (3) that
 12 expansion of the utility-owned Geothermal
 13 Demonstration Project be rejected.

14

15 **PERFORMANCE METRICS**

16 **Earnings Adjustment Mechanisms**

- 17 Q. Describe Exhibit__(SPP-2).
- 18 A. Exhibit__(SPP-2) is a summary of all gas
 19 incentive mechanisms recommended in these
 20 proceedings.
- 21 Q. What types of incentive mechanisms does Staff
 22 recommend?
- 23 A. Various Staff panels recommend earnings
 24 adjustment mechanisms (EAMs), and performance

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 metrics with associated negative and/or positive
2 revenue adjustments.

3 Q. Please briefly summarize the EAMs that the Staff
4 EAMs Panel (SEAMP) recommends for KEDNY and
5 KEDLI in these proceedings.

6 A. The SEAMP recommends that the Commission
7 institute a peak reduction metric for each
8 Company. The SEAMP also recommends that the
9 Commission institute a "Share the Savings"
10 energy efficiency metric for each Company.

11 Q. Please describe the peak reduction metric.

12 A. The SEAMP recommends high level concepts for a
13 peak reduction metric that would measure peak-
14 day usage reductions from firm customers on a
15 per-Heating Degree Day basis. However, the
16 SEAMP believes that input from the Companies and
17 other parties will be necessary to fully develop
18 this metric. Further, the SEAMP recommends that
19 each Company be allowed to earn up to 10 basis
20 points under this metric.

21 Q. Please describe the Share the Savings energy
22 efficiency metric.

23 A. At a high level, each Company could earn a 30
24 percent share of the savings the Company creates

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 by improving the financial efficiency of its
2 energy efficiency programs.

3 Q. How do the SEAMP recommendations compare to the
4 Companies' EAM proposals?

5 A. KEDNY and KEDLI proposed multiple, sometimes
6 overlapping, EAMs. Associated with their
7 proposed metrics, KEDNY and KEDLI proposed to
8 earn up to 78 basis points and 77 basis points,
9 respectively.

10 Q. Does the SEAMP address non-pipe alternatives
11 (NPAs)?

12 A. Yes.

13 Q. Please briefly summarize the SEAMP Panel's NPA
14 recommendations.

15 A. The SEAMP recommends instituting an NPA
16 mechanism through which the Companies would
17 consider NPA alternatives to traditional capital
18 projects. The SEAMP Panel recommends
19 implementing a structure for the Companies to
20 develop and propose NPAs in these proceedings,
21 but would leave consideration of an actual
22 incentive to a separate filing, when one of the
23 Companies has a concrete NPA proposal.

24 Q. Please briefly summarize the platform service

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 revenues (PSRs) that the SEAMP recommends for
2 KEDNY and KEDLI.

3 A. The SEAMP recommended that the Companies be
4 allowed to retain 20 percent of the net revenues
5 generated from their Utility Energy Services
6 Contracts program.

7 Q. How do the SEAMP recommendations compare to the
8 Company's proposed PSRs?

9 A. The Companies proposed to retain 20 percent of
10 the revenues generated from their E-Commerce
11 Platform, as well as one-third of the gross
12 revenues generated from their Utility Energy
13 Services Contracts program.

14

15 **Customer Service Quality**

16 Q. Please briefly summarize the Customer Service
17 Quality Program (CSQP) as recommended by the
18 Staff Consumer Services Panel in these
19 proceedings.

20 A. The Staff Consumer Services Panel recommends
21 continuing the Customer Service Quality Program
22 presently in place for KEDNY and KEDLI, with
23 modifications to the targets. The CSQP includes
24 targets for: (1) the annual PSC Complaint Rate

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 per 100,000 customers; (2) Residential Customer
2 Transaction Satisfaction, measured through a
3 customer satisfaction survey; (3) Percentage of
4 Calls Answered within 30 Seconds; and (4)
5 Percentage of Adjusted Customer Bills. The CSQP
6 includes potential negative revenue adjustments
7 (NRAs), which are incurred should the company
8 fail to meet minimum performance targets in each
9 measure. A total of \$11.7 million and \$9.9
10 million, in potential gas revenue adjustments
11 are currently at risk annually for KEDNY and
12 KEDLI, respectively, divided among the four
13 performance measures. The Staff Consumer
14 Services Panel recommends maintaining the NRAs
15 at their current levels.

16 Q. Please describe the Staff Consumer Services
17 Panel's recommended incentive for terminations
18 and uncollectibles.

19 A. The Companies proposed to continue the positive-
20 only revenue adjustment to reduce residential
21 service terminations and uncollectibles, with
22 adjusted targets. The Staff Consumer Services
23 Panel recommends adjusting targets and adding a
24 third metric for residential arrears, whereby

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 the Companies could earn a Positive Rate
2 Adjustment (PRA) if it reduces residential
3 terminations, uncollectible expenses, and
4 arrears to specified targets.

5

6 **Pipeline Safety**

7 Q. Describe the Staff Pipeline Safety Panel's
8 testimony in these proceedings.

9 A. The Staff Pipeline Safety Panel's testimony
10 addresses the Companies' proposals for
11 performance metrics in the areas of leak prone
12 pipe removal, leak management, damage
13 prevention, emergency response, and compliance
14 with the pipeline safety regulations. The Staff
15 Pipeline Safety Panel also addresses first
16 responder training, inactive accounts,
17 residential methane detectors, the service line
18 proceeding, New York City Local Law 152, outside
19 meters, plastic fusion, the methane leak pilot
20 program, enhanced contractor safety inspections,
21 buried vent lines, historic revenue adjustments
22 and associated program enhancements, and annual
23 reporting requirements.

24 Q. Do KEDNY and KEDLI propose to continue the

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 incentives to remove LPP mileage in addition to
2 the minimum amount they are required to remove?

3 A. Yes. The Companies propose to earn two basis
4 points for each full mile of LPP it removes,
5 beginning with the second full mile of LPP
6 removed above the specified threshold levels.
7 As we will discuss, this incentive should be
8 eliminated.

9 Q. Please describe the Companies' proposal for
10 positive incentives to repair additional Type 3
11 leaks.

12 A. The Companies proposed to receive one basis
13 point for eliminating 50 additional of the
14 highest volume emitting Type 3 leaks. This
15 positive revenue adjustment would be capped at
16 five basis points and a corresponding annual
17 reduction of 250 leaks in the Companies'
18 respective total leak backlogs. The Staff
19 Pipeline Safety Panel recommends that for every
20 100 additional leaks repaired beyond the total
21 leak management targets, the Companies could
22 earn two basis points, capped at six basis
23 points, or 300 additional leak repairs.

24 Q. Please describe the Staff Pipeline Safety

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

- 1 Panel's recommendation for a positive revenue
2 adjustment related to damage prevention?
- 3 A. The Staff Pipeline Safety Panel recommends
4 restructuring the damage prevention metric to
5 focus on the total damage prevention targets
6 with associated positive revenue adjustments.
7 KEDNY and KEDLI reported that 31 and 34 percent,
8 respectively, of their damages in 2018 were a
9 direct result of either mismarks, Company error,
10 or Company contractor error. This means that
11 the majority of damages were a direct result of
12 either excavator error, or for excavators
13 failing to provide notice of their intent to
14 excavate to the one-call notification system.
15 With the goal of the damage prevention measures
16 being the reduction of total damages, the Staff
17 Pipeline Safety Panel believes that the
18 Companies should focus their efforts on, and be
19 encouraged to, improve in the areas which will
20 drive down total damages.
- 21 Q. Please describe the Staff Pipeline Safety
22 Panel's recommendation for a positive revenue
23 adjustment related to emergency response?
- 24 A. The Staff Pipeline Safety Panel concurs with the

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 Companies' proposals for positive revenue
2 adjustments in the area of emergency response.
3 Specifically, the Companies could each earn up
4 to six basis points should they respond to a
5 higher percentage of gas leak, odor, and
6 emergency reports within 30 minutes.

7 Q. Are there currently metrics with associated
8 negative revenue adjustments for KEDNY and
9 KEDLI's performance in the areas of LPP removal,
10 leak management, damage prevention, and
11 emergency response?

12 A. Yes.

13 Q. Does the Staff Pipeline Safety Panel recommend
14 continuing these metrics?

15 A. Yes. The Staff Pipeline Safety Panel recommends
16 continuing these metrics with updated targets
17 and associated adjustments, as described in its
18 testimony.

19 Q. Are there currently metrics with associated
20 negative revenue adjustments regarding the
21 Companies' compliance with the Commission's
22 pipeline safety regulations?

23 A. Yes.

24 Q. Does the Staff Pipeline Safety Panel recommend

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 continuing these metrics?

2 A. Yes. However, the Staff Pipeline Safety Panel
3 recommends continuing these metrics with updated
4 targets and associated adjustments, as described
5 in its testimony.

6 Q. Does this Panel recommend any changes to
7 incentives available to the Companies?

8 A. Yes. Staff seeks to ensure that the incentives
9 that are provided to natural gas utilities to
10 maintain safe and reliable service are
11 appropriate and produce desired outcomes. Since
12 the Companies filed their rate cases, Governor
13 Cuomo signed into law the Climate Leadership and
14 Community Protection Act (CLCPA). While the
15 CLCPA does not contain any provisions directly
16 relating to the provision of natural gas service
17 in the Companies service territories, it enacts
18 goals for carbon emissions reductions which will
19 be difficult to accomplish without taking some
20 steps to address the carbon emissions from space
21 and water heating. Additionally, the Companies
22 are currently facing supply constraints.

23 Q. Does the Panel expect that the Public Service
24 Commission will address these issues in the

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 future?

2 A. Yes, although it is difficult to assess the
3 timing of any Commission actions.

4 Q. Given that New York State has ambitious climate
5 leadership goals and immediate supply
6 constraints, what issues should be addressed for
7 KEDNY and KEDLI in these proceedings?

8 A. The Companies incur significant costs addressing
9 the safety and reliability of their systems.
10 The Companies also face the problem of aging
11 infrastructure which manifests itself in the
12 highest leak backlog in New York State at KEDLI.
13 The methane which is emitted from these leaks is
14 a greenhouse gas, in addition to being a safety
15 threat to the residents of these service
16 territories. The Companies' safety programs
17 include items like leak prone pipe replacement
18 and regulator station replacements in their
19 capital budget, as well as leak repairs and
20 other O&M activities which are expensed. In
21 total, these programs are significant in the
22 Rate Year.

23 Q. What does the Panel recommend to address these
24 issues?

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 A. We propose the following changes to recognize
2 current issues: (1) Eliminate the proposed
3 positive revenue adjustment for leak prone pipe
4 replacement over and above the annual target as
5 shown in Exhibit___(GIOP-3); (2) Eliminate the
6 proposed positive revenue adjustment for leak
7 prone pipe unit costs as shown in
8 Exhibit___(GIOP-3); (3) Eliminate the proposed
9 positive revenue adjustment for customer
10 connections as shown in Exhibit___(GIOP-3); and
11 (4) implement a positive revenue adjustment for
12 the Companies if they can deliver their
13 investment plans - a minimum amount of leak
14 prone pipe replacement and a reduction in their
15 respective year end leak backlogs - for less
16 than the budgeted program amounts.

