# New UCLA Discovered “Biocell” – Thicker Hair in as Little as 30 Days

## Clinical trial from the University of California results in 74% more hair growth – 100% naturally

Thousands are rushing to get a new hair restoration method based on surprising new studies from the University of California.

It is the world's first and only hair loss solution that revives dead hair follicles. And studies confirm it helps men and women regrow a thick, full head of hair, even after years of balding.

Now, with news of this breakthrough spreading like wildfire — the manufacturers are struggling to keep up with overwhelming demand.

That's because, unlike other methods, it is prescription-free, drug-free, and has no side effects. And while hair transplants can cost \$4,000 or more, this new approach costs pennies on the dollar and doesn't involve going to the doctor's office.

Instead, it leverages cutting-edge technology to prevent hair loss, fill-in embarrassing bald spots, and renourish thinning hair — with results you can see and feel in 30 days or less.

As Jeanne F. from San Diego, CA reports: “*When my husband began to use this product, all he had on top of his head was fuzz. His hair began to grow after 30 days and now it is about 2 to 3 inches long!*”

### Surprising Truth About Hair Loss

It is commonly believed that hair loss is hereditary.

Unfortunately, most people think there is nothing they can do to stop it. However, while many doctors will tell you that thinning hair, a receding hairline, and bald spots are due to your genetics, this is not the whole story.

“While genetics play a role, it's not the main reason you lose hair,” says Dr. Al Sears, the nation's top anti-aging doctor. “And surprisingly it's not just your age, thyroid, hormones, stress, or a vitamin deficiency, either.”

The latest scientific research reveals that hair loss is primarily caused by the stem cells in your hair follicles dying.

“This discovery is a true breakthrough because by reviving these stem cells on your scalp, you can stop hair loss dead in its tracks and trigger new hair growth, even in areas that have been thinning for years,” explains Dr. Sears.

Now, at his world-famous clinic, the Sears Institute for Anti-Aging Medicine in Palm Beach, Florida, Dr. Sears and his team have used this game-changing discovery to develop a brand-new hair restoration formula that is taking the country by storm.

Sold under the name **Re-Nourish**, it is flying off the shelves with men and women of all ages raving about the results it delivers.

“*I have seen a significant improvement in hair growth. Previously, you could see thinning areas at the back of my head and now hair has grown over it,*” says Peter W. from Ontario, Canada.

**Breakthrough** research proves this discovery helps fill-in bald spots, re-nourishes thinning hair, and leads to noticeable growth in as little as 30 days.

And Susan D. from Fort Pierce, Florida reports, “*My hair was thinning. So, I began to use Re-Nourish every day on the front part of my scalp. Now I have thicker hair.*”

**Dr. Al Sears, M.D.**, is America's leading anti-aging expert. He's authored more than 500 scientific papers, and his discoveries have appeared on more than 50 media outlets including, ABC News, CNN, ESPN, Discovery Channel, National Geographic, Lifetime, and many more.

### Regrows Hair In Just 30 Days

Scientists now know that stem cells are the lifeblood of your hair follicles.

Research from the University of California shows they're the reason you're able to grow hair. However, these stem cells aren't always active. In fact, studies reveal they're only active during certain phases of the hair growth cycle.

“Your hair grows in three phases,” explains Dr. Sears. “First, you have the anagen phase, the hair growing phase. Then the catagen phase, when hair gets ready to shed. And finally, the telogen phase, where your hair is pushed from the follicle and falls out.”

As you get older it becomes harder for your hair follicles to complete this three-phase cycle. The results? Your hairs get stuck in the telogen phase. This is when they start falling out and stop regrowing, no matter what you try.

This process doesn't happen overnight, says Dr. Sears.

“At first, your hair dries out, becoming brittle, thin, and harder to style. Then, you start finding hairs on your pillow and down the drain. Finally, you're left with bald spots that age you prematurely.”

Fortunately, **Re-Nourish** puts a stop to this. It revives the dead stem cells in your hair follicles and reactivates your hair's three-phase cycle, triggering new growth in as little as 30 days — even in areas that've been balding for years.

### Reawakens Dead Hair Follicles

For years, scientists couldn't figure out why hair follicle stem cells died.

However, a study from the University of California finally found the answer.,

It has to do with T-cells — an important immune cell in your body. The researchers discovered these

T-cells are the only way to command hair follicles to grow new hair.

