### **GENERAL INSTRUCTIONS**

- The completed original of this report form, properly filled out, shall be filed with the Public Service
  Commission, Albany, NY, on or before the 31st of March next following the end of the year to which the
  report applies. At least one additional copy shall be retained in the files of the reporting utility.
- All utility companies upon which this report form is served are required by statute to complete and to file
  the report. The statute further provides that when any such report is defective or believed to be erroneous,
  the reporting utility shall be duly notified and given a reasonable time within which to make the necessary
  amendments or corrections.
- 3. All accounting terms and phrases used in this form are to be interpreted in accordance with the Uniform Systems of Accounts prescribed by this Commission. Whenever the term respondent is used, it shall be understood to mean the reporting utility.
- 4. If the report is made for a period other than the calendar year, the period covered must be clearly stated on the front cover and elsewhere throughout the report where the period covered is shown. When operations cease during the year because of the disposition of property the balance sheet and supporting schedules should consist of balances and items immediately prior to transfer (for accounting purposes). If the books are not closed as of that date, the data in the report should nevertheless be complete and the amounts reported should be supported by information set forth in, or as part of the books of account.
- 5. Every inquiry must be definitely answered. If "none" or "not applicable" states the fact, such an answer may be used. The annual report should be complete in itself. Reference to reports of previous years or to any paper or document should not be made in lieu of required entries except as specifically outlined.
- 6. Upon filing, the report may, if desired, be permanently bound. If it is so bound, the requirement for page by page identification of the reporting company set forth in paragraph 9 below, may be disregarded. Extra copies of any page will be furnished upon request.
- 7. If the utility conducts operations both within and without the State of New York, data should be reported so that there will be shown the quantities of commodities sold within this State, and (separately by accounts) the operating revenues from sources within this State, the operating revenue deductions applicable thereto and the plant investment as of the end of the year within this State.
- 8. All entries shall be made in black or dark blue except those of a contrary or opposite nature, which should be made in red or enclosed in parentheses. Inserts, if any, should be appropriately identified with the schedules to which they relate.
- 9. Insert the initials of the reporting utility and the year which the report covers in the space provided on each page.
- 10. Cents are to be omitted on all schedules except where they apply to averages and figures per unit where cents are important. The amounts shown on all supporting schedules shall agree with the item in the statement they support.

### CORPORATIONS CONTROLLED BY RESPONDENT

- 1. Report below the names of all corporations, business trusts, and similar organizations, controlled directly or indirectly by the respondent at any time during the year. If control ceased prior to the end of the year, give particulars (details) in a footnote.
- 2. If control was by other means than a direct holding of voting rights, state in a footnote the manner in which control was held, naming any intermediaries involved.
- 3. If control was held jointly with one or more other interests, state the facts in a footnote and name the other interests.

### **DEFINITIONS**

- 1. See the Uniform System of Accounts for a definition of control.
- 2. Direct control is that which is exercised without interposition of an intermediary.
- 3. Indirect control is that which is exercised by the interposition of an intermediary which exercises direct control.
- 4. Joint control is that in which neither interest can effectively control or direct action without the consent of the other, as

where the voting control is equally divided between two holders, or each party holds a veto power over the other. Joint control may exist by mutual agreement or understanding between two or more parties who together have control within the meaning of the definition of control in the Uniform System of Accounts, regardless of the relative voting rights of each party.

## **OFFICERS AND DIRECTORS (Including Compensation)**

- 1. Furnish the indicated data with respect to each executive officer and director, whether or not they received any compensation from the respondent.
- Executive officers include a company's president, secretary, treasurer and vice president in charge of a principal business unit, division or function (such as sales, administration, or finance), and any other person who performs similar policy making functions.

3. Indicate with an asterisk (\*) in column (a) those directors who were members of the executive committee, if any, and by a double asterisk (\*\*) the chairman, if any, of that committee, at the end of the year.

### **OFFICERS AND DIRECTORS (Including Compensation - Continued)**

- 4. If any person reported in this schedule received remuneration directly or indirectly other than salary shown in column (e) list the amount in column (f) through (k) with the footnotes necessary to explain the essentials of the plan, the basis of determining the ultimate benefits receivable and the payments or provisions made during the year to each person reported herein. If the word "none" correctly states the facts in regard to the entries for column (f) through (k), so state.
- 5. If any person reported hereunder received compensation from more than one affiliated company or was carried on the payroll of an affiliated company, details shall be given in a note.

KeySpan Gas East Corp. D/B/A National Grid	(1) [ ]	An Original	(Mo, Da, Yr)	
	(2) [X]	A Resubmission	March 31, 2015	December 31, 2013

### STATEMENT OF INCOME FOR THE YEAR

- 1. Report amounts for accounts 412 and 413, Revenue and Expenses from Utility Plant Leased to Others, in another utility column (i, k, m, o) in a similar manner to a utility department. Spread the amount(s) over lines 02 through 24 as appropriate. Include these amounts in columns (c) and (d) totals.
- 2. Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413.
- 3. Report data for lines 7, 9, and 10 for Natural Gas companies using accounts 404.1, 404.2, 404.3, 407.1, and 407.2.
- 4. Use page 122-123 for important notes regarding the statement of income or any account thereof.
- 5. Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of material amount may need to be made to the utility's customers or which may result in a material refund to the utility with respect to power or gas purchases. State for each year affected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power and gas purchases.
- 6. Give concise explanations concerning significant amount of any refunds made or received during the year resulting

	of income or any account thereof.

# STATEMENT OF INCOME FOR THE YEAR (Continued)

9. Explain in a footnote if the previous year's figures are different from that reported in prior reports.

from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purrevenues received or costs incurred for power or gas purchases, and a summary of the adjustments made to balance sheet, income, and expense accounts.

- 10. If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles, lines 2 to 23, and report the information in the blank space on page 122-123 or in a footnote.
- 7. If any notes appearing in the report to stockholders are applicable to this Statement of Income, such notes may be included on page 122-123.
- 8. Enter on page 122-123 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also give the approximate dollar effect of such changes.

NOTES TO FINANCIAL STATEMENTS (Continued)					

### Note 3 - FINANCIAL STATEMENT RESTATEMENT

Management has determined that certain accounting transactions were not properly recorded in the Company's financial statements as of and for the years ended December 31, 2013 and 2012. Within this resubmission of the December 31, 2013 report the Company has restated the financial statements for both periods, the impacts of which are described below.

The Company incorrectly recorded amounts related to insurance costs as well as expense for workers compensation, auto, and general insurance claims which have been incurred but not yet reported ("IBNR"). The correction of these items resulted in a decrease of approximately \$5.0 million net of taxes in operating expenses and related increase in net income in 2012, and an increase of approximately \$6.5 million net of taxes in operating expenses and related decrease in net income in 2013. These corrections also resulted in an increase in opening equity of \$5 million.

In addition, the Company corrected the classification of taxes accrued at December 31, 2013 and 2012 by reclassifying \$3.4 million and \$12.8 million in prepaid taxes from accrued taxes to prepaid expenses, respectively. The Company also reclassified \$2.3 million of share compensation expense from operation expense to expenses of non utility operations in 2013.

The following table shows the amounts previously reported as restated:

	The following table shows the amounts previously reported as restated:	As Reported		As Restated

FLECTRIC RI ANT IN CERVICE (Assessment 101, 100, 100, and 100)			

ELECTRIC PLANT IN SERVICE (Accounts 101, 102, 103, and 106)

- 1. Report below the original cost of electric plant in service according to the prescribed accounts.
- In addition to Account 101, Electric Plant in Service (Classified), this page and the next include Account 102, Electric
  Plant Purchased or Sold; Account 103, Experimental Electric Plant Unclassified; and Account 106, Completed Construction
  Not Classified Electric.
- 3. Include in column (c) or (d), as appropriate, corrections of additions and retirements for the current or preceding year.
- 4. Enclose in parentheses credit adjustments of plant accounts to indicate the negative effect of such accounts.
- 5. Classify Account 106 according to prescribed accounts, on an estimated basis if necessary, and include the entries in column (c). Also to be included in column (c) are entries for reversals of tentative distributions of prior year reported in column (b). Likewise, if the respondent has a significant amount of plant retirements which have not been classified to primary accounts at the end of the year, include in column (d) a tentative distribution of such retirements, on an estimated basis, with appropriate contra entry to the account for accumulated depreciation provision. Include also in column (d) reversals of tentative distributions of prior year unclassified retirements. Show in a footnote the account distributions of these tentative classifications in columns (c) and (d), including the

ELECTRIC PLANT IN SERVICE (Accounts 101, 102, 103, and 106) (Continued)

reversals of the prior years tentative account distributions of these amounts. Careful observance of the above instructions and the texts of Accounts 101 and 106 will avoid serious omissions of the reported amount of respondent's plant actually in service at end of year.

- 6. Show in column (f) reclassifications or transfers within utility plant accounts. Include also in column (f) the additions or reductions of primary account classifications arising from distribution of amounts initially recorded in Account 102. In showing the clearance of Account 102, include in column (e) the amounts with respect to accumulated provision for depreciation, acquisition adjustments, etc., and show in column (f) only the offset to the debits or credits distributed in column (f) to primary account classifications.
- 7. For Account 399, state the nature and use of plant included in this account and if substantial in amount submit a supplementary statement showing subaccount classification of such plant conforming to the requirements of these pages.
- 8. For each amount comprising the reported balance and changes in Account 102, state the property purchased or sold, name of vendor or purchaser, and date of transaction. If proposed journal entries have been filed with the Commission as required by the Uniform System of Accounts, give also date of such filing.

## CONSTRUCTION OVERHEADS ELECTRIC, GAS AND COMMON

- List in column (a) the kinds of overheads according to the titles used by the respondent. Charges for outside professional services for engineering fees and management or supervision fees capitalized should be shown as separate items.
- 2. On page 218 furnish information concerning construction overheads, for electric, gas and common operations respectively.
- 3. A respondent should not report "none" to this page if no overhead apportionments are made, but rather should explain on page 218, the accounting procedures employed and the amounts of engineering, supervision and administrative costs, etc., which are directly charged to construction, for electric, gas and common operations respectively.
- 4. Enter on this page engineering, supervision, administrative, and allowance for funds used during construction, etc., which are first assigned to a blanket work order and then prorated to construction jobs for electric, gas and common operations respectively.

