**	Partial Implementation - utility will only implement selected items/codes.												
***	Implementation dates will be set prospectively now that Prohibition Order was implemented.												
###	UBR Utilities have the option to employ AMT*7 when the ESCO issuing the GSP credit is no longer serving the customer or in Dual Bill situations [Grid is exercising this option]. Otherwise, a UBR Utility may use a cancel/rebill to re-open a billing window when the customer is no longer served by the ESCO issuing the GSP Credit or a non-EDI process for dual bill situations. [NYSEG/RG&E is taking this approach].
