**Re: Case 16-F-0062 - Application of Eight Point Wind, LLC for a Certificate of Environmental Compatibility and Public Need Pursuant to Article 10 to Construct a 103.4 MW Wind Energy Project**

Dear Secretary Burgess:

Eight Point Wind, LLC (“Eight Point Wind”) is proposing to construct a major electric generating facility in the Towns of Greenwood, Troupsburg and West Union in Steuben County, New York (the “Facility”). In order to construct the Facility, Eight Point Wind is seeking a certificate of environmental compatibility and public need (“Certificate”) from the New York State Board on Electric Generation Siting and the Environment (“Siting Board”) pursuant to Article 10 of the Public Service Law (“PSL”) and the Siting Board’s rules (16 NYCRR Part 1000).

Pursuant to PSL § 163 and Section 1000.5 of the Siting Board’s rules (16 NYCRR § 1000.5), Eight Point Wind is enclosing twelve paper copies of its Preliminary Scoping Statement (“PSS”). An electronic copy of the PSS will also be filed through the Public Service Commission’s online Document & Matter Management System. On October 7, 2016, Eight Point Wind dispatched a check payable to the Department of Public Service for the pre-application intervenor funding as required by PSL § 163(4).

The PSS follows the statutory requirements of Article 10 (PSL § 163(1)) and the Siting Board’s rules (16 NYCRR § 1000.5(1)). The PSS includes a description of the proposed Facility and the studies or program of studies designed to evaluate potentially significant adverse environmental and health impacts, the results of which Eight Point Wind intends to include in its Application for an Article 10 Certificate.

Pursuant to Article 10 (PSL § 163(2)) and Section 1000.5 of the Siting Board’s rules, copies of the PSS have been served on the parties identified in 16 NYCRR § 1000.5(c). An Affidavit of Service in compliance with 16 NYCRR § 1000.5(f) is attached hereto as Exhibit 1.

Pursuant to Section 1000.5(d) of the Siting Board’s rules, notice of the PSS with a summary was published in the following newspapers: *Addison Post* on October 1, 2016; *Evening Tribune* on September 27 and 29, 2016; and the *Steuben Courier* on September 25, 2016. Proofs

Honorable Kathleen H. Burgess  
October 11, 2016  
Page Two

of publication in compliance with 16 NYCRR § 1000.5(f) will be filed when they are received from the newspapers. Copies of the notices that were published in the newspapers are attached hereto as Exhibit 2.

Pursuant to Section 1000.5(e) of the Siting Board's rules, Eight Point Wind provided at least three days' advance notice of the filing of the PSS to each member of the State Legislature in whose district the Facility is proposed to be located, local municipalities, and other stakeholders via U.S. mail and e-mail. Affidavits of Service via U.S. mail and e-mail are attached hereto as Exhibit 3 and Exhibit 4, respectively.

Pursuant to Section 1000.5(g) of the Siting Board's rules, any person, agency or municipality may submit comments on the PSS by filing a copy with the Secretary and serving the Applicant at the following address:

David Gil  
Eight Point Wind, LLC  
700 Universe Blvd, FEW/JB  
Juno Beach, Florida 33408  
[david.gil@nee.com](mailto:david.gil@nee.com)

Eight Point Wind looks forward to working with the interested parties and stakeholder during the pre-application phase of this process.

Please do not hesitate to contact me if you have any questions regarding this filing.

Respectfully submitted,

DLA Piper LLP (US)

A handwritten signature in black ink, appearing to read 'JDK'.

Jeffrey D. Kuhn

Eight Point Wind Energy Center

# Eight Point Wind, LLC.

Steuben County, New York

## NOTICE OF SUBMISSION OF PRELIMINARY SCOPING STATEMENT

Eight Point Wind, LLC (the Applicant), a subsidiary of NextEra Energy Resources, LLC (NextEra), plans to submit an Application to construct a major electric generating facility, the Eight Point Wind Energy Center (or the "Project"), under Article 10 of the Public Service Law (PSL). This notice announces that on or about October 4, 2016 the Applicant will file a Public Scoping Statement (PSS), pursuant to 16 NYCRR 1000.5, which is designed to gather input from the public and interested agencies on the scope and methodology of studies to be conducted in support of the Article 10 Application which will be filed at a later date. The filing of the PSS will start a 21-day public comment period.

The proposed Project is an up to 102 MW wind powered electric generating facility comprised of wind turbines and related components located on leased property located in the Towns of Greenwood, Troupsburg and West Union in Steuben County, New York. The Project components are proposed to include the installation and operation of up to 32 wind turbines, associated collection lines (underground and overhead), access roads, permanent meteorological tower(s), laydown areas, an operations and maintenance (O&M) building, and a collection substation. To deliver power to the NYS power grid the Project will include a 115 kilovolt (kV) interconnection line from the collection substation to a new point of interconnection (POI) facilities to be installed within New York State Electric and Gas Corporation's (NYSEG) Bennett Substation in Hornellsville. Since the design of the interconnecting transmission cable is proposed to be greater than 100 kV and the length is anticipated to exceed 10 miles, this component of the Project is anticipated to be considered a "Major Utility Transmission Facility" and subject to Article VII of the Public Service Law, and reviewed in a separate, but related, proceeding at the Public Service Commission. It is anticipated that the Article VII proceeding will be conducted in parallel with the Project's Article 10 review. The final design and layout of the Project is currently under development and is being evaluated based on factors such as the results of studies to be conducted pursuant to the PSS, wind and other data, and land control. While unavailable for inclusion in the PSS, the Project design and layout will be finalized and presented in the Article 10 Application.

