Re: *Matter No. 21-00749: Application of Prattsburgh Wind, LLC for a Permit Pursuant to § 94-c of the New York Executive Law for Construction of a Wind Electric Generating Facility to be Located in the Towns of Prattsburgh, Avoca, Cohocton, Howard and Wheeler, Steuben County, NY*

Dear ORES Staff:

This office represents the Prattsburgh Wind, LLC (the “Applicant”), in the above-referenced proceeding. The Applicant hereby files its Application for a Permit pursuant to Section 94-c of the New York State Executive Law and Title 19 of NYCRR, Part 900, to construct and operate a major wind electric generating facility of up to 147 Megawatts (“MW”) in electric generating capacity in the Towns of Prattsburgh, Avoca, Cohocton, Howard and Wheeler, Steuben County, New York (the “Facility” or “Project”).

The Project will significantly contribute to the State’s clean energy and carbon reduction goals and provide direct environmental and socioeconomic benefits to the State and the local economy. The Project is a zero-emission, renewable source of energy that will assist the State in meeting the goals of both the Climate Leadership and Community Protection Act (CLCPA) and State Energy Plan, which include obtaining 70% of the State’s energy consumption from renewable sources by 2030, and 100% of the State’s energy from clean sources by 2040. These carbon reduction benefits will enable achievement of the public health and economic goals of the CLCPA and provide benefits to consumers through the additional supply of clean, renewable electricity onto the State’s electric grid.

The Facility will also provide an economic stimulus to the area during construction by providing jobs and local contracts for goods and services. During operation, the Facility will offer long-term highly skilled operational positions and significant long-term economic benefits through lease revenue to local landowners and revenue to the community.

Although the construction and operation of the Project may result in certain temporary and long-term environmental impacts, as fully described in the Application, the Applicant has thoughtfully designed the Project in accordance with the Office of Renewable Energy Siting's (the "Office" or "ORES") regulations to avoid and minimize negative impacts to land and the community. The Project design considers the natural features and surrounding land uses of the area and avoids forest clearing and wetlands to the extent practicable. The Applicant consulted with the Office and relevant State agencies, including the New York State Department of Environmental Conservation and the State Office of Parks and Historic Preservation, on the scope and preparation of environmental and cultural resource studies to ensure that the Applicant's assessment of Project impacts aligned with State law and the Office's regulations.

Throughout the Project design and pre-application phases, the Applicant worked with local officials from the Towns of Prattsburgh, Avoca, Cohocton, Howard and Wheeler to understand the requirements of local law with respect to construction and operation of the Project. The Applicant held virtual meetings and open houses throughout the pre-application stage. These meetings were open to the public and provided interested stakeholders with the opportunity to learn about the Project and provide feedback on elements of Project planning. The Applicant considered and incorporated feedback from stakeholders on local concerns and interests. After many months of pre-application engagement and study, the Applicant is pleased to submit this Application under the State's new major renewable energy facility siting and permitting process pursuant to Execution Law Section 94-c and 19 NYCRR Part 900.

In accordance with 19 NYCRR §§ 900-1.4(a)(1) and (2), the enclosed Application includes the Office's application form and all exhibits required pursuant to 19 NYCRR Subpart 900-2. The Applicant has not requested any site-specific conditions in lieu of any exhibit requirement or uniform standard or condition. The remainder of this correspondence addresses compliance with 19 NYCRR § 900-1.4(a)(4)-(10) and § 900-1.4(b).

19 NYCRR § 900-1.4(a)

(4) Project Website.

The Applicant has created a website through which it has disseminated, and will continue to disseminate, information to the public. *See* <https://www.prattsburghwindfarm.com/>. The website provides the material required by 19 NYCRR § 900-1.4(a)(4).

(5) Identification of Critical Infrastructure and Trade Secret Information.

Concurrent with the filing of this Application, the Applicant submitted a request to the Office that certain documents and information contained within the Application be treated as confidential ("Request for Nondisclosure"), as specifically identified therein, pursuant to §87(2)(a) and §89(5) of the New York State Public Officers Law and other applicable state and federal laws. The Applicant's Request for Nondisclosure is provided with this Application.

(6) Identification of Confidential Information.