ACCUMULATED PROVISION F	OR DEPRECIATION OF E	LECTRIC UTILITY PLA	NT (Account 108)

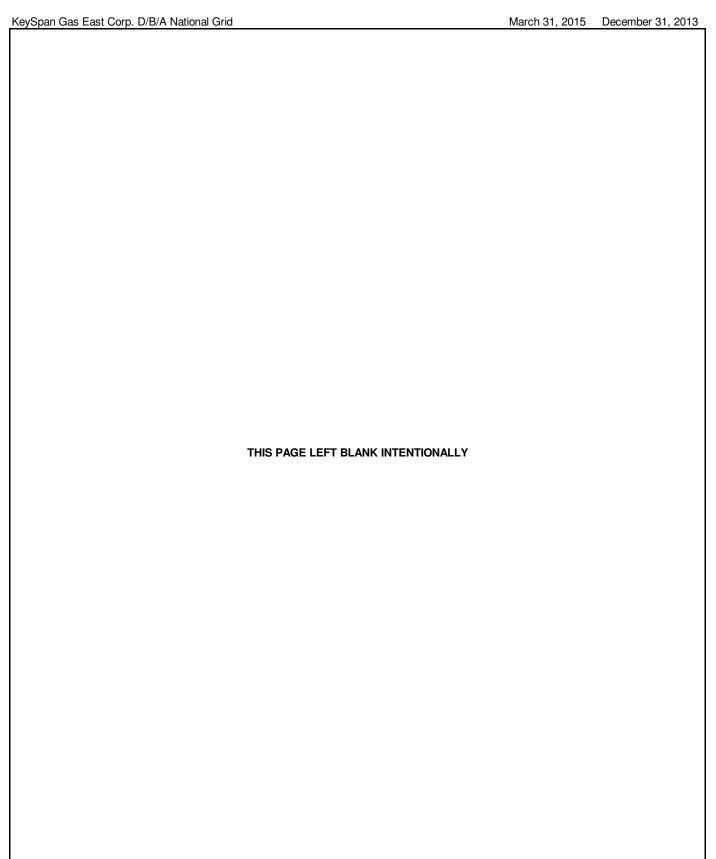

- 1. Explain in a footnote any important adjustments during year.
- 2. Explain in a footnote any difference between the amount for book cost of plant retired, line 11, column (c), and that reported for electric plant in service, pages 204-207, column (d), excluding retirements of non-depreciable property.
- 3. The provisions of Account 108 in the Uniform System of Accounts require that retirements of depreciable plant be recorded when such plant is removed from service. If the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications.
- 4. Show separately interest credits under a sinking fund or similar method of depreciation accounting.

	CAPITAL STOCK (Accounts 201 an	nd 204)	

- 1. Report below the particulars (details) called for concerning common and preferred stock at end of year, distinguishing separate series of any general class. Show separate totals for common and preferred stock. If information to meet the stock exchange reporting requirement outlined in column (a) is available from the SEC 10-K Report Form filling, a specific reference to report form (i.e. year and company title) may be reported in column (a) provided the fiscal years for both the 10-K report and this report are compatible.
- 2. Entries in column (b) should represent the number of shares authorized by the articles of incorporation as amended to end of year.
- 3. Give particulars (details) concerning shares of any class and series of stock authorized to be issued by a regulatory commission which have not yet been issued.

LONG-TERM DEBT (Accounts	221 222 223 and 224)		•

- Report by balance sheet account the particulars (details) concerning long-term debt included in Accounts 221, Bonds, 222, Reacquired Bonds, 223, Advances from Associated Companies, and 224, Other Long-Term Debt.
- 2. In column (a), for new issues, give Commission authorization numbers and dates.
- For bonds assumed by the respondent, include in column(a) the name of the issuing company as well as a description of the bonds.
- 4. For advances from Associated Companies, report separately advances on notes and advances on open accounts. Designate demand notes as such. Include in column(a) names of associated companies from which advances were received.
- For receivers' certificates, show in column(a) the name of the court and date of court order under which such certificates were issued.

- 6. In column(b) show the principal amount of bonds or other long-term debt originally issued.
- 7. In column (c) show the expense, premium or discount with respect to the amount of bonds or other long-term debt originally issued.
- 8. For column (c) the total expenses should be listed first for each issuance, then the amount of premium (in parentheses) or discount. Indicate the premium or discount with a notation, such as (P) or (D). The expenses, premium or discount should not be netted.
- 9. Furnish in a footnote particulars (details) regarding the treatment of unamortized debt expense, premium or discount associated with issues redeemed during the year. Also, give in a footnote the date of the Commission's authorization of treatment other than as specified by the Uniform System of Accounts.

LONG-TERM DEBT (Accounts 221, 222, 223, and 224) (Continued)

- 10. Identify separate indisposed amounts applicable to issues which were redeemed in prior years.
- 11. Explain any debits and credits other than amortization debited to Account 428, Amortization of Debt Discount and Expense, or credited to Account 429, Amortization of Premium on Debt Credit.
- 12. In a footnote, give explanatory particulars (details) for Accounts 223 and 224 of net charges during the year. With respect to long-term advances, show for each company: (a) principal advanced during year, (b) interest added to principal amount, and (c) principal repaid during year. Give Commission authorization numbers and dates.
- 13. If the respondent has pledged any of its long-term debt

securities give particulars (details) in a footnote including name of pledgee and purpose of the pledge.

- 14. If the respondent has any long-term debt securities which have been nominally issued and are nominally outstanding at end of year, describe such securities in a footnote.
- 15. If interest expense was incurred during the year on any obligations retired or reacquired before end of year, include such interest expense in column (i). Explain in a footnote any difference between the total of column (i) and the total of Account 427, Interest on Long-Term Debt and Account 430, Interest on Debt to Associated Companies.
- 16. Give particulars (details) concerning any long-term debt authorized by a regulatory commission but not yet issued

KeySpan Gas East Corp. D/B/A National Grid (1) [ ] A	An Original (Mo,	, Day, Yr)	
(2) [x]	A Resubmission March	h 31, 2015 December 3	1, 2013

#### RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME FOR FEDERAL INCOME TAXES

- 1. Report the reconciliation of reported net income for the year with taxable income used in computing Federal income tax accruals and show computation of such tax accruals. Include in the reconciliation, as far as practicable, the same detail as furnished on Schedule M-1 of the tax return for the year. Submit a reconciliation even though there is no taxable income for the year. Indicate clearly the nature of each reconciling amount.
- 2. If the utility is a member of a group which files a consolidated Federal tax return, reconcile reported net income with taxable net income as if a separate return were to be filed, indicating, however, intercompany amounts to be eliminated in such consolidated return. State names of group members, tax assigned to each group member, and basis of allocation, assignment, or sharing of the consolidated tax among group members.
- 3. A substitute page, designed to meet a particular need of a company, may be used as long as the data is consistent and meets the requirements of the above instructions. For electronic reporting purposes complete line 27 and provide the substitute page in the context of a footnote.

Line	Particulars (Details)	Amount

TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR						

- Give particulars (details) of the combined prepaid and accrued tax accounts and show the total taxes charged to operations and other
  accounts during the year. Do not include gasoline and other sales taxes which have been charged to the accounts to which the taxed material
  was charged. If the actual or estimated amounts of such taxes are known, show the amounts in a footnote and designate whether estimated or
  actual amounts.
- Include on this page, taxes paid during the year and charged direct to final accounts, (not charged to prepaid or accrued taxes). Enter the amounts in both columns (d) and (e). The balancing of this page is not affected by the inclusion of these taxes.
   Include in column (d) taxes charged during the year, taxes charged to operations and other accounts through (a) accruals credited to taxes
- 3. Include in column (d) taxes charged during the year, taxes charged to operations and other accounts through (a) accruals credited to taxes accrued, (b) amounts credited to proportions of prepaid taxes chargeable to current year, and (c) taxes paid and charged direct to operations or accounts other than accrued and prepaid tax accounts.

 List the aggregate of each kind of tax under the appropriate heading of "Federal," "State," and "Local" in such manner that the total tax for each State and subdivision can readily be ascertained.

	each State and subdivision can re-

TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR (Continued)

- 5. If any tax covers more than one year, show the required information separately for each tax year, identifying the year in column (a).
  6. Enter all adjustments of the accrued and prepaid tax accounts in column (f) and explain each adjustment in a footnote. Designate
- debit adjustments by parentheses.

  7. Do not include on this page entries with respect to deferred income taxes or taxes collected through payroll deductions or otherwise pending transmittal of such taxes to the taxing authority.

#### 8. Report in columns (i) through (q) how the taxes were distributed.

9. For any tax apportioned to more than one utility department or account, state in a footnote the basis (necessity) of apportioning such tax.

ELECTRIC OPERATING REVENILIES (ACCOUNT 400)					

- 1. Report below operating revenues for each prescribed account, and manufactured gas revenues in total.
- 2. Report number of customers, columns (f) and (g), on the basis of meters, in addition to the number of flat rate accounts; except that where separate meter readings are added for billing purposes, one customer should be counted for each group of meters added. The average number of customers means the average
- of twelve figures at the close of each month.

  3. If increases or decreases from previous year (columns (c), (e), and (g)), are not derived from previously reported figures, explain any inconsistencies in a footnote.

SALES FOR RESALE (Account 447)					

- Report all sales for resale (i.e. sales to purchasers other than ultimate consumers) transacted on a settlement basis
  other than power exchanges during the year. Do not report exchanges of electricity (i.e.., transactions involving a
  balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this
  schedule. Power exchanges must be reported on the Purchased Power schedule (pages 326-327).
- 2. Enter the name of the purchaser in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
- In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:
  - RQ for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (ie., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
  - LF for long-term service, "Long-term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g.., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally get out of the contract.
  - IF for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but less than five years.
  - SF for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
  - LU for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of the designated unit.
  - IU for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means longer than one year but less than five years.

SALES FOR RESALE (Account 447) (Continued)

- OS for other service. Use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the length of the contract and service from designated units of less than one year. Describe the nature of the service in a footnote.
- AD for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.
- 4. Group requirements RQ sales together and report them starting at line number one. After listing all RG sales, enter "Subtotal RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this listing. Enter "Total" in column (a) as the last line of the schedule. Report subtotals and total for columns (g) through (k).
- 5. In column (c), identify the FERC Rate Schedule or Tariff Number. On separate lines, list all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.
- 6. For requirements RQ sales and any type of service involving demand charges imposed on a monthly (or longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
- 7. Report in column (g) the megawatthours shown on bills rendered to the purchaser.
- 8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustment, in column (j). Explain in a footnote all components of the amount shown in column (j). Report in column (k) the total charge shown on bills rendered to the purchaser.
- 9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the last line of the schedule. The "Subtotal RQ" amount in column (g) must be reported as Requirements Sales for Resale on page 401, line 23. The "Subtotal Non-RQ" amount in column (g) must be reported as Non-Requirements Sales for Resale on page 401, line 24.
- 10. Footnote entries as required and provide explanations following all required data.