The purpose and goal of the Project is to create a wind powered electric generation facility, in order to provide a significant amount of renewable energy into the New York State power grid. The Project will improve fuel diversity within New York State by increasing the amount of electricity produced by wind power, and will do so without the air emissions and water usage that are typically associated with other traditional forms of power generation. In addition, the Project will assist the State in meeting the goals of the 2015 State Energy Plan, which includes a goal of 50% of energy generation from renewable sources by 2030, and other State policy initiatives consistent with the development of the Project. The Project is also expected to provide significant benefit to the local community through lease revenues to participating landowners, temporary construction employment, permanent O&M employment, increased tax revenues, and payments to local businesses through the hospitality industry and the purchase of local supplies and goods. Additionally, economic benefits are expected to be provided to the Towns of Greenwood, Troupsburg and West Union, the local school districts, and Steuben County through an anticipated payment in lieu of taxes (PILOT).

The PSS precedes the formal public scoping process and therefore, among other things, will describe and identify: the environmental setting in the Project Area, potential environmental and health impacts from construction and operation of the Project, proposed benefits of the Project, proposed studies (including pre-construction studies and post-construction monitoring for potential impacts to avian and bat species), proposed measures to minimize environmental impacts, reasonable alternatives, other required permits/authorizations, and other relevant information. The PSS will also provide a discussion of potentially significant adverse environmental and health impacts to be assessed relating to the construction and operation of the Project, including potential impacts to: land use in the Project Area; public health and safety; terrestrial ecology (including avian and bat species) and wetlands; water resources and aquatic ecology; communications, transportation and utilities; cultural, historical and recreational resources; visual, including potential for shadow flicker; sound; electromagnetic fields; and impacts on the statewide electrical system.

Within 21 days after filing of the PSS, any person, agency or municipality may submit comments on the PSS by serving such comments on the Applicant and filing a copy with the Secretary of the Department of Public Service. The Applicant will prepare a summary of the material comments and its reply thereto within 21 days after the closing of the comment period. The scoping process is overseen and mediated by a Hearing Examiner designated by the DPS and will commence after required notices have been sent and intervenor funding has been disbursed. Notice will be provided when the Hearing Examiner schedules the scoping meeting.

No less than 90 days after the filing of the PSS, the Applicant will submit an Article 10 Application. Building on the Scoping process and any stipulations agreed to by the parties, the Application will include the studies developed as part of the Scoping process in support of the Project. The Application will include a description of the Project, an evaluation of environmental and health impacts, a summary of public involvement activities, an evaluation of reasonable and available alternative locations, a statement of why any local substantive standards should not be applied, an electric interconnection study including general design study and SRIS, security and emergency plans, statement demonstrating compliance with the most recent State Energy Plan, and other information. The Application will also contain the information set forth in 16 NYCRR 1001, Exhibits 1-41 unless otherwise waived by the Siting Board.

Once an Application is filed and determined by the Siting Board to be complete, the Siting Board will schedule a public hearing on the Application. The Siting Board will also issue a notice of availability of application intervenor funds that are available to be used by parties to participate in formal review of the Application. A pre-hearing conference will be scheduled by the Hearing Examiner to identify intervenors, award intervenor funds, identify issues for the hearing, and establish a case schedule. Additional hearings regarding the application and project impact assessments will be scheduled by the Hearing Examiner as needed. After hearings, the stakeholders may brief their positions and the Hearing Examiner will issue a recommended decision upon which the Siting Board will base its decision. Article 10 requires that all proceedings on the Application, including a final decision by the Siting Board, must be completed within 12 months of when the Application is determined to be complete.

Upon filing of the PSS, Eight Point Wind LLC will provide funding in the amount of \$36,190 to be disbursed by the Siting Board to municipalities and other local parties to help pay expenses, including attorneys and consultants, associated with participating in the Article 10 process during the pre-application review phase. Fifty percent (50%) of these intervenor funds are reserved for municipalities. Additional intervenor funds will be available for the Application/Hearing Phases. Following the filing of the PSS, the Hearing Examiner or the Secretary shall issue a notice of availability of pre-application intervenor funds providing a schedule and related information describing how interested members of the public may apply for pre-application funds. Requests for pre-application funds must be submitted to the Hearing Examiner within thirty (30) days after the issuance of the notice of availability of pre-application intervenor funds. A pre-application meeting to consider funding requests will be convened within no less than 45 but no more than 60 days after the filing of the PSS.

**NOTICE OF SUBMISSION OF PRELIMINARY SCOPING STATEMENT**

Eight Point Wind, LLC (the Applicant), a subsidiary of NextEra Energy Resources, LLC (NextEra), plans to submit an Application to construct a major electric generating facility, the Eight Point Wind Energy Center (or the "Project"), under Article 10 of the Public Service Law (PSL). This notice announces that on or about October 4, 2016 the Applicant will file a Public Scoping Statement (PSS), pursuant to 16 NYCRR 1000.5, which is designed to gather input from the public and interested agencies on the scope and methodology of studies to be conducted in support of the Article 10 Application which will be filed at a later date. The filing of the PSS will start a 21-day public comment period.

