

QUARTERLY FINANCIAL REPORT

ELECTRIC AND/OR GAS CORPORATIONS - CLASSES A AND B

REPORT OF NIAGARA MOHAWK POWER CORPORATION

FOR THE QUARTER ENDED SEPTEMBER 30, 2015

TO THE

STATE OF NEW YORK

PUBLIC SERVICE COMMISSION

INSTRUCTIONS

1. Every electric and every gas corporation in classes A and B shall file one copy, and such additional copies as shall be requested, of this report for the three months' period ended March 31, 1984 and for each three month's period thereafter. The filing of a corporation's PSC annual report satisfies the filing requirement to file the fourth quarter PSC quarterly financial report.
2. The report must be filed not later than 45 days after the end of the quarterly period to which it relates.
3. All accounting terms and phrases used in this report are to be interpreted in accordance with the effective applicable Uniform System of Accounts prescribed by this Commission.
4. Throughout the report cents may be omitted and items shown to the nearest dollar.
5. The filing of the Securities and Exchange Commission's (SEC) 10-Q satisfies the filing requirement for the PSC's Quarterly Financial Report's Balance Sheet, Income and Retained Earnings Statement, Cash Flow Statement, and Notes to the Financial Statements for Corporations that file, with the SEC, a New York State specific 10-Q.

NIAGARA MOHAWK POWER CORPORATION
NOTES TO THE FINANCIAL STATEMENTS

1. NATURE OF OPERATIONS AND BASIS OF PRESENTATION

Niagara Mohawk Power Corporation ("the Company"), a New York Corporation, is engaged principally in the regulated energy delivery business in New York State. The Company provides electric service to approximately 1.6 million customers in the areas of eastern, central, northern, and western New York and sells, distributes, and transports natural gas to approximately 0.6 million customers in the areas of central, northern, and eastern New York.

The Company is a wholly-owned subsidiary of Niagara Mohawk Holdings, Inc., which is a wholly-owned subsidiary of National Grid USA ("NGUSA" or "Parent"), a public utility holding company with regulated subsidiaries engaged in the generation of electricity and the transmission, distribution, and sale of both natural gas and electricity. NGUSA is a direct wholly-owned subsidiary of National Grid North America Inc. ("NGNA") and an indirect wholly-owned subsidiary of National Grid plc, a public limited company incorporated under the laws of England and Wales.

The accompanying financial statements are prepared in accordance with the accounting requirements of the Federal Energy Regulatory Commission ("FERC") and New York State Public Service Commission ("NYPSC") as set forth in their applicable Uniform System of Accounts. This is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America ("U.S. GAAP"). The primary differences consist of the following:

- Intercompany accounts are presented on a gross basis for FERC and NYPSC reporting but are netted together by counterparty for U.S. GAAP reporting.
- For FERC and NYPSC reporting, restricted cash is included within special deposits and for U.S. GAAP reporting restricted cash is presented separately.
- For FERC and NYPSC reporting, regulatory assets and liabilities are presented on a gross basis and are classified as non-current. For U.S. GAAP reporting, regulatory assets and liabilities are presented on a net basis where appropriate and are classified as current or long-term as applicable.
- The accumulated amounts collected in rates for cost of removal over spending are included within accumulated depreciation for FERC and NYPSC reporting, but are presented separately as a regulatory liability for U.S. GAAP reporting.
- All debt is classified as long-term in the balance sheet for FERC and NYPSC reporting. Under U.S. GAAP, the presentation reflects current and long-term debt separately.
- For FERC and NYPSC reporting, the liability for uncertain tax positions related to temporary differences is not recognized pursuant to FERC and NYPSC guidance and deferred taxes are recognized based on the difference between positions taken in filed tax returns and amounts reported in the financial statements. For U.S. GAAP reporting, the liability for uncertain tax positions related to temporary differences is recognized and deferred taxes are recognized based on the difference between the positions taken in filed tax returns adjusted for uncertain tax positions related to temporary differences and amounts reported in the financial statements.
- For FERC and NYPSC reporting, deferred tax assets and liabilities are presented on a gross basis and are classified as non-current. For U.S. GAAP reporting, deferred tax assets and liabilities are presented on a net basis, with current and non-current amounts presented separately.

In addition, for NYPSC reporting in accordance with Docket 01-M-0075, the Company has excluded goodwill in the amount of \$1.3 billion from the financial statements as of September 30, 2015, as a reduction of equity, consistent with its annual reports. This presentation is different from the required presentation under U.S. GAAP.

In the opinion of management, the financial statements for the nine months ended September 30, 2015 include all adjustments (consisting of normal recurring accruals) necessary for the fair statement of the financial position, results of operations and cash flows for the periods presented. The results of operations for the nine months ended September 30, 2015 are not necessarily indicative of the results to be expected for the full year or any other period.

Financial Statement Restatement

Management has determined that certain accounting transactions were not properly recorded in the Company's previously issued financial statements. The Company corrected the accounting by restating the prior period financial statements, the impacts of which are described below.