PURCHASED POWER (Account 555)						
(INCLUDING POWER EXCHANGES)						

- 1. Report all power purchases made during the year. Also report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges.
- Enter the name of the seller or other party in an exchange transaction in column (a). Do not abbreviate or truncate
  the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the
  seller.
- In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:
  - RQ for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
  - LF for long-term firm service. "Long-term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally get out of the contract.
  - IF for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but less than five years.
  - SF for short-term firm service. Use this category for all firm services, where the duration of each period of commitment for service is one year or less.
  - LU for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of the designated unit.
  - IU for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means longer than one year but less than five years.
  - EX for exchanges of electricity. Use this category for transactions involving a balancing of debits and credits for energy, capacity, etc. and any settlements for imbalanced exchanges.
  - OS for other service. Use this category only for those services which cannot be placed in the above-

PURCHASED POWER (Account 555) (Continued)						

PURCHASED POWER (Account 555) (Continued) (Including power exchanges)

defined categories, such as all nonfirm service regardless of the length of the contract and service from designated units of less than one year. Describe the nature of the service in a footnote for each adjustment. AD - for out-of-period adjustment. Use this code for any accounting adjustment or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.

- 4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for nonFERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided.
- 5. For requirements RQ purchases and any type of services involving demand charges imposed on a monthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
- 6. Report in column (g) the megawatthours shown on bills rendered to the respondent. Report in columns (h) and (i) the megawatthours of power exchanges received and delivered, used as the basis for settlement. Do not report net exchange.
- 7. Report demand charges in column (j), energy charges in column (k), and the total of any other types of charges, including out-of-period adjustments, in column (l). Explain in a footnote all components of the amount shown in column (l). Report in column (m) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (m) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (1) includes credits or charges other than incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.
- 8. The data in column (g) through (m) must be totaled on the last line of the schedule. The total amount in column (g) must be reported as Purchases on page 401, line 10. The total amount in column (h) must be reported as Exchange Received on page 401, line 12. The total amount in column (i) must be reported as Exchange Delivered on page 401, line 13.

9. Footnote entries as required and provide explanations following all required data.

## TRANSMISSION OF ELECTRICITY BY OTHERS (Account 565) (Including transactions referred to as "wheeling")

- 1. Report all transmission, i.e., wheeling, of electricity provided to respondent by other electric utilities, cooperatives, municipalities, or other public authorities during the year.
- 2. In column (a) report each company or public authority that provided transmission service. Provide the full name of the company; abbreviate if necessary, but do not truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation with the transmission service provider.
- 3. Provide in column (a) subheadings and classify transmission service purchased from other utilities as: "Delivered Power to Wheeler" or "Received Power from Wheeler."
- 4. Report in columns (b) and (c) the total megawatthours received and delivered by the provider of the transmission service.
- 5. In columns (d) through (g), report expenses as shown on bills or vouchers rendered to the respondent. In column (d), provide demand charges. In column (e), provide energy charges related to the amount of energy transferred. In column (f), provide the total of all other charges on bills or vouchers rendered to the respondent, including any out of period adjustments. Explain in a footnote all components of the amount shown in column (f). Report in column (g) the total charge shown on bills rendered to the respondent. If no monetary settlement was made, enter zero ("0") in column (g). Provide a footnote explaining the nature of the nonmonetary settlement, including the amount and type of energy or service rendered.
- 6. Enter "TOTAL" in column (a) as the last line. Provide a total amount in columns (b) through (g) as the last line. Energy provided by the respondent for the wheeler's transmission losses should be reported on the Electric Energy Account, page 401. If the respondent received power from the wheeler, energy provided to account for losses should be reported on line 19. Transmission By Others Losses, on page 401. Otherwise, losses should be reported on line 27, Total Energy Losses, page 401.

7. Footnote entries and provide explanations following all required data.

#### PARTICULARS CONCERNING CERTAIN INCOME DEDUCTIONS AND INTEREST CHARGES ACCOUNTS

Report the information specified below, in the order given, for the respective income deduction and interest charges accounts. Provide a subheading for each account and a total for the account. Additional columns may be added if deemed appropriate with respect to any account.

- (a) Miscellaneous Amortization (Account 425)-Describe the nature of items included in this account, the contra account charged, the total of amortization charges for the year, and the period of amortization.
- (b) Miscellaneous Income Deductions-Report the nature, payee, and amount of other income deductions for the year as required by Accounts 426.1, Donations; 426.2, Life Insurance; 426.3, Penalties; 426.4, Expenditures for Certain Civic, Political and Related Activities; and 426.5, Other

Deductions, of the Uniform System of Accounts. Amounts of less than 5% of each account total for the year (or \$1,000, whichever is greater) may be grouped by classes within the above accounts.

- (c) Interest on Debt to Associated Companies (Account 430)-For each associated company to which interest on debt was incurred during the year, indicate the amount and interest rate respectively for (a) advances on notes, (b) advances on open account, (c) notes payable, (d) accounts payable, and (e) other debt, and total interest. Explain the nature of other debt on which interest was incurred during the year.
- (d) Other Interest Expense (Account 431)-Report particulars (details) including the amount and interest rate for other interest charges incurred during the year.

### REGULATORY COMMISSION EXPENSES FOR ELECTRIC AND GAS

- 1. Report particulars (details) of regulatory commission expenses incurred during the current year (or incurred in previous years, if being amortized) relating to formal cases before a regulatory body, or cases in which such a body was a party. Identify this expense as Electric, Gas or Common.
- 2. Report in columns (b) and (c) only the current year's expenses that are not deferred and the current year's amortization of amounts deferred in previous years.

expe	ense as Electric, Gas or Common.

	COMMON UTILITY PLANT AND EXPENSES		

- 1. Describe the property carried in the utility's accounts as common utility plant and show the book cost of such plant at end of year classified by accounts as provided by Plant Instruction 13, Common Utility Plant, of the Uniform System of Accounts. Also show the allocation of such plant costs to the respective departments using the common utility plant and explain the basis of allocation used, giving the allocation factors.
- 2. Furnish the accumulated provisions for depreciation and amortization at end of year, showing the amounts and classifications of such accumulated provisions, and amounts allocated to utility departments using the common utility plant

- to which such accumulated provisions relate, including explanation of basis of allocation and factors used.
- 3. Give for the year the expenses of operation, maintenance, rents, depreciation, and amortization for common utility plant classified by accounts as provided by the Uniform System of Accounts. Show the allocation of such expenses to the departments using the common utility plant to which such expenses are related. Explain the basis of allocation used and give the factors of allocation.
- 4. Give date of approval by the Commission for use of the common utility plant classification and reference to order of the Commission or other authorization.

GENERATING PLANT STATISTICS (Small Plants)(Continued)					

- 3. List plants appropriately under subheadings for steam, hydro, nuclear, internal combustion and gas turbine plants. For nuclear, see instruction 11, page 403.
- 4. If net peak demand for 60 minutes is not available, give that which is available, specifying period.
- 5. If any plant is equipped with combinations of steam, hydro, internal combustion or gas turbine equipment, report each as a separate plant. However, if the exhaust heat from the gas turbine is utilized in a steam turbine regenerative feed water cycle, or for preheated combustion air in a boiler, report as one plant.

# **GENERATING PLANT STATISTICS (Small Plants)**

- 1. Small generating plants are steam plants of less than 25,000 Kw; internal combustion and gas-turbine plants, conventional hydro plants and pumped storage plants of less than 10,000 Kw installed capacity (name plate rating).
- 2. Designate any plant leased from others, operated under a license from the Federal Energy Regulatory Commission, or operated as a joint facility, and give a concise statement of the facts in a footnote. If licensed project, give project number in footnote.

### TRANSMISSION LINE STATISTICS

- 1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132 kilovolts or greater. Report transmission lines below these voltages in group totals only for each voltage.
- Transmission lines include all lines covered by the definition of transmission system plant as given in the Uniform System of Accounts. Do not report substation costs and expenses on this page.
- 3. Report data by individual lines for all voltages if so required by a State commission.
- 4. Exclude from this page any transmission lines for which plant costs are included in Account 121, Nonutility Property.
- 5. Indicate whether the type of supporting structure reported in column (e) is: (1) single pole, wood or steel; (2) H-frame, wood, or steel poles; (3) tower; or (4) underground construction. If a transmission
- line has more than one type of supporting structure, indicate the mileage of each type of construction by the use of brackets and extra lines. Minor portions of a transmission line of a different type of construction need not be distinguished from the remainder of the line.
- 6. Report in columns (f) and (g) the total pole miles of each transmission line. Show in column (f) the pole miles of line on structures the cost of which is reported for the line designated; conversely, show in column (g) the pole miles of line on structures the cost of which is reported for another line. Report pole miles of line on leased or partly owned structures in column (g). In a footnote, explain the basis of such occupancy and state whether expenses with respect to such structures are included in the expenses reported for the line designated.

### TRANSMISSION LINE STATISTICS (Continued)

- 7. Do not report the same transmission line structure twice. Report lower voltage lines and higher voltage lines as one line. Designate in a footnote if you do not include lower voltage lines with higher voltage lines. If two or more transmission line structures support lines of the same voltage, report the pole miles of the primary structure in column (f) and the pole miles of the other line(s) in column (g).
- 8. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give name of lessor, date and terms of lease, and amount of rent for year. For any transmission line other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or
- shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars (details) of such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the line, and how the expenses borne by the respondent are accounted for, and accounts affected. Specify whether lessor, co-owner, or other party is an associated company.
- Designate any transmission line leased to another company and give name of lessee, date and terms of lease, annual rent for year, and how determined. Specify whether lessee is an associated company.
- 10. Base the plant cost figures called for in columns (j) to (l) on the book cost at end of year.

SUBSTATIONS								

- 1. Report below the information called for concerning substations of the respondent as of the end of the year.
- 2. Substations which serve only one industrial or street railway customer should not be listed below.
- 3. Substations with capacities of less than 10 MVa, except those serving customers with energy for resale, may

be grouped according to functional character, but the number of such substations must be shown.

4. Indicate in column (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended. At the end of the page, summarize according to function the capacities reported for the individual stations in column (f).

ENVIRONMENTAL PROTECTION FACILITIES							

- 1. For purposes of this response, environmental protection facilities shall be defined as any building, structure, equipment, facility, or improvement designed and constructed solely for control, reduction, prevention or abatement of discharges or releases into the environment of gaseous, liquid or solid substances, heat, noise or for the control, reduction, prevention, or abatement of any other adverse impact of an activity on the environment.
- 2. Report the differences in cost of facilities installed for environmental considerations over the cost of alternative facilities which would otherwise be used without environmental considerations. Use the best engineering design achievable without environmental restrictions as the basis for determining costs without environmental considerations. It is not intended that special design studies be made for purposes of this response. Base the response on the best engineering judgment where direct comparisons are not available.

Include in these differences in costs the costs or estimated costs of environmental protection facilities in service, constructed or modified in connection with the production, transmission, and distribution of electrical energy and shall be reported herein for all such environmental facilities placed in service on or after January 1, 1969, so long as it is readily determinable that such facilities were constructed or modified for environmental rather than operational purposes. Also report similar expenditures for environmental plant included in construction work in progress. Estimate the cost of facilities when the original cost is not available or facilities are jointly owned with another utility, provided the respondent explains the basis of such estimations.