The Application does contain the following confidential information, submitted under confidential cover with a request for confidential protection, as noted in Section (5) above:

- Confidential information with respect to the location of occupied habitat and breeding habitat of threatened and endangered species in Exhibit 12 and Appendices thereto;
- Confidential information with respect to the existing major communications infrastructure in Figure 3-4 and Appendix 21-A;
- Confidential information with respect to the location, character, or ownership of cultural resources in Appendix 9-E;
- Confidential information with respect to the location of public and private groundwater wells in Exhibit 13 and Appendices and Figures thereto;
- Confidential information with respect to estimated expenditures during development and construction of the facility in Exhibit 18;
- The confidential Systems Reliability Impact Study submitted under separate cover to the Office as Appendix 21-A;
- Confidential information with respect to trade secret/confidential commercial information from turbine manufacturers in Appendix 5-F and Appendix 7-A.

(7) Affidavit of Service.

Enclosed as Attachment 1 are the Affidavits of Service for the Application and all accompanying documents hand-delivered to ORES on September 23, 2022, and for service upon the other parties identified in 19 NYCRR § 900-1.6(a) on September 22, 2022, via USPS, and on September 26, 2022 via the State Historic Preservation Office's Cultural Resource Information System.

(8) Payment of Local Agency Fee.

Prior to filing of this Application, the Applicant initiated payment for the local agency account in an amount equal to one thousand (1,000) dollars for each one thousand (1,000) kilowatts of the proposed project's nameplate capacity, as required by 19 NYCRR § 900- 1.4(a)(8). ORES has been notified that payment was initiated for the Local Agency Fee.

(9) Payment of Application Fee.

Prior to filing of this Application, the Applicant submitted to the Office the fee required by 19 NYCRR § 900-1.5. ORES has confirmed that payment of the Application Fee was received.

(10) Additional Information Requested by the Office.

The Applicant is not aware of any additional information requested by the Office.

19 NYCRR § 900-1.4(b)

Water Quality Certification

The Applicant will consult with the appropriate agencies, including ORES, as soon as practicable after filing the application regarding Water Quality Certification.

In accordance with 19 NYCRR § 900-1.6(c), no less than 3 days prior to the submission of this Application, the Applicant published and served 3-day notices to inform stakeholders and members of the public of the forthcoming Application. Proofs of service for these 3-day notices, which included mailings to those identified in Section 900-1.6(c) of the regulations, and publication in the *Hornell Spectator/Evening Tribune*, the *Corning Leader*, and the *Southern Tier Shopper*, are appended hereto as Attachment 2. This notice is also posted to the Project website.

Please feel free to contact our office if you have any questions regarding the above.

Very truly yours,

s/ *Jessica Ansert Klami*

3-DAY NOTICE OF INTENT TO FILE AN APPLICATION

Prattsburgh Wind, LLC, a wholly-owned subsidiary of Terra-Gen, LLC, is proposing to construct a major electric generating facility under Section 94-c of the Executive Law. This notice announces that on or about **September 23, 2022** Prattsburgh Wind will file an Application pursuant to Section 94-c of the New York State Executive Law (94-c Process), seeking a permit from the Office of Renewable Energy Siting authorizing the construction and operation of the Facility. A 60-day notice of Intent to File an Application was previously published in accordance with 19 NYCRR §900-1.3(d) on or about May 13, 2022. The 94-c Process has been implemented by rules enacted by the Office of Renewable Energy Siting and establishes a review process with uniform standards and conditions for all renewable energy projects. The uniform standards and conditions are available at 19 NYCRR 900.6 and <https://ores.ny.gov/regulations>.

The Prattsburgh Wind Farm, is a 147 megawatt (MW) wind-powered electric generating facility proposed to be located in the Towns of Prattsburgh, Avoca, Cohocton, Howard, and Wheeler in Steuben County, New York (the “Facility”). The purpose of the proposed Facility is to generate wind-powered electricity that will provide a significant source of renewable electricity to the New York State power grid. Under the 2019 Climate Leadership and Community Protection Act, New York State has committed to generating all electricity from renewable sources by 2040. The proposed Facility will help New York achieve that mandate. The Facility will include the installation and operation of up to 37 wind turbines, together with the associated electrical collection lines (below ground and overhead), access roads, meteorological towers, operation and maintenance (“O&M”) building, and collector substation. Prattsburgh Wind will also construct a new point of interconnect (“POI”) substation and 230-kV high-voltage loop-in and loop-out transmission lines (“NYSEG Facilities”) adjacent to its collector substation. Upon completion, the ownership of these NYSEG Facilities will be transferred over to NYSEG.