During its review of the Company's accounting for its payroll costs, management determined it had incorrectly applied its methodology related to the payroll costs allocated from Service Company. An adjustment of \$1.4 million (net of income taxes) was recorded in the financial statements for the year ended December 31, 2014, which was recorded as an increase to operating revenues and Equity.

The Company has evaluated subsequent events and transactions through November 12, 2015, the date of issuance of these financial statements, and concluded that there were no events or transactions that require adjustment to, or disclosure in, the financial statements as of and for the nine months ended September 30, 2015.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates

In preparing financial statements that conform to FERC requirements, the Company must make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses, and the disclosure of contingent assets and liabilities included in the financial statements. Actual results could differ from those estimates.

Regulatory Accounting

The FERC and the New York Public Service Commission ("NYPSC") regulate the rates the Company charges its customers. In certain cases, the rate actions of the NYPSC can result in accounting that differs from non-regulated companies. In these cases, the Company defers costs (as regulatory assets) or recognizes obligations (as regulatory liabilities) if it is probable that such amounts will be recovered from or refunded to customers through future rates. Regulatory assets and liabilities are amortized to the statements of income consistent with the treatment of the related costs in the ratemaking process.

Fair Value Measurements

The Company measures derivatives and available-for-sale securities at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following is the fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that a company has the ability to access as of the reporting date;
- Level 2: inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data; and
- Level 3: unobservable inputs, such as internally-developed forward curves and pricing models for the asset or liability due to little or no market activity for the asset or liability with low correlation to observable market inputs.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The Company uses valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs.

Asset Retirement Obligations

Asset retirement obligations are recognized for legal obligations associated with the retirement of property, plant, and equipment, primarily associated with the Company's distribution facilities. Asset retirement obligations are recorded at fair value in the period in which the obligation is incurred, if the fair value can be reasonably estimated. In the period in which new asset retirement obligations, or changes to the timing or amount of existing retirement obligations are recorded, the associated asset retirement costs are capitalized as part of the carrying amount of the related long-lived asset. In each subsequent period the asset retirement obligation is accreted to its present value.

The following table represents the changes in the Company's asset retirement obligations:

	Nine Months Ended September 30, 2015
	<i>(in thousands of dollars)</i>
Balance as of beginning of period	\$ 10,768
Accretion expense	-
Liabilities settled	-
Liabilities incurred	434
Balance as of end of period	<u>\$ 11,202</u>

Accretion expense is deferred as part of the Company's asset retirement obligation regulatory asset as management believes it is probable that such amounts will be collected in future rates.

3. RATE MATTERS

March 2013 Electric and Gas Filing

In March 2013 the NYPSC issued a final order regarding the Company's electric and gas base rate filing made on April 27, 2012. The term of the new rate plan is from April 1, 2013 through March 31, 2016 and provides for an electric revenue requirement of \$1,338.3 million in the first year, \$1,395.9 million in the second year, and \$1,432.5

million in the third year. It also provides for a gas revenue requirement of \$307.4 million in the first year, \$314.7 million in the second year, and \$322.0 million in the third year.

Transmission Return on Equity ("ROE") Complaint

On September 11, 2012, the New York Association of Public Power ("NYAPP") filed a complaint against the Company, seeking to have the base ROE for transmission service of 11.5%, which includes a New York Independent System Operator ("NYISO") participation incentive adder, lowered to 9.49%. Similarly, on November 2, 2012 the Municipal Electric Utilities Association ("MEUA") filed a complaint to lower the Company's ROE to 9.25% including the NYISO participation adder. The MEUA also challenges certain aspects of the Company's transmission formula rate. On February 6, 2014, the NYAPP filed a further complaint against the Company seeking an order effective February 6, 2014 to reduce the ROE used in calculating rates for transmission service under the NYISO Open Access Transmission Tariff ("OATT") to 9.36%, inclusive of the 50 basis point adder for participation in the NYISO, with a corresponding overall weighted cost of capital of 6.60%. On September 8, 2014, the FERC issued orders consolidating the first and second complaints and setting the consolidated complaints and the third complaint for hearing and settlement procedures.

On February 24, 2015, the Company filed an Offer of Settlement and Settlement Agreement resolving all issues in the complaints and setting the ROE at 10.30%, inclusive of any incentive adders, effective November 2, 2012. The Settlement also provided for various refunds, and separate \$200,000 and \$180,000 payments to certain Niagara Mohawk customers. On May 13, 2015 FERC approved the Offer of Settlement and on June 12, 2015, the Company filed tariff revisions to implement the new 10.30 % ROE negotiated in the settlement. The Company subsequently provided all refunds required by the settlement and on September 30, 2015 made a Refund Report to the Commission which concludes this FERC proceeding