Examples of these costs would include a portion of the costs of tall smokestacks, underground lines, and landscaped substations. Explain such costs in a footnote.

- 3. In the cost of facilities reported on this page, include an estimated portion of the cost of plant that is or will be used to provide power to operate associated environmental protection facilities. These costs may be estimations on a percentage of plant basis. Explain such estimations in a footnote.
- 4. Report all costs under the major classifications provided below and include, as a minimum, the items listed hereunder:
  - A. Air pollution control facilities:
    - (1) Scrubbers, precipitators, tall smokestacks, etc.
    - (2) Changes necessary to accommodate use of environmentally clean fuels such as low ash

- or low sulfur fuels including storage and handling equipment
- (3) Monitoring equipment
- (4) Other.
- B. Water pollution control facilities:
  - (1) Cooling towers, ponds, piping, pumps, etc.
  - (2) Waste water treatment equipment
  - (3) Sanitary waste disposal equipment
  - (4) Oil interceptors
  - (5) Sediment control facilities
  - (6) Monitoring equipment
  - (7) Other.
- C. Solid waste disposal costs:
  - (1) Ash handling and disposal equipment
  - (2) Land
  - (3) Settling ponds
  - (4) Other.
- D. Noise abatement equipment:
  - (1) Structures
  - (2) Mufflers
  - (3) Sound proofing equipment
  - (4) Monitoring equipment
  - (5) Other.
- E. Esthetic costs:
  - (1) Architectural costs
  - (2) Towers
  - (3) Underground lines
  - (4) Landscaping
  - (5) Other.
- F. Additional plant capacity necessary due to restricted output from existing facilities, or addition of pollution control facilities.
- G. Miscellaneous:
  - (1) Preparation of environmental reports
  - (2) Fish and wildlife plants included in Accounts 330, 331, 332, and 335.
  - (3) Parks and related facilities
  - (4) Other.
- 5. In those instances when costs are composites of both actual supportable costs and estimates of costs, specify in column (f) the actual costs that are included in column (e).
- 6. Report construction work in progress relating to environmental facilities at line 9.

ENVIRONMENTAL PROTECTION EXPENSES								

- 1. Show below expenses incurred in connection with the use of environmental protection facilities, the cost of which are reported on page 430. Where it is necessary that allocations and/or estimates of costs be made, state the basis or method used.
- 2. Include below the costs incurred due to the operation of environmental protection equipment, facilities, and programs.
- 3. Report expenses under the subheadings listed below.
- 4. Under item 6 report the difference in cost between environmentally clean fuels and the alternative fuels that would otherwise be used and are available for use.
- 5. Under item 7 include the cost of replacement power, purchased or generated, to compensate for the deficiency in output from existing plants due to the
- addition of pollution control equipment, use of alternate environmentally preferable fuels or environmental regulations of governmental bodies. Base the price of replacement power purchased on the average system price of purchased power if the actual cost of such replacement power is not known. Price internally generated replacement power at the system average cost of power generated if the actual cost of specific replacement generation is not known.
- 6. Under item 8 include ad valorem and other taxes assessed directly on or directly relatable to environmental facilities. Also include under item 8 licensing and similar fees on such facilities.
- 7. In those instances where expenses are composed of both actual supportable data and estimates of costs, specify in column (c) the actual expenses that are included in column (b).

### **GENERAL INSTRUCTIONS**

- The completed original of this report form, properly filled out, shall be filed with
  the Public Service Commission, Albany, N.Y., on or before the 31st of March next following the end of
  the year to which the report applies. At least one additional copy shall be retained in the files of
  the reporting utility.
- 2. All utility companies upon which this report form is served are required by statute to complete and to file the report. The statute further provides that when any such report is defective or believed to be erroneous, the reporting utility shall be duly notified and given a reasonable time within which to make the necessary amendments or corrections.
- All accounting terms and phrases used in this form are to be interpreted in accordance with the
  Uniform Systems of Accounts prescribed by this Commission. Whenever the term respondent is used, it
  shall be understood to mean the reporting utility.
- 4. If the report is made for a period other than the calendar year, the period covered must be clearly stated on the front cover and elsewhere throughout the report where the period covered is shown. When operations cease during the year because of the disposition of property the balance sheet and supporting schedules should consist of balances and items immediately prior to transfer (for accounting purposes). If the books are not closed as of that date, the data in the report should nevertheless be complete and the amounts reported should be supported by information set forth in, or as part of the books of account.
- 5. Every inquiry must be definitely answered. If "none" or "not applicable" states the fact, such an answer may be used. The annual report should be complete in itself. Reference to reports of previous years or to any paper or document should not be made in lieu of required entries except as specifically outlined.
- 6. Upon filing, the report may, if desired, be permanently bound. If it is so bound, the requirement for page by page identification of the reporting company set forth in paragraph 9 below, may be disregarded. Extra copies of any page will be furnished upon request.
- 7. If the utility conducts operations both within and without the State of New York, data should be reported so that there will be shown the quantities of commodities sold within this State, and (separately by accounts) the operating revenues from sources within this State, the operating revenue deductions applicable thereto and the plant investment as of the end of the year within this State.
- 8. All entries shall be made in black or dark blue except those of a contrary or opposite nature, which should be made in red or enclosed in parentheses. Inserts, if any, should be appropriately identified with the schedules to which they relate.
- Insert the initials of the reporting utility and the year which the report covers in the space provided on each page.
- 10. Cents are to be omitted on all schedules except where they apply to averages and figures per unit where cents are important. The amounts shown on all supporting schedules shall agree with the item in the statement they support.

# RECONCILIATION BETWEEN FERC, PSC AND STOCKHOLDER'S ANNUAL REPORT

Attach herein (following this page) the respondent's latest annual report to stockholders. If such a report is not prepared, but if audited annual financial statements on which a certified public accountant expresses an opinion are regularly prepared and distributed to bondholders, banking institutions or security analysts, submit that.

If the respondent's annual report to stockholders or audited annual financial statements are prepared on a calendar year basis, the major financial statements contained therein, i.e., Balance Sheet, Income and Retained Earnings Statement and Statement of Cash Flows, shall be reconciled with the corresponding PSC and FERC statements. The reconciliation shall contain an explanation of all differences in reporting.

If the respondent's annual report to stockholders or audited annual financial statements are prepared on a fiscal year basis, then a statement shall be included stating that, except as noted, the major financial statements are prepared on the same basis as in this annual report to the Commission and are in conformity with this Commission's applicable Uniform System of Accounts.

If reports to stockholders or audited annual financial statements are not prepared, so state below:

Since the merger with National Grid, KeySpan Corporation is longer a SEC Registrant and has no outstanding shares, therefore no 10K or annual report to shareholders is required. Additionally, there are no audited financial statements at December 31, 2013.

Annual Report of KeySpan Gas East Corporation d/b/a National Grid

Year ended December 31, 2013

# RECONCILIATION BETWEEN FERC, PSC AND STOCKHOLDER'S ANNUAL REPORT (Continued) (\$000s)

### **NEW YORK INTRASTATE REVENUES**

Show for each department the amount of gross operating revenues derived from New York intrastate utility operations during the year. If these amounts differ from the corresponding revenue figures in the Income Statement, each such difference should be explained in sufficient detail to identify the amounts by detail revenue accounts. It is intended that the amounts shown hereunder shall represent the revenues subject to assessment under Section 18a of the Public Service Law.

### Allocation of Net Plant between Electric, Gas and Other

	Beginning of	End of	Average for	
	Year	Year	Year	Percentages
14 Net Plant - Electric			\$0	0.00%
15 Net Plant - Gas	2,290,150,230	2,408,370,804	2,349,260,517	100.00%
16 Net Plant - Other			0	0.00%
17 Total	\$2,290,150,230	\$2,408,370,804	\$2,349,260,517	100.00%

It should be noted that these calculated common equity returns are not intended as an evaluation of the reasonableness of the earnings of any utility under the jurisdiction of the Public Service Commission. Also, the earned rates of return reported here are not necessarily the same that would be computed in a formal rate proceeding. Differences may occur because the data in formal proceedings are analyzed in detail and adjustments are usually made to booked amounts.

\$93,519

### **MISCELLANEOUS PLANT DATA**

Furnish a summary statement for each of the accounts listed here for each department and for Common Plant if a balance of \$250,000 was carried therein at any time during the year. There should be shown a brief description and amounts, of transactions earned through each such account and, except to the extent that the information is shown elsewhere in this report, opening and closing balances. If any of the property involved has an income producing status during the year, the gross income and applicable expenses (suitably subdivided) should be reported.

Balance, January 1, 2013
Balance, December 31, 2013

110 - Accumulated Provision for Depreciation of Gas Plant Held for Future Use

Balance, January 1, 2013 \$3,939
Depreciation Accrual \$144

Balance, December 31, 2013 \$4,083

## Investments (Account 123 and 124)

- 1. Report below investments greater than or equal to \$250,000 in Accounts 123, Investment in Associated Companies and 124, Other Investments.
- 2. Provide a subheading for each account and list thereunder the information called for, observing the instructions below.
- 3. Investment in Securities List and describe each security owned, giving name of issuer. For bonds give also principal amount, date of issue, maturity, and interest rate. For capital stock state number of shares, class and series of stock. Minor investments may be grouped by classes.
- 4. Investment Advances Report separately for each person or company the amounts of loans or investment advances which are subject to repayment but which are not subject to current settlement. With respect to each advance show whether the advance is a note or open account. Each note should be listed giving date of issuance, maturity date, and specifying whether note is a renewal. Designate any advances due from officers, directors, stockholders or employees.
- 5. For any securities, notes, or accounts that were pledged, designate such securities, notes or accounts and in a footnote state the name of the pledgee and purpose of the pledge.
- 6. If commission approval was required for any advance made or security acquired, designate such fact and in a footnote give date of authorization and case number.
- 7. Interest and dividend revenues from investments should be reported in column (g), including such revenues from securities disposed of during the year.
- 8. In column (h) report for each investment disposed of during the year the gain or loss represented by the difference between cost of the investment ( or the other amount at which carried in the books of account if different from cost) and the selling price therefor, not including any dividend or interest adjustment includible in column (g).

\* If book cost is different from cost to respondent, give cost to respondent in a footnote and explain difference.

# SPECIAL FUNDS (Accounts 125, 126, 128) (Sinking Funds, Depreciation Fund, Other Special Funds)

- 1. For each fund which exceeds \$250,000 at the end of the year, report the balance below. Aggregate all other funds. Indicate nature of any fund included in Account 128, Other Special Funds.
- 2. Explain, for each fund, any deductions other than withdrawals for the purpose for which the fund was created.
- 3. If the trustee of any fund is an associated company, give name of such associated company.
- 4. If assets other than cash comprise any fund, furnish a list of the securities or other assets, giving interest or dividend rate of each, cost to respondent, number of shares or principal amount, and book cost at end of year.

