

# Construction Commencement Notice

Clay-DeWitt #3 & Clay-Teall #10 Rebuild Project  
PSC Case 15-T-0305

**Niagara Mohawk Power Corporation (doing business as “National Grid”) anticipates that it will commence site preparation and construction of its Clay-DeWitt & Clay-Teall Rebuild Project on or about August 1<sup>st</sup>, 2019.**

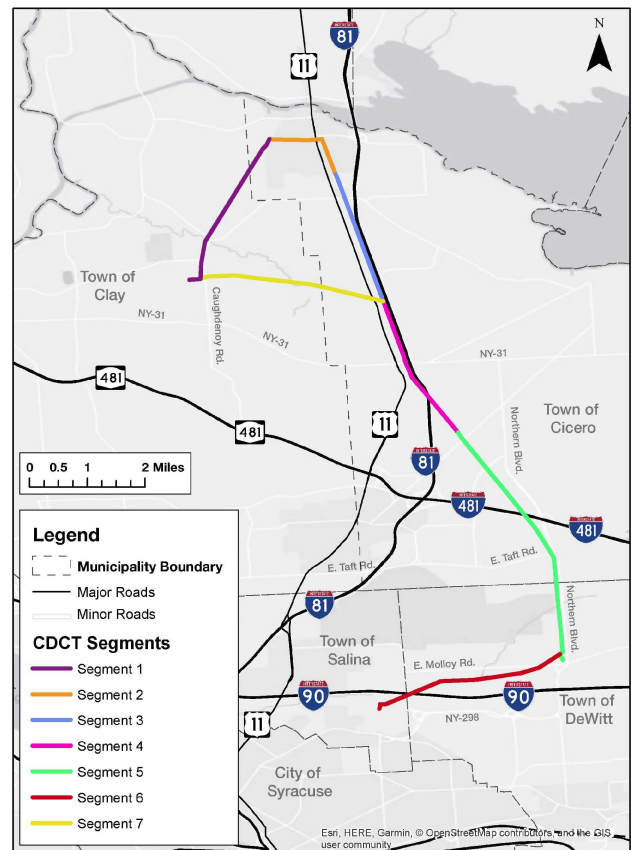

The Project consists of relocating and selectively reconductoring and reconstructing an approximately 13-mile portion of National Grid’s existing 115kV Line 3 starting at the Clay Substation in the Town of Clay, New York (“Line 3”) and existing 115kV Line 10 that presently runs for approximately 16 miles from the Clay Substation to the Teall Substation in the Town of Salina, New York (“Line 10”) (collectively, Line 10 and Line 3 are referred to as the “Existing Lines”). These Existing Lines presently travel a distance of approximately 13 miles parallel to each other on the same right-of-way (“ROW”), the width of which varies from 80 feet to 300 feet.

The Project consists of replacing the conductor on the Existing Lines with new higher capacity conductor, replacing or modifying a majority of the structures associated with the Existing Lines, relocating some of the Existing Lines within the ROW, and relocating other portions of the Existing Lines to a different ROW corridor. Most of the rebuilt or relocated Project lines will be supported by either: weathering steel, monopole, phase-over-phase double circuit structures; or weathering steel, single circuit, delta davit arm suspension structures. The project is anticipated to conclude June of 2021.

Any inquires or complaints during construction of the Project should be directed to:

**Eric Madia**  
**National Grid Stakeholder Relations**  
**300 Erie Boulevard West, Syracuse, NY 13202**