The proposed Project is an up to 102 MW wind powered electric generating facility comprised of wind turbines and related components located on leased property located in the Towns of Greenwood, Troupsburg and West Union in Steuben County, New York. The Project components are proposed to include the installation and operation of up to 32 wind turbines, associated collection lines (underground and overhead), access roads, permanent meteorological tower(s), laydown areas, an operations and maintenance (O&M) building, and a collection substation. To deliver power to the NYS power grid the Project will include a 115 kilovolt (kV) interconnection line from the collection substation to a new point of interconnection (POI) facilities to be installed within New York State Electric and Gas Corporation's (NYSEG) Bennett Substation in Hornellsville. Since the design of the interconnecting transmission cable is proposed to be greater than 100 kV and the length is anticipated to exceed 10 miles, this component of the Project is anticipated to be considered a "Major Utility Transmission Facility" and subject to Article VII of the Public Service Law, and reviewed in a separate, but related, proceeding at the Public Service Commission. It is anticipated that the Article VII proceeding will be conducted in parallel with the Project's Article 10 review. The final design and layout of the Project is currently under development and is being evaluated based on factors such as the results of studies to be conducted pursuant to the PSS, wind and other data, and land control. While unavailable for inclusion in the PSS, the Project design and layout will be finalized and presented in the Article 10 Application.

The purpose and goal of the Project is to create a wind powered electric generation facility, in order to provide a significant amount of renewable energy into the New York State power grid. The Project will improve fuel diversity within New York State by increasing the amount of electricity produced by wind power, and will do so without the air emissions and water usage that are typically associated with other traditional forms of power generation. In addition, the Project will assist the State in meeting the goals of the 2015 State Energy Plan, which includes a goal of 50% of energy generation from renewable sources by 2030, and other State policy initiatives consistent with the development of the Project. The Project is also expected to provide significant benefit to the local community through lease revenues to participating landowners, temporary construction employment, permanent O&M employment, increased tax revenues, and payments to local businesses through the hospitality industry and the purchase of local supplies and goods. Additionally, economic benefits are expected to be provided to the Towns of Greenwood, Troupsburg and West Union, the local school districts, and Steuben County through an anticipated payment in lieu of taxes (PILOT).

The PSS precedes the formal public scoping process and therefore, among other things, will describe and identify: the environmental setting in the Project Area, potential environmental and health impacts from construction and operation of the Project, proposed benefits of the Project, proposed studies (including pre-construction studies and post-construction monitoring for potential impacts to avian and bat species), proposed measures to minimize environmental impacts, reasonable alternatives, other required permits/authorizations, and other relevant information. The PSS will also provide a discussion of potentially significant adverse environmental and health impacts to be assessed relating to the construction and operation of the Project, including potential impacts to: land use in the Project Area; public health and safety; terrestrial ecology (including avian and bat species) and wetlands; water resources and aquatic ecology; communications, transportation and utilities; cultural, historical and recreational resources; visual, including potential for shadow flicker; sound; electromagnetic fields; and impacts on the statewide electrical system.

Within 21 days after filing of the PSS, any person, agency or municipality may submit comments on the PSS by serving such comments on the Applicant and filing a copy with the Secretary of the Department of Public Service. The Applicant will prepare a summary of the material comments and its reply thereto within 21 days after the closing of the comment period. The scoping process is overseen and mediated by a Hearing Examiner designated by the DPS and will commence after required notices have been sent and intervenor funding has been disbursed. Notice will be provided when the Hearing Examiner schedules the scoping meeting.

No less than 90 days after the filing of the PSS, the Applicant will submit an Article 10 Application. Building on the Scoping process and any stipulations agreed to by the parties, the Application will include the studies developed as part of the Scoping process in support of the Project. The Application will include a description of the Project, an evaluation of environmental and health impacts, a summary of public involvement activities, an evaluation of reasonable and available alternative locations, a statement of why any local substantive standards should not be applied, an electric interconnection study including general design study and SRIS, security and emergency plans, statement demonstrating compliance with the most recent State Energy Plan, and other information. The Application will also contain the information set forth in 16 NYCRR 1001, Exhibits 1-41 unless otherwise waived by the Siting Board.

Once an Application is filed and determined by the Siting Board to be complete, the Siting Board will schedule a public hearing on the Application. The Siting Board will also issue a notice of availability of application intervenor funds that are available to be used by parties to participate in formal review of the Application. A pre-hearing conference will be scheduled by the Hearing Examiner to identify intervenors, award intervenor funds, identify issues for the hearing, and establish a case schedule. Additional hearings regarding the application and project impact assessments will be scheduled by the Hearing Examiner as needed. After hearings, the stakeholders may brief their positions and the Hearing Examiner will issue a recommended decision upon which the Siting Board will base its decision. Article 10 requires that all proceedings on the Application, including a final decision by the Siting Board, must be completed within 12 months of when the Application is determined to be complete.

Upon filing of the PSS, Eight Point Wind LLC will provide funding in the amount of \$36,190 to be disbursed by the Siting Board to municipalities and other local parties to help pay expenses, including attorneys and consultants, associated with participating in the Article 10 process during the pre-application review phase. Fifty percent (50%) of these intervenor funds are reserved for municipalities. Additional intervenor funds will be available for the Application/Hearing Phases. Following the filing of the PSS, the Hearing Examiner or the Secretary shall issue a notice of availability of pre-application intervenor funds providing a schedule and related information describing how interested members of the public may apply for pre-application funds. Requests for pre-application funds must be submitted to the Hearing Examiner within thirty (30) days after the issuance of the notice of availability of pre-application intervenor funds. A pre-application meeting to consider funding requests will be convened within no less than 45 but no more than 60 days after the filing of the PSS.