17 Q. How should the new positive incentive be
18 developed?

19 A. The Commission should require the Companies to
20 file: (1) their algorithm used to risk rank leak
21 prone pipe segments for Staff review within 30
22 days of the date the Commission issues a rate
23 order in these proceedings; (2) at the beginning
24 of every year, the complete list of all leak

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 prone pipe segments in order of highest to
2 lowest risk per the risk ranking; (3) at the end
3 of every year, the list of all pipeline segments
4 that were replaced in the year that just ended,
5 indicating what position each segment had on the
6 risk ranking at the beginning of the year. The
7 Companies should develop a Safety and
8 Reliability Program, which would contain all
9 capital and expense budget items that contribute
10 to the safety and reliability of the system. If
11 the Companies can deliver their investment plans
12 for less than the budgeted program amounts, they
13 should be awarded an incentive.

14 Q. How could the positive incentive be developed?

15 A. Assuming that the Companies meet the metrics of
16 minimum mileage of leak prone pipe replacement
17 and year end leak backlog, and the Companies
18 were able to do so for less than the budgeted
19 program amount, an incentive could be developed
20 by determining the revenue requirement savings
21 of the program. The Commission could allow the
22 Companies to retain a percentage of the revenue
23 requirement savings.

24 Q. Would the Capital Investment Reconciliation

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 Mechanism have to be adjusted?

2 A. Yes. There would be an interplay between the
3 two mechanisms.

4 Q. Why is this new positive incentive reasonable?

5 A. This incentive is designed to encourage the
6 Companies to make decisions to ensure safety and
7 reliability and to decrease carbon emissions,
8 while increasing customer choice and decreasing
9 costs.

10 Q. What other desired outcomes should the
11 Commission encourage?

12 A. As described in the Staff Earned Adjustments
13 Mechanisms Panel's testimony, the Companies are
14 encouraged to begin responding to system needs
15 with non-traditional solutions as quickly as
16 possible, and any LPP removed from service in
17 this manner would be included in meeting the LPP
18 mileage metric.

19

20 **NEWTOWN CREEK PROJECT**

21 Q. What is the Newtown Creek Project?

22 A. On page 77 of the direct testimony of the Future
23 of Heat Panel it explains that KEDNY has
24 developed a project with the City of New York to

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 capture biogas generated from the City's Newtown
2 Creek Wastewater Treatment Plant. The biogas
3 consists of approximately 60 percent methane and
4 40 percent CO₂. KEDNY will filter it through a
5 purification facility and upgrade it to pipeline
6 quality natural gas, which will then be odorized
7 and injected into the gas system for direct use
8 by customers.

9 Q. Was the Newtown Creek Project in the last rate
10 case regarding KEDNY, Case 16-G-0059?

11 A. Yes. The SGIOP in that case explained that
12 KEDNY would own specific assets: gas
13 purification systems that consist of vessels, a
14 compressor, vacuum skids, a transformer and
15 other electrical equipment, gas analyzer and a
16 chromatograph, odorization system, tail gas
17 tank, cooler, thermal oxidizer, metering and
18 regulation system, air system, air sensors, fire
19 suppression equipment, and electronic
20 communication equipment. The Newtown Creek
21 Project also was projected to have ongoing
22 incremental O&M expenses.

23 Q. In Case 16-G-0059, what rate treatment did KEDNY
24 propose for the assets and incremental O&M

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

- 1 expenses associated with the Newtown Project.
- 2 A. KEDNY proposed that the assets be placed in to
3 plant in service and the incremental O&M
4 expenses be reflected in the cost of service.
- 5 Q. In Cases 16-G-0058 and 16-G-0059, how did the
6 Companies propose customers be charged for the
7 gas injected into KEDNY's distribution system?
- 8 A. KEDNY and KEDLI proposed that their sales
9 customers pay for the gas through the Gas
10 Adjustment Clause (GAC) at the monthly weighted
11 average cost of gas (WACOG). KEDNY's sales and
12 transportation customers would receive a credit
13 equal to the gas charges paid by KEDNY's and
14 KEDLI's sales customers. KEDNY's customers
15 would also receive credit for any environmental
16 attributes or third-party sales.
- 17 Q. Please explain the credits associated with
18 environmental attributes or third-party sales.
- 19 A. In Case 16-G-0059, KEDNY's Gas Infrastructure
20 and Operations Panel explained that the
21 renewable gas from the project may qualify for
22 various federal and state emissions credits
23 depending on how the gas is utilized by the end
24 user, under New York's Renewable Portfolio

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 Standard program or the Environmental Protection
2 Agency's Renewable Fuel Standard Program. KEDNY
3 claimed that it would work to identify and
4 leverage available emissions credits to offset
5 the cost of the Newtown Creek Project.

6 Q. In the last rate case, did Staff raise concerns
7 with the Newtown Creek Project?

8 A. Yes. The Staff Infrastructure and Operations
9 Panel's testimony stated that, from an
10 environmental perspective, it did not have any
11 concerns, however from a ratemaking perspective,
12 it did not believe that the in-service date of
13 the project would occur in the Rate Year. The
14 Staff Infrastructure and Operations Panel's
15 testimony also recommended that the Commission
16 consider the following ratemaking options: (1)
17 limit the level of investments reflected in the
18 cost of service to be more in line with the
19 projected revenues; (2) require the use of any
20 excess revenues to write down the assets in lieu
21 of the proposed sharing mechanism; and, (3)
22 encourage the City of New York to provide full
23 property tax abatement for 20 years, which would
24 improve the economics of the project.

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 Q. Did the Commission adopt a Joint Proposal in
2 Case 16-G-0059?

3 A. Yes. The Commission adopted a joint proposal
4 and set rates for KEDNY and KEDLI in the Rate
5 Order it issued on December 16, 2016 in Cases
6 16-G-0058 and 16-G-0059.

7 Q. How was the Newtown Creek Project addressed in
8 the Joint Proposal that the Commission adopted?

9 A. Beginning on page 22 of the Joint Proposal,
10 provision 5.6, the language states: "KEDNY will
11 continue to develop the Newtown Creek biogas
12 purification project. Because the ultimate in
13 service date and final capital costs are not
14 known at this time, the costs are not included
15 in the revenue requirement. Once the project is
16 in service, KEDNY is permitted to defer the
17 return of and return on the Newtown Creek
18 project and have those costs reviewed for
19 potential recovery in its next base rate filing.
20 The revenue requirement for the Newtown Creek
21 project will be subject to a \$1.6 million annual
22 exclusion (prorated from the in service date)
23 for 20 years. The \$1.6 million amount and the
24 20 year time period will be subject to review

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 for possible modification in KEDNY's next rate
2 case. The revenue requirement associated with
3 the project will reflect a 40 year depreciable
4 life. [The City of New York] agrees to support
5 KEDNY's reasonable efforts to mitigate the
6 effects of the revenue requirement exclusion,
7 including, but not limited to, supporting
8 KEDNY's application(s) for property tax
9 abatements, to the extent such efforts are
10 permitted by applicable law. Further, any
11 revenues from KEDNY's share of the sale of gas
12 at a premium (i.e., in excess of the weighted
13 average cost of gas) or environmental credits
14 generated from the project will be used to
15 offset the revenue requirement exclusion."

16 Q. Did KEDNY explain the current status of the
17 Newtown Creek Project in its filing in the
18 instant cases?

19 A. Yes. The Future of Heat Panel testimony states
20 that by June 2018, KEDNY secured all necessary
21 permits and subsequently began project
22 construction in July of 2018. The Future of
23 Heat Panel states that efforts are currently on
24 schedule, and KEDNY expects to bring the project

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 online in November 2019. In addition to the
2 construction activities, KEDNY issued a request
3 for proposals in 2018, seeking a firm to
4 monetize the environmental attributes KEDNY
5 expects to generate from the injection of RNG
6 into the local distribution system. KEDNY
7 selected Element Markets to complete this task.
8 KEDNY and Element Markets are currently
9 collaborating to register the project under the
10 federal Renewable Fuel Standard Program as a
11 generator of Renewable Identification Numbers
12 (RINs).

13 Q. What ratemaking treatment did KEDNY propose for
14 the Newtown Creek Project in the instant cases?

15 A. As explained on the Future of Heat Panel's
16 testimony, beginning on page 79, KEDNY proposed
17 including a total capital cost of approximately
18 \$32 million in plant in service; recovery of
19 associated property tax expense, net of
20 abatement; recovery of depreciation expense
21 reflective of a 20-year depreciation life; and
22 recovery of O&M costs of \$0.668 million. KEDNY
23 also included a revenue estimate of \$1.9 million
24 per year, comprised of \$1.0 million from the gas

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 sales and \$0.9 million from the sale of
2 environmental attributes. KEDNY proposed to
3 true-up the actual revenues for recovery from or
4 return to customers. Further, KEDNY proposed
5 that any revenues realized above the level
6 necessary to fully reimburse customers for the
7 project costs would be shared evenly between
8 customers and NYC beginning in the fifth year
9 after the project becomes operational. KEDNY
10 proposed that revenue sharing would then be
11 assessed every year thereafter for the remainder
12 of the project's life.

13 Q. Why did KEDNY propose to true up the actual
14 revenues to the level imputed in this case?

15 A. Beginning on page 81 of the Future of Heat
16 Panel's testimony, KEDNY explained that the
17 value of the environmental attributes will vary
18 due to market changes, and KEDNY expects
19 significant variability over time. Moreover,
20 KEDNY explained that the actual revenue is
21 highly dependent on the volume of biogas
22 produced and the proportion of the volume
23 assigned to the environmental attributes.

24 Q. Does KEDNY have a contract with the City of New

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 York associated with the Newtown Creek Project?

2 A. Yes, the contract was provided in response to IR
3 DPS-736.

4 Q. Does the contract explain how KEDNY's customers
5 will receive the benefit of emission credits?

6 A. Yes. According to the contract, every year
7 KEDNY will compare the implied cost (revenue
8 requirement) to the market value (annual project
9 output multiplied by an annual WACOG), including
10 environmental credits, to offset the project's
11 revenue requirement. If, at the end of year
12 five, there are cumulative excess benefits, the
13 City of New York would receive 50 percent of the
14 excess benefits and the other 50 percent of the
15 excess benefits is to be credited to KEDNY's
16 firm customers. Section 6.5(c) of the contract
17 also states that the City of New York shall
18 maintain all right, title and interest to any
19 and all Air Emission Credits for reduced
20 emissions of constituents regulated by Title V
21 Air Permit and/or any related state air permit
22 earned by the City of New York in connection
23 with this Project.

24 Q. When was the Newtown Creek Project first

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 sanctioned?

2 A. The response to IR DPS-734 states that the
3 project was first sanctioned in August 2009.

4 Q. What was the estimated cost of the project and
5 in-service date in August 2009?

6 A. KEDNY projected the cost at \$8.3 million, with
7 an in-service date of March 2011.

8 Q. How many times has the Newtown Project been re-
9 sanctioned and what were the estimated costs and
10 associated in-service dates?

11 A. The project has been re-sanctioned a total of
12 six times, as shown in the response to IR DPS-
13 734. The re-sanction dates, estimated costs and
14 in-service dates are as follows: April 2012,
15 with an estimated cost of \$14.4 million and in-
16 service date of March 2014; August 2014, with an
17 estimated cost of \$19.9 million and an in-
18 service date of September 2016; October 2015,
19 with an estimated cost of \$32.8 million and an
20 in-service date of February 2017; February 2016,
21 with an estimated cost of \$34.1 million and an
22 in-service date of July 2017; and November 2017,
23 with an estimated cost of \$37.9 million and an
24 in-service date of December 2018.