28			-	_		

<sup>4.</sup> Summarize the collection and write-off practices applied to overdue customers' accounts. The respondent endeavors to collect all moneys due the company by making use of collection notices, credit extension, periodic partial payments, assessment of a 1 1/2% per month late charge on past due gas bills (SC Nos 1A,2,3,4A,4b,5,6A,6B,6C,6G,6M,7) and discontinuing service when warranted and after required notice. 90 - 120 days after the discontinuance of service the account is written off as uncollectible. 23 -53 days after discontinuation of service, an account is placed with an outside service for collection and possible legal action.

### **RECEIVABLES FROM ASSOCIATED COMPANIES (Accounts 145, 146)**

- 1. Report particulars of notes and accounts receivable from associated companies at end of year.
- 2. Provide separate headings and totals for Accounts 145, Notes Receivable from Associated Companies, and 146, Accounts Receivable from Associated Companies, in addition to a total for the combined accounts.
- 3. For notes receivable list each note separately and state purpose for which received. Show also in column (a) date of note, date of maturity and interest rate.
- 4. If any note was received in satisfaction of an open account, state the period covered by such open account.
- 5. Include in column (f) interest recorded as income during the year, including interest on accounts and notes held any time during the year.
- 6. Give particulars of any notes pledged or discounted, also of any collateral held as guarantee of payment of any note or account.

### GAS STORED (ACCOUNTS 117, 164.1 AND 164.2)

- 1. Report below the information called for concerning inventory of gas stored.
- 2. The Uniform System of Accounts provides that inventory cost records be maintained on a consolidated basis for all storage projects with separate records showing the MDT of inputs and withdrawals and balance for each project, unless the storage projects are widely separate and the cost of gas therein varies significantly. If the respondent's inventory cost records are not maintained on a consolidated baisis for all storage projects, furnish an explanation of the accounting followed and the reason for the deviation. Separate schedules on this schedule for should be furnished for each group of storage projects for which separate inventory cost records are maintained.
- 3. If during the year adjustment was made of the stored gas inventory, such as to correct for cumulative inaccuracies of gas measurements, furnish an explanation of the reason for the adjustment, the DTH and dollar amount of adjustment and account charged or credited.
- 4. Give a concise statement of the facts and the accounting performed with respect to any encroachment of withdrawals during the year, or restoration of previous encroachment, upon native gas constituting the "gas cushion" of any storage reservoir.
- 5. If the respondent uses a "base stock" in connection with its inventory accounting, give a concise statement of the basis of establishing such "base stock" and the inventory basis and the accounting performed with respect to any encroachment of withdrawals upon "base stock," or restoration of previous encroachment, including brief particulars of any such accounting during the year.
- 6. If respondent has provided accumulated provision for stored gas which may not eventually be fully recovered from any storage project furnish a statement showing: (a) date of Commission authorization of such accumulated provision (b) explanation of circumstances requiring provision (c) basis of provision and factors of calculation (d) estimated ultimate accumulated provision accumulation (e) a summary showing balance of accumulated provision and entries during the year.

### GAS PREPAYMENTS UNDER PURCHASE AGREEMENTS

- 1. Report below the information called for concerning gas prepayments as defined in the text of Account 165, Prepayments.
- 2. If any prepayment at beginning of year, or incurred during year, was cancelled, forfeited, or applied to another purpose, state gas gas volume and dollar amount, period when such prepayment was incurred, accounting disposition of prepayment amount, and give a concise explanation of circumstances causing forfeiture or other disposition of the prepayment.
- 3. Show totals for columns (c), (d), (e), (f) and (h).
- 4. If for any reason a take or pay situation is in controversy, list the amount of those prepayment claims which have not been paid, together with footnote notation that the amount is in controversy (and any explanation the respondent chooses to make.)
- 5. If any prepayment was determined other than by reference to amounts per Mcf or demand-commodity factors furnish a concise explanation of basis of computation.

### **Electric Energy Efficiency Projects**

- A. Show below the costs incurred and accounts charged during the year for electric energy efficiency projects initiated, continued or concluded during the year.
- B. Indicate in column (a) applicable classification, as shown below; list in column (b) the title of projects performed under the classification.

### Classifications (cl.)

- Large scale DSM programs programs which are generally offered to all eligible customers
  throughout the utility's service territory or to large numbers of customers, and which the utility
  undertakes to achieve specific resource planning objectives. This includes audit and
  information programs, even if such programs do not provide resource savings.
- 2. Development and support projects projects which are more limited in scope than the large scale resource programs. The projects are intended to advance the utility's knowledge of, and experience with, specific DSM options. These projects typically do not have specific energy saving or peak reduction objectives assigned to them. These projects may include, but are not limited to, test marketing, data acquisition, and load studies.
- 3. Bidding Programs programs operated by third parties, pursuant to contracts entered into following a broad based demand side RFP process including, but not limited to, those directed by Opinion 88-15.

Show separately the total amount spent during the year for the following programs:

- ULIEEP Utility Low Income Energy Efficiency Programs Separately show all expenditures for programs undertaken to provide energy efficiency services to low income customers, pursuant to the "Order Establishing a Low Income Energy Efficiency Program in Case 89-M-124.
- HIECA Home Insulation and Energy Conservation Act programs All programs and pilot projects operated under the Home Insulation and Energy Conservation Act.
- DSM DSM Incentive Indicate the amount of pre-tax DSM incentive earned during the program year. Indicate whether the amount shown is an estimate or if it has been approved by the Commission.
- C. Show in column (c) all costs incurred for the project during the current year. Show in column (d) the capital or expense account number charged during the year and the amount, if applicable, of annual DSM expense, or the amortized program costs, and in column (e) indicate, the unamortized accumulated DSM expenditure balances.

### **NOTES PAYABLE (Account 231)**

- 1. Report the particulars indicated concerning notes payable at end of year.
- 2. Give particulars of collateral pledged, if any.
- 3. Furnish particulars for any formal or informal compensating balance agreements covering open lines of credit.
- 4. Any demand notes should be designated as such in Column (c).
- 5. Minor amounts may be grouped by classes, showing the number of such amounts.
- 6. Report in total, all other interest accrued and paid on notes discharged during the year.

### PAYABLES TO ASSOCIATED COMPANIES (ACCOUNTS 233 and 234)

- 1. Report particulars of notes and accounts payable to associated companies to end of year.
- 2. Provide separate totals for Accounts 233, Notes Payable to Associated Companies, and 234, Accounts Payable to Associated Companies.
- 3. List each note separately and state the purpose for which issued. Show also in Column (a) date of note, maturity and interest rate.
- 4. Include in Column (f) the amount of any interest expense during the year on notes or accounts that were paid before the end of the year.
- 5. If collateral has been pledged as security to the payment of any note or account, describe such collateral.

### **OPERATING RESERVES (ACCOUNTS 228.1, 228.2, 228.3, 228.4)**

- 1. Report below an analysis of the changes during the year for each of the above-named reserves.
- 2. Show title of reserve, account number, description of the general nature of the entry and the contra account debited or credited. Combine the amounts of monthly accounting entries of the same general nature. If respondent has more than one utility department, contra accounts debited or credited should indicate the utility department affected.
- 3. For Accounts 228.1, Accumulated Provision for Property Insurance and 228.2, Accumulated Provision for Injuries and Damages, explain the nature of the risks covered by the reserves.
- 4. For Account 228.4, Accumulated Miscellaneous Operating Provisions, report separately each reserve comprising the account and explain briefly its purpose.

#### **MISCELLANEOUS TAX REFUNDS**

- 1. Report below particulars concerning all tax refunds received or used as a reduction of taxes payable during the year which are not more than \$1.5 million or do not exceed \$1,000 and 0.2% of the utility's operating revenues. This information is requested in compliance with Section 89.3, Notification Concerning Tax Refunds, of 16NYCRR. This report shall be inapplicable to ordinary operating refunds that are not attributable to negotiation or to new legislation, adjudication, or rulemaking ( such as refunds for overpayment of estimated taxes, and carrybacks of net operating losses and investment tax credits).
- 2. In determining whether a refund exceeds 0.2% of operating revenues for purposes of this report, in the case of a gas, electric, steam, or combination utility, operating revenues shall be reduced by the amounts properly chargeable to the functional group of Production Operation and Maintenance expense accounts; in the case of a combination utility the refund shall be deemed to exceed 0.2% of operating revenues if, after the refund is allocated among the gas, electric and steam departments in a manner reflecting insofar as possible the extent to which the refund is related to each department's activities, one or more of the portions thus allocated exceeds 0.2% of the operating revenues of the department to which it is allocated.
- 3. In determining whether a refund meets the criteria stated in Instruction 1 above, multiple refunds shall be treated as a single refund if they share a common cause such as a common act of negotiation legislation, adjudication or rulemaking.
- 4. In this report, the utility also shall either propose a method of distributing to its customers the entire amount refunded, or show why it should not make such a distribution.

### Excess/Deficient Deferred Federal Income Tax Balances\*

- 1. Report below the specified excess/deficient accumulated deferred Federal income taxes as of December 31 of the reporting year.
- 2. Protected amounts are accumulated deferred taxes that are depreciation related and are protected from rapid write-back by Section 203 (e) of the Tax Reform Act of 1986.
- 3. Unprotected amounts are those accumulated deferred taxes that are not subject to Section 203 (e) of the Tax Reform Act of 1986.
- 4. Excess/deficient deferred taxes result when there is a reduction/increase in the statutory income tax rate (e.g., TRA-86 & Revenue Reconciliation Act of 1993) & the deferred tax balances provided are greater/less than the enacted tax rate, all calculated on a vintage year basis.

### CHARGES FOR OUTSIDE PROFESSIONAL AND OTHER CONSULTATIVE SERVICES

- 1. Report the information specified below for all charges made during the year included in any account (including plant accounts) for outside consultative and other professional services. These services include rate, management, construction, engineering, research, financial, valuation, legal, accounting, purchasing, advertising, labor relations, and public relations, rendered the respondent under written or oral arrangement, for which aggregate payments were made during the year to any corporation, partnership, organization of any kind, or individual (other than for services as an employee or for payments made for medical and related services) amounting to more than \$20,000 in the case of a Class B company or \$200,000 in the case of a Class A company, including payments for legislative services, except those which should be reported in Account 426.4, Expenditures for Certain Civic, Political and Related Activities.
  - (a) Name of person or organization rendering services in alphabetical order,
  - (b) description of services received during year and project or case to which services relate,
  - (c) total charges for the year.