More importantly, they showed that T-cells helped revive the stem cells in your hair follicles — spurring new growth, filling in bald spots and natural hairline.

**Re-Nourish** uses a unique blend of all-natural ingredients. By spraying it on your hair once per day, scientific studies show you can revive dead stem cells and improve the appearance of thicker, fuller hair.

For example, the key nutrient of **Re-Nourish** was tested on a group of severely balding women.

After 6 months, nearly 70% of the women saw significant improvement in hair growth. Their hair was noticeably fuller, thicker, and healthier looking. Most exciting of all, they grew new hair on parts of their scalp that had been bald for years.

In another study, Italian researchers gathered a group of both men and women with thinning hair and applied the core ingredient of **Re-Nourish**. After 12 weeks, they reported a staggering 74% increase in hair growth.

“*It's really mind-boggling that my hair started growing back,*” says Zan R., another **Re-Nourish** customer.

With results like this, it's no surprise that demand for **Re-Nourish** is soaring. Thousands of men and women are scrambling to get their hands on the limited-supply available.

**Re-Nourish** is not currently available in any store at any price. But we've secured a small batch for our readers.

### Try Re-Nourish 100% Risk-Free

For the next 48-hours, Dr. Sears is offering readers a risk-free trial of **Re-Nourish**.

# Colleges

## FROM PAGE 1

Northeastern University in Boston. "It also provides a level of confidence for the entire community that we are taking all appropriate measures."

Northeastern and other colleges requiring shots believe they're on solid legal ground. It's not unusual for colleges to require students to be vaccinated for other types of diseases, and a California court last year upheld a flu shot requirement at the University of California system.

But legal scholars say the COVID-19 vaccines' emergency use status moves the issue to a legal gray area that's likely to be challenged in court, and some colleges may take a more cautious approach to avoid litigation.

Harvard Law professor Glenn Cohen, who teaches health law and bioethics, said there's no legal reason colleges wouldn't be allowed to require COVID-19 vaccinations. It makes no difference that the shots haven't been given full approval, he said, noting that many colleges already require students to take coronavirus tests that are approved under the same FDA emergency authorization. But there's also no federal guidance explicitly permitting vaccination mandates.

The biggest clashes could come in states taking a stance against vaccination requirements, he said.

In Florida, Gov. Ron DeSantis this month banned all businesses from requiring customers to show proof of vaccination. The order raises questions about Nova Southeastern University's plan to require students and staff to get vaccinated. The college's president said

he's still confident in the plan, but he also promised to "respect the laws of our state and all federal directives."

The governor of Texas, the country's second-largest state, issued a similar order.

There's a parallel debate about whether to require vaccination for faculty and staff, an issue that employers across the nation are grappling with. At the University of Notre Dame, one of the latest schools to require student vaccinations, shots are still optional for workers. Northeastern is considering whether to extend its mandate to employees.

Even at schools making shots mandatory, there are exemptions. Federal law requires colleges to provide accommodations to students who refuse a vaccine for medical reasons, and most schools are also offering exemptions for religious reasons.

At Brown, students who forgo shots and have no valid exemption must file a petition to study remotely or take a leave of absence next fall, the school's president, Christina Paxson, told students in a letter last week.

But enforcing vaccine mandates will bring its own challenges. Cornell and Northeastern say students will be asked to show proof of vaccination, but there is no widely accepted vaccine credential. Cornell told students they can provide the card given out at their vaccination site, but card formats vary and generally seem like they would be easy to forge.

At Northeastern, officials are still deciding whether students will have to provide a medical record proving they were vaccinated or whether they will be allowed to attest to having been immunized — essen-

tially taking their word for it.

"We would expect students to be honest and forthright about any attestation they make to the university," Henderson said.

Northeastern student Tyler Lee said he thinks requiring vaccinations is the right move because it will help stop the virus' spread and protect the community around the downtown Boston campus. There has been some pushback from parents, but little from students, he said.

"It's Northeastern's decision," said Lee, a senior who is awaiting his second shot. "If I didn't like it, I would transfer. And that's what most students feel."

Ariana Palomo, an incoming freshman at Brown, said the university's mandate sends the message that it's serious about keeping students safe. She was "happy and relieved" when she heard about it, she said.

"I know that I'm going to feel so much safer on campus," said Palomo, 18. "This is the next step in protecting one another and preventing more lives from being lost."