Eight Point Wind Energy Center  
**Eight Point Wind, LLC.**  
 Steuben County, New York

**NOTICE OF SUBMISSION OF PRELIMINARY SCOPING STATEMENT**

Eight Point Wind, LLC (the Applicant), a subsidiary of NextEra Energy Resources, LLC (NextEra), plans to submit an Application to construct a major electric generating facility, the Eight Point Wind Energy Center (or the "Project"), under Article 10 of the Public Service Law (PSL). This notice announces that on or about October 4, 2016 the Applicant will file a Public Scoping Statement (PSS), pursuant to 16 NYCRR 1000.5, which is designed to gather input from the public and interested agencies on the scope and methodology of studies to be conducted in support of the Article 10 Application which will be filed at a later date. The filing of the PSS will start a 21-day public comment period.

The proposed Project is an up to 102 MW wind powered electric generating facility comprised of wind turbines and related components located on leased property located in the Towns of Greenwood, Troupsburg and West Union in Steuben County, New York. The Project components are proposed to include the installation and operation of up to 32 wind turbines, associated collection lines (underground and overhead), access roads, permanent meteorological tower(s), laydown areas, an operations and maintenance (O&M) building, and a collection substation. To deliver power to the NYS power grid the Project will include a 115 kilovolt (kV) interconnection line from the collection substation to a new point of interconnection (POI) facilities to be installed within New York State Electric and Gas Corporation's (NYSEG) Bennett Substation in Hornellsville. Since the design of the interconnecting transmission cable is proposed to be greater than 100 kV and the length is anticipated to exceed 10 miles, this component of the Project is anticipated to be considered a "Major Utility Transmission Facility" and subject to Article VII of the Public Service Law, and reviewed in a separate, but related, proceeding at the Public Service Commission. It is anticipated that the Article VII proceeding will be conducted in parallel with the Project's Article 10 review. The final design and layout of the Project is currently under development and is being evaluated based on factors such as the results of studies to be conducted pursuant to the PSS, wind and other data, and land control. While unavailable for inclusion in the PSS, the Project design and layout will be finalized and presented in the Article 10 Application.

The purpose and goal of the Project is to create a wind powered electric generation facility, in order to provide a significant amount of renewable energy into the New York State power grid. The Project will improve fuel diversity within New York State by increasing the amount of electricity produced by wind power, and will do so without the air emissions and water usage that are typically associated with other traditional forms of power generation. In addition, the Project will assist the State in meeting the goals of the 2015 State Energy Plan, which includes a goal of 50% of energy generation from renewable sources by 2030, and other State policy initiatives consistent with the development of the Project. The Project is also expected to provide significant benefit to the local community through lease revenues to participating landowners, temporary construction employment, permanent O&M employment, increased tax revenues, and payments to local businesses through the hospitality industry and the purchase of local supplies and goods. Additionally, economic benefits are expected to be provided to the Towns of Greenwood, Troupsburg and West Union, the local school districts, and Steuben County through an anticipated payment in lieu of taxes (PILOT).

The PSS precedes the formal public scoping process and therefore, among other things, will describe and identify: the environmental setting in the Project Area, potential environmental and health impacts from construction and operation of the Project, proposed benefits of the Project, proposed studies (including pre-construction studies and post-construction monitoring for potential impacts to avian and bat species), proposed measures to minimize environmental impacts, reasonable alternatives, other required permits/authorizations, and other relevant information. The PSS will also provide a discussion of potentially significant adverse environmental and health impacts to be assessed relating to the construction and operation of the Project, including potential impacts to: land use in the Project Area; public health and safety; terrestrial ecology (including avian and bat species) and wetlands; water resources and aquatic ecology; communications, transportation and utilities; cultural, historical and recreational resources; visual, including potential for shadow flicker; sound; electromagnetic fields; and impacts on the statewide electrical system.

Within 21 days after filing of the PSS, any person, agency or municipality may submit comments on the PSS by serving such comments on the Applicant and filing a copy with the Secretary of the Department of Public Service. The Applicant will prepare a summary of the material comments and its reply thereto within 21 days after the closing of the comment period. The scoping process is overseen and mediated by a Hearing Examiner designated by the DPS and will commence after required notices have been sent and intervenor funding has been disbursed. Notice will be provided when the Hearing Examiner schedules the scoping meeting.

No less than 90 days after the filing of the PSS, the Applicant will submit an Article 10 Application. Building on the Scoping process and any stipulations agreed to by the parties, the Application will include the studies developed as part of the Scoping process in support of the Project. The Application will include a description of the Project, an evaluation of environmental and health impacts, a summary of public involvement activities, an evaluation of reasonable and available alternative locations, a statement of why any local substantive standards should not be applied, an electric interconnection study including general design study and SRIS, security and emergency plans, statement demonstrating compliance with the most recent State Energy Plan, and other information. The Application will also contain the information set forth in 16 NYCRR 1001, Exhibits 1-41 unless otherwise waived by the Siting Board.