2. Designate with an asterisk associated companies.

### **Employee Protective Plans**

Report a summary of each employee program in effect at any time during the year. This schedule is intended to cover pension, profit sharing, group life insurance, accident and sickness, medical, hospital, prescription drugs, guaranteed annual wage, severance pay, and any other plan maintained for employees (or retirees), but it is not intended to cover such a plan required by law, (e.g. social security).

### For each plan report:

- 1. the identity thereof, and the employee group covered (e.g. management, non-management, executive officers, etc.)
- 2. whether the benefits are provided through an insurance carrier or directly by the company.
- 3. the total cost for the year.

Note: If any important change is made with respect to any such plan during the year, give brief particulars.

LIFE INSURANCE PLAN - These are various group term life insurance plans covering regular non-union and union employees as well as eligible retirees.	667,261
MEDICAL CARE PLAN - Various medical plans available to eligible union and non-union employees and their eligible dependents, eligible retirees and surviving spouses and their eligible dependents. These plans are contributory and are self-insured.	14,541,362
PENSION PLAN - This is a non-contributory plan providing retirement allowances for eligible employees.	19,859,022
EMPLOYEE WELFARE PROGRAMS AND OTHER- These programs include expenses incurred in conducting employees' educational, recreational and other welfare programs. The programs provide services for both represented and non-represented employees.	(25,51.51)
DENTAL PLAN - This consists of various self-insured dental plans available to regular full and part-time union and non-union employees.	688,812
Total	35,756,457

#### **ANALYSIS OF PENSION COST**

- 1. On lines 1-21 report the terms of the Pension Plan for the holding company or parent company; on lines 22-32 report details for the reporting company. If the reporting company has more than one pension plan, report each using separate forms.
- 2. Report on line 1 the actuarial present value of benefits determined as of a specific date during the calendar year according to the terms of a pension plan and based on employees' compensation and service to that date (salary progression is not considered in making this computation).
- 3. Report on line 2 the actuarial present value of all benefits attributed to employee service up to a specific date, based on the terms of the plan including salary progression factor for final pay and career average pay plans.
- 4. Report on line 3 the amount the pension plan could expect to receive for investments in a sale between a willing buyer and a willing seller, other than in a forced or liquidation sale.
- 5. Report on line 8 the discount rate which was used to calculate the obligations reported on Lines 1 and 2.
- 6. Report on Line 9 the expected long-term return on plan assets.
- 7. Report on line 14 the net asset gain or loss deferred during the reporting year for later recognition. Do not include in this amount amortization of previously deferred gains or losses as these amounts are to be reported on line 17.
- 8. Report on lines 19 through 21 and lines 29 through 32 the number of persons covered by the plan at the beginning of the policy year.
- 9. Report on line lines 21 and 32 the numbers of persons having vested pension rights but who are no longer employed by the company and not yet drawing a pension allowance.
- 10. On line 22, the term "Minimum Required Contribution" shall mean the payment by the employer to its employees' pension fund necessary to meet the requirement set forth in the Employee Retirement Income Security Act of 1974.
- 11. On line 24, the term "Maximum Amount Deductible" shall mean the amount of pension expense that is allowable under Section 415 of the Internal Revenue Code.
- 12. Report on line 26 the dollar amount applicable to the reporting company which has been included in the amount on line 18.
- 13. Report on line 27 the dollar amount included on line 26 which has been capitalized.

For each plan, specify and explain in the space below any accounting changes or changes in assumptions or elected
options made during the reporting year. Quantify the effects of each such revision on each of the amounts reported on
Page **. Use a separate insert sheet if more space is required.

<sup>\*</sup> Specify in the space below the reason(s) for any difference between the amounts reported on lines 23(b) and 24(b).

Note: It is acceptable to provide a specific reference to the information already contained in the notes to the financial statements.

#### ANALYSIS OF PENSION SETTLEMENTS, CURTAILMENTS AND TERMINATIONS

- 1. Report the amount of gains or losses arising from employee termination benefits or settlements, partial settlements, curtailments or suspensions of pensions or pension obligations during the year. If none have occurred, state "none" on line 5. If they qualified as "small settlements" under SFAS-88 and the company elected not to recognize the gain or loss, state "none" on line 5 and complete the applicable sections on the bottom of the form. Use separate forms to report the effect of each event and, if the event affected more than one plan, use separate forms for each plan. These events include:
  - a. purchases of annuity contracts.
  - b. lump-sum cash payments to plan participants.
  - c. other irrevocable actions that relieved the company or the plan of primary responsibility for a pension obligation and eliminates significant risks related to the obligation and assets.
  - d. an event that significantly reduces the expected of years future service for present employees who are entitled to receive benefits from that plan or that eliminates the accrual of benefits for some or all of the future services of a significant number of those employees.

If this is the first year the company is subject to the reporting requirements of this schedule, complete separate forms for each reportable event having occurred since the company's adoption of SFAS-87 and include those forms in the current Annual Report.

- On lines 1-15 report activities for the holding company or parent company; on line 16-18 report details for the reporting company.
- Report on line 1 the amount of overfunding remaining (excess of plan assets, adjusted for accrued or prepaid pension
  costs, over the Pension Benefit Obligation), if any, from when the company first complied with SFAS-87. The amount
  should be adjusted by the year-to-date amortization.
- 4. Report on line 2 the actuarial gains and losses that occurred in prior fiscal years following compliance with SFAS-87 but have not yet been amortized. The amount should be adjusted by the year-to-date amortization.
- 5. Report on line 3 the actual return on plan assets (the sum of investment income and appreciation).
- 6. Report on line 4 the expected return on plan assets (a component of the current-year expense calculation, which should be prorated for the elapsed portion of the current year).
- 7. Report on line 6 the Pension Benefit Obligation (PBO) updated from the previous year-end figure to the settlement date. This amount should reflect the addition of a pro rata portion of the service cost and interest cost and the subtraction of benefit payments. It should also reflect any plan changes made during the year.
- 8. Convert the basis points and percentages reported on line 7 and 8 to their decimal equivalents before entering them in the formula on line 9.
- 9. Report on line 17 the applicable Federal income tax rate. Although no tax is currently payable on the gain and loss, it should be reflected because it represents a reduction of future pretax pension expense.

State separately below for each reportable event having occurred since the company's initial compliance with SFAS-87, and for which amortization of deferred gains or losses was not completed by December 31 of last year, the (1) type of event, e.g. settlement or curtailment, (2) date of occurrence, (3) amount of gain or loss originally deferred, (4) period of amortization specified by beginning and ending dates, and (5) amount of the current year's amortization.

### ANALYSIS OF OPEB COSTS, FUNDING AND DEFERRALS

- 1. Report on pages \*\* through \*\*, the requested data concerning Postretirement Benefits Other than Pensions (OPEB). For these schedules, the measurement date, calculation of the data requested, and separate reporting for different types of OPEB plans shall be consistent with the disclosure requirements specified in SFAS-106 (Paragraphs 72-89). If the reporting company's OPEB benefits are provided through a joint plan with its parent company or holding company, report under the columnar heading "Total Company" the data applicable to the total plan (i.e., that of the parent or holding company). The columnar heading "New York State Jurisdiction" refers to the New York State jurisdictional operations of the reporting company, exclusive of amounts applicable to subsidiary companies which are subject to the Commission's jurisdiction but are separately reported.
- 2. The quantification of amounts reported on Lines 1 12 shall be as of the date reported on Line 13.
- 3. Report on Lines 1 3 the actuarial present value of benefits attributed employees' service rendered to the date reported on Line 13.
- 4. Report on Line 4 the amount the OPEB plan(s) could expect to receive for investments in a sale between a willing buyer and a willing seller, other than in a forced or liquidation sale.
- 5. Report on Lines 5 and 6, the amounts applicable to OPEB that are recorded in internal reserves, net of their related deferred income tax effect. For New York State Jurisdictional Operations, creation of an internal reserve was required by the Commission's "Statement of Policy and Order Concerning the Accounting and Ratemaking Treatment for Pensions and OPEB" (issued September 7, 1993).
- 6. Report on Line 10 the amount of unrecognized net gain or loss (including plan asset gains and losses not yet reflected in the market-related value of the plan assets).
- 7 Report on Line 11 the amount of unrecognized net asset gain or loss not yet reflected in the market-related value of plan assets.
- 8. In certain instances, a portion of the New York State Jurisdiction OPEB internal reserve may not be subject to the accrual of interest (e.g. in the company's last rate case a portion of the reserve may have been used to reduce rate base). Report on Line 12 the balance of the reserve, net of its related deferred income tax effect, which is subject to the accrual of interest.
- 9. Report on Line 14 the discount rate which was used to calculate the obligations reported on Lines 1-3.
- 10. Report on Line 15 the expected long-term return on plan assets reported on Line 4.
- 11. Report on Line 21 the net asset gain or loss deferred during the reporting year for later recognition. Do not include in this amount amortization of previously deferred gains or losses as these amounts are to be reported on Line 24.
- 12. The amount reported on Line 24 is to include the amortization of gains and losses arising from changes in assumptions.

For each plan, specify and explain in the space below any accounting changes or changes in assumptions or elected options made during the reporting year. Quantify the effects of each revision on each of the amounts reported on Page \*\*. Use a separate insert sheet if more space is necessary.

<sup>\*</sup> Specify the source of any amount reported on Line 4.

(A)-Includes unfunded plan benefit payments as a pass-through.

<sup>\*\*</sup> Specify the type and amount of any expenses reported on Line 8.

### **ANALYSIS OF OPEB COSTS, FUNDING AND DEFERRALS (Continued)**

- 1. The data requested on Lines 1 through 12 are for the internal reserve, the establishment of which is required by the Commission's "Statement of Policy and Order Concerning the Accounting and Ratemaking Treatment for Pensions and Postretirement Benefits Other Than Pensions" (Case 91-M-0890, issued and effective September 7, 1993). The amounts reported below are to be consistent with the definitions and intent contained in that Statement.
- 2. The "rate allowance" to be reported on Line 2 is the amount which was projected to be charged to expense accounts (i.e., not charged to construction, depreciation, nor the rate base allowance related to capitalized OPEB costs) in the company's latest rate proceeding, adjusted to actual applicable sales as per the above Policy Statement.
- 3. The amount reported on Line 9 less the amount on Line 10 should total the amount reported on Line 5 of Page 33.
- 4. In certain instances, a portion of the OPEB internal reserve may not be subject to the accrual of interest (e.g., in the company's last rate case, a portion of the reserve may have been used as a rate base reduction). Report on Line 12 the balance of the reserve, net of its related deferred income tax effect, which is subject to the accrual of interest.
- 5. The Commission's September 7, 1993 Policy Statement on pensions and OPEB stated that, except under certain circumstances, the difference between 1) the rate allowance for OPEB expense, plus any pension related or other funds or credits the company is directed to use for OPEB purposes, and 2) OPEB expense determined as required therein, are to be deferred for future recovery. Report on Lines 13 through 17 the amounts relating to this requirement.