Schools expect some pushback, and Republican student groups on some campuses have opposed mandates, saying it should be a choice.

Colleges are also grappling with what to expect of international students, who may not have access to vaccines in their home countries or who may get shots that are not used in the United States. Some colleges say they're planning to develop arrangements to make shots available for international students when they arrive.

Other colleges are using a lighter touch to promote shots, including at Dickinson State University in North Dakota, which is

exempting students from a campus mask mandate two weeks after they are fully vaccinated.

Many others are hoping a word of encouragement will be enough. Campus officials at Bowdoin College in Maine said it's their "hope and expectation" that all students will get shots. Harvard University officials

"strongly recommend" that students get vaccinated but have stopped short of a mandate.

Some, including Dartmouth College, are waiting for shots to become more widely available before making a decision. Diana Lawrence, a spokesperson for Dartmouth, said officials "cannot make a

determination regarding required vaccination until vaccines are accessible for all students."

## Public Notice

NYSEG has filed tariff revisions November 25, 2020 with the New York State Public Service Commission (PSC) for new electricity and natural gas delivery rates to become effective May 1, 2021. These tariff revisions cover the second annual delivery rate increase under the terms of a three-year rate plan approved by the PSC in November 2020 and they include a \$45.6 million increase in electricity revenue and a \$3.4 million increase in natural gas revenue.

A residential electricity customer with an average use of 600 kilowatt-hours/month can expect an average monthly bill increase of \$1.81. A residential natural gas heating customer using 80 therms/month can expect an average monthly bill increase of \$0.55.

Customers may see some charges prorated on a May or June bill to take into account energy delivered before and after the new electricity and natural gas delivery rates went into effect.

## RESIDENTIAL CUSTOMERS

Regular Residential Customers: The electricity delivery charge will increase 0.335 cents per kilowatt-hour. The per-therm natural gas delivery charge for the 4-to-50-therms block will decrease 0.837 cents per therm and 0.197 cents for the block rate over 50 therms. The electric customer charge will increase by \$0.94, and the natural gas customer charge will increase by \$1.00.

Day/Night and Time-of-Use Customers: The electricity delivery charge will increase 0.347 cents per kilowatt-hour for Service Class 8 and 0.107 cents per kilowatt-hour for Service Class 12. The Service Class 8 customer charge will increase by \$1.10, and the Service Class 12 customer charge will increase by \$1.49.

Additional information about changes in residential electricity and natural gas delivery charges is available at [nyseg.com](http://nyseg.com) (click on "For Suppliers and Partners, then on "Pricing and Tariffs" and then on "PSC Filings").

## NONRESIDENTIAL CUSTOMERS

Information about changes in nonresidential electricity customer charges, electricity demand and energy charges (where applicable), natural gas minimum charges and natural gas therm charges is available at [nyseg.com](http://nyseg.com).

Changes are also in effect for standby, street lighting

## Public Notice

NYSEG has filed tariff revisions November 25, 2020 with the New York State Public Service Commission (PSC) for new electricity and natural gas delivery rates to become effective May 1, 2021. These tariff revisions cover the second annual delivery rate increase under the terms of a three-year rate plan approved by the PSC in November 2020 and they include a \$45.6 million increase in electricity revenue and a \$3.4 million increase in natural gas revenue.

A residential electricity customer with an average use of 600 kilowatt-hours/month can expect an average monthly bill increase of \$1.81. A residential natural gas heating customer using 80 therms/month can expect an average monthly bill increase of \$0.55.

Customers may see some charges prorated on a May or June bill to take into account energy delivered before and after the new electricity and natural gas delivery rates went into effect.

## RESIDENTIAL CUSTOMERS

Regular Residential Customers: The electricity delivery charge will increase 0.335 cents per kilowatt-hour. The per-therm natural gas delivery charge for the 4-to-50-therms block will decrease 0.837 cents per therm and 0.197 cents for the block rate over 50 therms. The electric customer charge will increase by \$0.94, and the natural gas customer charge will increase by \$1.00.

Day/Night and Time-of-Use Customers: The electricity delivery charge will increase 0.347 cents per kilowatt-hour for Service Class 8 and 0.107 cents per kilowatt-hour for Service Class 12. The Service Class 8 customer charge will increase by \$1.10, and the Service Class 12 customer charge will increase by \$1.49.