Once an Application is filed and determined by the Siting Board to be complete, the Siting Board will schedule a public hearing on the Application. The Siting Board will also issue a notice of availability of application intervenor funds that are available to be used by parties to participate in formal review of the Application. A pre-hearing conference will be scheduled by the Hearing Examiner to identify intervenors, award intervenor funds, identify issues for the hearing, and establish a case schedule. Additional hearings regarding the application and project impact assessments will be scheduled by the Hearing Examiner as needed. After hearings, the stakeholders may brief their positions and the Hearing Examiner will issue a recommended decision upon which the Siting Board will base its decision. Article 10 requires that all proceedings on the Application, including a final decision by the Siting Board, must be completed within 12 months of when the Application is determined to be complete.

Upon filing of the PSS, Eight Point Wind LLC will provide funding in the amount of \$36,190 to be disbursed by the Siting Board to municipalities and other local parties to help pay expenses, including attorneys and consultants, associated with participating in the Article 10 process during the pre-application review phase. Fifty percent (50%) of these intervenor funds are reserved for municipalities. Additional intervenor funds will be available for the Application/Hearing Phases. Following the filing of the PSS, the Hearing Examiner or the Secretary shall issue a notice of availability of pre-application intervenor funds providing a schedule and related information describing how interested members of the public may apply for pre-application funds. Requests for pre-application funds must be submitted to the Hearing Examiner within thirty (30) days after the issuance of the notice of availability of pre-application intervenor funds. A pre-application meeting to consider funding requests will be convened within no less than 45 but no more than 60 days after the filing of the PSS.

## Eight Point Wind Energy Center

**Eight Point Wind, LLC.****Steuben County, New York****NOTICE OF SUBMISSION OF PRELIMINARY SCOPING STATEMENT**

Eight Point Wind, LLC (the Applicant), a subsidiary of NextEra Energy Resources, LLC (NextEra), plans to submit an Application to construct a major electric generating facility, the Eight Point Wind Energy Center (or the "Project"), under Article 10 of the Public Service Law (PSL). This notice announces that on or about October 4, 2016 the Applicant will file a Public Scoping Statement (PSS), pursuant to 16 NYCRR 1000.5, which is designed to gather input from the public and interested agencies on the scope and methodology of studies to be conducted in support of the Article 10 Application which will be filed at a later date. The filing of the PSS will start a 21-day public comment period.

The proposed Project is an up to 102 MW wind powered electric generating facility comprised of wind turbines and related components located on leased property located in the Towns of Greenwood, Troupsburg and West Union in Steuben County, New York. The Project components are proposed to include the installation and operation of up to 32 wind turbines, associated collection lines (underground and overhead), access roads, permanent meteorological tower(s), laydown areas, an operations and maintenance (O&M) building, and a collection substation. To deliver power to the NYS power grid the Project will include a 115 kilovolt (kV) interconnection line from the collection substation to a new point of interconnection (POI) facilities to be installed within New York State Electric and Gas Corporation's (NYSEG) Bennett Substation in Hornellsville. Since the design of the interconnecting transmission cable is proposed to be greater than 100 kV and the length is anticipated to exceed 10 miles, this component of the Project is anticipated to be considered a "Major Utility Transmission Facility" and subject to Article VII of the Public Service Law, and reviewed in a separate, but related, proceeding at the Public Service Commission. It is anticipated that the Article VII proceeding will be conducted in parallel with the Project's Article 10 review. The final design and layout of the Project is currently under development and is being evaluated based on factors such as the results of studies to be conducted pursuant to the PSS, wind and other data, and land control. While unavailable for inclusion in the PSS, the Project design and layout will be finalized and presented in the Article 10 Application.

The purpose and goal of the Project is to create a wind powered electric generation facility, in order to provide a significant amount of renewable energy into the New York State power grid. The Project will improve fuel diversity within New York State by increasing the amount of electricity produced by wind power, and will do so without the air emissions and water usage that are typically associated with other traditional forms of power generation. In addition, the Project will assist the State in meeting the goals of the 2015 State Energy Plan, which includes a goal of 50% of energy generation from renewable sources by 2030, and other State policy initiatives consistent with the development of the Project. The Project is also expected to provide significant benefit to the local community through lease revenues to participating landowners, temporary construction employment, permanent O&M employment, increased tax revenues, and payments to local businesses through the hospitality industry and the purchase of local supplies and goods. Additionally, economic benefits are expected to be provided to the Towns of Greenwood, Troupsburg and West Union, the local school districts, and Steuben County through an anticipated payment in lieu of taxes (PILOT).

The PSS precedes the formal public scoping process and therefore, among other things, will describe and identify: the environmental setting in the Project Area, potential environmental and health impacts from construction and operation of the Project, proposed benefits of the Project, proposed studies (including pre-construction studies and post-construction monitoring for potential impacts to avian and bat species), proposed measures to minimize environmental impacts, reasonable alternatives, other required permits/authorizations, and other relevant information. The PSS will also provide a discussion of potentially significant adverse environmental and health impacts to be assessed relating to the construction and operation of the Project, including potential impacts to: land use in the Project Area; public health and safety; terrestrial ecology (including avian and bat species) and wetlands; water resources and aquatic ecology; communications, transportation and utilities; cultural, historical and recreational resources; visual, including potential for shadow flicker; sound; electromagnetic fields; and impacts on the statewide electrical system.

Within 21 days after filing of the PSS, any person, agency or municipality may submit comments on the PSS by serving such comments on the Applicant and filing a copy with the Secretary of the Department of Public Service. The Applicant will prepare a summary of the material comments and its reply thereto within 21 days after the closing of the comment period. The scoping process is overseen and mediated by a Hearing Examiner designated by the DPS and will commence after required notices have been sent and intervenor funding has been disbursed. Notice will be provided when the Hearing Examiner schedules the scoping meeting.