For more information about the Facility please visit the Facility website at <https://www.prattsburghwindfarm.com/> or contact Prattsburgh Wind at:

Terra-Gen, LLC
Attn: Kevin Sheen, VP of Business Development
437 Madison Avenue, Ste. A
New York, NY 10022
Toll Free Number: (888) 802-8834
Local Number: (607) 622-8311
contact@terra-gen.com

Upon filing the Application, Prattsburgh Wind will provide funding in the amount of \$147,000 to be deposited into a local agency account to be made available to local agencies and potential community intervenors for the purpose of contributing to a complete record leading to an informed permit decision as to the appropriateness of the site and the facility, and for local agencies, shall include the use of funds to determine whether a proposed facility is designed to be sited, constructed and operated in compliance with applicable local laws and regulations.

Any local agency or potential community intervenor shall submit a request for initial funding **within thirty (30) days of the date of application filing** and such requests can be made to:

general@ores.ny.gov

OR by mail to:

Attention: Request for Local Agency Account Funding

Notary Public

BRITTANY IONE BARDIN
Notary Public, State of New York
No. 01BA6364414
Qualified in Schenectady County. 25
Commission Expires September 11, 2025

Prattsburgh Wind Farm Steuben County, NY

3-DAY NOTICE OF INTENT TO FILE AN APPLICATION

Prattsburgh Wind, LLC, a wholly-owned subsidiary of Terra-Gen, LLC, is proposing to construct a major electric generating facility under Section 94-c of the Executive Law. This notice announces that on or about **September 23, 2022** Prattsburgh Wind will file an Application pursuant to Section 94-c of the New York State Executive Law (94-c Process), seeking a permit from the Office of Renewable Energy Siting authorizing the construction and operation of the Facility. A 60-day notice of Intent to File an Application was previously published in accordance with 19 NYCRR §900-1.3(d) on or about May 13, 2022. The 94-c Process has been implemented by rules enacted by the Office of Renewable Energy Siting and establishes a review process with uniform standards and conditions for all renewable energy projects. The uniform standards and conditions are available at 19 NYCRR 900.6 and <https://ores.ny.gov/regulations>.

The Prattsburgh Wind Farm, is a 147 megawatt (MW) wind-powered electric generating facility proposed to be located in the Towns of Prattsburgh, Avoca, Cohocton, Howard, and Wheeler in Steuben County, New York (the “Facility”). The purpose of the proposed Facility is to generate wind-powered electricity that will provide a significant source of renewable electricity to the New York State power grid. Under the 2019 Climate Leadership and Community Protection Act, New York State has committed to generating all electricity from renewable sources by 2040. The proposed Facility will help New York achieve that mandate. The Facility will include the installation and operation of up to 37 wind turbines, together with the associated electrical collection lines (below ground and overhead), access roads, meteorological towers, operation and maintenance (“O&M”) building, and collector substation. Prattsburgh Wind will also construct a new point of interconnect (“POI”) substation and 230-kV high-voltage loop-in and loop-out transmission lines (“NYSEG Facilities”) adjacent to its collector substation. Upon completion, the ownership of these NYSEG Facilities will be transferred over to NYSEG.

For more information about the Facility please visit the Facility website at <https://www.prattsburghwindfarm.com/> or contact Prattsburgh Wind at:

Terra-Gen, LLC
Attn: Kevin Sheen, VP of Business Development
437 Madison Avenue, Ste. A
New York, NY 10022
Toll Free Number: (888) 802-8834
Local Number: (607) 622-8311
contact@terra-gen.com

Upon filing the Application, Prattsburgh Wind will provide funding in the amount of \$147,000 to be deposited into a local agency account to be made available to local agencies and potential community intervenors for the purpose of contributing to a complete record leading to an informed permit decision as to the appropriateness of the site and the facility, and for local agencies, shall include the use of funds to determine whether a proposed facility is designed to be sited, constructed and operated in compliance with applicable local laws and regulations.

Any local agency or potential community intervenor shall submit a request for initial funding **within thirty (30) days of the date of application filing** and such requests can be made to:

general@ores.ny.gov

OR by mail to:

Subject: Re: Matter No. 21-00749 - Prattsburgh Wind, LLC - 3-Day Notice of Intent to File an Application

Thank you for emailing my office. I appreciate you taking the time to share your thoughts and opinions with me regarding pending legislation, budget matters or other issues of importance to you.