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 Q. Did KEDNY report on a potential tax credit for
2 the project?

3 A. Yes. On page 18 of Attachment 8 to the response
4 to IR DPS-734, KEDNY reported that due to the
5 extensive delays to start construction a \$4
6 million tax credit was jeopardized. In the
7 response to IR DPS-971, KEDNY stated \$3.1
8 million in real property tax savings will be
9 awarded because the completion date deadline was
10 extended to February 29, 2020. Thus, the delays
11 appear to have caused KEDNY to lose \$0.9 million
12 in real property tax savings.

13 Q. What is the current status of the Newtown Creek
14 Project?

15 A. As explained in the response to IR DPS-737, the
16 Project is 65 percent complete and KEDNY now
17 anticipates an in-service date of December 31,
18 2019.

19 Q. What is the most recent cost benefit analysis
20 for the Newtown Creek Project?

21 A. In response to IR DPS-734, KEDNY stated that the
22 benefits of the project include: expanding the
23 concept of renewable technology; reducing an
24 estimated 90,000 metric tons of CO₂ emissions;

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 providing a solution to food waste management;
2 and, improving diversity of supply. KEDNY also
3 provided an economic analysis presentation dated
4 January 22, 2016 that compares the cost of the
5 Project to the potential revenues. On slide 10,
6 KEDNY estimated a base case, a worst case, and a
7 base case with full property tax abatement.

8 Q. Please explain the base case.

9 A. KEDNY's base case assumes an annual production
10 of 277,500 dth, \$33 million capital costs and
11 five years of property tax abatement on \$14.4
12 million of the capital investment. Under the
13 base case the levelized revenue requirement is
14 \$5.7 million per year, which equates to \$20 per
15 dth of gas injected into the distribution
16 system.

17 Q. Why is the property tax abatement calculated on
18 only \$14.4 million of the capital investment?

19 A. Our understanding is that the property tax
20 abatement agreement was based off of the 2012
21 cost estimate, which has not been updated.

22 Q. For reference, what is KEDNY's current WACOG?

23 A. Per KEDNY's GAC Statement 252, effective August
24 1, 2019, KEDNY's current WACOG is 40.453 cents

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 per therm, or \$4.0453 per dth.

2 Q. Please explain the worst case.

3 A. KEDNY's worst case assumes annual production of
4 208,000 dth, a 20% reduction in renewable
5 credits, \$36 million capital costs and again
6 assumes five years of property tax abatement on
7 \$14.4 million of the capital investment. Under
8 the worst-case scenario the levelized revenue
9 requirement is \$8.2 million per year, which
10 equates to \$29 per dth of the gas injected into
11 the distribution system.

12 Q. What is the last scenario KEDNY provided?

13 A. KEDNY's last scenario is the base case, but
14 assuming full property tax abatement. This
15 means receiving property tax abatement for 20
16 years. Under this scenario, the levelized
17 revenue requirement is \$4.2M per year, which
18 equates to \$15 per dth of gas injected into the
19 distribution system.

20 Q. Does the Panel have any concerns with the
21 Newtown Creek Project?

22 A. Yes. We are concerned with the overall cost of
23 this project and the resulting ongoing annual
24 revenue requirement impact to customers.

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

- 1 Q. What is the estimated capital cost of the
2 project?
- 3 A. According to the response to IR DPS-972, the
4 estimated capital cost of the project is \$37.898
5 million plus or minus ten percent.
- 6 Q. Did the Panel ask KEDNY how it attempted to
7 control the costs of the project?
- 8 A. Yes. According to the response to IR DPS-735,
9 KEDNY pursued several measures to reduce the
10 total cost of the project, including using in-
11 house engineering, collaborating with the City
12 to pay lower rates for electricity and securing
13 a five-year property tax abatement.
- 14 Q. Does KEDNY currently own or operate any gas
15 production facilities?
- 16 A. According to the response to IR DPS-736, no.
- 17 Q. Will the equipment owned by KEDNY be located on
18 KEDNY's property?
- 19 A. According to the response to IR DPS-736, no.
20 The equipment will be located on property owned
21 by the City of New York.
- 22 Q. Why does KEDNY believe it is reasonable for the
23 City of New York to charge property taxes for
24 the assets used for this project?

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 A. According to the response to IR DPS-736, KEDNY
2 claims that these assets are subject to be taxed
3 by the City of New York in the same manner as
4 any other utility-owned assets. KEDNY further
5 stated that it has secured a tax exemption for
6 the Project from City of New York property taxes
7 for the first five years of the Project
8 operation, based on a discount rate of 6.25
9 percent per annum and a total project cost of
10 \$14.4 million, which is based on the 2012 cost
11 estimate.

12 Q. Did the Panel ask KEDNY to identify the annual
13 revenue requirement impact of the Newtown Creek
14 Project?

15 A Yes. In response to IR DPS-738, KEDNY provided
16 Attachment 1 that shows the net Rate Year
17 revenue requirement impact of \$2.9 million using
18 the following assumptions: a total capital cost
19 of \$32.2 million; depreciation over a 20 year
20 service life; an 8.53 percent pre-tax weighted
21 cost of capital; \$0.668 million for O&M expense;
22 no property taxes; and \$1.9 million in revenues
23 from gas sales and environmental attributes.

24 Q. Are the total capital costs accurate?

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

- 1 A. No. As previously mentioned, the estimated
2 capital cost of the project is \$37.898 million
3 plus or minus ten percent.
- 4 Q. Why does KEDNY believe a 20-year depreciable
5 life is reasonable?
- 6 A. According to the response to IR DPS-736, KEDNY
7 believes a 20-year depreciable life is
8 reasonable because it matches the term of the
9 lease agreement with the City of New York.
- 10 Q. Does the 8.53 percent pre-tax weighted cost of
11 capital reflect KEDNY's proposed return on
12 equity and capital structure?
- 13 A. Yes.
- 14 Q. Why are there no property taxes included in the
15 Rate Year?
- 16 A. There is a lag between when assets are placed in
17 service and when property tax assessments begin.
18 KEDNY estimates that property taxes will be
19 assessed beginning in FY 22.
- 20 Q. How did KEDNY develop the \$1.9 million in
21 revenues from gas sales and environmental
22 attributes?
- 23 A. KEDNY provided its workpapers in the response to
24 IR DPS-739. These show that KEDNY estimated

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 annual gas revenues of \$0.939 million and annual
2 RIN revenues of \$0.973 million.

3 Q. Does the Panel agree with the Companies'
4 proposed ratemaking treatment of the Project?

5 A. No.

6 Q. Why not?

7 A. There is a significant amount of uncertainty
8 with this project and under KEDNY's proposal and
9 all of the risk is borne by KEDNY's customers.
10 Indeed, it seems the only certainty is that
11 annual revenues from the Newtown Creek Project
12 will not meet or exceed the annual revenue
13 requirement of the project.

14 Q. How should the Commission protect customers
15 regarding the Newtown Creek Project?

16 A. We recommend the Commission impute a level of
17 revenue in KEDNY's revenue requirement to equal
18 the actual annual costs of the project. KEDNY
19 should test annually to determine if the actual
20 revenues exceed the actual revenue requirement
21 of the project. If the actual revenues do not
22 exceed the actual revenue requirement of the
23 project, no reconciliation should be permitted.
24 If the actual revenues exceed the actual revenue

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 requirement, shareholders can retain any
2 revenues from previous cumulative shortfalls.

3 Q. Why should shareholders bear the risk of
4 generating sufficient revenues to cover the cost
5 of the Newtown Creek Project?

6 A. KEDNY has known throughout its sanctioning
7 process that the projected levelized cost of any
8 natural gas produced from the project was much
9 higher than the market value of the natural gas
10 and environmental attributes, yet KEDNY chose to
11 continue the project.

12 Q. Does the Panel recommend a level of Newtown
13 Creek Project revenues to impute in the Rate
14 Year?

15 A. Yes. We recommend imputing \$3.3 million in
16 revenues from the Newtown Creek Project.

17 Q. How did you develop this imputation?

18 A. As shown on Exhibit____(SPP-3), we used KEDNY's
19 response to IR DPS-738, Attachment 1 and made
20 the following modifications: (1) updated the
21 rate of return to 7.59% to reflect the Staff
22 Finance Panel's cost of capital recommendations;
23 and (2) updated the capital costs of the Newtown
24 Creek Project to \$37.9 million based on the

Cases 19-G-0309 & 19-G-0310 STAFF POLICY PANEL

1 response to IR DPS-973.

2 Q. Did you provide this adjustment to the Staff
3 Revenue Requirements Panel?

4 A. Yes.

5 Q. Does this conclude your testimony at this time?

6 A. Yes, at this time.

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

1 Q. Members of the Staff Policy Panel (Panel),
2 please state your names.

3 A. Aric Rider, Chelsea Kruger, Ronald Calkins,
4 Kwaku Duah, and Kathryn Mammen.

5 Q. Has the Panel previously submitted testimony in
6 these proceedings?

7 A. Yes, we submitted pre-filed direct testimony on
8 August 30, 2019.

9 Q. In this testimony, will you refer to or rely on
10 any responses to information requests (IRs)?

11 A. Yes. We have included the responses to IRs that
12 we have relied on in Exhibit___(SPP-4). We will
13 refer to those responses in our testimony by the
14 designation given to them when asked, for
15 example, DPS-123.

16

17 **Second Supplemental Filing**

18 Q. What was the purpose of the Companies' second
19 supplemental testimonies?

20 A. The purpose of KEDNY and KEDLI's second
21 supplemental testimony was to update the
22 Companies' capital and O&M expense forecasts to
23 incorporate changes necessary to implement the
24 recent settlement agreement adopted by the

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

1 Commission in Case 19-G-0678. The settlement
2 concerned gas supply constraints in their
3 service territories and lifting the moratorium
4 on new customers connections that the Companies
5 imposed.

6 Q. Did the Companies also propose revisions to
7 certain contractor cost projections?

8 A. Yes.

9 Q. Please explain why the Companies propose to
10 revise their contractor costs.

11 A. As described on page 15 of the Second
12 Supplemental Testimony of the Gas Instructure
13 and Operations Panel (GIOP), the Companies have
14 completed contract renegotiations with certain
15 contractors that will provide necessary services
16 in the Rate Year and Data Years. According to
17 the Companies, these negotiations have resulted
18 in a known and measurable decrease to the unit
19 costs of KEDLI's Proactive Main Replacement
20 (LPP) capital expenditure program, and an
21 increase to the damage prevention mark-out
22 operation and maintenance (O&M) costs for both
23 Companies. The Companies propose to use these
24 new costs to revise their capital and O&M

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

1 expense forecasts.

2 Q. Please describe the revision to the forecast for
3 KEDLI's LPP Program.

4 A. As described on page 15 of the Second
5 Supplemental Testimony of the GIOP, KEDLI
6 renegotiated its agreement with a contractor
7 that provides services for the Proactive Main
8 LPP capital program, and this new agreement
9 resulted in a reduction of the Companies'
10 projection of the program's unit cost from \$306
11 per foot, to \$304 per foot. This revision in
12 the cost per food reduces KEDLI's capital
13 expenditure forecast by \$1.9 million in the Rate
14 Year.