Wholesale Transmission Service Charge

On December 6, 2013, the Company submitted a filing for FERC approval of revisions to its Wholesale Transmission Service Charge ("TSC Rate") under the NYSIO OATT to recover its Reliability Support Services ("RSS") costs under two agreements with NRG Energy Inc. to support the reliability of the Company's transmission system while transmission reinforcements are constructed. On February 4, 2014 the FERC allowed the RSS charges to become effective in TSC Rates as of July 1, 2013, subject to refund and further consideration of the matter by the FERC. On March 19, 2015, the FERC issued two orders relating to the Company's December 6, 2013 filing of proposed tariff revisions to the TSC Rate. In the first order, the FERC set for hearing and settlement judge procedures the justness and reasonableness of the Company's proposed Wholesale TSC formula rate revisions and the Dunkirk RSS charges (see discussion below). In the second order, the FERC rejected a request for rehearing filed by the MEUA regarding the FERC's decision to accept the December 6, 2013 amendment for filing retroactive to July 1, 2013. The FERC held the hearing on the first order in abeyance pending the outcome of settlement proceedings before a settlement judge. The parties agreed to the terms of a settlement which was filed with the settlement judge on September 11, 2015 and certified by the settlement judge to the Commission on October 19, 2015. Under the terms of the settlement the Company will include the costs of the Dunkirk RSS agreements, including the costs associated with extending the 2013 Dunkirk RSS agreement through the end of 2015, less \$35 million, in the TSC rate. The \$35 million reduction to the revenue requirement impact of the Dunkirk RSS agreements will be implemented through a billing adjustment included in National Grid's 2016 annual TSC informational update filing. We anticipate FERC will approve the settlement as it is uncontested.

Dunkirk RSS Agreement Extension

On May 18, 2015, the NYPSC approved a seven-month extension of the existing RSS agreement between the Company and Dunkirk. The approval extends the end date of the RSS from May 31, 2015 to December 31, 2015, and provides for recovery of the RSS costs under the surcharge mechanism currently in place. The extension is needed to address reliability issues until the Company's Five Mile Road substation and associated reconductoring projects are in service (estimated at December 31, 2015).

Operations Audit

In August 2013, the NYPSC initiated an operational audit to review the accuracy of the customer service, electric reliability, and gas safety data reported by the investor owned utilities operating in New York, including the Company. On December 19, 2013, the NYPSC selected Overland to conduct the audit, which commenced in February 2014. At the time of the issuance of these financial statements, the Company has not received the final audit findings and cannot predict the outcome of this audit.

Operations Staffing Audit

In January 2014, the NYPSC initiated an operational audit to review internal staffing levels and use of contractors for the core utility functions of the investor owned utilities operating in New York, including the Company. On June 26, 2014, the NYPSC selected The Liberty Consulting Group to conduct the audit. At the time of the issuance of these financial statements, the Company cannot predict the outcome of this operational audit.

Recovery of Deferral Costs Relating to Emergency Order

On January 28, 2014, the Company filed a petition requesting a waiver of Rule 46.3.2 of its tariff. Rule 46.3.2 describes the manner in which the Company calculates its supply-related Mass Market Adjustment ("MMA"). The Company proposed the waiver of the rule to mitigate adverse financial impacts anticipated from a significant and unusual increase in electric commodity prices for its mass market customers.

On that same date, the NYPSC issued, on an emergency basis pursuant to the State Administrative Procedure Act §202(6), an Emergency Order granting the Company's waiver request (the "Emergency Order"). In the Emergency Order, the NYPSC waived the requirements of Rule 46.3.2 and approved deferral treatment of the costs and associated carrying charges related to the one-time credit provided via the waiver. However, the NYPSC denied, pending further review and consideration of public comments, the Company's request to recover such deferral over a six-month period beginning May 2014.

The NYPSC issued another order on April 25, 2014 permanently approving the Emergency Order and authorizing the Company to collect \$33.3 million, plus carrying charges at the customer deposit rate, over a six-month period commencing with the June 2014 billing period. The deferral recovery will be performed in a manner consistent with the method that was used to provide the benefit to the mass market customers, through an adjustment to the MMA as calculated by NYISO load zone.

Petition for Authorization to Defer an Actuarial Experience Pension Settlement Loss for Fiscal Year 2014

On February 28, 2014, the Company filed a petition seeking authorization to defer a pension settlement loss incurred during fiscal year 2014. The petition reflected actual loss amounts through December 31, 2013. On August 13, 2014, the Company filed a supplemental petition with actual results through March 31, 2014. In total, the Company seeks authorization to defer \$14.1 million related to a pension settlement loss that occurred in fiscal year 2014.

Temporary State Assessment

In June 2009, the Company made a gas and electric compliance filing with the NYPSC regarding the implementation of the Temporary State Energy & Utility Conservation Assessment ("Temporary State Assessment"). The NYPSC authorized recovery of the costs required for payment of the Temporary State Assessment, including carrying charges, subject to reconciliation over the five years of July 1, 2009 through June 30, 2014. On April 13, 2013, the New York State Legislature extended the Temporary State Assessment through March 2017, while decreasing the percentage associated with the assessment over time. In the order, the Commission authorized recovery of the necessary revenues required to pay the Temporary State Assessment, including carrying charges, subject to reconciliation, from July, 1, 2014 through June 30, 2017.

On June 18, 2014, a final order implementing a revised Temporary State Assessment resulted in a \$2.7 million and \$3.9 million credit to electric and gas customers respectively for rates effective July 1, 2014 through June 30, 2015. On June 15, 2015, the Company submitted a compliance filing updating the Temporary State Assessment surcharge, resulting in a collection of \$19.4 million and \$5.2 million for electric and gas customers respectively for rates effective July 1, 2015 through June 30, 2016.