I want to apologize for the automated response, but given the volume of emails and letters I receive each day, we do not always have the resources to answer each one immediately. Please know I see each email received and I take into consideration your viewpoint before arriving at a decision and voting on issues.

If you are a resident of my Assembly District and your email relates to a problem or concern you are having with a state agency or another matter with which you are seeking my assistance, please do not hesitate to call my office directly.

Thank you again for contacting my office regarding this issue. As always, please do not hesitate to contact me in the future whenever I can be of assistance.

Sincerely,

Assemblyman Phil Palmesano
132nd Assembly District

Megan Gillespie

Subject: Automatic reply: Matter No. 21-00749 - Prattsburgh Wind, LLC - 3-Day Notice of Intent to File an Application

Thank you for taking the time to contact me. My office receives a high volume of emails every day on a wide range of issues and your input is important to me.

Please be assured that my staff informs me of the comments and concerns that are contained in emails and phone calls we receive and I am glad to know the thoughts and needs of the people of my district.

If your inquiry requires direct, personal assistance by my office, we will contact you as soon as possible. If you need a more immediate response, or if the initial response we provide does not fully address your needs, please call my district office at 607-735-9671 or my Albany office at 518-455-2091, so that we can be of service to you.

Thank you again for taking the time to contact me.

Senator Thomas F. O'Mara

Schuelein

Continued from Page 1A

the end of the academic year. Schuelein was also previously the principal of Blind Brook High School in Rye Brook and the assistant principal and CTE Department chair at Lindenhurst High School. Schuelein began his career as a high school social studies teacher at a school in New York City. He

went on to serve as the assistant principal for Pupil Personnel Services in the same school. While the Andover School Board did not comment on the superintendent situation at a regularly-scheduled meeting Wednesday night, some members of the public did. Devin Davis encouraged the board to look closer to home for its next superintendent. “I think that the last two choices (for superintendent) have been evidence to

the fact that sometimes people from outside the area don’t always understand our particular situation,” Davis told the board. “We need somebody who is going to appreciate and understand the people who live, work, and go to school here. “I think that there are good leaders right in front of us that we are looking over and not considering because our search is focused elsewhere on someone with a title or a credential.” Mary Ann Weber suggested that “any

time in the future that the board of education needs to conduct a search for any high-level position. that it be done directly by the board without BOCES reviewing the applications and sending that to the board.” Weber added, “This board knows the community. They know the school. They know the students. Somebody who sits in Buffalo or even over in Cattaraugus County doesn’t understand this area and this community.”

Heating

Continued from Page 1A

its natural gas inventory before winter, natural gas prices have spiked to a 14-year high. High natural gas prices have prompted some switching to burning oil or coal for electricity.

How much more could Americans pay in their homes this winter?

The average cost of home heating is expected to rise 17.2% from last winter to \$1,202, the second consecutive year of major prices increases and the highest price in more than a decade, the National Energy Assistance Directors Association (NEADA) said. Already, more than 20 million families, or about 1 of 6 American families, are behind on their utility bills, it said. “The rise in home energy costs this winter will put millions of lower-income families at risk of falling behind on their energy bills and having no choice but to make difficult decisions between paying for food, medicine and rent,” said Mark Wolfe, NEADA’s executive director. For 2022, NEADA sees the cost of utility services rising to \$3,803, reflecting high prices for natural gas, heating oil and propane and this summer’s heat waves. The high temperatures increased air conditioning costs to about \$600 from \$450, on average, last summer.

But haven’t gasoline and oil prices fallen?

Yes, oil and gasoline prices fell sharply on less demand as drivers cut back this summer when pump prices surged, prospects grew for recessions around the globe, and China locked down regions as it tried to halt the spread of COVID-19. The gasoline index shed 10.6% in August from July, said the Bureau of Labor Statistics in its consumer price index re-

The cost of energy around most of the world has started to soar. This is partly due to Russia's attack on Ukraine, which has led some nations to boycott Russian oil, triggering a shortage of oil and gas. Russia is the world's second-largest producer of crude. OPEC+ nation. HIKESTERSON / ISTOCK VIA GETTY IMAGES

port on Tuesday. That reflected the steady decline this summer in the national average for a gallon of regular unleaded gasoline to \$3.71 this week, a level not seen since the beginning of March and mostly on the heels of lower oil prices, AAA said on Monday. Oil prices are down about a third from their June peaks that pushed gas prices just above \$5 a gallon. But as those fell, natural gas prices continued to climb as Russia cut its supply to Europe, creating frantic global demand.