### SALES OF ELECTRICITY BY COMMUNITIES

 Report below the information called for concerning sales of electricity in each community with a population of 50,000 or more, or according to open districts or divisions constituting distinct economic areas if the respondent's records do not readily permit reporting by communities. If reporting is not by communities, the territory embraced within the reported area shall be indicated. Except for state boundaries, community areas need not hold rigidly to political boundaries and may embrace a metropolitan area and immediate environs.

### DATA BY TERRITORIAL SUBDIVISIONS-ELECTRIC

Report the indicated breakdown of operating revenue deductions and plant investment applicable respectively to accounting divisions and cost areas. Accounts, or groups of accounts, which may be kept on a company-wide basis on order of the Commission should be shown as separate single items. If the boundaries of a "cost area" are not apparent from entries in column (f), or are not otherwise a matter of record with the Commission, a reasonably complete description should be furnished. No breakdown by primary accounts is required for columns (g) and (h).

### **DISTRIBUTION SYSTEM**

- 1. Report the indicated particulars of the electric distribution system as of the end of the year, including street and highway lighting system.
- 2. For the purposes of this schedule the interpretation of the term "distribution area" shall be at the discretion of, and the responsibility of, the reporting utility. In general when the territory served covers considerable area these subdivisions should be selected so that, from territorial and rate standpoints, the data reported will be of reasonable significance. Entries in column (a) should reflect the approximate geographical extent of the individual subdivision.
- 3. Entries in column (b) may be based on estimates and those in column (c) should exclude switching and voltage regulator stations. Entries in columns (d) and (e) should not include services.

### **DISTRIBUTION SYSTEM (Continued)**

4. Show hereunder a brief general statement in description of the distribution system. Indicate particularly the range of operating voltages and the sizes of wire generally used for different purposes (primaries, secondaries, services, etc.) and under differing circumstances. Show also the approximate percentages of network system, of rural lines, of direct current facilities, and of alternating current service rendered at other than a 60-cycle frequency. Identify exceptions to customary practices (i.e. the last two items in the preceding sentence) with applicable distribution areas.

# **NUCLEAR PLANT DECOMMISSIONING (GENERAL INFORMATION)**

- 1. Report the following information for each nuclear generating station owned by the company (either as a sole owner or as a co-tenant).
- 2. For plants that are jointly owned with other utilities, only show the portion that relates to the ownership interest of the reporting company.

Line	Description	Plant	Plant
No.	(a)	(b)	(c)
	Name of Nuclear Generating Station	(0)	(6)
2	Percentage of Ownership		
	Date Placed in Service		
4	Estimated date plant to be retired from Plant in Service (month/year)		
5	Estimated life of plant in years (line 4 - line 3)		
6	Estimated date decommissioning will begin (month/year)		
	Estimated duration of decommissioning in years		
8	Proposed method of decommissioning		
	Estimated total cost of decommissioning based on Nuclear Regulatory		
9	Commission (NRC) minimum financial assurance requirements at time		
	rates were last granted.		
	Estimated total cost of decommissioning used as the basis for setting		
10	the allowance in the last rate proceeding.		
	Inflation factor used		
	Nuclear Regulatory Commission minimum financial assurance		
	requirements based on the latest calculation available using NRC		
	inflation factors.		
	Ending date of calculation period		
	Inflation factor used		
4.5	Estimated number of years in which to accumulate the Nuclear		
15	Regulatory Commission's minimum financial assurance requirements.

#### NUCLEAR PLANT DECOMMISSIONING FUNDING

- 1. Report the following information concerning each nuclear decommissioning fund for each nuclear generating station owned by the company (either as a sole owner or as a co-tenant).
- 2. For plants that are jointly owned with other utilities, only show the portion that relates to the ownership interest of the company.
- 3. Submit a separate schedule for each ownership interest in a nuclear generating station owned by the utility.
- 4. Submit a copy of the investment manager's/trustee's report that shows the activity and valuation of the various decommissioning funds.
- 5. Where the fund is managed by more than one investment manager or trustee, list the actual fund earnings percentage included on line 20 for each investment manager or trustee below, or as an attachment.

Line	Description	Internal	QNDF	NQNDF	Total		
No.	(a)	(b)	(c)	(d)	(e)		
1	Name of Nuclear Generating Station:						
2	Fund Balance, January 1 (Book Value)				\$0		
3	Additions During Year:						
4	Utility Contributions				0		
5	Fund Net Earnings:						
6	Investment Earnings				0		
7	Less: Management Fees				0

15	Total Reductions	\$0	\$0	\$0	\$0		
16	Fund Balance, December 31 (Book Value)	\$0	\$0	\$0	\$0		
17	Fund Balance, January 1 (Market Value)				\$0		
18	Fund Balance, December 31 (Market Value)				\$0		
	OVERALL EARNINGS COMPARISON:						
19	Actual Fund Earnings Percentage (line 6/ Average of lines 2	? & 16)					
20	20 Earnings rate assumption on which current revenue requirement is based						
	FUND COMPARISON:						
21	Percentage of NRC Minimum Financial Assurance accumula	ated					
	as of December 31 (line 17, columns c & d/[pg 46, line 12])						

#### Notes:

- 1. "Internal" above relates to the internal method of accumulating funds for decommissioning nuclear generating stations. In this method, the company retains control of the funds so provided until needed for actual decommissioning.
- 2. "QNDF" above is defined as a Qualified Nuclear Decommissioning Fund and relates to an external method of accumulating funds for decommissioning nuclear generating stations that is authorized by Section 1.468A of the Internal Revenue Code (IRC). In this method, the money invested in the fund by the company is controlled by an outside trustee and can only be used for decommissioning purposes. This fund qualifies for a current Federal income tax deduction.
- 3. "NQNDF" above is defined as a Non-Qualified Nuclear Decommissioning Fund and relates to an external method of accumulating funds for decommissioning nuclear generating stations. In this method, the money invested in the fund by the company is controlled by an outside trustee and can only be used for decommissioning purposes. This fund does not qualify for a current Federal income tax deduction

### NUCLEAR PLANT DECOMMISSIONING FUNDING

- 1. Report the following information concerning each nuclear decommissioning fund for each nuclear generating station owned by the company (either as a sole owner or as a co-tenant).
- 2. For plants that are jointly owned with other utilities, only show the portion that relates to the ownership interest of the company.
- 3. Submit a separate schedule for each ownership interest in a nuclear generating station owned by the utility.
- 4. Submit a copy of the investment manager's/trustee's report that shows the activity and valuation of the various decommissioning funds
- 5. Where the fund is managed by more than one investment manager or trustee, list the actual fund earnings percentage included on line 20 for each investment manager or trustee below, or as an attachment.

<sup>62</sup> 

These field retirements will be processed in calendar year 2014 in the Powerplant Fixed Assets System.

<sup>\*</sup> Due to new system implementation and conversion issues, retirement data related to Main and Services been included in this filing on a proforma basis.

### ACCUMULATED PROVISIONS FOR DEPRECIATION OF GAS PLANT IN SERVICE (Account 108)

- 1. Report below the information called for concerning accumulated provisions for depreciation and amortization of gas plant in service at end of year and changes during year.
- 2. Explain any important adjustments during year.
- 3. Explain any difference between the amount for book cost of plant retired, line 14, column (b) and that reported in the schedule for gas plant in service, pages 60-62, column (d) exclusive of retirements of nondepreciable property.
- 4. The provisions of account 108 of the Uniform System of Accounts contemplate that retirements of depreciable plant be recorded when such plant is removed from service. There shall be included in this schedule the amounts of plant retired removal expenses, and salvage on an estimated basis if necessary with respect to any significant amount of plant actually retired from service but for which appropriate entries have not been made to the accumulated provision for depreciation account. The inclusion of these amounts in this schedule shall be made even though it involves a journal entry in the books of account as of the end of the year recorded subsequent to closing of respondent's books. See also note on page 62.
- 5. In section B show the amounts applicable to prescribed functional classifications.

A. BALANCES AND CHANGES DURING YEAR GAS PLANT IN SERV LINE (ACCOUNT 108) ITEM NO. (a) (b) 1 Balance beginning of year 634,739,140 Depreciation provisions for year, charged to:

#### **GAS OPERATING REVENUES (Account 400)**

- 1. Report below gas operating revenues for the year for each account.
- 2. Natural gas means either natural gas unmixed or any mixture of natural and manufactured gas.
- 3. Number of customers, columns (h) and (i), should be reported on the basis of meters, plus number of flat rate accounts, except that where separate meter readings are added for billing purposes, one customer should be counted for each group of meters so added. The average number of customers means the average of twelve figures at the close of each month. If customer count in the residential and commercial classifications includes customers counted more than once because of special services, such as space heating, etc., indicate in a footnote the number of such duplicate customers included in each of the two service classifications.
- 4. Quantities of natural gas sold should be reported in Dth. If billings are on a therm basis, the B.t.u. content of the gas sold should be given, and the sales converted to Dth. for the purpose of this report.
- 5. If increase or decrease from preceding year columns (e), (g) and (i) are not derived from previously reported figures, explain any inconsistencies.

6. Commercial and Industrial Sales, Account 481, should be classified according to the basis of classification (Small or Commercial, and Large or Industrial) regularly used by the respondent.

**BILLING ROUTINE - GAS** 

Report the following information in days for Accounts 480 and 481:

- 1. The period for which bills are rendered. 2. The period between the date meters are read and the date customers are billed.
- 3. The period between the billing date and the date on which discounts are forfeited.

### SALES OF NATURAL GAS BY COMMUNITIES

1. Report below the information called for concerning sales of gas in each community of 50,000 population or more, or according to operating districts or divisions constituting distinct economic areas if the respondent's records do not readily permit reporting by communities. Except for state boundaries, community areas need not hold rigidly to political boundaries and may embrace a metropolitan area and immediate environs. Include in this schedule field and main line sales to commercial and industrial customers.

### SALES OF NATURAL GAS BY COMMUNITIES (CONTINUED)

2. Natural gas means either natural gas unmixed, or any mixture of natural and manufactured gas. Designate, however, those communities in which mixed gas is sold. In a footnote state the components of mixed gas, i.e.. whether natural and oil refinery gases, natural and coke oven gases, etc., and specify the approximate percentage of natural gas in the mixture. When gases having substantially different thermal characteristics are regularly distributed separate data should be reported with respect to each.

### **REVENUE FROM TRANSPORTATION OF GAS OF OTHERS - NATURAL GAS (Account 489)**

- 1. Report below particulars concerning revenue from transportation or compression by respondent of natural gas of others. Report the indicated particulars of sales for redistribution during the year. For other than straight natural gas,
- 2. Natural gas means either natural gas unmixed, or any mixture of natural and manufactured gas. Designate, however, if gas transported or compressed is other other natural gas.
- 3. In column (a) give names of companies from which revenues were derived, points of receipt and delivery, and names of companies from which gas was received and to which delivered.
- 4. Points of receipt and delivery should be so designated that they can be identified on map of the respondent's pipeline system.