Commodity Rate Mechanism Changes

On October 23, 2014, the PSC approved tariff revisions filed by the Company that modified several components of Rule 46 – Supply Service Charges of the Company’s tariff, PSC No. 220-Electricity. The revisions provide the Company with a measure of flexibility to manage significant volatility resulting from the reconciliation of commodity costs, like those experienced in January and March of 2014 due to the unanticipated extreme cold weather, for its residential and small commercial customers (“mass market customers”). The tariff revisions go into effect October 29, 2014 and will allow for more flexibility in the timing of the Company’s reconciliation of revenues and expenses for mass market customers.

4. DERIVATIVE CONTRACTS

The Company utilizes derivative instruments, such as options, swaps and gas purchase contracts, to manage commodity price risk associated with its natural gas and electricity purchases. The Company’s risk management strategy is to reduce fluctuations in firm gas and electricity sales prices to its customers.

The Company’s financial exposures are monitored and managed as an integral part of the Company’s overall financial risk management policy. The Company engages in risk management activities only in commodities and financial markets where it has an exposure to, and only in terms and volumes consistent with its core business.

Volumes

Volumes of outstanding commodity derivative contracts measured in dekatherms (“dths”) and megawatt hours (“Mwhs”) are as follows:

	Electric	Gas
	September 30	September 30
	2015	2015
	(in thousands)	(in thousands)
Gas swap contracts (dths)	-	8,390
Gas option contracts (dths)	-	4,080
Gas purchase contracts (dths)	-	2,182
Electric swap contracts (Mwhs)	12,548	-
Electric options contracts (Mwhs)	86	-
Electric capacity contracts (MWs)	805	-
Electric purchase contracts (Mwhs)	-	-
Total:	13,439	14,652

Amounts Recognized in the Accompanying Balance Sheets

Asset Derivatives		Liability Derivatives	
September 30,		September 30,	
2015		2015	
<i>(in thousands of</i>		<i>(in thousands of dollars)</i>	
Current assets:		Current liabilities:	
Rate recoverable contracts:		Rate recoverable contracts:	
Gas swap contracts	\$ 142	Gas swap contracts	\$ 5,795
Gas option contracts	136	Gas option contracts	354
Gas purchase contracts	1,488	Gas purchase contracts	82
Electric swap contracts	21,547	Electric swap contracts	51,623
Electricity capacity contract	230	Electricity capacity contracts	-
Electric options contracts		Electric options contracts	573
	23,543		58,427
Other non-current assets:		Other non-current liabilities:	
Rate recoverable contracts:		Rate recoverable contracts:	
Gas swap contracts	-	Gas swap contracts	379
Gas options contracts	-	Gas options contracts	57
Electric swap contracts	19,921	Electric swap contracts	51,285
Electric capacity contracts	1,718	Electric capacity contracts	-
	21,639		51,721
Total	\$ 45,182	Total	\$ 110,148

The changes in fair value of the Company's rate recoverable contracts are offset by changes in regulatory assets and liabilities. As a result, the changes in fair value of those contracts had no impact in the accompanying statements of income. The Company had no derivative contracts not subject to rate recovery as of September 30, 2015.

Credit and Collateral

The Company is exposed to credit risk related to transactions entered for commodity price risk management. Credit risk represents the risk of loss due to counterparty non-performance. Credit risk is managed by assessing each counterparty's credit profile and negotiating appropriate levels of collateral and credit support.

The credit policy for commodity transactions is managed and monitored by NGUSA's Executive Energy Risk Management Committee ("EERC"), which is responsible for approving risk management policies and objectives for risk assessment, control and valuation, and the monitoring and reporting of risk exposures. NGUSA's Energy Procurement Risk Management Committee ("EPRMC") is responsible for approving transaction strategies, annual supply plans, counterparty credit approval, as well as all valuation and control procedures. The EERC is chaired by the Global Tax and Treasury Director and reports to the Finance Committee. The EPRMC is chaired by the Vice President of U.S. Treasury and reports to the EERC.

The EPRMC monitors counterparty credit exposure and appropriate measures are taken to bring such exposures below the limits, including, without limitation, netting agreements, and limitations on the type and tenor of trades. The Company enters into enabling agreements that allow for payment netting with its counterparties, which reduce its exposure to counterparty risk by providing for the offset of amounts payable to the counterparty against amounts receivable from the counterparty. In instances where a counterparty's credit quality has declined, or credit exposure exceeds certain levels, the Company may limit its credit exposure by restricting new transactions with the counterparty, requiring additional collateral or credit support and negotiating the early termination of certain agreements. Similarly, the Company may be required to post collateral to its counterparties. The Company's credit exposure for all derivative instruments and applicable payables and receivables, net of collateral and instruments that are subject to master netting agreements, was a liability \$59.8 million as of September 30, 2015.