15 Q. Do you have any adjustments relating to KEDLI's
16 change to the forecast for its Proactive Main
17 LPP capital program.

18 A. We are not addressing that request. The Staff
19 Gas Infrastructure and Operations Panel
20 addresses this change in its supplemental
21 testimony.

22 Q. Please explain damage prevention mark-outs and
23 how the O&M costs of these mark-outs are
24 reflected in the Companies' rate filings.

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

- 1 A. As stated on pages 16 and 17 of the Second
2 Supplemental Testimony of GIOP, the Companies'
3 damage prevention mark-out work is required to
4 support KEDLI's projects, and when customers,
5 third parties, and/or municipalities contact New
6 York State's Dig Safe One Call Center. KEDNY
7 uses internal employees to locate facilities on
8 Company-related jobs and a contractor for all
9 third-party Dig Safe mark-out requests. KEDLI
10 sends all Dig Safe mark-out requests, whether
11 internal or external, to a contractor to mark-
12 out facilities. The costs associated with
13 damage prevention mark-outs are included in
14 KEDNY's O&M expense and KEDLI's O&M expense and
15 capital expenditure forecasts. To prepare the
16 rate case forecasts in their initial filing, the
17 Companies increased the O&M expense components
18 from the Historic Test Year by standard annual
19 inflation to arrive at their Rate Year
20 projections.
- 21 Q. Please explain the recent developments that the
22 Companies' claim will affect the contractor cost
23 component of damage prevention mark-out costs.

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

- 1 A. As explained on page 17 of the Second
2 Supplemental Testimony of the GIOP, on August
3 19, 2019, the Companies solicited contractor
4 bids for their damage prevention mark-out work.
5 Bids were received from contractors on September
6 16, 2019. Thereafter, bidders were evaluated
7 both commercially and, on their ability, to
8 execute technical requirements. Extensive
9 negotiations were also conducted with bidders
10 between September 16, 2019 and November 8, 2019.
- 11 Q. Have the Companies selected contractors based on
12 the bids received?
- 13 A. Yes. As described on page 17 of the Second
14 Supplemental Testimony of the GIOP, the
15 Companies' are in the process of executing
16 agreements with two contractors to provide
17 damage prevention mark-out services from
18 February 2020 to December 2022. As of the date
19 of the GIOP's testimony, the agreements were
20 expected to be executed on or about January 1,
21 2020.
- 22 Q. What effect will the new agreements have on the
23 Companies' contractor costs?

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

1 A. The Companies allege the contracts will raise
2 the labor rates for these contractors in excess
3 of the standard annual inflation rate used to
4 derive the Companies' Rate Year forecasts.

5 Q. What are the drivers of the higher contractor
6 bids?

7 A. As explained on page 18 of the Second
8 Supplemental Testimony of the GIOP, the
9 Companies indicate the increase is attributable
10 to three factors: (1) the prior contractor labor
11 rates were based on long-term, dated agreements;
12 (2) recent unionization of the contractor labor
13 force; and (3) an increased scope of work to
14 incorporate locator assurance technology. The
15 Companies indicate they have not bid this work
16 in over a decade. Furthermore, the Companies
17 explain that while the prior agreements provided
18 for minimal price increases, the rates paid to
19 those contractors were generally lower than
20 market prices at the time. Furthermore, the
21 Companies claim that contractors were no longer
22 willing to accept below-market rates during the
23 recent negotiations. Additionally, the
24 Companies explain that the contractors providing

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

1 services under the selected agreements unionized
2 earlier in 2019, and while the Companies
3 indicate they were generally aware that these
4 labor forces were unionizing, the increase in
5 labor rates experienced was significantly higher
6 than anticipated or reflected in the Companies'
7 initial filing. The Companies also indicate the
8 new agreements require that the contractors use
9 updated technology (locator assurance technology
10 that enables real-time tracking of technician
11 performance against industry standards to
12 improve overall effectiveness of locating field
13 work) when marking out facilities, and with this
14 requirement the scope of work required in prior
15 agreements is expanded and will require
16 additional training and inventory for these
17 contractors.

18 Q. What are the Companies' projected impacts to
19 KEDNY's Rate Year O&M expense forecast due to
20 the changes to the contracts for damage
21 prevention mark-out services?

22 A. This change increased KEDNY's O&M expense
23 forecast, specifically the cost element Other
24 Initiatives expense by \$6.8 million.

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

- 1 Q. What are the Companies' projected impacts to
2 KEDLI's rate year capital and O&M expense
3 forecasts due to the changes to the contracts
4 for damage prevention mark-out services?
- 5 A. This change increased KEDLI's O&M expense
6 forecast, specifically the cost element Other
7 Initiatives expense, by \$1.9 million, increased
8 Depreciation expense by \$0.011 million, and
9 increased Net Utility plant by \$1.3 million.
- 10 Q. Are there any revisions required to the
11 Company's incremental damage prevention mark-out
12 costs include in the Companies' Second
13 Supplemental Filing.
- 14 A. Yes, based on the Companies' response to DPS-
15 1067, there are revisions that need to be made
16 for both KEDNY and KEDLI.
- 17 Q. Explain why the revisions need to be made.
- 18 A. As explained in response to IR DPS-1067, the
19 Companies explain that the incremental cost
20 calculation applies current vender contract
21 rates, and future vender contract rates under
22 the new contract, to Historic Test Year units
23 (or number of tickets). For KEDNY, certain
24 Historic Test Year tickets were worked by in-

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

1 house crews rather than an outside contractor.
2 Inadvertently, the in-house crew ticket counts
3 were not removed from the Historic Test Year in
4 the original calculation of the incremental cost
5 provided in the Companies' second supplemental
6 filing. Therefore, when KEDNY applied the
7 current and new contract rates, the incremental
8 costs were overstated. In addition, a small
9 portion of Historic Test Year tickets had a
10 separate call-out fee rate that was not included
11 in the original calculation, resulting in an
12 understated incremental cost. For KEDLI, the
13 Companies' indicate the original incremental
14 cost calculation did not include the effect of
15 both the separate call-out fee rate as well as a
16 separate time and materials rate, resulting in
17 an understated incremental cost.

18 Q. Do the Companies provide the impact of the
19 identified calculation revisions that should be
20 made to the Rate Year forecasts?

21 A. Yes, in the response to IR DPS-1067, the
22 Companies indicate the calculation revisions
23 result in a reduction to KEDNY's incremental O&M
24 expense of \$1.888 million, and an increase to

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

1 KEDLI's incremental O&M expense of \$0.168
2 million and an increase in incremental capital
3 expenditures of \$0.392 million.

4 Q. Do you agree with the Companies' request to
5 revise their contractor costs relating to damage
6 prevention mark-outs?

7 A. No. The Companies' request to revise their
8 contractor costs relating to damage prevention
9 mark-outs is too late in the process and puts
10 Staff and the intervening parties in this case
11 at a significant disadvantage. Therefore, we
12 recommend that the Commission deny the
13 Companies' request to revise its contractor
14 costs associated with damage prevention mark-
15 outs.

16 Q. Explain why you disagree with the Companies'
17 request to revise its contractor costs
18 associated with damage prevention mark-outs.

19 A. The Companies have known that their contracts
20 associated with their damage prevention program
21 were expiring long before their April 2019
22 filing. Indeed, well in advance of their April
23 2019 filing, they began the process of actively
24 procuring contractors.

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

1 Q. As of what date were the Companies aware of the
2 need to update the contracts for the contractors
3 performing their damage prevention mark-outs.

4 A. As shown in Attachment 1, in response to IR DPS-
5 1068, the Companies have been aware for over two
6 years now, that they planned to update their
7 contracts associated with their damage
8 prevention program. In fact, the initial
9 Stakeholder meeting regarding this revision
10 dates to January 1, 2018. Furthermore, not only
11 were the Companies' aware of the potential
12 revision but were also fully aware that the
13 existing contracts were set to expire in May of
14 2019, which is approximately 22 months prior to
15 the end of the Rate Year, March 31, 2021.
16 However, regardless of the Companies knowledge,
17 it never identified this issue in these
18 proceedings prior to its second supplemental
19 testimony.

20 Q. Did the Companies provide any testimony in their
21 original, first supplemental, corrections, or
22 rebuttal filings regarding a potential revision
23 to contractor costs related to the damage
24 prevention mark-out contracts.

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

1 A. No, the Companies failed to mention, or discuss
2 anything related to a potential revision to
3 their contractor costs related to damage
4 prevention mark-out contracts in any of their
5 prior submissions in these proceedings.

6 Q. If the costs were not known at that time, could
7 they have addressed this issue in any of their
8 four prior filings in these proceedings?

9 A. Yes, the Companies could have addressed these
10 issues in their initial, first supplemental,
11 corrections and updates, or rebuttal filings in
12 these proceedings. Whether or not they included
13 forecasts of the resulting increases in
14 contractor costs, the Companies could have
15 provided much background information, including
16 but not limited to, the requirements that the
17 contractors use new equipment and technology.
18 Had the Companies included discussion of this
19 issue in any of their previous filings in these
20 proceedings, the parties to these cases would
21 have had a greater opportunity to more
22 thoroughly examine the issues and to assess the
23 reasonableness of any resulting increases.

24 Q. Are there any other reasons why the Commission

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

1 should deny the Companies' request to revise the
2 rate year forecast for damage prevention mark-
3 out costs?

4 A. Yes. In the Companies' calculation of
5 incremental damage prevention costs that they
6 expect to result from the new contractor
7 contracts, there is no acknowledgement or
8 reflection of any potential savings that will be
9 realized. In the Companies' response to DPS-
10 1072, they indicate the sole benefits to
11 customers would be enhanced public safety and
12 the safety of the facilities.

13 Q. What type of savings could result from the new
14 contractor agreements?

15 A. In their second supplemental testimony, the
16 Companies indicate that one of the reasons for
17 the increased mark-out costs is attributable to
18 the new contractor agreements requiring
19 contractors to use updated technology when
20 marking out facilities. The Companies state the
21 updated technology will "enable real-time
22 tracking of technician performance against
23 industry standards to improve overall
24 effectiveness of locating field work." Thus,

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

1 one would expect that, with the use of new
2 technology, there would be some benefits
3 realized such as operational efficiencies of the
4 damage prevention program and increased
5 productivity by the workforce. The Companies
6 have not factored savings and benefits such as,
7 but not limited to, these into their incremental
8 cost calculation. Instead, the Companies'
9 incremental cost calculations assume no benefits
10 or savings would result, and this assumption is
11 untested and unrealistic. If the Companies are
12 not going to consider, in a comprehensive
13 manner, the true incremental costs of the new
14 contractor agreements, which would include
15 applying offsetting benefits/savings that would
16 be realized, then the Companies' current
17 calculation of incremental costs should be
18 rejected. It is not equitable or fair to expect
19 customers to fund the expected incremental costs
20 of the new contractor agreements and allow the
21 Companies' to benefit from savings that will
22 result.

23 Q. In their Second Supplemental Filing, did the
24 Companies provide an analysis, or perform a

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

1 review of all its existing contractors to
2 determine where there was a potential for other
3 cost savings opportunities?

4 A. No. The Companies failed to consider the
5 possibility of other contract agreements, where
6 savings opportunities could have been achieved.