No less than 90 days after the filing of the PSS, the Applicant will submit an Article 10 Application. Building on the Scoping process and any stipulations agreed to by the parties, the Application will include the studies developed as part of the Scoping process in support of the Project. The Application will include a description of the Project, an evaluation of environmental and health impacts, a summary of public involvement activities, an evaluation of reasonable and available alternative locations, a statement of why any local substantive standards should not be applied, an electric interconnection study including general design study and SRIS, security and emergency plans, statement demonstrating compliance with the most recent State Energy Plan, and other information. The Application will also contain the information set forth in 16 NYCRR 1001, Exhibits 1-41 unless otherwise waived by the Siting Board.

Once an Application is filed and determined by the Siting Board to be complete, the Siting Board will schedule a public hearing on the Application. The Siting Board will also issue a notice of availability of application intervenor funds that are available to be used by parties to participate in formal review of the Application. A pre-hearing conference will be scheduled by the Hearing Examiner to identify intervenors, award intervenor funds, identify issues for the hearing, and establish a case schedule. Additional hearings regarding the application and project impact assessments will be scheduled by the Hearing Examiner as needed. After hearings, the stakeholders may brief their positions and the Hearing Examiner will issue a recommended decision upon which the Siting Board will base its decision. Article 10 requires that all proceedings on the Application, including a final decision by the Siting Board, must be completed within 12 months of when the Application is determined to be complete.

Upon filing of the PSS, Eight Point Wind LLC will provide funding in the amount of \$36,190 to be disbursed by the Siting Board to municipalities and other local parties to help pay expenses, including attorneys and consultants, associated with participating in the Article 10 process during the pre-application review phase. Fifty percent (50%) of these intervenor funds are reserved for municipalities. Additional intervenor funds will be available for the Application/Hearing Phases. Following the filing of the PSS, the Hearing Examiner or the Secretary shall issue a notice of availability of pre-application intervenor funds providing a schedule and related information describing how interested members of the public may apply for pre-application funds. Requests for pre-application funds must be submitted to the Hearing Examiner within thirty (30) days after the issuance of the notice of availability of pre-application intervenor funds. A pre-application meeting to consider funding requests will be convened within no less than 45 but no more than 60 days after the filing of the PSS.

## Eight Point Wind

### **RE: Eight Point Wind Notice of Submission of Preliminary Scoping Statement**

Please see the attached Notice of Submission of Preliminary Scoping Statement, which is being sent to you as a member of the Eight Point Wind Energy Center Stakeholder Group

Eight Point Wind, LLC (the Applicant), a subsidiary of NextEra Energy Resources, LLC, plans to submit an Application to construct a major electric generating facility, the Eight Point Wind Energy Center (or the "Project"), under Article 10 of the Public Service Law. This notice announces that on or about October 10, 2016, the Applicant will file a Public Scoping Statement (PSS), pursuant to 16 NYCRR § 1000.5, which is designed to gather input from the public and interested agencies on the scope and methodology of studies to be conducted in support of the Article 10 Application which will be filed at a later date. The filing of the PSS will start a 21-day public comment period pursuant to 16 NYCRR § 1000.5(g).

## Eight Point Wind Energy Center

# Eight Point Wind, LLC.

## Steuben County, New York

### NOTICE OF SUBMISSION OF PRELIMINARY SCOPING STATEMENT

Eight Point Wind, LLC (the Applicant), a subsidiary of NextEra Energy Resources, LLC (NextEra), plans to submit an Application to construct a major electric generating facility, the Eight Point Wind Energy Center (or the "Project"), under Article 10 of the Public Service Law (PSL). This notice announces that on or about October 10, 2016 the Applicant will file a Public Scoping Statement (PSS), pursuant to 16 NYCRR 1000.5, which is designed to gather input from the public and interested agencies on the scope and methodology of studies to be conducted in support of the Article 10 Application which will be filed at a later date. The filing of the PSS will start a 21-day public comment period.

The proposed Project is an up to 102 MW wind powered electric generating facility comprised of wind turbines and related components located on leased property located in the Towns of Greenwood, Troupsburg and West Union in Steuben County, New York. The Project components are proposed to include the installation and operation of up to 32 wind turbines, associated collection lines (underground and overhead), access roads, permanent meteorological tower(s), laydown areas, an operations and maintenance (O&M) building, and a collection substation. To deliver power to the NYS power grid the Project will include a 115 kilovolt (kV) interconnection line from the collection substation to a new point of interconnection (POI) facilities to be installed within New York State Electric and Gas Corporation's (NYSEG) Bennett Substation in Hornellsville. Since the design of the interconnecting transmission cable is proposed to be greater than 100 kV and the length is anticipated to exceed 10 miles, this component of the Project is anticipated to be considered a "Major Utility Transmission Facility" and subject to Article VII of the Public Service Law, and reviewed in a separate, but related, proceeding at the Public Service Commission. It is anticipated that the Article VII proceeding will be conducted in parallel with the Project's Article 10 review. The final design and layout of the Project is currently under development and is being evaluated based on factors such as the results of studies to be conducted pursuant to the PSS, wind and other data, and land control. While unavailable for inclusion in the PSS, the Project design and layout will be finalized and presented in the Article 10 Application.