In instances where a counterparty's credit quality has declined, or credit exposure exceeds certain levels, the Company may limit its credit exposure by restricting new transactions with the counterparty, requiring additional collateral or credit support and negotiating the early termination of certain agreements. Similarly, the Company may be required to post collateral to its counterparties. The aggregate fair value of the Company's derivative instruments with credit-risk-related contingent features that are in a liability position at September 30, 2015 was \$68.3 million. The Company had \$5.2 million collateral posted for these instruments at September 30, 2015. If the Company's credit rating were to be downgraded by one level it would be required to pay \$6.9 million additional collateral. If the Company's credit rating were to be downgraded by nine levels, it would be required to post \$68.9 million additional collateral to its counterparties at September 30, 2015.

Total	-	109,084	1,064	110,148
Net assets	\$ 18,577	\$ (57,376)	\$ 2,405	\$ (36,394)

Derivative Contracts: The Company's Level 2 fair value derivative instruments primarily consist of over-the-counter ("OTC") electric and gas swaps and forward gas purchase contracts with pricing inputs obtained from the NYMEX and Intercontinental Exchange ("ICE"), except in cases where the ICE publishes seasonal averages or where there were no transactions within the last seven days. The Company may utilize discounting based on quoted interest rate curves, including consideration of non-performance risk, and may include a liquidity reserve calculated based on bid/ask spread for the Company's Level 2 derivative instruments. Substantially all of these price curves are observable in the marketplace throughout at least 95% of the remaining contractual quantity, or they could be constructed from market observable curves with correlation coefficients of 0.95 or higher.

The Company's Level 3 fair value derivative instruments primarily consist of gas option and electric option and swap transactions, which are valued based on internally-developed models. Industry-standard valuation techniques, such as the Black-Scholes pricing model, Monte Carlo simulation, and Financial Engineering Associates libraries are used for valuing such instruments. A derivative is designated Level 3 when it is valued based on a forward curve that is internally developed, extrapolated or derived from market observable curves with correlation coefficients less than 0.95, where optionality is present, or if non-economic assumptions are made. The internally developed forward curves have a high level of correlation with Platts Mark-to-Market curves and are reviewed by the middle office. The Company considers non-performance risk and liquidity risk in the valuation of derivative contracts categorized in Level 2 and Level 3.

Available-for-Sale Securities: Available-for-sale securities are included in other special funds in the accompanying balance sheets and primarily include equity and debt investments based on quoted market prices (Level 1) and municipal and corporate bonds based on quoted prices of similar traded assets in open markets (Level 2).

Changes in Level 3 Derivatives

The following table presents the fair value reconciliation of Level 3 derivative assets and liabilities measured at fair value on a recurring basis during the nine months ended September 30, 2015:

	Nine Months ended September 30, 2015
	<i>(in thousands of dollars)</i>
Balance as of the beginning of the year	\$ (7,096)
Transfers out of Level 3	4,743
Total gains or losses included in regulatory assets and liabilities	1,385
Settlements	3,373
Balance as of the end of the year	<u>\$ 2,405</u>

A transfer into Level 3 represents existing assets or liabilities that were previously categorized at a higher level for which the inputs became unobservable during the year. A transfer out of Level 3 represents assets and liabilities that were previously classified as Level 3 for which the inputs became observable based on the criteria discussed previously for classification in Level 2. These transfers, which are recognized at the end of each period, result from changes in the observability of forward curves from the beginning to the end of each reporting period. There were no transfers between Level 1 and Level 2, and no transfers into Level 3, during the 3 months ended September 30, 2015.

Quantitative Information About Level 3 Derivatives

The following table provides information about our significant Level 3 valuations, of which the most significant positions are financial commodity option contracts. These option contracts are measured at fair value using the implied volatility as a key input to the option pricing function of the risk management system. The implied volatilities used are an approximation of the actual volatility curves for various strikes and option types and are not observable in the market.

Commodity	Level 3 Position	Fair Value as of September 30, 2015			Valuation Technique(s)	Significant Unobservable Input	Range
		Assets	(Liabilities)	Total			
Financial							
Gas	Option contracts	\$ 136	\$ (410)	\$ (274)	Discounted Cash Flow	Forward Curve Implied Volatility	\$0.084-\$0.363/dth 28% - 45%
Gas	Physical Contracts	\$ 1,483	\$ (82)	\$ 1,401	Discounted Cash Flow	Forward Curve	\$0.0948-\$9.890/dth
Electric	Capacity Contract	\$ 1,851	\$ -	1,851	Discounted Cash Flow	Forward Curve	\$1.410-\$4.007/MW
Electric	Option contracts	\$ -	\$ (573)	(573)	Discounted Cash Flow	Implied Volatility	26% - 39%
Total		\$ 3,469	\$ (1,065)	\$ 2,405			

The significant unobservable inputs listed above would have a direct impact on the fair values of the Level 3 instruments if they were adjusted. The significant unobservable inputs used in the fair value measurement of the Company's gas option derivatives and electric option and swap derivatives are implied volatility and gas forward curves. A relative change in commodity price at various locations underlying the open positions can result in significantly different fair value estimates.