7 Q. Didn't KEDLI also revise its LPP program
8 forecast?

9 A. Yes, however, this was a correction of a cost
10 element forecast that was identified early in
11 the rate making process. For both KEDLI and
12 KEDNY, the change in LPP contractor costs had
13 already been estimated and reflected in KEDNY's
14 initial filing and KEDLI's corrections and
15 updates filing. Referring to the Corrections
16 and Updates Testimony of the GIOP, on page 6,
17 KEDLI states "A correction to the forecast is
18 required because the LPP unit costs were
19 understated due to a formula error in the
20 workpaper used to develop the unit costs." The
21 change in KEDLI's contractor cost forecast for
22 LPP replacement work could be considered a
23 correction, although the Staff Gas
24 Infrastructure and Operations Panel is

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

1 addressing the merits of KEDLI's LPP contractor
2 costs.

3 Q. Did you ask the Companies to provide any
4 additional analysis of their review of other
5 contracts during the pendency of these
6 proceedings?

7 A. Yes. In IR DPS-1073, we asked the Companies to
8 provide a list of contractors "for which the
9 Company recently reviewed the current contract
10 agreement to determine if there was a necessity
11 and/or cost savings opportunity to renegotiate
12 the agreement." This is similar to the
13 justification the Companies provided for having
14 renegotiated the damage prevention mark-out
15 contracts. In response to IR DPS-1073, the
16 Companies' explained that the request was for
17 "an analysis that has not been performed" and
18 objected to the request. They did state that,
19 notwithstanding the objection, the GIOP "is not
20 aware of any agreements that have been recently
21 negotiated, or that the Companies are preparing
22 to renegotiate that would have a material impact
23 on the Companies' costs in the Rate Year."

24 Q. What conclusions do you draw from this IR

Cases 19-G-0309 & 19-G-0310 SPP SUPPLEMENTAL

1 response?

2 A. We conclude that the Companies have chosen to
3 try to revise their rate filings for the mark-
4 out costs without assessing whether there are
5 cost savings that may offset the increased costs
6 in other areas of their original filings.

7 Q. What do you recommend?

8 A. We recommend disallowing the incremental O&M
9 expense and capital cost associated with the
10 contractor cost revisions for the damage
11 prevention program. For KEDNY, this adjustment
12 reduces Other Initiatives expense by \$4.950
13 million. For KEDLI this adjustment reduces
14 Other Initiatives expense by \$1.937 \$million,
15 Depreciation expense by \$0.001, and Rate Base by
16 \$1.290 million.

17 Q. Does this conclude your testimony at this time?

18 A. Yes.

19

20

21

22

23

24

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 BY MR. GOODRICH: (Cont'g.)

3 Q. Panel, also before you are
4 exhibits identified at the time of filing as S.P.P.
5 1, S.P.P. 2, S.P.P. 3 and S.P.P. 4. These have now
6 been marked for identification purposes as Exhibits
7 489, 490, 491 and 510 respectively. Were those
8 exhibits prepared by you or under your direct
9 supervision?

10 A. Yes.

11 Q. Do you affirm that the
12 information contained in those exhibits just
13 identified is true to the best of your knowledge?

14 A. Yes.

15 MR. GOODRICH: Your Honors, the Staff
16 Policy Panel is now available for cross-examination.

17 A.L.J. COSTELLO: Okay. Thank you.
18 Mr. Maloney.

19 MR. MALONEY: Thank you, Your Honor.

20 CROSS EXAMINATION

21 BY MR. MALONEY:

22 Q. Panel, it's -- my name is Kenneth
23 Maloney by the way, and I'll be asking you some
24 questions this afternoon hopefully relatively
25 briefly. It's correct, isn't it that the companies

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 filed testimony and exhibits and supported rate
3 changes for the year -- rate year ending March 31,
4 2021. And also included cost projections for an
5 additional 3 data years ending March 31, 2022, '23
6 and '24?

7 A. Yes.

8 Q. But in proceeding with the
9 litigation of the case, the staff is only addressing
10 the rate year ending March 31, 2021. Is that
11 correct?

12 A. Yes.

13 Q. From the panel's perspective
14 recognizing that it's been the prior practice of the
15 commission to litigate cases on a 1-year basis. Is
16 there any reason why the panel believes a 3 -- a 2, 3
17 or 4-year case couldn't be litigated?

18 MR. GOODRICH: Your Honors.

19 A.L.J. LEARY: Yes.

20 MR. GOODRICH: I'm -- I'm not
21 objecting to the panel providing whatever answer they
22 can provide to this. I would just note that there
23 are potentially legal ramifications that I know that
24 counsel's office has discussed from time to time over
25 the years, not recently.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 But I mean just that, that there are
3 potentially legal aspects to this question that the
4 panel wouldn't be able to answer.

5 A.L.J. LEARY: Can we just go off the
6 record for 1 minute?

7 (Off the record 3:51 p.m.)

8 (On the record 3:51 p.m.)

9 A.L.J. COSTELLO: Indicate on the
10 record that you withdrew that question.

11 MR. MALONEY: I -- I will withdraw the
12 last question.

13 BY MR. MALONEY: (Cont'g.)

14 Q. But I would like to refer you to
15 pages 12 and 13 of your proposed testimony where you
16 talk about a proposed earning sharing mechanism in
17 this case.

18 A. That's pre-filed right? That's
19 the original on order.

20 Q. I'm sorry. Yes, your direct
21 testimony.

22 A. Okay, we're there.

23 Q. Okay. Now, it's my understanding
24 that earning sharing mechanisms have normally been

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 adopted in the context of negotiated settlements. Is
3 that the panel's understanding as well?

4 A. It is our understanding that
5 generally earning sharing mechanisms are adopted in a
6 multiyear settlement. However, as we note on page
7 13, the commission has adopted an earning sharing
8 mechanism in case 16-G-0257 and a 1-year case.

9 Q. And that would involve National
10 Fuel, is that correct?

11 A. That's correct.

12 Q. And were there specific facts
13 about the company such as a recent history of
14 extensive over earnings or anything else the panel
15 can identify that caused the panel to propose an
16 earning sharing mechanism in this case?

17 A. Can you rephrase? I'm not sure
18 when you say the company. We were just discussing
19 National Fuel and I'm not sure whether you mean, you
20 know --

21 Q. I am talking --.

22 A. National Fuel or -- or what?

23 Q. Let -- let me try again. Other
24 than the National Fuel case, it's -- is there any
25 other circumstance that you're aware of in which the

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 commission adopted an earning sharing mechanism in a
3 litigated case?

4 A. I think we answered that in the
5 last question. It's generally done in a multiyear
6 settlement, however, on page 13, we -- we noticed
7 that -- or identified that it has been done for
8 National Fuel.

9 Q. But National Fuel is the only
10 litigated case you're aware of where it's been done?

11 A. Yes.

12 Q. So then my next question was with
13 respect to the companies KEDNY and KEDLI, were there
14 particular circumstances that the panel identified
15 that caused them to propose in this case which would
16 recom -- which would represent the second time that
17 an earning sharing mechanism has been imposed in a
18 litigated case that caused the panel to propose it
19 here?

20 A. So our recommendation is because
21 the company, to the extent that it believes earnings
22 are too low, can file a rate case and we believe that
23 customers need protection to the extent that earnings
24 are too high, and the companies stay out.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Is it the policy panel's
3 understanding that to the extent the commission
4 believes that a utility's rates are no longer just
5 reasonable, the commission has the power to issue a
6 show cause order directing a utility to demonstrate
7 why the commission should not reduce the utilities
8 rates?

9 A. The commission does have that
10 power. However, I would note that sometimes there's
11 a lag between information when the company files its
12 earnings, staff has to do an analysis, that could
13 take some time. And having a mechanism upfront would
14 protect customers immediately.

15 Q. Is it also though, the panel's
16 understanding that if the commission believes that
17 the utilities rates are excessive, it has the
18 authority to make a portion of the rates temporary
19 pending the outcome of its show cause order?

20 MR. GOODRICH: So I'm going to object.
21 I mean, this is just talking about essentially what
22 are provisions in the public service law.

23 MR. MALONEY: Where are we going with
24 this, Your Honors, is -- it seems to me, the public
25 service law was enacted sometime around 1907 and we

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 went about a 100 years without earning sharing
3 mechanisms being imposed. And I'm just trying to
4 explore with the commission -- with the panel why
5 that may have -- what's changed. Why are we now
6 requiring this in cases?

7 A.L.J. LEARY: I think you can ask the
8 question that you just stated but hold on a second.
9 This is what I'll say. These are legal -- legally
10 available options for the commission. I understand
11 where you're going, but this is not a legal panel in
12 terms of being able to speak for the commission, for
13 the general counsel, for staff counsel in terms of
14 when they're going to do what with the show cause
15 order or set temporary rates.

16 So I mean I -- I think you can explore
17 this area with the panel, but I -- I'm just
18 cautioning that this is not their -- as far as I
19 know, there's no lawyer on this panel that really
20 would know what the extent of the commission's
21 authority is and so forth. So the best --

22 MR. MALONEY: I'll move on. Thank
23 you.

24 A.L.J. LEARY: Okay.

25 BY MR. MALONEY: (Cont'g.)

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Is it correct that the only way
3 that the companies could avoid the -- the earnings
4 mechanism is to file a new -- new rates that go into
5 effect on or before October 1, 2021? And I -- I'd
6 refer you to page 13 of your direct testimony, lines
7 13 to 15, I believe.

8 A. Can you repeat the question
9 again?

10 Q. Is it correct that the only way
11 the companies could avoid the earnings mechanism is
12 to file new rates that go into effect on or before
13 October 1, 2021?

14 A. Yes.

15 Q. Okay. Now, to avoid asking a
16 legal question, but at the same time, were you
17 present for the cross examination of the Staff
18 Finance Panel this morning?

19 A. Took a few years off my life, but
20 yes.

21 Q. Okay. It's correct, isn't it
22 that the staff is recommending a return on equity of
23 8.2%. Is that correct?

24 A. (Duah) That's correct.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. And the commission has to make a
3 determination in these cases as to the appropriate
4 return on equity, is that correct?

5 A. That's correct.

6 Q. Okay. And in setting the
7 appropriate R.O.E., I believe I asked this morning.
8 The commission should establish an R.O.E. that
9 provides the company with an opportunity to earn a
10 return that is comparable to the returns earned on by
11 entities that have corresponding risk to the
12 companies?

13 MR. GOODRICH: Objection. I'm -- I'm
14 failing to understand the relevance of this to -- to
15 discussion of an earnings sharing mechanism that
16 doesn't go into a -- that wouldn't go into effect but
17 for the company not filing for new rates when it
18 legally has the ability to do so.

19 A.L.J. LEARY: So the -- the panel --
20 the panel does talk in their testimony about the
21 R.O.E. So is that -- help me out here. What -- what
22 -- how would you --

23 MR. MALONEY: Well --

24 A.L.J. LEARY: -- address Mr.
25 Goodrich's objection.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: The -- the -- the point
3 is the panel -- the case is setting it R.O.E. for a
4 rate year, which is the rate year beginning April 1.
5 The panel is now proposing that the R.O.E. extend
6 beyond the rate year. And what I'm going -- where
7 I'm going with this is I'm going to explore with them
8 why they believe it's appropriate to extend the
9 R.O.E. beyond and -- and see whether that's
10 reasonable or not.

11 MR. GOODRICH: It's -- but it's not
12 proposing to extend the R.O.E. Rates are set based
13 on a rate year, but they continue in effect until
14 change.