The purpose and goal of the Project is to create a wind powered electric generation facility, in order to provide a significant amount of renewable energy into the New York State power grid. The Project will improve fuel diversity within New York State by increasing the amount of electricity produced by wind power, and will do so without the air emissions and water usage that are typically associated with other traditional forms of power generation. In addition, the Project will assist the State in meeting the goals of the 2015 State Energy Plan, which includes a goal of 50% of energy generation from renewable sources by 2030, and other State policy initiatives consistent with the development of the Project. The Project is also expected to provide significant benefit to the local community through lease revenues to participating landowners, temporary construction employment, permanent O&M employment, increased tax revenues, and payments to local businesses through the hospitality industry and the purchase of local supplies and goods. Additionally, economic benefits are expected to be provided to the Towns of Greenwood, Troupsburg and West Union, the local school districts, and Steuben County through an anticipated payment in lieu of taxes (PILOT).

The PSS precedes the formal public scoping process and therefore, among other things, will describe and identify: the environmental setting in the Project Area, potential environmental and health impacts from construction and operation of the Project, proposed benefits of the Project, proposed studies (including pre-construction studies and post-construction monitoring for potential impacts to avian and bat species), proposed measures to minimize environmental impacts, reasonable alternatives, other required permits/authorizations, and other relevant information. The PSS will also provide a discussion of potentially significant adverse environmental and health impacts to be assessed relating to the construction and operation of the Project, including potential impacts to: land use in the Project Area; public health and safety; terrestrial ecology (including avian and bat species) and wetlands; water resources and aquatic ecology; communications, transportation and utilities; cultural, historical and recreational resources; visual, including potential for shadow flicker; sound; electromagnetic fields; and impacts on the statewide electrical system.

Within 21 days after filing of the PSS, any person, agency or municipality may submit comments on the PSS by serving such comments on the Applicant and filing a copy with the Secretary of the Department of Public Service. The Applicant will prepare a summary of the material comments and its reply thereto within 21 days after the closing of the comment period. The scoping process is overseen and mediated by a Hearing Examiner designated by the DPS and will commence after required notices have been sent and intervenor funding has been disbursed. Notice will be provided when the Hearing Examiner schedules the scoping meeting.

No less than 90 days after the filing of the PSS, the Applicant will submit an Article 10 Application. Building on the Scoping process and any stipulations agreed to by the parties, the Application will include the studies developed as part of the Scoping process in support of the Project. The Application will include a description of the Project, an evaluation of environmental and health impacts, a summary of public involvement activities, an evaluation of reasonable and available alternative locations, a statement of why any local substantive standards should not be applied, an electric interconnection study including general design study and SRIS, security and emergency plans, statement demonstrating compliance with the most recent State Energy Plan, and other information. The Application will also contain the information set forth in 16 NYCRR 1001, Exhibits 1-41 unless otherwise waived by the Siting Board.

Once an Application is filed and determined by the Siting Board to be complete, the Siting Board will schedule a public hearing on the Application. The Siting Board will also issue a notice of availability of application intervenor funds that are available to be used by parties to participate in formal review of the Application. A pre-hearing conference will be scheduled by the Hearing Examiner to identify intervenors, award intervenor funds, identify issues for the hearing, and establish a case schedule. Additional hearings regarding the application and project impact assessments will be scheduled by the Hearing Examiner as needed. After hearings, the stakeholders may brief their positions and the Hearing Examiner will issue a recommended decision upon which the Siting Board will base its decision. Article 10 requires that all proceedings on the Application, including a final decision by the Siting Board, must be completed within 12 months of when the Application is determined to be complete.

Upon filing of the PSS, Eight Point Wind LLC will provide funding in the amount of \$36,190 to be disbursed by the Siting Board to municipalities and other local parties to help pay expenses, including attorneys and consultants, associated with participating in the Article 10 process during the pre-application review phase. Fifty percent (50%) of these intervenor funds are reserved for municipalities. Additional intervenor funds will be available for the Application/Hearing Phases. Following the filing of the PSS, the Hearing Examiner or the Secretary shall issue a notice of availability of pre-application intervenor funds providing a schedule and related information describing how interested members of the public may apply for pre-application funds. Requests for pre-application funds must be submitted to the Hearing Examiner within thirty (30) days after the issuance of the notice of availability of pre-application intervenor funds. A pre-application meeting to consider funding requests will be convened within no less than 45 but no more than 60 days after the filing of the PSS.

### NOTICE OF SUBMISSION OF PRELIMINARY SCOPING STATEMENT

Eight Point Wind, LLC (the Applicant), a subsidiary of NextEra Energy Resources, LLC (NextEra), plans to submit an Application to construct a major electric generating facility, the Eight Point Wind Energy Center (or the "Project"), under Article 10 of the Public Service Law (PSL). This notice announces that on or about October 10, 2016 the Applicant will file a Public Scoping Statement (PSS), pursuant to 16 NYCRR 1000.5, which is designed to gather input from the public and interested agencies on the scope and methodology of studies to be conducted in support of the Article 10 Application which will be filed at a later date. The filing of the PSS will start a 21-day public comment period.