Other Fair Value Measurements

The Company's balance sheets reflect long-term debt at amortized cost. The fair value of the Company's long-term debt was based on quoted market prices, where available or estimated using quoted market prices for similar debt. The fair value of this debt at September 30, 2015 was \$2.8 billion.

All other financial instruments in the accompanying balance sheets such as accounts receivable, accounts payable, and the intercompany money pool are stated at cost, which approximates fair value.

6. EMPLOYEE BENEFITS

The Company sponsors several qualified and non-qualified non-contributory defined benefit pension plans (the "Pension Plans") and several PBOP plans (the "PBOP Plans," together with the Pension Plans, the "Plans"). In general, the Company calculates benefits under these plans based on age, years of service and pay using March 31 as a measurement date. In addition, the Company also sponsors defined contribution plans for eligible employees.

Pension Plans

The Pension Plans are comprised of both qualified and non-qualified plans. The qualified pension plan provides substantially all union employees, as well as all non-union employees hired before January 1, 2011, with a retirement benefit. The qualified pension plan is a cash balance pension plan design in which pay-based credits are applied based on service time and interest credits are applied at rates set forth in the plan. For non-union employees, effective January 1, 2011, pay-based credits are based on a combination of service time and age. The non-qualified pension plans provide additional defined pension benefits to certain eligible executives.

The funding policy is determined largely by the Company's rate agreements with the NYPSC. However, the contribution to the qualified pension plan for any year will not be less than the minimum amount required under Internal Revenue Service ("IRS") regulations.

PBOP Plans

The Company's PBOP Plans provide health care and life insurance coverage to eligible retired employees. Eligibility is based on age and length of service requirements and, in most cases, retirees must contribute to the cost of their coverage. The PBOP Plans are funded based on rate agreements with the NYPSC.

Components of Net Periodic Benefit Costs

	<u>Pension Plans</u>	<u>PBOP Plans</u>
	<u>Three Months Ended</u>	<u>Three Months Ended</u>

Settlement loss	-	-
Net periodic benefit cost	<u>\$ 35,365</u>	<u>\$ 49,146</u>

7. CAPITALIZATION

Debt Authorizations

The Company had regulatory approval from the FERC to issue up to \$1 billion of short-term debt, which expired on November 30, 2013. The Company's subsequent request for short-term borrowing authority was approved and became effective January 12, 2015 for a period of two years.

Effective April 25, 2014, the Company entered into an Equity Contribution Agreement with the Parent which provided the Company with the ability to call upon the Parent for contributions to the Company's capital, in an aggregate amount equal to the short-term borrowing limit until such time as regulatory approval for short-term borrowing was regained. The Company did not make use of this Equity Contribution Agreement; however, prior to the agreement the Company had received an equity contribution of \$25 million in February 2014. Since the Company has regained its short-term borrowing authority as of January 12, 2015, the Equity Contribution Agreement is no longer in effect. The Company had no short-term debt outstanding to third-parties as of September 30, 2015.

In September 2012, the NYPSC granted multi-year authority to issue up to \$1.6 billion in new long-term debt securities through the period ending March 31, 2016. In November 2012, the Company issued \$400 million and \$300 million of unsecured long-term debt, and in September 2014, the Company issued \$500 million and \$400 million of unsecured long-term debt under this authority.

In March 2015, the Company executed the optional redemption provision of the NYSDERDA Pollution Control Revenue Bonds Series 1985 A in the amount of \$100 million. The bonds were scheduled to mature on July 1, 2015. The Company also had \$75 million of 5.15% fixed rate pollution control revenue bonds issued through NYSDERDA which were callable at par. In June 2015, the Company executed the optional redemption provision of the bond in the amount of \$75 million. The bonds were scheduled to mature on November 1, 2025.

Dividend Restrictions

The Company's debt and credit arrangements contain various financial and other covenants as described below. The Company was in compliance with all such covenants during the nine months ended September 30, 2015.

The indenture securing the Company's mortgage debt provides that retained earnings shall be reserved and held unavailable for the payment of dividends on common stock to the extent that expenditures for maintenance and repairs plus provisions for depreciation do not exceed 2.25% of depreciable property as defined therein. These provisions have never resulted in a restriction of the Company's retained earnings.

The Company is limited by the Merger Rate Plan, NYPSC orders, and FERC orders with respect to the amount of dividends the Company can pay. As long as the bond ratings on the least secure forms of debt issued by the Company and National Grid plc remain investment grade and do not fall to the lowest investment grade rating (with one or more negative watch downgrade notices issued with respect to such debt), the Company is allowed to pay dividends.

Cumulative Preferred Stock

The Company has certain issues of non-participating cumulative preferred stock outstanding which can be redeemed at the option of the Company. There are no mandatory redemption provisions on the Company's cumulative preferred stock.