15 A.L.J. LEARY: You stay out, right?

16 MR. GOODRICH: That's your choice.

17 A.L.J. LEARY: So if you stay out, you
18 -- you make the decision that the R.O.E. is going to
19 continue I -- I think, right? Am I missing
20 something?

21 MR. GOODRICH: Yes.

22 MR. MALONEY: Well -- well the
23 companies -- and what I want to establish is that I
24 want to compare what the results would be under the
25 earning sharing mechanism over a couple of years

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 compared to what would be the returns earned by
3 companies with corresponding or commensurate risks.
4 That's where I'm ultimately going with this.

5 MR. GOODRICH: I guess though, my --
6 my thing is he's talking about the returns outside of
7 the rate year and the -- the staff testified and not
8 even this panel that the finance panel. I think the
9 reference to R.O.E. in this panel is simply
10 summarizing what -- what's in the rest of staff's
11 testimony.

12 But the Staff Finance Panel testified
13 to an R.O.E. for the rate year. No one is testifying
14 to an R.O.E. for that -- that would be appropriate --

15 A.L.J. LEARY: Indefinite --

16 MR. GOODRICH: -- in the future.

17 MR. MALONEY: Nonetheless, the panel
18 is testifying to a mechanism that would require the -
19 - that would permit the commission to confiscate a
20 portion of the company's earnings.

21 A.L.J. LEARY: No, confiscate?

22 MR. MALONEY: Yes.

23 A.L.J. LEARY: Whoa, those are
24 fighting words.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: Well, it's a government
3 -- it's a government imposed mechanism that takes
4 part of the company's earnings. Isn't that what it
5 does?

6 A.L.J. LEARY: It -- and it also
7 incentivizes a number of other matters, but let's not
8 get into that discussion. This last -- you just said
9 something that I -- I have a better understanding of
10 where you're going. But I'm going to just let the
11 panel answer whatever question was then pending and
12 you can renew your objection, Mr. Goodrich, because I
13 understand -- I just want the record to be clear as I
14 think you actually, Mr. Goodrich have clarified it
15 and my understanding of it.

16 But I -- I want to give the company
17 some latitude here because I think there's a piece
18 here that they're entitled to ask about. Don't ask
19 me what that is.

20 BY MR. MALONEY: (Cont'g.)

21 Q. Let me try this.

22 A. (Rider) Okay.

23 Q. It's correct isn't it, that the
24 proposed earnings mechanism is tied to the company's
25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 earned returns on equity for periods beyond the rate
3 year?

4 A. Yes.

5 Q. And in this case, the Staff
6 Finance Panel is only proposing an R.O.E. that would
7 be just and reasonable for the rate year. Is that
8 correct?

9 A. Yes.

10 Q. To the -- to the know -- to the
11 knowledge of the panel the Staff Finance Panel has
12 not attempted to estimate what the appropriate R.O.E.
13 would be for the companies in for example, F.Y. 2022,
14 F.Y. 2023 or F.Y. 2024?

15 A. The goal of this -- this case is
16 to set rates in the rate year.

17 Q. Right.

18 A. The company has the option to
19 file at the end of the rate year to the extent it
20 believes that it needs additional revenues to run its
21 business in a safe and efficient manner.

22 Q. But if the companies were to find
23 themselves in a situation where their cost of equity
24 has increased, but nonetheless they found
25 efficiencies to offset those cost increases and still

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 continue to earn a compensatory R.O.E., wouldn't the
3 mechanism that you're imposing require them to come
4 in and file and incur the costs of doing that in
5 order to reset rates for no reason?

6 MR. GOODRICH: Objection, speculative.
7 There's so many moving parts in there. It's like
8 impossible to -- to --

9 MR. MALONEY: And -- and it goes to
10 the whole fairness of the mechanism which is it
11 establishes a -- okay.

12 A.L.J. LEARY: We don't entertain
13 argument. We just deal with objections. Mr.
14 Goodrich has again asserted an objection which is
15 that the question is speculative.

16 MR. GOODRICH: It calls for
17 speculation in that there are so many moving parts
18 that it's impossible I would -- I would argue it's
19 impossible for the panel to provide an answer that is
20 going to provide any sort of meaningful insight.

21 A.L.J. LEARY: Well, that -- let the
22 panel not provide meaningful insight. But I do
23 recommend a breakdown of a number of the moving
24 parts, even if you just break it into two. So the
25 hypothetical setup --

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: Let me pass out an
3 exhibit and -- and -- let me pass this out. And this
4 is an exhibit that was prepared by me. I'm just
5 wondering as to how the earning sharing mechanism
6 would work.

7 A.L.J. LEARY: Well, I think it's on
8 page 14 of their testimony. So it's 8.2 plus 50
9 basis points is the first band, right? Is that
10 right? Am I reading that correctly?

11 MR. MALONEY: Yes.

12 A.L.J. LEARY: Thank you.

13 BY MR. MALONEY: (Cont'g.)

14 Q. So panel, do you have the exhibit
15 in front of you?

16 A. Yes.

17 Q. And is it correct and --

18 MR. MALONEY: Can I ask that this be
19 marked for identification, I'm sorry.

20 A.L.J. COSTELLO: We'll mark for
21 identification as Exhibit 666.

22 A.L.J. LEARY: And just --

23 MR. MALONEY: Somehow that's
24 appropriate I suppose.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: You're going to ask the
3 panel to identify this.

4 MR. MALONEY: I'm going to ask them
5 whether the information in it is correct. I'm trying
6 simply to simplify, for purposes of cross-examination
7 whether this -- the data presented on this piece of
8 paper is correct as to how they understand their
9 proposed mechanism works.

10 A.L.J. LEARY: Okay.

11 BY MR. MALONEY: (Cont'g.)

12 Q. So panel, is it correct that from
13 8.2 to 8.7 the company share of -- of earnings would
14 be 100%?

15 A. I'll point you to page 13 of our
16 testimony where it says, we recommend that the
17 companies be allowed to retain a 100% of earnings up
18 to and including 50 basis points above their allowed
19 R.O.E.

20 Q. And so this is correct?

21 A. That's right.

22 Q. Okay. And -- and from 8.7 to
23 9.2, the company would keep 8.7% up to 25 basis
24 points or a cap of 8.95%, is that correct? From 8.7%
25 to 9.2% the company would keep 50% and that would

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 mean that they would keep 8.7% up to 25 basis points
3 or a cap of 8.95%?

4 A. Yes.

5 Q. Okay. Now, from -- from 9.2% to
6 9.7%, it would be 25%, so that effectively the
7 companies would be able to keep out of 9.7%, 8.95% up
8 to 12 and a half basis points or a cap of 9.075%, is
9 that correct?

10 A. Yes.

11 Q. Okay. And finally from 9.7% to
12 infinity, the companies would keep 10% above 9.7% and
13 would earn above 9.075%, is that correct?

14 A. I don't know about infinity, but
15 --

16 Q. As high as it could go.

17 A. I would say greater than --

18 Q. Yes.

19 A. -- 9.7, yes.

20 Q. So just to do the math, to earn a
21 10.5% R.O.E. for shareholders, the companies would
22 earn -- need to earn a total R.O.E. of approximately
23 24%. Is that correct?

24 A. What's the calculation behind
25 that? I don't -- I -- I'd have to see the math.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. And I would go down there below
3 shareholders --

4 A.L.J. LEARY: One at the time.

5 MR. GOODRICH: And I would also object
6 as to the relevance of a 10.5% R.O.E.

7 MR. MALONEY: Well, we're going to
8 talk about that in a second.

9 A.L.J. LEARY: Here -- here is the
10 problem I'm having. This is not a document that was
11 prepared by this panel or your panel -- well, one of
12 your panels. This is a document you prepared,
13 correct Mr. Maloney?

14 MR. MALONEY: And I'm just asking as
15 to whether the information in it is correct. I don't
16 need to move this into evidence. I'm just trying to
17 simplify the cross examination.

18 A.L.J. LEARY: Okay. The -- I think
19 Mr. Rider has indicated he would have to see sort of
20 the background on the math for where -- what your
21 next question asked.

22 BY MR. MALONEY: (Cont'g.)

23 Q. Well, if -- if you -- as -- as we
24 said, shareholders would keep 9.075 of a 9.7% R.O.E.
25 and they would keep 10% above, which is 1.4% of an

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 additional 14% R.O.E., would you agree with that
3 math?

4 A. If you provide me the
5 calculation, I will verify the numbers.

6 Q. Well, I just -- we agreed that
7 from 9.7% to infinity, right, the number was 9. -- at
8 -- at 9.7% the company would keep 9.075%, is that
9 correct?

10 A. Again, if you provide me the
11 math, I can verify the numbers. I'd -- I'm not
12 following how you're -- you're getting the -- the
13 percentages that you have on this -- this Exhibit
14 666.

15 Q. Okay. Would the panel agree that
16 in order to earn, for example, an equity return of
17 10.5% the companies would have to for the
18 shareholders, under your earnings sharing mechanism,
19 the company would have to earn an R.O.E. far in
20 excess of 10.5%?

21 A. Yes, and that's why we would have
22 an earning sharing mechanism to protect customers in
23 case that situation occurred.

24 Q. Now this morning, we talked about
25 the fact that the Staff Finance Panel testified and

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 is it correct that in the Staff Finance Panel
3 testimony the staff created a return on equity as
4 part of its sustainable growth calculation for the
5 year 2022 to 2000 -- I'm sorry, bear with me.

6 From 2023 that according to -- for its
7 proxy group on average was 11.14% to on an average at
8 a median of 10.64% and I'm referring you to Exhibit
9 440.

10 MR. GOODRICH: Could counsel please
11 clarify the period? I was -- I was confused by the -
12 - the year.

13 MR. MALONEY: Yeah, I'm sorry. It was
14 for 2023.

15 MR. GOODRICH: For calendar year 2023?

16 MR. MALONEY: Yes, 2023. Yeah, I can
17 pass out copies of the exhibit.

18 MR. GOODRICH: I don't have that
19 exhibit.

20 MR. MALONEY: Go ahead and pass those
21 up.

22 THE WITNESS: (Rider) So we have the
23 exhibit, can you point us to --

24 BY MR. MALONEY: (Cont'g.)

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Sure. If you could look at page
3 2 of 2.

4 A. Okay.

5 Q. There is a column, the second
6 column and it states that the return on equity, it
7 calculates a return on equity. And I believe that
8 was a number prepared by the Staff Finance Panel for
9 each member of the proxy group. And at the bottom it
10 says that the average is 11.14% and the median is
11 10.64%.

12 A. That's what the document says.

13 Q. Okay. And this proxy group
14 represents a calculation by staff of what the proxy
15 group is forecast to earn in 2023, is that correct on
16 average, with data that was obtained from Value Line?

17 A. I believe the Staff Finance Panel
18 testified to this. So are you asking our opinion of
19 their testimony, I'm not --

20 Q. No, I'm asking you -- I'm asking
21 -- I know Mr. Duah was on the finance panel and on
22 this panel. So I'm asking is that in fact what this
23 shows?

24 A. (Duah) Yeah. That's the one I
25 was going to develop this one.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. (Rider) Right.