Why could prices rise now?

First, Biden’s daily releases from the strategic petroleum reserves end next month if the administration doesn’t extend it, which would eliminate one supply source. Further, the reserves have fallen to their lowest since October 1984, U.S. Department of Energy data show, and those reserves eventually will have to be replaced, taking out future supply. More important, on Dec. 5, the Group of Seven industrialized nations of Japan, the U.S., the U.K., Canada, Germany, France and Italy plan to cap Russian oil prices. “If they do, Russia says it’s cutting ev-

erything – oil and natural gas exports – off,” said Joe Brusuelas, chief economist at RSM US LLP. If that happens, “oil prices will retest the highs set in June and cause the average price of regular gas to move well back above the current \$3.70 per gallon.” And natural gas prices probably would surge again.

How does a price cap on Russian oil work?

By not buying Russian oil above a certain price still be determined, G7 countries would limit Russia’s oil revenue to finance its war in Ukraine. Enforcing the cap would rely heavily on denying London-brokered shipping insurance, which covers about 95% of the world’s tanker fleet, and finance to cargo priced above the cap. The cap avoids an outright ban of Russian oil that could have sent world oil prices surging since Russia is the world’s largest exporter of oil to global markets and the second largest crude oil exporter behind Saudi Arabia. Caps ensure Russian oil can continue to flow but still deplete Russia’s coffers. In response, Moscow warned it would stop selling oil and natural gas to

countries imposing price caps on Russian energy exports. That, analysts say, would cut supply and send prices of both fuels higher.

Can’t OPEC+ produce more oil?

The Organization of the Petroleum Exporting Countries (OPEC) and 10 other major non-OPEC oil-exporting nations (collectively called OPEC+) could agree to raise oil production, but it has been loath to do so. After oil prices plummeted when economies closed to slow the spread of COVID-19 in March 2020, OPEC+ has been cautious in raising production for fear of getting burned again. Earlier this month, the group surprised markets and trimmed production targets by about 100,000 barrels a day from October. It was seen as a symbolic move to telegraph that it’s monitoring oil prices and wouldn’t hesitate to act if it felt oil prices were falling too fast or too much. Some also question whether OPEC+ can even produce much more oil. The group has regularly failed to meet its own production quota because of capacity constraints in some countries.

Who would hurt the most?

Europeans, because they rely on Russian natural gas. Russia already has closed two major pipelines to Europe. That has sent prices up 300% from last year to the highest levels since 2008. But Americans also are feeling pain. The U.S. has sent record liquefied natural gas exports to Europe to help it boost supplies before winter. But now, as prices climb, the U.S. finds its stockpiles low. “We appreciate that the Biden Administration has been working with European allies to expand fuel exports to Europe,” six New England governors wrote in a letter to Energy Secretary Jennifer Granholm in July. “A similar effort should be made for New England,” the only U.S. region that imports liquefied natural gas because it doesn’t have ready access to U.S. supplies.

PRATTSBURGH WIND FARM STEBEN COUNTY, NEW YORK 3-DAY NOTICE OF INTENT TO FILE AN APPLICATION

Prattsburgh Wind, LLC, a wholly-owned subsidiary of Terra-Gen, LLC, is proposing to construct a major electric generating facility under Section 94-c of the Executive Law. This notice announces that on or about **September 23, 2022** Prattsburgh Wind will file an Application pursuant to Section 94-c of the New York State Executive Law (94-c Process), seeking a permit from the Office of Renewable Energy Siting authorizing the construction and operation of the Facility. A 60-day notice of Intent to File an Application was previously published in accordance with 19 NYCRR §900-1.3(d) on or about May 13, 2022. The 94-c Process has been implemented by rules enacted by the Office of Renewable Energy Siting and establishes a review process with uniform standards and conditions for all renewable energy projects. The uniform standards and conditions are available at 19 NYCRR 900.6 and <https://ores.ny.gov/regulations>.