A summary of cumulative preferred stock is as follows:

Series	<u>Shares Outstanding</u>	<u>Amount</u>	Call Price
	<u>September 30,</u>	<u>September 30,</u>	
	<u>2015</u>	<u>2015</u>	
	<i>(in thousands of dollars, except per share and number of shares data)</i>		
\$100 par value -			
3.40% Series	57,524	\$ 5,753	\$ 103.500
3.60% Series	137,152	13,715	104.850
3.90% Series	95,171	9,517	106.000
Total	289,847	\$ 28,985	

8. ENVIRONMENTAL MATTERS

The normal ongoing operations and historic activities of the Company are subject to various federal, state and local environmental laws and regulations. Under federal and state Superfund laws, potential liability for the historic contamination of property may be imposed on responsible parties jointly and severally, without regard to fault, even if the activities were lawful when they occurred.

The United States Environmental Protection Agency ("EPA"), and the New York Department of Environmental Conservation ("DEC"), as well as private entities, have alleged that the Company is a potentially responsible party

under state or federal law for the remediation of numerous sites. The Company's most significant liabilities relate to former Manufactured Gas Plant ("MGP") facilities formerly owned or operated by the Company. The Company is currently investigating and remediating, as necessary, those MGP sites and certain other properties under agreements with the EPA and the DEC.

The Company estimated the remaining costs of environmental remediation activities were \$393.4 million at September 30, 2015. These costs are expected to be incurred over the next 45 years, and these undiscounted amounts have been recorded as other deferred credits in the accompanying balance sheets. However, remediation costs for each site may be materially higher than estimated, depending upon changing technologies and regulatory standards, selected end use for each site, and actual environmental conditions encountered. The high end of the range of potential liabilities at September 30, 2015, was estimated at \$526.7 million. The Company has recovered amounts from certain insurers and potentially responsible parties, and, where appropriate, the Company may seek additional recovery from other insurers and from other potentially responsible parties, but it is uncertain whether, and to what extent, such efforts will be successful.

By rate orders issued and effective March 15, 2013, the NYPSC has provided an annual rate allowance of \$42.0 million (\$35.7 million in electric base rates and \$6.3 million in gas base rates). Any annual spend above the \$42.0 million rate allowance is deferred for future recovery. Previous rate orders have provided for similar recovery mechanisms (with different rate allowances and thresholds). Accordingly, as of September 30, 2015 the Company has recorded environmental regulatory assets of \$393.4 million, and environmental regulatory liabilities of \$33.3 million.

The Company believes that its ongoing operations, and its approach to addressing conditions at historic sites, are in substantial compliance with all applicable environmental laws. Where the Company has regulatory recovery, it believes that the obligations imposed on it because of the environmental laws will not have a material impact on its results of operations or financial position.

Nuclear Contingencies

As of September 30, 2015, the Company had a liability of approximately \$168 million, recorded in other deferred credits in the accompanying balance sheets, for the disposal of nuclear fuel irradiated prior to 1983. The Nuclear Waste Policy Act of 1982 provides nine payment options for liquidating such liability and the Company has elected to delay payment, with interest, until the year in which Constellation Energy Group Inc., which purchased the Company's nuclear assets, initially plans to ship irradiated fuel to an approved Department of Energy ("DOE") disposal facility.

In March 2010, the DOE filed a motion with the Nuclear Regulatory Commission ("NRC") to withdraw the license application for a high-level nuclear waste repository at Yucca Mountain. The DOE's withdrawal motion has been challenged and is being litigated before the NRC and the District of Columbia Circuit. In January 2010 the U.S. government announced that it has established a Blue Ribbon Commission ("BRC") to perform a comprehensive review and provide recommendations regarding the disposal of the nation's spent nuclear fuel and waste. In January 2012, the BRC issued its report and recommendations which provides for numerous policy recommendations currently under review and consideration by the U.S. Secretary of Energy. Therefore, the Company cannot predict the impact that the recent actions of the DOE and the U.S. government will have on the ability to dispose of the spent nuclear fuel and waste.

9. COMMITMENTS AND CONTINGENCIES

Legal Matters

The Company is subject to various legal proceedings arising out of the ordinary course of its business. The Company does not consider any of such proceedings to be material, individually or in the aggregate, to its business or likely to result in a material adverse effect on its results of operations, financial position, or cash flows.

10. RELATED PARTY TRANSACTIONS

Advances from Affiliates

In June 2009, the Company entered into an agreement with NGUSA whereby the Company can borrow up to \$500 million from time to time for working capital needs. The advance is non-interest bearing. At September 30, 2015 the Company had an outstanding related party borrowings of \$25 million included in the advances from affiliate account in the accompanying balance sheet.

In June 2009, the Company received board authorization to borrow up to \$450 million from Niagara Mohawk Holdings, Inc. from time to time for working capital needs. The average interest rates were 0.7% for the nine months ended September 30, 2015. During the 9 months ended September 30, 2015 the Company repaid \$25 Million of outstanding borrowings and at September 30, 2015, the Company had no outstanding borrowing.

Accounts Receivable from and Accounts Payable to Associated Companies

NGUSA and its affiliates provide various services to the Company, including executive and administrative, customer services, financial (including accounting, auditing, risk management, tax, and treasury/finance), human resources, information technology, legal and strategic planning, that are charged between the companies and charged to each company.

The Company records short-term payables to and receivables from certain of its affiliates in the ordinary course of business. The amounts payable to and receivable from its affiliates do not bear interest and are settled through the intercompany money pool.