3 Q. And so the question is, okay,
4 under your earning sharing mechanism coupled with the
5 8.2% return on equity, would the company -- is it the
6 company's testimony that the returns being offered to
7 the company, an 8.2% return and the earning sharing
8 mechanism that we've described would allow the
9 company in 2023 to earn a commensurate return with
10 the average or median of the proxy group?

11 A. I'm confused. You said company.

12 Q. The companies.

13 A. The companies?

14 Q. Is it the panel's testimony?

15 A. Which panel? I'm confused. Can
16 you -- can you re --

17 Q. Sure. I'm sorry. It's been a
18 long day. Is it the panel's testimony that at 10
19 point -- an 8.2% proposed return on equity, coupled
20 with the proposed earnings sharing mechanism would
21 afford the companies an opportunity to earn a return
22 commensurate with the average return that the staff
23 proxy group -- that the Staff Finance Panel
24 identified for the staff proxy group in 2023?

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. So you're miss -- mixing two
3 periods of time, right? So the Staff Finance Panel
4 is -- is recommending a return in the rate year. And
5 the earning sharing mechanism does not kick in until
6 after the rate year.

7 Q. In 2023, it would apply?

8 A. That's correct.

9 Q. And so you're setting a return
10 for 2023?

11 A. No, the company has the --

12 Q. You are?

13 A. No. The company has an
14 opportunity and it makes a decision after the rate
15 year to file for new rates. And if the company --

16 Q. So the company -- I'm sorry.

17 A. -- does not file for new rates,
18 then it's accepting the 8.2 and it continues to
19 operate its business.

20 Q. But I'm asking you whether those
21 returns are commensurate, do you believe that they
22 are? The staff proxy group was thought to be a
23 comparable group to the companies, is that correct?

24 MR. GOODRICH: So again, objection.

25 Look, as -- as the panel has explained, the E.S.M. is

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 for periods after the rate year. If this case leads
3 to a 1-year litigated case, staff would not be doing
4 an analysis of what the appropriate R.O.E. would be
5 in that future period unless and until the company
6 seeks to increase its rates. So I mean, this is --
7 you're talking about 2023 is the last three months of
8 the year after the rate year, if I -- if I understand
9 correctly.

10 MR. MALONEY: While the staff may not
11 be proposing a - an earned return for that period,
12 they are proposing a rate making mechanism which
13 would deprive the company of the ability under any
14 set of reasonable circumstances to achieve the rate
15 returns that are even close to what's forecast for
16 the proxy group. That's my point.

17 MR. GOODRICH: It's -- it doesn't
18 deprive the company of anything. The company has the
19 option to file as the panel has testified to
20 repeatedly.

21 A.L.J. LEARY: And is it -- am I
22 correct in understanding, if in fact the company
23 files, they don't stay out, they come back in, the
24 R.O.E. would be at that point evaluated by staff?
25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. GOODRICH: Correct. Just like in
3 this case.

4 A.L.J. LEARY: Mr. Maloney, a couple
5 concerns. I think you're asking questions about
6 Exhibit 440 that are perfect for the finance pine --
7 panel and not particularly perfect for this panel.
8 This is a public policy can -- panel and they don't
9 set the R.O.E. What they do is something different
10 so that -- that may be part of the frustration here
11 that you're talking to the wrong panel maybe.

12 So it seems pretty stark to me that
13 the company doesn't like this earning sharing
14 mechanism. I'm -- I understand why, everybody in the
15 room understands why. Is there something that this
16 panel -- that you can ask this panel that goes to
17 their testimony or the bands that are outlined for
18 the E.S.M. on page 13 that may help you make your
19 point?

20 BY MR. MALONEY: (Cont'g.)

21 Q. I'll just ask one more question
22 and move on which is simply, for the company to file
23 a case, requires it to incur millions of dollars of
24 expenses, as well as hundreds of thousands of man
25 hours, I mean, hundreds or thousands of man hours of

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 -- of time, not only from the company's perspective,
3 but from parties like staff and other parties?

4 A. There are rate cases expenses
5 incurred by the company and paid by ratepayers when
6 utilities file for rates.

7 Q. Okay. Let's move on to page 29
8 of your testimony. At page 29, you discuss certain
9 changes to the customer service quality N.R.A.,
10 Negative Revenue Adjustments, is that correct?

11 A. The testimony filed in August?

12 Q. Yes.

13 A. Yeah. That is a summary of the
14 Staff Consumer Service Panel.

15 Q. And on page 34 of your -- of the
16 same testimony, you discuss certain changes to the
17 pipeline safety metrics, is that correct?

18 A. That's correct.

19 Q. Would you agree that all other
20 things being equal, the changes that staff is
21 proposing to the customer service metrics and the
22 service quality metrics increase the company's risks
23 and the risk specifically of not earning the return
24 on equity?

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. So this testimony is a summary of
3 the Consumer Services and the Gas Safety Panel
4 metrics. So those panels really are testifying to
5 the targets. However, I would note that the company
6 is provided in rates a level of expenses to achieve
7 its goals. And the panel believes that if it
8 operates as it has, then it could achieve those goals
9 and it doesn't necessarily increase the risk of the
10 company.

11 Q. Can the panel identify any
12 specific funding that the company -- that the staff
13 is proposing to provide the company in this case, to
14 enable it to meet the enhanced metrics that we are
15 discussing?

16 A. What metrics?

17 Q. The service quality and safety
18 metrics that we were just discussing.

19 A. I believe those panels, the
20 Consumer Service Panels and the Gas Safety Panels
21 reviewed the cost the company had proposed in the
22 rate year and they would be best offered that
23 question.

24 Q. Well, to the extent that it were
25 not possible to identify any specific incremental

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 dollars that the company received to meet these
3 revised metrics, I'll come back to my original
4 question, wouldn't you be imposing risks without
5 offering the company additional funds to achieve
6 those risks.

7 MR. GOODRICH: So objection. The
8 panel has stated, I think twice now that this was a
9 summary of testimonies provided by other panels. The
10 Customer Service Panel was already up, and the
11 company had an opportunity to cross examine that
12 panel regarding the targets that the -- the panel set
13 and the basis for those targets. The company is
14 seeking a second bite at a panel that is -- has
15 merely summarized staff's position on -- with regard
16 to these items.

17 MR. MALONEY: They're testifying to
18 the positions that they are the policy panel, which
19 connotes at least in my mind, that they're the broad
20 -- this is why we do these things in the aggregate
21 sort of panel. And my question led to the overall
22 change in risk associated with these proposals which
23 they summarized through their testimony.

24 A.L.J. LEARY: They summarize the risk
25 in their testimony?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: No, they summarize the
3 proposals that I'm asking them about what the impact
4 of those proposals are.

5 THE WITNESS (Rider) No, you're asking
6 me whether I -- what specific cost elements and not --
7 -- that was addressed in each of those panels.

8 MR. MALONEY: Right. But -- but --

9 A.L.J. LEARY: So risk is what I'm
10 sort of struck with and that to me, it seems, is
11 another panel's testimony but --

12 BY MR. MALONEY: (Cont'g.)

13 Q. In this case, it's correct isn't
14 it that the companies may not get an order -- a rate
15 order until sometime in the middle of the year?

16 A. It's possible that the commission
17 could decide sometime in July.

18 Q. Okay. And given that, when would
19 the staff propose that the revised metrics, safety
20 metrics and -- and customer service quality metrics
21 take effect?

22 A. I believe that was -- that
23 testimony is in the Gas Safety Panel or the consumer
24 service metrics or Consumer Service Panel when they
25 become effective.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Well, to the extent that they
3 proposed that they be effective on a calendar year
4 basis, would it be the Staff's Policy Panel's
5 recommendation that the metrics would not take effect
6 until January 1st, 2021?

7 A. We're not usurping the -- those
8 panel's testimony. I -- I believe their positions
9 speak for themselves.

10 Q. Okay. I want to move on and ask
11 you some questions about Newtown Creek and your
12 proposal there. Is it the panel's understanding that
13 the joint proposal in case 16-G-0058, I believe,
14 which I think was KEDNY's last case, was signed on
15 September 7th, 2016, is that correct?

16 A. I don't know the exact date it
17 was signed but it's -- it seems -- okay, yes.

18 Q. Okay. If you could look at your
19 testimony, your direct testimony at page 48.

20 A.L.J. COSTELLO: And I just want to
21 clar -- are you talking about KEDNY?

22 MR. MALONEY: KEDNY, yes.

23 A.L.J. COSTELLO: Okay. I think
24 that's 16-G-0059.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: Thank you, Your Honor.

3 They were backwards in that case.

4 A.L.J. LEARY: Are you still on

5 Newtown Creek because that starts at 39.

6 MR. MALONEY: And I'm referring him to

7 his testimony at page 48.

8 A.L.J. LEARY: 48, okay.

9 THE WITNESS: (Rider) I'm there.

10 BY MR. MALONEY: (Cont'g.)

11 Q. And looking at lines 20, 21, 22,
12 at the time that the joint proposal in the company's
13 last case, it's correct isn't it, that the Newtown
14 Creek project was sanctioned with an estimated cost
15 of \$34.1 million, is that correct? And I'm looking
16 at lines 20 and 21 for this.

17 A. Those dates seem to line up. I
18 would note though that when a joint proposal was
19 signed and what information staff has throughout that
20 process may be somewhat different.

21 Q. Will the staff -- does the panel
22 recall what it was aware of at the time it signed the
23 J.P. with respect to the projected cost of the
24 Newtown Creek project?

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: You want to ask if they
3 were involved in that J.P. first or have some
4 awareness?

5 BY MR. MALONEY: (Cont'g.)

6 Q. Mr. Rider, were you involved in
7 the negotiation of that J.P.?

8 A. Of course, I was, yes.

9 A.L.J. LEARY: Sorry. Dumb question.

10 MR. MALONEY: I'm sorry.

11 A.L.J. LEARY: Just need to protect
12 the record here, okay.

13 BY MR. MALONEY: (Cont'g.)

14 Q. So what is --

15 A. I don't -- I don't --

16 Q. -- your understanding of the
17 amount that the Newtown Creek project was likely to
18 cost at the time the J.P. was executed?

19 A. A very large amount of money.

20 Q. So north of \$30 million?

21 A. Yes.

22 Q. Would that be fair? Thank you.

23 And at the time that the joint proposal was executed,
24 was it staff's understanding that the annual revenue
25 record -- from sales of gas from the Newtown Creek

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 project would exceed the annual revenue requirement
3 for the Newtown Creek project?

4 A. It was our general understanding
5 however, the project was not complete at that point
6 in time.

7 Q. It was your understanding that
8 the revenue from the sales would exceed?

9 A. Would not exceed.

10 Q. Would not exceed. Thank you. In
11 proposing the revenue amputation in this case, has
12 the staff panel identified any potential market for
13 the R.N.G. produced by the Newtown facility that
14 would permit KEDNY to recoup the costs of the Newtown
15 Creek project?

16 A. Staff asked the company, I.R.
17 D.P.S. 739 to provide work papers to support the rate
18 year revenue estimate of \$1.9 million in the rate
19 year and they provided a response, an attachment.
20 That's the extent of the information we have on the -
21 - the amount of revenue that would be generated from
22 the project.