The Prattsburgh Wind Farm, is a 147 megawatt (MW) wind-powered electric generating facility proposed to be located in the Towns of Prattsburgh, Avoca, Cohocton, Howard, and Wheeler in Steuben County, New York (the “Facility”). The purpose of the proposed Facility is to generate wind-powered electricity that will provide a significant source of renewable electricity to the New York State power grid. Under the 2019 Climate Leadership and Community Protection Act, New York State has committed to generating all electricity from renewable sources by 2040. The proposed Facility will help New York achieve that mandate. The Facility will include the installation and operation of up to 37 wind turbines, together with the associated electrical collection lines (below ground and overhead), access roads, meteorological towers, operation and maintenance (“O&M”) building, and collector substation. Prattsburgh Wind will also construct a new point of interconnect (“POI”) substation and 230-kV high-voltage loop-in and loop-out transmission lines (“NYSEG Facilities”) adjacent to its collector substation. Upon completion, the ownership of these NYSEG Facilities will be transferred over to NYSEG.

For more information about the Facility please visit the Facility website at <https://www.prattsburghwindfarm.com/> or contact Prattsburgh Wind at:

Terra-Gen, LLC, Attn: Kevin Sheen, VP of Business Development, 437 Madison Avenue, Ste. A, New York, NY 10022, Toll Free Number: (888) 802-8834, Local Number: (607) 622-8311, contact@terra-gen.com.

Upon filing the Application, Prattsburgh Wind will provide funding in the amount of \$147,000 to be deposited into a local agency account to be made available to local agencies and potential community intervenors for the purpose of contributing to a complete record leading to an informed permit decision as to the appropriateness of the site and the facility, and for local agencies, shall include the use of funds to determine whether a proposed facility is designed to be sited, constructed and operated in compliance with applicable local laws and regulations.

Any local agency or potential community intervenor shall submit a request for initial funding **within thirty (30) days of the date of application filing** and such requests can be made to:

general@ores.ny.gov OR by mail to: Attention: Request for Local Agency Account Funding, Office of Renewable Energy Siting, Empire State Plaza, 240 State Street, P-1 South, J Dock, Albany, NY 12242

Syracuse

Continued from Page 1B

O’Connell hooked up with favorite receiver Jones for a 55-yard score that got the Boilermakers within 25-22 with 6:41 left in the game. A missed 41-yard field goal by Mitchell Fineran with 2:54 left could have tied it.

The teams had met only once before, when in 2004 Purdue beat the Orange

51-0 at Ross-Ade Stadium.

THE TAKEAWAY

Purdue: The Boilermakers were without running back King Doerue, who is nursing a calf injury. Doerue rushed for 68 yards on 18 attempts with three touchdowns in Purdue’s first two games. Without him, the Boilermakers struggled to get much going on the ground, but typically got plenty in the air from O’Connell. The Purdue quarter-

back had lots of time in the first half and threw for 175 yards on 21 of 27 attempts. Syracuse applied more pressure on him in the second half, but O’Connell still managed to successfully throw deep.

Syracuse: Shrader had been one of the nation’s most accurate passers through his first two games this season (38-48, .792), but Purdue put sustained pressure early on him, forcing Shrader to scramble and mostly abandon an air attack. He completed 4 of 10 passes for just 35 yards in the first half. He was

much more effective in the second half, completing 9 of 19 passes for 146 yards and three touchdowns. Purdue locked up Syracuse running back Sean Tucker, who rushed 18 times for 42 yards.

UP NEXT

Purdue hosts Florida Atlantic on Saturday night.

Syracuse continues its four-game homestand against ACC foe Virginia on Friday night.

QBs

Continued from Page 1B

have the say on general managers and coaches. It took several decades to get to the new normal for QBs.

Along the way, Doug Williams became the first Black QB to win a Super Bowl following the 1987 season. Wilson and Mahomes joined him over the past nine years.

Michael Vick was the first Black QB selected No. 1 overall in the draft in 2001. Steve McNair became the first Black QB to win MVP in 2003.

All of those QBs and many others have

dealt with many stereotypes. Some still do. Jackson said a scout from the Los Angeles Chargers asked him to run routes at the NFL combine in 2018. He refused. The Baltimore Ravens selected him with the 32nd pick in the 2018 draft. He was MVP in his second season.

Donovan McNabb said college scouts asked him to play running back or wide receiver. He wouldn’t switch positions. He was drafted No. 2 overall by the Philadelphia Eagles in 1999 and led the team to five NFC championship games in 11 seasons.