Additional information about changes in residential electricity and natural gas delivery charges is available at nyseg.com (click on "For Suppliers and Partners, then on "Pricing and Tariffs" and then on "PSC Filings").

## NONRESIDENTIAL CUSTOMERS

Information about changes in nonresidential electricity customer charges, electricity demand and energy charges (where applicable), natural gas minimum charges and natural gas therm charges is available at nyseg.com.

Changes are also in effect for standby, street lighting and economic development rates. Please check page 2 of your bill for bill messages and nyseg.com for detailed information.

Regarding energy supply: If you purchase energy supply from NYSEG, your price will continue to be based on market prices; if you purchase your energy supply from a supplier other than NYSEG (also known as an energy services company or ESCO), what you pay for energy supply depends on your agreement with your ESCO.

ance. He announced that spectator capacity at large-scale outdoor event venues, including professional and collegiate sports and live performing arts and entertainment, will increase from 20 to 33 percent beginning May 19.

Cuomo said this increase will coincide with the previously announced increase in large-scale indoor event venue capacity. Social distancing, masks, health screenings and all other state health and safety protocols remain in effect.

The governor also announced that capaci-

ties would be increased throughout several industries that have proven to safely reopen in accordance with the State's COVID-19 health and safety guidelines, starting May 15:

- Gyms and fitness centers outside of New York City will increase from 33% to 50% capacity.
- Casinos and gaming facilities will increase from 25% to 50% capacity.
- Offices will increase from 50% to 75% capacity.

"We are making tremendous progress in the fight against COVID-19 - our vaccination rates are going up and the positivity and hospitalization rates are going down, so now we are going to open the valves of our economy even further,"

Cuomo said. "We are increasing the capacity limits throughout several industries, including gyms outside of New York City, casinos, offices and large-scale outdoor event venues.

"This is all great news, but we are not out of the woods yet. Washing hands, wearing masks and staying socially distanced are critical tools each of us can use to slow the spread as we continue our efforts to defeat COVID once and for all."

## Public Notice

NYSEG has filed tariff revisions November 25, 2020 with the New York State Public Service Commission (PSC) for new electricity and natural gas delivery rates to become effective May 1, 2021. These tariff revisions cover the second annual delivery rate increase under the terms of a three-year rate plan approved by the PSC in November 2020 and they include a \$45.6 million increase in electricity revenue and a \$3.4 million increase in natural gas revenue.

A residential electricity customer with an average use of 600 kilowatt-hours/month can expect an average monthly bill increase of \$1.81. A residential natural gas heating customer using 80 therms/month can expect an average monthly bill increase of \$0.55.

Customers may see some charges prorated on a May or June bill to take into account energy delivered before and after the new electricity and natural gas delivery rates went into effect.

## RESIDENTIAL CUSTOMERS

Regular Residential Customers: The electricity delivery charge will increase 0.335 cents per kilowatt-hour. The per-therm natural gas delivery charge for the 4-to-50-therms block will decrease 0.837 cents per therm and 0.197 cents for the block rate over 50 therms. The electric customer charge will increase by \$0.94, and the natural gas customer charge will increase by \$1.00.

Day/Night and Time-of-Use Customers: The electricity delivery charge will increase 0.347 cents per kilowatt-hour for Service Class 8 and 0.107 cents per kilowatt-hour for Service Class 12. The Service Class 8 customer charge will increase by \$1.10, and the Service Class 12 customer charge will increase by \$1.49.

Additional information about changes in residential electricity and natural gas delivery charges is available at [nyseg.com](http://nyseg.com) (click on "For Suppliers and Partners, then on "Pricing and Tariffs" and then on "PSC Filings").

## NONRESIDENTIAL CUSTOMERS

Information about changes in nonresidential electricity customer charges, electricity demand and energy charges (where applicable), natural gas minimum charges and natural gas therm charges is available at [nyseg.com](http://nyseg.com).

Changes are also in effect for standby, street lighting and economic development rates. Please check page 2 of your bill for bill messages and [nyseg.com](http://nyseg.com) for detailed information.

Regarding energy supply: If you purchase energy supply from NYSEG, your price will continue to be based on market prices; if you purchase your energy supply from a supplier other than NYSEG (also known as an energy services company or ESCO), what you pay for energy supply depends on your agreement with your ESCO.