Line No.	Name of Company and Description of Service Performed (Designate associated companies)  (a)	Distance Transported (b)	Dth. Received (c)	Dth. Delivered (d)	Revenue (e)	Avg. rev. per Dth. of gas delivered (f)

#### SALES OF GAS BY RATE SCHEDULES

- Report below for each rate schedule in effect during the year the Dth of gas sold, revenue, average number of customers, average Dth per customer and average revenue per Dth.
- 2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in schedule entitled "Gas Operating Revenues" page 64. If the sales under any rate schedule are classified in more than one revenue account list the rate schedule and sales data under each anolicable revenue account subheading.
- data under each applicable revenue account subheading.

  3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
- 4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
  5. For any rate schedule having an adjustment clause for purchased or other gas, state in a footnote the estimated additional revenue billed
- For any rate schedule having an adjustment clause for purchased or other gas, state in a footnote the estimated additional revenue billed pursuant thereto.

#### NUMBER OF GAS DEPARTMENT EMPLOYEES

- 1. The data on number of employees should be reported for the payroll period ending nearest to October 31, or any payroll period ending 60 days before or after October 31.
- 2. If the respondent's payroll for the reporting period includes any special construction personnel, include such employees on line 3, and show the number of such special construction employees in a footnote.
- 3. The number of employees assignable to the gas department from joint functions of combination utilities may be determined by estimate, on the basis of employee equivalents. Show the estimated number of equivalent employees attributed to the gas departm

1.	Payroll Period ended (Date)	12/31/13

#### PURCHASED GAS (Account 800 thru 805)

- Report below particulars of purchases for redistribution during the year.
   Minor purchases and borderline purchases, appropriately designated, may be grouped and entries in column (b) and (c) may be omitted.
   For manufactured gas, entries in column (d) should reflect the specific process to the extent such information is available.

## **CONTRACTS FOR PURCHASE OF GAS**

- 1. Show a brief summary of the terms of contract in effect during the year with the principal supplier (or suppliers if there were more than one, but in any case limited to the two largest) listed in the preceding schedule.
- 2. Show particularly the provision covering the determination of charges (including pressure base) the expiration date, delivery pressure and imminent charges.

Supplier	Contract daily demand		Demand per month	Commodity	Injections & withdrawal	Expiration date	Number of rate charges within year
BP Energy 110869	45,000 dth	11/01/12	N/A	N/A	N/A	10/31/2013	N/A
Tenaska Marketing 110849	50,000 dth	11/01/12	N/A	N/A	N/A	10/31/2013	N/A

Confidential

## **EXCHANGE GAS TRANSACTIONS**

(Account 806, Exchange Gas)

- 1. Report below particulars concerning the gas volumes of natural gas exchange transactions during the year. Minor transactions may be grouped.

  2. Points of receipt and delivery of gas should be so indicated that they may be readily identified on a map of the respondent's pipeline system.

	Name of Company (Designate associated companies)	Exchange Gas Received		Exchange Gas Delivered		Excess Dth.

#### TRANSMISSION AND COMPRESSION OF GAS BY OTHERS (Account 858)

- 1. Report below particulars concerning gas transported or compressed for respondent by others and amounts of payments for such services during the year.
- 2. In column (a) give name of companies to which payments were made, points of delivery and receipt of gas, names of companies to which gas was delivered and from which received.
- 3. Points of delivery and receipt should be so designated that they can be identified readily on map of respondent's pipeline system.

4. If the Dth. of gas received differs from the Dth. delivered, explain reason for difference, i.e., uncompleted deliveries, allowance for transmission loss, etc

#### **DEPRECIATION AND AMORTIZATION OF GAS PLANT**

(Account 403, 404.1, 404.2, 404.3, 405) (Except Amortization of Acquisition Adjustments)

- 1. Report in Section A for the year the amounts of depreciation expense, depletion and amortization for the accounts indicated, classified according to the plant functional groups shown.
- 2. Report in Section B the bases and rates used by the respondent to determine charges for depletion and amortization of gas plant for the year for accounts 404.1, 404.2, 404.3 and 405 whether any changes have been made in the bases or rates from those used for the preceding year.
- Complete reporting of all available information called for in columns (a) through (g) of Section C shall be made for report year 1972, thereafter report only annual changes to columns (c) through (g). Complete reporting is again required for report year 1974 and every year thereafter with only annual changes to columns (c) through (g) to be shown in the intervals between complete reporting. List numerically in column (a) each plant subaccount or account as appropriate, to which a rate is applied. Identify at the bottom of Section C the type of plant included in any subaccounts used. In column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional classifications and showing a composite total. Indicate at the bottom of Section C the manner in which column (b) balances are obtained. If average balances, state the method of averaging used. For columns (c), (d) and (e) report available information for each plant subaccount or account listed in column (a). Identify those accrual periods shown in column (c) which are based upon the life of associated gas reserves or gas supply contract. If mortality studies are prepared to assist in estimating service lives, show in column (f) the type mortality curve selected as most appropriate for the account and in column (g) the weighted average age of surviving plant. Where the unit-of-production method is used to determine depreciation charges, show at the bottom of Section C any revisions made to estimated gas reserves.
- 4. If provision for depreciation were made during the year in addition to depreciation provided by application of reported rates, state at the bottom of Section C the amounts and nature of the provisions and the plant items to which related.

#### **DATA BY TERRITORIAL SUBDIVISIONS - GAS**

Report the indicated breakdown of operating revenue deductions and plant investment applicable respectively to accounting divisions and cost areas. Accounts, or groups of accounts, which may be kept on a company-wide basis on order of the Commission should be shown as separate single items. If the boundaries of a "cost area" are not apparent from entries in column (f), or are not otherwise a matter of record with the commission, a reasonably complete description should be furnished. No breakdown by primary accounts is required for columns (g) and (h).

#### PRODUCTION PLANT STATISTICS

Report the indicated data relating to the operation of each gas producing plant. Entries on lines 1 to 12 should not include purchased gas which has been directly mixed but should include gas which has been reformed. Entries on lines 8 to 12 should include the principal fuels used, and it may be advisable to use more than one column for lines 1 to 22 when more than one kind of gas is produced at a single plant.

2. Show the extent to which the wells included above are	e owned or leased	
--	-------------------	--

#### **NATURAL GAS GATHERING LINES**

1. Report the indicated particulars of pipeline carried in Account 332 at the end of the year and of similar property held under lease, distinguishing between the two by suitable entries in columns (a) and (d). Show lengths in feet in columns (b), (c), (e) and (f).

Line No.	Designation of Field (a)	3" and Less (b)	Over 3" (c)	Designation of Field (d)	3" and Less (e)	Over 3" (f)

<sup>2.</sup> If at the end of the year any gathering line included above (and used for conveying gas) was operated at a pressure in excess of 125 psig, show hereunder the total length of such line segregated on the basis of nominal diameter in inches.

#### TRANSMISSION SYSTEM

- 1. Show a description of the transmission system at the end of the year disregarding comparatively insignificant branches. The latter should be summarized on the basis of size and length and shown hereunder as a separate item. Show particularly points of origin and termination, distances in miles, sizes of pipe, operating pressures, and principal compressing, regulating, and measuring stations. In completing this schedule use of a map is permissible. Leased facilities should be included and designated as such.
- 2. If any transmission line which is operated at a pressure in excess of 125 p.s.i.g. is summarized in this schedule as permitted by Paragraph 1, or if the total length of such line segregated on the basis of nominal diameter in inches is not indicated in the detail portion of reported data, such information should be set forth in a footnote.

```
FOOTNOTES
(1) Using minimum actual yields
(2) Calculated using S=2T
(3) Not certified. Letter to PSC (1-54) contained pipeline analysis only.
(4) Pipeline analysis same as submitted for initial installation.
(5) These figures (cost per foot) are only for the pipeline system and do not include auxiliary equipment.
(6) Letter of certification (certification date) cannot be found.
 (7) These selections were recertified on 1/26/88 after incremental increases in pressure completed 10/23/87 under W.O.-46139.
(8) These lines did not require recertification, but were also subjected to the recertification process, under W.O.-46139.
(9) Line installed by outside contractor as part of cojeneration project.
(10) Minimum allowable wall thickness as per API Spec. 5L.
(11) Minimum allowable wall thickness as per API Spec. 5L.
(12) Longitudinal joint de-rating factor must be used in all design & repair calculations

Rev. 12/7/93

Rev. 02/05/93, sk Rev. 6/26/96 - Added Reference Drawing Numbers - RJV

Rev. 12/29/98 - Added 1998 Projects Rev. 3/24/00 - Added 1999 projects

Rev. 2/20/01 - No new 2000 projects were gassed in.

Rev. 03/04/91

Rev. 9/20/01 - Added 2000 & 2001 projects

Rev. 6/26/02 - Format change Rev. 9/20/02 - Added North Port and NYPA power plant projects

Rev. 1/9/03 - Added 2002 projects

Rev. 6/01/04 - Added 2003 projects:updated work orders 48533,48556,48929,49068 to reflect upgrade; 42162 to reflect higher operating pressure

Rev. 6/05 Added 2004 projets. Rev. 12/2005 - Revised footages on 42057, 48556, 481014, 49324, 49061, 42162.

Rev. 2/23/06 Added 2005 projects

Rev. 10/2006 To check & correct %SMYS, to add and to include work order T100396786

Added T100806822 Commack To Brentwood - installed to supply Caithness Plant. Also revised 41521 to 5 sections based on 350 and 450 PSI MAOP. Rev 1/09

#### **DISTRIBUTION SYSTEM**

- 1. Report the indicated particulars of the gas distribution system at the end of the year. Entries in columns (b) to (f) should reflect the number of units installed, but if any substantial number of such units had no prospective use, particulars should be shown. Entries in columns (g) and (h) may be restricted to a summary of mains for the company as a whole. Leased facilities should be included and designated as such.
- 2. For the purposes of this schedule the interpretation of the term "distribution area" shall be optional with, and the responsibility of, the reporting utility. In general when the territory served covers considerable area these subdivisions should be selected so that, from territorial and rate standpoints, the data reported will be of reasonable significance. Entries in column (a) should reflect the approximate geographical extent of the individual subdivisions.

#### GAS ACCOUNT

1. Report the indicated summarizationof gas transactions for the year, excluding gas which was reformed bnut not gas which was used for direct mixing; the former should be treated as fuel. If mixed gas is distributed, it should be shown as such in columns (d) to (f), but the constituent gases should be identified by production processes in columns (a) to (c) unless mixed gas was purchased. Exclude liquid petrolem in storage. Items representing quantities of gas should agree with the corresponding amounts shown elsewhere in this report.