“Center, quarterback, wide receiver were the last positions to integrate in the National Football League,” Vincent said. “Why? Because someone said that they

were thinking positions and that Black QBs didn’t have the aptitude, didn’t have the football IQ.”

While that unfair criticism isn’t widely heard anymore, it hasn’t been eradicated. It still seeps through when a critic says a Black quarterback can’t read coverages or doesn’t understand the playbook.

Coaches seem to have evolved beyond that stereotype. Teams just want to win and it doesn’t matter who is under center, as evidenced by the contract the Browns gave Watson even though he faced accusations of sexual assault and harassment.

“It’s the evolution of the game, and it’s coaches who have realized that not only can these men win, they’re dynamic and

they can lead and they’re winning at a high clip,” Vincent said. “There’s not a kid around the country that’s a person of color that doesn’t believe he can’t be a quarterback because they’re everywhere and they’re winning championships.”

Among the coaches who have relied on Black QBs is Andy Reid. From McNabb to Vick to Mahomes, Reid has had a Black QB start 272 of 406 games he has coached during his 24-year career with the Eagles and Chiefs.

“This is a great example that these men can lead,” Vincent said about the number of Black QBs. “The barriers were a myth.”

It’s time for owners to embrace that Black GMs and coaches can also lead.

Giants

Continued from Page 1B

for what has transpired for the better part of the last decade.

Daboll became a bit of a folk hero in New York sports circles in the aftermath of the Giants’ upset over the Titans. He was praised for the fight the Giants showed in rallying from a 13-0 deficit, and when Bullock’s kick missed, television cameras captured Daboll’s fist pump celebration after which he received a Gato-

rade bath from Oshane Ximines.

Then, in the locker room afterward, Daboll danced with his players to Notorius B.I.G.’s “Juicy,” and the video went viral. Daboll plans to live in the moment Sunday, his first game as head coach inside MetLife. From soaking in the atmosphere in the parking lots while driving by to appreciating being on the Giants’ sideline where greats once walked, the opportunity that awaits when the Giants welcome the Panthers for their home opener is a special one.

The Giants have been lauded all week, and now there is something to live up to

this Sunday. The fans are desperate to cheer a winner, and it’s been far too long. They’re favorites to beat Carolina in the first of three straight home games prior to their trip to London to take on the Green Bay Packers.

If the Giants prevail Sunday, the buzz will continue to build.

The Cowboys are without Dak Prescott. The Bears, despite winning last week, will likely arrive as underdogs.

For a team that has endured plenty of nightmares in recent years, Daboll and the Giants gave the fan base reason to dream last Sunday - and a lot sooner than

anticipated.

Win the game and win the crowd. Sometimes it’s as simple as that.

“They’re pretty smart fans up here, so the more we can get in there, the better it’ll be,” Daboll said. “They’re part of our team on home games, and I firmly believe that. Wherever I’ve been, the places that have great support like we do, you go into those places, and it’s hard. It’s hard to communicate as an offense when you’re on the other side, and you get a lot of energy when you’re playing special teams and on defense. And we’ve got to give them a reason to cheer, too.”

PRATTSBURGH WIND FARM
STEUBEN COUNTY, NEW YORK
3-DAY NOTICE OF INTENT TO FILE AN APPLICATION

Prattsburgh Wind, LLC, a wholly-owned subsidiary of Terra-Gen, LLC, is proposing to construct a major electric generating facility under Section 94-c of the Executive Law. This notice announces that on or about **September 23, 2022** Prattsburgh Wind will file an Application pursuant to Section 94-c of the New York State Executive Law (94-c Process), seeking a permit from the Office of Renewable Energy Siting authorizing the construction and operation of the Facility. A 60-day notice of Intent to File an Application was previously published in accordance with 19 NYCRR §900-1.3(d) on or about May 13, 2022. The 94-c Process has been implemented by rules enacted by the Office of Renewable Energy Siting and establishes a review process with uniform standards and conditions for all renewable energy projects. The uniform standards and conditions are available at 19 NYCRR 900.6 and <https://ores.ny.gov/regulations>.