23 MR. MALONEY: Thank you. I believe we
24 have some I.R.s we'd like to mark with respect to
25 Newtown Creek.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: This is the Newtown
3 Creek R.N.G. project as opposed to the --

4 MR. MALONEY: Yes, that's correct,
5 Your Honor.

6 A.L.J. LEARY: -- hazardous waste
7 site?

8 MR. MALONEY: Yes. And I will say I'm
9 very close to finishing so.

10 A.L.J. LEARY: That's okay. Take your
11 time. Thank you.

12 MR. GAVILONDO: We'll mark this as
13 Exhibit 667 for identification.

14 A.L.J. LEARY: Do you want to mark
15 them as one or you want to keep them separate?

16 MR. GAVILONDO: Whatever is easiest
17 for you, thanks.

18 A.L.J. LEARY: We would love to get to
19 a 1000 exhibits.

20 MR. GOODRICH: From staff's
21 perspective, I prefer to keep them separate since
22 they're separate documents and might float apart at
23 some point.

24

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: As I said, we're happy
3 to get to a 1000 exhibits. Do you want to do all of
4 them, or you want to start with one?

5 MR. MALONEY: We could do it however,
6 if I can go ahead if you want to start and we can do
7 this.

8 BY MR. MALONEY: (Cont'g.)

9 Q. Panel, you've been handed Exhibit
10 667, is this a true and correct version of your
11 response to I.R. request N.G. 13?

12 A. Yes.

13 Q. And would your answer to this be
14 the same today if I were to ask you?

15 A. Yes.

16 Q. Does the panel have before it the
17 response to N.G. 52?

18 A.L.J. COSTELLO: We don't have it
19 before us so.

20 MR. MALONEY: So -- they're telling me
21 to go with them.

22 A.L.J. LEARY: We have N.G. 13 marked
23 as 667. Thank you.

24 A.L.J. COSTELLO: And we have N.G. 53,
25 was that the one that you're going to next?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 MR. MALONEY: 52, I believe.

3 A.L.J. COSTELLO: 52?

4 MR. MALONEY: I have 52.

5 A.L.J. COSTELLO: We have 53 and 54.

6 MR. GAVILONDO: Those were the last
7 two, Your Honor.

8 A.L.J. COSTELLO: Okay.

9 MR. GAVILONDO: But there were four
10 total of N.G. including 13 --

11 A.L.J. COSTELLO: Thank you.

12 MR. GAVILONDO: -- 52, 53 and 54.

13 A.L.J. COSTELLO: Okay.

14 A.L.J. LEARY: We don't have 52.

15 Yeah, we do.

16 A.L.J. COSTELLO: All right. So we'll
17 mark N.G. 52 as Exhibit Number 668.

18 A.L.J. LEARY: 53 is --

19 A.L.J. COSTELLO: And we'll do 50 --
20 N.G. 53 will be Exhibit Number 669 and N.G. 54 will
21 be 670.

22 MR. MALONEY: May I proceed?

23 A.L.J. LEARY: Yes, please.

24 MR. MALONEY: Thank you.

25 BY MR. MALONEY: (Cont'g.)

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. Panel, do you have before you the
3 documents that have been -- the responses to N.G. 52,
4 53 and 54 which have been marked as Exhibits 668, 669
5 and 670?

6 A. (Rider) Yes.

7 Q. And are these true and correct
8 copies of your responses to these information
9 requests?

10 A. Yes.

11 Q. And do you affirm that the
12 responses would be the same if I ask you the
13 questions today?

14 A. Yes.

15 Q. Okay. Is the staff panel aware
16 that in Con Edison's most recent rate case, case 19-
17 G-0066, the commission approved a provision that
18 authorized Con Edison to purchase renewable natural
19 gas within the company service territory and
20 acknowledged that such purchase may be more costly
21 than conventional gas supplies?

22 A. No.

23 Q. Okay. And I just -- final couple
24 questions. Turning to the staff supplemental
25 testimony, your policy panel. And I'm referencing

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 pages 7 and 8 where you -- it's correct, isn't it
3 that the policy panel --

4 A. Hold on a second. Hold on.

5 Q. I'm sorry.

6 A. Okay.

7 Q. Is it -- is it correct that the
8 panel proposes to disallow certain damage prevention
9 costs that were included in the company's
10 supplemental testimony?

11 A. Yes.

12 Q. Okay. Is it -- does the staff
13 contend that allowing the proposed cost changes to be
14 included in rates in these proceedings would be
15 inconsistent with the commission's policy on test
16 periods and major rate proceedings?

17 A. Can you rephrase? I'm not sure I
18 understand.

19 Q. Does the staff panel believe that
20 or contend that allowing the proposed cost changes
21 for damage prevention to be included in rates would
22 be inconsistent with the commission's policy on test
23 periods and major rates proceedings? And what I mean
24 by that is do you believe the update came too late
25 under the policy statement?

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A. I don't believe our testimony
3 says that.

4 Q. It's correct, isn't it that the
5 staff has had nearly two months since the company
6 filed testimony concerning the increased damage
7 prevention costs to review those costs?

8 A. Not necessarily. The company
9 filed in December -- mid-December and staff had to
10 turn around testimony at the end of January. So
11 there was a limited amount of time and if you compare
12 that to when the company actually knew when these
13 expenses were going to be incurred, they started this
14 process in early 2018. They went through a process
15 where they determined that these costs or the --
16 these certain contractors and costs needed to be
17 updated.

18 And if you go to their exhibit, I
19 think it lays out the timeline there. So the company
20 had plenty of time to explore these costs, then
21 inform staff. What staff is really concerned about
22 is that the company knew that these changes were
23 forthcoming, but didn't inform staff, didn't educate
24 staff or engaged in -- in staff in the development of
25 these -- these changes.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. When the company files an update
3 to its cost to service, would you agree that the cost
4 should be known and measurable?

5 A. If the company proposes to
6 recover costs from customers, yes, it should be known
7 and measurable. However, I -- I'd give you an
8 example of a cost that was on the horizon, N.E.N.Y.,
9 right. Staff had proposed in its testimony that
10 there could be changes. It informed all of the
11 parties that there could be changes.

12 And when the commission actually
13 issued its order, then folks knew that these changes
14 were, you know, what they were, and they wanted --
15 the commission wanted the -- these changes to be
16 incorporated into the record.

17 A.L.J. LEARY: I'm sorry, Mr. Rider,
18 you referred to a couple things that I just need to
19 have clarified on the record. One of which was a
20 reference to something that the company has provided.
21 It was -- if you look at their schedules, what was
22 that Mr. Goodrich, do you know?

23 MR. GOODRICH: So I don't know, but I
24 know that I was just trying to -- Aric, you had said
25 something like if you look at the company's exhibit.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: Exhibit, yes.

3 THE WITNESS: I can point you to an
4 exhibit that lays out the timeline of when the
5 company knew about damage prevention changes and give
6 me a second and I'll identify that for you.

7 MR. GOODRICH: Is that the I.R.
8 responses? I think it's our exhibit that's I.R.
9 responses.

10 MR. RIDER: So I was referring to
11 Exhibit S.P.P. 4, page 21 of 48. I believe the
12 second -- Katie help me here on the order for
13 N.E.N.Y.

14 A.L.J. LEARY: Yeah, The acronym, can
15 you just speak into the microphone?

16 MS. MAMMENS: Yes. N.E.N.Y. is New
17 Efficiency New York and the order was issued December
18 13th, I believe, 2019. Yes, we reflected that and
19 the fact that it was forthcoming in our initial
20 testimony.

21 MR. GOODRICH: And I would just add,
22 Mr. Rider referenced S.P.P. 4 and that I believe is
23 marked as Exhibit 510.

24 A.L.J. LEARY: Thank you. Mr.
25 Maloney.

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 BY MR. MALONEY: (Cont'g.)

3 Q. Going to what you just testified
4 to, knowing that the N.E.N.Y., because I can't
5 remember what the acronym means, order was coming,
6 how did that help the company, or anyone develop
7 costs for it until the order itself was finally
8 issued?

9 A. It -- it put all of the parties
10 on notice that this cost was forthcoming to the
11 extent that there was any questions or folks needed
12 to coordinate. We knew -- folks know that, that this
13 cost was forthcoming. The difference is that the
14 company had known about damage prevention changes
15 since 2018 and could have engaged staff early on in
16 the process.

17 Staff could have understood what those
18 changes were and the - what -- what the potential
19 savings could be from -- from changes in these
20 contracts. And to the extent that when we did get
21 the contracts, we could have been more informed and
22 able to review the I.R. responses that were provided
23 in January by the company.

24

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. LEARY: And I just want to
3 clarify. There was a previous energy efficiency
4 order in 2018 or 2019. Is that right, Mr. Rider?

5 MS. MAMMENS: That's correct.

6 A.L.J. LEARY: So did that help the
7 company to understand costs, targets, budgets, et
8 cetera?

9 MS. MAMMENS: That order set out
10 presumptive targets and I was incorrect. The order
11 you're referring to is December 13th, 2018 and the
12 order I was referring to was January of 2020.

13 A.L.J. LEARY: That's what I thought.

14 MS. MAMMENS: So that December 13th,
15 2018 order set out presumptive targets and budgets
16 which -- which the company was able to use to predict
17 the direction that commission was going ultimately in
18 the January order.

19 A.L.J. LEARY: Yeah. I just got
20 thrown by the date -- two dates because I heard you
21 say -- I wasn't sure what you said but
22 differentiating -- that's helpful to differentiate
23 those two orders, thanks.

24 BY MR. MALONEY: (Cont'g.)

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 Q. At this point, does the panel
3 have any reason to doubt that the company will incur
4 the increased damage prevention costs identified by
5 the companies in their testimony?

6 A. (RIDER) I don't know. One concern I
7 have is that the number of tickets that the company
8 used to forecast the -- the expense hasn't been
9 vetted yet. There -- there may be -- should be
10 normalized, I don't know. But really our concern is
11 all around savings.

12 The utility said -- the company said
13 that the damage prevention contractors would use
14 updated and newer technology and it really hasn't
15 been vetted from staff's perspective on whether there
16 should be or could be savings on the company's side
17 from implementing this new contract.

18 Q. If there were some savings, they
19 might offset part of the increased costs, is that
20 your understanding?

21 A. I haven't done that analysis. I
22 don't know whether it'd be part of or in full.

23 Q. And when I asked you about the --
24 the increased cost, for -- for the damage prevention

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas
2 contractors themselves though, you don't dispute that
3 those rates are going up, do you?

4 A. That's what the contracts state.

5 MR. MALONEY: Okay. Thank you, panel.
6 I have nothing further.

7 A.L.J. COSTELLO: Mr. Goodrich, do you
8 need some time?

9 MR. GOODRICH: I think we would like
10 to take a few minutes, yes.

11 A.L.J. COSTELLO: Okay.

12 A.L.J. LEARY: Very few.

13 A.L.J. COSTELLO: Say 10 minutes. Is
14 that -- or five minutes, what do you?

15 A.L.J. LEARY: Can you do it in 10
16 minutes and I don't have to send Mr. Rider out
17 because he is not going to be sent -- able to be sent
18 out. We're off the record.

19 A.L.J. COSTELLO: So 10 minutes off
20 the record.

21 (Off the record 5:03 p.m.)

22 (On the record 5:08 p.m.)

23 A.L.J. COSTELLO: Mr. Goodrich.

24 MR. GOODRICH: We have no redirect.

25

1 19-G-0309/19-G-0310 - 2-20-20 - Brooklyn Union Gas

2 A.L.J. COSTELLO: Okay. Panel, thank
3 you very much for your testimony and you're excused.
4 And we're off the record.