The proposed Project is an up to 102 MW wind powered electric generating facility comprised of wind turbines and related components located on leased property located in the Towns of Greenwood, Troupsburg and West Union in Steuben County, New York. The Project components are proposed to include the installation and operation of up to 32 wind turbines, associated collection lines (underground and overhead), access roads, permanent meteorological tower(s), laydown areas, an operations and maintenance (O&M) building, and a collection substation. To deliver power to the NYS power grid the Project will include a 115 kilovolt (kV) interconnection line from the collection substation to a new point of interconnection (POI) facilities to be installed within New York State Electric and Gas Corporation's (NYSEG) Bennett Substation in Hornellsville. Since the design of the interconnecting transmission cable is proposed to be greater than 100 kV and the length is anticipated to exceed 10 miles, this component of the Project is anticipated to be considered a "Major Utility Transmission Facility" and subject to Article VII of the Public Service Law, and reviewed in a separate, but related, proceeding at the Public Service Commission. It is anticipated that the Article VII proceeding will be conducted in parallel with the Project's Article 10 review. The final design and layout of the Project is currently under development and is being evaluated based on factors such as the results of studies to be conducted pursuant to the PSS, wind and other data, and land control. While unavailable for inclusion in the PSS, the Project design and layout will be finalized and presented in the Article 10 Application.

The purpose and goal of the Project is to create a wind powered electric generation facility, in order to provide a significant amount of renewable energy into the New York State power grid. The Project will improve fuel diversity within New York State by increasing the amount of electricity produced by wind power, and will do so without the air emissions and water usage that are typically associated with other traditional forms of power generation. In addition, the Project will assist the State in meeting the goals of the 2015 State Energy Plan, which includes a goal of 50% of energy generation from renewable sources by 2030, and other State policy initiatives consistent with the development of the Project. The Project is also expected to provide significant benefit to the local community through lease revenues to participating landowners, temporary construction employment, permanent O&M employment, increased tax revenues, and payments to local businesses through the hospitality industry and the purchase of local supplies and goods. Additionally, economic benefits are expected to be provided to the Towns of Greenwood, Troupsburg and West Union, the local school districts, and Steuben County through an anticipated payment in lieu of taxes (PILOT).

The PSS precedes the formal public scoping process and therefore, among other things, will describe and identify: the environmental setting in the Project Area, potential environmental and health impacts from construction and operation of the Project, proposed benefits of the Project, proposed studies (including pre-construction studies and post-construction monitoring for potential impacts to avian and bat species), proposed measures to minimize environmental impacts, reasonable alternatives, other required permits/authorizations, and other relevant information. The PSS will also provide a discussion of potentially significant adverse environmental and health impacts to be assessed relating to the construction and operation of the Project, including potential impacts to: land use in the Project Area; public health and safety; terrestrial ecology (including avian and bat species) and wetlands; water resources and aquatic ecology; communications, transportation and utilities; cultural, historical and recreational resources; visual, including potential for shadow flicker; sound; electromagnetic fields; and impacts on the statewide electrical system.

Within 21 days after filing of the PSS, any person, agency or municipality may submit comments on the PSS by serving such comments on the Applicant and filing a copy with the Secretary of the Department of Public Service. The Applicant will prepare a summary of the material comments and its reply thereto within 21 days after the closing of the comment period. The scoping process is overseen and mediated by a Hearing Examiner designated by the DPS and will commence after required notices have been sent and intervenor funding has been disbursed. Notice will be provided when the Hearing Examiner schedules the scoping meeting.

No less than 90 days after the filing of the PSS, the Applicant will submit an Article 10 Application. Building on the Scoping process and any stipulations agreed to by the parties, the Application will include the studies developed as part of the Scoping process in support of the Project. The Application will include a description of the Project, an evaluation of environmental and health impacts, a summary of public involvement activities, an evaluation of reasonable and available alternative locations, a statement of why any local substantive standards should not be applied, an electric interconnection study including general design study and SRIS, security and emergency plans, statement demonstrating compliance with the most recent State Energy Plan, and other information. The Application will also contain the information set forth in 16 NYCRR 1001, Exhibits 1-41 unless otherwise waived by the Siting Board.

Once an Application is filed and determined by the Siting Board to be complete, the Siting Board will schedule a public hearing on the Application. The Siting Board will also issue a notice of availability of application intervenor funds that are available to be used by parties to participate in formal review of the Application. A pre-hearing conference will be scheduled by the Hearing Examiner to identify intervenors, award intervenor funds, identify issues for the hearing, and establish a case schedule. Additional hearings regarding the application and project impact assessments will be scheduled by the Hearing Examiner as needed. After hearings, the stakeholders may brief their positions and the Hearing Examiner will issue a recommended decision upon which the Siting Board will base its decision. Article 10 requires that all proceedings on the Application, including a final decision by the Siting Board, must be completed within 12 months of when the Application is determined to be complete.

Upon filing of the PSS, Eight Point Wind LLC will provide funding in the amount of \$36,190 to be disbursed by the Siting Board to municipalities and other local parties to help pay expenses, including attorneys and consultants, associated with participating in the Article 10 process during the pre-application review phase. Fifty percent (50%) of these intervenor funds are reserved for municipalities. Additional intervenor funds will be available for the Application/Hearing Phases. Following the filing of the PSS, the Hearing Examiner or the Secretary shall issue a notice of availability of pre-application intervenor funds providing a schedule and related information describing how interested members of the public may apply for pre-application funds. Requests for pre-application funds must be submitted to the Hearing Examiner within thirty (30) days after the issuance of the notice of availability of pre-application intervenor funds. A pre-application meeting to consider funding requests will be convened within no less than 45 but no more than 60 days after the filing of the PSS.