The Prattsburgh Wind Farm, is a 147 megawatt (MW) wind-powered electric generating facility proposed to be located in the Towns of Prattsburgh, Avoca, Cohocton, Howard, and Wheeler in Steuben County, New York (the “Facility”). The purpose of the proposed Facility is to generate wind-powered electricity that will provide a significant source of renewable electricity to the New York State power grid. Under the 2019 Climate Leadership and Community Protection Act, New York State has committed to generating all electricity from renewable sources by 2040. The proposed Facility will help New York achieve that mandate. The Facility will include the installation and operation of up to 37 wind turbines, together with the associated electrical collection lines (below ground and overhead), access roads, meteorological towers, operation and maintenance (“O&M”) building, and collector substation. Prattsburgh Wind will also construct a new point of interconnect (“POI”) substation and 230-kV high-voltage loop-in and loop-out transmission lines (“NYSEG Facilities”) adjacent to its collector substation. Upon completion, the ownership of these NYSEG Facilities will be transferred over to NYSEG.

For more information about the Facility please visit the Facility website at <https://www.prattsburghwindfarm.com/> or contact Prattsburgh Wind at:

Terra-Gen, LLC, Attn: Kevin Sheen, VP of Business Development, 437 Madison Avenue, Ste. A, New York, NY 10022, Toll Free Number: (888) 802-8834, Local Number: (607) 622-8311, contact@terra-gen.com.

Upon filing the Application, Prattsburgh Wind will provide funding in the amount of \$147,000 to be deposited into a local agency account to be made available to local agencies and potential community intervenors for the purpose of contributing to a complete record leading to an informed permit decision as to the appropriateness of the site and the facility, and for local agencies, shall include the use of funds to determine whether a proposed facility is designed to be sited, constructed and operated in compliance with applicable local laws and regulations.

Any local agency or potential community intervenor shall submit a request for initial funding **within thirty (30) days of the date of application filing** and such requests can be made to:

general@ores.ny.gov OR by mail to: Attention: Request for Local Agency Account Funding, Office of Renewable Energy Siting, Empire State Plaza, 240 State Street, P-1 South, J Dock, Albany, NY 12242

BUILDING A SUSTAINABLE TOMORROW

New York's Clean Energy Future

New York is working to cut greenhouse gas emissions by 85% by 2050. To meet this goal, we need to build a clean energy system that is sustainable, resilient, and affordable. The state's energy future will be built on a foundation of clean, renewable energy. Wind energy is a key part of this future, and we are committed to building a strong wind energy industry in New York.

Here are some of the benefits of wind energy:

Efficient modern turbines

Technological advances allow turbines to reach stronger, cleaner winds. The Prattsburgh project will use 10 to 40 modern turbines, each generating sizable amounts of electricity, or a little over 10 percent of the size. Today's wind farms produce the same gross reliability as conventional plants.

Made in the USA & Affordable

The average price of U.S.-made power declined by 16 percent in the last three years. Thanks to the manufacturing community's steady effort, U.S. wind turbines are 40 percent of the U.S. supply chain, fully avoid shipping costs, and have a long life span.

Economic Development Driver

Wind power provides job-paying jobs for over 1.4 million Americans. Wind power is the fastest growing job in the United States, increasing 16 percent over the last decade. The Prattsburgh project will employ 100 workers during construction and 10 plant operators year-round.

20 wind energy jobs created for every 100 jobs in the United States and 100 jobs in the Prattsburgh Wind Farm.

YOU ARE INVITED

About the Project

The Prattsburgh Wind Farm project is a 100 MW wind farm located in the Town of Prattsburgh, Orleans County, New York. The project will consist of 100 wind turbines, each with a capacity of 1 MW. The project will also include a 100 MW substation and a 100 MW transmission line.

Expected Local Economic Benefits

- Approximately 60 full-time construction jobs and opportunities for local construction and construction supply vendors.
- More than \$100,000 annually in direct taxes, equipment and material agreement payments to landowners.
- Approximately \$100,000 in annual revenue for county and local municipalities for property tax relief.
- Approximately \$100,000 in annual revenue for county and local municipalities for property tax relief.
- Approximately \$100,000 in annual revenue for county and local municipalities for property tax relief.

Community Benefits

Local communities benefit from the project in many ways, including job creation, tax revenue, and improved infrastructure. The project will also provide a significant source of revenue for the local government.

Testimonials from Local Supporters

"I am very excited to see the Prattsburgh Wind Farm project move forward. It will provide a significant source of revenue for the local government and create jobs for our community. I am proud to be a part of this project."