A summary of outstanding accounts receivable from associated companies and accounts payable to associated companies is as follows:

	Accounts Receivable From Associated Companies September 30, 2015 <i>(in thousands of dollars)</i>	Accounts Payable To Associated Companies September 30, 2015 <i>(in thousands of dollars)</i>
Massachusetts Electric Company	\$ 8,353	\$ -
National Grid Engineering Services, LLC	6,537	-
NGUSA	-	3,938
NGUSA Service Company	38,776	52,304
Opinac North America, Inc.	-	-
Granite St Elec-Post Sale	9,588	9,090
EnergyNorth Gas-Post Sale	9,078	9,008
Other	890	1,538
Total	<u>\$ 73,222</u>	<u>\$ 75,878</u>

Intercompany Money Pool

The settlement of the Company's various transactions with NGUSA and certain associated companies generally occurs via the intercompany money pool. The Company is a participant in the Regulated Money Pool and can both borrow and lend funds. Borrowings from the Regulated Money Pool bear interest in accordance with the terms of the intercompany money pool agreement. As the Company fully participates in the Regulated Money Pool rather than settling intercompany charges with cash, all changes in the intercompany money pool balance and accounts receivable and payable from affiliate balances, are reflected as investing or financing activities in the accompanying statements of cash flows. In addition, for the purpose of presentation in the statement of cash flows, it is assumed all amounts settled through intercompany money pool are constructive cash receipts and payments, and therefore are presented as such.

The Regulated Money Pool is funded by operating funds from participants. Collectively, NGUSA and its subsidiary, KeySpan, have the ability to borrow up to \$3 billion from National Grid plc for working capital needs including funding of the intercompany money pools, if necessary. The Company had short-term intercompany money pool investments of \$214 million at September 30, 2015.

Service Company Charges

The affiliated service companies of NGUSA provide certain services to the Company at their cost. The service company costs are generally allocated to associated companies through a tiered approach. First and foremost, costs are directly charged to the benefited company whenever practicable. Secondly, in cases where direct charging cannot be readily determined, costs are allocated using cost/causation principles linked to the relationship of that type of service, such as number of employees, number of customers/meters, capital expenditures, value of property owned, total transmission and distribution expenditures. Lastly, all other costs are allocated based on a general allocator determined using a 3-point formula based on net margin, net property, plant and equipment, and operations and maintenance expense.

Charges from the service companies of NGUSA to the Company for the three months ended September 30, 2015 were \$116.7 million and for the nine months ended September 30, 2015 were \$240.8 million.

Holding Company Charges

NGUSA received charges from National Grid Commercial Holdings Limited (an associated company in the U.K.) for certain corporate and administrative services provided by the corporate functions of National Grid plc to its U.S. subsidiaries. These charges, which are recorded on the books of NGUSA, have not been reflected on these financial statements.

III. IMPORTANT CHANGES DURING THE QUARTER

Report important changes of the type listed. Except as otherwise indicated data furnished should apply to the same period the report covers. Answers should be numbered in accordance with the inquiries; and if "none" states the fact it should be used.

OPERATING DATA**Instructions:**

Append to this report the schedules listed below. The information requested should be given by month for each month, summarized for the quarter covered by this report and for the twelve month period as of the current reporting quarter. Electric operating data should be listed first followed by gas operating data.

A. Sales

For each accounting division (and summarized in total for all accounting divisions) give the following information

Schedule A-1

The number of bills rendered, the number of customers served, the Kwh or Dth sold, and the revenue therefrom, subdivided by operating revenue accounts, under each schedule and service classification number.

When the same rate is contained in more than one schedule, all sales and revenues under that rate may be combined, but each schedule and each service classification number under which sales were made must be shown in the controlling heading above the columns in which the sales are listed. If, under any service classification, all or part of the bills are rendered at regular billing periods other than monthly, state that fact and in each instance specify the number of bills rendered for each billing interval.

Schedule A-2

The number of bills rendered, the number of customers served, the Kwh or Dth sold, and the revenue therefrom, subdivided by operating accounts, at other than service classification rates.

Schedule A-3

The Kwh or Dth sold and the revenue derived from sales for resales to each utility or public authority.

Schedule A-4

The total amount by month and account for Other Revenues (Electric- Accounts 450 to 456; Gas-accounts 487 to 495).

B. Generating StationsSchedule B-1

Separately for each generating station report:

(1) The fuel expenses for the production of electric energy by fuel type.

(2) The number of Kwh generated by each kind of motive power. (Excluding current used in station auxiliaries. Step-up transformers are not to be considered station auxiliaries.)

C. Purchase or Exchange of Electricity or GasSchedule C-1

Separately for each contract governing the purchase or exchange of electricity or gas, the number of Kwh or Dth received or delivered, the cost per Kwh or Dth and the charge or credit therefor. For electricity purchased or exchanged show separately the demand and energy costs and, in the case of gas, the kind of gas received or delivered.

VERIFICATION

(Oath to be made by officer in charge of the accounts,
records, and memoranda of the reporting operation.)

State of New York

County of Brooklyn
